In addition to the inspections detailed above, Drs. Osler and Clement examined at Montreal 1,000 hogs from Western Canada, finding 4 infected.† The French inspectors report the examination of 103,528 pieces of American meat, containing 2,080, or about 2 per cent., infected.‡ The German inspectors, during the year 1880, examined 78,880 pieces of American pork, of which we have record, and found 1,265, or 1.6 per cent., to contain trichinæ; and in 1881 they examined 96,485 pieces, finding trichinæ in 2,414, or 2.5 per cent.§

Taking all the examinations of American pork thus far made, both at home and abroad, and we have a total of 298,782, during which trichinæ were found 6,280 times, being 2.1 per cent., or 1 to 48.

It would seem that this number of pieces, considering the close agreement between the results reached by American microscopists over this limited territory and those obtained by the inspectors of American pork in Europe, perhaps represents the condition of American pork so far as examined.

In Europe there are some localities where the inspections have shown a greater proportion of infection than the average in the United States. At Stockholm 2,000 hogs contained 58 infected ones, or 2.9 per cent.; at Tannefors 300 hogs contained 10 infected ones, or 3.3 per cent.; and in 112 Bavarian hams 3 were trichinous,‖ while Dr. Rine, of Linten, reported 4 infected animals in 45, or nearly 9 per cent.¶ In Prussia,

¶ Meissner, Schmidt's Jahrbücher, No. 130, page 118. Quoted by Glazier Rep., page 68.

where the only really effective inspection is made, the proportion found infected with trichinæ was, in 1876, 1 to 2,000; in 1877, 1 to 2,800; in 1878, 1 to 2,000; in 1879, 1 to 1,632; in 1880, 1 to 1,460; in 1881, 1 to 1,839; in 1882, 1 to 2,056.* The number of inspectors in 1882 is placed at 20,140. Several inspectors at Erfurt were removed on account of incapacity, and complaints were made as to the condition of the microscopes. Indeed, it seems that the village barber is usually trusted with the inspection of hogs in the smaller towns and villages, and that he is required to make but three preparations from each animal.

Frequently, or generally, the specimens for examination are taken from the hams and hard muscles, where the trichinæ are least abundant, instead of from the pillars of the diaphragm and tenderloin, where they are most easily found. Since the great epidemic of trichiniasis in Saxony it seems to be admitted that these inspections are totally inadequate, and in order to make them more efficient the magistrates have awarded sums varying from 15 to 30 marks for each trichinous animal discovered. As a result of the rewards, and possibly of the fear excited by the recent terrible outbreaks of the disease in people, an increased number of infected hogs seem to have been discovered.† These facts, as well as the extraordinary number of people recently infected from eating pork which had been inspected, are sufficient to demonstrate that large numbers of trichinous hogs pass the inspectors without being discovered, and that consequently the figures given above are not a correct representation of the proportion of hogs which are infested with this parasite.

In nearly every country of Europe hogs have been examined and a certain number found to contain trichinæ, but the records do not seem to have been carefully kept; the data are not fully given, and there is reason to doubt the accuracy of the work. It is difficult, therefore, to reach any satisfactory conclusion as to the proportion of infected hogs. We may safely assert, however, that no country can with reason claim that its hogs are free from trichinæ, while the probability is that European hogs generally are infected in a much larger proportion than is at present admitted.

In some parts of Europe rats seem to have been examined more carefully than pigs; thus in Saxony one-half of the rats from flayers contain trichinæ, and 20 per cent. of all those caught are similarly infected; in Moravia, sixteen out of one lot of twenty rats were infected, nine of a second lot of twelve were infected, seven of a third lot of eight were infected. In Klederling, a suburb of Vienna, seven out of forty-seven, and at Untermeidling two out of thirty-one were infected.‡ In France, where the authorities now deny the existence of trichinæ except as imported, and where one of the reasons for prohibiting American pork is the alleged fear of scattering the parasite over the country,§ the only outbreak of trichiniasis on record was caused by the flesh of a native hog; and the rats from the ditches and sewers of Paris, examined by Drs. Goujon and Legros, were infected in a very large proportion, one lot of thirty-two contained three with trichinæ, and of seventy-two rats, five were full of these parasites.‖

EFFECT OF THE CURING PROCESS ON THE TRICHINÆ.

If we admit that about two per cent. of American hogs contain trichinæ, it becomes a matter of the greatest importance for us to inquire into the condition of the parasite after it has been subjected to the action of salt a sufficient time to enable the pork to be carried from the packing-houses in this country to the consumers abroad. And here the effect on the consumers is entitled to more weight as a matter of evidence than those scientific experiments which are simply designed to prove the life of the parasite; for the trichinæ may sometimes still be living but not have sufficient vitality to develop and reproduce itself. Such trichinæ would be perfectly harmless even though the pork were eaten without previous cooking.

In France it is said in the report of Academy of Medicine of Paris, that 95,000,000 kilograms or 200,000,000 pounds of American pork products had been consumed from 1876 to 1881 without causing a single case of disease. And notwithstanding the fact that large quantities of such pork have been consumed for a number of years, the one outbreak of trichiniasis at Crépy, which was clearly traced to a French hog, is the only instance of the appearance of this disease among people that is recorded in that country.

In Germany, where it is the habit of the people to eat pork without cooking, trichiniasis among people is common, and it has been very frequently asserted in some quarters that many of these cases were due to American pork. During the recent terrible epidemic at Emersleben and neighboring towns, Dr. Brouardel, of the Paris Academy of Medicine, went to Prussia to investigate the origin and nature of the disease and learn what he could in regard to the healthfulness of American pork. Not only did he find that these particular cases of trichiniasis were due to German hogs, but such eminent and well-known authorities as Professors Virchow and Hertwig, who have charge of the pork inspection at Berlin, asserted most positively that no case of trichiniasis in Germany had ever been clearly traced to American pork, although the people, as is their habit, persist in eating it raw.*

The so-called outbreak of trichiniasis on board the English reformatory school-ship *Cornwall* has been much quoted as illustrating the danger of American salted pork, but when closely investigated it proves to be an illustration of jumping at conclusions without evidence, as always seems to have been the case where trichiniasis has been attributed to our meats. This outbreak of disease occurred between September 23 and October 23, 1879, and forty-three boys were attacked out of a total of two hundred and sixty-two boys and fifteen officers on the ship. The idea that the disease was trichiniasis seems to have been an afterthought, for the only examination made was of the body of one of the boys two months after it had been buried. Doctors Powell and Cory thought they found trichinæ in the muscles, and concluded the disease must have originated from the American pork, which was used on board the ship; but no examination of this pork appears to have been made and we are not at all certain that English pork was not used as well. Fortunately, specimens taken from the corpse were submitted for examination to that well-known scientist, Dr. Charlton Bastian, and he pronounced the worms not trichinæ at all, but a hitherto unknown nematoid which he classed with the genus *Pelodera*, calling the species

*P. Brouardel L'Epidemic de trichinose d'Ermesleben. Bul. de l'Acad. de Méd., Paris, 1883, p. 1501.

Pelodera setigera. Dr. Cobbold, who is one of the very best authorities on this subject, asserts very positively that the worm was the *Pelodera teres*, and had probably invaded the body after death.* As this worm has never been known to exist as a parasite in the hog, the assumption that the disease was produced by eating pork is an entirely gratuitous one, and the further assumption that it was due to the American pork is evidently without the least foundation.†

England has been one of the largest consumers of American bacon, hams, and pork, taking, even in 1880 and 1881, when this trade reached its largest proportions abroad, five times as much as either France or Germany. Belgium has also been a large consumer. The *Comité consultatif d'hygiene publique de France* said in a recent official report that in order to determine the danger from the use of American pork they had recently made new inquiries in England and Belgium. In England they were told that trichiniasis was so completely unknown that it was never mentioned, either in the newspapers, the hospitals, or in teaching medicine. And this was also the case in Belgium.‡

We may conclude, therefore, that notwithstanding the enormous quantity of American pork which has been consumed in Europe, there is no reliable evidence that any cases of trichiniasis have ever originated from its use.

We can now consider more intelligently the conflicting testimony in regard to the condition of the trichinæ in American salted meats when they reach Europe. In 1879 it was stated in the German reports that although a very considerable number of examinations had been made at Minden, no living trichinæ had been demonstrated in preparations of American pork.§ This statement was repeated in 1880 by the same authority.‖ In France Colin and most others who have experimented with the trichinæ of American meats have found them dead and incapable of producing any injurious effects when fed to other animals. It was also found that even slight salting killed all the trichinæ within two months. Colin concludes, therefore, that the danger from eating American pork, considering the time that it must have been in salt before it can reach Europe, is slight or inappreciable.¶ Fourment** and Chatin†† have contested these results, but their opinions are so extremely radical as to lose much of their force on this account. It is not impossible that in certain very rare cases the capsules containing the trichinæ may have become so dense or so impregnated with lime salts as to protect the parasites for a longer time than usual against the action of the brine; but the complete innocuousness of our pork as demonstrated by its use on so large a scale in England, France, Belgium, and Germany, with no cases of disease clearly traced to it, is the strongest possible evidence of the destruction of the trichinæ during the process of curing.

Dr. Brouardel, of the Paris Academy of Medicine, who investigated the recent outbreaks in Ermsleben, has furnished new and very important evidence on this point ‡‡ He learned that the meat of the dis-

eased hog was chopped and mixed with sufficient salt to preserve it, and those who ate of this meat soonest after the killing of the animal were not only more severely affected, but their symptoms appeared in a shorter time. The animal was killed the 12th of September, and of those who partook of this meat on the 13th 33 per cent, died; while of those who did not eat of it until the 18th and 19th none died. In fact, there was a very regular gradation in the intensity and fatality of the cases when they were classified according to the number of days which had elapsed between the killing of the animal and the eating of the meat. It is very evident that the parasites were rapidly losing their vitality and their power to produce disease. M. Colin thought this was due to the effects of the slight salting, and M. Brouardel seemed willing to admit this.

If, then, so marked a result is produced in a single week by the slight salting which this chopped meat received it is very plain that the high degree of salting to which our packed meats are subjected must be sufficient in the vast majority of cases to completely destroy all trichinæ and to make the meats perfectly safe. The question cannot be narrowed down for this reason to a comparison of the proportion of animals affected with trichinæ in America and Europe, even if this were actually determined, which is not the case, but it necessarily turns on the healthfulness of the meats of these countries at the time when they are offered for consumption. And when the matter is viewed from this stand-point the very great superiority of American salted meats over even the inspected German hogs is too apparent to be questioned by unbiased scientific men.

In the latest discussion on this subject in the Paris Academy of Medicine M. Proust said:

The question is not a determination if American meats contain trichinæ, but in what condition these trichinæ are found; if they are alive or dead; if they are injurious or not; in a word, if the consumption of American salted meats is dangerous or not to the public health.

In this connection I ask permission of the academy to read a passage from a most interesting letter that I received this morning from Dr. Gibert, a health officer and distinguished sanitarian of Havre:

"In 1881," says M. Gibert, "American salted meats entered largely into the food supply of the working class of Havre; but in regard to this it is important to divide the consumers into two classes:

"1. The people buying American salted meat for family consumption always cooking it and never eating it raw. The inhabitants of the quarters of Eure and Saint Francois nourished themselves exclusively with it.

"2. The workmen employed in handling the packages of salted meat, who during fifteen years continued to eat this meat raw. MM. Bouley and Chatin could easily have seen in their walks on the wharves of Havre workmen breakfasting on a piece of bread and a slice of raw bacon, eating not only the fat but all parts of the meat. Any one could repeatedly see these workmen day after day, even when at work, eating pieces of raw salt pork without fear.

"It is certain, then, that at Havre, for more than fifteen years, hundreds of workmen consumed salted meats, trichinous as well as not trichinous, and never during this long period of years has a single workman been incommoded by this food.

"No physician in Havre has seen a disease resembling in the least the Ermsleben disease described by MM. Brouardel and Grancher. Such an assertion demands some proofs which it is easy for me to give.

"I would remark, in the first place, that if the meat consumed raw had affected the health of the workmen employed in such large numbers handling salted meats the directors would have soon discovered the vacancies in the ranks of the workers. After an investigation carefully made by me, and which it is easy to make anew officially, it was found that never had there been a knowledge of such a fact in any of the large importing houses of Havre.

"The workmen, after the arrival of the Paris savants, took pleasure in eating the pieces themselves that were pronounced trichinous, so certain were they of their perfect harmlessness. And neither during the stay of these gentlemen at Havre, nor afterwards, was there a single case of disease, or even a simple indisposition.

"In the second place, I would remark that during this period of fifteen years we have had no serious epidemic of typhoid fever. That of 1880–1881, the only one at all serious which has occurred in our city, affected the quarters occupied by the well-to-do or rich people, while the quarters where the American meat was consumed suffered very little. There was then no possibility of an error on the part of the physicians, even if such a gross error could have been committed.

"It follows, from the facts that I have just related, that the salting of American pork is sufficient to kill the trichinæ; and if, in addition to this cause of security which has been experimented upon by the workmen of Havre for fifteen years, we add the cooking, as it is practiced everywhere in France, the conclusion is forced upon every one not prejudiced in advance that American salted meats are absolutely incapable of producing trichiniasis in the consumers."

In the same discussion M. Leblanc said:

The discussion appears to me exhausted; however, I ask permission of the academy to communicate in support of the note of Dr. Gibert the following observation. It was furnished to me by the principal meat inspector of Paris:

The veterinarians under his direction examined during six months in 1881 5,000 kilograms (11,000 pounds) of American salted meat per day. Sixty thousand kilograms were seized as trichinous, and a large part was shipped to England. During these six months the employés and draymen of the dealers in salted meats who came to the station of Batignolles ate meat in presence of the inspectors which was notoriously infected with trichinæ. Not one of them became sick.

One of these, M. R., employed by Calman, 11 Rue Begère, was accustomed to this, and took pleasure in eating the parts of the pork in which the microscope had demonstrated the presence of trichinæ. To-day, after three years, he is well; more than this, having been received at Beaujon as a patient of our colleague M. Tillaux, for a fractured arm, and having related his bravado, he was the subject of a special examination; his muscular tissue was recognized to be healthy, and no trichinæ could be found in it.*

EFFECT OF COOKING ON TRICHINÆ.

If the trichinæ of American pork are destroyed by the curing process in a time much shorter than is necessary for such meats to be shipped from our packers to any of the consumers in Europe, it may seem superfluous to go into the consideration of the effect of cooking, and yet it is not wholly so. Under certain conditions it would appear that the trichinæ do resist the curing process for a considerable time; and though these conditions occur so seldom that uninspected salt meats are much safer than inspected fresh ones, it is still worth our while to inquire if perfect safety against infection can not be guaranteed where a reasonable degree of cooking is practiced.

There is some conflict of opinion as to the temperature necessary to destroy trichinæ, and yet the results of experiments do not differ so widely. Vallin† concluded that a temperature of 54° to 56° C. (129 to 133° F.) kills most of them, and that 60° C. (140° F.) is safe. Fiedler's experiments show that trichinæ are quickly killed at 62.5° C. (144.5° F.) Fjord's investigations show that the interior of a ham weighing 8 pounds reaches 65° C. (149° F.) after boiling two hours and seventeen minutes; one weighing 10 pounds, after three hours and six minutes; one weighing $14\frac{3}{4}$ pounds, after four hours and eleven minutes; and one weighing 16 pounds, after four hours and thirty-seven minutes. Vallin found that a ham weighing 12 pounds had an interior temperature of 65° C. after three and a half hours' boiling. These results, therefore, correspond very closely. Hein‡ found that a 2.2-pound roast reached a temperature in its interior of 69° C. after one and a half hours. Rupprecht observed that rapidly fried sausage only had an interior temperature of 53.5° C.,

‡C. Hein. Rep. of case of trichiniasis, with remarks on diagnosis and prophylasis Mitth. d. ver. d. Aertzte in Nied Pest, 1883.

and was still capable of producing infection. Colin* had a steak weighing half a pound boiled for ten minutes, when its appearance on cutting was white, without any red points. It still contained living trichinæ, however, which, being fed to a bird, were afterwards found developed in the intestine.

The indications from these experiments are that while fresh meats may not always be cooked sufficiently to kill trichinæ, salted meats are almost invariably cooked for more than the necessary time. This conclusion seems also to be borne out by the experience of people in all parts of the world. Trichiniasis from cooked meats is an exceedingly rare disease. In the United States, where pork in its various forms is consumed to as large an extent as in any part of the world, and where more than one-fourth of the hog product of the world is eaten, it is seldom, indeed, that we hear of any infection among our native population, because the habit of eating raw meats, particularly when fresh, does not prevail. The few cases which occur from time to time are nearly always among Germans and are traced to the ingestion of pork in some form, which has not been cooked at all.

In this connection Dr. Brouardel brought out a very interesting fact in his investigation of the epidemic at Ermsleben. No cases of disease occurred there except with those who ate the meat raw. The family of Herr Heine, the mayor of Ermsleben, consisting of five persons, consumed some of this same meat in the form of sausage on the 15th of September. The sausage was cut in pieces about 1½ inches in diameter and was cooked by placing in boiling water for only five minutes. Not one of this family suffered in the least degree, but the cook who ate a small piece of the sausage before it was cooked, contracted the disease. Boiling for so short a time has never heretofore been considered sufficient to destroy this parasite, and yet in this instance it undoubtedly protected the consumers from the infection.

At the session of the Paris Academy of Medicine, January 29, 1884, a report was presented by the special committee appointed to consider (1) the report of M. Brouardel in regard to his mission to Ermsleben, (2) the communication of M. Grancher on the symptoms and pathological anatomy of the epidemic of Ermsleben, and (3) a letter from the minister of commerce asking the advice of the academy in regard to the question of trichiniasis. In this report appear the following points of interest:

> A considerable invasion of German rats has been noticed of late years after the freezing of the Rhine, and M. Brouardel no longer sees the same species of rats at the morgue that he formerly found there. M. Laboulbene and M. Colin had occasion to observe quite a large number of trichinous rats that had been found in the sewers of Paris. Finally, we are also invaded by the trichinæ which penetrate France with the German hogs, which are infected in the proportion of 1 to 1,000 to 1 to 2,000.
>
> Without doubt we do not know precisely, scientifically, the degree of activity of the trichinæ according to the time that they have been encysted in American meats, their vigor, the condition of the meat and the stage of the curing—desiderata which future experiments can alone supply.
>
> The same ignorance exists in regard to our own hogs—are any of them trichinous? If so, what proportion? What is the condition of those in the suburban zone surrounding Paris which, nourished like the sewer rats, may be trichinous like them.
>
> It remains for us to speak of the action of American salted meats in the production of the epidemics of trichiniasis in Germany which have been observed at Dusseldorf, Rostock, and Bremen, but our information in this respect is entirely insufficient, and according to the indications that M. Brouardel has already presented to the academy the exotic origin of these epidemics is denied by several of the principal German savans, and particularly by M. Virchow. Our Government might address the German Empire in regard to this in order to have official documents; but the results of such

---

*G. Colin. Sur les trichines. Bulletin de l'Acad. de Med., 1881, 243.

an inquiry have for us, from the stand-point now under discussion, an almost secondary importance. If in fact we, like the English and the Belgians, have been free from epidemics of trichiniasis although we received salted trichinous meats and even fresh or slightly salted pork of German origin more dangerous than that which comes from Chicago or Cincinnati, since it had only to cross the Rhine and the Vosges, this is because our culinary habits are entirely different. Let us remark also that in America it is above all the Germans who are affected with trichiniasis—an additional proof of the effect of culinary habits.

But already we can conclude from the developments which precede that no case of trichiniasis having been noticed either in France or in England from the consumption of American salted pork, the importation of these meats may be authorized in France. This decision has been reached by the commission by a vote of 5 to 1.

At the same session of the academy M. Lunier presented the following table, showing the importation of salt pork products for eight years in kilograms:

Year.	United States.	England.	Germany.	Other countries.	Total.
1876	3,269,960	1,875,736	702,530	1,047,920	7,896,146
1877	12,462,078	1,889,905	994,234	1,078,505	16,424,722
1878	28,102,290	1,454,884	921,167	1,314,437	31,792,778
1879	31,784,913	1,107,691	1,039,673	1,742,854	35,675,131
1880	34,246,195	1,233,228	846,174	2,387,671	38,713,268
1881	17,123,767	686,525	723,465	1,182,474	19,716,231
1882	4,611	1,109,870	1,055,783	1,074,259	3,244,523
1883	52,396	.....	1,136,793	2,091,779	3,274,966

It follows from this table that the importation of American salted meats, which had augmented rapidly from 1876 to 1880, began to diminish in 1881, after the decree of February 18, 1881, which prohibited the importation of salted meats from the United States into all the French territory. The 4,611 kilograms which appear in the year 1882 came from a stock taken from the warehouses December 31, 1882. The 52,396 kilograms of 1883 were introduced after the promulgation of the decree of November 27, 1883, which removed the interdiction.

The same gentleman presented the following table, which shows the number of live hogs imported into France in the years 1877 and 1882, and the countries from which they came:

Countries.	1877.	1882.
Germany	15,983	16,165
Belgium	57,806	68,716
Spain	4,234	2,204
Italy	66,366	9,567
Switzerland	964	1,586
Other countries	941	913
Total	146,294	99,148

In this connection he remarked: "It is then, to-day, Belgium and Germany which furnish us the greatest number of living hogs. Is it not from this direction that there is reason to fear the invasion of trichinæ and trichiniasis?" *

TRICHINIASIS IN AMERICA AND EUROPE.

The number of cases of trichiniasis occurring among people in the United States is actually very small. The records of these have not been brought together in a thorough manner, but, as far as we have been able to ascertain, the disease has never occurred in more than three or

*Bulletin de l'Académie de Médecine, 1884, pp. 189–211.

four localities in a single year, and during the last twenty years there does not appear to have been more than thirty different outbreaks. In none of these outbreaks have a sufficient number of people been attacked to allow of the term epidemic being applied to them in any proper sense of the word. Usually but two to four people have been affected at a time, and never so far as we have been able to learn, more than ten. All have resulted from eating raw or very imperfectly cooked meat, and in very few of the instances had the pork undergone any preliminary curing. Some of the cases reported as trichiniasis were never demonstrated to be this disease, but seem to have been the result of poisoning by meat which had been preserved without sufficient salting until it had undergone partial decomposition. It has long been known that extremely virulent poisons are produced during putrefaction of flesh, and the effects of these have been observed so often in Germany when sausages were eaten that they have received the special name of *wurstgift* or sausage poison. This does not seem to be understood by many American physicians, and so nearly every case of sickness arising from the consumption of the raw or imperfectly cooked flesh of hogs in the various forms in which it is preserved is reported as trichiniasis. So that while it may be true that some cases have not been reported or brought to our notice it is equally true that not all the cases reported as trichiniasis were really due to trichinæ.

In the debate which occurred in the French Senate June 20, 1882, M. Testelin referred to seven epidemics produced by American pork.* One of these so-called *epidemics*, consisted of a single case of the disease which occurred in New York. Another was the disease on the English ship Cornwall, which was at first supposed to be typhoid fever, and was only decided to be trichiniasis when a body was exhumed two months after burial, and worms, which the examining physician took to be trichinæ, were found in the muscles. But we have it on the very best authority that these worms were not trichinæ, and there is no evidence even that they caused the disease. The most probable theory is that they gained access to the body after burial. No trichinæ or other parasites were found in the American meat consumed on this vessel.

Another epidemic he referred to as having occurred at Bremen, in which forty persons became diseased from eating an American ham. M. Chatin has mentioned this outbreak again and again, and insists that it is a demonstration of the dangerous character of American meats. The charge was so serious that it has been investigated as carefully as possible. M. Testelin does not give the authority who is responsible for this statement, nor does he so much as say in what year the outbreak occurred. M. Chatin is more definite, however, and says the disease was observed in 1875.† He refers to the *Traite d'hygiéne publique et privée*, by Pronst, published in 1877, as his authority for asserting that forty persons were affected at this place as the result of eating an American ham. By consulting the yearly health report of Bremen for 1875 we find that no cases of trichiniasis in man are recorded during that year. There is simply a statement that two trichinous hogs (native animals) were discovered near Bremen. The outbreak of trichiniasis referred to by Testelin and Chatin seems to have been one that occurred at Hastedt, near Bremen, in 1874 during which forty-two persons suffered, but all recovered. This epidemic was first announced August 15, and was caused by eating the flesh of a hog that had been slaughtered July 31. The diagnosis was confirmed by microscopic examination of a piece

* Chatin, La Trichine, &c., p. 210. † *Ibid.*, p. 165.

of muscle from one of the sufferers.* There had been a habit here, as in most other parts of Germany, of attributing all cases of this disease to American pork without investigation and this may have been the origin of the story so industriously circulated by M. Chatin. At all events this is the only extensive epidemic of trichiniasis which is recorded as occuring at or in the vicinity of Bremen from 1873 to 1877, inclusive, and there is no question but that this was caused by a native animal.

One of the other epidemics referred to occurred in Madrid, and another in Liège, in Belgium. It is doubtful if, in either case, the trouble was traced to our pork; but no facts in regard to them have yet been obtained.

M. Chatin, in his recent work on trichinæ and trichiniasis, states that "such is actually the frequency of trichiniasis in the United States that the newspapers consider themselves happy if they have but a few deaths to record each week." Whether any one in France believes this remarkable exaggeration may be considered questionable, but still it is seriously advanced by a scientific man as a reason for prohibiting our pork. Those who see the American papers know very well that not only weeks but months elapse when no deaths are recorded from this cause. And if it were not for our foreign population, who have brought with them their dangerous habits of eating uncooked pork, America would be as free from trichiniasis among her people to-day as is France.

When we examine the records of Germany, however, we find that, in spite of the small proportion of infected hogs which they admit, in spite of the inspection, there occur a very large number of cases of this disease. In 1877 there were 16 in Königsberg, 1 in Potsdam, 6 in Berlin, 98 in Stettin, 1 in Oppelu, 61 in Merseberg, and 52 in Minden. In 1878 there were 27 in Königsberg, 8 in Marienwerder, 102 in Potsdam, 50 in Stettin, and 30 in Merseberg. In 1879 there were 55 cases in Königsberg, 93 in Frankfort-on-the-Oder, 82 in Berlin, 7 in Marienwerder, 3 in Schleswig, 60 in Erfurt, 7 in Merseberg, and several in at least three other places. In 1880 there were 149 in Merseberg, 83 in Erfurt, 49 in Frankfort-on-the-Oder, 3 in Marienwerder, 29 in Königsberg, and 16 in Berlin. In 1881 there were 3 in Marienwerder, 15 in Berlin, 10 in Frankfort-on-the-Oder, an indefinite number in Posen, 4 in Stettin, 148 in Merseberg, and 58 in Erfurt. In 1882 there were 3 cases in Berlin, 60 in Cologne, 4 in Merseberg, 4 in Heiligenstadt, and several in Posen.† In 1883 the remarkable epidemic in Saxony occurred from eating pork which had been slaughtered and inspected in the town of Ermsleben. In Ermsleben 257 persons contracted the disease, and 50 died.‡ In Deesdorf there were 40 cases and 9 or 10 deaths; in Nieuhagen 80 cases and 1 death. There were a number of other epidemics during the year, the statistics of which have not yet been published, but we have already recounted sufficient to show that trichiniasis is incomparably more frequent in Germany than in America.

Indeed, for the seven years from 1877 to 1883, inclusive, the very incomplete statistics given above show that 1,835 people contracted the disease, being an average of 262 cases per annum. When in addition to this we consider that the United States is really the greatest pork-eating nation in the world, that we consume more than four times as many hogs as are raised in Prussia, that a considerable portion of our population consists of Germans who retain their habit of eating raw

* Dritter Jahresbericht über den öff Gesundheitszustand, &c., in Bremen, in Jahre 1874.

‡ Deutsche Mec. Woch., 1884, No. 1, p. 7.

pork, the wonder is, not that we have a half dozen or a dozen cases of trichiniasis in a year, but that we do not have many times this number; and we see no way of explaining the comparative immunity which our people enjoy except by the conclusion that our pork, even when fresh, is not so much more dangerous than the German article, as the results of microscopic examination thus far published would lead one to suppose.

REPORTS OF BOARDS OF HEALTH.

The commissioners prepared and forwarded copies of the following circular letter to the various State and city boards of health:

With a view to ascertaining the extent to which trichiniasis prevails in the United States, the following questions have been formulated, to be addressed to the secretaries of the various State and city boards of health.

As it is desirable that the report of the commission should be presented to Congress at once, the undersigned would beg as speedy a response as possible:

1. How many cases of trichiniasis have come to the knowledge of your board? Please give dates as far as practicable.
2. In how many cases was there a microscopic identification of the trichinæ in the human subject and in the suspected meat?
3. How many of the cases were fatal?

Responses have been received from thirty-nine of these boards; of this number twenty-two give negative replies; they were as follows: Alabama, Arkansas, California, Delaware, District of Columbia, Kentucky, Louisiana, Maryland, Minnesota, Missouri, Albany (N. Y.), Ohio, Pennsylvania, Rhode Island, Tennessee, and Virginia.

The secretary of the State board of Alabama says that no case has ever occurred in that State, though infected meat has been reported.

The secretary of the health department of Maryland says that after an examination of the records from January 1, 1834, to December 31, 1883, covering a period of fifty years, he finds no cases of trichiniasis reported.

The health officer of Cleveland, Ohio, says that in 1872–'73 there were some cases of trichiniasis reported in that city, but no definite record of them can be found.

CASES OF TRICHINIASIS REPORTED.

Cases of trichiniasis are reported by the following boards, viz:

Connecticut.—Three in 1882, all from the same pork and at the same time. The suspected meat was examined by Mr. C. W. Chamberlain, of Hartford, secretary of the board, and others. No deaths resulted.

Illinois.—The registrar of vital statistics for the city of Chicago says:

Three deaths from trichiniasis have occurred in this city within the last ten years. Two of these occurred in December, 1880, and the last one in January, 1882. There was a microscopic identification in the two first cases, and probably also in the last.

The secretary of the State board of health says:

Between 1866 and 1881 there had been seven outbreaks of trichiniasis in Illinois, resulting in eleven deaths out of some seventy or eighty cases. Since 1881 there have been two deaths in Chicago; three outbreaks resulting in three deaths, and some twenty-five or thirty cases in 1883, and one in Fulton County in 1884, details of which have not yet been received. In nine of the fatal cases the disease was identified by microscopic examination of the human subject, and of the suspected meat in all cases.

Iowa.—The secretary of the State board of health reports as follows:

Since 1880, in compiling deaths, I have found three recorded as from trichiniasis; in 1880, two in Adams County, probably genuine cases; in 1881, one in Butler County, a very doubtful case. None of the cases were identified by microscopic examinations.

Massachusetts.—The health officer for the State board of health for Massachusetts says:

The number of cases of trichiniasis that have come to the knowledge of the board are as follows:

	Cases.
In Saxonville, Mass., February, 1870	3
In Lowell, Mass., March, 1870	6
In Framingham, Mass., December, 1872	3
In Becket, Mass., May, 1873	4
In Wakefield, Mass., March, 1880	3
Total number of cases	19

One death occurred in the outbreak at Saxonville.

Identification of trichinæ was made in the fatal case at Saxonville by *post mortem*. In the Lowell cases trichinæ were identified in the pork, as also in the Framingham cases. In the seven remaining cases at Becket and Wakefield the evidence was symptomatic and by exclusion, *i. e.*, members of families who had not partaken of uncooked pork were exempt from infection. The evidence, however, was satisfactory to the board.

Michigan.—The secretary of the State board of health of Michigan gives the following detailed report of ten outbreaks of trichiniasis in that State since December, 1866:

1. A fatal case of trichiniasis occurred in Detroit, Mich., in December, 1866. Upon *post mortem* examination large numbers of trichinæ were found in the abdomen, and a lesser number in the muscles of the leg. (Dr. Herman Kiefer.)

2. Five cases occurred in Port Huron, Mich., in January, 1874, with two deaths. The cases occurred in one family, and were caused by eating salted smoked-ham. (Reported by Dr. M. Northup, Port Huron, Mich.)

3. Several cases of trichiniasis occurred near Flint, Mich., in the fall of the year 1875. Cases also occurred there in June, 1876. In the last outbreak, at least, trichinæ were found by microscopic examination in the meat, and also in a particle of muscle of the leg of one of the patients. (The cases were in the practice of Dr. A. B. Chapin, of Flint, Mich., now of Detroit.)

4. Five cases occurred in Otsego Township, Allegan County, Mich., in February, 1877. All recovered. All were in one family, the members of which had eaten raw ham. Members of another family ate a small quantity of the meat, and were also sick, but recovered without medical attendance. Trichinæ were found in the meat by microscopic inspection.

5. Three cases, with one death, occurred in the city of Iona, Mich., in 1878, in the family of Mrs Strunck. The meat was eaten raw. A microscopic examination of the meat was made, and, I believe, trichinæ were also identified in the human subject.

6. I am informed that cases, and one or more deaths, occurred in the vicinity of Iona, Mich., in the summer of 1880, in the practice of Dr. H. B. Barnes. Trichinæ were found in the pork, and also, I believe, in the muscles of those who died.

7. Five cases and two deaths occurred in the family of a German named Rumsock, in Lansing, Mich., in the last of January, 1881, and the first of February, 1881. The cases were in the practice of Dr. Dolan, of Lansing, who has since died. Great numbers of non-capsuled trichinæ were seen by Dr George E. Ranney, myself, and others in the muscles of a boy who died. (I still have slides showing the trichinæ as taken from the muscles of a person in the family who died.) Part of the meat was eaten raw. It was not examined for trichinæ; but the hog was sick and was killed to avoid loss of the animal.

8. Five cases of trichiniasis occurred in Vickeryville, Montcalm County, Mich., in December, 1883. All resulted from eating the flesh of one hog. One death occurred. The boy who died had at different times eaten small pieces of pork only partially cooked by holding them on a fork before the fire. He had also eaten raw, on several occasions, little bits of sausage made from the flesh of the hog. Two others had eaten the meat cooked, but probably rare-done. The other person had eaten raw a little bit of sausage, perhaps half an ounce, but the rest of what he ate was well cooked. Trichinæ in abundance were found in the pork, specimens of which are now in this office. (Reported by Dr. J. Tennant, Carson City, Mich.)

9. Four cases occurred in January, 1884, in the city of Niles, Mich. One death has occurred and three persons are now seriously sick. The pork contains great numbers of trichinæ, as determined by observations made at Niles, Ann Arbor, and in this office.

Further details as to the five cases occurring at Port Huron, and also of the case at Detroit, are given in the published report of this board for the year 1875; and of those occurring in Otsego, in the report of this board for the year 1877.

Such answers as I am able to give to the four questions asked by your commission have been summarized from the foregoing particulars, and are given with each question, as follows:

"Question 1. How many cases of trichiniasis have come to the knowledge of your board? Please give dates as far as practicable.

"Answer 1. I am able, at this time, to send you facts concerning *ten* outbreaks of trichiniasis occurring in Michigan. In three of these the number of cases was not stated. In seven outbreaks there was a total of twenty-eight cases. The dates are given in most instances, in the report accompanying this.

"Question 2. In how many cases was there a microscopic identification of the trichinæ in the human subject and in the suspected meat?

"Answer 2. In two outbreaks the observer did not state whether any microscopic examination was made. It is believed that the human muscles were examined in five of the outbreaks, and in each of them trichinæ were found; in three of these it is positively known that trichinæ were found present. In seven outbreaks the pork was examined, and in each of the seven trichinæ were found in the pork. In the other outbreak, microscopic examination was made only of the muscles of the human subject, in which trichinæ were found.

"Question 3. How many of the cases were fatal?

"Answer 3. In one outbreak it was stated that there were no fatal cases; in one outbreak, where fatal cases occurred, the number was not stated; in one outbreak it was not stated whether any fatal cases occurred; in another outbreak, now in progress, one death has already occurred; and in six other outbreaks seven deaths were reported, making in all, in which the number was reported, eight deaths."

New Jersey.—The records of the State board of New Jersey extend from January 1, 1875, to date, a period of about nine years. During this period but one death from trichiniasis has been reported. This was in May, 1881, and was a female. The method by which the diagnosis was determined is not known.

New York.—The following report is furnished by the secretary of the board of health of New York City:

A few cases of alleged trichiniasis have come to the knowledge of the board, but there is no record of the number or dates.

In two families, during the past eighteen years, there has been, within the knowledge of this board, microscopic identification of trichinæ in the human subject.

During the past ten years five deaths attributed by attending physicians to trichiniasis have been reported to this board, one in 1875, one in 1878, one in 1880, and two in 1881.

The secretary of the board of health of Brooklyn, N. Y., says that five cases of trichiniasis have occurred in that city, of which a full history may be found in the proceedings of the Medical Society of Kings County for 1879.

North Carolina.—The secretary of the State board says that an equivocal case of trichiniasis occurred in Wilmington, in that State, but no microscopical examination was made. It was in the person of a boy of German parentage, habituated to using raw ham.

West Virginia.—The health officer of the city of Wheeling reports five cases—father, mother, and a child of same, aged two and one-half years, and two females of other families. All ate of same meat—raw, smoked ham—on March 4, 1870. No microscopic identification was made in the human subject.

Wisconsin.—The Secretary of the Wisconsin State board of health says that some cases of trichiniasis have occurred in Milwaukee, but does not give the number or dates.

CAUSE AND PREVENTION OF TRICHINÆ IN SWINE.

The worm known as the *trichina spiralis* has no stage of its existence outside of the animal body, and can not multiply or even remain alive for any considerable time, so far as has ever been ascertained, after it quits its host. Every infected animal must become infected either by eating the muscular tissue of another animal which has previously obtained the parasite in the same way, or possibly by taking food which has been soiled by the excrement of an animal recently infected. It is generally admitted that eating flesh which contains the parasite is the most frequent, if not substantially the only way in which trichinæ find their way into the body. A few cases have been advanced to show that pastures and feeding places may be infected and be dangerous for a considerable time; but, according to our present knowledge of the natural history of this parasite, it may be doubted if many instances of this kind occur.

When meat containing trichinæ is taken into the stomach the capsule or cyst which surrounds the worm is dissolved by the digestive liquids, the parasite is set free, develops into its mature form, the females are impregnated, and each give birth to one thousand or more young. The young trichinæ penetrate the intestinal walls and find their way into the various muscles of the body while the mature worms, and doubtless many of the young as well, are voided with the excrement. Now, it may be admitted that a large number of the mature parasites will be passed from the bowels before they have brought forth their young, and that if taken into the stomach of another animal the act of reproduction would continue; but it seems doubtful if enough of such mature worms would be consumed in this manner to cause any serious infections. We do not know, however, how long the worms are able to live outside of the body in this developed conditon; if they can exist but a few days the danger from them would be very slight, but if this period can be prolonged for weeks or months the danger would be more serious, and we might have at least a partial explanation of the many cases of infection occurring where the condition of life among the hogs seems to be all that could be desired.

The young trichinæ or larvæ which are produced in such enormous numbers in the intestines within a few days after infected meat has been eaten, and many of which are doubtless voided with the excrement, are practically incapable of dangerously infecting grounds or feeding places. These can not reproduce themselves until they have found their way into the muscular system, and have been encysted for a time, so that even a considerable number of such larvæ taken into the stomach would produce no appreciable effects.

In the present condition of knowledge the tendency is to conclude that by far the larger part of trichinous hogs are infected by eating the flesh of some animal which has previously been infected in the same way. Trichinæ can not develop or live for any considerable time in the bodies of insects, cold-blooded animals, or birds, and, consequently, the infection must result from some of the warm-blooded animals, which either habitually or occasionally eat flesh. Among these cats, rats, and mice are the ones most frequently suspected; but an inquiry into the conditions under which hogs are raised in the West has led us to doubt if the infection could occur in any considerable number of cases in this way. Hogs are usually kept in grass fields, where rats and mice are not common, and where cats certainly do not abound, and in no part of the hog-raising country is it a custom, so far as could be ascertained,

to run the hogs in corn-fields, where there would be an opportunity of their finding rats and mice.

It has been charged that there was a custom of feeding the hogs which died from disease to the well animals, and that this accounted for the trichinous infection. After an extensive investigation, however, we feel authorized to state that this assertion is not correct. Such a practice seems to have been followed to some extent a half dozen or more years ago, but as the contagious character of hog cholera became better understood, and as the demand increased for the cheap grease rendered from such dead animals, they were more generally sold to rendering establishments at a price considerably beyond what they would be worth for animal food. The trichinæ of to day must therefore be acquired from some other source than the hogs which die upon the farms.

The French and German authors have not hesitated to assume that our hogs were infected by feeding upon offal from the slaughter-houses, but this assumption could only have been made in complete ignorance of the actual condition of affairs in the hog-growing sections of the country. Practically all of the hogs which go to the packing-houses are raised upon farms miles, and generally hundreds of miles, from any large city where offal could be obtained, and they are never fed upon anything but vegetable food. The blood and offal at the large packing-houses is dried at a high temperature and sold for fertilizers, and is never fed to the hogs even in the stock-yards. The foreign microscopists have the proof of this in their own hands, if they would only give the matter a little consideration before accepting the absurd statements of ignorant and prejudiced parties.

During the killing season as many as 60,000 hogs are received at the Chicago stock-yards in a single day, and it is evident that it would be impossible to furnish accommodations for holding this enormous number for any considerable time before killing. Now the trichinæ which are found in American pork are in the vast majority of cases encysted, and for this condition to be reached time is required, and much more time than it is possible to hold hogs in the cities where alone offal for feeding them can be obtained. It is four weeks after infection before cysts are formed, and it is six weeks to two months before they reach the condition in which they are generally found by the microscopic examination of our meats. While we know from our own observation in all the cities where hogs are packed that the animals are not fed upon offal previous to killing, we have here in the condition of the trichinæ themselves the best and the most incontrovertible evidence that the animals were not infected by offal fed while they were held at the packing-houses before slaughter.

It is evident from what has just been said that we are unable at present to give a satisfactory explanation of the manner in which Western hogs become infected with trichinæ, for the conditions of life, at least so far as we were able to see, appear in the vast majority of cases to be all that can be desired. The infected hogs must be traced to the counties from which they come, and even to the farms on which they are raised, and the conditions studied as they exist on known infected premises before it will be possible to give a solution to this difficult question. And until this is done no effectual rules for prevention can be formulated farther than in a general way to recommend that the hogs have no access to any animal matter except what has been thoroughly cooked.

ORIGIN, NATURE, AND EXTENT OF SWINE PLAGUE OR HOG CHOLERA IN THE UNITED STATES AND EUROPE.

All cases of sickness among the hogs of this country, as a rule, are spoken of as cholera, and the deaths from all causes are grouped together in the statistics as the results of this disease. Hogs, however, like other animals, are subject to the various diseases which arise from meteorological conditions, from exposure, from improper food and surroundings, from parasites, and from injuries; but farmers are unable to discriminate between many of these conditions, and therefore all are classed together. There is no doubt that there exists an infectious malady of hogs, which at times is very destructive, and to which the term swine plague can be properly applied, but the statistics as at present compiled give an exaggerated idea of the ravages of this plague.

The disease known as hog cholera or swine plague appears to have had a comparatively recent origin in this country, and there is no direct evidence to show that it originated, or that it now originates, *de novo*. On the contrary, hogs were raised in large numbers under conditions substantially the same as now for many years before the appearance of this disease. It was not until some time between 1850 and 1860 that hog cholera, so called, first appeared in the States of North and South Carolina, Georgia, and Alabama, and then it was clearly traced to droves from Kentucky and Tennessee. If we go back a few years earlier we find the malady seems to have been unknown even in the Western States, and consequently there were many years during which our farmers enjoyed an immunity from this the principal infectious disease of the hog. Now, however, that the infection has been widely disseminated over the country there are many outbreaks which can not be traced to their origin, and hence the theory of its spontaneous generation becomes more and more popular with a large class of our population.

It is the old story over again which it seems must be fought out separately for each of the contiguous diseases.

Rinderpest was believed to arise spontaneously on the steppes of Russia until an investigation was made, and then it was found that the originating point drifted farther and farther toward the east, but could never be found. Lung plague for many years was said to occur spontaneously in many countries of Europe, but as more determined efforts were made to exterminate it and to trace the outbreaks to their origin there were fewer and fewer who accepted this belief, until now it has but a handful of adherents in the whole of Europe. Glanders was thought to arise very frequently from badly ventilated stables and overwork, but to-day he who was the most eminent advocate of the theory admits that these conditions are powerless to produce the disease unless the virus has been introduced from an affected animal. And this we believe is also true of swine plague. If it was unknown in America it has existed from time immorial in the various countries of Europe, and might easily have been introduced with the improved animals brought from there. Indeed, its appearance in this country dates from about the time when the first earnest efforts were being made to improve our hogs by infusing the blood of pure-bred animals from abroad; and the fact that this disease is known in at least one instance in recent years to have been imported in this way is sufficient evidence that the same may have occurred in earlier years.

The fact that hog cholera exists in a country is therefore no evidence

that the hogs are improperly fed or cared for; but it rather indicates that the people do not sufficiently appreciate its contagious character, and do not enforce sufficiently stringent measures in regard to it. The investigations made under the direction of the United States Department of Agriculture during the past five years have thoroughly convinced our hog growers that this trouble arises from contagion, and the precautions which they have observed to prevent the infection of their herds have had an extraordinary effect in lessening the amount of this disease. In fact, the malady has hardly existed in an epizootic form since 1879, and the comparatively few outbreaks which have occurred have been far apart and have not covered any great extent of territory. The ravages of the disease appear to be steadily decreasing, and it is believed that with the continued observance of the precautions against infection it will never again assume the importance that it has in the past.

There seem to be no accurate records of the extent of swine plague or hog cholera in any of the nations of Europe with the exception of Great Britain. That it is frequently very destructive in most parts of the continent is shown by the veterinary literature and by the recent attempts in France to confer immunity on the hogs by vaccination. In Great Britain a record is now published of the number of animals affected and the number which die, and we learn from this that during the first twenty-one weeks of the year 1883, 3,607 animals were attacked, and 731 died. As there are about eighteen times as many hogs in the United States as in Great Britain, this would be equivalent to about 65,000 cases here in the same time, providing our hogs were diseased in the same proportion. It is evident from these figures that the disease is by no means confined to the United States, and if it has caused more discussion here than abroad, this was occasioned by the determination of our farmers to learn some way of preventing its ravages.

The conditions under which our hogs are generally raised are so good that the origin of diseases can not be explained by them. They run upon large grass fields and are fed largely upon Indian corn and other vegetable food; and it is difficult to see how any substantial improvement can be made upon this mode of feeding.

It has been frequently suggested that our pork would be firmer and of better quality if part of the corn now fed were replaced with pease or similar concentrated food, containing a large proportion of nitrogenous constituents. That such a change would have a desirable effect upon the quality of the pork is scarcely to be doubted, for we know that mast-fed hogs, the nuts constituting the food of which contain but a very small proportion of nitrogenous matter, produce soft, oily meat, which shrinks very much more in cooking than corn-fed pork. The proportion of the nitrogenous to non-nitrogenous constituents in the nut which forms the food of the mast-fed hogs is about 1 to 15, in that of the corn-fed hogs it is about 1 to 8, and if a further change in this direction could be made until the nutritive ratio reached 1 to 6 the quality of the pork would, according to prevailing opinion among scientists, not only be improved, but the hogs would gain more rapidly in weight. Barley is said to make remarkably fine pork, and this is evidence in favor of the view just mentioned, for in this grain the nutritive ratio is 1 to $6\frac{1}{2}$. While, therefore, it is not necessary to recommend a change in the present manner of feeding on the ground of healthfulness alone, it is probable that a change in the direction suggested above would have a desirable influence on the hardiness of the animals, cause them to lay on

flesh more rapidly, and improve the quality of the pork. Whether such a change can be economically made or not is a question which every farmer will have to decide for himself.

RELATION OF SWINE PLAGUE TO HUMAN HEALTH.

While swine plague is a disease apparently common with the hogs of all nations, it has been brought forward, particularly in France, as one of the reasons for rejecting American pork. It has been asserted that the disease was communicable to mankind, that it is caused by a micro-organism, which develops spores, and in that state resists the most unfavorable condition for an indefinite time, and that our pork is dangerous to human health abroad because of infection with this parasite.

In regard to the first point there is no evidence that the two or three cases of diphtheria referred to as occurring in the West were produced by the ice from the creek where dead hogs had been thrown, or that this had any connection whatever with the malady affecting the animals. Diphtheria among children has become a very common disease in most parts of the country, and in most parts of the civilized world, in fact, and there was no more reason for concluding that these two or three isolated cases originated from swine plague than there would be in attempting to trace the measles and scarlet fever of the Western States to the same source.

In the second place, the disease is not caused by a bacillus, as was so confidently asserted, but by a micrococcus, which does not form spores, and this organism very soon loses its virulence outside of the living animal body, and is very sensitive to heat and other unfavorable conditions of existence. It is doubtful if this parasite could survive a single day in salted pork, and it is very certain that the slightest degree of cooking would destroy it, as it is unable to resist a temperature of 140° F. for fifteen minutes.

A review of all the evidence satisfies us that the virus of swine plague is not in the least degree injurious to human health. Both English and American investigators have frequently made post-mortem examinations of hogs dead from this disease, when cuts and abrasions upon their hands were covered with this virus in the most virulent form, and in no case has any discomfort resulted. It would seem that no more severe test could be made of the dangerous qualities of a virus than this, and in connection with the lack of evidence that any disease among people has ever originated from the sick or dead hogs it is sufficient to show the absurdity of such baseless rumors.

Again, it seems to be impossible for the flesh of diseased hogs to enter the market for human food. There are health officers in nearly all stock yards, whose duty it is to see that such animals are not killed for food. The skin and flesh of diseased animals is so discolored that it would be detected at once, either before or after curing; and packers are unanimous in their testimony that the meat of feverish or diseased animals can not be cured without its developing a disagreeable odor, which at once reveals its character. There are, consequently, many substantial reasons for asserting that the fears so vigorously expressed abroad in this connection are groundless, and that the trade inspections which every buyer has the privilege to order to be made by his own experts are sufficient to protect the consumer.

COST AND PRACTICABILITY OF INSPECTION.

Although many objections have been urged against the use of American pork, the only one of these that has sufficient weight to be used as a reason for prohibition is the fact demonstrated by microscopic examination that a small portion of our hogs contain trichinæ. The only form of inspection that can remove this cause of complaint and make our meat satisfactory to foreign governments is, therefore, a microscopic inspection of the hogs that are to be packed for shipment to those countries which have placed restrictions upon this trade. This would doubtless be an undertaking of considerable magnitude, considering the large number of animals to be examined; but there is nothing impossible about it. It is simply a question of expense. If the profits in shipping hogs to the countries are sufficient to pay the cost of inspection and leave a balance that will induce the trade, then it would undoubtedly be an advantage to the pork industry to establish such a system of inspection, providing this remains necessary to secure the admission of our pork products. We have already demonstrated that American pork without inspection is safer when it reaches Europe than are the native hogs which have undergone inspection there; and it is our opinion that this fact should be sufficient to secure the free admission of our pork to every part of the world without the expense of a microscopic examination. But if this free admission can not be obtained without such examination, then it would be desirable to consider if a microscopic inspection can be made practicable under the conditions which exist in this country, and particularly at the packing centers. The inspection need cause no delay in any of the processes of packing, since the carcasses in any case should be allowed to hang from twenty-four to forty-eight hours in the cooling room before cutting, and this would be amply sufficient for the inspection. It is probable that certain packers would make special arrangements for packing and shipping to countries that have now prohibited our pork as soon as they were assured that the inspection required by the United States Government could be made at a reasonable sum per head, and in guarantying the meat free from trichinæ would satisfy foreign governments and restore the trade.

CONCLUSION.

In conclusion, we would say that after carefully studying every circumstance that in any way affects the condition of the American swine, from the hour of their birth to the landing of the cured meat in foreign ports, we are free to say that our exported pork in all its forms is fully equal, perhaps superior, in its freedom from taint of every kind, either from disease or deterioration after slaughtering, to the pork of France or Germany, or any other country in which the hogs are confined within a narrow compass, and do not enjoy that free run and pasturage which they get in the hog-growing regions of the United States. There is no general prevalence of disease among swine in any portion of this country. Microscopic examinations show that here, as in all other countries, a small percentage of the swine is affected with trichiniasis; probably a smaller percentage than in the countries of Europe. That the occasional presence of trichinæ in our pork is a comparatively unimportant fact is shown by the rarity of trichiniasis among human beings, as indicated by the returns from the State and city boards of health. Another very important fact is the almost certain destruction of the trichinæ when present in pork by the curing process before it can be landed in

foreign countries. Nevertheless, while we believe that no legitimate grounds exist for the restrictions imposed in some foreign countries on the importation of American pork, we are satisfied that microscopic inspection of all pork for export can be secured at the packing-houses, if such inspection should be demanded, as we have already fully explained.

Respectfully submitted.

D. E. SALMON,
Commission.

No. 7.

Senate Report No. 345, Forty-eighth Congress, first session.

The Committee on Foreign Relations, to which was referred the resolution of the Senate of January 22, 1884, the first clause of which is as follows—

Resolved, That the Committee on Foreign Relations be instructed to inquire into and report to the Senate such legislation as shall protect our interests against those Governments which have prohibited or restrained the importation of meats from the United States—

has considered the foregoing, and begs leave to report herewith a bill which, in the opinion of the committee, contains the legislation necessary for the protection of the interests of the people of the United States in the matter embraced in that part of the resolution above quoted.

The facts and data upon which the committee has based its conclusions, as expressed in this bill, are for the greater part included in the three documents appended hereto, and made a part of this report, viz:

First. House Ex. Doc. No. 70, Forty-eighth Congress, first session, being a communication from the Secretary of State relative to the restrictions upon the importation of American hog products into Germany and France.*

Second. House Ex. Doc. No. 106, Forty-eighth Congress, first session, being the report of the commission appointed by the President "to examine into the swine industry of the United States and into the allegations as to the healthfulness of the pork products."†

Third. Report of the Chief of the Bureau of Statistics to the Treasury Department of February 12, 1884, "on the production of swine in the United States, and the interdiction of American hog products from France and Germany," etc.

Appended hereto is also a copy of a dispatch from the American minister at Paris to the honorable Secretary of State, dated February 8, 1884, transmitting a copy of the answers made by the French Academy of Medicine to the questions propounded by the French minister of commerce on the subject of the importation of foreign meats, which show that the academy voted, with but one dissentient voice, that "the importation of foreign salt pork may be fearlessly authorized by the French Government, as it is clearly proved that no danger to public health has been caused by such importation."

---

*Inclosure No. 5.

† Inclosure No. 6.

The investigation which the committee has been able to make of this subject results in establishing to the satisfaction of the committee, among others, two important propositions or matters of fact.

First. That trichinæ do exist to a limited extent in swine throughout all swine-producing countries, and in the United States as well as others, but to a less degree than in Germany or France. The evidence shows that about 2 per cent. of American pork is infected by trichinæ.

Second. That the curing process of pork by salt destroys trichinæ to such a degree that pork thoroughly salted and permitted to remain long enough to become saturated with the salt, although infested with trichinæ, is innoxious.

Without entering upon an argument in respect to the propriety or expediency of a policy of retaliation as to those Governments which have discriminated, or may hereafter discriminate, without just reason against any class of American productions, the committee propose to briefly state the propositions of the bill.

First. It is proposed to institute at the principal ports of the United States a system of inspection of salted pork intended for exportation, and exported within sixty days next after the date upon which the same may have been salted and packed, so that the fact of the innoxious and wholesome character of the article shall be established by the best, highest, and most reliable proof.

Second. The President is to be authorized, at his discretion, to exclude from the United States, by proclamation, any product of any foreign state which, by unjust discrimination, prohibits the importation into such foreign state of any product of the United States.

Third. The importation into the United States of any adulterated or unwholesome food, or vinous, spirituous, or malt liquors, adulterated or mixed with any poisonous or noxious chemical, drug, or other ingredient injurious to health, is by the bill prohibited under proper penalties.

Fourth. The President is to be authorized, by proclamation, at his discretion, to suspend the importation of articles so adulterated from any country for such period of time as may be deemed sufficient to prevent the practice of such adulteration of articles intended for importation into the United States.

These are the measures which the committee deem necessary and adequate as a remedy for the evils comprehended in that part of the resolution which has been considered.

It is the intention of the committee to consider the second branch of the resolution and make report as early as practicable.

PRODUCTION OF SWINE IN THE UNITED STATES.

[Report by Joseph Nimmo, jr., Chief of the Bureau of Statistics, Treasury Department.

TREASURY DEPARTMENT,
Bureau of Statistics, February 12, 1884.

SIR: I have the honor to submit to you the following report in regard to the production of swine in the United States, and the transportation, home consumption, and exportation of hog products. This office has for several months been collecting and collating data upon these subjects, with the special object of meeting inquiries from various sources.

The subject of trichinæ and trichinosis has already been investigated and officially reported upon, in a somewhat exhaustive manner, by an officer of the Marine Hospital Service, a branch of the Treasury De-

partment, in compliance with a resolution of the Senate. The results of this investigation are hereinafter set forth.

The information recently obtained by this office touching the general subject of the present report has been secured chiefly through agencies at the command of this Department, viz, officers of the customs and persons employed as experts in connection with the internal-commerce branch of this bureau. In view of the fact that the Governments of Germany and France have interdicted the importation of American hog products into those countries, statements are hereunto appended showing somewhat in detail the commerce between the United States and those countries. The scope of the present work has been somewhat enlarged, and it has also been expedited and brought to a close at the present time, in compliance with a communication from the chairman of the Committee on Foreign Affairs of the Senate requesting the Secretary of the Treasury to transmit to that committee all such information at the earliest practicable moment.

Swine are raised in every State of the Union. According to the census, the number of hogs on farms in the United States increased from 25,134,569, in 1870, to 47,681,700, in 1880, an increase of 89.75 per cent.

The net weight of hogs annually slaughtered in the United States is estimated by Mr. J. R. Dodge, statistician of the Department of Agriculture, at 5,250,000,000 pounds,* and their value at $393,750,000. The annual exports of hog products from the United States during the last five years have averaged about 1,000,000,000 pounds, or about 19 per cent. of the production.

According to Mr. Charles B. Murray, editor of the Cincinnati Price-Current, a recognized authority upon such matters, the annual pork product of the United States is nearly one-half of the annual pork product of the world. (See Appendix A.)

The United States, however, by far surpasses every other country in the exportation of hog products. The growth of this trade is exhibited in the following table:

Value of the exports of hog products from the United States during each year ended June 30, from 1860 to 1883.

Year ended June 30—	Bacon and hams.		Pork.		Lard.		Total value.
	Pounds.	*Dollars.*	*Pounds.*	*Dollars.*	*Pounds.*	*Dollars.*	*Dollars.*

1880	759,773,109	50,987,623	95,949,780	5,930,252	374,979,286	27,920,367	84,838,242
1881	746,944,545	61,161,205	107,928,086	8,272,285	378,142,496	35,226,575	104,660,065
1882	468,026,640	46,675,774	80,447,466	7,201,270	250,367,740	28,975,902	82,852,946
1883	340,258,670	38,155,952	62,116,302	6,192,268	224,718,474	26,618,048	70,966,268

* Mr. Dodge estimates as the equivalent of this 4,725,000,000 pounds of cured meats and lard.

It appears that during the year ended June 30, 1881, the year of greatest exportation of hog products, the value of such exports amounted to $104,660,065, and stood third in the order of magnitude of exports from the United States, being exceeded only by breadstuffs and cotton.

At this point the fact must be clearly stated that the total exportation of hog products of the various kinds from the United States to foreign countries depends mainly upon the demand for home consumption, as such demand is related to the supply. This demand is the chief factor in the determination of prices. It was mainly the increasing home demand, with its consequent increase of prices in this country, which caused the total exports of bacon, hams, pork, and lard to great Britain to fall from 704,846,010 pounds, in 1880, to 363,357,222 pounds in 1883. Usually exportation falls off as prices in the United States appreciate, and *vice versa*. The general relation of prices in this country to exports is illustrated very clearly in the following table:

Calendar years—	Average price at Chicago of—		Total weight of bacon, hams, lard, and pork exported.
	Mess pork.	Lard.	
	Per barrel.	*Per 100 pounds.*	*Pounds.*
1878	$9 00	$6 75 1-6	1,138,109,904
1879	9 51	6 16 3-4	1,186,685,121
1880	13 06	7 40 1-6	1,333,049,082
1881	16 47 1-2	10 88 2-5	969,546,801
1882	19 42	11 47	651,109,210
1883	15 14 1-8	9 16 5-8	776,361,776
Six months—January to June, 1883	18 18 1-2	11 13 2-3	348,901,769
Six months—July to December, 1883	12 09 2-3	8 17 5-6	427,460,007

The high prices which have prevailed for Western hog products during the last four years have been very largely the result of the rapid growth of population in our Western and Northwestern States, with its constantly increasing demand for food.

Without going into any labored dissertation upon the point to which attention has here been directed, the fact will be clearly appreciated from the foregoing data and from subsequent statements that, although the home demand for hog products is the chief element in the determination of prices, yet that the foreign demand for such products constitutes always an exceedingly important element in the profitableness of the raising of swine in the United States, inasmuch as it provides markets for our surplus product. Open foreign markets are of special importance at times when, owing to an unusually large production in the United States, or to other causes, prices fall in this country. Foreign markets then serve to prevent a disastrous decline of prices. The recent fall of prices in the United States, and the consequent increased tendency towards the exportation of hog products to foreign countries, renders that trade a subject of great public interest at the present time.

As hereinafter shown, the exportation of hog products to foreign countries is of especial importance to the Western and Northwestern States of this country, and to the commercial and industrial interests which are connected with the pork trade in that section of the country.

The following table, compiled from data supplied by the Department of Agriculture, gives the number and value of the hogs on farms in each State and Territory in the year 1882, in the order of the magnitude of value:

Table showing the estimated number and value of hogs on farms in the United States during the year 1882, *stated in the order of magnitude of value.*

[From Special Report No. 56, Department of Agriculture.]

Order.	States.	Number of hogs.	Value of hogs on farms.
1	Iowa	5,107,445	$40,961,709
2	Illinois	3,970,764	29,621,899
3	Ohio	2,714,112	21,902,884
4	Missouri	3,892,920	21,644,635
5	Indiana	2,724,383	20,814,286
6	Kansas	1,984,646	17,008,416
7	Nebraska	1,526,823	12,153,511
8	Wisconsin	1,162,238	11,343,443
9	Tennessee	1,988,753	11,057,467
10	Kentucky	1,916,587	10,982,044
11	Pennsylvania	1,060,856	9,802,309
12	New York	744,238	8,156,848
13	Michigan	934,184	7,893,855
14	Texas	1,953,189	7,773,692
15	California	856,000	6,111,840
16	Georgia	1,412,604	5,706,920
17	North Carolina	1,311,821	5,444,057
18	Alabama	1,225,534	5,318,818
19	Arkansas	1,250,513	4,851,990
20	Mississippi	1,070,269	4,334,589
21	Virginia	773,864	4,147,911
22	Minnesota	424,057	3,159,225
23	New Jersey	214,688	2,737,272
24	Maryland	325,413	2,583,779
25	South Carolina	584,601	2,537,168
26	Louisiana	564,439	2,427,088
27	West Virginia	404,406	2,394,084
28	Massachusetts	80,908	1,157,793
29	Dakota Territory	109,600	965,576
30	Oregon	168,954	927,557
31	Florida	320,000	880,000
32	Vermont	74,864	873,663
33	Maine	71,416	847,708
34	New Hampshire	54,511	661,218
35	Connecticut	62,406	647,774
36	Delaware	46,740	364,572
37	Utah Territory	22,500	279,450
38	Washington Territory	50,300	272,626
39	Idaho Territory	23,600	259,600
40	New Mexico Territory	19,300	208,440
41	Rhode Island	14,405	192,883
42	Montana Territory	17,200	182,320
43	Colorado	12,100	140,118
44	Nevada	12,000	136,800
45	Arizona Territory	9,200	73,600
46	Wyoming Territory	735	7,784
	Total	43,270,086	291,951,221

From this table it appears that the State of Iowa stands first in the raising of swine; Illinois, second; Ohio, third; Missouri, fourth; Indiana, fifth; Kansas, sixth; Nebraska, seventh; Wisconsin, eighth; Tennessee, ninth; and Kentucky, tenth.

The annual hog product of quite a number of the States is less than the quantity of such products consumed therein, and the comparatively small surplus in certain other States is sold in home markets and consumed in this country.

The deficiency of such products in the various States and sections of this country is supplied almost entirely by the surplus product of the Western and Northwestern States.

By means of our unequaled system of internal transportation, pork products are carried from Chicago to New York, a distance of nine hundred miles, for only about one-third of a cent per pound. The rate from Saint Louis to New York is about the same. The average ocean charge from New York to Bremen during the last year was also about one-third of a cent per pound. On direct consignment hog products can

be shipped from Chicago or from Saint Louis to Bremen for a little more than one-half a cent per pound. The rates from Cincinnati to the seaboard and to Bremen do not differ materially from those above stated from Chicago and Saint Louis.

The existence of such facilities of transportation, in connection with the almost unlimited capacity of our Western and Northwestern States for the production of swine, has built up a great industry and a great trade, which are now seriously affected by the action of the Governments of Germany and France in forbidding the importation of American hog products into those countries.

PORK-PACKING AT THE WEST.

It is estimated by Mr. Charles B. Murray that 95 per cent. of the exports of hog-meats, 86 per cent. of the exports of lard, and 93 per cent. of the total exports of hog products from the United States during recent years, have consisted of the surplus products of the States of Ohio, Michigan, Indiana, Illinois, Kentucky, Tennessee, Missouri, Kansas, Nebraska, Iowa, Minnesota, and Wisconsin.

The pork-packing of the West for commercial purposes is carried on chiefly at the towns and cities mentioned in the following table, which shows the number of hogs packed at each point during the year ended March 1, 1883:

	No. of hogs.
Chicago, Ill	4,222,780
Kansas City, Mo	813,834
Saint Louis, Mo	532,180
Cincinnati, Ohio	507,316
Milwaukee, Wis	405,510
Indianapolis, Ind	388,417
Cedar Rapids, Iowa	327,163
Cleveland, Ohio	218,885
Saint Joseph, Mo	152,365
Omaha, Nebr	151,086
Louisville, Ky	143,393
Ottumwa, Iowa	121,554
Detroit, Mich	99,155
Des Moines, Iowa	90,871
Keokuk, Iowa	68,446
All other points	1,100,044
Total	9,342,999

From this it appears that 45 per cent. of the total number of hogs packed in the Western and Northwestern States are packed at Chicago.

[The fact must be carefully observed that the above table and the following tables, showing production, do not include the product of hogs slaughtered on farms and in villages for domestic consumption in the immediate localities where such slaughtering is done, nor, to any great extent, the slaughtering by city butchers for local consumption. The product of the pork-packing included in the above table is marketed in all parts of the United States, and also in foreign countries.]

The percentage which the exports of hog products from the United States constituted of the whole quantity packed at the West during the last ten years, is exhibited in the following tables compiled by Mr. Charles B. Murray, editor of the Cincinnati Price-Current:

Exports of pork, bacon, and hams for the years ended October 31, from 1873 to 1883, inclusive, as compared with the Western yearly production.

Year ending October 31—	Meats exported.			Production of meat.	Percentage exported.
	Pork.	Bacon and hams.	Total.		
	Pounds.	*Pounds.*	*Pounds.*	*Pounds.*	
1873	63, 865, 821	415, 239, 087	479, 104, 908	968, 021, 941	49. 49
1874	66, 481, 132	332, 449, 497	398, 930, 629	914, 666, 521	43. 61
1875	57, 247, 971	264, 225, 246	321, 473, 217	927, 656, 785	32. 50
1876	57, 838, 184	388, 237, 246	446, 075, 430	991, 556, 881	44. 20

N. B.—The exports include products manufactured in Eastern cities each year.

From these tables it appears that during the year ended October 31, 1880—the year preceding the interdiction of American hog products from France and Germany—the exports of such products from the United States constituted 62.12 per cent. of the hog products of the

Western and Northwestern States for commercial purposes, and that the exports of pork, bacon, and hams constituted 53.15 per cent. of such products of those States.

In view of the foregoing statements, it is evident that the success of the pork-packing business of the West depends mainly upon the foreign trade. Any serious obstruction to this trade must very injuriously affect the agricultural interests of our Western and Northwestern States, and the commercial and industrial interests of the several cities which are largely engaged in the pork-packing business. Such obstruction must also in a marked degree affect the trade interests of the cities of New York, Boston, Philadelphia, and Baltimore, which, as shown in Appendix B, are the cities from which hog products are chiefly exported.

Appendices C, D, E, F, and G show, respectively, the exports of bacon, hams, pork, lard, and total hog products from the United States to each foreign country during the years ended June 30, 1881, 1882, and 1883.

THE INTERDICTION OF AMERICAN PORK PRODUCTS FROM FRANCE AND GERMANY.

The following table shows the value of the exports of bacon, hams, lard, and pork from the United States to France and Germany during the last nineteen years:

Value of bacon, hams, and pork exported to France and to Germany during each year from 1865 to 1883, inclusive.

Year ended June 30—	Exported to--	
	France.	Germany.
	Dollars.	*Dollars.*
1865	20,481	67,106
1866	5,209	3,610
1867	139,188	59,559
1868	257,992	89,391
1869	31,759	306,528
1870	7,142	177,071
1871	267,804	221,862
1872	1,150,737	1,708,576
1873	1,982,604	5,596,884
1874	985,480	3,071,738
1875	454,717	2,458,222
1876	435,505	2,053,137
1877	2,056,280	2,404,784
1878	4,203,991	2,251,169
1879	3,388,872	2,103,993
1880	3,953,259	1,865,858
1881	4,987,673	3,263,725
1882	468,675	432,426
1883	40,100	1,577,308

Appendix H shows the value of the exports of hog products of each kind from the United States to France and Germany during the ten years from 1874 to 1883, inclusive.

The regulations of the Governments of those countries in regard to such products relate exclusively to meats, viz, bacons, hams, salted pork, canned pork, and sausages, and not to lard.

Sausages and canned pork meats are also prohibited from being imported into either France or Germany from the United States, but the quantities of values of these two commodities can not be stated, as in

the returns made by customs officers such commodities are included in preserved and canned meats generally. Canned meats of all kinds are packed in large wooden cases, and it is difficult to ascertain whether their contents are pork or beef.

From the above table it will be seen that the exportation of bacon, hams, and pork to both France and Germany has been a trade of comparatively recent growth. Those engaged in the business at the great centers of the pork trade at the West were cultivating it by improvements in the modes of preparing and packing pork products, in order to meet the demand in those two countries, and its development to much larger proportions was confidently expected. Such expectations appeared to be justified by the fact that the total value of similar exports from the United States to Great Britain amounted during the year ended June 30, 1881, to $48,319,897.

GERMAN EDICTS IN REGARD TO AMERICAN PORK PRODUCTS.

On the 25th of June, 1880, the German Government issued an edict prohibiting the importation of American salted pork meats into that country. (See Appendix J.) This edict in terms exempted "bacon" and "hams;" but on the 21st of February, 1883, the German Bundesrath adopted a resolution prohibiting the importation of American hog-meat of every description into that country. Upon this point, attention is invited to a letter addressed to this office by Messrs. Armour & Co., of Chicago, under date of January 29, 1883. (See Appendix K.)

In a communication addressed to this office by the firm just mentioned, under date of February 2, 1884, it is stated that the exclusion of canned hog products from Germany is to them a serious cause of complaint.

That pork meats continued to be exported to Germany during the year ended June 30, 1883, was due to the fact above stated, that, until the edict of February 21, 1883, took effect, "bacon" and "hams" were admitted at the ports of that country, and also to the fact that American hog products are allowed to be entered at the ports of Hamburg and Bremen for exportation therefrom from foreign countries.

It appears, however, that the German Government favors, or at least permits, the use of American pork and other hog products by German seamen on board of German vessels trading at her ports.

For a while Hamburg and Bremen, which are free ports, admitted American hog products for consumption in those cities; but more recently they have—reluctantly, it is said—followed the example of the Imperial Government in pursuance of the policy "*si omnes consentiunt, ego non dissentio.*" A copy of the decree of the board of trade and navigation of the city of Hamburg is hereunto appended. (See Appendix L.)

Perhaps the most irritating feature of the restrictive measures adopted by Germany regarding American hog products is the fact that that country forbids the transportation of such products across her territory in transit and in bond to other countries, notwithstanding the fact that abundant provisions exist throughout Europe for the security of merchandise so transported over railroads.

THE FRENCH EDICT IN REGARD TO AMERICAN PORK PRODUCTS.

The French Government, on the 18th of February, 1881, prohibited the importation of all hog meats from the United States to that country. (See Appendix I.)

Prior to the interdiction of American hog products from France, that was a valuable and rapidly growing trade. The value of the exports of bacon, hams, and pork from the United States to France increased from $267,804, in 1871, to $4,987,673, in 1883. The American merchants and packers engaged in this trade regarded it as one of great promise, but, as stated, it has been utterly broken down.

Aside from the direct results of the action of Germany and France in regard to American hog products, it is believed that the moral effect of such action has worked serious injury to the agricultural interests of the Northwest and the commercial interests of the country, by creating a prejudice against American hog products, thus inducing other countries to take like action. Portugal appears to be among the latest to follow the example of France and Germany in this direction.

TRICHINÆ AND TRICHINOSIS.

Hog products in their various forms and in the different modes by which they are prepared as food by the culinary art, constitute articles of food for persons in all classes and conditions of life. It is a fact generally known that such products are especially suitable for food in the temperate and colder climates, and that the quantity thereof consumed during the summer months is much less than during the remainder of the year. An experience of centuries in many countries has proved pork meats to be a nutritious and sustaining article of food, especially for persons performing vigorous physical labor, and more particularly for those engaged in out-door employments.

The annual consumption of hog products in the United States amounts to about 4,200,000,000 pounds, or five times the quantity exported to all foreign countries. These products are also largely consumed in Great Britain and in the countries of Continental Europe, but not to the extent of their consumption in the United States.

Notwithstanding the fact that hog products are to a greater or less extent consumed by almost the entire population of the United States, the instances of deleterious results from their use as articles of food have been very few and isolated, and the evidences appear to be incontrovertible that all the cases of trichinosis which have occurred have been directly traceable to eating uncooked pork meats. There appears to be no authenticated case on record of trichinosis resulting from eating such meats when cooked. Trichinæ are said to be found in the flesh of many of the lower animals, and without any apparent impairment of their health. That these parasitic animalculæ are sometimes found in the hog appears simply to proclaim the fact that such products in an uncooked state are not proper articles of human food. It would appear, however, that this fact ought to be generally understood for other and manifest reasons.

It seems passing strange that canned hog products should be interdicted from any foreign country, for, as stated by Messrs. Armour & Co., of Chicago, the most extensive pork-packers in the United States, in a communication to this office, such products "are subjected for several hours to a temperature always above boiling point, and in many cases to 240° F., destroying all life beyond peradventure."

It is believed that a careful investigation would reveal the fact that the eating of a number of other staple articles of food causes more sickness and a greater number of deaths than does the eating of hog products.

Dr. Z. T. Sowers, a physician of large practice in the city of Washington, has stated it as his opinion that more sickness ensues and more deaths occur from eating fish and oysters in bad condition and stale vegetables than from eating unwholesome pork, and this opinion is confirmed by the chief health officer of New York City.

Attention is invited to a statement by Mr. Sidney D. Maxwell, superintendent of the Cincinnati Chamber of Commerce, and who has for several years been employed as an expert in connection with the internal-commerce branch of this office. (See appendix M.) In this statement Mr. Maxwell shows that swine for exportation are raised in this country under circumstances peculiarly favorable to their healthfulness. In regard to trichinæ in hogs, he says: "In this city (Cincinnati), which may be regarded as the home of pork packing in this country, where for well nigh half a century this has been a great industry, and where large quantities are consumed, there does not appear on the records a single well-authenticated case of trichinosis."

The secretary of the Illinois State Board of Health, in a report made January 18, 1884, says: "As a sanitarian, I regard the danger to human life from trichinæ as practically amounting to nothing, it being so easily prevented by thorough cooking."

Mr. George H. Morgan, secretary of the Saint Louis Merchants' Exchange, and Mr. Charles Randolph, secretary of the Board of Trade of Chicago, both employed as experts in connection with the internal-commerce work of this office, having recently given like testimony as to the wholesomeness of Western hog-meats, which, as before stated, constitute almost the entire exports of such meats to foreign countries. Mr. E. H. Walker, statistician of the New York Produce Exchange, under date of January 18, 1884, gives like testimony.

Dr. J. B. Hamilton, Supervising Surgeon-General of the Marine-Hospital Service of the United States, in a letter to this office, under date of February 1, 1884, states that the total number of persons treated by that Service during the last ten years was 234,353, and that the total number of deaths of persons under its care was 4,234; but that no case of trichinosis has been reported during that time, nor since the organization of the Service, notwithstanding the fact that seamen, the class of patients treated, subsist largely upon salt pork. (See Appendix T.)

No case of trichinosis has ever been reported in the District of Columbia. (See letter, under date of February 2, 1884, from Dr. Smith Townshend, health officer, Appendix U.)

From information just received from the chief health officers of the cities of Boston, New York, Philadelphia, and Baltimore, it appears that the total number of deaths in those cities during the last five years was 350,072, and that the number of deaths resulting from trichinosis was only six, viz, three in New York and three in Philadelphia. (See Appendix V.) This fact, in connection with a statement published by Mr. E. H. Walker, superintendent of the New York Produce Exchange, showing that during the last five years there were 14,701,236 live hogs received at the four cities above mentioned, almost all of which were consumed there, would appear to constitute conclusive evidence as to the healthfulness of American hog-meats. The chances of injurious results from the eating of pork meats appear to be infinitesimal, and to be limited to the condition of eating raw pork.

The foregoing facts appeal to the common sense of the country, and they can neither be re-enforced nor refuted by microscopic analyses.

It may be remarked, also, in this connection, that in various parts of Germany and France vigorous protests have been made, both by commercial bodies and by prominent individuals, against the interdiction of American pork meats upon the broad ground that no necessity exists for such measures, and that they are opposed to the true interests of the people of those countries. The monthly consular reports published by the Department of State furnish abundant evidence of this sort.

No city or State in this country has as yet, in the exercise of its police powers, attempted to restrain the use of pork meats, nor has any suggestion been raised in any part of the United States as to the need of any such action upon sanitary grounds or for any other reason. A line of policy of which such action might fairly be regarded as an example would paralyze commerce and arrest many important industries. Although in clearly-attested cases the disease known as trichinosis may have been traced directly to trichinæ in hogs, yet so few and far between have been those cases, and so clearly has the cause of the sickness which has ensued been traced to eating raw pork meats, that any attempt to restrain the use of hog products as human food would have become a subject of popular derision; for it would have been regarded as in the nature of an attempt to shield the people against their own indiscretion and against the accidents of life. In a word, the people of this country are fully convinced, from an experience long continued and almost universal, that no valid objection can lie against American hog products on account of their supposed unwholesomeness, and it is in the light of this conviction that the interdiction of such products from foreign ports is generally regarded.

The whole subject of the existence of trichinæ in hogs and the disease known as trichinosis has, however, already been fully considered and reported upon by another branch of the Treasury Department, with special reference to the grounds upon which the Governments of Germany and of France have excluded American hog products from those countries.

In compliance with a resolution of the Senate, the Secretary of the Treasury, on the 15th of December, 1880, transmitted to the President of the Senate a report on trichinæ and trichinosis, prepared under the direction of the Supervising Surgeon-General, by Assistant Surgeon W. C. W. Glazier, of the Marine-Hospital Service. Doctor Glazier's report was the result of an extended and thorough investigation of the literature of the subject. It was the most valuable treatise upon that subject which had appeared. He brought to his task abilities of a high order and attainments which gave him distinction as a scientist.*

He made such analyses as were necessary in order to determine the nature of the parasite known as trichina and the pathology and history of the disease known as trichinosis. He clearly proved by his historical researches that the disease had existed in Germany and France even so far back as the year 1830. This was long before it was known in the United States, and before American hog products were imported into France or Germany. Doctor Glazier showed, also, that great doubt exists as whether the cause of any of the more recent cases of trichinosis in Germany and in France is or is not traceable to the use of

*Dr. Glazier died of yellow fever at Key West, Fla., December, 12, 1880, while there engaged in the discharge of his official duties. In his death the public service lost one of its ablest and most efficient officers, and the profession to which he devoted his life lost one of its brightest ornaments.

American hog products. He stated, generally, that "whatever may be said of the number of trichinosed hogs found in the United States, the epidemics of Germany are almost uniformly traced to the ingestion of freshly-killed German pork." He also asserted that the occurrence of trichinosis in Germany has been directly traceable to eating raw pork in its various forms as smoked and salted meat.

The correctness of Doctor Glazier's conclusions is fully attested by the statements of consular officers of the United States in Germany and in France, and those conclusions are believed to be incontrovertible.

American hog products are largely consumed in the United States at the present time by more than two million persons of German birth, and probably by five or six million persons of German birth and parentage. Such products are also consumed in this country by a large number of persons born in France and their immediate descendants, and without injurious results. It seems strange, therefore, that these products should be regarded as unfit articles of food for the people of Germany and France residing in their own country.

It has been supposed that a considerable quantity of American pork finds its way into France and Germany through the ports of Great Britain. This appears to be a misapprehension, as the total weight of pork products of all kinds exported from the United States to Great Britain during the last three years amounted to 1,580,847,902 pounds, whereas the quantity of pork products of all kinds, both of foreign and colonial production, exported from Great Britain during the years 1880, 1881, and 1882 to France amounted to only 2,456,832 pounds, and the quantity exported to Germany to only 16,997,568 pounds. (See Appendix N.)

TRADE OF THE UNITED STATES WITH FRANCE AND GERMANY.

The interdiction of the importation of American hog products from France and Germany has given rise to inquiries in regard to the general subject of the commerce of the United States with those countries. In order to meet all of such inquiries, and at once, the following statements are presented.

TRADE OF THE UNITED STATES WITH FRANCE.

The following statement shows the total value of the commerce of the United States with France during each year from 1867 to 1883, inclusive:

Value of merchandise imported into the United States from France and of merchandise exported from the United States to France.

Year ended June 30—	Exports.		Total exports.	Imports.	Total imports and exports.
	Domestic.	Foreign.			
	Dollars.	*Dollars.*	*Dollars.*	*Dollars.*	*Dollars.*
1867	33, 834, 460	582, 706	34, 417, 166	29, 386, 239	63, 803, 405
1868	25, 890, 759	526, 232	26, 416, 991	25, 315, 605	51, 732, 596
1869	32, 747, 919	366, 489	33, 114, 408	30, 284, 531	63, 398, 939
1870	45, 053, 886	502, 361	45, 556, 247	42, 731, 138	88, 287, 385
1871	26, 482, 263	170, 345	26, 652, 608	28, 099, 279	54, 751, 887
1872	30, 939, 206	492, 912	31, 432, 118	43, 140, 156	74, 572, 274
1873	33, 220, 620	560, 886	33, 781, 506	33, 977, 200	67, 758, 706
1874	42, 326, 187	638, 124	42, 964, 311	51, 691, 896	94, 656, 207
1875	33, 172, 387	460, 340	33, 632, 727	59, 773, 148	93, 405, 875
1876	39, 022, 829	769, 873	39, 792, 702	50, 959, 577	90, 752, 279
1877	44, 098, 343	1, 041, 575	45, 139 918	47, 556, 292	92, 696, 210
1878	54, 289, 918	1, 029, 220	55, 319, 138	43, 378, 870	98, 698, 008
1879	88, 194, 041	1, 475, 586	89, 669, 627	50, 684, 601	140, 354, 228
1880	98, 899, 209	1, 173, 835	100, 063, 044	69, 344, 412	169, 407, 456
1881	89, 844, 100	4, 353, 351	94, 197, 451	69, 806, 375	164, 003, 826
1882	47, 401, 923	2, 608, 895	50, 010, 818	88, 897, 606	138, 908, 424
1883	55, 965, 191	2, 717, 032	58, 682, 223	97, 989, 164	156, 671, 387

From the foregoing table it appears that the exports of domestic merchandise from the United States to France fell from $98,899,209 in 1880, to $55,965,191 in 1883, a decrease of $42,934,018, or 43.4 per cent., but that the imports of merchandise into the United States from France rose from $69,344,412 in 1880, to $97,989,164 in 1883, an increase of $28,644,752, or 41.3 per cent.

Attention is invited to Appendix O, which shows, in detail, the exports of merchandise from the United States to France and the imports of merchandise from France into the United States during the year ended June 30, 1883, distinguishing between merchandise free of duty and dutiable.

The principal articles imported from France were, in the order of magnitude of value, as follows:

Order.	Commodities.	Value.	Free of duty or dutiable.
		Dollars.	
1	Manufactures of silk	22, 054, 666	Dutiable.
2	Wool, and manufactures of	*16, 299, 966	Dutiable.
3	Manufactures of cotton	8, 787, 412	Dutiable.
4	Wines, spirits, and cordials	6, 615, 577	Dutiable.
5	Leather, and manufactures of	†6, 238, 050	Dutiable.
6	Precious stones	3, 885, 191	Dutiable.
7	Silk, raw	3, 607, 958	Free.
8	Watches, watch-movements and materials	2, 166, 588	Dutiable.
9	Fancy goods	2, 075, 529	Dutiable.

* The value of raw wool included is only $706,857.
† The value of leather included is $4,506,206.

The imports of manufactures of silk goods, cotton goods, woolen goods; wines, spirits, and cordials; watches, watch-movements, and materials, and fancy goods from France compete with similar manufactures in the United States. According to the report of the secretary of the silk association of America for 1883 it appears that the percentage of silk goods manufactured in the United States, as compared with the whole consumption of such goods in the country, increased from 13 per cent. in 1860, to 38 per cent. in 1880. The total value of the manufactures of wool in the United States during the census year was $267,252,913; the total value of the manufactures of cotton goods was $210,950,383; the total value of the manufactures of leather was $454,969,870, and the total value of the manufactures of watches, watch-movements, and materials was $4,889,509.

Special inquiry has been made in regard to the imports of wine into the United States from France. The following table shows the imports of wine into the United States from that country during the last ten years:

Quantity of and value of wine imported from France into the United States during each year from 1864 *to* 1883, *inclusive.*

Year ending June 30—	In casks.		In bottles.		Total.
	Gallons.	*Dollars.*	*Dozens.*	*Dollars.*	*Dollars.*
1864	4,231,712	2,198,835	.....	.....	2,198,835
1865	1,147,025	367,518	*53,282	360,173	727,591
1866	5,891,720	1,639,447	*121,334	1,162,457	2,801,904

1883	2,511,982	1,349,617	417,642	3,946,239	5,295,856

* Sparkling wines only.

From this statement it appears that the total quantity of wine imported into the United States from France during the year ended June 30, 1883, amounted to about 3,514,323 gallons, the total value of which was $5,295,856. According to the estimate of Mr. Chas. Loeser, of New York, president of the Wine and Liquor Dealers' Association of the United States, the wine product of this country for the year 1883 amounted to 17,487,000 gallons. About $3,000,000 were collected from duties on wines imported into the United States from France during the year ended June 30, 1883.

TRADE OF THE UNITED STATES WITH GERMANY.

The following table shows the total value of the commerce of the United States with Germany during each year from 1867 to 1883, inclusive:

Value of merchandise imported into the United States from Germany and of merchandise exported from the United States to Germany.

Year ended June 30—	Exports.		Total exports.	Imports.	Total imports and exports.

1882	52,790,056	1,438,897	54,228,953	56,368,542	110,597,495
1883	64,340,490	1,829,439	66,169,929	57,377,728	123,547,657

Attention is invited to Appendix P, which shows in detail the articles of merchandise exported from the United States to Germany, and the imports of merchandise from Germany into the United States, during the fiscal year ended June 30, 1883.

The chief articles imported from Germany during the year were, in the order of magnitude of value, as follows:

Order.	Commodities.	Value.	Dutiable or free of duty.
		Dollars.	
1	Manufactures of cotton	8, 710, 077	Dutiable.
2	Wool, and manufactures thereof	*6, 497, 999	Dutiable.
3	Manufactures of silk	4, 227, 109	Dutiable.
4	Iron and steel, and manufactures thereof	3, 158, 973	Dutiable.
5	Leather and manufactures thereof	†3, 114, 981	Dutiable.
6	Buttons and button materials	2, 332, 090	Dutiable.
7	Fancy goods	2, 006, 684	Dutiable.

*The value of the wool imported from Germany amounted to only $8,960; the value of the imports of manufactures of wool from that country having been $6,489,039.

†The value of leather imported from Germany was $1,104,909, and the value of manufactures of leather, $2,010,072.

The imports of all the manufactured commodities mentioned in the foregoing schedule to a greater or less extent came into competition with similar articles manufactured in the United States.

The quantity and value of wine imported from Germany into the United States during each year from 1864 to 1883, inclusive, is shown in Appendix Q.

Attention is also invited to the following documents appended hereunto:

(*a.*) The American pork question; a letter addressed to the Minister of Foreign Affairs of France by Leon Chotteau, a citizen of that country. (See Appendix R.)

(*b.*) A letter addressed to the Chief of the Bureau of Statistics by Dr. Emmons Clark, secretary of the Health Department of New York city. (See Appendix X.)

(*c.*) A statement showing the duties imposed by the French and German Governments upon hog products when imported into those countries. (See Appendix Y.)

(*d.*) A statement by Mr. Charles Randolph, secretary of the Board of Trade of Chicago, in regard to prices and the exportation of hog products to foreign countries. (See Appendix W.)

I am, sir, very respectfully, yours,

JOSEPH NIMMO, JR.,
Chief of Bureau.

Hon. CHAS. J. FOLGER,
Secretary of the Treasury.

APPENDIX A.

THE WORLD'S SUPPLY OF SWINE.

The following table is taken from the Cincinnati Price-Current, published by Mr. Charles B. Murray, and shows the number of swine reported in the United States in 1883, in the United Kingdom in 1882, and in other countries having 100,000 or more in 1880:

Countries.	Number.	Per cent. of total.
United States	43,270,000	47.05
Russia	10,332,000	11.23
Germany	7,324,000	7.96
Austro-Hungary	6,995,000	7.61
France	5,801,000	6.31
Spain	4,352,000	4.73
United Kingdom	3,940,000	4.28
Switzerland	2,000,000	2.18
Italy	1,564,000	1.70
British North American Provinces	1,419,000	1.54
Roumania	837,000	.91
Portugal	717,000	.78
Belgium	602,000	.65
Australia	567,000	.62
Denmark	504,000	.55
Sweden	426,000	.46
Holland	352,000	.38
Argentine Republic	342,000	.37
New Zealand	207,000	.28
Greece	180,000	.20
Cape of Good Hope	132,000	.14
Norway	101,000	.11
Total	91,964,000	100.00

APPENDIX B.

Value of the exports of hog products from the principal and all other ports of the United States during the years ended June 30, 1881, 1882, and 1883.

Ports.	Years.		
	1881.	1882.	1883.
Baltimore, Md	$5,910,910	$784,468	$1,117,261
Boston and Charlestown, Mass	19,042,646	14,942,708	10,307,310
New York, N. Y	69,558,806	54,427,578	47,695,921
Philadelphia, Pa	6,034,147	8,345,754	6,321,269
Portland and Falmouth, Me	770,919	750,760	779,456
Port Huron, Mich.*	2,156,530	2,037,578	3,426,461
All other ports	1,186,107	1,564,100	1,318,590
Total	104,660,065	82,852,946	70,065,268

* The exports from Port Huron were to Canada.

APPENDIX C.

Value of the exports of domestic bacon from the United States to each one of the principal foreign countries for the years ended June 30, 1881, 1882, *and* 1883.

Countries.	Years.		
	1881.	1882.	1883.
Great Britain and Ireland	$38,651,946	$38,318,699	$26,845,784
Germany	2,982,852	295,856	1,374,432
Belgium	4,583,807	1,696,150	1,239,123
British North American Possessions	728,201	704,987	938,364
Denmark	458,181	163,382	644,545

APPENDIX I.

THE PRESIDENT OF THE FRENCH REPUBLIC ON THE REPORT OF THE MINISTER OF AGRICULTURE AND OF COMMERCE.

In view of the advice of the consultative committee of public hygiene of France, considering that the introduction into France of salt pork notoriously infected with trichinæ, presents great dangers to the public health, decrees:

ARTICLE 1. In all the territory of the French Republic the importation of salt pork coming from the United States of America is forbidden.

ARTICLE 2. The minister of agriculture and of commerce and the minister of finances are charged, each in that which concerns him, with the execution of the present decree, which will be inserted in the Journal Official and published in the Bulletin des Lois.

Done at Paris, February 18, 1881.

JULES GRÉVY.

By the President of the Republic:
P. TIRARD,
Minister of Agriculture and Commerce.
J. MAGNIN,
Minister of Finances.

APPENDIX J.

DECREE OF JUNE 25, 1880, REGARDING THE PROHIBITION OF THE IMPORTATION OF PORK AND SAUSAGES INTO GERMANY FROM AMERICA.

We, William, by the grace of God Emperor of Germany and King of Prussia, &c., decree, in the name of the empire, the consent of the federal council having been obtained, as follows:

§ 1. The importation of chopped or in a similar manner divided or otherwise prepared pork and of sausages of all kinds from America is prohibited until further notice. This prohibition does not include the importation of hams and bacon.

§ 2. The imperial chancellor is authorized to make exceptions to this prohibition and to adopt the measures necessary for this purpose.

§ 3. This decree takes effect on the day of its publication.

Witnessed under our high signature and the affixed imperial seal.

Given, Bad Ems, the 25th day of June, 1880.

[SEAL.]
[SEAL.]

WILLIAM.
PRINCE v. BISMARCK.

APPENDIX K.

CHICAGO, *January* 29, 1884.

DEAR SIR: We are in receipt of your esteemed favor of the 26th instant, with inclosures, and have given them our careful attention. Our experience proves that bacon and hams, as well as pork, are actually excluded from both France and Germany. There is not, so far as we know, any restriction on the importation of American lard into France or Germany. As to the French edict, referring only to salted meats, we may say the prohibition has, to our knowledge, been operative against all other forms of hog product (lard excepted) not covered by the expression "salted meats." The term pork, as used in the edicts, is, in our opinion designed to cover more than the commodity known here as "pork," and really includes "bacon" and "hams." Such certainly is the interpretation which those intrusted with the execution of the respective edicts have seen fit to put upon it.

To come to the next point in your letter, we would say that the German prohibition applies equally to Bremen and Hamburg with the rest of the empire, so far as consumption in these cities is concerned, but it is permitted to ship all hog products to Bremen and Hamburg, provided these ports are used merely as points of transshipment to other countries.

There is no doubt that the direct effect of the French and German prohibitions was mitigated and at times entirely neutralized by commercial causes, and that the high prices ruling here, as a consequence, presumably, of reduced production of hogs in the United States, encouraged an increased production in the countries excluding our product. It is very difficult, therefore, to state or to show just what loss was inflicted

on our trade by the action of France and Germany; but that it has suffered, and materially, too, we have no doubt. Neither do we doubt that the action of these countries has created in some other counties a decided prejudice against American hog products, and has influenced other countries (of which Portugal is the latest example) to imitate their prohibitory policy.

We shall await your report with patience, and shall deem it fortunate if what little information we have been able to impart conduces in your hands to the result which we desire, viz, the final recall of the prohibitory edicts.

Yours, very respectfully,

ARMOUR & CO.

JOSEPH NIMMO, Jr., Esq.,
Chief of Bureau of Statistics, Washington, D. C.

APPENDIX L.

EDICT OF THE BOARD OF TRADE AND NAVIGATION OF HAMBURG RESPECTING THE IMPORTATION OF AMERICAN HOG PRODUCTS AT THAT PORT.

Notice respecting the prohibition of the import of pigs, pork, bacon, and sausages of American origin.

The masters of vessels arriving at this port having on board, as cargo or provisions, pigs, pork, bacon, and sausages of American origin are hereby informed that such import is prohibited, and that goods of that description being of other than American origin, are only allowed to be discharged with the permission of the proper authorities (Declarations-Bureau).

Pork and bacon of American origin which are intended for re-export to foreign countries, or as provisions for seagoing vessels lying in this harbor, may be discharged under the direction and superintendence of the proper authorities (Administration of the Quay).

The masters, who are also responsible for their crews, are recommended to inform themselves at their arrival here from their agents or brokers as to the strict observation of the directions under which pigs, pork, bacon, and sausages may be landed. For neglecting to do so, they incur heavy penalties and the confiscation of the goods discharged without permission.

Hamburg, the 21st of April, 1883.

THE BOARD OF TRADE AND NAVIGATION.

APPENDIX M.

STATEMENT MADE BY MR. SIDNEY D. MAXWELL, SUPERINTENDENT OF THE CHAMBER OF COMMERCE OF CINCINNATI, TO THE CHIEF OF THE BUREAU OF STATISTICS, IN REGARD TO THE QUALITY OF AMERICAN HOG PRODUCTS, IN A LETTER DATED JANUARY 21, 1884.

The hogs of this country are generally raised under circumstances the most favorable to produce healthy meats. They are almost universally allowed to range at large in the fields and wooded lands, where they have ample air and water. They are fattened from corn, and under the rules of the Chamber of Commerce of this city, only meats from corn-fed hogs are recognized as regular. The circumstances under which pork is produced are such as to reduce the liability to diseased meats to the minimum. So remote a possibility is this, that in this city, which may be regarded as the home of pork-packing in this country, where for well-nigh half a century this has been a great industry, and where large quantities are consumed, there does not appear on the records a single well-authenticated case of trichinosis. In relation to the hog cholera, it may be remarked that it is well known to hog-raisers that cholera usually attacks the young swine, which are not such as are acceptable to our packers, who use the heavy hogs; and where there is an exception to this rule, the packers are aware that meat made from diseased hogs will not only not cure properly, but will contaminate good meats; so that if a curer were prompted by no other than a mercenary motive, the public would find the amplest protection against bad meats from this cause. Under our municipal regulations we have regular inspectors, whose duty it is to visit the stock-yards and slaughter-houses daily, with a view to protecting the

public against hogs being slaughtered for food that are diseased. Hogs that die from disease go to the desiccating companies, whose wagons are alone authorized to remove them. The work of our packing houses is done in an open and public manner, and under the most improved methods for killing the animals and handling and curing the meats. Then, at last, if meats were sought to be cured from hogs diseased, bruised, or maimed, they would be liable to be detected by our inspectors of meats. I doubt if in the whole range of articles of human food of large consumption there is a better record than that which is furnished by the curers of hog product. I say this much, because in my statistical work I have good opportunities for knowing something about the matters involved in the discussion, and because your inquiry and my relations to your Department have made it suitable for me to go beyond the immediate bounds of your inquiry. It is not difficult to see that the outcry against the meats made from the hogs of this country is the result of ignorance in relation to the subject, or because foreign governments have sought to protect themselves against the growing commercial and industrial importance of this country by resorting to a miserable subterfuge; and the former with all the agitation since the foreign raid against the hog product of this country was inaugurated and with the opportunities of information which existed at this stage of the inquiry, seems so improbable as to be unworthy of consideration.

Yours, very truly,

SIDNEY D. MAXWELL,
Superintendent.

APPENDIX R.

THE AMERICAN PORK QUESTION IN FRANCE.

The following letter has been addressed to Mr. de Freycinet, minister of foreign affairs, president of the French cabinet:

PARIS, *February* 5, 1882.

DEAR SIR: The important question of the American salted pork meats, which your predecessors often examined and always postponed, is not yet resolved.

The decree of prohibition was signed on February 18, 1881. Its object was to struggle against a danger which science declared did not exist.

Such a measure suppressed at once in our sea-ports a branch of trade amounting annually to about forty millions of francs ($8,000,000), and deprived the working classes of a wholesome food at a cheap price.

After February 18 the French Republican Government saw that it had gone too far; for it was said to General Noyes (at that time American minister at Paris) and to French importers, who had in prospect nothing less than ruin:

"Do not provoke any agitation; make no noise; be quiet; the decree is only a temporary one, and we are going to repeal it."

General Noyes wrote the following reply on April 8, 1881, to the Government at Washington:

"I have some reason to think that the French Government is more favorably disposed than heretofore towards our application, and I am confident that within two months, perhaps within one month, the order will be annulled."

The two months are now long past, but up to the present date nothing has been done, though the preceding cabinets have made an effort to lull the vigilance of interested people. Recently, I believe, these promises, made in March and April, were renewed to Mr. Levi P. Morton, successor of General Noyes at Paris. Such is my opinion. I can not, however, interrogate Mr. Morton on the subject, nor can he show me his reports.

A project establishing the rules of the microscopic inspection—that is to say, offering an impossibility to the trade—was introduced at the Chamber of Deputies by the minister of commerce on November 5, 1881. That project, elaborated with care, was a perfect one; unfortunately, it was unpractical. Then the bill was retired by a decree of the President of the French Republic.

Another project was presented to the Chamber by the minister of commerce on January 14, last. This second project proposes to take the place of the prohibitory decree of February, a system of inspection which is neither practical nor logical, but

which, however, has the advantage of suppressing the microscope. It was accepted, though imperfect, at Havre, Bordeaux, Marseilles, and Lyons, just at a time when the minister who proposed it resigned.

At present interested people are afraid that, with a new state of things, the question of microscopical inspection will again be agitated, although recognized impossible by the second project. Should that second project be retired and a third one introduced, but to share the fate of its two predecessors, men of good common sense will ask themselves when the result so anxiously desired will be obtained definitely. The American people have been patient up to this time, but that patience is now nearly exhausted.

In 1867, Mr. Bigelow, then American minister at Paris, received one day the official order to say to the Imperial Government:

"Withdraw your soldiers from Mexico, or we immediately interfere."

The French soldiers were immediately withdrawn.

If you, sir, do not soon repair the mistake committed during the last year, Mr. Morton, faithful interpreter of his Government, will probably before long say to you:

"Repeal the decree of February 18, 1881, or we will prohibit the introduction to the United States of your wines and silk fabrics," &c.

This, sir, is the impression I received during my last trip in America.

You will be able, I am sure, enlightened by your wisdom and patriotism, to save our French trade from the imminent retaliations of the United States.

I am, dear sir, very respectfully,

LÉON CHOTTEAU.

APPENDIX S.

[Telegram.]

NEW YORK, *February* 1, 1884.

Merchants here engaged in export trade state there is a strict prohibition of hog product, even in bond in transit for other countries, in both France and Germany. Switzerland imports through Italy. At Hamburg and Bremen it is permitted, when taken by the same vessel that brought it, if final destination is a Baltic point outside of Germany; but no transshipment permitted.

E. H. WALKER,
Statistician, N. Y. Pr. Ex.

JOS. NIMMO, JR.,
Chief of Bureau of Statistics.

APPENDIX T.

TREASURY DEPARTMENT,
OFFICE SUPERVISING SURGEON-GENERAL U. S. MARINE-HOSPITAL SERVICE,
Washington, February 1, 1884.

SIR: In accordance with the request contained in your letter of January 30, 1884, I have to inform you that the total number of seamen treated by the Marine-Hospital Service for the ten years from 1874 to 1883, inclusive, was 234,353. The total number of deaths from all causes during that period was 4,234. There were no cases of trichinosis reported during that period, or since the organization of the service, so far as the records of this office show.

In answer to your inquiry as to whether the class of patients who are treated by this service do not subsist very largely upon pork meat, I have to say that they do subsist largely upon that class of food, and it is for the most part salt pork.

Very respectfully,

JOHN B. HAMILTON,
Surgeon-General, M. H. S.

Mr. JOSEPH NIMMO,
Chief of Bureau of Statistics.

APPENDIX U.

DISTRICT OF COLUMBIA,
Health Department, Washington, February 2, 1884.

DEAR SIR: Referring to yours of January 30, 1884, asking certain information relative to sickness or death caused by eating certain articles of food, I have the honor to state that the records of this department show no fatal case of sickness caused by the eating of pork meats in the District of Columbia.

In so far as the question of the relative merits of pork meats compared with other articles of diet is concerned, the only way we have of judging is by the condemnations of unwholesome food. I send you herewith a marked copy of my last published report, which will give you the facts in tabular form. It will be seen that, during the ten years covered, the condemnations of bacon, ham, and pork form but a comparatively small proportion. See pages 13 and 16 of report.

Very respectfully, etc.,

SMITH TOWNSHEND, M. D.,
Health Officer.

JOSEPH NIMMO, JR.,
Chief Bureau of Statistics.

APPENDIX V.

Statements from the chief health officers of New York, Boston, Philadelphia, and Baltimore in regard to the total number of deaths in those cities, and the number of deaths from trichinosis.

OFFICE OF THE BOARD OF HEALTH,
REGISTRATION DAPARTMENT, NO. 604 SANSOM STREET,
Philadelphia, February 1, 1884.

SIR: Your telegram this date to hand. In reply:

Correct:

EMMONS CLARK,
Secretary Health Department, New York City.

FEBRUARY 1, 1884

[Telegram.]

BOARD OF HEALTH,
Boston, Mass., February 1, 1884.

SIR: Total number of deaths reported to us last five years, 43,680. No deaths reported from trichinosis.

Respectfully,

A. H. DURGIN,
Chairman.

To JOSEPH NIMMO, Jr.,
Washington, D. C.

HEALTH DEPARTMENT,
City Hall, Baltimore, February 1, 1884.

DEAR SIR: Your telegram to Doctor Benson has been placed in my hands. I endeavored to reply by telephone, and now write to verify my statement. I have just completed a statistical table, covering a period of fifty-four years, in regard to zymotic diseases and the mortality of children under five years of age in the city of Baltimore. Have also made a very thorough examination of the reports of this department from January 1, 1834, to December 31, 1883, a period of fifty years, and have been unable to find *a single case* of "trichinosis" reported. I have also consulted some of our ablest as well as oldest physicians. Their testimony is, that they never heard of a case in Baltimore. I have resided here nearly fifty-seven years, and consider myself a close observer; have a good memory also. I never heard of a case in our city, notwithstanding a vast amount of pork is consumed by our citizens. I therefore feel quite confident in asserting that this city has been absolutely free from this disease. I find by my table that the total number of deaths in Baltimore have been as follows:

Years.	Total deaths.	Years.	Total deaths.
1830	2,086	1857	5,120
1831	2,308	1858	5,407
1832	*3,572	1859	4,647
1833	2,405	1860	4,866
1834	2,747	1861	4,790
1835	2,050	1862	5,173
1836	2,192	1863	5,551
1837	2,518	1864	5,568
1838	2,376	1865	4,695
1839	2,260	1866	5,623
1840	2,045	1867	5,211
1841	2,448	1868	6,178
1842	2,454	1869	6,497
1843	2,333	1870	7,262
1844	2,665	1871	7,141
1845	2,896	1872	†7,546
1846	2,994	1873	‡7,817
1847	3,414	1874	7,401
1848	3,861	1875	7,382
1849	4,165	1876	7,317
1850	4,210	1877	9,022
1851	4,169	1878	6,733
1852	4,965	1879	7,618
1853	4,717	1880	8,043
1854	5,416	1881	8,816
1855	5,075	1882	§8,933
1856	5,229	1883	‖9,380

* 853 from cholera.
† 896 from small-pox.
‡ 617 from small-pox.
§ 551 from small-pox.
‖ 633 from small-pox.

Making a grand total of deaths during fifty-four years, 264,324, of which number 125,874 were children under five years of age, 17,982 having died from cholera infantum.

Respectfully submitted.

A. R. CARTER,
Secretary Health Department.

JOSEPH NIMMO, Jr., Esq.,
Chief of Bureau of Statistics, Washington, D. C.

APPENDIX W.

Letter addressed to the Chief of the Bureau of Statistics by Mr. Charles Randolph, secretary of the Board of Trade of Chicago.

BOARD OF TRADE,
Secretary's Office, Chicago, January 30, 1884.

DEAR SIR: Yours of the 26th and 28th instants are received, the first with inclosures, which I herewith return. I have read over your letter (copy) to Mr. Murray. I quite agree with you that it would be "a perversion of the truth to represent that the total falling off in our exports of hog products has been due entirely to the action of Germany and France." The German general interdiction did not take effect until March, 1883. The decree of June 25, 1880, a copy of which you inclosed me, did not cover anything but sausage, and had little effect in this country, as we had sent but an insignificant quantity previously. In March, 1883, a new order was issued, the text of which I have not got. This covered all forms of pork meat when designed for consumption in Germany, and by the statement of Consul Mason, at Basle, Switzerland, was also held to prohibit the transportation, even in sealed cars, of American pork from other countries through German territory to countries beyond. This, perhaps, was the most unfriendly act that has grown out of the whole business, and one that it seems to me ought to have called out a vigorous protest from our Government. The State Department was, I think, informed in May last of this prohibition, the circumstances of which were detailed in correspondence sent the Department by Consul Mason. There is no prohibition on the importation of lard in Germany; but the authorities have, I understand, seized some lard alleged to be mixed with water, and confiscated it at the German border (I think Aix-la-Chapelle). In France the prohibition is held to cover all forms of pork meat, but not lard. I think there is a still later decree than that of February 18, 1881, copy of which you sent. This one, however, would doubtless be held to cover all forms of pork meat, whether salted in barrels or otherwise, smoked or not. These prohibitions are understood in the trade to cover all forms of pork except lard, in both France and Germany, with the exception that pork in barrels is allowed into German ports *if to be used on shipboard, and is held under Government control until taken for shipment by sea.*

The great falling off in exports of hog products from this country has been far more on account of the high price at home than from any of these prohibitions, the high prices made by home demand of course being possible of attainment on account of that demand being largely increased on a diminished supply, resulting from the causes alluded to in your letter to Mr. Murray. Mess-pork in barrels is perhaps the best standard to estimate all values by. That averaged in this market in 1878 $9 per barrel; in 1879, $8.54; in 1880, $13.06; in 1881, $16.47½; in 1882, $19.42; and in 1883, $15.12½; but up to July, 1883, very much higher than the average of the whole year. That the price (here) has had more to do with the falling off in exports than any prohibition is clearly shown in the falling off in lard exports, on which there has been no prohibition, and also in the large decline in exports to Germany prior to March, 1883, when there was no prohibition except as it relates to sausages.

I can not say positively as to whether or not the action of France and Germany has discredited our pork products in Great Britain to an extent that has diminished our exports there, but I do not think it has had any such effect. Those exports have been reduced, as I think, on account of our high prices for home consumption, the same as corn exports were diminished in 1882 from the same cause. I do not see how you can arrive at a percentage of total exports of hog products that falls under the prohibition in any satisfactory manner. You might take the total exports of any given year prior to the prohibitions, and, arriving at the percentage of that year which went to those countries, state that to be the percentage that under a similar volume of exports would now be the percentage falling under the prohibitions; but even that would not be a very satisfactory way of stating it, because under a different range of prices, changed home supplies, etc., it might be quite different.

I do not think of anything else in this connection that can be of value to you.

Yours, truly,

CHAS. RANDOLPH,
Secretary.

Hon. JOS. NIMMO, Jr.,
Chief of Bureau of Statistics, Washington, D. C.

APPENDIX X.

HEALTH DEPARTMENT,
No. 301 *Mott street, New York, January* 31, 1884.

DEAR SIR: I have examined the article inclosed in yours of 30th instant on "Trichinæ and Trichinosis," and confidently certify to the correctness of the statements therein. That more deaths occur and more sickness prevails from eating fish and oysters in bad condition, and from eating stale vegetables, than from eating pork, can hardly be questioned.

Yours, respectfully,

EMMONS CLARK,
Secretary.

JOSEPH NIMMO, Jr.,
Chief Bureau of Statistics, Treasury Department,
Washington, D. C.

No. 8.

Senate Ex. Doc. No. 114, Fiftieth Congress, first session.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES TRANSMITTING LETTER OF THE SECRETARY OF STATE AND REPORTS RELATIVE TO ALLEGED ACTION BY THE FRENCH GOVERNMENT IN PROHIBITING THE IMPORTATION OF AMERICAN PRODUCTS.

MARCH 7, 1888.—Read and laid upon the table and ordered to be printed.

To the Senate:

In compliance with the resolution of the Senate of the 24th of February, 1888, calling for information as to whether the Government of France has prohibited the importation into that country of any American products, and, if so, what products of the United States are affected thereby; and also as to whether any correspondence upon said subject has passed between the Governments of the United States and France, I transmit herewith a report from the Secretary of State on the subject, with the accompanying correspondence.

GROVER CLEVELAND.

EXECUTIVE MANSION,
Washington, March 7, 1888.

The PRESIDENT:

The Secretary of State, to whom was referred the resolution of the Senate of the 24th ultimo, requesting the President "to inform the Senate, if it is not in his judgment incompatible with the public interests to communicate such information, whether the Government of France has prohibited the importation into France of any American products, and, if so, what products of the United States are affected thereby; the date of such prohibition, and what steps, if any, have been taken by the Government of the United States to secure the rescinding of such prohibition; also, whether any correspondence upon said subject had passed between the Governments of France and the United States prior to the message of the President to Congress, dated January 12, 1888, containing the report of the Secretary of State in relation to the invitation from the Government of France to this Government to participate in the International Exhibition to be held at Paris in 1889, which report recommended that said invitation be accepted and that the necessary appropriation be made therefor; and, if so, the substance and purport of such correspondence," has the honor to lay before the President the correspondence and information called for by said resolution.

On the 18th day of February, 1881, the French Government issued a decree forbidding the importation of American pork into France. This decree has been in force since that date, except for a few weeks in 1883. On the 27th of November, 1883, it was revoked, but on the 27th of the

following month it was re-issued in obedience to a resolution which passed the French Chamber of Deputies by a vote of 272 to 153, showing the very decided majority of 119 votes in favor of the policy of excluding American pork from France. It will be seen from the accompanying correspondence that there is no evidence that the views of the majority of the French Chamber of Deputies have changed; and the Department knows of no ground to hope that the decree will be revoked at any early day.

Inasmuch as the decree of the 18th of February, 1881, prohibiting the importation of American pork into France did not apply to the pork products of other nations and thereby discriminated against this country, and inasmuch as the reasons assigned by the French Government for issuing the decree were without good foundation, this Government at once protested against the measure, and since August, 1880, it has been, from time to time, the subject of earnest diplomatic representations by this Government to that of France. It will be seen from the latest dispatch from Mr. McLane on the subject, No. 545, of the 9th ultimo, that the situation now remains substantially unchanged.

The greater portion of the correspondence on this subject has already been communicated to Congress, but as it is scattered through a number of documents it has been thought best to compile in chronological order all the correspondence in respect of the French decree since August, 1880, in order that the Senate may be the better enabled to obtain a connected view of the entire matter.

Respectfully submitted.

T. F. BAYAYD.

No. 101.

Mr. Morton to Mr. Frelinghuysen.

[Extract.]

No. 483.] LEGATION OF THE UNITED STATES,
Paris, January 22, 1884. (Received February 9.)

SIR: By special appointment I called yesterday on Mr. Ferry to ascertain his intentions in relation to the earnest representations I had again made with reference to the prohibition of our pork products and to call his serious attention to the agitation which the revival of prohibitory measures had created in the United States. I reminded him of his promise made on New Year's day that he would not let the matter rest there, adding that I had communicated to you his language, that the moment was critical, and that if some liberal steps were not determined upon on this side, Congress would no doubt adopt measures which might complicate the matter and render its solution less easy.

He said he remembered well his promise, and reasserted that his Government did not intend to let the matter drop, that the minister of commerce was preparing a bill which he hoped would give satisfaction to both countries, but that he had not pressed its presentation in order to enable public opinion to be enlightened as to the true bearing of the question; that the press had so widely and so liberally discussed it that he expected to find less opposition in the Chambers when the question was again brought before it.

Upon my inquiring the nature of the contemplated bill, he said that it would provide for an inspection, but it was the intention of the Government to make this inspection as light as possible, its object being mainly to show whether the meats were or were not *fully cured*, for the purpose of only rejecting the latter. In substance the bill is to be the same as the one which passed the Chamber in March, 1882, the more liberal conditions of which are embodied in the Gaudin bill, which caused the introduction of Mr. Paul Bert's resolution, and which is now in the hands of a committee of the house.

Mr. Ferry then asked if I could give him any definite information as to the character of the measures recently introduced in Congress in relation to the subject; what he desired particularly to know was what share our Government had in the action thus taken, and if any of the bills or measures mentioned by telegrams had official character.

I replied that though I had not received any communication from you with reference to the matter, I could safely give him the assurance that you had not proposed any of the measures to which he referred, as in our system of Government the Executive did not originate legislation, that these measures had been undoubtedly proposed by members of the two houses, under the pressure of public opinion, or at the suggestion of the large and influential class of people engaged in the pork trade, and that I had good reason to believe that very far from countenancing any unreasonable retaliatory measures you disapproved of them. I then gave him the substance of a late telegram published in the London Times, stating that you had intimated to members of the House of Representatives that it would be well to proceed with circumspection in the matter of authorizing the prohibition of the importation of certain goods from foreign countries which placed restrictions on the importation of American products; that the introduction in Congress of certain measures had already accomplished some good, and that it

would perhaps be better to avoid actual legislation of a retaliatory character.

Mr. Ferry was much pleased with this statement. "These are," he said, "very good words; they convey wise advice and are calculated to facilitate us [meaning himself and myself] in the task we have jointly undertaken of settling this troublesome question."

* * * * * * *

In the course of the conversation reference was also made to the establishment of a system of inspection of our salted meats by United States officers, and Mr. Ferry expressed the opinion that an inspection having this character would be received here with great satisfaction and might remove all the objections made by many people who still believed in trichinæ and trichinosis, and he was pleased to say that he was not one of them.

I have, etc.,

LEVI P. MORTON.

No. 102.

Mr. Morton to Mr. Frelinghuysen.

No. 486.] LEGATION OF THE UNITED STATES,
Paris, January 23, 1884. (Received February 9.)

SIR: With reference to your telegram received January 2, requesting me to ask that the time allowed for the admission of American pork in France be extended to the 1st of February, I have the honor to inform you that the application was made and granted.

I have, etc.,

LEVI P. MORTON.

No. 103.

Mr. Morton to Mr. Frelinghuysen.

No. 490.] LEGATION OF THE UNITED STATES,
Paris, January 31, 1884. (Received February 15.)

SIR: My telegram of yesterday gave you the substance of the conversation I had in the morning with Mr. Paul Bert in view of his opposition to the free admission of our salted meats. Although I had often met Mr. Paul Bert in official circles and at my house, I felt some hesitancy in approaching, on this subject, an expert with whom I could not attempt to discuss the matter scientifically, and one who had taken in this instance a hostile stand to his own Government. I thought proper to first suggest the idea to the president of the council, who favored the suggestion and even advised me to see Mr. Paul Bert and appeared as anxious as I am to reach a practical understanding with regard to this difficulty.

I opened the subject with Mr. Paul Bert by stating very frankly that I had not called to enter upon a technical controversy with so distinguished a scientist with reference to the question of trichinosis, but simply as an American as friendly to France as I knew he was to America, and to express the hope that a man of his liberal views could devise some plan of action which would give satisfaction to both countries. I added that the matter had taken a threatening aspect in the

United States, that our people could not understand why American pork should be prohibited in France while similar products were admitted from all other countries; that my Government and people had become impatient after waiting so long for a settlement always promised but never reached, and that the American Congress would move in the matter unless action was taken by the French Government.

Mr. Paul Bert said he was very glad I had presented the case so frankly and on broad grounds, and asked permission to state as frankly his position.

In the first place, he was not a protectionist; his political principles led him to favor competition, and upon that ground he would open all the French ports to our hog products.

In the second place, he did not believe in any of the absurd notions entertained by so many people in relation to trichinæ and trichinosis. He knew that dead trichinæ did not injure the meat; he knew that a *certain* amount of salt killed it; he knew that a *certain* degree of cooking destroyed it, and he knew that there were no epidemics of trichinosis in the United States, where the consumption of pork was larger than in any other country; but he also knew that live trichinæ existed in American pork, for he had seen some, and that neither the salting nor the cooking *always* killed. If trichinosis was a malady affecting only individuals, he would not notice it. Some people would take it, some would die, others would recover, but trichinosis when once introduced in a country might become epidemic, and this was what he wanted to guard against. American and German pork were infected with trichinæ, French pork was not. His only aim was to guard French pork in this respect. The true and proper mode of reaching this end would be to determine by scientific experiments the exact proportion of salt necessary to kill trichinæ, and the exact length of time during which the meat is to remain in the brine, but this can not be done in a few weeks, and not even in a few months. Inspection is, therefore, the only remedy available. But inspection on this side is attended with insuperable difficulties, because to be effective it must apply to every piece of meat. Now, on the other side this difficulty does not exist, because if trichinæ is not found in certain well-known parts of a whole hog the animal is free from it.

Mr. Paul Bert dwelt at length upon this subject in a scientific manner, which I regret I can not explain with his accuracy, but which struck me as having force. He assured me that he was moved purely by scientific consideration; that very far from having any intention of obstructing our commercial relations, he was desirous of increasing them in every way, and that he had not the slightest concern with the French packers. He promised to take up the matter earnestly and to spare no effort to devise some plan which would be acceptable to us; but repeated that in his opinion an American inspection would solve the difficulty much more easily than a French inspection. He was very careful, however, in pointing out that he meant a Government inspection, made by *national officials* under the supervision of the authorities at Washington, and not a local inspection made by State or city officers, in whom he would have no more confidence than in officials of the same kind appointed by the local authorities of France.

Mr. Paul Bert is to dine with me to-morrow with the president of the council and other members of the cabinet,, and I may have something more to report in relation to this subject by the next mail.

I have, etc.,

LEVI P. MORTON.

[Extract.]

No. 500.] LEGATION OF THE UNITED STATES,
Paris, February 8, 1884. (Received February 25.)

SIR:

* * * * * * *

I am happy to add that the French Academy of Medicine has, with but with one dissentient voice, voted that the Government may, without injury to the public health, withdraw the decree prohibiting the importation of American salted meats. Herewith you will find a printed slip giving the substance of their answer to the question propounded by the Government. I was informed by a member of the academy, some days since, of the probable result of the inquiry.

Mr. Ferry also made renewed inquiry regarding steps which had been taken to inaugurate American Federal inspection, the adoption of which system, he believes, would be the most satisfactory solution of the controversy.

I have, etc.,

LEVI P. MORTON.

[Inclosure in No. 500.]

THE LATEST VIEWS ON PORK.

The following are the answers of the French Academy of Medicine to the questions of the minister of commerce on the subject of the importation of foreign meat:

1. The symptoms of typhoid and trichinosis are so dissimilar in every respect that one epidemic could never be mistaken for the other.

2. The importation of foreign salt pork may be fearlessly authorized by the French Government, as it is clearly proved that no danger to public health has been caused by such importation.

3. Special international laws ought to be enacted by which guaranties against the importation of diseased meat may be made.

4. Possible instructions should be distributed to all vendors of foreign pork, who ought to be forced by law to hang them up in their shops in the same way that wine-shop keepers exhibit the statutes of the "Loi d'ivresse publique."

No. 105.

Mr. Frelinghuysen to Mr. Morton

No. 450.] DEPARTMENT OF STATE,
Washington, February 12, 1884.

SIR: Your dispatch, No. 483, of the 22d ultimo, reporting your interview on the preceding day with M. Ferry in relation to the pork question, has been read with interest.

With reference to your communication with M. Ferry in regard to the telegram to the London Times, it is proper for me to observe that that telegram does not accurately represent the views of the Executive as communicated to Congress. I therefore inclose herewith for your information a copy of Executive Document No. 70, House of Representa-

tives, Forty-eighth Congress, first session, and call your particular attention to the views expressed in my report to the President, adding that the President is much gratified to learn that the French Government is endeavoring to secure legislation allowing the importation of American pork into France upon terms favorable to the restoration of that branch of our commerce to its normal condition.

I am, etc.,

FRED'K T. FRELINGHUYSEN

No. 106.

Mr. Brulatour to Mr. Frelinghuysen.

No. 510.] LEGATION OF THE UNITED STATES,
Paris, March 6, 1884. (Received March 22.)

SIR: I have the honor to send herewith copy and translation of a bill published in the Journal Officiel of this morning in relation to the introduction into France of all salted, smoked, or preserved pork of foreign origin.

This bill, which was introduced by the minister of commerce, Mr. Herisson, and the minister of finances, Mr. Tirard, allows the importation of salted pork in France, through certain ports which are to be designated hereafter, provided said pork is fully cured, which is to be established by an inspection made by experts appointed by the local authorities and paid for by the importers at the rate of 5 cents per box or barrel, or 3 cents per piece of meat when not imported in boxes or in barrels.

The bill is prefixed with a long explanation (*exposé des motifs*), in which the Government states that it was upon the advice in favor of free importation, given by both the Academy of Medicine and the committee of public hygiene, that the President had canceled the decree of prohibition, and that it was re-issued only to comply with the desire expressed by the chamber in its sitting of December 22, 1883. The present state of things, however, has given rise to many complaints and inconveniences. The French minister at Washington has made known that retaliatory measures applicable to French wines had been introduced in Congress, and French chambers of commerce have remonstrated against the continuance of a measure which might have such on unpleasant result. The Government, therefore, being desirous of showing that it had no intention of prohibiting altogether these meats, and feeling convinced that the chamber had no such intention, has come to the conclusion that an inspection, establishing that the meats imported in France are *fully cured* (that it is very carefully prepared, well preserved, and healthy) would be satisfactory to the chamber.

A bill providing for such inspection is therefore submitted, with the expression of the desire of the Government that it will be acted upon as soon as possible.

The *expose* winds up with the following paragraphs:

> The question thus put is one the solution of which ought not to be delayed. From the moment the public health is assured no reason any longer exists to deprive the population of an alimentary substance to which they had become used.
>
> It is equally important to give to the United States a proof of our firm intention to favor exchange between the two countries. Already, upon the announcement that acceptable dispositions would not fail to regulate the importation of salted meats, a communication tending to the reduction of duties established in the United States

upon works of art has been transmitted to Congress and recommended to their attention. There is no doubt also that the velleities of prohibition of our wines and liquors would fall through if the dispositions in question were put into execution.

We will add that the Government of the United States appears on their side disposed to take measures with a view to assure the good state of preparation of exported meats, and they announce their intention to establish at the ports of shipment a special service of inspection.

The Journal Officiel contains also—

First, a long report in relation to trichinosis, made to the Academy of Medicine by Dr. Proust in the name of a commission composed of Messrs. Bonley, Bronardel, Chatin, Colin d'Alfort, and La Boulbene, all men of high scientific standing, who agree in stating that, no case of trichinosis having been detected in France and in England, the importation of American salted pork can be authorized in France.

Second, a report on the same matter by Dr. Colon d'Alfort and the debate of the academy pursuant to these reports, which debate ended by the adoption, without opposition, of the conclusion recommended by Dr. Proust and his commission.

The matter was brought yesterday before a committee of the house which seems to favor the proposition of the Government. A paper states this morning that Mr. Paul Bert has also accepted the proposition, but expressed the opinion that the Government should inquire "as to the practicability of concluding a diplomatic convention with the United States for facilitating the inspection of salt meats in America before shipment." Mr. Bert believed that "American inspectors might act in accord with the French consuls in America, and after inspection give certificates as to the soundness of each cargo, which would obviate the necessity of renewed inspection on arrival in France."

I inclose herewith a copy of the Journal Officiel of this day, containing the French text of the bill, with its introduction, the two reports to the academy, and the debate thereon.

I have, etc.,

E. J. BRULATOUR.

[Translation.]

Project of law having for object the establishment of a service of inspection of pork of foreign origin salted, smoked, or preserved by whatsoever process, presented in the name of Mr. Jules Grevy, President of the French Republic, by Mr. Herrison, minister of commerce, and Mr. Girard, minister of finances.

DRAFT-LAW.

ARTICLE 1. Salted pork of foreign origin, corresponding to the kind known in commerce under the name of "*fully cured*," may be imported into France through the points of the frontier on land and sea which shall be determined by decree.

ART. 2. At the moment of entry into France the importers shall have a statement made that the imported meats correspond to the kind above mentioned, that it is healthy, in a perfect state of preservation, and that the salting is complete.

Special experts designated by the prefects shall be charged to make this verification, according to the mode of examination prescribed by the minister of commerce.

The expense of the service of inspection shall be at the cost of the importers.

There shall be charged for inspection duty 25 centimes per case or cask, and 15 centimes per separate piece.

For minced meat, small and large sausages, etc., there shall be charged 3 francs per 100 kilograms.

The product of these duties shall be paid into the hands of the receiver of customs, who shall give receipt for the same, and distribute it among the experts, according to the provisions which shall be determined by a decree.

The custom-house authorities shall only allow the meat to be removed upon the certificate ot the experts, declaring that the conditions required by the first paragraph of the present article are fulfilled.

ART. 3. Shall be punished with imprisonment from two to six months and with a fine of from 100 francs to 500 francs those who shall introduce or attempt to introduce into France, without submitting it to the examination prescribed by the present law, pork of foreign origin, which shall be, besides, seized and destroyed.

Article 463 of the penal code is applicable to cases statutable by the present article.

ART. 4. Is and shall remain repealed the decree of the 18th of February, 1881, which prohibits the importation in France of salted pork of American origin.

No. 107.

Mr. Morton to Mr. Bayard.

No. 774.] LEGATION OF THE UNITED STATES,
Paris, May 13, 1885. (Received May 26.)

SIR: Although I have not recently communicated with the Department in regard to the prohibition in France of American salted pork, I have not neglected the matter, and have availed myself of every occasion to press the settlement of this question.

As I informed you, a bill is now pending before the Chambers which cancels the prohibitive measures and substitutes a general system of inspection applicable to all countries.

As this law, although not as liberal as I could have desired it, satisfies the French importers of American meats, I have urged its passage, and expressed to both the minister of foreign affairs and the minister of commerce my earnest desire of being enabled to inform you, before my departure, that the French Government supported it, and would endeavor to secure its passage at an early date.

In reply to these representations, I have received a communication from Mr. de Freycinet, a copy and translation of which are herewith inclosed.

I have, etc.,

LEVI P. MORTON.

[Inclosure in No. 774.—Translation.]

M. de Freycinet's note to Mr. Morton.

PARIS, *May* 12, 1885.

SIR: You were good enough to express to me the interest that the Government of the United States attached to the prompt removal of the prohibition affecting, upon entry into France, salted meats of American orgin, which withdrawal is inscribed in a project of law pending before the French Chambers. At the same time you acquainted me with your desire to be able to take with you, at the termination of your mission, the certitude that this question was settled, at all events in principle.

As you are aware, it was after a formal vote of the Chamber that the preceding cabinet was obliged to withdraw the decree of November 27, 1883, authorizing the introduction into France of American salted meats. The project of law which was afterwards laid before Parliament has for object the opening anew of French territory to the importation of American salted pork; in establishing at the entry a service of inspection. The commission charged with the examination of this project has decided in the same sense. At the present time it is for Parliament to decide, and the Government can only endeavor to hasten a settlement of the question.

I have recommended in a special manner this matter to my colleague, the minister of commerce, whose duty it is to come to an understanding with the reporter of the commission in order that the project may be shortly discussed. A solution must, therefore, soon be arrived at, and I take pleasure, sir, in giving you this assurance, to reply to the desire that you were good enough to express to me.

Receive, etc.,

C. DE FREYCINET.

No. 108.

Mr. Bayard to Mr. McLane.

No. 9.] DEPARTMENT OF STATE,
Washington, June 1, 1885.

SIR: Mr. Morton's dispatch, No. 774, of the 13th ultimo, concerning the bill pending in the French Parliament to repeal the law which prohibits the importation of American pork and to substitute a general system of inspection applicable to all countries, has been read with interest. The Department hopes to hear soon that the obnoxious prohibition has been canceled, or at least replaced by practical measures which impose no discrimination against imports of this class from this country.

I am, etc., T. F. BAYARD.

No. 109.

Mr. McLane to Mr. Bayard.

No. 24.] LEGATION OF THE UNITED STATES,
Paris, June 16, 1885. (Received June 30.)

SIR: Your dispatch, No. 9, acknowledging receipt of Mr. Morton's No. 774, in which he expressed confidence that the French Chamber would soon vote a law repealing the decree prohibiting the importation of American pork, substituting therefor a general system of inspection applicable to all countries, has been received.

I regret to say that I can not share the confidence expressed by my predecessor. My conversations with the ministers of foreign affairs and other officials have led me to fear that the Chambers now in session will not pass the law in question. Should my impression in this connection prove well founded, I will press the matter upon the French Government after the general elections, which will take place probably in October, with a view to induce an immediate termination of the existing prohibition by decree of the President, rather than to await the slow and uncertain action of the Chambers.

I have, etc.,

ROBERT M. MCLANE.

No. 110.

Mr. McLane to Mr. Bayard.

No. 36.] LEGATION OF THE UNITED STATES,
Paris, July 3, 1885. (Received July 16.)

SIR: Referring to my dispatch, No. 24, under date of June 6, 1885, I have to report a conversation with the minister of commerce, Mr. Legrand, and the chairman, Mr. Lalande, of the committee of the Chamber of Deputies, to whom was referred the bill repealing the decree prohibiting the importation of American pork.

The minister of commerce, although acknowledging that no exception on the score of health could be taken to this importation, thought that the short time left for legislation rendered the passage of the bill very

doubtful. He admitted, further, that the price of American pork being lower than that of either England or Germany, excited the fear of competition in the minds of the agricultural population in France, under whose influence the duties upon all meats have been greatly increased.

Mr. Lalande concurred generally in the views expressed by Mr. Legrand, but he promised to make an earnest effort to call up the bill for consideration by the Chamber of Deputies, and he promised, further, to see the minister of foreign affairs and the minister of commerce at an early day with the view of securing the support of the Government. This promise he has fully redeemed, and at the council of ministers held yesterday it was understood that the minister of commerce would facilitate to the full extent of his ability the efforts of Mr. Lalande to pass the bill.

I can not disguise from myself, however, that there is very great opposition on the part of the protectionists in the chamber to any relaxation of the existing prohibition, although it is not to be supposed that such an invidious distinction as now exists against the importation of American pork can be long maintained.

I have, etc.,

ROBERT M. MCLANE.

No. 111.

Mr. Bayard to Mr. McLane.

No. 20.] DEPARTMENT OF STATE,
Washington, July 9, 1885.

SIR: With reference to your dispatch, No. 24, of the 16th ultimo, in which you state that you do not share the confidence expressed by your predecessor in his No. 770, as to the probability of favorable action by the French Government in the matter of repealing the decree prohibiting the importation of American pork, the Department has learned with regret that Mr. Morton's predictions are not likely to be borne out by the events. You will, of course, continue to bear this important subject in view.

I am, etc., T. F. BAYARD.

No. 112.

Mr. McLane to Mr. Bayard.

No. 53.] LEGATION OF THE UNITED STATES,
Paris, August 7, 1885. (Received August 21.)

SIR: Referring to my dispatches Nos. 24 and 36, I have to advise you that the chambers yesterday closed their session without, as I anticipated, considering the bill providing for the inspection of foreign meats and for the admission of American salted pork. This failure is accounted for by the pressure of other questions. For myself, however, I have to confirm the opinion already expressed to you that the influence of the French protective interests debarred the Government from any sincere effort to accomplish the desired legislation.

After the elections are held, which now engross the attention of all parties, I shall bring this subject to the attention of the Government,

with the view of securing a repeal of the prohibitive decree, urging upon it its paramount obligation to issue such a decree whenever the fact is apparent that no sanitary consideration calls for its continuance, unless, indeed, the result of these elections should render it expedient to defer the consideration of this question.

I have, etc.,

ROBERT M. MCLANE.

No. 113.

Mr. McLane to Mr. Bayard.

[Extract.]

No. 58.] LEGATION OF THE UNITED STATES,
Paris, August 13, 1885. (Received August 26.)

SIR: Referring to my dispatches Nos. 24, 36, and 53, I had a full conversation yesterday with Mr. de Freycinet in reference to the failure of the chambers to act upon the bill providing for the inspection of foreign meats and for admission of American meats after such inspection.

I explained to Mr. de Freycinet the view I took of this question, considering the original prohibition as due to sanitary considerations exclusively, and, therefore, when these sanitary considerations no longer existed, it was manifestly the duty of the Government to repeal the decree, leaving American meats to be imported subject only to the same duties and inspection as were provided by existing laws for all foreign meats.

Mr. de Freycinet did not contest the soundness and equity of this view of the subject, but he referred to the fact that when the French Government proposed to act upon this view the chambers interposed objections, and it was then generally conceded that the prohibitory decree could not be repealed until a more satisfactory provision could be enacted for the inspection of imported meats. The present minister of commerce, with whom I have had full conference, entertains this view of the subject, and would not now consent to sign a decree repealing the prohibition without the enactment of such improved inspection.

Mr. de Freycinet observed that these views of the minister of commerce had been generally accepted by his colleagues in the Government, and that he had himself entertained the hope that the inspection law would have been passed before the adjournment of the chambers.

The minister of commerce is himself an earnest protectionist. He represents in the chambers a constituency in the north of France, where the agitation against the importation of foreign meats is very great and active.

Mr. Ponyer Quertier, a former minister of finance, and a very influential statesman, is at this time engaged in a series of conferences or discussions in this region, urging upon the agricultural population the expediency and necessity of prohibiting the importation of all foreign meats, especially of American meats, which even at the present rate of duty would undersell all domestic and all other foreign meats.

These considerations have great weight, I think, with the minister of commerce, and indispose him to make concessions in the premises. Therefore it is that, while admitting to me that he would make no invidious distinction against the importation of American meats, yet he would not repeal the existing prohibition until he has the necessary

legal authority to insure the public health when such importation is permitted from all countries on equal terms.

* * * * * * *

As stated in my No. 53, of the 7th instant, I will, after the elections are held, consider the expediency of renewing the discussion of this question, but it is not likely it can be renewed with any advantage before the new chambers have met, and have fully completed their organization, which can not be before the end of the month of October.

I have, etc.,

ROBERT M. MCLANE.

No. 114.

Mr. Bayard to Mr. McLane.

No. 35.] DEPARTMENT OF STATE,
Washington, August 31, 1885.

SIR: Your dispatch No. 58, of the 13th instant, giving an account of your interviews with Mr. de Freycinet and the French minister of commerce, concerning the decree prohibiting the importation of American pork, has been read with regret, in view of the prejudicial effect upon public opinion in this country of any announced or evident policy on the part of foreign countries, and especially a friendly power like France, to maintain a prohibition not warrantable by the only considerations to which they appeal for justification.

I am, etc.,

T. F. BAYARD.

No. 115.

Mr. McLane to Mr. Bayard.

No. 73.] LEGATION OF THE UNITED STATES,
Paris, September 25, 1885. (Received October 9.)

SIR: I have the honor to acknowledge the receipt of your dispatch No. 35, under date of August 31, 1885, in reply to my No. 58, of August 13.

Although I have not modified the opinion expressed in that dispatch as to the intention of the French Government, I have thought it judicious, in pursuance of the intimation given in my No. 53, of August 7, to submit to the consideration of this Government a résumé of the entire discussion of this question since the original decree of prohibition, concluding with the renewed statement of my own opinion that the failure of the Chambers to act upon the bill providing for the inspection of foreign meats, and for the admission of American meats after such inspection, imposed upon the Executive of this Government the duty of repealing the original prohibitory decree, no longer warrantable, as you well express it, by the only considerations to which it appeals for justification.

I handed this résumé to the minister of foreign affairs in person two days ago, advising him that you regretted the failure of this Government to remove the invidious distinction against the United States, because of its prejudicial effect upon public opinion there. and I added a

very strong expression of my own conviction that this failure on their part would not only alienate to some extent the friendly feeling now existing between the two countries, but would excite the disposition to retaliatory legislation against the importation of French products.

Mr. de Freycinet did not concede the point that the adjournment of the Chambers relieved the Executive from its obligation to defer action until the passage of a law providing a satisfactory system of inspection, as he insisted that the legislature, as a body, never ceased to exist, and could in no sense be said to have expired, since the pending legislation could be continued by the new Chamber from the point at which it was left by the one which had adjourned in August. Nevertheless, upon all the other points involved he seemed disposed to concede the reasonableness of our contention.

I determined to present this résumé of the question at this time because the new Chamber, though meeting in November, will not engage itself in matters of current legislation until January, when the powers of its members shall have been verified and the new President of the Republic shall have been elected.

I thought it desirable in this manner to exhaust the discussion, as far as the present Government of this country was concerned, so that the President of the United States might be able, in December, in his communication to Congress, to report, if he deemed it expedient, the actual relation of the two Governments to this question.

* * * * * * *

I have had some further conversation with Mr. de Freycinet this morning, and while he declines to give any information as to the final determination of the Government, he promises to bring the matter to the special attention of the minister of commerce, and make it a subject of special consideration by the council of ministers; and in making this statement he dwelt upon the embarrassment he felt at taking any decision in the premises which conflicted with the deference due from the Executive to the legislature, having in view the request of the latter to await the passage of a law for the efficient inspection of all imported meats.

Herewith inclosed I send a copy of my note to Mr. de Freycinet, presenting a résumé of this question, for which I am indebted to Mr. Vignaud, who was present with my predecessors in all their conferences with the ministers of foreign affairs of this Government, and who analyzed with care the debates both in the Chamber and in the Senate upon the bill for the efficient inspection of all imported meats.

I have, etc.,

ROBERT M. MCLANE.

[Inclosure in No. 73.]

Mr. McLane to Mr. De Freycinet.

LEGATION OF THE UNITED STATES,
Paris, September 23, 1885.

SIR: On the 18th of February, 1881, the French Government, acting upon the alleged discovery of trichinæ in America, prohibited all pork imported from the United States. This step on the part of France was followed by several other states of Europe, which based their action upon the same motive. A great American industry, giving a prosperous export trade, was thus denounced to this world as a source of danger to public health. Considering that in the United States, in Great Britain, and in Belgium there were millions consuming American pork without any danger to life or to health, my

Government, through General Noyes, who was then United States minister at Paris, protested against the prohibition, and urged a reconsideration of the subject. (General Noyes to M. Barthelemy St Hilaire, February 22, 1881.)

In the mean time my Government, although satisfied that the action of France was unwise and injurious, proceeded to investigate the matter. It did so thoroughly, and the result appeared perfectly satisfactory. Not only were the alleged ravages of trichinæ disproved, but it was shown that unusual precautions had been taken to insure that none but the healthiest animals should be slaughtered for packing, and that, although trichinæ had been detected in sundry cases, it was very far from being as widespread as in other countries, and that the American process of packing and curing secured to the consumers of American pork a much greater immunity from trichinosis than that enjoyed by consumers of European pork.

The facts thus elicited constrained my Government to represent to yours that the decree prohibiting the importation of pork from the United States was unwarranted, and that the United States Government deemed itself rightfully entitled to a prompt and effectual modification of the prohibitory action of France. (General Noyes to M. B. St. Hilaire, June 22, 1881.)

In March, 1882, the Chamber of Deputies passed a bill repealing the prohibitory decree and providing for a liberal system of inspection.

At this time it was well established in France that trichinæ which may be found in American pork is absolutely inoffensive, the salt killing the animalculæ, or reducing it to such a state that the slightest cooking destroyed it. French scientists of the highest grade and reputation admitted the fact; the minister of commerce, Mr. Tirard, was reconciled to the repeal of the decree of prohibition, and the Academy of Medicine, as well as the board of health, so advised the Government.

The Senate nevertheless rejected the bill, but its action was well understood to be based not upon any doubt as to the innocuousness of American pork, but simply upon the ground that the Government could reverse the decree of prohibition by an executive decree without any legislation to that effect.

In March, 1883, Mr. Morton re-opened the subject with Mr. Challemel Lacour, who was then minister of foreign affairs. He reminded him that the decree prohibiting American salted meats had now been in force for more than two years, while similar products from other countries were freely admitted; that there could be no valid reason why this exceptional measure should be applicable to the United States. He expressed the hope that the French Government, after considering all the evidence before it, would place the United States upon the same footing as all other friendly nations by revoking the obnoxious decree.

This earnest request not being noticed by Mr. Challemel Lacour, on the 20th of October, 1883, it was renewed in emphatic terms. On November 15, 1883, Mr. Morton received from Mr. Jules Ferry the positive assurance that the French Government was animated with a strong desire to give this question a most liberal solution and at the earliest possible moment.

Two weeks after November 27, 1883, a decree was issued revoking the prohibitory one of February, 1881, no condition being attached to the revocation. The minister of commerce, in a circular to the prefects, simply stated that the committee of public hygiene had ascertained both scientifically and experimentally that pork loses all danger of infection by trichinosis if it is salted with care, and that the only thing that the authorities had to do was to be sure that the imported pork put on the market was fully cured.

This matured action was not well received in the Chamber of Deputies, and on the 22d of December, 1883, after a long debate, it passed a resolution expressing the wish that the admission of American pork be delayed until the adoption of a bill providing for a system of inspection of all foreign meats. In consequence of this resolution a new decree, December 28, suspended the application of the one canceling the original measure of prohibition.

In June, 1884, the law referred to was introduced in the Chamber, but many months having passed without its being called up, Mr. Morton again pressed the matter, and both your excellency and Mr. Legrand gave him the assurance that it would shortly be discussed, and that a solution would soon be arrived at. Under date of May 12 your excellency confirmed in writing these assurances to Mr. Morton, all of which he duly communicated to his Government. The Chamber, however, adjourned without any change having taken place in the measures so unwarrantably adopted four years ago.

I respectfully, but earnestly, submit that this discrimination against an important branch of the trade of a friendly nation is, under the circumstances, absolutely unjustifiable, and that it can not be maintained without alienating in some degree the good understanding which has so long existed between France and the United States.

I do not in the least contest the right of the French Government to close its ports to an unwholesome product, or to shut its markets to all foreign products of a certain kind; nor do I deny its legitimate right to levy upon such products any duty it

may think proper; but the case here is quite different. It is no longer contended that American pork is unhealthy, yet the existing prohibition applies only to it.

I take the liberty therefore of urging the propriety of settling this long-pending difficulty by the same mode which created it—a decree of the executive rescinding the one establishing the prohibition.

I can understand well that your Government hesitated to take such a step in presence of a resolution of the Chamber requesting delay until the passage of a proposed bill applicable to the case, but the Chamber which made this request failed to pass this bill, and as its powers have expired it can never do so.

I avail, etc.,

ROBERT M. MCLANE.

No. 116.

Mr. Bayard to Mr. McLane.

No. 48.] DEPARTMENT OF STATE,
Washington, October 17, 1885.

SIR: Your dispatch, No. 73, of the 28th ultimo, reporting your action in making application to the foreign office for an order canceling the prohibition of the importation of American pork into France, has been received and read with interest and satisfaction.

Your presentation of the subject as contained in your note of the 23d of September to Mr. de Freycinet is approved. All the points appear to be well taken, except possibly the suggestion that as the legislature which adopted the resolution requesting the Executive to delay its repeal until a law providing inspection should pass had adjourned without enacting such a law the force of the law was exhausted.

If, as Mr. de Freycinet states, the life of the Chamber of Deputies is, like that of our Senate, continuous, and a pending measure can be taken up in any session at the point where it rested on previous adjournment, this argument may lose some of its force. As to this we can not undertake to say how far the French legislative rule differs from our own, but without founding argument on the technical strength of this point (which would undoubtedly apply in the case of the Congress of the United States) even stronger equitable considerations present themselves.

A resolution of this character is advisory merely; it has not the continuing force of legislation. A reasonable limit is to be assigned to the duration of its effects, and they should not outlive the legislature which so distinctly announced its intention to provide an alternative remedy and failed to do so.

The important interests of two peoples should not be indefinitely denied consideration because of inaction in such a case, and it may be justly contended that the Executive is fully warranted in resuming all the control of the matter it had before the conditional request of the legislature was made, in which case the power of the Executive is ample. This view may be presented should an occasion arise for a further discussion of the subject with the foreign office.

I am, etc.,

T. F. BAYARD.

No. 117.

Mr. McLane to Mr. Bayard.

No. 108.] LEGATION OF THE UNITED STATES,
Paris, November 20, 1885. (Received December 15.)

SIR: Soon after the the receipt of your dispatch, No. 48, under date October 17, 1885, I had some conversation with Mr. de Freycinet, in which I presented in substance your observations upon my No. 73, of the 25th of September, and my note to Mr. de Freycinet of the 23d of the same month.

This view I had already presented to him as an alternative, when I contended that the adjournment and dissolution of the old Chamber relieved the Executive from all obligation or deference to its opinion as embodied in the resolution it had adopted in opposition to the decree repealing the original decree of prohibition against American salted meat.

He, on his part, persisted in his original opinion that the Executive was not free to take action, but, in reply to the considerations of equity stated in your dispatch and presented by me in conversation, he could only urge that a more perfect system of inspection was necessary before American meat could be imported. Such at least, he said, in reply to my observations that no such necessity existed, was the opinion of many members of the legislature and a large portion of the French people, and he again disclaimed for the Government any purpose or intention of excluding American meat for any other reason than one connected with the sanitary elements of the question.

He said he had presented the subject to the council of ministers and had embodied the substance of my note to him of the 23d of September in a communication he had addressed to the minister of commerce. He had not yet received a reply from that minister, and he did not now expect to receive one, as he had tendered his resignation to the President in consequence of his defeat as a candidate for the Chamber of Deputies at the recent elections.

I naturally expressed regret at this delay in action, whatever might be the cause thereof, reminding Mr. de Freycinet that our Congress would meet on the first Monday in December, and it would be expected of me by that time to give my Government information as to the view the French Government had taken of my note of the 23d of September.

He said he would bring the subject to the attention of the new minister of commerce as soon as he was appointed, and he hoped to be in condition to communicate with me before the middle of November.

Not having heard from him on the 16th of November, I addressed him a note. I have received this morning his reply. Copies and translations of these two notes are here inclosed.

Mr. de Freycinet's note presents no new view of the subject, though it dwells upon the sanitary considerations upon which the French Government rely for justification as regards the original decree of prohibition.

I have nothing myself to add to the views I have heretofore communicated to you on this subject, but I feel it my duty to again note the great influence which is exerted upon both the legislature and the executive by those who represent the agricultural interests of France to raise to a prohibitory point the duty upon foreign meats and cereals, and to repeat my opinion that it is to this influence, rather than to the sanitary considerations involved, that American salted meats are still ex-

cluded from France, from which it necessarily results that much time will be spent in the deliberations of the legislature before final action is taken on this question. Meanwhile the presidents of the chambers of commerce of Bordeaux, Marseilles, and Havre are protesting against the decree of prohibition with energy and effect.

I have, etc.,

ROBERT M. MCLANE.

[Inclosure 1 in No. 108.]

Mr. McLane to Mr. de Freycinet.

LEGATION OF THE UNITED STATES,
Paris, November 16, 1885.

Mr. MINISTER: In the conversation which we had together a few days ago in regard to the prohibition of American salted meats, your excellency was kind enough to tell me that you had submitted the question to the council of ministers, as well as to your honorable colleague, the minister of commerce, who had not felt himself authorized to take any decision at the moment he was going to leave the ministry.

Pursuant to the observations which I have submitted to your excellency, I take the liberty of suggesting that in view of the new assembling of the Congress of the United States, it would be an advantage if I could be informed as soon as possible about the decision which will be come to, whether it may be decided, as I hope, to do away with the prohibition by a decree, or whether it may be necessary to await still longer legislative action. In both cases, in fact, it is important that my Government may be informed in advance of the intentions of yours. I am persuaded that your excellency will appreciate the manner in which I view the subject.

I seize this apportunity to thank your excellency for the disposition you have shown of terminating in a fair manner this little misunderstanding. I hope we shall not lose your kind services in this good cause.

Please accept, etc.,

ROBERT M. MCLANE.

[Inclosure 2 in No. 108.—Translation.]

Mr. de Freycinet to Mr. McLane.

PARIS, *November* 28, 1885.

SIR.: By a letter dated the 16th of this month you have been good enough to express to me your desire of being put in a position to inform your Government as soon as possible of the decision which shall be taken by the Government of the Republic towards regulating, either by a decree or by a law, the rules of entrance into France of American salted meats.

As you know, sir, the decree of the 27th November, 1883, which authorized its importations into France of American salted meats, had to be withdrawn by the preceding cabinet in consequence of a formal vote of the Chamber, which delayed the admission of this product until the adoption of a law establishing a service of inspection over foreign meats. The Government of the Republic was thus placed under the obligation of refraining from regulating the question by decree; but in order to hasten its solution as much as in its power, it hastened to lay before Parliament a bill relating to the service of inspection, the establishment of which had been decided upon in principle by the chamber. This bill was referred to a committee, which modified it after examination, and then made it the subject of a report favorable to the adoption of the provisions thus remodeled.

Such was the state of the question when the chamber arrived at the limit of the powers without having been able to bring up for deliberation the propositions of its committee. My colleague, the minister of commerce, has had to consider since then whether it would be proper to lay before the new chamber the bill which had been submitted to its predecessor, or that one which the special committee had substituted for it, and the result of this examination is that it would be preferable to propose to Parliament a more complete combination of provisions on which the consulting committee of public health of France has been now invited to deliberate. There would be reason to fear, in fact, that the bills formerly prepared would not meet with the approval of the Chambers in view of the objections which they raised, and it is desirable that the bill which shall be presented may be drawn up in such a manner as to pre-

vent, as much as possible, every difficulty, in order that the vote may be obtained with as little delay as possible. The new studies prescribed by Mr. Dautresme have no other aim.

I will be obliged to you, sir, if you will kindly communicate these explanations to the Government of the Union. I beg you to give it at the same time the assurance that the Government of the Republic has decided to proceed immediately to the elaboration of the bill in question, and to demand of the chamber that it shall be brought up for debate as promptly as possible.

Accept, etc.,

C. DE FREYCINET.

No. 117½.

Mr. Dufais to Mr. Porter.

REPORT OF CONSUL DUFAIS ON PROHIBITION OF PORK.

I inclose a translation of some editorial remarks of Mr. Lécureur in the journal Le Havre, and of a notice of an interview of the two Havre deputies, Messrs. Felix Faure and Julius Siegfried (the latter being also mayor of Havre) and Mr. Lalande, deputy from Bordeaux, showing that they had a very favorable hearing.

It seems, therefore, likely that a solution of this vexed question may soon be expected.

F. F. DUFAIS,
Consul.

UNITED STATES CONSULATE,
Havre, December 23, 1885.

American retaliation.

[From Le Havre, November 17, 1885.]

PARIS, *November* 10, 1885.

To the MINISTER:

The decree of the 28th of December, 1883, prohibiting salted meats of American origin, has weighed heavily on our export trade since that time, and the imposition of retaliatory measures seems to-day imminent.

These measures would seem up to a certain point justifiable, inasmuch as it has been acknowledged that the question of hygiene ought not to be discarded as of no value.

We have been informed in a most distinct manner by our correspondents that the Government of the United States wishes to obtain the abolition of this prohibition before the meeting of Congress, the 1st of December next, and that if at that time the question has not been determined, Congress will take such measures of retaliation against our wines, brandies, and silks that all exportation of those articles will become impossible.

Already the fear alone of new duties has affected in a sensible manner our trade with the United States.

Our duty of representing the commerce of exportation, so profoundly interested in this matter, is to insist with the greatest energy that the Government, which ought to defend the general interests of the country, shall take this affair to heart and ought not to allow such a course of trade to stop, the loss of which would lead to the ruin of merchants, would cause misery of many families, and the despair of 200,000 silk-workers, who are already driven to extremity.

The amount of importations of salted meats was about thirty millions, while the exportations of the threatened articles amounted to two hundred millions. The placing together of these figures shows of how much interest the importation of these things from the United States is.

It is now time to consider this matter, and we can not doubt that our Government will recognize the exceptional gravity of this subject.

We are assured that a copy of this document has been sent to the chambers of commerce and is at the moment under consideration. A graver subject has never been submitted to their deliberations. Indeed, on account of these threatened retaliations by the United States, the little question of salt pork becomes almost a question of life and death to the industries and commerce of France.

Is it necessary at the price of seeing all French products repelled by the American Union to obstinately prohibit the entrance of salt meats at our sea-ports, which nevertheless enter by fraud across our land frontier? Is that good government? The question of health can only be thought a game, since in reality the Tirard decree does not prevent in any way the American meats from being delivered to the consumers as they were before.

It is vain to set up in opposition the idea of protection to national production, since French salt meats have not ceased to meet in our markets the competition of American pork sent from Antwerp and Hamburg, after a simple change of marks. It would, indeed, be more than simple-minded to believe that the thirty millions representing the value of American meats introduced before through the sea-ports are put up by the French salters. The truth is that they have had only a very small part of the cake, and as to the producers they have still less, the price of live animals being less than it was when the foreign importation was more important. Are we going to sacrifice our two hundred millions of exports for hygienic or financial advantages of no consequence, or which in any event are so debatable?

One can scarcely believe that such a false step will be taken, particularly when the industry and commerce of the country are in the last throes. Would not Parliament, instead of abandoning itself to Byzantine struggles, which only aggravate a situation already deplorable, do better by occupying itself with questions of business on the intelligent solution of which depends our salvation?

Let us still hope that good sense and patriotism will finally win.

A. LÉCUREUR.

[Translation of an article in Le Havre of November 21, 1885.]

Mr. Felix Faure, Julius Siegfried (deputies from Havre), and Mr. Lalande, of Bordeaux, were received yesterday by Mr. de Freycinet, the minister of foreign affairs, and by Mr. Dautresme, minister of commerce, and conferred with them on the question of American salted pork.

These deputies represented to the members of the Government the particularly grave consequences of the prohibition. They insisted upon the point that the United States had already adopted retaliation by raising the tariff on French produce, and that they were about taking new measures in the same direction, especially on silk manufactures, gloves, Paris articles, etc.

Beside this the falling off in freights produces a very positive decline in the situation of maritime industry and in the commerce of our ports.

In fact, they insisted upon the point that it was absolutely proven that American salt pork offered no danger whatever to the consumer, because it is continually imported into the other European countries, and even into France itself, where it finds its way through the land frontier after a simple change of packing. They requested the minister to take the projects of law up again, which the Government had during the last session brought before the legislature and which on the favorable report of Mr. Rodat was already at that time expected to be discussed.

Mr. de Freycinet expressed himself as favoring the withdrawal of the prohibitory measures, and Mr. Dautresme asked for a delay of a few days to study the question.

In continuation of my dispatch No. 36, of December 23 last, I have the honor to report that the two Havre deputies, Messrs. Felix Faure and Jules Siegfried, had a consultation on the 25th of January with Mr. Lockroy, the new minister of "commerce and industry."

Calling yesterday upon Mr. de Guerhoënt, who had assisted them, he informed me privately that the report of the hygienic commission, to whom the question in its sanitary aspect has been submitted by the minister, his predecessor having promised but omitted to do so, has been favorable to the annulment of the prohibition, and that probably in a week or two the Government would bring in a bill in the Chamber of Deputies to that effect.

This bill in the course of parliamentary procedure will then go before a committee, each one of the ten or twelve bureaus of the Chamber choosing a constituent member of it, whose duty it then will be to examine and report upon it. The process is a slow one, and it is quite doubtful what the protective temper of the Deputies will do. At any rate, it is Mr. de Guerhoënt's opinion that the fate of such a bill will not be decided for some weeks, and may be not for some months; he appears to have serious misgivings about the result, but he has not lost courage, and is energetically following up the slight advantage gained so far. At all events at best the re-admission of Americon hog products at an enhanced import duty is agitated, and he would consider the greatest inducement for a favorable solution of the question on the part of the French Chamber to be a lowering of the duty on French produce on the part of the American Congress.

F. F. DUFAIS,
Consul.

UNITED STATES CONSULATE,
Havre, France, February 4, 1886.

No. 118.

Mr. Dufais to Mr. Porter.

No. 73.] UNITED STATES CONSULATE,
Havre, July 21, 1886. (Received August 2.)

SIR: Notwithstanding many abortive attempts on the part of commercial and labor organizations to induce the French minister of commerce to repeal the edict against the importation of American pork, the chambers of commerce of Bordeaux and Havre made a new effort in that direction.

Several other chambers were represented at a late meeting at Paris, at which M. Seigneuret of Bordeaux read a dispatch from the United States announcing that the Senate had passed a bill authorizing the President to prohibit, by proclamation, the importations of goods or produce from European countries which made vexatious discriminations against American produce.

The delegates, after discussing the question, called upon M. Lockroy, the minister of commerce. Among them M. Brunet, the vice-president of the Bordeaux Chamber of Commerce, and M. de Guerhoënt, the delegate from Havre, used every argument to induce him to withdraw the decree in the same manner that it had been issued, viz, by proclamation and without consulting the Chambers, but all to no purpose.

M. Lockroy acknowledged that not only a great mistake, but also an injustice had been committed, and that he was very much in favor of the repeal of the measure, but the feeling in the Chambers was so decidedly protectionist that not even the enhancement of the duties would satisfy them. They wanted absolute prohibition.

This being so, it was useless to propose the change which he himself had advocated; any measure tending to re-admit pork would be voted down, and the protectionist tendency of the Chambers was such that not only provisions, but every other agricultural product, would be protected by higher import duties.

It is so evident that nothing will be done on the part of the present Government to do away the discrimination against the commerce of a

friendly nation that all hopes of a favorable change have been abandoned by those opposed to the prohibition. The millions of ill-paid and scantily-fed laboring men of France will continue to pay tribute to the French hog-raising farmer.

F. F. DUFAIS,
Consul.

No. 119.

Mr. McLane to Mr. Bayard.

[Extract.]

No. 403.] LEGATION OF THE UNITED STATES,
Paris, May 12, 1887. (Received May 27.)

SIR: In a conversation with Mr. Flourens yesterday at the foreign office, I touched upon the relation of France with the different European countries in reference to the exhibition to be held in 1889, and I expressed my regret that the French Government had taken so little interest in the legislation proposed for the inspection of foreign salted meats. The repeal of the prohibitory decree excluding American meat having been made dependent upon the enactment of such a law, I felt at liberty to recur to the subject whenever circumstances seemed in my judgment to render such reference appropriate. In recalling his attention to this subject I said that while full liberty was conceded to France to tax American meat at as high a rate as the meat of any other country, its exclusion could not fail to create a very unpleasant feeling when the sanitarial consideration which originally caused its exclusion no longer existed. He listened with great attention and interest, recognizing, as M. de Freycinet always did, that the real obstacle was in the strong feeling which dominated in the Chamber of Deputies in favor of protecting all agricultural products and which always found a representative in the cabinet. He said his colleague, M. Develle, at the present time represented this opinion very strongly, and though M. Lockroy, the actual minister of commerce, might be favorable to an immediate repeal of the prohibitory decree, he would encounter opposition from several of his colleagues. Mr. Flourens requested me to confer with Mr. Lockroy at my earliest convenience, and it was agreed we would renew our conversation after I had conferred with Mr. Lockroy.

I have, etc.,

ROBERT M. MCLANE.

No. 120.

Mr. Mason to Mr. Rives.

No. 195.] UNITED STATES CONSULATE,
Marseilles, February 4, 1888. (Received February 20.)

SIR: During the month of June last there appeared among the swine in the vicinity of Marseilles a new and mysterious disease which has since assumed the proportions of a general and serious epidemic. Its symptoms were coughing, diarrhœa, loss of appetite and strength, and in some cases the appearance of red blotches on the skin.

A large majority of the hogs attacked died within a few days, and the farmers and swine growers of this region, unable to resist the spread of the epidemic, attempted to escape it by selling off their hogs. On the 21st of September a large fair was held in Aubagne, a small city about 10 miles from Marseilles, at which several thousand infected hogs were sold, nearly all of which have since died and spread the epidemic throughout this department and as far north and westward as Lyons and Beziers. It is estimated that more than 30,000 swine died of the malady in this department during the last four months of 1887. The entry and sale in Marseilles of hogs and freshly killed pork from the surrounding country was prohibited in December by municipal decree, and until some effective remedy for the disease can be found hog-raising is practically at an end in this part of France.

When the epidemic became serious, two experts, M. K. Conil and Chantemesse, from the Society of Biology at Paris, were sent by the minister of agriculture to make a thorough study and report their conclusions to the Government. Their observations are not yet concluded, but at a recent meeting of the municipal sanitary committee they presented an informal report of progress, from which, as well as from personal inquiry and observation, the following facts have been derived:

They pronounce the disease "contagious pneumonia," and they believe it to be identical with the *Schweine Seuche*, described by Loeffler and Schütz, and the "swine plague" which has been investigated by Professor Salmon in the United States. At first they were inclined to believe it to be what has been hitherto known in France as the *rouget*, but certain indications disprove this theory, and the disease is now recognized as a new and highly contagious malady, the origin of which no one has satisfactorily explained. There is no importation of swine to Marseilles from any country where this disease or anything like it has been previously known, and certainly no pork products, except lard, are admitted to France from the United States. Like the endemic cholera of the Mediterranean ports, it seems to have been of local origin.

Thus far, as already indicated, no effective remedy for swine affected by this disease has been announced. It was soon noticed, however, that such animals as had been slightly attacked and recovered were thereby rendered impervious to further contagion. This naturally suggested the idea of vaccination with attenuated cultures of the virus as a preventive, and experiments have been made in this direction so far as to show that rabbits, pigeons, and guinea-pigs die almost without exception, when inoculated with the original virus at its full strength, but survive in most cases when the material used is a culture attenuated by successive cultivations in gelatine or juices of meat.

The malady is extremely contagious, both by inhalation and absorption. If inhaled, the ulcers are found most numerous and malignant in the lungs; if the contagion be swallowed with food or drink, they appear in the stomach and intestines. A single diseased hog, unless promptly removed when the first symptoms appear, is sufficient to quickly contaminate not only an entire herd, but the premises in which they are kept.

It is abundantly demonstrated that the germ of infection is a microbe or baccillus which generates rapidly and in myriads among the saliva, the fecal matter, and other secretions of diseased animals. Experiments have shown that the microbe resists stubbornly several leading disinfectants, among which are sulphate of iron, chloride of zinc, lime water, corrosive sublimate, and spirits of turpentine, and succumbs but

slowly to sulphate of copper, oxalic acid, and pure alcohol. The only two chemicals which have been found to destroy it promptly and certainly are hydrochloric and phenic acids, and the most effective wash for contaminated styes and hog-yards is a solution of 4 parts phenic acid and 2 parts hydrochloric acid in 100 parts of water.

Desiccation seems to have but little effect upon this stubborn organism. A drop of virus from a diseased animal has been evaporated and the residuum kept absolutely dry for fifteen days, and then, upon being dissolved in meat juice, has rapidly developed the microbe of contagious pneumonia.

The one other effective agency of destructton is heat. The germ is effectually destroyed by a temperature of 70° centigrade, and it thus happens that the meat of a hog which had been affected by this disease is not necessarily deleterious, provided it has been thoroughly cooked, as all pork products should invariably be, before being eaten.

It is impossible to predict to what limits the present epidemic in Southern France may extend before it can be checked. Thus far the only remedy that has been even suggested is vaccination, and this has reached only the experimental stage. The vaccine has undoubtedly been found and applied s ccessfully to several species of small animals, such as guinea-pigs and rabbits, but the conditions under which it can be safely applied to swine are yet to be demonstrated, since it appears that hogs, when even slightly contaminated by contact with the disease, may live indefinitely, but can not be fattened. Even a small degree of infection is sufficient to destroy their appetite and the power to assimilate food beyond the barest actual requirements of existence.

Hitherto the principal effort has been to restrict the spread of the epidemic. Traffic in hogs has practically ceased in this part of France, and there seems to be but one method by which the farmers and pork raisers whose premises have been infected can re-establish their business. This will be to slaughter or banish all the swine now in their yards and pens, then cleanse, air, and disinfect the premises thoroughly, and re-establish their stock with clean, healthy hogs, imported from localities sufficiently remote to warrant their freedom from previous contamination.

FRANK H. MASON,
Consul.

No. 121.

Mr. McLane to Mr. Bayard.

[Extract.]

No. 545.] LEGATION OF THE UNITED STATES,
Paris, February 9, 1888. (Received February 20.)

SIR: I have the honor to acknowledge the receipt of your instruction, No. 289, concerning the decree of the French Government prohibiting the importation of American pork into France, and I have read carefully the dispatch from Mr. Dufais, our consul at Havre, relative to alleged renewed efforts at Havre to bring about a repeal of the decree in question.

I can not hear of any effort that has been made in that direction beyond the newspaper article, translation of which was communicated to

you by Mr. Dufais, but which has not as yet attracted the attention of the Government here.

I addressed a note, however, yesterday to Mr.Flourens, advising him that I had heard from you, under date of January 23, recalling my attention to this long-pending question, and reminding me that it has lost none of its interest, and that it was your desire that no effort should be omitted to induce a favorable change in the apparently needless and, in some aspects, unfriendly policy pursued by France in relation to one of the greatest export staples of the United States. I reminded him that under date of September 23, 1885, in a note to the foreign office, I had reviewed very fully the case, which had been even then fully considered by my predecessor. I reminded him further that I had never ceased to urge upon the French Government a repeal of the prohibitory decree, and more particularly that I had recently left with him verbal notes summing up its history and requesting that it be disposed of in a liberal spirit.

In this connection it is of some interest to advise you that when I presented the President's letter to President Carnot upon his election as President of the French Republic I embraced the opportunity to call his attention to this question, and noting to him the fact that I had pressed the matter upon Mr. Grevy's attention in 1885, and that I had reason to believe that the cabinet over which Mr. de Freycinet presided was well disposed to submit, for the President's consideration, a decree repealing the prohibition, but refrained from doing so in the face of the very strenuous opposition of the protectionists in the Chamber of Deputies, who were chiefly represented at that time by Mr. Dautresme, now minister of commerce. The President expressed his desire to satisfy the complaint I addressed to him upon the exclusive discrimination against the United States contained in this prohibitory decree. The President knew that I had recently conferred with Mr. Flourens on the subject, and also with the late prime minister, Mr. Rouvier, before his resignation, and that I had frankly communicated to both my own opinion that, notwithstanding the good feeling of my Government to the French Republic, whenever this question should become the subject of debate in Congress it would excite a very bad feeling, and would be accepted either as unfriendly to the United States or as the evidence of a very illiberal and selfish policy, as no one now in either country believed that the sanitary considerations which were the origin of this prohibition now existed.

I would be happy to conclude this dispatch with the expression of my opinion that the efforts which I have not ceased to make since I assumed charge of this mission would be successful. I dare not do so, however, for we are in the midst of great political agitation in France in reference to the policy of having excluded French meats.

I beg you to refer to my series of dispatches Nos. 24, 36, 53, 58, 73, 108, 202, and 403, giving a full history of my action in this matter and of my intercourse with the French Government in regard to it. I have not thought it my duty to recommend retaliation as a remedy, which would necessarily cause great derangement of all our commercial relations with France.

In conclusion, I have to assure you that I will not cease my efforts to obtain from the Executive, even without the concurrence of the Chamber of Deputies, a decree substituting an inspection of American pork and its admission into France at the rate of duty to which all pork is subject in lieu of the original prohibitory decree; and I am not with-

out hope of succeeding, as this question of inspecting foreign meats is now under consideration by the minister of commerce and agriculture, and an opportunity is offered, in my opinion, for at least a temporary arrangement, until the chamber shall vote upon the bill for the inspection of meats, which has been protecting almost to the prohibitory point all agricultural products, an agitation which controls the legislature and the Executive, and very recently caused the failure of negotiations with Italy for a commercial treaty.

Referring to my No. 24, under date of June 16, 1885, in which I advised you that I thought my predecessor was oversanguine in his expectation that the legislature would concur with the Executive in providing a law of inspection as a substitute for the prohibitory decree, I can assure you that there has never been a period since when any cabinet minister here encouraged me to hope for a satisfactory result from the present chamber, though they always disclaimed any unfriendly intention. Mr. Flourens even contended that European countries did not consider the exclusion of a particular import as unfriendly, but rather as a domestic question, connected with its economic or health policy, and referred especially to Great Britain as pending since 1883.

I have, etc.,

ROBERT M. MCLANE.

No. 122.

Mr. Dufais to Mr. Rives.

No. 140.] CONSULATE OF THE UNITED STATES,
Havre, France, February 17, 1888.

SIR: Referring to my dispatch No. 133, of December 22, 1887, on the subject of the prohibition of American salted pork in France, I have the honor to transmit herewith the translation of a letter addressed by the syndicate chamber of commerce in these articles at Bordeaux to the committee on customs duties in Paris, from which it appears that the feeling there on this question is no less intense than at Havre. Should retaliation be considered too harsh a measure for the unjust discrimination against our produce, a strict examination by competent experts of all French wines and brandy at our ports of entry would soon disclose the adulterated character of a very large proportion of them, the rejection of which would increase the number of advocates in this country for a revocation of the odious edict against the importation of American pork.

I may mention that quite lately her British Majesty's consul at La Rochelle, in a report to his Government, asserts that it is next to impossible to get pure brandy, and that the mixture imported from there, and probably also from other French ports, consists of common German potato spirits and some cognac oil.

Energetic steps to remedy the present state of things will be hailed with especial delight by the whole French working population.

I have, etc.,

F. F. DUFAIS,
Consul.

[Inclosure in Mr. Dufais's No. 140, of February 17, 1888, to Mr. Rives.—Translation.]

Petition to the Commission of Customs.

BORDEAUX, *February* 13, 1888.

To the President and the Members of the Commission of the Customs:

The syndicate for the lard and salted meat trade at Bordeaux has the honor to call your kind attention to the irregular position created in the branch of business it represents by the decree of the 18th February, 1881, prohibiting the entrance into France of salted meats of American origin.

This fatal measure, taken hurriedly and without any preliminary inquiry under the pretext of protecting public health, ruined our industry by taking away the principal element of business and prejudiced at the same time the general commerce of France.

Experience has proved, and our learned societies have attested, that with a good salting and the French way of cooking, pork is not a dangerous food. We may add, as a convincing argument, that during the twenty years which preceded the prohibition large quantities of salted American pork were consumed in France without causing any harm.

Now that the harmlessness of this meat is generally recognized we ask the redress of a mistake which, by throwing confusion into our business, has prejudiced largely important interests, without any noticeable compensation, and that our trade, which has been suppressed under false pretenses, be replaced by common right.

The prohibition, gentlemen, is an excessive and iniquitous measure, which not only results in preventing us from importing American meats, but also that from other countries, and in creating numberless difficulties and obstacles on the part of the customs officials, who imagine all packed meats to be of American origin, and we are daily the victims of all sorts of vexatious mistakes and costly lawsuits, caused by the decision of special experts appointed by the Government, whose competence we are not allowed to contest.

In studying the question you have been able to prove that the prohibition, in bringing discredit upon pork from all countries, has failed to give our agriculture an efficient protection. In the southwest the average prices paid in our markets since 1881 were 12 and 15 per cent. lower than those of the preceding period, and are still daily receding.

After all, gentlemen, the prohibition has not protected anything, neither the health of the consumer, which was not menaced, nor his purse, no more than that of the producer. A few privileged intermediate packers alone, some of the west and center of France, derive a certain benefit from it. They have always opposed the repeal of the decree, which granted them a kind of monopoly, and which permits them to charge very high prices not only to ordinary consumers, but also to the State for naval and military supplies. The syndicates, on the contrary, who seemed more particularly interested, have never asked for the maintenance of a special measure against which the two meetings of 1886 and 1887 protested. The exception created by the prohibition has only favored the very small class of middlemen above referred to. Although they buy the animals on hoof at very low rates, they have kept up and even increased their sale prices for consumption, so that the working classes, who compose the majority of pork *consumers*, have paid very dear for what the *producers* have sold very cheap. The free importation of American meat would put a stop to this speculation by creating a legitimate competition to this quasi monopoly, and the result would be to economize the pecuniary resources, always so meager, of our working classes. It also would bring back the following advantages: To our *merchant marine*, considerable element of freight; to our *coasting trade* and *railroads*, and important element of transportation; to our *export trade*, the markets of which have been nearly all suppressed by retaliative measures against our products; to our *treasury*, with a duty of 8 francs and 50 centimes on the gross weight, a revenue of *four* or *five million* of francs, an economy which is not to be disdained. To the *customs authorities*, who have caused the duty upon salted meats to be raised from 4 francs to 8.50 francs, thus insuring a sufficient protection to our agriculture. The commission of customs duties seems to have the power to insist with the Government to remedy the present deplorable condition of the trade created by an arbitrary measure, and which can not be kept up for any substantial reason.

It is with confidence that we apply to you, gentlemen, begging you to take interest in this cause, which is a national one, and to use all your influence to obtain shortly the abrogation of the decree of the 18th February, 1881.

The syndicate.

MESSENGER IN FIRST COMPTROLLER'S OFFICE.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

Copy, with inclosure, of letter of First Comptroller asking for appropriation to pay messenger in his office for extra services.

MAY 26, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT, *May* 24, 1890.

SIR: I have the honor to transmit herewith, for the favorable consideration of Congress, copy of a communication from the First Comptroller of the 19th instant, and accompanying inclosure, asking for an appropriation to pay George Martin, messenger in his office, for extra services performed therein.

Respectfully, yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

TREASURY DEPARTMENT,
FIRST COMPTROLLER'S OFFICE,
Washington, D. C., May 19, 1890.

SIR: I beg to hand you herewith for your consideration and proper action, a letter addressed to me by George Martin, messenger in this office, which has my approval and favorable recommendation.

In view of the faithful and efficient service rendered by this messenger, and the extra work he has performed, as set forth in his communication, I believe that he is justly entitled to the extra compensation asked for, and I would respectfully suggest that the matter be submitted to Congress for an appropriation.

I am, very respectfully,

A. C. MATTHEWS,
First Comptroller.

Hon. WILLIAM WINDOM,
Secretary of the Treasury.

TREASURY DEPARTMENT, FIRST COMPTROLLER'S OFFICE,
Washington, D. C., May 18, 1890.

SIR: I most respectfully ask your consideration of the following facts, which I think justly entitles me to some extra compensation, and which, I believe, Congress will allow me if the matter be properly brought before that body. I was appointed messenger in this office August 4, 1882, at which time the office of assistant messenger for this office was abolished. In consequence of this I have had many additional duties to perform, and my work has been onerous. I not only perform the ordinary duties of messenger, such as sweeping, cleaning, and providing for the rooms of the office, and delivering messages and papers, but I am responsible for the safe delivery at the proper offices of the important warrants, accounts, and other papers which pass through this office in great numbers. Besides taking press copies of all of the official correspondence of this office I also put up for mailing all of the letters, a duty which, in most of the bureaus, is performed by clerks. In order to perform this work well and satisfactorily I am obliged to be at the office early and to work late. I have had no regular leave of absence from the office for four years.

I respectfully suggest to you that an additional allowance of $100 per annum from the date of my appointment as messenger would be a fair and just compensation for the extra services I have performed. If it meet with your approval, I respectfully ask that you recommend to the proper committee of Congress that the necessary amount to pay me for the extra services referred to be included in the deficiency bill now pending before that body.

Very respectfully, your obedient servant,

GEORGE MARTIN.

Hon. A. C. MATTHEWS,
First Comptroller.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

INCLOSING

Copy of letter of Commissioner of Internal Revenue recommending amendment to section 5447, Revised Statutes, according to draught inclosed, providing penalty for obstructing store-keeper or gauger in his duty.

MAY 26, 1890.—Referred to the Committee on the Judiciary.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., May 24, 1890.

SIR: I have the honor to inclose herewith a copy of a letter dated the 21st instant, from the Commissioner of Internal Revenue, stating "that there is no provision of law which provides a penalty for the offense" of molesting or obstructing an internal revenue store-keeper and gauger in the performance of his duty.

I recommend that section 5447, Revised Statutes, be amended as proposed by the Commissioner, and herewith inclose a draught of a bill for that purpose.

Respectfully, yours,

W. WINDOM,
Secretary.

Hon. THOMAS B. REED,
Speaker of the House of Representatives.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, D. C., May 21, 1890.

SIR: My attention has been called to the case of a store-keeper and gauger who was molested or obstructed in the performance of his duty, and I find that there is no provision of law which provides a penalty for the offense.

Section 5447, Revised Statutes, provides a penalty for any person who forcibly impedes or interferes with any officer of the customs in the ex-

ecution of his duties. I recommend that this be extended to internal revenue officers, and have the honor to inclose a draught of a bill amending that section accordingly, for such action as you think proper to take.

It would be an encouragement to officers in the faithful performance of their duty to know that they could rely upon the United States to protect them in case they are molested or interfered with.

Respectfully, yours,

JOHN MASON,
Commissioner.

Hon. WILLIAM WINDOM,
Secretary of the Treasury.

Be it enacted, etc., That section 5447 of the Revised Statutes of the United States be amended as follows, namely, by inserting after the words "officer of the customs," in line 2, the words "or of internal revenue."

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC No. 398.

ORDNANCE AND ORDNANCE STORES FOR THE STATE OF MAINE.

LETTER

FROM

THE SECRETARY OF WAR,

CALLING ATTENTION

To public act No. 116, *May* 14, 1890, *relating to ordnance and ordnance stores for the State of Maine, that no appropriation has been made to carry the act into effect.*

MAY 28, 1890.—Referred to the Committee on Appropriations.

WAR DEPARTMENT,
Washington, May 28, 1890.

SIR: Pubiic act No. 116, approved May 14, 1890, authorizes and directs the Secretary of War to issue to the State of Maine certain ordnance and ordnance stores, and clothing and camp and garrison equipage to replace stores issued to the State under the law for arming and equipping the militia, which stores were destroyed by fire. The act makes no appropriation to enable me to procure the stores, and I am therefore unable to carry it into effect unless such appropriation be made.

The amounts required are, for the ordnance stores named, $5,263.95, and for the quartermaster's stores, $1,135.06, making the total amount needed to carry out the provisions of the bill, $6,399.01.

Respectfully,

REDFIELD PROCTOR,
Secretary of War

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

MILEAGE FOR OFFICERS.

LETTER

FROM

THE SECRETARY OF WAR,

TRANSMITTING

Letter of Maj. Gen. O. O. Howard, remonstrating against the omission from deficiency bill item for mileage for officers for journeys in last fiscal year.

MAY 28, 1890.—Referred to the Committee on Appropriations.

WAR DEPARTMENT,
Washington, May 27, 1890.

SIR: I have the honor to transmit herewith, for the consideration of the Committee on Appropriations, a letter of the 23d instant from Maj. Gen. O. O. Howard, commanding the Division of the Atlantic, presenting reasons why the amount required to pay mileage for journeys performed by officers of the Army during the last part of the last fiscal year should not be left out of the deficiency bill.

Very respectfully,

REDFIELD PROCTOR,
Secretary of War.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

HEADQUARTERS DIVISION OF THE ATLANTIC,
Governor's Island, New York City, May 23, 1890.

DEAR SIR: I have been informed by an officer that Congress is likely to leave out of the deficiency bill the amount required to pay mileage for journeys performed during the last part of the last fiscal year. I have the honor to ask that a strong remonstrance be made against this. In the performance of military duty I was compelled to order officers to travel even up to the end of June. That they should not be re-imbursed for money already expended in the service of the United States would be a great wrong.

Very respectfully, your obedient servant,

OLIVER O. HOWARD,
Major-General, U. S. Army

HON. REDFIELD PROCTOR,
Secretary of War, Washington, D. C.

MESSAGE

FROM THE

PRESIDENT OF THE UNITED STATES,

RELATIVE TO

An item of appropriation to enable the President to continue negotiations with the Cherokee Indians.

MAY 28, 1890.—Referred to the Committee on Indian Affairs.

To the Senate and House of Representatives:

I transmit herewith a communication of 26th instant from the Secretary of the Interior and accompanying item of appropriation, to enable the President to continue the negotiations authorized by sections 14 and 15 of the Indian appropriation act approved March 2, 1889, with the Cherokee Indians, and with all other Indians owning or claiming lands west of the ninety-sixth degree of longitude in the Indian Territory, for the cession to the United States of all their title, claim, or interest of every kind or character in and to said lands, etc.

The matter is presented for the favorable action of Congress.

BENJ. HARRISON.

EXECUTIVE MANSION,
May 28, 1890.

DEPARTMENT OF THE INTERIOR,
Washington, May 26, 1890.

The PRESIDENT:

The act making appropriation, approved March 2, 1889, for the Indian service for the fiscal year ending June 30, 1889 (25 Stat., 1005), provides for negotiations for cession of lands of the Cherokees, etc., in the Indian Territory; appropriates $25,000 for this purpose, and requires that all agreements resulting from such negotiations shall be reported to the President and by him to Congress at *its next session*, and to the council or councils of the nation or nations, tribe or tribes agreeing to the same, for ratification.

Commissioners appointed under the provisions of this act have visited the Indian Territory, held councils with the Indians, but as yet have made no agreements. You are familiar with the efforts made by the commission to agree with the Cherokees; the many changes necessarily made in the personnel of the commission, and other unavoidable causes of delay. The commission, as reorganized, is now in the field, and reports received contain some promise of success. To enable it to visit

all the tribes living west of the ninety-sixth degree of longitude additional funds will be required, and I have the honor to recommend that the sum of $25,000 be appropriated for the purpose. I have therefore prepared an item of appropriation for insertion in the Indian appropriation bill for the ensuing fiscal year, and respectfully request that the same be transmitted to Congress with favorable recommendation.

The present act requires all agreements made by the commission to be reported to the President and by him to Congress at its next session. It suggests itself that this may be construed to mean at the next session after the agreement or agreements made, and not necessarily after the passage of the act. But to remove all doubt on this score, a new act of the kind submitted is desirable.

There are now only $10,000 on hand in the Treasury, and some of this may have been already contracted for the commission.

I have the honor to be, very respectfully, your obedient servant,

JOHN W. NOBLE,
Secretary.

Proposed item to be inserted in the Indian appropriation bill.

SEC. —. The sum of twenty-five thousand dollars, or so much thereof as may be necessary, is hereby appropriated to enable the President to continue the negotiations authorized by act of Congress, approved March second, eighteen hundred and eighty-nine, with the Cherokee Indians and with all other Indians owning or claiming lands lying west of the ninety-sixth degree of longitude in the Indian Territory for the cession to the United States of all their title, claim, or interest of every kind or character in and to said lands, and any and all agreements resulting from such negotiations shall be reported to the President and by him to Congress at its next session and to the council or councils of the nation or nations, tribe or tribes, agreeing to the same for ratification: *Provided*, That said commission is further authorized to submit to the Cherokee Nation the proposition that said nation shall cede to the United States, in the manner and with the effect aforesaid, all the rights of said nation in said lands upon the same terms as to payment as is provided in the agreement made with the Creek Indians of date January nineteenth, eighteen hundred and eighty-nine, and ratified by the act of Congress approved March first, eighteen hundred and eighty-nine; and if said Cherokee Nation shall accept, and by act of its legislative authority, duly passed, ratify the same, the said lands shall thereupon become a part of the public domain for the purpose of such disposition as is herein provided, and the President is authorized, as soon thereafter as he may deem advisable, by proclamation open said lands to settlement in the same manner and to the same effect as in this act provided concerning the lands acquired from said Creek Indians, but until said lands are opened for settlement by proclamation of the President, no person shall be permitted to enter upon and occupy the same, and no person violating this provision shall be permitted to enter any of said lands or acquire any right thereto.

SEC. —. That the President may, whenever he may deem it necessary, create not to exceed two land districts embracing the lands which he may open to settlement by proclamation as hereinbefore provided, and he is empowered to locate land-offices for the same, appointing thereto, in conformity to existing law, registers and receivers, and for the purpose of carrying out this provision five thousand dollars, or so much thereof as may be necessary, is hereby appropriated.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 401.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A communication from the Attorney-General submitting revised estimates for the expenses of the United States courts for the fiscal year 1891.

MAY 29, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
May 28, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, a communication from the Attorney-General of the 27th instant, submitting revised estimates for the expenses of United States courts for the fiscal year 1891.

Respectfully, yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF JUSTICE,
Washington, D. C., May 27, 1890.

SIR: You are respectfully requested to forward to the Speaker of the House of Representatives the revised estimates herein submitted for the expenses of the United States courts for the fiscal year 1891.

The original estimates are found on pages 234 and 235 of the Book of Estimates of Appropriations, 1890–'91.

Reference is made to letter of April 14, 1890, of A. C. Mathews, First Comptroller of the Treasury, found on page 3, Executive Document No. 338, Fifty-first Congress, first session. In that letter he expresses an opinion that the deficiencies needed for defraying the expenses of the United States courts for the fiscal year 1890 should be 30 per cent. greater than the actual deficiencies reported by him on April 1, 1890; such report being found in the middle of page 3 of said Executive Document No. 338. Congress has at times expressed a preference for an estimate of court expenses that shall come as near the actual expenses needed as can be arrived at by this Department. As the estimates for annual appropriations are by law required to be submitted to the Secretary of the Treasury on October 1 of each calendar year for the succeeding fiscal year, the Department is not at that time as well informed as at a later period,

The estimates for the fiscal year 1891 were made up without adequate knowledge of what expenses would be necessary at Fort Smith, Ark., Paris, Tex., the United States court at Muscogee, Ind. T., and the increased expenses of holding courts provided for in places where United States courts were not formerly held.

I submit the following revised estimates for court expenses, fiscal year 1891, in lieu of the original estimates. In submitting them I refer to Executive Document No. 338, formerly referred to in this letter, page 2, and to its middle portion entitled "United States courts for the fiscal year 1890," and after examining the rate of court expenses now going on, believe that the estimates there submitted as the deficiencies of the expenses of courts for 1890 should be added to the estimates found on page 234 of the Book of Annual Appropriations for 1890–'91. Upon this basis of calculation the following amounts are presented as the probable expenses of the United States courts for the fiscal year 1891:

Fees and expenses of marshals	$765,000
Fees of district attorneys	295,000
Pay of regular assistant attorneys	125,000
Pay of special assistant attorneys	40,000
Special compensation of district attorneys	8,000
Fees of clerks	220,000
Fees of jurors	685,000
Fees of witnesses	1,200,000
Support of prisoners	465,000
Pay of bailiffs, etc	200,000
Miscellaneous expenses	175,000

I have retained some of the original estimates as more nearly expressing my ideas of the requirements of the service, and have increased others only so far as the necessities of the service seem to absolutely require.

Very respectfully,

W. H. H. MILLER,
Attorney-General.

The SECRETARY OF THE TREASURY.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 402.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A communication from the Attorney-General in reference to the expenses of G. T. Larkin, late deputy marshal, eastern district of Tennessee.

MAY 29, 1890.—Referred to the Committee on Claims.

TREASURY DEPARTMENT, *May* 28, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, a communication from the honorable Attorney-General of the 27th instant, submitting for appropriation the claim of G. T. Larkin, late deputy United States marshal, eastern district of Tennessee, for expenses incurred and services rendered in the matter of killing, in self-defense, a citizen of Hawkins County, Tenn., who resisted arrest under warrant charging violation of the internal-revenue laws, amounting to $1,976.55.

Respectfully yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF JUSTICE,
Washington, D. C., May 27, 1890.

SIR: Herewith is inclosed a copy of a letter addressed to this Department on the 13th instant by T. H. Reeves, late United States marshal, eastern district of Tennessee, respecting the claim of G. T. Larkin, late deputy United States marshal, eastern district of Tennessee, for expenses incurred and services rendered in matter of killing, in self-defense, a citizen of Hawkins County, Tenn., who resisted arrest under warrant charging violation of the internal-revenue laws—his life being in jeopardy from an assault made by the deceased, in company with another man—the expenses amounting to $692.55, and compensation for his being suspended from office six hundred and forty-one days, at $2 a day, $1,284; said killing occurred on or near June 16,1888.

You are respectfully requested to forward the same to Congress for its action. I know nothing of the merits of the case excepting from the

papers herewith forwarded. Mr. Larkin asks that the papers take this direction. As there is no money available for the settlement of his account I comply with his request.

Respectfully,

W. H. H. MILLER,
Attorney-General.

The SECRETARY OF THE TREASURY.

KNOXVILLE, TENN., *May* 13, 1890.

The ATTORNEY-GENERAL,
Washington, D. C.:

SIR: Having been requested by George T. Larkin, late deputy United States marshal, to make a statement in support of his account for expenses, etc., incurred in his defense in the State and Federal courts on an indictment for murder, I have come to this city to examine the records of the marshal's office, and on the letter book find the following history of the case made at the time:

UNITED STATES MARSHAL'S OFFICE,
Knoxville, Tenn., June 18, 1881.

His Excellency ALVAN HAWKINS,
Governor of Tennessee, Nashville, Tenn.:

SIR: I have the honor to submit for your information the telegrams, correspondence, facts, and circumstances that induced Hon George Andrews and myself to request you to send Captain Newman to Rogersville to protect Deputy Marshal George T. Larkin from threatened violence.

Telegram marked A brought the first information of the trouble to this place.

About one hour later telegram B, from United States Commissioner Noe, was received saying "Sheriff Blevins apprehended a mob," and that "it is believed he [Larkin] will be killed by a mob to-night, unless protected by Federal authority."

Upon receipt of this telegram I called on Assistant United States District Attorney Jno. P. Smith for advice as to what steps to take. The result of the conference with him appears in telegram C, which I at once sent to Judge Hacker, whose court is in session at Greeneville, Tenn.

At 11 a. m. the down train brought, addressed to United States District Attorney Xen Wheeler from the sheriff of Hamblen County, the letter marked D.

Capt. S. J. Couch, of the Morristown Times, and Joseph Brown, late postmaster at Morristown, came here on the same train, and in the presence of Hon. George Andrews, Assistant Attorney-General Smith, and myself corroborated fully the statements of Sheriff Maze and Commissioner Noe. Captain Couch stating that Sheriff Blevins at the time of arresting Larkin had announced his fears, in the presence of Mr. Scott, an employé in the Times office, and others, that a mob would kill Larkin.

Acting upon these telegrams, letter, and statements, it was decided to appeal to you as the governor of the State to protect Larkin from the threatened mob violence, and Judge Andrews joined me in telegram to you marked E, which was sent between 11 and 12 a. m. At 2 p. m., having received no reply from you, I left on the train for Rogersville to investigate the facts in the case, and arranged with Judge Andrews and Mr. Smith to telegraph me at Rogersville Junction if they heard from you by 4 p. m., the time the train was due there. On my arrival at the junction I received from Mr. Smith telegram F; and after conferring with parties who had left Rogersville that morning, I felt satisfied the people of Hawkins, remote from telegraphic communication, were not sharing in the excitement that existed at Morristown, the home of Larkin. I therefore sent Mr. Smith telegram G, intending, if I found Larkin in danger and the sheriff unable to protect him, to charter the Rogersville railroad train, and return to the junction and notify Captain Newman to come at once. Mr. Smith showed my telegram from the junction to Captain Newman, and with Judge Andrews arranged with the railroad authorities to send Newman and his men up on the night train, with special rates, in the event I found it necessary and notified them to come.

Captain Newman, it appears, received a subsequent telegram from you to charter a train and go, which he did, marching all night from the junction to Rogersville, where, to my surprise and the surprise of the sheriff, we found him yesterday morning.

On reaching Rogersville the evening before, I represented the facts in my possession to Sheriff Blevins, showed him the telegrams, etc., and asked him if he apprehended any danger to Larkin. His reply was that he did not, and that the presence of Captain Newman will be unnecessary. He further pledged me that he would protect Larkin, and thought no attempt would be made to interfere with him, unless a

drunken crowd should come from the vicinity of the killing, some 22 miles above Rogersville.

The pledge of the sheriff and the general quiet of the place led me to hope that Larkin would have a fair and unmolested trial, and I sent no notice to the guards to come. Their going, in view of my telegram from the junction, which Captain Newman said had been shown him by Mr. Smith, was premature, but resulted in no harm, as Sheriff Blevins discharged them at once, and they returned on the train leaving Rogersville at 7 a. m., before their presence was known outside of the town.

The promptness with which you acted, the zeal of the Knoxville Rifles, and the interest manifested in this United States officer, whose life was represented to be in jeopardy, by the State authorities, will have a salutary influence it is believed in stimulating ministerial officers, State and national, to a fearless discharge of their duties. Had a like promptness and interest been manifested in the life and protection of officers from mob violence and intimidation throughout the country, the sentiment among violators of law in many places that United States officers—especially in the Internal Revenue service—ought to be exterminated, would long since have been replaced by respect for the laws of the land and the agents necessary for their enforcement.

I thank you for your action in behalf of my deputy, and only regret that Captain Newman went to the expense and trouble of going to Rogersville without waiting further orders from me, as I supposed he would do.

Your obedient servant,

T. H. REEVES,
United States Marshal.

[Telegram A.]

ROGERSVILLE JUNCTION, *June* 16, 1881—8. a. m.

T. H. REEVES,
United States Marshal, Knoxville, Tenn.:

I am under arrest by the sheriff for shooting a man in trying to arrest him. Come to my relief at Rogersville. Tell the district attorney send able counsel at once at my expense.

G. T. LARKIN,
Deputy United States Marshal.

[Telegram B.]

MORRISTOWN, TENN., *June* 16, 1881,—9.20 a. m.

THOS. H. REEVES,
United States Marshal, Knoxville, Tenn.:

Deputy Marshal Larkin killed a man yesterday in self-defense in Hawkins County. He was arrested here last night and taken back to Rogersville. Sheriff Blevins said he apprehended a mob. It is believed that he will be killed by a mob to-night unless protected by Federal authority.

S. B. NOE,
United States Commissioner.

[Telegram C.]

KNOXVILLE, *June* 16, 1881.

Judge NEWTON HACKER,
Greeneville, Tenn.:

United States Commissioner Noe, Morristown, telegraphs that "Deputy Marshal Larkin killed a man yesterday in self-defense in Hawkins County. He was arrested last night and taken to Rogersville. Sheriff Blevins said he apprehended a mob. It is believed he will be killed by a mob to-night unless protected by Federal authority." I beg you to telegraph the sheriff to protect Larkin at all hazards, that the law may take its course in his case.

T. H. REEVES,
United States Marshal.

[Letter D.]

MORRISTOWN, TENN., *June* 16, 1881.

HON. XEN WHEELER,
Attorney-General, United States, Knoxville, Tenn.:

DEAR SIR: Deputy Marshal Geo. T. Larkin shot and perhaps killed a man in Hawkins County yesterday. The facts, as I learned from him, are these: He had a capias for a very bad man, charged with selling liquor in violation of the revenue laws, and went to the man's house to arrest him. He found him out in the field and made known his business in a gentlemanly manner and asked the man to go with him. Thereupon the man refused to go, told Larkin to get off the premises, drew his knife, and advanced on him. Larkin retreated a few steps, drew his pistol, and fired, the shot not taking effect. The man still advanced and Larkin fired the second time, dropping the man. Larkin then started for this place, reaching here late last evening, and came to the train here last night to go down to Knoxville to give himself up to the United States authorities.

Sheriff Blevins, of Hawkins County, came down on the train, arrested him, handcuffed him, and carried him back to Rogersville. Larkin's friends are apprehensive that a mob will kill him, and in fact Sheriff Blevins remarked, as I am informed, that he believed it would be done.

We are anxious that you take such action as will secure to Larkin a fair trial, and deliver him from the threatened action of the mob. The matter should be looked after to-day, and arrangements made to protect him at once, as it is believed they will attempt to kill him to-night.

Very respectfully,

W. H. MAZE,
Sheriff Hamblin County.

[Telegram E.]

KNOXVILLE, *June* 16, 1881.

Governor ALVAN HAWKINS,
Nashville, Tenn.:

Geo. T. Larkin, deputy marshal, has been arrested and is in jail at Rogersville for shooting, in self-defense, a man who resisted arrest. Sheriff of Hamblin County and others send word that Larkin will be taken from jail to-night by mob and lynched. Telegraph orders immediately, if possible, to Knoxville Rifles, Capt. David Newman, to go instantly to Rogersville for protection. Reply at once.

T. H. REEVES,
United States Marshal.
GEORGE ANDREWS.

[Telegram F.]

KNOXVILLE, *June* 16, 1881.—3.40 p. m.

T. H. REEVES,
Rogersville Junction, Tenn.:

Newman ordered to Rogersville. Can send on mail to-night if wanted. Answer.

JOHN P. SMITH,
Assistant District Attorney.

[Telegram G.]

ROGERSVILLE JUNCTION, *June* 16, 1881.

JOHN P. SMITH,
Knoxville, Tenn.:

Hold everything in readiness and await orders, which I will send from Rogersville if found necessary on my arrival.

T. H. REEVES,
United States Marshal.

The foregoing letters and telegrams are true copies made by me this day from the Letter Book on file in the United States marshal's office at Knoxville, Tenn.

I further state that I was United States marshal of the eastern district of Tennessee from about May 19, 1881, to May 19, 1885. That George T. Larkin was regularly ap-

pointed and qualified as deputy United States marshal about June 1, 1881, and at the time of the homicide was in the regular discharge of his duty. Upon his indictment for murder by the State court I suspended said Larkin from duty, and he remained suspended until acquitted in the Federal court, after which he was restored to duty.

If there is any authority for the payment of such expenses, George T. Larkin should be re-imbursed for the expenses incurred in his defense, for the larger part of which he has filed voucher; the other items he swears to.

As to compensation on per diems for the six hundred and forty-one days claimed by him during his suspension, that is submitted for your action, with the remark that Mr. Larkin has never recovered from the physical and financial distress brought on him by this trial, which attracted so much attention at the time that Judge Stanley Matthews, of the Supreme Court, came to Knoxville and presided at the trial when Larkin was first tried. I am advised that he and his family are greatly in need of assistance, and I commend him and so much of his claim as may be authorized by law to your favorable consideration.

I have no interest in his claim, direct or indirect, and submit this lengthy statement in order that you may have a history of the case when you come to consider his account.

T. H. REEVES,
Late United States Marshal.

Sworn to and subscribed before me this May 13, 1890.
[SEAL.]
H. H. TAYLOR, *Clerk*,
By J. T. CARTER, *Deputy Clerk.*

KNOXVILLE, TENN., *May* 13, 1890.

This is to certify that I appeared and defended Geo. T. Larkin, as United States district attorney, at the term of court when he was acquitted. I have examined his account, herewith presented, with the statement of T. H. Reeves, late United States marshal, concurring in what he says as containing a full and fair statement of the case.

JAMES M. MEEK,
Late District Attorney.

Sworn to and subscribed before me this May 13, 1890.
[SEAL.]
H. H. TAYLOR, *Clerk*,
By J. T. CARTER, *Deputy Clerk.*

MORRISTOWN, TENN., *April* 19, 1890.

SIR: I send my account for expense and time while deputy United States marshal, eastern district of Tennessee, for services rendered by me in attempting to arrest one Arthur Larkin, and to defend myself, in a charge of murder, in the State court; tried and acquitted in the Federal court, Knoxville. Have been delayed on the account of not being able to get the vouchers and certificates referred to in your letter dated March 6, 1890 (marked H. H. 2563–'85), referred to. Any further explanation on the subject hope will be able to give it, as I think my claim is a just one.

Very respectfully,

G. T. LARKIN,
Late Deputy United States Marshal.

Hon. W. H. H. MILLER,
Attorney-General, Washington, D. C.

STATE OF TENNESSEE, HAMBLEN COUNTY, *ss*:

I herewith present the following account, supported by vouchers where it was possible to furnish them, as late deputy United States marshal, incurred by me in a legal struggle of no ordinary character in my defense in the case of The State of Tennessee *vs.* Myself, being an extra judicial proceeding instituted against me on an indictment for murder in the first degree, found against me by the grand jury of Hawkins County, Tenn., at Rogersville, September, 1881, for the killing of Arthur Larkin, a citizen of said county, while resisting arrest at my hands, on a warrant from the Federal authorities, charging him with a violation of the internal-revenue laws of the United States, and in defense of my own life from a murderous assault made by him and an-

other man upon me, in the peaceful discharge of my lawful official duty as such officer. Removed by petition on the plea of jurisdiction from the State court to the Federal court at Knoxville, Tenn., January, 1882, and tried there in January 22, 1884, and for the item of a part of my time, employed in said defense, while so suspended from office.

Federal court record in this case, executed April 4, 1890, herewith filed and marked Exhibit A, for which transcript I paid the clerk his fees..... $1.15

Federal clerk's transcript of the attendance and mileage of witnesses in my behalf, herewith filed and marked Exhibit B, for which I paid his fees.... .85

Warrant for the arrest of Arthur Larkin is placed in my hands April 4, 1881. Proceeded to Hawkins County June 14, and June 15, while making the attempt to arrest said Arthur on that warrant in a peaceable, friendly way, he not only swore that he would not submit to it, but suddenly made a determined assault, aided by another man, to kill me. Whereupon, to save my own life, there was left me no discretion but to defend myself or be killed; and in this unlawful, deplorable attempt he was killed. I was engaged two days, June 14 and 15, at $2 per day, $4. Traveled 40 miles, from place of receiving warrant to the place of executing it, at 6 cents per mile, $2.40; in all, $6.40, for which I have never been paid, and for which I have no voucher but my oath..... 6.40

Arrested by R. L. Blevens, sheriff of Hawkins County, on a warrant from a justice of the peace of said county, charging me with the murder of said Arthur Larkin, at my home at Morristown, while in the act of making out a report of this deplorable affair and surrendering myself to the Federal authorities, and taken that night to Rogersville.

Held under guard at Rogersville in hotel two days, at 75 cents per day, $1.50; one guard, at $1 per day, two days, $2; in all $3.50, which I paid, and for which I have no voucher but my oath..... 3.50

Paid S. J. Couch, of Morristown (to go to Knoxville June 16 in my behalf, to inform the marshal, his honor T. H. Reeves, of my situation, and bring him up to Rogersville, whence I was to be taken), his railroad fare to Knoxville, from Knoxville to Rogersville, and from Rogersville back to Morristown, and his other expenses, in all, for June 16 and 17, $5.25, for which I have at present no other voucher but my own oath, as Mr. Couch moved West a number of years ago and I have not been able to communicate with him. But his honor Marshal Reeves came to Rogersville with him June 16, staid one night, the 16th, and left the morning of the 17th, and hence heard the roar of the maddened mob thirsting for and threatening my life. 5.25

Tried on warrant June 18 before J. H. Spears, justice of the peace, and bound over to the September term of the Hawkins County circuit court to answer the charge of the State of Tennessee for murder, etc., but was admitted to bail by said justice, whereupon C. C. Spears, clerk of the circuit court, and Hugh Kyle, one of my attorneys, offered and were accepted as bail until I could go to Morristown to give other bail and release them. My own railroad fare to Morristown was $1.40, and I paid the fare both ways for C. C. Spears, $2.80, as it was necessary for him to go with me to Morristown until I could release him and my other bail man by giving new bail there, in all $4.20 (see voucher herewith filed marked Exhibit C)..... 4.20

Attended the Hawkins County circuit court at its September term, 1881, in compliance with my bail bond; railroad fare from Morristown to Rogersville, $1.40; two days' board at hotel, at 75 cents per day, $1.50; in all, $2.90, which I paid and for which I have no bonds but my own oath 2.90

I was indicted by the grand jury at said term of that court for murder in the first degree, etc., and as a willful murder in the first degree is held not to be bailable under the laws of Tennessee, I was arrested upon that indictment the third day of the term with a remorseless precipitancy by the sheriff, R. L. Blevins, who evinced very unkind feelings towards me, and at once incarcerated in the county jail. To relieve myself from this unpleasant situation, and the positive danger I was in of my life, from the threatenings of the infuriated mob to break into the jail and take me out by force and hang me, and I had every reason to believe that the sheriff and jailer, who were both rebels, were in sympathy with this spirit, I had myself brought before his honor Judge Newton Hacker of said court on habeas corpus, who was well aware of this lawless spirit and my real danger, and who, after hearing testimony and argument, decided that the case was bailable, and ordered bail in a specified sum to be taken by the sheriff for my appearance at the January term of said court, 1882, on the execution of which it was ordered that I should be released by the sheriff and discharged from jail (See the evidence of Vouchers K and L herewith filed on this point.)

To make this bond and get released from this dangerous situation I had to get Sheriff Blevins to go to Morristown, as I was in his custody and in jail of him, to take said bond. This he refused to do as a matter of accommodation (being, indeed, averse to take bail and release me from jail) unless I would pay him the sum of $15 down to meet his expenses. I had no option but to agree to this to get him to go, as I had procured his honor S. P. Evans, late marshal, under whom I began my services and who stood by me in all this trouble, to come up from Knoxville to Morristown on a day set, and with others at that place to go on my bond. I therefore paid it $15.00

And I also paid Mr. Evans's railroad fare both ways and his other expenses, in all $3.75 (see voucher marked L, herewith filed) 3.75

Sheriff Blevins returned from Morristown with the bond executed, and then raised some question upon its legal sufficiency himself, and refused to release and discharge me from jail, and, as he was going to Knoxville, I had to get Thomas McDermit, one of my attorneys, to go with him and adjust the matter with Mr. Evans, which was done, and it turned out there was nothing in the matter but the unfriendly feelings and obstinacy of the sheriff. Blevins telegraphed from Knoxville to the jailor to release me from custody and discharge me from jail. To get Mr. McDermit to go I had to pay his railroad fare both ways, which was $5. I have no other voucher for this item but my own oath, as Mr. McDermit has moved off .. 5.00

On my release I went home by rail, my fare being 1.40

Went by rail to Knoxville from Morristown to procure counsel and file petition in the circuit court of the United States at Knoxville to remove the case of the State of Tennessee versus myself, on indictment for murder, from the jurisdiction of the State court at Rogersville to the Federal court at Knoxville. The petition was entertained and the case set for hearing January 10, 1882, on motion of the State of Tennessee by her counsel to dismiss the petition and remand the case to the jurisdiction of the State court. The petition was sustained. The motion to remand to the State court was not allowed. The court assumed jurisdiction of the case and the counsel was set down for trial at a special term of the Federal court in May, 1882. My actual expenses during this court, for I had to make two trips by rail, was railroad fare both ways, $5; board, fifteen days, at $1 per day; in all $20 (see Voucher A, herewith filed, and my own oath of the facts) 20.00

To prepare for trial at the special May term of the Federal court, 1882, I hired a two-horse hack from David Rhea, of Witnesburgh, Tenn., for which I paid him $6, and was to pay all incidental expenses for horse-feed and driver, and I got Edward Oaks to drive, and sent him into Hawkins County and the edge of Scott County, Va. (for I did not dare to go into these parts myself), to bring my principal witnesses to Whiteburgh, and thence on the railroad to Knoxville. But these witnesses had been tampered with and threatened, so that some refused to come, being afraid, and others kept out of the way. This effort was therefore bootless. I paid Oaks $2 for his services and then his board and the horse-feed, which amounted to $3, in all $5, and this item and the hack hire was $11 (see Voucher G, herewith filed, and my own oath) 11.00

Attended Federal court at its special May term, at which the case was set for trial. A motion for a continuance on my behalf, because my witnesses had failed to attend was refused. I was forced into trial practically without witnesses. A jury was empaneled and sworn and the case gone into, and the result, as expected, was a verdict of guilty against me, not, however, of murder, as charged, but for manslaughter. Judgment was arrested by a motion for a new trial, and on this motion the case was continued to the regular July term, 1882. My actual expenses at this court was railroad fare both ways, $2.50, and 6 days' board, at $1 per day, $6; in all $8.50 (see Exhibit A and my own oath of this item) 8.50

Attended court at the regular July term, 1882, on the motion to set aside verdict and grant a new trial, his honor John Baxter, judge, presiding. The motion was granted. The verdict was set aside and a new trial granted, and the case continued by consent to the regular January term, 1883. My actual expenses were railroad fare both ways, $2.50; board two days, $2; in all $4.50 (see Exhibit A and my own oath on this item) 4.50

Attended the court at its regular January term, 1883, and on motion of the State of Tennessee the case was continued to its regular July term, 1883. My actual expenses were railroad fare both ways, $2.50, and one day's board, $1; in all, $3.50. (See Exhibit A and my oath on this item) 3.50

Attended court at its regular July term, 1883, and on motion of my counsel the case was continued to the regular January term of the court, 1884, on the grounds that this was the second time my principal witnesses had failed to obey summons and attend the court. And the court having been fully advised of the reason of this delinquency, the process of attachment was asked and granted to bring them into court. My actual expenses were railroad fare both ways, $2.50, and two days' board, $2; in all, $4.50. (See Exhibit A and my own oath on this item) $4.50

Attended court at its regular January term, 1884. On the 14th finding two of my main witnesses absent, to wit, S. Barrett and Anderson, on motion the court respited the case to the 17th to get them before the court. I had to go for them in person. I went to Rogersville by rail. Hired two horses and rode 23 miles, the most of it after night; found the witnesses at home in bed, and without a moment's delay had them to mount and set out to Rogersville and got them before the court on the 17th. But to get them to come I had to pay them the sum of $25.50 between them, which was to be deducted from the amounts which might be found to be due them for attendance. Barrett was the coroner who held the inquest upon the body of Arthur Larkin, and Anderson a most important witness. My personal expenses on this trip were railroad to Rogersville and back, $5; hire of two horses for one day, at $1.25 per day each, $2.50, and one day's board, $1; in all 8.50

I was now for the first time ready for trial. Went into trial. Verdict of the jury not guilty and was discharged by the court January 22, 1884. My personal expenses were railroad fare both ways from home, $2.50, and nine days' board, $9; in all 11.50

(See Exhibits A and B and my own oath on this item.)

S. B. Noe, ex-United States commissioner, who executed and placed the warrant in my hands for the arrest of Arthur Larkins, attended the Federal court at its special May term, 1882, as a witness in my behalf. Attendance two days, $3; mileage from Morristown, 84 miles, at 5 cents per mile, $4.20; telegram, $1; in all, $8.20. Commissioner Noe did not prove his attendance but I paid him all the same. (See Voucher D, herewith filed) 8.20

Paid the law firm of McDermitt & Kyle, of Rogersville, for legal services defending me before the justice of the peace, June 18, 1881, the sum of $15, and $50 for defending me in the State circuit court of Hawkins County and for drawing up petition to remove the case from the jurisdiction of the State court to the Federal court at Knoxville; in all, $65. (See Voucher E, herewith filed) 65.00

Paid C. C. Spears, clerk of the circuit court of Hawkins County, his fees for making out a transcript of the record in the case of the State of Tennessee versus myself of that court to go with the petition in that case to the Federal court at Knoxville; in all, $11.50. (See Voucher C, herewith filed) .. 11.50

Paid Mariah Fletcher, a witness on my behalf, her attendance and mileage at the special May term of Federal court, 1882, May 22, 23, and 24, three days and mileage, 200 miles; also at the regular July term, 1883, July 17, one day and mileage, 200 miles; in all, four days' attendance, $6, and 400 miles, at 5 cents per mile, $20; making the sum of $26. (See Voucher F, herewith filed.) This witness did not prove her attendance, but I paid it all the same, in fact most of it in advance 26.00

Paid J. A. Goddard, late deputy United States internal-revenue collector, his mileage and attendance as a witness on my behalf at the January term of Federal court, 1884, mileage from Morristown, 84 miles, $4.20, and three days' attendance, $4.50, January 17 to the 19th inclusive; in all $8.70. (See Vouchers H and B, herewith filed) 8.70

Paid Thomas J. Fletcher, a witness on my behalf, his mileage and attendance at the Federal court at its July term, 1883, July 17, one day and mileage, 170 miles; also at its January term, 1884, January 14 to the 19th, inclusive, six days and mileage, 170 miles; in all, $27.50. (See Vouchers I and B, herewith filed) 27.50

Paid J. M. Bellamy, a witness on my behalf, his mileage and attendance at the special May term of the Federal court, 1882, May 22 to the 24th, inclusive, three days and mileage, 190 miles; also at its June term, 1884, January 14 to the 18th, inclusive, five days and mileage, 190 miles; in all (see Voucher B, $31; but by Voucher J, herewith filed, $30.90) 30.90

Paid David Larkins, a witness on my behalf, his mileage and attendance at the Federal court at its January term, 1884, January 14 to the 18th, inclusive, five days and mileage, 170 miles; in all, $16. (See Voucher M and B, herewith filed) 16.00

Paid Samuel Barrett, late coroner, a witness on my behalf, his mileage and attendance at the Federal court at its January term, 1884, January 17 to the 19th, inclusive, three days and mileage, 180 miles; in all, $13.50. (See Vouchers N and B, herewith filed)	$13.50
Paid William C. Anderson, a witness on my behalf, his mileage and attendance at the Federal court at its special May term, 1882, May 22 to the 24th, inclusive, three days and mileage, 170 miles; also at its July term, 1883, July 17, one day and mileage, 170 miles; also at its January term, 1884, January 17 to the 18th, inclusive, two days and mileage, 180 miles; in all, $35. (See Vouchers O and B, herewith filed)	35.00
Paid William Monroe, a witness on my behalf, his mileage and attendance at the Federal court at its special May term, 1882, May 22 to the 24th, inclusive, three days and mileage, 186 miles; also at its January term, 1884, January 14 to the 18th, inclusive, and mileage, 140 miles; in all, $28.30. (See Vouchers I and B, herewith filed)	28.30
Paid William Ledsey, a witness on my behalf, his mileage and attendance at the Federal court at its special May term, 1882, May 23 to the 24th, inclusive, two days and mileage, 84 miles; in all, $7.20. (See Vouchers Q and B, herewith filed)	7.20
Paid William C. Larkins, a witness on my behalf, his mileage and attendance at the Federal court at its special May term, 1882, May 22 to the 24th, inclusive, three days and mileage, 170 miles; in all, $13. (See Vouchers T and B, herewith filed)	13.00
Paid the law firm of Andrews & Thornburgh, of Knoxville, for legal services in defending me before the Federal court from the filing the petition to remove the case from the State court to the Federal court at Knoxville to my acquittal and discharge, January 22, 1884, the sum of $250. (See Voucher R, herewith filed)	250.00
Paid P. P. Hensley, a witness on my behalf, his mileage and attendance at the Federal court at its special May term, 1882, May 22 to the 24th, inclusive, three days and mileage, 184 miles; in all, $13.70. (See Vouchers S and B, herewith filed)	13.70
Wishing to consult with his honor, J. M. Meek, late Federal district attorney, and learning his was (*sic*) a Tates Springs, Granger County, I hired a horse and rode over to see him, April 24, 1890. He directed me to come to Knoxville April 26, 1890, as he wished to look up the records in the case, and bring my accounts and vouchers with me. I paid $1 for the use of the horse and 50 cents for my own and the horse's dinner	1.50
Went to Knoxville, April 26, 1890, to submit my accounts and vouchers and confer with Mr. Meek, as his certificate was required by the letter of March 6, 1890. My actual expenses were railroad fare both ways, $2.50, and board one day, $1; in all, $3.50	3.50
Went to confer in person with his honor, T. H. Reeves, late marshal, at his home at Jonesborough, Tenn., as his certificate was required by the letter of March 6, 1890. Went May 1 and returned May 2, 1890. My actual expenses were railroad fare both ways $3.40, and one meal at hotel, 25 cents; in all, $3.65	3.65
Went to Hawkins County on horse-back from Morristown to procure vouchers from C. C. Spears and the witnesses living in that county, who attended the Federal court in my behalf, all of whom I had paid, and was so engaged March 26, 27, 28, 29, and 30, 1890, five days. Use of horse five days, at $1 per day, $5; board for self and horse at hotel at Rogersville, $2.25; in all, $7.25	7.25
Paid James Nugent, clerk of the county courts of Hawkins County, for certificate and seal to two vouchers, that of C. C. Spears and S. Barret, 25 cents each	50
Paid Frank Lafferty, notary public at Morristown, for certificate and seal to S. B. Noe's voucher	25
Amount of actual expense incurred in my defense	692.55

I was suspended from office from October 1, 1881, to January 22, 1884, a period embracing eight hundred and forty-four days, and I can safely state, without being able to specify the exact days by name, for I was overwhelmed with too much trouble to think of keeping an exact account day by day, that six hundred and forty-one days of the eight hundred and forty-four, and, perhaps, even more, were energetically employed in the fearful single-handed contest to defend not only my liberty but even my own life, for it was a life-and death struggle up to the July term 1883, from the fearful odds brought to bear against me. And yet I had done nothing to deserve any man's reproach, much less to merit his condemnation. But it

was an event in the Providence of God that no man could lament and deplore more than I did myself. Placing my compensation, therefore, for the above specified time, at the lowest rate provided by the statutes, while engaged in the effort to make an arrest, whether any arrest is made or not, which was at the rate of $2 per day, I present this item with confidence to the candid consideration and just revied (*sic*) of the Department of Justice of the United States and ask that I may be compensated for these six hundred and forty-one days, while engaged in this defense and submit the question in the nature of an account which, at the rate of $2 per day, would be.....$1,284.00

It would have been utterly useless to have submitted the questions embraced in the foregoing account for consideration and adjudication under the late administration of his excellency President Cleveland. Hence the matter of presentation was delayed until the coming in of a juster and fairer administration of the Government of the United States.

G. T. LARKIN,
Late Deputy United States Marshal.

Address Morristown, Tenn.

Personally appeared before me, the undersigned authority, George T. Larkin, whose name is appended to the foregoing account, who is a citizen of Hamblen County, Tenn., a person well known to me, a man worthy of credit on oath, who was a deputy United States marshal, and who makes oath in due form of law that the items set forth in the foregoing account, dependent upon his own personal statements, as well as those supported by the vouchers therewith filed, are true; and that the item of six hundred and forty-one days out of the eight hundred and forty-four days of his suspension was the time actually employed in the making of his defense to an unfounded charge, in which the dignity and authority of the United States was called in question, and his own life, liberty, and reputation impeached.

Given under my hand and seal at Morristown, Hamblen County, Tenn., this —— day of May, A. D. 1890, and of the Independence of the United States the one hundred and twenty-fourth year.

Subscribed and sworn to before me this the 8th day of May, 1890.

G. L. OGDEN,
U. S. Commissioner.

UNITED STATES OF AMERICA, *Eastern district of Tennessee, ss:*

I, H. H. Taylor, clerk of the United States circuit court for said district, do hereby certify that in the case of The State of Tennessee *vs.* George T. Larkin, charged with murder, the following proceedings were had and entered of record, to wit:

January term, 1882.

1882.
Jan. 10. Motion entered to dismiss petition for removal of cause from State court.
Jan. 19. Motion to remand cause to State court overruled.
Jan. 22. Motion made by defendant for a continuance.
May 23. Jury called and respited; motion for a continuance overruled.
May 24. Jury respited.
May 25. Verdict of guilty. Motion for a new trial entered.
May 26. Motion for new trial continued.

July term, 1882.

July 10. Motion for new trial granted and case continued by consent.
July 11. Attachment ordered for witness.

January term, 1883.

1883.
Jan. 9. Case continued by the State of Tennessee.
July 17. Case continued by defendant.
July 17. Witness fees on behalf of prosecution ordered paid by the marshal at expense of the United States.

January term, 1884.

1884.
Jan. 7. Jury respited.
Jan. 18. Jury respited.
Jan. 19. Jury respited.
Jan. 21. Jury respited.
Jan. 22. Verdict of not guilty. Defendant discharged, and ordered that the costs in behalf of the State of Tennessee be taxed and certified for allowance, as provided by law.

As shown by the records in my office. Witness my hand and official seal this April 4, 1890.

[SEAL.]

H. H TAYLOR, *Clerk*,
By J. T. CARTER, *Deputy Clerk*.

(Indorsement:) State of Tennessee *vs.* George T. Larkin. Memorandum from the records. Exhibit A. Clerk's fees, $1.15, paid by George T. Larkin, April 4, 1890. J. T. Carter, deputy clerk.

H. H. TAYLOR, *Clerk*,
By J. T. CARTER, *Deputy Clerk*.

STATE OF TENNESSEE, *Hawkins County:*

This day personally appeared before me, the undersigned authority, C. C. Spears, a citizen of the county and State aforesaid, who makes oath and says, that he was the clerk of the circuit court of Hawkins County, Tenn., from October 1, 1878, until September 1, 1886; that while he was clerk of said court, one George T. Larkin, a deputy marshal of the United States, was therein indicted for murder in the first degree, for the murder of one Arthur Larkins, a citizen of the county aforesaid, whom he, as said deputy marshal, was attempting to arrest under process from the United States circuit court at Knoxville, Tenn. Said Larkins was indicted in the circuit court for Hawkins County, Tenn., at its September term, 1881, and the case was transfered from said State court to the United States circuit court at Knoxsville, Tenn., at its January term, 1882; that the costs which accrued to him as said clerk, while said prosecution was pending against said Larkins in said circuit court of Hawkins County, Tenn., amounted to the sum of $11.50. This includes my fees for making out a transcript of the record from my court and for my mileage and attendance one day as a witness before the Federal Court at Knoxville, Tenn., July 17, 1883. Larkins was arrested on a justice's warrant June 15, 1881, brought to Rogersville, Hawkins County, Tenn. The papers were returned before J. H. Spears, justice of the peace for said county, and before whom he was tried, as an examining court June 17, 1881. Said justice bound him to the September term of the circuit court for Hawkins County, Tenn., next following, but admitted him to bail. To keep from going to jail he had to go to Morristown, Hamblen County, Tenn., to get bail, and I agreed to go with him if my expenses were paid, which was $2.80. This was paid. I went with him, and with others went on his bond for his appearance at the September term of the circuit court for Hawkins County as aforesaid. And this with the costs aforesaid, amounting to the sum of $14.30 was paid me by said Larkins. Said Larkins was arrested on indictment aforesaid and thrown into the county jail at Rogersville, Tenn., where he remained until admitted to bail by Judge Newton Hacker on habeas corpus.

Sworn to and subscribed before me and in my presence this 29th day of March, A. D., 1890, and of the declaration of American Independence the one hundred and twenty-third year.

C. C. SPEARS.

[SEAL.] JAMES NUGENT,
Clerk of County Court.

STATE OF TENNESSEE, *County of Hamblen:*

This day personally appeared before, the undersigned authority with and for said county, ——— ———, personally known to me to be respectable and entitled to credit, and also being duly sworn according to law, deposes and says, that he was a witness for defendant G. T. Larkin in the case of the State of Tennessee *vs.* G. T. Larkin, charge, murder, transferred from the State court to the Federal court at Knoxville, Tenn., and there tried and acquitted at January term, 1884. That he attended as a witness at May 23 and 24 term, etc. That his attendance and mileage amounted to $8.20, which has been paid to me by the said G. T. Larkin.

Sworn to and subscribed before me this 12th day of March, 1890.

S. B. NOE,
Ex-United States Commissioner.

[SEAL.] J. F. LAFFERTY,
Notary Public.

ROGERSVILLE, *Tenn., March* 29, 1890.

DEAR SIR: At the request of George T. Larkin I write to state that, in June, 1881, the law firm of McDermott & Kyle, of which I was then a member, was employed by him to make his defense to a charge of murder brought against him by warrant before a justice of the peace for this (Hawkins) county, Tenn. On the trial before the justice, he was held to appear at the circuit court of this county to answer an indictment for murder, but was admitted to bail meanwhile.

For our services in his defense before the justice he paid us the sum of $15 on the 18th day of June, 1881. We were also employed to conduct his defense in the circuit court, for which services he agreed to pay us a fee of $50.

We represented him in the circuit court and had him admitted to bail and the case continued the first trial term, until it could be transferred by petition to the United States circuit court at Knoxville, Tenn., which was finally done and the case tried there, resulting in his acquittal.

On the fee of $50 agreed upon for services in the circuit court of this county, he paid us $15 October 1, 1881, and $20 October, 8, 1881, leaving a balance of $15, for which he afterwards executed to us his note.

Very truly yours,

H. G. KYLE.

Hon. W. H. H. MILLER,
Attorney-General United States, Washington, D. C.

STATE OF TENNESSEE, *Hawkins County:*

In the case of the late deputy marshal for the eastern division of Tennessee, in the circuit court of the United States, at Knoxville, Tenn., personally appeared before the undersigned authority Mariah Fletcher, a citizen of the county and State aforesaid, deposes on oath and says, that she attended as a witness in the foregoing case in behalf of the defendant, George T. Larkins, at the Federal court aforesaid at Knoxville, May the 22, 23, and 24, 1882, and July 17, 1883, being two mileages of 200 miles each and four days attendance on said court, making the sum of $26 in all, for which said Larkins paid me in full.

Sworn to and subscribed before me and in my presence this 28th day of March A. D. 1890, and of the Independence of the United States the one hundred and twenty-third year.

MARIAH FLETCHER.
S. BARRETT, *J. P.*

STATE OF TENNESSEE, *Hawkins County, ss:*

I, James Nugent, clerk of the county court within and for the county and State aforesaid, do hereby certify that S. Barrett, esq., was, on the 28th day of March, 1890, and is now an acting justice of the peace within and for the county and State above given, duly commissioned, qualified and sworn; and that all his official acts as such

are entitled to full faith and credit; and that his signature to the annexed instrument is genuine.

Given under my hand and official seal, at office, in Rogersville, this 29th day of March, A. D. 1890.

JAMES NUGENT, *Clerk.*

STATE OF TENNESSEE, *Hamblen County:*

This day came before the undersigned authority, David Rhea, and makes oath in due form of law that G. T. Larkin, who was indicted and tried and acquitted in federal court at Knoxville, Tenn., at January term, 1884, on the charge of murder, paid $6 to Rhea & Trallinger, of Whitesberg, Tenn., for livery hire for hack for defendant's witness, to have (*sic*) them from Hawkins County, Tenn., and Scott County, Va., to the railroad. This was before he was tried and acquitted; it was at May term of court, 1882. Affiant was a partner of Rhea & Trallinger at the time this was done and the hack hire paid by said Larkins. Affiant swears the fact that said Larkins paid the driver Ed. Oaks of said hack for his services $2, not included in the above amount of $6.

DAVID RHEA.

Sworn to and subscribed before me March 19, 1890.

Notary Public for Hawkins County, Tenn.

STATE OF TENNESSEE }
vs.
GEORGE T. LARKIN. }

Personally appeared before me, the undersigned authority, and makes oath in due form of law and says that I went from Knoxville, Tenn., to Morristown, Tenn., for the purpose of going on the bond of George T. Larkins, who was indicted in the State court for murder on the 4th day of October, 1881, and met R. L. Blevins, sheriff of Hawkins, and went on said Larkin's bond, and my expenses was $3.25, and said Larkin paid the same.

S. P. EVANS.

Sworn and subscribed to before me, a notary public in and for said county and State, on this 28th day of April, 1890.
[SEAL.]

E. P. KING,
Notary Public.

KNOXVILLE, TENN., *April* 26, 1890.

To whom it may concern:

The firm of Andrews & Thornburgh were attorneys for George T. Larkin in the case of The State of Tennessee *vs.* George T. Larkin, murder, removed from the State court in Hawkins County to the United States circuit court at Knoxville, Tenn., tried and acquitted. The killing occurred while George T. Larkin, then a United States deputy marshal, was attempting to make an arrest under United States process. We were only counsel for defendant in the United States court; we charged him only about one-half a fee for our services, owing to his poverty, and the conditions United States officers were subjected to in making arrest under the revised laws in many parts of East Tennessee at that time; our charge against him for fee was $250, which, on the 19th day of September, 1882, he paid in full.

J. M. THORNBURGH,
Surviving Partner.

STATE OF TENNESSEE, *Knox County*:

Personally appeared before me, the undersigned authority, J. M. Thornburgh, with whom I am personally acquainted, and makes oath in due form of law that the matters set forth in the above statement are true to the best of his knowledge and belief.

J. M. THORNBURGH.

Sworn and subscribed before me this April the 26, 1390.
[SEAL.]

SAM. P. FOWLER,
Notary Public.

STATE OF TENNESSEE, *County of Greene:*

Personally came John Fain, of the county of ——, and makes oath in due form of law, that he was the State's attorney of the first judicial district for the State of Tennessee, and having in his circuit the county of Hawkins, where the indictment of G. T. Larkins, deputy United States marshal for the eastern district of Tennessee, charging him of murder while attempting to arrest one Arthur Larkins, of said county, at the September term, 1881, of the circuit court of Hawkins County, in discharge of his official business as deputy United States marshal. He was afterwards removed to the United States circuit court for the eastern district of Tennessee at Knoxville, Tenn., where he was tried and acquitted, and there being no grounds for suspension from his office by reason of said indictment in the State's circuit court of Tennessee so far as affiant understands. At that time the prejudice of the people against said Deputy United States Marshal Larkins was very strong, and may have been one of the reasons of his indictment; and when removed from said State's court he had no further connection in the matter, nor did he prosecute any claims whatever.

JOHN FAIN.

Sworn to and subscribed before me this the 16th day of April, 1890.
[SEAL.]

J. K. P. HALL,
Commissioner.

I have read the foregoing affidavit of Ex-Attorney Fain and fully approve what he states. I was judge of the first judicial circuit of Tennessee when George T. Larkins was indicted in the State court on the charge referred to. I admitted him to bail under a habeas corpus proceedings, and I believe the claim of Mr. Larkins ought to be paid.

May 3, 1890.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. Doc. No. 404.

LETTER

FROM

THE ATTORNEY-GENERAL,

REQUESTING

That provision be made for the employment of counsel, etc., in the prosecution of a suit in behalf of the United States against the State of Texas.

MAY 29, 1890.—Referred to the Committee on Appropriations.

DEPARTMENT OF JUSTICE,
Washington, D. C., May 28, 1890.

SIR: I beg to call your attention to the fact that by the twenty-fifth section of the act for the temporary government of Oklahoma the Attorney-General of the United States is directed to commence and prosecute a suit, in behalf of the United States, in the Supreme Court against the State of Texas for the purpose of settling the title to Greer County. This section seems to contemplate that this shall be done as speedily as possible. The case is one of very great importance and will require the undivided attention of a good lawyer for a considerable period. With the force at my disposal in the Department such speedy and continuous attention can not be given to the matter as its urgency and importance demand. It is quite doubtful whether, under the general statutes, the Attorney-General has the authority to appoint a special assistant for services in the Supreme Court, as section 363 Revised Statutes limits such appointments to assistants to the district attorneys. At least, it is not clear that such authority exists under the general statutes.

I therefore suggest that either by joint resolution, or by some appropriate legislation, provision be made not only for the employment of counsel, but for the payment of other necessary expenses in this matter. For instance, one item of such necessary expenses will be the compensation of a master and stenographer in taking testimony.

Respectfully, yours,

W. H. H. MILLER,
Attorney-General.

Hon. THOMAS B. REED,
Speaker of the House of Representatives.

INDIAN APPROPRIATION BILL.

LETTER

FROM

THE SECRETARY OF THE INTERIOR,

INCLOSING

A copy of a communication from the Commissioner of Indian Affairs, inviting attention to the necessity for the early passage of the Indian Appropriation Bill.

JUNE 3, 1890.—Referred to the Committee on Indian Affairs.

DEPARTMENT OF THE INTERIOR,
Washington, June 3, 1890.

SIR: I have the honor to transmit herewith copy of a communication of 2d instant from the Commissioner of Indian Affairs, inviting attention to the necessity for the early passage of the Indian Appropriation bill.

The Commissioner states that unless the bill becomes a law within the next two weeks, his office will be seriously embarrassed in supplying the Indians of the different agencies with food, and he recommends that a clause be inserted in the bill, authorizing the purchase in open market of supplies required, until contracts for the fiscal year ending June 30, 1891, are executed and approved and contractors have had time to bring supplies to the agencies (say for thirty days after the approval of the Indian Appropriation Act) to an amount not exceeding $10,000 at any one time.

A form of the proposed clause is herewith transmitted.

Very respectfully,

JOHN W. NOBLE,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, D. C., June 2, 1890.

SIR: I have the honor to invite your attention to the fact that so far the Indian appropriation bill has not been introduced into the House, and that unless this is done and the bill becomes a law within the next two weeks, this office will be seriously embarrassed in supplying the Indians of the different agencies with food.

The supply of beef, flour, sugar, coffee, etc., and especially the beef, will be entirely exhausted, and as no contracts can be made and executed until the Indian appropriation act has been signed by the President and becomes a law, it will be difficult to supply the large agencies with beef in open market during the month of July, even if the act is signed by the President not later than June 15.

For example, take the Pine Ridge and Rosebud Agencies, where beef is issued every two weeks. It takes 250,000 pounds of beef for a two weeks' issue at Rosebud, costing about $7,500, and 150,000 pounds, costing about $4,500, at Pine Ridge. The law allows only purchases in open market at any one time to an amount not exceeding $3,000, hence the difficulty of supplying these agencies with beef until contracts are made and executed, and contractors have had time to bring cattle to the agencies.

In order to provide for this contingency, I would recommend that Congress be called upon to insert in the Indian appropriation bill a clause, authorizing the purchase in open market of supplies required, until contracts for the fiscal year ending June 30, 1891, are executed and approved, and contractors have had time to bring supplies to the agencies (say for thirty days after approval of the Indian appropriation act) to an amount not exceeding $10,000 at any one time.

I inclose a form of the proposed clause to be incorporated in the Indian appropriation bill.

Very respectfully,

R. V. BELT,
Acting Commissioner.

The SECRETARY OF THE INTERIOR.

PROPOSED CLAUSE TO BE INSERTED IN THE INDIAN APPROPRIATION BILL.

That the Secretary of the Interior is authorized and directed for the period of thirty days, after the approval of the act making appropriations for the Indian service for the fiscal year ending June thirtieth, eighteen hundred and ninety one, to purchase in open market supplies required for the Indian service for the said fiscal year, or until contracts are executed and approved and contractors have had time to deliver supplies to the several agencies, to an amount not exceeding ten thousand dollars at any one time.

ESTIMATE OF APPROPRIATIONS TO COMPLETE WORK OF THE INTERNATIONAL AMERICAN CONGRESS.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A communication from the Secretary of State, submitting estimates of appropriations to complete the work of the International American Conference.

JUNE 4, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT, *June* 3, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, a communication from the Secretary of State of the 24th instant, submitting estimates of appropriations to complete the work of the International American Conference.

Respectfully yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF STATE,
Washington, D. C., May 24, 1890.

SIR: I have the honor to submit herewith an estimate of the appropriation required to complete the work and carry into effect the recommendations of the International American Conference for the fiscal year ending June 30, 1891, with the request that you will transmit the same to the Senate and House of Representatives.

The Conference, by the unanimous vote of the eighteen nations represented, recommended—

(1) That an International American Monetary Union be established.

(2) That as a basis for this union an international coin or coins be issued, which shall be uniform in weight and fineness, and which may be used in all the countries represented in this Conference.

(3) That to give full effect to this recommendation, there shall meet in Washington a commission composed of one delegate or more from each nation represented in this Conference, which shall consider the quantity, the kind of currency, the uses it shall have, and the value and proportion of the international silver coin or coins, and their relations to gold.

(4) That the Government of the United States shall invite the commission to meet in Washington within a year, to be counted from the date of the adjournment of this Conference.

If Congress shall authorize such invitation to be issued, it will be necessary for the President to appoint one or more delegates to represent the Government of the United States, and for Congress to make the necessary appropriation to meet the expenses, for which it is estimated that $15,000 will be required.

The Conference, also by unanimous vote, recommended the appointment of a commission, to be composed of not more than three representatives from each of the seventeen American Republics, under whose direction is to be made a survey for an intercontinental line of railway to connect the railway system of North America with that of South America. The right of way of the proposed railroad is to be declared forever neutral territory; its property is never to be subjected to taxation, and the co-operation of all the nations is pledged to its protection. The salaries of the commissioners and the expenses of the survey are to be paid from a common fund, to be raised by the assessment of each of the nations interested in proportion to their respective populations; the headquarters of the commissioners are to be in Washington, and it is the hope that they may be able to meet at this capital for the purpose of organization on the 1st of October next, or soon thereafter.

It will, therefore, be necessary for the President to appoint three members of such commission, and for Congress to make the necessary appropriation for the share of the expense to be borne by the United States, which, it is estimated, will amount to $65,000.

The Conference also, by a unanimous vote, recommended the establishment at Washington, under the supervision of the Secretary of State, of "The International Union of American Republics for the Prompt Collection and Distribution of Commercial Information." A detailed description of its organization, operation, and objects will be found in the report of the Committee on Customs Regulations, as adopted by the Conference. The expense of organizing and maintaining such a union is to be borne in common by all the Republics of America, in proportion to their populations, and is estimated at $36,000 annually; to be collected and disbursed under the direction of the Secretary of State, as provided by articles 12 and 13 of the report above mentioned.

The Conference also, by a unanimous vote, recommended, for the convenience of merchants engaged in trade between the United States and the other Republics of America, the capitulation of a uniform nomenclature for articles of merchandise exported and imported, and its publication in the English, Spanish, and Portuguese languages. The expense of this compilation, which will be made under the direction of the Secretary of State, in connection with the International Union of American Republics above mentioned, is estimated at $10,000.

The Conference also, by unanimous vote, adopted the following resolution:

Resolved, That there be established, at such location in the city of Washington as the Government of the United States may designate, to commemorate the meeting of the International American Conference, a Latin American Memorial Library, to be formed of contributions from all the Goverments represented in this Conference, wherein shall be collected all the historical, geographical, and literary works, maps, manuscripts, and official documents relating to the history and civilization of America; such library to be solemnly dedicated on the day on which the United States celebrates the fourth centennial of the discovery of America.

It will be necessary to provide a suitable building in a convenient locality for the reception and protection of the proposed library, and it should be so arranged as to furnish accommodations for assemblages similar to the Conference that has just adjourned.

Temporary quarters may be found at the offices provided for the pro-

posed Bureau of Information, but a permanent structure of appropriate design and dimensions, to cost not exceeding $250,000, should be either purchased or erected for dedication on the 14th of October, 1892.

It is estimated that the cost of printing the proceedings and reports of the International American Conference, and their distribution to the public, as provided for by the Conference, will be $25,000; the cost of completing the unfinished work of the Conference, including the salaries of translators, copyists, clerks, etc., is estimated at $15,000, and for office rent, stationery, postage, fuel, lights, and other miscellaneous expenses, $9,500 will be required.

I am, sir, your obedient servant,

JAMES G. BLAINE.

The SECRETARY OF THE TREASURY.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. Doc. No. 408.

LIGHT-HOUSE AT LUBEC NARROWS, MAINE.

LETTER

FROM

THE ACTING SECRETARY OF THE TREASURY,

CALLING

Attention to the necessity for an appropriation of fifteen thousand five-hundred dollars, for the completion of the Lubec Narrows, Maine, light-house.

JUNE 6, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT, *June* 5, 1890.

SIR: The Light-House Board, at its session of June 2, 1890, has asked that I should call the attention of the Committee on Appropriations to a letter of January 9, 1890, addressed to the Department, calling attention to the urgent necessity for an appropriation of $15,500, for the completion of the Lubec Narrows, Maine, light-house.

If money is not provided for this purpose at the present session of Congress, it is probable that there will be great loss to the Government through the destruction of the iron cylinder, now sunk and in progress of completion, during the coming winter. If the money is provided at an early day the cylinder may be filled and be safe from probable destruction.

A copy of the letter referred to of January 9, 1890, as printed in House of Representatives Document No. 97 is herewith inclosed; also a copy of the Board's letter to the Department, dated March 6, 1890.

Respectfully yours,

GEO. C. TICHENOR,
Acting Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

TREASURY DEPARTMENT,
OFFICE OF THE LIGHT-HOUSE BOARD,
Washington, March 6, 1890.

SIR: The Light-House Board has the honor to state that by its letter to the Department of January 9, 1890, request was made that an additional appropriation of $15,500 be recommended for completing the light-house and fog-signal at Lubec Narrows, Maine, and that it be in-

cluded in the urgent deficiency bill, the reasons rendering this additional appropriation necessary being stated.

On February 18 ,1890, a telegram was received by the Board from the Committee on Appropriations of the House of Representatives asking whether the contractors were not liable for the loss mentioned in House Ex. Doc. 97.

In response the Board has the honor to submit the inclosed copy of a report from the engineer of the first light-house district, dated Boston, Mass., March 4, 1890.

The Board heretofore, and before making recommendation, fully considered this subject, and at its session held on March 3, 1890, reviewed its judgment.

In the judgment of the Board, the contractors are not responsible for the untoward results following their efforts to place the iron cylinder, but considers it a casualty less than what would probably have happened in the sinking or overturning of the structure, had not the upheaval betrayed the treacherous ground underlying the clay.

A copy of the specifications for the work is also inclosed.

Respectfully,

JAMES F. GREGORY,
Major of Engineers, U. S. Army, Engineer Secretary.

The SECRETARY OF THE TREASURY.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 409.

SURVEY OF PUBLIC LANDS IN MONTANA.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A copy of a communication from the Secretary of the Interior of the 7th instant, submitting an increase in the estimate of appropriation for surveying the public lands for the fiscal year ending June 30, 1891, in the sum of $60,000, to be applied to expenses of surveys of public lands in Montana.

JUNE 10, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
June 10, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of a communication from the Secretary of the Interior of the 7th instant, submitting an increase in the estimate of appropriation for surveying the public lands for the fiscal year ending June 30, 1891, in the sum of $60,000, to be applied to expenses of surveys of public lands in Montana.

Respectfully, yours,

W. WINDOM,
Secretary.

DEPARTMENT OF THE INTERIOR,
Washington, June 7, 1890.

SIR: I have the honor to herewith submit a supplemental estimate of appropriation of $60,000 for "Surveying the public lands" during the ensuing fiscal year.

This proposed increase in the estimate heretofore submitted, if appropriated, is to be applied to expenses of surveys of public lands in Montana.

The matter is submitted for the favorable action of Congress.

Very respectfully,

JOHN W. NOBLE,
Secretary.

The SECRETARY OF THE TREASURY.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., June 4, 1890.

SIR: I have before me by your reference a letter addressed to you by the Hon. T. C. Power, United States Senate, asking for an additional appropriation for surveys of public lands in Montana for the coming fiscal year, and after a careful consideration of the question suggested by him and after a consultation with the chief of the surveying division, I have become satisfied that $60,000 can be judiciously and successfully used for surveys in that State during the next fiscal year. Beyond question keeping unsurveyed so large a body of land in that State retards its settlement and improvement, and I believe it to be a sound public policy to facilitate the survey in that portion of the country as rapidly as possible. I have therefore the honor to recommend that the sum of $60,000, at least, be appropriated for the survey of public lands in the State of Montana.

The estimate heretofore made for Montana was far below the amount that we deemed really sufficient for that purpose, but we put it at $25,000, fearing that we could not induce Congress to appropriate a larger sum. This same remark will apply to other Western States as well as to Montana, and my deliberate opinion is that the surveys of the public domain are being too much retarded by inadequate appropriations, and that this error should be corrected as soon as possible. Letter of Hon. T. C. Power herewith returned.

Very respectfully,

W. M. STONE,
Acting Commissioner.

The SECRETARY OF THE INTERIOR.

Estimate of appropriation required for the service of the fiscal year ending June 30, 1891, by the General Land Office.

Surveying the public lands:

Surveys and re-surveys of public lands in Montana, $60,000, at rates not exceeding $9 per linear mile for standard and meander lines, $7 for township, and $5 for section lines, except that the Commissioner of the General Land Office may allow for the survey of lands heavily timbered, mountainous, or covered with dense undergrowth, rates not exceeding $13 per linear mile for standard and meander lines, $11 for township, and $7 for section lines, or if in case of exceptional difficulties in the surveys, the work can not be contracted for at these rates, compensation for surveys and re-surveys may be made by the said Commissioner at rates not exceeding $18 per linear mile, for standard and meander lines, $15 for township, and $12 for section lines. (R. S., page 390, sec. 2223; appropriated, vol. 25, page 959, sec. 1) $60,000.00

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 411.

UNITED STATES DISTRICT CLERK'S OFFICE AT SIOUX CITY, IOWA.

LETTER

FROM

THE ATTORNEY-GENERAL,

TRANSMITTING

A copy of a letter from the marshal of the northern district of Iowa respecting the renting of an office at Sioux City, Iowa, for the United States district clerk at that place.

JUNE 11, 1890.—Referred to the Committee on Expenditures in the Department of Justice.

DEPARTMENT OF JUSTICE,
Washington, D. C., June 9, 1890.

SIR: Inclosed is a copy of a letter of the 8th ultimo from the marshal for the northern district of Iowa respecting the renting of an office at Sioux City for the United States district clerk at that place.

The act "to divide the State of Iowa into two judicial districts," approved July 20, 1882, provides for the holding of terms in the northern district in three divisions, and adds that—

> The additional courts at the places in the several divisions named in this act shall be held in buildings provided for that purpose without expense to the United States

Under this legislation the authorities of Sioux City, Iowa, have furnished accommodations for the United States courts and officers; but owing to the rapid growth of the city the public business transacted by its authorities requires the use of all its rooms for their own officers continuously, so that there is really no accommodation adequate to the needs of the Government officers.

Similar legislation formerly was attached to the act creating courts of the United States at Jackson, Tenn.; but paragraph 13 of chapter 182, section 1, act of March 3, 1879, repealed so much of the original act as required "the authorities of the county of Madison, or town of Jackson, Tenn., to provide suitable buildings free of all expense to the United States, for holding United States district and circuit courts."

It is represented to the Department that a necessity exists for its renting accommodations for the United States courts at Sioux City, Iowa, until such time as Congress shall provide a public building at that place. The Department does not feel itself at liberty to incur such rent under existing legislation.

If Congress shall see fit to release the public authorities of Sioux City from its obligations under existing law, as it released the public authorities of Jackson, Tenn., the way will be open for the Department to secure accommodations at Sioux City.

Respectfully,

W. H. H. MILLER,
Attorney-General.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

SIOUX CITY, IOWA, *May* 8, 1890.

SIR: Herewith I inclose a certified copy of an order made by the circuit court for northern district of Iowa, directing that a suitable office for the clerk be provided at Sioux City, accompanied by the request of the clerk that the order be complied with at an early day.

I am conversant with the situation at Sioux City and know that the clerk does not overstate the necessity.

In anticipation of inquiries that may be made by the Department, I would say that I am advised a suite of three rooms, with water, light, heat, janitor service, and suitably furnished, can be obtained within a block of the county court-house for $25 per month. These rooms are centrally located in a building now occupied by a number of attorneys, and I think would be suitable.

Will you give this matter early attention, and give me the necessary instructions to carry into effect the said order?

I am, sir, very respectfully,

EDWARD KNOTT,
United States Marshal.

Hon. ATTORNEY GENERAL,
Washington, D. C.

SIOUX CITY, IOWA, *May* 7, 1890.

SIR: I hand you herewith certified copy of order of the circuit court for the northern district of Iowa, directing that a suitable office for the clerk be provided at Sioux City.

There is a great and pressing necessity for an office for the clerk, to be under his exclusive control. Much confusion arises from joint use of office in the court-house with the clerk of the State court, and there is no sufficient room there for keeping the Federal records.

I trust you will at once take steps to carry out the order of the court.

I am, sir, very respectfully,

A. J. VAN DUZEE,
Clerk.

Hon. EDWARD KNOTT,
United States Marshal, Northern District of Iowa.

SIOUX CITY, IOWA, *April* 12, 1890.

Orders is hereby given to have the room at present used by J. H. Bolton as deputy clerk of United States district court of the northern district of Iowa in the county court-house vacated.

W. W. MCELRATH,
Chairman Board of Supervisors, Woodbury County, Iowa.

I hereby certify the above to be a true and correct copy of the proceedings of the board of supervisors of Woodbury County, Iowa, at their April session, A. D. 1890.

J. J. JORDAN,
Auditor Woodbury County, Iowa.

UNITED STATES CIRCUIT COURT NORTHERN DISTRICT OF IOWA.

Be it remembered that at a regular term of the United States circuit court for the western division of the northern district of Iowa, begun and held at Sioux City, Iowa, on the 6th day of May, A. D. 1890, there were present the Hon. O. P. Shiras,

judge, presiding, Edward Knott, United States marshal, and A. J. Van Duzee, clerk of said court, and thereupon the following among other proceedings were had, to wit:

In the matter of providing a suitable office for the clerk of this court.

ORDER.

It appearing to the court that the State courts use and occupy the county court-house at Sioux City, Iowa, a large part of the year, and that there are no rooms in said court-house that can be set apart for the exclusive use of the clerk of this court and for the safe-keeping of its records, that the vaults in said court-house are insufficient for the proper and safe storage and keeping of both the records of the State courts and of this court.

It is now, therefore, hereby ordered that the marshal be, and he is hereby, directed to lease and procure in Sioux City, Iowa, outside of the court-house, a good and sufficient office for the clerk of this court for the proper dispatch of the public business and the safe-keeping of the court records.

Read, approved, and signed in open court.

O. P. SHIRAS,
Judge.

In the circuit court of the United States for the northern district of Iowa.

I, A. J. Van Duzee, clerk of said court for said district, do hereby certify that the foregoing transcript contains a full, true, and complete copy of the order of the circuit court of the United States for the northern district of Iowa "in the matter of providing a suitable office for the clerk of this court." As full, true, and complete as the original of the same now remain on file and of record in my office.

In testimony whereof I hereunto subscribe my name and affix the seal of said court at my office in Sioux City, in said district, this 7th day of May, A. D. 1890.

[SEAL.] A. J. VAN DUZEE,
Clerk United States Circuit Court Northern District of Iowa,
By J. H. BOLTON,
Deputy.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 412.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

REQUESTING

An appropriation of $8,000 *for the United States post-office, court-house, etc., building at Wichita, Kans., for heating apparatus, elevator, and the completion of the building.*

JUNE 11, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., June 9, 1890.

SIR: I have the honor to request that an appropriation of $8,000 be made for the United States post-office, court-house, etc., building at Wichita, Kans., that the heating apparatus may be placed, an elevator provided, and the building completed.

Respectfully, yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

O

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 413.

STATE CLAIMS.

LETTER

FROM THE

ACTING SECRETARY OF THE TREASURY

TRANSMITTING

The report of he Third Auditor and Second Comptroller, making allowances to the State of Massachusetts of $26,228.44, *and the State of Pennsylvania of* $7,546.83, *on account of "refunding to States expenses incurred in raising volunteers," and to the State of Texas* $148,615.97, *on account of "re-imbursement to certain States and Territories for expenses incurred in repelling invasions and suppressing Indian hostilities."*

JUNE 12, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
June 12, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress the report of the Third Auditor and Second Comptroller, making allowances upon the following State claims:

On account of "refunding to States expenses incurred in raising volunteers," viz: State of Massachusetts, $26,228.44, State of Pennsylvania, $7,546.83; on account of "re-imbursement to certain States and Territories for expenses incurred in repelling invasions and suppressing Indian hostilities," viz: State of Texas, $148,615.97.

Respecttully, yours,

GEO. S. BATCHELLER,
Acting Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

TREASURY DEPARTMENT,
THIRD AUDITOR'S OFFICE,
Washington, D. C., June 11, 1890.

SIR: I have the honor to report that, since the date of the last preceding list of certified claims, transmitted to the Secretary of War, January 13, 1890, the Second Comptroller has made the following allowances upon State war claims, viz:

Massachusetts (act July 27, 1861)	$26,228.44
Pennsylvania (act July 27, 1861)	7,546.83
Texas (act June 27, 1882)	148,615.97

(Vide list herewith).

Respectfully, yours,

W. H. HART,
Auditor.

Hon. WM. WINDOM,
Secretary of the Treasury.

TREASURY DEPARTMENT,
SECOND COMPTROLLER'S OFFICE,
Washington, D. C., June 4, 1890.

SIR: I have the honor to transmit herewith, for your consideration, in obedience to the provisions of an act of Congress approved June 27, 1882 (23 Stats., 111), the papers, abstracts, vouchers, and evidence filed with the claim of the State of Texas against the United States for expenses incurred in repressing Indian and Mexican invasions, to the end that said claim, together with all papers, abstracts, vouchers, and evidence may be by you reported to Congress for its final action as in said act required.

I further report to you, as the result of my examination and investigation of said claim, that the State of Texas expended $148,615.97.

Respectfully, yours,

B. F. GILKESON,
Comptroller.

Hon. WILLIAM WINDOM,
Secretary of the Treasury.

EXPENSES OF UNITED STATES COURTS.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A copy of a communication from the Attorney-General, submitting estimates of deficiencies in appropriations on account of expenses of United States courts.

JUNE 12, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT, *June* 11, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of a communication from the Attorney-General of the 9th instant, submitting estimates of deficiencies in appropriations on account of expenses of United States courts, as follows:

Special compensation of district attorneys, 1884	$2,000
Pay of special assistant attorneys, 1890	1,050
Pay of special assistant attorneys, 1889	1,000
Pay of special assistant attorneys, 1888	450
Rent of court rooms, 1886	110

Respectfully, yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF JUSTICE,
Washington, D. C., June 9, 1890.

SIR: I have the honor to send you, for presentation to Congress, the following accounts for legal services performed in the interest of the Government, for which there is no existing appropriation; also a rent account for 1886:

1888, 1890. To compensate L. F. Coburn, special assistant to the United States attorney for northern district of California, for services in case of J. McKenzie and R. D. Hume *vs.* W. E. Dougherty, acting Indian agent, and L. La Foret, for expelling them from Hoopa Valley Agency, California ($250 and $250) $500

EXHIBIT A.

1884. To compensate Elihu Root, United States attorney, for unofficial services in case the Yale Lock Manufacturing Company *vs.* Thomas L. James, in the fiscal year 1884 2,000

EXHIBIT B.

This account was approved by my predecessor, Hon. Benjamin Harris Brewster, December 18, 1884, in the sum of $2,000, and referred to the accounting officers for settlement, but was not paid for want of money, the regular appropriation for the fiscal year 1884 being then (December 18, 1884) exhausted. This account has never been presented for or included in a deficiency appropriation.

1888, '89, '90. To compensate Shirley C. Ward, special United States assistant attorney for southern district of California, for services rendered for the Mission Indians in California from May 5, 1888, to April 1, 1890, under appointment January 19, 1886 ($200, $1,000, and $800)..... $2,000

EXHIBIT C.

1886. To compensate Eugene Van Patten for use of the court-house at Las Cruces, N. Mex., from March 13 to April 3, 1886, both days inclusive, twenty-two days, at $5..... $110

EXHIBIT D.

Appropriation 1886, covered into Treasury.

RECAPITULATION.

	1884.	1886.	1888.	1889.	1890.
Unofficial services	$2,000				
Special counsel			$450	$1,000	$1,050
Rent		$110			
Total	2,000	110	450	1,000	1,050

Very respectfully,

W. H. H. MILLER,
Attorney-General.

The SECRETARY OF THE TREASURY.

EXHIBIT A.

DEPARTMENT OF JUSTICE,
Washington, February 11, 1888.

SIR: You are hereby appointed an assistant to the attorney of the United States for the northern district of California, for the purpose of defending Capt. William E. Dougherty, U. S. Army, acting Indian agent, Hoopa Valley Agency, Cal., in the suits brought against him by John McKenzie and R. D. Hume, for expelling them from the Klamath Indian Reservation.

Your compensation will be determined by the Attorney-General upon the completion of your services.

Execute the customary oath of office and forward the same to this Department without delay.

A. H. GARLAND,
Attorney-General.

L. F. COBURN, Esq.
(Through John T. Carey, esq., U. S. attorney, northern California, San Francisco.)

[In the superior court of the county of Del Norte, State of California. R. D. Hume, plaintiff, vs. Wm. E. Dougherty and L. La Foret, defendants.]

The United States of America to L. F. Coburn, Esq., Dr.

For services as assistant attorney of the United States for the Northern District of California, for the purpose of defending Captain Wm. E. Dougherty, U. S. Army, acting Indian agent, Hoopa Valley Agency, California, in the suit brought against him by R. D. Hume, for expelling him from the Klamath Indian Reservation, under appointment dated February 11, 1888, a certified copy of which appointment is hereto attached ..... $2,500.

The following is a full, true, and correct history of the case, and all the steps taken therein by both plaintiff and defendant; all the steps taken by defendant being so taken by me as attorney aforesaid.

On October 5, 1887, the defendant, Capt. William E. Dougherty, U. S. Army, received peremptory orders from A. B. Upshaw, acting commissioner, to prevent plaintiff, R. D. Hume, from erecting, building, etc., and from fishing or in any way trespassing in or upon the Klamath Indian Reservation, and to remove any building plaintiff may have erected, and all other materials and effects belonging to said plaintiff from such reservation.

And on October 7, 1887, said defendant, Capt. William E. Dougherty, received written orders from his department commander at San Francisco to the same effect.

Defendant Capt. William E. Dougherty's obedience to said orders resulted in this action to restrain him from so doing.

The goods, etc., seized by defendant under such orders are alleged to be of the value of $7,400.

The complaint was filed; summons and temporary injunction issued on December 27, 1887.

January 9, 1888, defendants appeared by their attorney, L. F. Coburn, esq., and demurred; which, after argument, was by the court sustained on March 30, 1888, with leave to plaintiff to amend. At the same time a motion was made that the temporary injunction be dissolved.

Amended complaint served and filed April 19, 1888.

May 29, 1888, demurrer to same served and filed, and at same time notice of motion to set aside complaint.

On December 11, 1889, the said demurrer was sustained and on motion the said temporary injunction dissolved and the action dismissed.

The defendant, Capt. William E. Dougherty, and his control over the reservation having been in effect sustained throughout.

L. F. COBURN,
Attorney for Defendants.

NORTHERN DISTRICT OF CALIFORNIA, *County of Del Norte, ss.:*

L. F. Coburn, assistant United States attorney for the northern district of California, being duly sworn, deposes and says that the services charged in the foregoing account have been actually and necessarily performed as therein stated; that the item charged is correct and legal and the amount thereof justly due to him as therein stated, as he verily believes.

L. F. COBURN.

Subscribed and sworn to before me this 31st day of December, A. D. 1889.

JAMES BROOKING,
Notary Public.

EXHIBIT B.

[Circuit court of the United States, for the southern district of New York.]

The United States of America to Elihu Root, United States attorney for the southern district of New York, Dr.

To services rendered as attorney for the defendant in the suit of "The Yale Lock Manufacturing Company *vs.* Thomas L. James," as follows: To taking testimony; examination of the evidence and preparation of brief for final hearing; argument of the cause on final hearing at Hartford, Conn., March 24 and 25, 1884, before Hon. Judge Shipman, United States district judge for the district of Connecticut, who, sitting as circuit judge for the southern district of New York, tried this case; preparation of final decree; examination of the transcript of record for the Supreme Court, prepared by the clerk of the court on complainant's appeal $3,000

In this case infringement was charged of a patent re-issued in 1879, and having then nine years to run. The infringement complained of consisted in the use of metal-fronted letter and newspaper boxes in the New York post-office, of which the defendant was postmaster. An injunction and an accounting of profits and damages were prayed for. The district attorney was directed to appear and defend the suit at the request of the Postmaster-General by letters of the Department of Justice dated December 13, 1880, and January 28, 1881.

Simultaneously with the bringing of this suit upwards of seventy other suits were brought against other postmasters in various parts of the country, charging infringement of the same patent in the use of similar boxes. This suit, with the sanction of the Post-Office Department and of the Department of Justice, was made the test case.

The complainants' counsel stated their claim for compensation to be equivalent to a royalty of a dollar a box a year. The evidence in this case shows that upwards of a hundred thousand boxes made on the same patent with those in the New York post-office were put into other post-offices by the same contractor who put up those in the New York office, viz: The Johnson Rotary Lock Company; and the complainants' claim that there were also other boxes used which infringed their patents made by other manufacturers. As the patent had nine years to run after the last re-issue, it is obvious that the amount involved in the litigation was large.

Before bringing this suit the complainant had prosecuted and destroyed the Johnson Rotary Lock Company—the contractor for the New York post-office boxes having obtained a decree sustaining the patents and awarding an injunction. It had also obtained an injunction against the National Lock Manufacturing Company, another manufacturer of similar boxes, and had had the patent sustained against vigorous opposition, with a construction apparently broad enough to cover the New York post-office boxes as infringements. The preparation of the defendant's brief required the examination and study of 279 printed pages of testimony and 296 printed pages of documentary evidence.

The result of the trial was a decree in favor of the defendant, dismissing the bill on the ground of non-infringement. The complainants have appealed the case to the Supreme Court.

ACTION.

December 18, 1884, approved for $2,000 and respectfully referred to the First Auditor of the Treasury; payment to be made from fees United States attorneys' fund, 1884, to Elihu Root, New York City, N. Y.

BREWSTER,
Attorney-General.

EXHIBIT C.

LOS ANGELES, CAL., *April* 25, 1890.

DEAR SIR: I inclose herewith my bill for services as special United States attorney for the Mission Indians in California from May 5, 1888 to April 1, 1890, rendered under appointment of January 14, 1886 (see letter N. T. N. R. 218, Department of Justice, dated January 14, 1886). By referring to your letter of August 2, 1889, to the honorable Secretary of the Interior, a copy of which you forwarded to me, you will see that my compensation will have to be obtained by special Congressional appropriation. The bill has been approved by ex-Indian Agent Preston and by Major Rust, the present agent for this agency, and I now submit the same to you for your approval, and if approved by you I would like for you to refer the matter to Congress, with your approval, for immediate action by this session of Congress, if possible.

The following is a more extended account of the services rendered than is contained in the bill itself, viz: The first service charged, of representing the Indians in the case of John Morongo *et al. vs.* John G. North and Richard Gird, is a suit in equity in the United States circuit court for the southern district of California, and is brought to quiet and establish the title of the Indians to lands in the Potrero or Banning Reservation, in San Bernardino County, Cal. The suit also stays all proceedings in an ejectment suit entitled North and Gird *vs.* J. W. Preston, United States Indian Agent, *et al.*, commenced in the superior court of San Bernardino County, and removed by me from such court to the Federal court. The ejectment suit was commenced by Messrs. North and Gird against Colonel J. W. Preston (the then United States Indian Agent for the Mission Indians) and the Indians, in possession of some 1280 acres of land in the Potrero Reservation, being the most valuable lands in the reservation, and controlling almost the entire water supply of the Indians. The case was intended as a test case as to the Indians' rights to all other lands in similar condition of title; nearly one-half of the lands in four townships resting upon the same state of facts, with the same laws applicable thereto. All of the trespassers upon such reservation had been evicted by the military, under instructions from the Indian Department, and the ejectment suit of North and Gird *vs.* Preston *et al.* was intended to test the Government's rights to cause such eviction. All proceedings in such suit were suspended

upon filing the bill in equity in the case of Morongo *et al. vs.* North and Gird, and the taking of testimony in such case began over a year ago and has continued with adjournment from time to time ever since. A vast volume of testimony has been taken in the case and much more is yet to be taken.

The principal controversy of fact in the case is as to whether the lands in controversy were in the occupancy and possession of the Indians at the time of the transfer of sovereignty from Mexico to the United States, and it is upon the establishment of this fact in the affirmative that the successful maintenance of the rights of the Indians depends. The difficulty of procuring reliable testimony as to a fact calculated to attract so little attention as the possession by Indians of a given tract of land, at such an early period in this State's history has been the great obstacle in this case, and it has required a thorough scouring of the whole country in search of such evidence and the work has required much time and attention, and required the testimony to be taken at different places, some at Banning, some at San Bernardino, and some at Los Angeles. The Indians' title rests principally upon their possession at the time of the transfer of sovereignty from Mexico, but particularly under executive orders of the President reserving the lands for Indian purposes.

The defendants claim is principally under Congressional grant of odd sections to the Southern Pacific Railroad Company, but as to a portion of the land they hold patent from the State of California. If the case should be lost by the Indians a precedent will be established which will deprive them of their most valuable lands lying outside of Mexican grants, as all of such cases involve about the same questions of fact and law.

As to the second item in the bill, viz, the contest between the Indians and John J. Walsh: This was an audacious attempt upon the part of Walsh and some of his followers to jump an old Indian homestead, upon which the Indians had had their fields and orchards from time immemorial, but which, as it happened, had never been formally set aside by the President as an Indian reservation, and had in no way been entered by the Indians under any of the United States land laws, Walsh's idea being to secure the land which adjoins the Indian village of Agua Caliente and to establish thereon a drinking and gambling house and place of general debauchery, that Indians in the village might spend with him all their earnings. The attempt so far we have succeeded in frustrating. The matter is now on appeal by Walsh to the Secretary of the Interior. In securing our evidence and taking the testimony in the case it was necessary to go down into the mountains of San Diego County to the little mining town of Julien, and the case required my absence from my office for about two weeks. Three briefs have already been filed by me in the matter.

As to the next matter charged in my bill, viz, investigating the property rights of the Indians on the College Rancho, in Santa Barbara County, and negotiating with the ranch owners an adjustment of the Indians' rights thereon: This matter required a trip to San Francisco and a search of the archives of the survevor-general's office and the records of the old United States district court, to ascertain the condition of the ranch title and the right of the Indians thereon as reserved or established by the Mexican Government, or by the United States land commissioner, or the district court, and then a trip by steamer and stage to Santa Yuez, in Santa Barbara County, to view the premises in controversy and interview the witnesses and the ranch owners. Upon a thorough investigation of all the facts I found that the Indians were entitled to a small portion of rather desirable lands on Sanja Cota Creek, but that they were becoming so hedged in by the surrounding lands being platted and mapped and filled up by white settlers, that it was desirable to find for them a better and more ample location upon the ranch, and this has been agreed upon by the ranch owners and myself. The ranch owners are to build the Indians comfortable houses and bring out the water in an irrigating ditch to them, and to give them a much larger area of lands then they now own or claim.

As soon as this arrangement can be consummated the Indians will be established in houses of their own, with unquestioned title and their property interests and general welfare much improved. The matter has required several weeks of time and attention on my part, and I hope the adjustment will soon be finally consummated.

The next item in my bill, viz, services rendered in collecting data and making surveys preparatory to the bringing of some fourteen equity suits to establish the Indians' titles to their various villages and adjoining lands, on confirmed Mexican grants in San Diego County, has been a work requiring much time and attention and much negotiation with the ranch owners, and is the most important and far-reaching work I have had in hand for the Government.

These tracts include the principal and most valuable Indian lands in this agency, the several tracts embracing from 20 to 400 acres each, and covering the most fertile lands located upon the various ranches. The gathering of the data necessary to bring the several suits has been going on for over a year and has now been consummated, and the suits would all have begun ere this, but negotiations have at all times been pending for amicable settlement with the ranch owners, and as to two of the ranches there

is still some hope of settlement with the owners. Since the law of these cases nas been established by the decision of the supreme court of this State, in the case of Byrne *vs.* Alas *et al.*, the cases will all be fought upon the facts.

As to the last item of the bill, viz, services rendered from time to time in the way of general legal advice to and counsel with the Indians and Indian Agent: The services include miscellaneous advice and counsel rendered to the agent and the Indians from time to time during the past two years. Questions involving the landed and water rights of the Indians have constantly been coming up and advice required as to the proper mode of protection of such rights against the encroachments of trespassers.

These services I have not attempted in any way to itemize, but render my bill for what I considered the aggregate value thereof. If you desire any further particulars as to the service rendered by me, I would refer you to Mr. Frank D. Lewis, now special U. S. Indian agent, and to Maj. H. N. Rust, the present local agent for the Mission Indians, and to Col. J. W. Preston, ex-Indian agent for such Indians.

Hoping that the bill will meet with your approval, and that an appropriation for the payment will be made by this Congress,

I am, respectfully,

SHIRLEY C. WARD.

Hon. W. H. H. MILLER,
United States Attorney-General, Washington, D. C.

United States of America to Shirley C. Ward, Special Counsel for the Mission Indians of California, Dr.

To services rendered as special United States attorney for the Missions in California between May 5, 1888, and April 1, 1890, under appointment dated January 14, 1886 (see letter N. T. N. R. 218, Department of Justice), as follows, viz:

Services in case of John Morongo, *et al.*, vs. John G. North and Richard Gird, in the circuit court of the United States for the southern district of California; suit in equity to quiet and establish the Indians' title to their lands in the Potrero Reservation at and near Banning, in San Bernardino County, Cal., and also to stay proceedings in ejectment suit of North and Gird vs. J. W. Preston *et al.*, transferred from State to Federal court, under instructions from Indian Department. Indian title based upon occupancy and possession under Mexican laws at the time of the transfer of sovereignty, and also based upon executive orders, setting aside such lands as Indian reservation; defendants title based upon Congressional grant to the Southern Pacific Railroad Company, and upon patent from the State of California. Testimony still being taken and case not yet submitted	$1,500
Services in contest between the Indians and John J. Walsh, involving titles to lands in sections 24 and 25, in T. 10 S. 3 E., and in section 10, T. 10 S., R. 4 E., S. B. M., in San Diego County, Cal., and testimony taken at Julien, San Diego County, and decided in favor of the Indians by the register and receiver of the local land office, and by the Commissioner of the General Land Office, and now on appeal to the Secretary of the Interior	200
Services in the matter of investigating the property rights of the Indians in the College Rancho, in Santa Barbara County, and in negotiation with the owners of such rancho, looking to an adjustment of the rights of the Indians on such rancho, by setting off to them a desirable and definite tract of land and furnishing them with houses and ample water for irrigation (negotiations still pending, and not yet consummated)	250
Services in the matter of collecting data in the way of causing surveys to be made, gathering evidence, and preparation for bringing of fourteen suits to quiet and establish the Indian title to fourteen tracts of land on Mexican grants, and in negotiating settlement with the owners of such tracts of lands, which tracts are as follows, viz: On the Rancho San José Del Valle, in San Diego County; Agua Caliente, San José, and Puerta de la Cruz; on the Rancho Valle de San José; La Puerta and Matajuai; on the Pauma Rancho, San Diego County, Lower Potrero, Upper Potrero, Pauma Village, Francisco Majil, José Pobango, and Juan Sawyer; on the Rancho Santa Ysabel, San Diego County; Carriseta, Manuel's, and Santa Ysabel Village	750
Services rendered from time to time in the way of general legal advice to and counsel with the Indians and Indian agent	300
Total	3,000

EXHIBIT D.

The United States of America to Eugene Van Patten, Dr.

To rent of Van Patten's Theater for use of the court of the third judicial district, Territory of New Mexico, from the 13th day of March to the 3d day of April, 1886, both days inclusive, twenty-two days, at $5 per day $110.00

TERRITORY OF NEW MEXICO,
County of Dona Ana, Third Judicial District Court:

Personally appeared before me, the undersigned authority, Eugene Van Patten, and being first duly sworn, deposes and says that the above account is correct and true, and that the amount charged is reasonable, and that no part thereof has been paid.

EUGENE VAN PATTEN.

Subscribed and sworn to before me this 4th day of October, A. D. 1886.

W. J. JOBLIN,
Clerk Third Judicial District Court.

The above account as reduced is hereby approved by me.

W. T. HENDERSON,
Judge Third Judicial District Court, New Mexico.

ELEVENTH DAY, *March* 12, 1886.

Ordered by the court that the following report be spread upon the minutes of said court.

In the matter of the condition of the Dona Ana County court-house.

It having been suggested to the court on a previous day of the term that the court-house building in which the court is being held was unsafe and dangerous to human life in consequence of the giving way of the east wall of the said building, upon which suggestion the court appointed a commission of three experts to examine said building and to report immediately, whereupon, in pursuance of the orders of the court, said commission submitted the following report, to wit:

Hon. WM. F. HENDERSON,
Judge of the Third Judicial District Court.

SIR: Your commissioners, appointed by you to examine the court-house building and report as to its present safety, beg leave to make the following report:

We find the roof of a substantial character, but defective in that the main truss, or the two main supports, are not connected with or bound to the outside walls. This can be remedied at a small expense.

On the main floor of the court-room we find that the east wall is not connected or tied to the joist as is customary, and in fact necessary; from a very slight settling of the east wall in addition to the pressure of the roof, greatly increased by the high winds, we deem it necessary that steps should be taken at once to secure the permanent safety of the building. In its present condition and the high winds prevailing at this season, the building is not, in our opinion, perfectly safe.

Respectfully submitted.

O. R. HARDING.
JOHN HILL.
W. J. JOBLIN.

That afterwards, to-wit: On the 13th day of March, 1886, it being made to appear to the satisfaction of the court by the inspection of the presiding judge thereof, attorneys in attendance upon the court, and the jurors, litigants, and spectators that said court-house is in such condition as to endanger the lives of the people and the records of the court.

The court orders that the further session of said court for the present March term be held in Van Patten's hall, a building in the near vicinity of said court-house, in the town of Las Cruces, Dona Ana County.

It is further ordered that inasmuch as there is not room sufficient in said Van Patten's hall for the use of the United States grand jury and the Territorial grand jury, the marshal of the Territory and sheriff of Dona Ana County, respectively, provide suitable grand jury rooms for said juries, and the cost of the court room and jury rooms be paid equally by the United States and the Territory.

It is further ordered by the court that the records of this court be kept by the clerk, sheriff, and marshal in the Van Patten hall as a court-house, or in the court-house abandoned as unsafe, provided greater security be thereby assured, and that for the time being the said Van Patten hall be in all respects designated as the court-house.

TERRITORY OF NEW MEXICO, *Third Judicial District Court.*

I, A. L. Christy, clerk of said court, do hereby certify that the above and foregoing is a true and correct transcript from the records of the proceedings of said court of March 12, 1886.

In witness whereof I hereunto set my hand and the seal of said court this 12th day of April, A. D. 1890.

[SEAL.]

A. L. CHRISTY,
Clerk.

THIRTIETH DAY, *April* 3, A. D. 1886.

Ordered by the court that the following allowances be, and the same are hereby, made to the following named persons, in the amounts set opposite their respective names: (Among others)—

Eugene Van Patten, for rent of court-room for twenty-two days, from the 13th day of March to the 3d day of April, both days inclusive.....	$275
For rent of grand jury room for twenty days, from the 13th day of March to the 1st day of April, both days inclusive, at $2.50 per day.....	50

TERRITORY OF NEW MEXICO, *Third Judicial District Court.*

I, A. L. Christy, clerk of said court, do hereby certify that the above and foregoing is a true and correct abstract from the records of an allowance made to Eugene Van Patten, as appears by the records of said court, on the 3d day of April, A. D. 1886.

In witness whereof I have hereunto set my hand and the seal of said court, this 12th day of April, A. D. 1890.

[SEAL.]

A. L. CHRISTY,
Clerk.

The foregoing account has been allowed by the court as stated. The buildings were furnished, as therein stated, and we believe the account to be just, and that it should be paid by the United States.

JOHN R. MCFIE,
Judge Third District.
EUGENE A. FISKE,
United States Attorney, New Mexico.
TRINIDAD ROMERO,
United States Marshal, New Mexico.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 415.

TRANSCRIPTS OF RECORDS AND FILES OF PRIVATE LAND CLAIMS.

LETTER

FROM

THE ACTING SECRETARY OF THE TREASURY,

TRANSMITTING

A copy of a communication from the Secretary of the Interior of the 10*th instant, submitting an estimate of appropriation for the fiscal year ending June* 30, 1891, *for transcripts of records and files of private land claims in New Mexico*, $2,000.

JUNE 12, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
June 12, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of a communication from the Secretary of the Interior of the 10th instant, submitting an estimate of appropriation for the fiscal year ending June 30, 1891, for "transcripts of records and files of private land claims in New Mexico," $2,000.

Respectfully yours,

GEO. S. BATCHELLER,
Acting Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR,
Washington, June 10, 1890.

SIR: I have the honor to transmit herewith an estimate of appropriation, submitted by the Acting Commissioner of the General Land Office, of $2,000 for "transcripts of records and files of private land claims in New Mexico" for the fiscal year ending June 30, 1891. The estimate is forwarded for appropriate action by Congress.

Very respectfully,

JOHN W. NOBLE,
Secretary.

The SECRETARY OF THE TREASURY.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., June 10, 1890.

SIR: I have the honor to transmit herewith estimate for the translation, transcription, and certification of papers in relation to private land claims in the office of the surveyor-general of New Mexico, for your approval.

Very respectfully,

W. M. STONE,
Acting Commissioner.

The SECRETARY OF THE INTERIOR.

Estimates of appropriations required for the service of the fiscal year ending June 30, 1891, *by the General Land Office.*

Detailed objects of expenditure, and explanations.	Estimated amount which will be required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.
Transcripts of records and files of private land claims in New Mexico:		
Expenses attending the translation, transcription, recording, and certification of papers on file or of record in the office of the surveyor-general of New Mexico (submitted).....	$2,000	$2,000

NOTE.—In explanation of the above estimate it is reported by Inspector Harlan, after a careful examination, that the files and records in said office relating to private claims are in a chaotic condition. That original papers forming the muniments of title, deeds, wills, etc., are being destroyed by dirt or constant handling; that many such papers have never been either translated or examined, and therefore their bearing upon the claims presented (some of which are now pending before Congress), is unknown. These valuable papers ought to be examined, arranged, etc., and transcribed into proper volumes, and certified to, before they are lost or destroyed.

Congress, or the courts, may have use in the future for said papers in the final settlement of important claims.

Approved.

W. M. STONE,
Acting Commissioner.

GENERAL LAND OFFICE, *June* 9, 1890.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. Doc. No. 416.

UNDELIVERED PATENTS IN ARKANSAS AND MISSISSIPPI.

LETTER

FROM

THE SECRETARY OF THE INTERIOR,

INCLOSING A

Copy of the report of the Acting Commissioner of the General Land Office giving an approximate estimate of the number of undelivered patents for lands in the States of Arkansas and Mississippi, in reply to a resolution of the House of Representatives dated April 29, 1890.

JUNE 14, 1890.—Referred to the Committee on Public Lands and ordered to be printed.

DEPARTMENT OF THE INTERIOR,
Washington, June 13, 1890.

SIR: I have the honor to acknowledge the receipt of a resolution of the House of Representatives, dated April 29, 1890, as follows:

Resolved by the House of Representatives, That the Secretary of the Interior be, and he hereby is, requested to cause to be made a list and description of such patents as were issued for lands in the States of Arkansas and Mississippi prior to August 20, 1866, and not yet delivered, by land districts, showing the number, date, grantee, and description of the land, and transmit the same to the House for information.

In part reply thereto I inclose herewith a copy of the report of the Acting Commissioner of the General Land Office, dated the 10th instant, giving an approximate estimate of the number of undelivered patents referred to in the resolution.

On receipt from the Commissioner of the General Land Office of the full information called for a further reply to the resolution will be made.

Very respectfully,

JOHN W. NOBLE,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., June 10, 1890.

SIR. I have received, by reference from the Assistant Secretary, with request for report thereon in duplicate, a copy of a resolution by the House of Representatives dated April 29, 1890, calling upon the Secretary of the Interior to cause to be made a list and description of such patents as were issued for lands in the States of Arkansas and Mis-

sissippi prior to August 20, 1866, and not yet delivered, by land districts, showing the number, date, grantee, and description of the land, and to transmit the same to the House for information.

In reply, I have the honor to state that an approximate estimate of the number of patents in this office, as described in the resolution, is as follows:

Arkansas:		
Batesville	2,501	
Champagnole	4,149	
Clarksville	1,176	
Fayetteville	317	
Helena	789	
Little Rock	1,340	
Washington	1,137	
Total		11,409
Mississippi:		
Chocchuma	4,580	
Jackson	69	
Jackson, Augusta, and Paulding	520	
Augusta Choctaw	12	
Washington	125	
Total		5,306
Grand total		16,715

There are also many patents separately filled in this office, with location papers, for warrants issued under the acts of 1847, 1850, 1852, and and 1855, which will require much labor and time to withdraw from the files and list. It is impossible to state the exact number, but it is believed to approximate 25,000.

A large number of undelivered patents remain in the local land offices and should also be included, in my judgment, in this report, to meet the full scope of the resolution.

Communications were addressed to the existing land offices in the States of Arkansas and Mississippi, requesting them to state the number of patents issued prior to 1866 remaining in their offices, and their reports state as follows:

At Jackson, Miss	55,000
At Harrison, Ark	800
At Little Rock, Ark	4,156
At Camden, Ark	7,369
At Dardanelle, Ark	29
	67,714

The total number of patents undelivered in this office and the various local offices, which were issued prior to August 20, 1866, may be stated approximately as follows:

In the General Land Office:		
Arkansas	11,409	
Mississippi	5,306	
In the files	25,000	
		41,715
In local land offices:		
Arkansas	12,714	
Mississippi	55,000	
		67,714
Total		109,429

To prepare the full list called for will require the services of seven clerks for a period of six months. This will necessitate a delay in the current work of this office.

The matter will be placed in hand, however, as soon as practicable, and should adequate addition to the clerical force be made for the ensuing fiscal year, the lists will be ready for delivery to the House of Representatives at the time of convening the next session of Congress.

Very respectfully,

W. M. STONE,
Acting Commissioner.

The SECRETARY OF THE INTERIOR.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 417.

ACCOUNTS OF DISBURSING OFFICERS OF THE INTERIOR DEPARTMENT.

LETTER

FROM

THE SECRETARY OF THE INTERIOR,

INCLOSING

A communication from the Acting Commissioner of Indian Affairs, and other inclosures, in reference to the proper construction to be put upon section 3622, Revised Statutes, in relation to the rendition of accounts by disbursing officers, and recommending a modification of the same. He also strongly recommends that the inclosed draught of an item for the modification of said section be incorporated in the pending Indian appropriation bill.

JUNE 14, 1890.—Referred to the Committee on Indian Affairs.

DEPARTMENT OF THE INTERIOR,
Washington, June 13, 1890.

SIR: I have the honor to transmit herewith a communication from the Acting Commissioner of Indian Affairs, inclosing a circular issued by the Secretary of the Treasury, in which the opinion of the Attorney-General is quoted in reference to the proper construction to be placed upon section 3622, Revised Statutes, in relation to the rendition of accounts by disbursing officers. He also submits a draught of an item providing for the modification of section 3622. As it appears from the statement of the Commissioner that it would be utterly impracticable to apply the requirements of said circular to the disbursing officers of the Indian service, I strongly recommend that the inclosed draught of an item be incorporated in the pending Indian appropriation bill.

I would also recommend that the proposed modification of section 3622 be made to apply to all disbursing officers of this Department.

Very respectfully,

JOHN W. NOBLE,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, June 11, 1890.

SIR: I have the honor to inclose herewith a circular issued by the Secretary of the Treasury, in which the opinion of the Attorney-General is quoted in reference to the proper construction to be placed upon section 3622, Revised Statutes, in relation to the rendition of accounts by disbursing officers.

Under the authority supposed to have been conferred upon the honorable Secretary of the Treasury by the section of the Revised Statutes above referred to, the period to be covered by the accounts of all disbursing agents in the Indian service was extended to three months instead of one month, and the period in which they were to be rendered from ten days to thirty days.

The Attorney-General holds, however, that under the section cited, the honorable Secretary of the Treasury has no such power, but that all disbursing officers must render their accounts *monthly*.

I respectfully submit that should the requirements of the inclosed circular be applied to the Indian service, and all agents be compelled to render their accounts monthly, instead of quarterly, as is now done, the clerical work at the agencies and in the accounts division of this office would be increased to nearly three times what it is at present, and as the clerical force at the agencies is now placed at the lowest limit consistent with the proper transaction of business, and as the force in this office is now less than the needs of the service actually demand, it would be manifestly impossible to transact such additional business without a corresponding increase in clerical force at heavy expense.

At most of the large agencies it is with the greatest difficulty that the accounts for the quarter are prepared within the succeeding thirty days; the clerks are compelled during that period to work ten, twelve, and even fourteen hours a day, and as the number of papers, etc., to be prepared for a monthly account will vary but little from those required in the quarterly account, it would necessarily require all the time of the present clerks at the agencies in the preparation of the accounts alone, leaving them no time for correspondence, keeping up the record books, and performing general office work.

The present method of rendering accounts quarterly is economical and satisfactory, and, in my opinion, is as well calculated to secure honesty of administration and prevent loss of Government funds and property as monthly accounts would be.

In view, therefore, of the foregoing facts, I respectfully recommend that proper steps be taken to secure legislation to so modify section 3622, Revised Statutes, as to allow disbursing officers in the Indian service to render their accounts quarterly instead of monthly, as has always been heretofore done.

To this end I submit herewith a draught of an item providing for the modification of section 3622, with the recommendation that it be submitted to Congress to be incorporated in the pending Indian appropriation bill, unless it be your intention to secure general legislation in regard to this matter, which not only affects the disbursing officers of this office, but also all such officers of other bureaus of the Department, and in fact all branches of the Government service.

Respectfully,

R. V. BELT,
Acting Commissioner.

The SECRETARY OF THE INTERIOR.

CIRCULAR.—RENDITION OF ACCOUNTS.

[1890. Department No. 35. Division of W., E., and A.]

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., May 27, 1890.

To DISBURSING OFFICERS AND OTHERS:

The following opinion of the Attorney-General is hereby promulgated for your information and guidance:

DEPARTMENT OF JUSTICE,
Washington, D. C., May 12, 1890.

SIR: Your communication of January 27, 1890, submits for opinion three questions which have arisen in the Treasury Department upon section 3622, Revised Statutes, which section is in the following language:

"Every officer or agent of the United States who receives public money which he is not authorized to retain as salary, pay, or emolument, shall render his accounts monthly. Such accounts, with the vouchers necessary to the correct and prompt settlement thereof, shall be sent by mail, or otherwise, to the Bureau to which they pertain, within ten days after the expiration of each successive month, and, after examination there, shall be passed to the proper accounting officer of the Treasury for settlement. Disbursing officers of the Navy shall, however, render their accounts and vouchers direct to the proper accounting officer of the Treasury. In case of the non-receipt at the Treasury, or proper Bureau, of any accounts within a reasonable and proper time thereafter, the officer whose accounts are in default shall be required to furnish satisfactory evidence of having complied with the provisions of this section. The Secretary of the Treasury may, if in his opinion the circumstances of the case justify and require it, extend the time hereinbefore prescribed for the rendition of accounts. Nothing herein contained shall, however, be construed to restrain the heads of any of the Departments from requiring such other returns or reports from the officer or agent, subject to the control of such heads of [*Department*] [Departments], as the public interests may require."

I. The first question is in these words: "The first clause of the statute is as follows:

"'Every officer or agent of the United States who receives public money which he is not authorized to retain as salary, pay, or emolument, shall render his accounts monthly.'

"Does this clause require the rendition of monthly accounts by every officer or agent who receives advances of public money from the Treasury, to be disbursed under appropriations made by Congress and also by every officer or agent who collects and receives fees and revenues which he is by law required to account for and pay into the Treasury?"

This question I answer in the affirmative. I can see no reason why effect should not be given to the words of the statute according to its ordinary sense.

II. The next question is, "Does the clause in the statute, which provides that the Secretary of the Treasury may extend the time prescribed for the rendition of accounts, confer upon the Secretary authority to grant permission to any officer or agent coming within the provisions of the act to render his accounts for a longer period than a month (for example, to render quarterly instead of monthly accounts), or does said clause relate to extending the limit of ten days within which the officer or agent is required to transmit his accounts with the vouchers to the proper Bureau or Department, after the expiration of each successive month?"

The same question was passed upon by Attorney-General Devens in his opinion of December 2, 1878 (16 Opinions, 222). He said that the law requiring disbursing officers to render their accounts monthly was not subject to the discretion of the Secretary of the Treasury except in extraordinary cases, as provided, where the Secretary of the Treasury should be of opinion that the statutory period of a month should be enlarged to meet the special circumstances of such cases, such powers of the Secretary being intended to be exceptional in character and not to authorize him "to institute a new system of rendering accounts." I concur in that view and in the reasoning by which it is supported.

III. The next question is, "If the Secretary of the Treasury may lawfully authorize any officer or agent within the provisions of the statute to render his accounts for a longer period than a month (as by rendering them quarterly instead of monthly), is such authority limited to individual and exceptional cases, or may it be extended indefinitely to classes of accounts, so as to establish a system of rendering accounts continuously for longer periods than a month."

My answer to the second question, taken in connection with the opinion of Attorney-General Devens, also disposes of this question.

I have the honor to be, very respectfully, yours,

W. H. H. MILLER,
Attorney-General.

The SECRETARY OF THE TREASURY.

In accordance with the requirements of the law, as construed by the Attorney-General, you are hereby instructed to render your accounts monthly, beginning with the month of July, 1890.

WILLIAM WINDOM,
Secretary.

Item.

That hereafter all disbursing officers in the Indian service are required to render their accounts quarterly, and within thirty days after the expiration of each successive quarter, and section 3622 United States Revised Statutes is hereby modified accordingly.

O

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 418.

CLAIMS FOR ANTE BELLUM MAIL SERVICE AND CLAIMS OF FLINT AND PERE MARQUETTE RAILROAD AND PACIFIC MAIL STEAM-SHIP COMPANY.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

Certain claims arising under the postal laws and regulations of Flint and Pere Marquette Railroad Company and Pacific Mail Steam-ship Company. Also a list of claims for ante bellum mail service, together with a report thereon by the Auditor of the Treasury for the Post-Office Department.

JUNE 16, 1890.—Referred to the Committee on Claims.

TREASURY DEPARTMENT, *June* 14, 1890.

SIR: I have the honor to transmit herewith, for such action as may be deemed necessary in the premises, the following claims, arising under the postal laws and regulations:

Flint and Pere Marquette Railroad Company	$14,394.68
Pacific Mail Steam-ship Company	83,333.33

I also append, for the further information of Congress, a list of claims for ante bellum mail service, together with a report thereon by the Auditor of the Treasury for the Post-Office Department, to which attention is respectfully invited. These are in addition to those included in House Ex. Doc. No. 314, of the present session.

All of these claims have been at various times reported to Congress and printed in executive documents, reference to which is made by number and date in the accompanying statements.

Respectfully, yours,

W. WINDOM,
Secretary.

The SPEAKER HOUSE OF REPRESENTATIVES.

OFFICE OF THE AUDITOR OF THE TREASURY
FOR THE POST-OFFICE DEPARTMENT,
Washington, D. C., June 10, 1890.

SIR: With reference to the ante bellum claims included in the accompanying report, I take the liberty to invite your attention to the closing paragraph of a letter from this office, dated February 26, 1890, addressed to Hon. S. A. Whitfield, Second Assistant Postmaster-Gen-

eral, which was made a part of a report on ante bellum claims, made by the Postmaster-General, to the Senate Committee on Post-Offices and Post Roads:

In view of the fact that some of these claims were paid by the United States immediately after the orders were issued in May, 1861, suspending the service; that over $100,000 was paid under the joint resolution of Congress, approved March 2, 1867; that $564,544.22 was paid by the Confederate States Government, and that $42,061.34 was paid by the State of Arkansas, I am of the opinion that nearly, if not all, of the mail service performed in the Southern States prior to June 1, 1861, has been paid for once, and some of it twice, and that in the absence of a complete record of payments made for said service by the Confederate States Government, it would be unsafe to make further payments.

Respectfully,

T. B. COULTER,
Auditor.

Hon. WILLIAM WINDOM,
Secretary of the Treasury, Washington, D. C.

Estimates for the payment of claims received and examined by the Sixth Auditor of the Treasury for the Post-Office Department, under section 4 of the act of June 14, 1878, payable from appropriations the balances of which have been exhausted or carried to the surplus fund under section 5 of the act of June 20, 1874, and of claims reported under section 2 of the deficiency act of July 7, 1884.

DEFICIENCY APPROPRIATION FOR ARMY AND NAVY PENSIONS.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A copy of a communication from the Secretary of the Interior submitting an estimate of deficiency in the appropriations for Army and Navy pensions for the current fiscal year, and urging immediate action thereon.

JUNE 16, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT, *June* 14, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of a communication from the Secretary of the Interior of the 12th instant, submitting an estimate of deficiency in the appropriation for Army and Navy pensions for the current fiscal year of $3,708,898.35, and urging the immediate consideration of Congress thereon.

Respectfully yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR,
Washington, June 12, 1890.

SIR: I have the honor to transmit herewith an estimate of deficiency in the appropriation for Army and Navy pensions for the current fiscal year, amounting to $3,708,898.35, and would urge the favorable consideration of Congress thereon at the earliest moment practicable.

Very respectfully,

JOHN W. NOBLE,
Secretary.

The SECRETARY OF THE TREASURY.

DEPARTMENT OF THE INTERIOR,
BUREAU OF PENSIONS,
Washington, D. C., June 12, 1890.

SIR: In consequence of the increased work of the office, whereby a much larger number of claims were allowed since the 1st of January than during the preceding months of the fiscal year, there will be a deficiency in the appropriation for the current fiscal year of $3,708,898.35.

I hand you herewith a memorandum, which will show the course of the payments during the past three quarters of the fiscal year and up to June 7 of the present quarter.

Very respectfully, your obedient servant,

GREEN B. RAUM,
Commissioner.

The SECRETARY OF THE INTERIOR.

MEMORANDUM OF ARMY PENSIONS, 1890.

Appropriated by act of March 1, 1889		$80,473,000.00
Appropriated by act of April 4, 1890		21,598,834.00

Estimates of appropriations required for the service of the fiscal year ending June 30, 1890, by the Bureau of Pensions, Department of the Interior.

Detailed objects of expenditure, and explanations.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the current fiscal year, ending June 30, 1890.
For Army and Navy pensions:		
For invalids, widows, minor children, and dependent relatives; survivors, and widows of the wars of 1812 and with Mexico	$3,708,898.35	$102,071,834

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 420.

LANDING EMIGRANTS IN VIOLATION OF CONTRACT-LABOR LAWS.

LETTER

FROM

THE ACTING SECRETARY OF THE TREASURY,

INCLOSING

A letter from the collector of the port of New York, and certain other papers, in reply to the resolution of the House of Representatives inquiring into the action of the Cunard Steamship Company refusing to obey the order of the officers of the United States to give return-passage to certain emigrants landed at New York by said company in violation of the contract-labor laws; and also looking to a thorough enforcement by the Department of the laws prohibiting the importation and migration of foreigners and aliens under contract or agreement to perform labor in the United States.

JUNE 19, 1890.—Referred to the Committee on Foreign Affairs.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., June 18, 1890.

SIR: I have the honor to acknowledge the receipt of the resolution of the House of Representatives inquiring—

Whether it is true that the Cunard Steam-ship Company, on Saturday, June 7, 1890, refused to obey the orders of the officers of the United States to give return passage to certain immigrants landed at New York by said company in violation of the contract-labor laws of the United States; and if so, what steps, if any, have been taken to refuse entry to steam-ships of said company until said company has complied with the laws of the United States and made reparation for their refusal to obey the orders of the officers thereof.

Responding to said resolution I herewith lay before you a letter from the collector of the port of New York, together with the inclosures therein referred to. Also a letter addressed to me by Mr. Brown, the New York agent of the Cunard Steam-ship Company.

I desire further to say, that I have under under consideration the expediency of referring the action of the captain of the steamer *Umbria* to the United States district attorney for the southern district of New York for such action under section 4 of the act of February 26, 1885, in the nature of criminal proceedings, as may seem to him proper under the circumstances; and I contemplate such further action on the part of this Department as may be admissible under the provisions of the

statute, looking to a thorough enforcement of the laws prohibiting the importation and migration of foreigners and aliens under contract or agreement to perform labor in the United States.

Respectfully, yours,

GEO. S. BATCHELLER,
Acting Secretary.

Hon. THOMAS B. REED,
Speaker of the House of Representatives.

CUSTOM-HOUSE, NEW YORK CITY,
Collector's Office, June 12, 1890.

SIR: I am in receipt of your telegram of this date, stating that you desire a full and early report of the facts and circumstances in regard to the reported refusal of the Cunard Steam-ship Company, or the captain of the *Umbria*, to return seven Belgian glass-blowers, not permitted to land, under the alien contract-labor law.

I transmit herewith copies of all the correspondence on file in this office bearing on the subject, to wit:

Exhibit A. Letter of John B. Weber, superintendent of immigration, adjudging seven passengers, per steam-ship *Umbria*, to have come in violation of the alien contract-labor law;

Exhibit B. My letter to Superintendent Weber, barring said immigrants from landing;

Exhibit C. My letter to the surveyor, directing him to prevent the landing of said immigrants;

Exhibit D. My letter to the surveyor, directing the detail of one inspector and two night inspectors to Superintendent Weber, to prevent the landing of said immigrants.

Exhibit E. Report of Inspectors James R. Coulter and Thomas Kenny to Surveyor Lyon as to the facts connected with the placing of said immigrants on the steam-ship *Umbria* for deportation whence they came.

Exhibit F. My letter to the surveyor directing the transfer of said immigrants to the steam-ship *Wisconsin;* and

Exhibit G. Letter of Superintendent Weber, reporting in full as to the facts in regard to said immigrants.

The facts in the matter which appear fully in the accompanying inclosures are, in brief, as follows:

On the 6th instant Superintendent Weber reported to me that Leon Jaye, August Quintif, Emile Dourlet, Julian Bernier, Olivier Bertrand, Victor Quintif, and August Quintif, sr., alien passengers per steam-ship *Umbria*, arrived the 1st instant, came in violation of the alien contract-labor law. Immediately on receipt of this letter at 1 o'clock p. m. an examination was made of the circumstances in the matter, and at 2.30 o'clock p. m., on the 6th instant, I answered Superintendent Weber, deciding that said persons should not be permitted to land. On the same day and hour I instructed the surveyor to prevent the landing of said persons.

From the facts which have come to my knowledge through the reports of the superintendent of immigration and the explanations of the officers of the steam-ship company, I understand that said passengers were, on the afternoon of the 6th instant, placed on board the steam-ship *Umbria*, and the officers in charge notified that they must be returned to the country whence they came.

It is reported that at 8 o'clock, on the following day, June7th, Superintendent Watson, of the Cunard Line, informed the officers in charge that there was no accomodations on board the *Umbria* for the said passengers, and that the company intended to land them. The superintendent was informed by the officers that their orders were imperative and that they intended to obey them. The superintendent declared that the ship would not leave the pier until these persons had been landed, and that they would, in any event, take them from the vessel "down the bay" and land them at the barge office. It is further reported that Mr. Vernon H. Brown, the agent of the company, requested the officers to allow said passengers to be landed, and that, when this request was refused, he said he would land them, "collector or no collector;" that after all the gangways had been removed Mr. Brown ordered his employés to replace one of them, to allow the said passengers to land; that five of them were leaving the vessel, when the officers ascended the gangway and forced them back, and that finally the ship sailed from this port at about 9 o'clock a. m. with the said passengers on board.

Shortly after the men were brought to the barge office on a tug, accompanied by an agent of the Cunard Company, who requested Superintendent Weber to receive them, to which request the superintendent declined to accede.

The agent of the company called at this office later in the day and produced the notification sent the company that said passengers would not be permitted to land, and the envelope containing the same, which envelope, he stated, bore post-mark of having been stamped at 4.30 p. m., whereas the last personal delivery of that day was 4 p. m., and he further stated that he did not receive the notification until after the steam-ship had sailed, and, therefore, claims that he had not received, in due time, that official notice in the matter, to which he was entitled under the regulations.

He further stated that the *Umbria* had brought over steerage passengers, but that, as is customary at this season of the year, the steerage on the return trip is converted into a second cabin, and that every cabin was filled, including both the first and second cabins, and the captain and officers' quarters were, for the trip, sold to passengers, so that there was no room on the vessel for the said seven immigrants.

Mr. Brown agreed to assume the expense of taking care of said immigrants, and later in the day they were placed on Ellis Island, at the expense of the Cunard Company, and inspectors were detailed to prevent their landing.

On the 10th instant they were returned to Europe on the steam-ship *Wisconsin*, at the expense of the Cunard Steam-ship Company.

Respectfully yours,

JOEL B. ERHARDT,
Collector.

Hon. WILLIAM WINDOM,
Secretary of the Treasury.

EXHIBIT A.

OFFICE OF UNITED STATES SUPERINTENDENT OF IMMIGRATION,
Barge Office, New York, June 6, 1890.

SIR: I have to report to you the cases of August Quintif, Leon Jaye, Emile Dourlet, Julien Bernier, Olivier Bertrand and Victor Quintif and August Quintif, sr., alien passengers per steam-ship *Umbria*, June 1, 1890, and adjudged to have come here in violation of the contract labor law.

I inclose the affidavits of each of these men and the affidavits of Jules Genin, George L. Cake, Nicholas Quintif, John Wescoat, George J. Wescoat, William Button, sr., William Fronse, William H. Palmer, Jacob Hackett and Albert J. Albertson, and certain correspondence in addition thereto. I also inclose copy of newspaper published in Bruxelles, Belgium, with translation of an advertisement therein, and marked.

Respectfully yours,

JOHN B. WEBER,
Superintendent of Immigration.

Hon. JOEL B. ERHARDT, *Collector.*

EXHIBIT B.

CUSTOM-HOUSE, NEW YORK CITY,
Collector's Office, June 6, 1890.

SIR: I am in receipt of your letter of even date, adjudging Leon Jaye, August Quintif, Emile Dourlet, Julien Bernier, Olivier Bertrand, Victor Quintif, and August Quintif, sr., alien passengers per steam-ship *Umbria*, arrived the first instant, to have come here in violation of the alien contract labor law, and inclosing their affidavits and certain other affidavits, etc., bearing on their case.

I decide that said persons shall not be permitted to land, and have so instructed the surveyor.

Respectfully yours,

JOEL B. ERHARDT,
Collector.

J. B. WEBER, Esq.,
Superintendent of Immigration, Barge Office, New York.

EXHIBIT C.

CUSTOM-HOUSE, NEW YORK CITY,
Collector's Office, June 6, 1890.

SIR: You will please prevent the landing of the following-named alien passengers, who arrived per steam-ship *Umbria* on the 1st instant: Leon Jaye, Julien Bernier, Olivier Bertrand, Emile Dourlet, Victor Quintif, August Quintif, jr., and August Quintif, sr.

Respectfully yours,

JOEL B. ERHARDT,
Collector.

GEORGE W. LYON, Esq.,
Surveyor of the port.

EXHIBIT D.

CUSTOM-HOUSE, NEW YORK CITY,
Collector's Office, June 7, 1890.

SIR: Upon receipt of this communication you will please detail one day inspector and two night inspectors to Superintendent Webér, superintendent of immigration, for the purpose of preventing the landing of certain immigrants per steam-ship *Umbria.*

When their work is completed they will report back to you for duty.

Respectfully yours,

JOEL B. ERHARDT,
Collector.

GEORGE W. LYON, Esq., *Surveyor.*

EXHIBIT E.

CUSTOM-HOUSE, NEW YORK CITY,
Surveyor's Office, June 7, 1890.

SIR: In compliance with the order of the collector, dated June 6, and attached hereto, we were detailed to prevent the landing of certain alien passengers named therein.

We relieved the night inspectors in charge at 7 o'clock a. m. to-day. At about 8 o'clock we were approached by Superintendent Watson of the Cunard Line, who informed us that there were no accommodations on the vessel for said passengers and that they intended to land them. We told him that our orders to prevent their landing were imperative, and we intended to obey them. Superintendent Watson declared that the ship would not leave her pier until those parties had been landed, and that they would in any event, take them from the vessel "down the bay" and land them at the barge office.

Vernon H. Brown, the agent for said Cunard Line, requested us to allow the said passengers to land, and when we refused to comply with his wishes and told him that the collector's orders were imperative, he said he would land them, "collector or no collector."

After all the gangways had been removed, Mr. Brown ordered his employés to replace one of them, and allow the said passengers to land. Five of them were leaving the vessel, when we ascended the gangway and forced them back.

The ship finally sailed at about 9 o'clock, a. m., with the said passengers on board.

Respectfully submitted.

JAMES R. COULTER,
THOMAS KENNY,
Inspectors.

Hon. G. W. LYON, *Surveyor of the Port.*

Letter indorsed: "Respectfully forwarded to the collector for his information. June 9, 1890. G. W. Lyon, Surveyor."

EXHIBIT F.

CUSTOM-HOUSE, NEW YORK CITY,
Collector's Office, June 9, 1890.

SIR: You will cause to be placed on board the outgoing steam-ship *Wiscousin* the seven alien immigrants who arrived at this port per steam-ship *Umbria*, and were barred from landing on the 6th instant as contract laborers. Their names are: Julien Bernier, Olivier Bertrand, Emile Dourlet, Victor Quintif, August Quintif, sr., and August Quintif, jr.

Respectfully, yours,

JOEL B. ERHARDT,
Collector.

GEO. W. LYON, Esq.,
Surveyor of the Port.

EXHIBIT G.

OFFICE OF THE UNITED STATES SUPERINTENDENT OF IMMIGRATION,
Barge Office, New York, June 12, 1890.

SIR: Replying to your letter of this date, just received, asking for a statement of the facts connected with the barring of the glass-blowers who recently arrived per steam-ship *Umbria*, together with copies of such letters as we may have in our possession, showing the action of the steam-ship company or its agents in connection with the case, I have to say that all of the papers were forwarded to you on the 6th instant. These people arrived here on the *Umbria* June 1, and were held here for some days pending the procurement of additional evidence, to obtain which I sent one of the immigrant inspectors connected with this institution to Glassboro, N. J.

As soon as this came to hand all of the papers were sent to you with a statement that the seven persons in question were "adjudged to have come here in violation of the contract labor law." Upon receipt of your decision barring them, they were turned over to the surveyor's officers, and our charge of them ceased.

These papers were submitted to you, your order barring them was received, and notice mailed to the steam-ship company some time between 1.30 and 4.00 p. m. of the 6th instant. The agent of the steam-ship company claims to have received his notice by mail the following morning, but the captain of the steam-ship company undoubtedly received a notification the afternoon before when the men were taken to the ship for deportation.

On the next morning (June 7) these men were brought to the barge office on a tug, by the company's agent, with a request to receive them, to which I declined to accede, saying that my official connection ceased upon their transfer to the surveyor's officers

in accordance with your decision and order. Subsequently I was called upon by Deputy Collector Phelps, and Mr. Ward, for the steam-ship company, and asked if I had any objection to permitting the use of one of the buildings on Ellis Island for the temporary detention of these men, under the charge of the surveyor's officers, and expenses of the proceeding to be borne by the steam-ship people.

It is claimed there is some doubt as to the authority of the steam-ship agents to hold detained immigrants, and that, therefore, it was necessary to have duly authorized officers of the Government to detain immigrants prohibited from landing. These men were held at Ellis Island until Tuesday, the 10th instant, when, as I am informed, they were returned by the steam-ship *Wisconsin*.

Respectfully, yours,

JOHN B. WEBER,
Superintendent of Immigration.

Hon. JOEL B. ERHARDT, *Collector.*

CUNARD STEAM-SHIP COMPANY,
New York, June 11, 1890.

SIR: I learn from the Washington correspondence of the New York papers that a resolution has been introduced in Congress requiring you to inform the House whether the Cunard Steam-ship Company had refused to obey the orders of the United States officers relative to the return by the steam-ship *Umbria* of certain passengers alleged to have been landed at New York in violation of the so-called "contract labor" law.

In view of the introduction of that resolution I deem it a duty to myself, as well as to the Cunard Company, to make the following statement of facts:

So far as the company and Captain McKay, of the *Umbria*, are concerned, permit me to say that they are in no wise responsible for the course that was pursued with regard to these particular passengers. Captain McKay, in whatever he did, acted under my orders and subject to my direction as his superior in the premises.

Although agent for the Cunard Steam-ship Company, I am a citizen of the United States, and take as deep an interest in the enforcement of its laws and in upholding the integrity and honor of the nation as any other citizen who is impressed, as I am, with his absolute duty to be at all times not only law-abiding, but determined to give assistance to the officers of the law in the enforcement of that law, whatever it may be. The facts, briefly stated, are these:

I ascertained at 7 o'clock on Saturday morning, the 7th instant, that seven alleged contract labor passengers, with their families, had been put aboard the *Umbria* at New York, on the evening of the 6th, under charge of customs officers, with the demand that such passengers should be returned to Liverpool by that steamer. No notice whatever had been given either to the captain, or to me as agent, of the Cunard Steam-ship Company, previous to the placing of said passengers and their families on board. In the absence of any such notice no provision had been made for the accommodation of such persons, and under existing circumstances it was at that time impossible to make any. The ship had no steerage accommodations whatever, which fact had been advertised for sixty days in advance of her sailing date. Every available room in the ship had been sold, and if these people were to be carried it must be on deck, where they would be exposed for seven or eight days to the vicissitudes of the weather. The ship was advertised to sail at 8.30 of the morning following the night these passengers were put on board. Between the time the passengers were put on board and the hour for sailing it was impossible for me to communicate with the collector of customs at this port or the commissioner of emigration. I especially call your attention to the fact that the passengers were put on board after official business hours were ended on the 6th, and before official business hours commenced on the 7th. These facts I personally explained to the United States officers in charge of the passengers, and notified them that in event of their preventing these people from relanding at the dock I should be compelled to reland them from a tug before the ship sailed; the officers threatening that if any attempt were made to reland the passengers from the ship while lying alongside the wharf they would prevent it by force.

I furthermore stated that under no circumstances was the ship to sail until the passengers had been relanded, and the ship did not sail until after that had been accomplished. I also informed the officers that it would be dangerous to disembark the women and children from the steamer to the tug, whereupon the women and children were relanded at the wharf without any further protest from the officers, the men remaining on board. I then directed Captain McKay to move his ship into the river and lie there until the tug should come alongside and take off the passengers, which was done, after which the ship sailed. I immediately called upon Collector Erhardt and Commissioner Weber and explained to them the facts. The collector received me courteously, listened attentively, and was apparently satisfied with my explanation.

The only question which appeared to remain for discussion was as to the custody of the passengers pending their being returned under the statute. I claimed that whatever might be the powers of the United States officers, the Cunard Steam-ship Company had no right to restrain them of their liberty. Whereupon it was arranged that the men were to be held at Ellis Island in custody of the officers until they should be returned to Liverpool, the Cunard Steam-ship Company making the necessary provision for their maintenance while there.

Two days later, at the expense of the Cunard Company, the passengers were put on board the Guion steam-ship *Wisconsin*, and sailed for Liverpool, the collector having issued the necessary permit. This I believed at the time, and still believe, was all that the law required. There never was any intention on my part to violate either the letter or spirit of the law, and I fail to see that there has been in fact any violation in the present case.

If I may be permitted, let me call your attention to the phraseology of the statute. It is as follows: "The expenses of such return of the aforesaid persons not permitted to land, shall be borne by the owners of the vessel in which they came."

With regard to this particular provision, as I understand it, these passengers were never technically landed, and that so far as the expense is concerned, that expense has been born by the Cunard Steam-ship Company.

The next provision of the statute is as folllows: "The vessel refusing to pay such expense shall not thereafter be permitted to land at or clear from any port of the United States, and such expense shall be a lien on said vessel."

With regard to this, I beg to say that no officer or representative of the Cunard Steam-ship Company has ever refused to pay such expenses, and that it is the desire of the Cunard Steam-ship Company, as well as my own purpose as a citizen, to at all times conform both to the letter and spirit of the law.

I have necessarily been obliged to inform myself as to the legal meaning and purport of this statute, and have been so informed from the time of its passage. I am advised by counsel that the statute does not require that such passengers should be returned by any particular ship, but simply that they should be returned, and at the expense of the vessel bringing them. This has been done in the present case.

It is apparent that circumstances may arise which would make it physically impossible to return passengers by the same ship, as in the present case, and that under such circumstances the best that can be done is to return them at the earliest possible date thereafter; and that such return at such later date is an injury to no one, provided the object of the law is accomplished, viz—that the passengers are returned, and that the Government is put to no expense whatever in the premises.

It might have been possible, had I been informed at a proper time, to have provided for these passengers; but I was not so notified. As a matter of fact, the official notice was not received by me until after the ship had actually sailed.

I now respectfully submit the foregoing statement, and request that in event of the passage of such resolution, and your rendering a report to the House, in conformity with its terms, that I may have the opportunity of being heard and producing my witnesses before such report is sent in.

I have the honor to remain, your obedient servant,

VERNON H. BROWN.

Hon. WILLIAM WINDOM,
Secretary of the Treasury.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 421.

COMPENSATION OF UNITED STATES MARSHALS FOR SERVICES IN OKLAHOMA TERRITORY.

LETTER

FROM

THE ATTORNEY-GENERAL,

INCLOSING

Copy of a letter from W. P. Hackney, of Guthrie, Oklahoma Territory, and copies of various other letters and petitions, also certificates of United States Marshals Jones and Walker, of Kansas, to the services performed by their deputies as police officers for the people of the Territory; and asking that suitable remuneration be made them by Congress.

JUNE 20, 1890.—Referred to the Committee on Appropriations.

DEPARTMENT OF JUSTICE,
Washington, D. C., June 19, 1890.

SIR: On the 12th instant the President referred to this Department a letter of the 6th instant from W. P. Hackney, of Guthrie, Oklahoma, a copy of which is herewith inclosed, together with copies of letters forwarded by him of commanding officers at Oklahoma and Guthrie, of petitions of the citizens, and of certificates of United States Marshals Jones and Walker, of Kansas, to the services performed by their deputies as police officers for the people of the Territory, which services were performed without compensation, but for which he thinks that suitable remuneration should be made by Congress.

In compliance with his request they are referred to Congress for action.

Respectfully,

W. H. H. MILLER,
Attorney-General.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

GUTHRIE, OKLAHOMA, *June* 6, 1890.

DEAR SIR: I inclose herewith petitions of the citizens of Oklahoma, and letters of commanding officers at Oklahoma City and Guthrie, and certificates of United States Marshal Jones and United States Marshal Walker of services performed by their deputies therein named as police

officers for the people of this territory, which services were performed without compensation, asking that suitable remuneration be made to them by Congress.

I have to request that you refer with your indorsement the same to the proper committee in Congress, to the end that these men may be properly compensated for the arduous duties performed by them in the preservation of peace and good order among the people of this territory. They deserve well of their country, and ought to be paid therefor. Be kind enough to acknowledge receipt of this, with the information as to whom and when they are referred, and oblige.

Very respectfully, your obedient servant,

W. P. HACKNEY.

The PRESIDENT,
Washington, D. C.

To the President of the United States, and to the members of the Senate and the House of Representatives thereof, greeting:

We, the undersigned citizens of the territory known and called Oklahoma, who have resided here since April 22, 1889, know something of the difficulties and dangers which attended the opening of such territory—an epoch, as it were, in the history of the people of this nation. When it is remembered that 2,000 000 acres of a wilderness was occupied by 90,000 people in a day, and without laws, courts, or officers, except such as the Federal authorities gave us, maintained peace and good order without bloodshed, such people, we believe, deserve great consideration at the hands of the legislative and executive departments of our Government. And when the untold conflicting interests of all are considered, statesmen may well inquire how such a state of affairs were secured and maintained. And to such we take pleasure in perpetuating the record of duties performed and unceasing vigilance maintained on the part of the deputy United States marshals doing duty in the territory, whose presence at all times were and have been a tower of strength to the law-abiding portion of our people.

We are not unmindful of the fact that it has been popular to visit upon these unprotected officials malevolent criticism of the severest kind; and yet they have successfully dealt with the worst class of men that ever cursed civilization—the political offal of every community in the nation. These officers, taking their lives in their hands, have faced death at all times and under all circumstances for our peace and comfort, and this without compensation of any kind therefor, there being no law providing for such. Thus they have, in season and out, stood between the lawless and the venal on the one hand and the law-abiding and honest citizens on the other hand. These officers, with ill-defined authority, having only the good of all at heart, have been unceasing in their efforts to maintain order among us, and for that purpose have acted as our police officers, notwithstanding the fact that under the law of the nation no such responsibilities rested upon them. And now, that we are about to have a government and laws, courts, and officers of our own, it seems to us but just and fair that Congress make provision by law for the payment of these men out of an overflowing national treasury; this upon that principle of justice and equity "that the laborer is worthy of his hire." Their names will be furnished you by the United States marshal of Kansas and the Indian Territory, and we beg of you a favorable consideration of their claims to the end that suitable remuneration be made them therefor.

This is no idle petition gotten up for mere buncombe, but it is a petition of business men and honorable citizens who appreciate their services in our behalf and who believe that you should make some reparation to these men who have been so viciously maligned and misrepresented both in Congress and out. It may be that here and there deputy marshals can be found who placed their own construction upon the laws of the United States and sought to occupy a portion of the public domain in violation thereof. Yet their acts are no justification for appropriating the services of these men without compensation.

John D. Miles, Lisbon mayor; W. A. Wilson, mayor of Kingfisher; J. O. Allming, receiver United States land office; J. C. Robberts, Ry. United States land office; Fred S. Rogers, United States commissioner; L. P. Hudson, attorney at law; J. W. McLoud, attorney at law; C. P. R. Brownlee, attorney at law; T. P. Crosthwait, attorney at law; N. Campbell, attorney at law; Virgil M. Hobbs, attorney

at law; R. A. Lyle, attorney at law; Chester Howe, attorney at law; J. W. Morris, attorney at law; W. W. Voffsinger, attorney at law; W. E. Earl, attorney at law; Wm. Callahan, cigars; Theo. Roberts, Rock Island Hotel; J. W. Mitts (came in on the 24th), postmaster; H. P. Smith, merchant; Prier P. Smith, merchant; J. C. Post, banker; Paul Jones, attorney at law; James A. Maris, attorney; Norris Sprigg, attorney at law; James E. Burns, city clerk of Lisbon from April 22 to November 15; C. P. Hickmiller, pioneer druggist; W. H. Dollham, Kingfisher; Adams & Ross, feed and flour; L. H. Noel, druggist; H. C. St. John, attorney at law; Henry Corlett, grocer, feed; B. F. Webb, physician and surgeon; T. C. Hobson, feed-barn; J. A. Bright, physician and druggist; W. H. Schick, clothier.

Leroy Guthrie, city attorney; W. C. Jones, ex-United States marshal; John A. Blackburn, city recorder; W. L. Couch, ex-mayor; Sidney Clarke, president city council; J. E. Jones, city council; James Guarg, president City Bank; L. O. Gilbert, City Bank; A. S. Welsh, City Bank, J. P. Baile, Oklahoma Bank; G. B. Farrar, Oklahoma Bank; J. T. Hickey; William A. Munro, United States commissioner; J. P. Luce, G. A. Beidler, postmaster; C. W. Routh, Frank McMaster, East Guthrie; Cy. Leonard, real estate; B. H. Miller, L. O. Williams, F. M. Josslan, M. D., Carey & Johnson, Moses Neal, George A. Soule, Palace Clothing House, Wand, Amkur Company, wholesale and retail druggists; R. J. Coons & Co., druggists: Gerson & Bros., clothing merchants; J. W. Baleo, H. H. Lechner, C. B. Emerson, George W. Lemoyne, Curtis L. Wagner, John W. Ellis, N. N. Miller, C. H. Frost, J. H. Bacon, Henry Story, A. J. Beal, mayor Oklahoma City; A. B. Hammer, present recording clerk; Charles Chamberlin, city engineer.

W. M. Alljson, United States circuit court commissioner; C. M. Bames, receiver public moneys Guthrie land office; G. A. Sears, United States deputy revenue collector; W. A. Thomas, banker; J. W. McNeal, banker; W. S. Robertson, United States circuit court commissioner; J. M. Ragsdall, banker; Linus S. Webb, attorney; Charles Smith, M. D.; J. C. Nofins, attorney; A. M. McElhinney, druggist; P. J. Carmand, attorney at law; A. C. Schnell, real estate agent; S. B. Bevans, land agent and attorney; Charles A. Berger, attorney at law; W. P. Meadows, attorney at law; John O. Delle, register; Harper J. Cunningham, attorney at law; Gray Bros., grocers; John H. Catteral, attorney at law; A. J. Spengel, furniture; C. V. Monnt, jeweler; W. P. Thoryeson; S. P. Gibbs, D. D. S.; Ed. New; Fred. A. High, boots and shoes; E. E. Lauck; A. N. J. Crook; L. R. Delaney, attorney at law; Agent A. F. & S. F. R. R. Company; Volney Hoggatt, attorney; L. I. Beland, Sbr. Yht; John M. Galloway; Y. F. Freeman; Charles Brown; Frank C. O'Neel; T. J. Lowe; S. G. Hunn, agent Wells-Fargo Express; Harry Ruffner, stationer, clerk upper court; William A. Ragsden; C. W. White, jeweler; D. L. Melone & Brother, clothing and dry goods; Jomes Dooley, Mayor of Guthrie, Ind. T.; Thurston & Metteck, attorneys of Guthrie, Ind. T.; Kaylor & McDonald, general merchandise; A. W. Bennett, grocer; Salmon & Nicholson, grocers; Frank H. Greer, editor Oklahoma Capital; Randall & Lyon, hardware.

P. C. Cowling, creamery; J. A. Mann, dry goods, clothing, etc.; James Welton, jeweler; John C. Tutt, merchant; T. E. Tribbly, physician; O. D. Halsell, livery; J. W. McKinney, merchant; Ingram & Renfro, druggists; W. T. Willis, attorney; E. G. Willikan, real estate agent; J. M. Walters, merchant tailor; J. E. Urban, real estate agent; Baldwin & Nix, grocers; Thomas S. Jones, judge, appellate court; (Rev.) William F. King, Presbyterian church; D. Stevens, M. D.; Bradley & Randall, attorneys; Winfield S. Smith, attorney at law, Guthrie, Ind. T.; Emery A. Foster, attorney; C. A. Markland, attorney at law; John Golobie, attorney; Fred. M. Elkin; C. B. Freeman, attorney at law; T. A. Stockslager, mayor, East Guthrie; Allen Caruthers, attorney at law; Ball Bros., grocers; L. R. Ketchum, M. D.; Wm. Bluicoe, lumber; A. H. Waite, dry goods; George Kendall; H. D. Ware; T. W. Ryan, meat market; C. F. Smith, hotel; J. W. Johnson, attorney; Ed. McNulty, duggist; Ponnert Hinkle, grocer; Wm. Plag, hardware; J. C. Jamison; D. B. Kelley, druggist; Baxter & Cammock, liverymen; Holman Bros., San Francisco Restaurant; Rhoads Bros., cigar dealers; George R. Strode, jeweler; Harry P. Clark, city treasurer, Guthrie, Ind. T.; William Sexaner Baker; Joseph Mitschler, meat market; J. R. Myrn; Siemer & Co., grocers.

CAMP AT OKLAHOMA, IND. T., *April* 12, 1890.

SIR: Referring to petition of officials and citizens of Oklahoma, I desire to state that the United States deputy marshals in this country, with some few exceptions, have performed their duty in a faithful, prompt, and energetic manner. They have been compelled by the situation here to do many acts that under other circumstances would not properly come under their jurisdiction, but which were absolutely necessary for the protection of property and preservation of life. They have in fact been compelled to, in many cases, take the place of ordinary policemen in the absence of any such.

Their duties have been dangerous and extremely difficult, constantly, and in the great majority of cases without any reward or remuneration whatever.

I therefore respectfully recommend that special authority be granted to pay all worthy deputies a per diem compensation while employed in this Territory.

Very respectfully, your obedient servant,

D. F. STITES,
Captain, Tenth Infantry, Commanding.

Hon. W. H. H. MILLER,
Attorney-General, Washington, D. C.

CAMP AT GUTHRIE, IND. T.,
April ——, 1890.

SIR: Referring to petition of officials and citizens of Oklahoma, I desire to state that the United States deputy marshals in this country, with some exceptions, have performed their duty in a faithful, prompt, and energetic manner. They have been compelled by the situation here to do many acts that under other circumstances would not properly come under their jurisdiction, but which were absolutely necessary for the protection of property and preservation of life. They have, in fact, been compelled to, in many cases, take the place of ordinary policemen in the absence of any such.

Their duties have been dangerous and extremely difficult, constantly, and in the great majority of cases without any reward or remuneration whatever.

I therefore respectfully recommend that special authority be granted to pay all worthy deputies a per diem compensation while employed in this Territory.

Very respectfully, your obedient servant,

H. G. CAVENAUGH,
Captain, Thirteenth United States Infantry, Commanding.

Hon. W. H. H. MILLER,
Attorney-General, Washington, D. C.

This is to certify that Ransom Paye was appointed deputy United States marshal under me on the 9th day of November, 1888, and continued in my employ as deputy United States marshal until the 27th day of May, 1889.

Dated this 25th day of March, 1890.

W. C. JONES,
Late United States Marshal for Kansas.

This is to certify that George L. Wheeler, Ransom Payne, John Hixon, M. W. Robacker, D. F. Wyatt, A. G. Jones, O. S. Rarick, J. B. Koonce, C. B. Bickford, J. G. Varnum, T. P. Christie, T. H. East, George E. Thornton have been my deputies on duty in the Oklahoma country all of the time. That during that time their principal business has been to preserve the peace, and in order to do this successfully they have been compelled to, and they have performed police duty generally, both day and night, and this without any compensation whatever. I have no authority to pay them for services other than the service of the process of the court which has necessarily been light, while the other duties have been burdensome and vexatious, and reponsible in the extreme. And they deserve at the hands of Congress great consideration for the faithful and meritorious manner in which they have discharged every trust, and I bespeak for them ample compensation therefor in the miscellaneous appropriation bill.

R. L. WALKER,
United States Marshal.

Name.	Appointed.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. Doc. No. 422.

MESSAGE

FROM THE

PRESIDENT OF THE UNITED STATES,

RELATING

To House Bill (H. R. 3934) to authorize the Board of Supervisors of Maricopa County, Ariz., to issue certain bonds in aid of the construction of a certain railroad.

JUNE 20, 1890.—Referred to the Committee on Territories.

TO THE HOUSE OF REPRESENTATIVES:

I return without my approval the bill (H. R. No. 3934) "to authorize the board of supervisors of Maricopa County, Arizona, to issue certain bonds in aid of the construction of a certain railroad."

This bill proposes to confer authority upon the supervisors of the County of Maricopa to issue county bonds at the rate of four thousand dollars per mile in aid of a railroad to be constructed from Phœnix northwardly to the county line, a distance estimated at fifty miles, but probably somewhat longer. The bill seems to have passed the House of Representatives under an entire misapprehension of its true scope and effect. In the brief report submitted by the Committee on Territories it is said that, "By the terms of the bill the county receives *bonds* in payment of the money proposed to be advanced," and in the course of the debate the Delegate from Arizona mistakenly stated in response to a request for information that the bill proposed a loan by the county, in exchange for which it was to receive the bonds of the railroad company. In fact, the bill does not provide for a loan to be secured by bonds, but for a subscription of stock. How far this mistake may have affected the passage of the bill cannot of course be known.

The bill does not submit the question of granting this aid to a vote of the people of the county, but confers direct authority upon the supervisors to issue the bonds. It is said, however, that in April, 1889, an election was held to obtain the views of the people upon the question. It does not appear from any papers submitted to me who were the managers of this so-called election, what notice, if any was given, what qualifications on the part of voters were insisted upon, if any, or in what form the question was presented. There was no law providing for such an election. Being wholly voluntary, the election was, of course, under the management of those who favored the subsidy, and was conducted without any legal restraints as to the voting or certification. I have asked for a statement of the vote by precincts, and have been given what purports to be the vote at twelve points. The total affirmative vote given was 1,975, and the negative 134. But of the affirmative vote 1,543 were given at Phœnix and 188 at Tempe,

a town very near to Phœnix. If there were no other objections to this bill I should deem this alone sufficient, that no provision is made for submitting to a vote of the people, at an election after due notice and under the sanction of law, the question whether this subscription shall be made.

But, again, the bill proposes to suspend for this case two provisions of the act of Congress of July 30, 1886.

First. That provision which forbids municipal corporations from subscribing to the stock of other corporations or loaning their credit to such corporations; and second, that provision which forbids any municipal corporation from creating a debt in excess of 4 per cent. of its taxable property as fixed by the last assessment. The condition of things then existing in Arizona had not a little to do with the enactment by Congress of this law, intended to give to the people of the Territories that protection against oppressive municipal debts, which was secured to the people of most of the States by constitutional limitations. The wisdom of this legislation is not contested by the friends of this bill, but they claim that the circumstances here are so peculiar as to justify this exception. I do not think so. In the States, the limitation upon municipal indebtedness is usually placed in the constitution, in order that it may be inflexible. If a showing of need, gain, or advantage is to overcome the barrier then it is scarcely worth while to declare a limitation. Only a belief that the limit is inflexible will promote care and economy in administration. If this bill becomes a law how can Congress refuse to any county in any of the Territories the right to subscribe to the stock of a railroad company—especially where the subscription would not exceed the debt limit—upon a showing of the advantages of better and cheaper communications.

Maricopa County is one of great extent. Its northern boundary is ninety-five miles long—its southern boundary sixty-six—its eastern forty-five and its western one hundred and two. This great area is to be taxed to construct a road which can in the nature of things be of advantage to but a fraction of it. There is no unity of interest or equality of advantage. It may very well be that a section of these lands along the line of the road, and especially town lots in Phœnix, would have an added value much greater than the increased burden imposed, but it is equally clear that much property in the county will receive no appreciable benefit.

The existing bonded indebtedness of Maricopa County is $272,000; the tax assessment of the county is about $5,000,000; and the population is estimated, by multiplying the vote cast in 1888 by 6, at about 12,000. It will be seen that the bonded debt—to say nothing of a floating debt which is said to be small—is already largely in excess of the legal limit, and it is proposed to increase it by a subscription that will certainly involve $200,000, and possibly $250,000. If the bill becomes a law the bonded indebtedness will very closely approximate ten per cent. of the assessed valuation of the property of the county.

The condition of things in the county of Yavapia, lying immediately north of Maricopa, and through which this road is also to run, though not directly affected by this legislation, is very instructive in this connection.

By an act of the legislature of Arizona, passed the year before the act of Congress to which I have referred, Yavapia County was authorized to subscribe $4,000 per mile to this line of road. The total length of the road in the county was 147 miles, and 74 miles to Prescott have been constructed. The Secretary of the Territory, in response to an

inquiry, states the debt of Yavapia County at $563,000, and the assessment for taxation at "between six and seven millions." There are seventy-three miles of road yet to be built from the present terminus, Prescott, to the south line of the county, for which Yavapia County must make a further issue of bonds of $292,000, making a total county debt of $855,000, or above 13 per cent. upon the taxable assessment (taking that at $6,500,000), and a per capita county debt of nearly $85, taking the population at about 10,600, as stated in the report of the Senate committee. Surely no one will insist that the true and permanent prosperity of these communities will be promoted by loading their energies and their industries with these great debts. I feel the force of the suggestion that the freight charges now imposed upon the farm and orchard products of Maricopa County by the railroads now in operation are oppressive. But this bill does not afford much relief even in that direction. There would be but one competing point, viz, Phœnix. At all other points on the proposed road the people would be subject to the exaction of just such rates as are demanded by the other lines. If this bill contained some effective provision to secure reasonable freight rates to the people who are to be taxed to build the road, it would go far to secure my favorable consideration for it.

I have carefully examined the reports of the committees and every argument that has been submitted to me by the friends of the bill, but I can not bring myself to believe that the permanent welfare of the communities affected by it will be promoted by its passage.

BENJ. HARRISON.

EXECUTIVE MANSION,
June 20, 1890.

[Fifty-first Congress of the United States of America, at the first session, begun and held at the city of Washington, on Monday, the second day of December, 1890.]

AN ACT TO AUTHORIZE THE BOARD OF SUPERVISORS OF MARICOPA COUNTY, ARIZONA, TO ISSUE CERTAIN BONDS IN AID OF THE CONSTRUCTION OF A CERTAIN RAILROAD.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the board of supervisors of Maricopa County, in Arizona Territory, be, and they are hereby, authorized to issue the bonds of said county to aid in the construction and equipment of a railroad to, from, or through the city of Phœnix, in said Maricopa County, to the northern boundary line of said county, which shall form a part of a continuous line from Phœnix, by way of Prescott, to the Atlantic and Pacific Railroad, in the Territory of Arizona, which bonds shall be issued at the times, at the rate per mile, in the form, and as provided by this act.

SEC. 2. That whenever Joseph Reynolds, as trustee, or his assign or incorporated grantee, shall have completed a roadbed and laid the ties and rails thereon for the distance of ten miles along the route of said road in said county of Maricopa, the board of supervisors of said county is hereby empowered, within ten days thereafter, to issue the bonds of said county for said ten miles, in the sum of four thousand dollars per mile, which said bonds shall be delivered to said Joseph Reynolds, trustee, or to his assign or incorporated grantee so constructing said railroad, upon proof, including the certificate of the chief engineer having in charge the construction of said road, being filed with said board of supervisors showing the construction and completion of said ten miles of railroad in the manner and to the extent as above required; and as often as ten miles along the route of said road additional to said first ten miles shall be constructed as aforesaid in said county of Maricopa, said board of supervisors of said county are hereby empowered, in like manner and upon like proof, to issue and deliver the bonds of said county to said Joseph Reynolds, as trustee, or to his assign or incorporated grantee, in like amounts per mile: *Provided*, That if the last section of said road to be constructed in said county of Maricopa shall be less than ten miles, then whenever the same shall have been constructed as aforesaid, and proof thereof made to and filed with said board of

supervisors in the manner aforesaid, said board of supervisors may thereupon, in like manner and form, issue and deliver the bonds of said Maricopa County, in the same amount per mile for said last section: *Provided*, That said county of Maricopa shall, upon the issue and delivery of said bonds, receive a like amount of full-paid non-assessable stock from said Joseph Reynolds, trustee, or from his assign or incorporated grantee, said stock being issued and based upon said railroad so constructed, or to be constructed as aforesaid.

SEC. 3. That the bonds provided for in this act shall be issued in the name of the county of Maricopa, in the usual form of municipal bonds, and shall be signed by the chairman of the board of supervisors of said county in his official capacity, and countersigned by the treasurer of said county, under the seal of said board of supervisors, each bond to be of the denomination of one thousand dollars, payable thirty years after date thereof, with interest at the rate of seven per centum per annum, payable annually, said principal and interest to be made payable at the office of the county treasurer of said Maricopa County, or at the office of any trust company in the city of New York that said Joseph Reynolds, trustee, or his assign or his incorporated grantee, shall select. The interest, rate, and time of payment shall be evidenced by coupons in the usual form attached to said bonds.

SEC. 4. That said board of supervisors of Maricopa County are hereby empowered, at their first regular meeting after the first issue and delivery of said bonds under the provisions of this act, and annually thereafter, and at the time and in the manner provided by the general revenue laws of the Territory of Arizona for levying taxes, to levy such additional taxes as may be necessary to raise a sum of money sufficient to pay the interest as the same matures on any outstanding bonds issued by said county of Maricopa under the provisions of this act: *Provided*, That in the year nineteen hundred and one, and every year thereafter until both principal and interest of said bonds shall have been paid, said board of supervisors may, in the manner and at the time provided by the general revenue laws of the Territory of Arizona for levying taxes therein, levy such further and additional taxes in said county as may be required to raise a sum of money sufficient to pay the annual interest upon said bonds, and that will insure the payment of the principal of said bonds and the redemption of the whole amounnt of said bonds outstanding at the date of their maturity; that the taxes so levied and collected by the treasurer of said county of Maricopa be placed in a fund to be denominated "railroad, interest, and redemption fund."

SEC. 5. That the treasurer of said Maricopa County shall, out of said "railroad, interest, and redemption fund," and if there be not sufficient in said fund, then the amount of the deficiency may be paid out of the general fund of said county annually upon each bond, to pay the interest which shall then have accrued thereon; and upon the payment by said treasurer of such interest he shall require the coupon or coupons representing the interest to be surrendered to him for cancellation, which shall be his voucher for the money so paid thereon.

SEC. 6. That said board of supervisors are further authorized and empowered to enter into a contract, in the name and under the seal of said county, with said Joseph Reynolds, as trustee, or with his assign or incorporated grantee, touching the issue of the bonds herein provided for, to aid in the construction of the said road, and in and by said contract said board of supervisors are hereby authorized to agree for and on behalf of said county with said Joseph Reynolds, as trustee, or with his assign or incorporated grantee, for the issue and delivery of the said bonds in the manner and for the purpose, and as in this act provided: *Provided, however*, That any contract heretofore made by said board of supervisors for the issuance of said bonds in conformity with the provisions of this act is hereby ratified.

SEC. 7. That this act shall not apply to any section or portion of said railroad which shall not be completed in the manner aforesaid on or before January first, anno Domini eighteen hundred and ninety-three, it being the intention of this act to give and extend the time for the completion of said road to January first, anno Domini eighteen hundred and ninety-three.

SEC. 8. That all acts or parts of acts in conflict with this act are hereby repealed in so far as the same mighted be deemed or taken to affect or prohibit the action of said board of supervisors of Maricopa County as herein authorized and provided.

O

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 423.

APPROPRIATION FOR NORTH DAKOTA AGRICULTURAL EXPERIMENT STATION.

COMMUNICATION

FROM

THE ACTING SECRETARY OF AGRICULTURE,

IN REFERENCE TO

A deficiency in the appropriation for the North Dakota Agricultural Experiment Station and stating that said appropriation should be made.

JUNE 21, 1890.—Referred to the Committee on Appropriations.

DEPARTMENT OF AGRICULTURE,
OFFICE OF ASSISTANT SECRETARY,
Washington, June 20, 1890.

SIR: I have the honor to call your attention to a deficiency in the appropriations for agricultural experiment stations for the present fiscal year.

North Dakota, by an act approved March 8, 1890, established an agricultural college, under the United States act of July 2, 1862, which provides for the endowment of colleges for the benefit of agriculture and the mechanic arts; and established also, as a department of the college, an agricultural experiment station, under the United States act approved March 2, 1887, which provides for the establishment and maintenance of agricultural experiment stations in the several States and Territories. The college and station were formally organized at a meeting of the board of directors May 1, 1890. The North Dakota Experiment Station is therefore entitled to an appropriation for the current fiscal year.

Under the act of March 2, 1887, the annual appropriation for each station is $15,000. This station has been in existence two months. If the appropriation be made in proportion to this time it should be $2,500. A direct appropriation should be made.

I have the honor to be, respectfully,

EDWIN WILLITS,
Acting Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. Doc. No. 424.

LINEAL PROMOTION IN THE LINE OF THE ARMY.

LETTER

FROM

THE SECRETARY OF WAR,

TRANSMITTING

A letter from Second Lieut. Edwin A. Root on the subject of lineal promotion in the line of the Army, as proposed by H. R. 8202 and Senate bill 3716, of the present Congress, with indorsement of the Major-General Commanding and also of the Secretary of War.

JUNE 25, 1890.—Referred to the Committee on Military Affairs.

WAR DEPARTMENT,
Washington, June 24, 1890.

SIR: I have the honor to transmit for the chairman of the Committee on Military Affairs, to whom it is addressed, a letter from Second Lieut. Edwin A. Root, Twenty-second Regiment of Infantry, dated at Fort Abraham Lincoln, N. Dak., June 7, 1890, on the subject of lineal promotion in the line of the Army, as proposed by House bill 8202 and Senate bill 3716, of the present Congress, and to invite attention to the indorsement of the Major-General Commanding the Army, dated the 21st inst., which is as follows:

In view of the action taken in the past and of pending legislation, the Major-General Commanding does not consider that it will be wise to reopen the question.

I fully concur in this view.

Very respectfully,

REDFIELD PROCTOR,
Secretary of War.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

FORT ABRAHAM LINCOLN, N. DAK., *June 2, 1890.*

Hon. B. M. CUTCHEON,
Chairman Committee on Military Affairs,
House of Representatives, Washington, D.C.:

(Through proper military channels.)

SIR: I have the honor very respectfully to forward herewith for consideration in connection with the proposed legislation on "lineal promotion in the line of the Army," as embodied in H. R. 8202 and S. 3716, a list of the officers of the infantry below the grade of major, rearranged in relative rank in each grade in the order which would have

existed if promotions had always been made since July 28, 1866, in accordance with the provisions of the above acts.

A few words in explanation of the list is necessary, as the data at this post for compiling an absolutely accurate one in every particular case is not obtainable, notwithstanding which, however, I think the exceptional cases will be found very few indeed, and could be easily corrected from the complete records in the War Department.

The press report your committee as saying in its report in favor of H. R. 8202 that—

> The present system of regimental promotion up to the rank of captain has worked very unequally and inequitably. It would be impossible to enumerate all the instances of injustice that arise from this system of regimental promotion.

The same journals quote the honorable the Secretary of War as saying—

> That the present system of regimental promotion has wrought injustice to many officers.

And likewise the Commanding General as saying:

> If, on the other hand, it be admitted that the vested rights of officers, acquired under the present and past system of promotion, do not forfeit legislation designed to correct the relative injustice heretofore done, and it be designed to amend the bill for this purpose, I would suggest the following amendment in lieu of the one first suggested, viz:
>
> *Provided*, That in the line of the Army the officers of each grade below that of major shall be arranged in relative rank in that grade in the order which would have existed if promotion had always heretofore been made in accordance with the provisions of this act.

The effect of this provision, he thinks, would be to correct the relative injustice heretofore done so far as can be without depriving any officer of his present commission and without increasing the number of officers of any one grade. "It would simply," General Schofield says, "regulate the promotion of all to the next higher grade according to the lineal principle as if that had always been recognized."

Attention is also invited to that portion of the Commanding General's indorsement on the protest against lineal promotion submitted by officers of the Fourth Cavalry, whereon he not only disapproves of the present mixed system, but states as his belief that the system here shown to be possible, to be the best.

He also says in an indorsement on Lieutenant Swift's case:

> If it were considered possible to rearrange the officers of the line as they would have been arranged if lineal promotion had heretofore prevailed, impartial justice would be done to all.

It is my purpose here to try to show by the accompanying list that this recommendation of the Commanding General is not only possible, but is the only one by which past injustice may be remedied as far as possible and like injustice in future prevented.

By this method every objection raised by Lieut. Eben Swift, Fifth Cavalry, one of the cases calling forth proposed amendments to the original bills, will vanish, and he will not only take his proper place in the list of first lieutenants, but forever after (during peace) get his other promotions in proper order.

I also wish to show wherein great injustice may arise if this re-arrangement be not made; but instead, lineal promotion is begun, as proposed, with the now second lieutenants. Under the proposed amendment Second Lieut. J. D. Mann, Seventh Cavalry, will be the first to obtain his promotion to a first lieutenant. He graduated from the U. S. Military Academy June 15, 1877. His promotion might take him to the Ninth Cavalry, in which there are thirteen first lieutenants whom he

ranked from the date of graduation until the present system of promotion made them first lieutenants over his head. The junior first lieutenant of that regiment, First Lieut. E. F. Ladd, graduated seven years after Lieutenant Mann. Under the proposed amendment Lieutenant Ladd would receive his captaincy before Lieutenant Mann, and might possibly go to the company of which Lieutenant Mann was first lieutenant, presenting the anomaly of a company having a first lieutenant of seven years' longer service than its captain, and furnishing the strongest example of an injustice uncorrected, in fact made more permanent, by the proposed law. Likewise nearly one-third of the second lieutenants of cavalry would be similarly placed. Like cases of permanently fixing injustice upon second lieutenants of artillery and infantry by the passage of the amendment, to begin lineal promotion with the now second lieutenants, can be cited in great numbers.

No complaint can be made against the system here proposed by any one that banishes selfish, personal motives in considering it, and looks only at the justice, the good of the service, and the best interests of the Government.

The last few weeks have shown, however, that there are some who, by the present system of regimental promotion, have jumped many of their former seniors, and others who expect to do the same, thereby unjustly gaining rank above them, who will protest bitterly against being relegated to their proper places, and try to prevent those to whom an injustice has been done, having their rights restored and partial reparation accorded them. But no personal, selfish, or other considerations of a few should be allowed to stand before right and justice being done to the many that my list will show have been suffering an injustice for many years.

Those who will oppose this system, for reasons born of selfishness, will raise all manners of objections and try to show that it is impracticable, etc., and these objections I wish to refute by proving that to rearrange the different grades is an easy and simple matter, remedying all the evils and injustice that many are now laboring under as regards rank.

It is true that, in a few cases, officers who now stand at the head of the list for promotion in their regiments may have their promotion delayed a short time by this re-arrangement, but no injustice is being done them, since they are there above men who were their seniors on entering the service. Nor is it thought there can be any question of the power of Congress to make this re-arrangement as proposed, since all rights, vested or otherwise, acquired by officers, rest solely in the hands of Congress under its constitutional power to raise and support armies and to make rules for the government and regulation of the same.

To begin with, I tried to conceive exactly the idea the commanding general had in mind when he formed the amendment quoted on page 2 herein, and I worked out the list on that idea.

I assumed that the system proposed is only applicable to a time of peace, therefore I have gone back no farther in the re-arrangement than the28th of July, 1866, when the Army was reorganized and increased after the cessation of hostilities.

All officers at present in service who held commissions on that date, and all who were commissioned to date from that time, I re-arranged in relative rank in each grade as they stood at the close of that day. And all officers commissioned since then I have re-arranged in each grade according to the relative rank they were given on entering.

There are a few officers who were appointed on the same days of

1866 and 1867, from the volunteers, and of whom I could find no lineal assignment. I therefore arranged them according to the rank they held in the volunteers when mustered out, as given in the Army Register, and when two or more entering on the same day held the same rank, then according to the length of service in that rank. I understood that was the manner of determining their relative rank when they were appointed.

As I understand the idea of the commanding general, and as I have worked out this list, he would have a law passed providing that all the captains in the line be re-arranged and placed in their proper relative positions lineally. Likewise all the first lieutenants, the second lieutenants being already so arranged. Then as a vacancy occurs in the grade of captain, the senior first lieutenant, as shown by the re-arranged list, would be promoted, but instead of being placed at the foot of the list as the junior captain, the law should provide that he be advanced in the list of captains to where he would have been had promotion been lineal since July 28, 1866. I have indicated in this list where his place would be by writing his name in red ink [*italics*]. By this system every officer who has been jumped by any junior would eventually regain his proper place in the lineal list.

This same rule should apply to a second lieutenant on being promoted first lieutenant, for the reasons given in the case of Lieutenant Mann, Seventh Cavalry, above.

The case of First Lieut. R. P. Brown, Fourth Infantry, will illustrate this, he being on the re-arranged list the senior first lieutenant of infantry, having entered as a second lieutenant June 18, 1866. On a vacancy occurring in the grade of captain he would be promoted and immediately advanced on the list next below Capt. G. O. Webster, who graduated in the same class and one file above him, thus placing Lieutenant Brown in a position to receive his promotion to a majority as if he had not been continually jumped by members of his own class, his juniors on entering the service, and also by members of succeeding classes for more than seven years.

The law should also provide that any officer accepting the new positions and arrangements shall be considered as having waived all rights to any claims against the Government for any back pay that would have been his had lineal promotion always been the practice.

A like re-arrangement of the officers of cavalry and artillery can be as easily made, thus removing all effects of past injuries, and avoid any in future.

Second lieutenants are already arranged in the Army Register in the order in which they should receive their promotion. All officers whose names appear in red ink [*italics*] in the list of captains are still first lieutenants, and have been jumped by every captain whose name is below theirs in black [roman]. Likewise all officers whose names appear in red ink [*italics*] in the list of first lieutenants are still second lieutenants, and have been jumped by every first lieutenant whose name is below theirs in black [roman].

As re-arranged the lineal rank of 39 captains will not be changed, 97 will be lowered, and 114, before whose names are red crosses [*], will be immediately raised to their rightful places from 1 to 100 files.

To Maj. Wm. H. Powell, Twenty-second Infantry, I owe my thanks for much valuable data and encouragement in accomplishing my task.

Very respectfully, your obedient servant,

EDWIN A. ROOT,
Second Lieutenant, Twenty-second Infantry.

A re-arranged list of officers of infantry below the grade of major, designed to correct past irregularities in promotions, and insure just lineal promotion in future.

[Names printed in *italics* are written in red ink in original manuscript; those marked with * were indicated by × mark in red ink.]

NOTE.—Through a clerical error the names of first lieutenants Lynch, E., Cushman, H., Leyden, J. A., Ducat, A. C., jr., were omitted in this copy and have been interlined in their proper places; also, French, W. E. P., Tully, R., Bowen, W. H. C., which will alter some of the numbers of those following.

[First indorsement.]

FORT ABRAHAM LINCOLN, N. DAK.,
June 7, 1890.

Respectfully forwarded *approved*.
This is the only way justice can be done to all.

B. C. LOCKWOOD,
Captain Twenty-second Infantry, Commanding Company I.

[Second indorsement.]

OFFICE of COMMANDING OFFICER,
FORT ABRAHAM LINCOLN, N. DAK.,
June 8, 1890.

Respectfully forwarded to the adjutant-general Department of Dakota.
There is no doubt that the re-arrangement, as shown by Lieutenant Root would be but justice to a majority of the officers concerned. Lieutenant Root deserves credit for the ability shown in the preparation of this paper.

WM. H. POWELL,
Major, Twenty-second Infantry, Commanding Post.

[Third indorsement.]

HEADQUARTERS DEPARTMENT DAKOTA,
St. Paul Minn., June 13, 1890.

Respectfully forwarded to the assistant adjutant-general, headquarters Division of the Missouri.

THOS. H. RUGER,
Brigadier-General, Commanding.

[Fourth indorsement.]

HEADQUARTERS DIVISION OF THE MISSOURI,
Washington D. C., June 18, 1890.

Respectfully forwarded to the Adjutant-General of the Army.

J. M. SCHOFIELD,
Major-General, Commanding.

[Fifth indorsement.]

Respectfully submitted to the Major-General Commanding.

C. McKEEVER,
Acting Adjutant-General.

ADJUTANT-GENERAL'S OFFICE, *June* 18, 1890.

[Sixth indorsement.]

HEADQUARTERS ARMY OF THE UNITED STATES,
Washington, June 21, 1890.

In view of action taken in the past and of pending legislation the Major-General Commanding does not consider that it will be wise to re-open the question.

THOMAS M. VINCENT,
Assistant Adjutant-General.

[Seventh indorsement.]

ADJUTANT-GENERAL'S OFFICE,
June 21, 1890.

Respectfully submitted to the Secretary of War.

C. McKEEVER,
Acting Adjutant-General.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 425.

COMPILATION OF UNDELIVERED LAND PATENTS.

LETTER

FROM

THE ACTING SECRETARY OF THE INTERIOR,

TRANSMITTING

A copy of the report of the Commissioner of the General Land Office, with certain inclosures, in reply to a resolution of the House of Representatives of the 6th instant, requesting information as to the persons or firms who had compiled a list of the original undelivered land patents in said office, and by what authority it was done.

JUNE 26, 1890.—Referred to the Committee on Public Lands.

DEPARTMENT OF THE INTERIOR,
Washington, June 25, 1890.

SIR: I have the honor to acknowledge the receipt of a resolution of the House of Representatives, dated the 6th instant, as follows:

Resolved, That the Secretary of the Interior be, and he hereby is, requested to inform the House whether any person or firm has been furnished or allowed to compile from the files and record of the General Land Office a list and description of the undelivered land patents now in said office, and, if so, the name of such person or firm, and why, and by what authority, and at whose request the same was furnished or allowed to be compiled.

In response to the inquiry therein I transmit herewith a copy of the report of the Commissioner of the General Land Office to me, dated the 19th instant, with the inclosures referred to therein.

Very respectfully,

GEO. CHANDLER,
Acting Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., June 19, 1890.

SIR: I have received by reference from the First Assistant Secretary a copy of a resolution by the House of Representatives, dated the 6th instant, requiring the Secretary of the Interior to inform the House

"whether any person or firm has been furnished or allowed to compile from the files and records of the General Land Office a list and description of the original undelivered land patents now in said office, and, if so, the name of such person or firm, and why, and by what authority, and at whose request the same was furnished or allowed to be compiled," with request for report in duplicate.

In reply, I have the honor to state that an inquiry of similar purport was made by the United States Senate on the 14th ultimo, and response was made by Acting Commissioner Stone on May 29, 1890. As that officer was entirely cognizant of all the circumstances connected with the authorization in question (which was made September 14, 1889, prior to my connection with the office), I beg leave to respond to the resolution of the House of Representatives by quoting Mr. Stone's communication in response to the Senate resolution, as follows:

> While I was Acting Commissioner, an application of Mr. H. W. Combs, T. S. Constantine, and T. H. McKee was made for permission to list the undelivered patents on file in this office, and, as agreed upon by conference with the Assistant Secretary of the Interior, and supported by his recommendation as to their character and standing, I authorized the above persons, under the firm-name of H. W. Combs & Co., to make such list. A copy of the letter of the Assistant Secretary, and of my letter conveying the authority, is hereby inclosed, and the work of listing was done by a force of copyists employed by said firm.

After assuming the duties of Commissioner, I allowed the completion of the lists.

Very respectfully,

LEWIS A. GROFF,
Commissioner.

The SECRETARY OF THE INTERIOR.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C.

GENTLEMEN: You have the consent of the General Land Office in securing to present owners of lands the patents therefor, which have been from various causes retained in this office instead of being delivered to them or their grantors. From inquiry carefully made, I believe your firm to be reputable and responsible and I regard your enterprise as legitimate and laudable. I recommend your work as at once beneficial to the Government in relieving this office of such a burden and at the same time rendering to owners of land a great service in the perfection of their titles.

Very truly,

W. M. STONE,
Assistant Commissioner, General Land Office.

Messrs. H. W. COMBS, T. S. CONSTANTINE, and T. H. MCKEE.

DEPARTMENT OF THE INTERIOR,
Washington, D. C., November 30, 1889.

GENTLEMEN: I have received your letter of November 29, with circulars inclosed, asking permission to refer to me as to your character and standing, and it gives me pleasure to say that you have my permission to so refer.

Very truly yours,

CYRUS BUSSEY,
Assistant Secretary.

Messrs. H. W. COMBS & CO.,
Washington, D. C.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 426.

INCREASED CLERICAL FORCE IN WAR DEPARTMENT.

LETTER

FROM

THE ACTING SECRETARY OF THE TREASURY,

TRANSMITTING

A copy of a communication from the Secretary of War of the 25th instant, submitting additional estimates of appropriations for increased clerical force, etc., required by the Record and Pension Division, War Department.

JUNE 26, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT, *June* 26, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of a communication from the Secretary of War of the 25th instant, submitting additional estimates of appropriations for increased clerical force, etc., required by the Record and Pension Division, War Department.

Respectfully, yours,

GEO. S. BATCHELLER,
Acting Secretary.

The SPEAKER, HOUSE OF REPRESENTATIVES.

WAR DEPARTMENT, *June* 25, 1890.

SIR: I have the honor to forward for transmission to Congress, an estimate ($194,015) of appropriation for increased clerical force, etc., required by the Record and Pension Division, War Department.

Respectfully,

REDFIELD PROCTOR,
Secretary of War.

The SECRETARY OF THE TREASURY.

Estimates of appropriations required for the service of the fiscal year ending June 30, 1891, by the War Department.

RECORD AND PENSION DIVISION OF THE WAR DEPARTMENT.

Salaries, Record and Pension Division:	
Five clerks of class four (submitted)	$9,000
Ten clerks of class three (submitted)	16,000
Twenty-five clerks of class two (submitted)	35,000
Forty clerks of class one (submitted)	48,000
Twenty clerks at $1,000 each (submitted)	20,000
Fifty copyists at $900 each (submitted)	45,000
Four messengers at $840 each (submitted)	3,360
Five assistant messengers at $720 each (submitted)	3,600
Two watchmen at $720 each (submitted)	1,440
Two laborers at $660 each (submitted)	1,320
Total	182,720

NOTE.—By order of July 3, 1889, the Secretary of War formed a division in his office, composed of clerks and employés withdrawn from several of the bureaus of the War Department known as the Record and Pension Division, and in view of the great increase of work which is likely to be thrown upon this division by pending legislation, it seems necessary that an increase should be made in its official force proportionate to that asked for by the Pension Office. That office must obtain from the War Department the record evidence of service upon which to adjudicate the claims presented to it, and any increase in the force of that office should be met by a corresponding increase of the force of the Record and Pension Division of the War Department, in order that the calls of the Pension Office for evidence of the service of claimants may be promptly answered.

It is believed that the above addition to its official force will enable the Record and Pension Division to meet any demands which may be made upon it by the enactment of the pending bill, and will obviate the necessity of suspending the important work of card-indexing and preserving the records of the volunteer army, which through years of constant handling have become so worn and dilapidated as to render necessary that the most vigorous measures be taken to prevent their total destruction, and to preserve for the future the valuable information which they contain.

MISCELLANEOUS.

Stationery, War Department:	
Stationery for the office of the Secretary of War, and for the use of the proposed increased force of the Record and Pension Division (submitted)	6,500
Contingent expenses, War Department:	
For one hundred desks (No. 1 black walnut, single), at $17.95 each (submitted	1,795
For one hundred chairs, at $6 each (submitted)	600
Total	2,395

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A list of judgments rendered by the Court of Claims.

JUNE 27, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
June 27, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, a list of the judgments rendered by the Court of Claims, amounting to $137,854.60, which have been presented to this Department and require an appropriation for their payment.

Respectfully yours,

W. WINDOM,
Secretary.

FROM

THE SECRETARY OF WAR,

TRANSMITTING

A letter from the Chief of Engineers containing the final report of Capt. W. L. Marshall, Corps of Engineers, upon the location, plans, and estimates of the Illinois and Mississippi Canal in further compliance with certain provisions of the river and harbor acts of August 11, 1888.

JUNE 28, 1890.—Referred to the Committee on Rivers and Harbors.

WAR DEPARTMENT,
Washington, June 27, 1890.

The Secretary of War has the honor to transmit to the House of Representatives, in connection with his letter of April 8, 1890, published as House Executive Document No. 316 of the present Congress, a letter from the Chief of Engineers, dated the 26th instant, transmitting the final report, dated the 21st instant, of Capt. W. L. Marshall, Corps of Engineers, upon the location, plans, and estimates of the Illinois and Mississippi Canal in further compliance with the following provisions of the river and harbor act of August 11, 1888:

The Secretary of War is further authorized and directed to cause to be located, on such line as he may approve, a canal from the Illinois River at or near the town of Hennepin to the Mississippi River at or above the mouth of Rock River, together with a necessary feeder for the same, said canal to be known as the Illinois and Mississippi Canal, and to be 80 feet wide at the water-line and to have a depth of not less than 7 feet of water, with locks 170 feet long and 30 feet wide. The Secretary of War shall cause to be made and submitted to Congress detailed plans and estimates for the construction of said canal and feeder; the necessary expense of making such location, plans, and estimates shall be paid out of the unexpended balance on hand heretofore appropriated for the survey of said canal by the river and harbor act, approved August 5, 1886, for the examination of said canal and of the Illinois and Michigan Canal by a board of engineers.

REDFIELD PROCTOR,
Secretary of War.

The SPEAKER OF THE HOUSE OF REPRESENTATITES.

OFFICE OF THE CHIEF OF ENGINEERS,
UNITED STATES ARMY,
Washington, D. C., June 26, 1890.

SIR: On the 1st of April last I had the honor to submit a copy of a preliminary report, dated March 27, 1890, by Capt. Wm. L. Marshall, Corps of Engineers, upon location of the Illinois and Mississippi Canal. This preliminary report was transmitted by the Secretary of War to Congress, and printed in House Ex. Doc. No. 316, Fifty-first Congress, first session.

In further compliance with the provisions of the river and harbor act of August 11, 1888, directing the location of a canal from the Illinois River at or near the town of Hennepin to the Mississippi River at or above the mouth of Rock River, etc., I have now the honor to submit the final report, dated June 21, 1890, by Capt. W. L. Marshall, Corps of Engineers, upon the location, plans, and estimates of the Illinois and Mississippi Canal, heretofore better known as the Hennepin Canal.

The total cost of the work as given in detail in tables accompanying Captain Marshall's report is, with 10 per cent. added for contingencies, as follows:

For the main line	$5,067,562
For the feeder line	1,858,398
Total	6, 25,960

Very respectfully, your obedient servant,

THOS. LINCOLN CASEY,
Brig. Gen., Chief of Engineers.

Hon. REDFIELD PROCTOR,
Secretary of War.

FINAL REPORT UPON LOCATION, PLANS, AND ESTIMATES OF THE ILLINOIS AND MISSISSIPPI CANAL.

UNITED STATES ENGINEER OFFICE,
Chicago, Ill., June 21, 1890.

GENERAL: I have the honor to submit the following final report upon the location, plans, and estimates of the Illinois and Mississippi Canal, heretofore better known as the Hennepin Canal.

This work has been done in accordance with the river and harbor act of Congress, of August 11, 1888.

A preliminary report upon the work was submitted by me March 27, 1890, which contains the item of that act relating to and directing this work, statements concerning the conduct of the work, and preliminary estimates based upon partially completed plans and estimates.

Soon after the passage of the act of August 11, 1888, prior to submitting a project for the expenditure of the money appropriated, a letter was forwarded by me to the Chief of Engineers, seeking instructions as to the will of the Secretary of War concerning the locus of the proposed canal, a copy of which letter, with its indorsements, is herewith appended.

By the indorsement of the Secretary of War upon this letter, dated October 27, 1888, the "Rock Island route," one of the three routes previously surveyed, was designated as the route approved by him under the act, and the word "locate" as used in the act was defined.

Of the "Rock Island routes" previously surveyed there are two, viz, (1) via the Green River and (2) via Penney's Slough, the former route

having been surveyed in 1882 and the latter in 1885, both under direction of Maj. W. H. H. Benyaurd,Corps of Engineers,and reported upon by Major Benyaurd in the Report of the Chief of Engineers in 1883, p. 1754, and by Maj. Thos. H. Handbury in 1886, p. 1708, respectively.

Of these two routes that via Penney's Slough, as giving the shortest extent of canal and the greater proportion of more capacious slackwater navigation in Rock River, was selected as the most advantageous for the plans and estimates herewith submitted.

The work upon the plans and estimates under the project submitted by this office to the Chief of Engineers November 28, 1888, and approved by him December 3, 1888, began on January 1, 1889, and has been prosecuted continuously from that time to the present, with a few interruptions due to employment of the personnel upon the current works of construction in progress in this district.

The assistants engaged upon the work, all of whom have rendered valuable and satisfactory aid to the officer in charge, are:

On location and estimates of earthwork, Mr. G. A. M. Liljencrantz, in charge, who also conducted the survey of 1885 via Penney's Slough, and the additional examinations made under my directions in 1889, Mr. John Ericson, Mr. J. C. des Granges, and Mr. C. V. Brainard on mechanical constructions and estimates therefor, Mr. J. C. des Granges. On topography and lettering maps and drawings, Mr. G. A. M. Liljencrantz, Mr. J. C. Nickson, Mr. Hermann Heinze, Mr. Paul Heinze.

All mechanical constructions on the route were designed by myself, and drawn by Mr. J. C. des Granges, who also worked out many of the details for the same.

The results of this work are shown in the atlas,* submitted herewith, consisting of eighty sheets, 30 inches by 40 inches in size, including title page, index to maps, tables of detailed estimates of cost, and seventy-seven sheets showing the location and detailed plans for the work.

The force of assistants above named, aided by Mr. L. L. Wheeler, civil engineer, since March, 1890, have been engaged upon this work, excluding holidays and days employed upon the current works in progress in the district—which occasional employment has been necessary to avoid multiplication of employés and enlargement of the office accommodations—an average time for the full force of two hundred and twenty-eight days.

In this time eighty sheets have been prepared, drawn, traced, and all drawings of constructions multiplied by blue-printing; the works have been designed; nearly one-half the main line re-surveyed and re-plotted; a preliminary report prepared and submitted; computations and estimates made, at the rate as shown, of one atlas sheet complete with estimates every two and eighty-five one-hundredths days.

While, therefore, the time occupied by this work has been apparently long, yet judged by the results the progress has been rapid, and consequently satisfactory to the officer in charge.

SURVEYS.

The surveys upon which these present detailed plans and estimates are based are referred to in the preliminary report already submitted, as follows:

(1) Maj. W. H. H. Benyaurd, Corps of Engineers. (See Annual Report of Chief of Engineers, U. S. Army, 1883, page 1754.) On page 1780 of this report will be found also a discussion of the general benefits to be derived from the construction of this canal.

---

* Omitted.

(2) Maj. Thomas H. Handbury, Corps of Engineers, U. S. Army. (See Annual Report of Chief of Engineers, U. S. Army, for 1886, page 1708.)

In 1886 a Board of Engineers was constituted under the river and harbor act approved August 5, 1886—

To examine, in all their relations to commerce, the Illinois and Michigan Canal and the proposed Henuepin Canal, to consider their value and all other matters connected with their usefulness to navigation, and shall report upon * * * the construction of the Hennepin Canal.

* * * * * * *

The report of this Board is contained in the report of the Chief of Engineers, U. S. Army, for 1887, page 2125, *et seq.*

The three reports named contain full and detailed statistics and discussions of the commercial importance of this route.

Early in the progress of the present investigation it was seen that the previous surveys, although of sufficient detail to justify a close preliminary comparative estimate, and discussion of the relative costs of the respective routes, and to indicate with reasonable certainty the route that as an engineering question would be least costly and most advantageous, yet were not in sufficient detail to allow definite and final plans for the necessary mechanical constructions and close estimates of cost for the final work, nor were the means at hand sufficient to allow all information required to be obtained by the present investigation.

Additional surveys, however, were made as far as our means would allow, as follows: (1) From the Illinois River to the summit level, via the valleys of Bureau, Pond, and Cow-catcher Creeks to the summit level; (2) at the mouth of Rock River; (3) in the vicinity of the head of the feeder. Elsewhere throughout the line the data is meager, but such as is usually considered sufficient for preliminary estimates, and the plans and estimates herewith submitted must be understood to represent the best results suggested by preliminary surveys along a definite surveyed line covering too narrow an horizon to admit any material choice of location. When the work is definitely undertaken the vicinity of this line must be further examined, to better, if possible, the location shown upon the maps.

LOCATION OF THE ROUTE.

The report of Mr. G. A. M. Liljencrantz, herewith taken in connection with the reports heretofore published in the annual reports of the Chief of Engineers, U. S. Army, above referred to, and the preliminary report already submitted by me gives in detail the locus of the proposed route, and reference is made to these reports for such detail.

In short, the line of the Illinois and Mississippi Canal is from a point near the town of Hennepin, at the great bend of the Illinois River, via the valleys of Bureau, Pond, and Cow-catcher Creeks, to the summit level at the twentieth mile, ascending 204 feet through twenty-four locks, with lifts ranging from 3 feet to 10 feet each; thence to the feeder junction at the twenty-fifth mile, thence to the Rock River at Penny's Slough at the fiftieth mile; thence down Rock River 27 miles to its mouth. The descent from the summit level to the mouth of Rock River at low water in the Mississippi River is 102 feet, made by thirteen locks of from 3 to 8 feet lifts. The length of the western slope from the feeder junction to the Mississippi River is 52 miles, and of the main line of the canal 77 miles exactly, of which 50 miles is canal and 27 miles slack-water navigation in Rock River by means of locks and dams.

FEEDER ROUTE.

The feeder leaves Rock River 2½ miles below the town of Dixon, Ill., and is proposed to be of the same dimensions as the main canal, and navigable by similar boats throughout its entire extent. The dam in Rock River at the head of the feeder will extend this navigation in Rock River some 10 to 15 miles further. The feeder is 34¾ miles in length, and, with the main line and Rock River navigation created by the dams, gives a water highway of 126.75 miles in length. The location of the feeder, its slope, and capacity coincides with the line proposed in 1882, except that it is 2½ miles shorter. The reasons which led to this modification in the length of the feeder are stated in the report of Assistant Liljencrantz, herewith, and in my preliminary report.

DIMENSIONS OF THE PROPOSED CANAL AND CONSTRUCTIONS PROPOSED.

The canal and feeder are to be 59 feet wide at the bottom, 80 feet wide at the water surface, 7 feet in depth, with embankments 8 feet wide at the crown, and with side slopes of 3–2 of 1½ base to 1 vertical. These slopes are to be paved or riprapped where exposed to flowing water, and the canal trunk to be lined with 6 inches of cement concrete where the material is too porous to give a water-tight channel.

Main line.—On the main line there will be thirty-seven locks, viz: Two locks with 3-foot lift, one lock with 5-foot lift, three locks with 6-foot lift, three locks with 7-foot lift, five locks with 8-foot lift, thirteen locks with 9-foot lift, eight locks with 10-foot lift, two locks forming one combined lock of 20-foot lift, consisting of two lock-chambers combined, of 10-foot lift each.

Aqueducts.—Five aqueduct bridges, each 40 feet in width of trunk, two of which aqueducts are in combination with locks.

Dams.—Four crib-dams and one pile-dam. At the mouth of Rock River also the channel is rectified by the use of brush and stone dams, similar to those used on the Wisconsin River and on the Upper Mississippi River.

Culverts.—Forty-one culverts, viz: Five 36-inch pipe culverts, paved ends; four 36-inch pipe culverts, tumble basins or inverts; five 48-inch pipe culverts, paved ends; seven single 48-inch pipes, tumble basins; four double 48-inch pipes, paved ends; eight single 10-foot span arches; two double 10-foot span arches; five single 12-foot span arches; one aqueduct 30 feet long, single span.

Spillways.—Fifteen spillways, 300 feet long each, paved.

Sluices.—Three sluices, with controllable gates, "Taintor" or cylindrical pattern.

Weirs.—Three inflow and three overflow weirs, paved.

Bridges—Highway: Thirty-three fixed highway bridges. *Railway:* Two single-track pivot draw-bridges, two double-track pivot draws, one double-track fixed bridge.

FEEDER LINE.

Locks.—One guard-lock at head of feeder, with dam and controllable sluiceway; supply inlets, etc.

Aqueducts.—One, 70 feet wide, over Green River.

Culverts.—Thirteen single, 36-inch pipes; paved ends. Five single, 36-inch pipes; tumble basins. Two single, 48-inch pipes; tumble basins. Six double, 48 inch pipes; paved ends. One single 10-foot span arch. One single 12-foot span arch. One double 10-foot span arch. Two aqueducts, 30-foot span, each.

Bridges—highway: Twenty-one fixed highway bridges. *Bridges—railway:* Three single-track pivot railway bridges; or, in all, for both main and feeder lines, thirty-eight locks; six aqueducts; six dams; seventy-two culverts; fifty-four highway and eight railway bridges; fifteen spillways; three sluiceways, with controllable gates, and six weirs.

Detailed drawings of these various constructions, except railway and highway bridges—which are now considered as commercial articles, to be procured in the markets, and for which estimates have been secured from bridge-builders—are given in the plans and drawings submitted herewith.

DESCRIPTION OF THE VARIOUS MECHANICAL CONSTRUCTIONS.

Locks.—The locks are of dimensions specified by the law and are 170 feet in length between quoins, 30 feet in width of lock-chamber, with 7 feet of water over the miter-sills. The designs submitted where rock foundations are not known to exist are for foundations in soft earth. The designs for the locks are shown on sheets numbered 36 to 40, inclusive, 44, 46, 47, 48, 51, 54, and 56 of the accompanying atlas.

The locks are of the usual type, except the lock at Milan, which will be described hereinafter, and are of similar type to the locks built by Col. D. C. Houston, Corps of Engineers, U. S. Army, upon the Fox River, Wisconsin, as modified in details by experience.

Foundations.—Pile, concrete, and timber foundations are shown for all locks with earth foundations. The concrete and timber is about 2 feet in thickness under the lock-bottoms, except at the head and tail-bays, where there are designed to be masses of concrete 4 to 6 feet in thickness. The foundations are also sheet-piled at the heads of the locks and upon the river side of locks in Rock River above the junctions with dams.

The pile supports, though estimated for in all locks in earth foundations, will not probably be necessary for twenty-nine of the locks, which are supposed to be upon good foundations.

The tail-bays of the locks and bottom of canal are paved for a distance of 50 feet below the lock-wall. The concrete and timber grillage are covered by a double thickness of plank, and the masonry walls reared thereon.

The lock-walls are generally built with coping, 4 feet wide, and bases equal to one-half the height, less 2 feet. The walls are vertical on the chamber sides throughout their height, and also at back for 6 feet above their bases; thence to the second course below the top of the coping they are reduced in thickness gradually, by offsets. The walls are increased in thickness by the depth of the gate recesses below the lower quoins, for a distance equal to about one-half the spans of the locks, and above the gate recesses for about 6 feet. The locks terminate with short vertical wings, or return walls of sufficient thickness (3 feet) to form effective stop-walls running into the embankments. At head and foot of the locks a dry-stone revetment or splay wall gradually contracts the canal to the width of the locks.

The coping and quoins of the locks are smooth-dressed, cut stone. The facing, wherever it can be touched by boats, to be of fine-pointed masonry, to lay with three-eighths of an inch joints. Elsewhere the facing is rough-pointed masonry, or quarry-faced stone, with cut joints and beds.

The backing to be of good quality, with beds dressed to lay with

three-fourths inch joints, or of cement concrete. The dry-stone splay walls to be of ordinary rubble of good quality.

The gates of the locks are suspended flush with the top of the lock-walls (sheet No. 38), and are to be planked on the down-stream side, to avoid upward pressure due heads of water against them, as well as to preserve the horizontal arms of the gates by keeping them immersed in water, should the lock be kept habitually filled. The gates are maneuvered by spars, racks, and pinions (see sheets Nos. 36 and 38), and the locks filled under the upper miter-sill, through valves in platforms (sheet No. 37) when the lifts are sufficient, or through the gates of locks of low lift.

The locks are emptied through valves placed in the lower gates. The timber platforms have their tops below the constant water-levels, to preserve them from rot.

River locks (see sheets Nos. 48, 51) have somewhat heavier river walls, mainly to protect against ice and drift, and the coping of river walls is from 5 to 8 feet wide. The approaches to river locks are guarded by timber crib-work filled with stone, having proper drift chutes between the cribs at heads of locks. All river locks have guard walls of sufficient height to reach above the water level corresponding to the stage when boats may freely pass over the crests of the dams, but they do not reach above extreme high water, with the exception of the locks at the head of the feeder and at Milan.

Milan lock (see sheet No. 54.)—The lock at Milan, or the second lock from the Mississippi River, is of novel construction. It is located at the foot of the old canal called Sear's canal, $2\frac{1}{2}$ miles above the mouth of Rock River. This river is obstructed by sands, and it would be costly to procure by channel improvement a depth of 7 feet at low water from the mouth of the river to the lock; consequently a short stretch of canal is built by an embankment below this lock and another lock of 8.5 lift, built at the foot of Turkey Island chute, for low-water navigation. But whenever the Mississippi or Rock Rivers are from 5 to 6 feet above low water, Rock River may be navigated freely without improvement up to the Milan lock, and it is evidently an advantage to avoid the delay and inconvenience of lockage at the lower lock and the slower passage through the canal at such times.

The lock at Milan, therefore, has been designed with one set of upper gates, and at the lower extremity two exists by separate gates; one into the aforementioned low-water canal, the other into the open channel of Rock River, for use at all stages of the rivers more than 5 feet above low water.

The embankment forming the canal (sheet No. 25), below Milan, is slope-walled, but does not reach above high-water stage. It is protected against wash from overflow by its construction in this way, viz, the slope of its top is so adjusted that it is greater than the slope of Rock River, so that whenever water submerges it, it will be by back-water from below that can produce no cross-wash or overfall, and at higher stages the area of the waterway over the bank will be greater than the cross-section of the canal, and the work will then be simply a small slide slough of the river with a parallel current, which can do no injury to the canal embankment.

(2) *Canal aqueduct bridges*—(see atlas sheets numbered 60, 61, 62, 63, 65, 67, 69, and 71.)—The canal aqueduct bridges are of original design, and consist of high class masonry piers and abutments upon pile, and grillage foundations, and canal trunks with wrought iron or steel skeletons with timber linings. All iron parts are of standard commer-

cial sections and dimensions, selected from the published advertisements of the Phœnix Iron Works, and the amounts of field rivetting and other work necessitating skilled labor in assembling the parts, are reduced by the designs to a minimum. The sheet of details numbered 61 and the sheet in colors numbered 62 will show clearly the construction of these aqueducts. The particular points observed in these designs are:

First. To bring no stresses upon the masonry of the piers, other than vertical. This is effected by trussing the side frames to resolve all pressure against the aqueduct sides into vertical and horizontal stresses, the vertical to be sustained by the piers, and the horizontal stresses to be transmitted at bottom by tie rods to the opposite sides of the aqueduct trunk, where they are balanced by the corresponding water pressures. The sides of the trunks are not allowed to come in contact with the masonry piers, but the pressures are received by "I" beams, and transformed and transferred as stated, by the form of the framing of the iron skeleton.

Second. The perishable parts of the aqueducts must admit of being removed and rebuilt without interfering with the permanent framework.

As shown, all and every part of the wooden lining may be removed and rapidly replaced. There is no carpentry work required, all wooden beams and planking being of commercial forms, as well as the iron work.

Third. The piers must be of such form as to admit highway or foot bridges, if such additional structures may be desired at any of the aqueduct crossings.

The plans for the aqueducts do not contemplate immediate uses also as viaducts, but the piers are available for bridges on both sides of the structures, with very inexpensive modifications and additions. The detailed plans are so clear as to render unnecessary more itemized description in this text.

Green River aqueduct.—The crossing of Green River by the main line is difficult. The stream has very low banks, and consequently will not admit of damming to allow the canal to cross it at the same level, while at the same time the configuration of the country is such that the canal levels can neither be advantageously raised to secure sufficient head room under the aqueduct trunk nor lowered to attain the normal mid-stage level of the river. High water in Green River consequently reaches nearly to the water level in the aqueduct trunk, and it must be passed under the aqueduct on an invert. The plan of the aqueduct is shown on sheet No. 69. It is possible that further study and more elaborate surveys may indicate a more satisfactory solution of this special problem than indicated in the plans submitted.

Feeder aqueduct across Green River (see sheet No. 71.)—All the aqueducts on the main line are made 40 feet in width, or 10 feet wider than the canal locks; but to maintain the cross-section of the feeder unimpaired, this aqueduct is designed with a width of 70 feet. This width is probably excessive, and could be reduced to 60 feet without creating any material reduction in the capacity of the feeder.

Two of the aqueduct bridges on the main line are combined with locks. (See sheets numbered 59 and 63.) To prevent leakage, the connections of the aqueducts, at their abutments with the earthwork, are made safe by timber-work, well anchored and concreted.

Culverts.—There are no culverts or drains less than 3 feet in diameter, to allow examination by men. All culverts of less dimension than 30 square feet area are made of cast-iron pipes of 36 inches and 48 inches diameter, either single or double. The pipes (sheet No. 73) are buried

for one-half their diameters in concrete, to insure accurate alignment and strength, and closed at their heads by substantial rubble masonry head walls. The approaches to the pipe culverts are paved slopes; or where the water level of the canal is near the natural surface tumble basins or inverts are arranged for. When the desired discharge through culverts exceeds the capacity of two 48-inch cast-iron pipes, culverts of 10 and 12 feet arches, either single or double, are designed, or for still larger flow, aqueducts of 30 feet in width, which are classed as culverts. The masonry culverts are designed with pile, grillage, and concrete foundations, and the estimates made on that basis, although it is known that the earth is sufficient in some cases to give good foundations by paving the bottoms of the culverts. The designs for the arched culverts are shown on sheets 74 and 75. Doubtless it will be found economical to use vitrified or hard-burned brick instead of cut stone for these arches, an excellent class of such brick being attainable in this market.

Rather elaborate and expensive head walls and paved approaches are designed for the culverts throughout, so that the estimates are made on a liberal basis. The dimensions of the walls and arches of the culverts have been computed from the empirical rules given in Trautwine's Engineers' Pocket-book.

In fixing the dimensions of culverts the field-books and notes have been consulted and followed, but there is no doubt but that further investigation as to the amount of the flow of the water in ditches and streams will cause modifications in these plans. Little or nothing is known of the hydraulics of the rivers and streams encountered along this route, nor of the character of the material to be encountered, the surveys being superficial reconnaissances for preliminary purposes only.

Sluice-ways.—The canal on the east slope occupies the valley and bed of Cow-catcher Creek, near the summit, which, at times of melting snows or heavy rain-storms, not only carries off the drainage of its immediate bed, but from existing country drainage ditches receives the drainage of several square miles of the summit area. The canal also enters the bed of Pond Creek. At locks 19 and 23, where the drainage of these streams leaves the canal, therefore, fixed weirs with controllable sluice-ways (see sheet No. 41) are placed to vent high waters. The sluice-ways are closed by cylindrical gates of the "Taintor" type, 21 feet in width and 9 feet deep. The axes of rotation of these gates are excentric with the axes of the cylindrical surfaces, and below them, to cause the water-pressure to aid in opening them. They will be easily maneuvered by one man, and are similar to the constructions so sucessfully used upon the Fox River, Wisconsin, at Menasha and Appleton, but modified in details from those gates.

Sluice-ways are also provided at Locks No. 20, 21, 22, and 23, in the valley of Cow-catcher Creek, shown on the maps of the sites of these locks. (Sheets No. 42 and 43.)

Spill-ways.—In all canal levels, where the water surfaces are above the natural surface of the ground, paved spill-ways are provided for, with their crests 6 inches above the required canal levels. These spill-ways are generally 300 feet wide, formed by stop-walls at their ends, heads, and feet, and by paving over, in cement, the surfaces of notches in the canal banks. The water spilled over them will, as far as practicable, be again restored to the canal at lower levels through subsidiary feeders. The spill-ways are shown in design on sheet No. 41. The sides of each aqueduct bridge are also spill-ways, but there is an error in the drawings of the aqueducts. The trunks are to be 7 feet 6 inches in

depth instead of 7 feet only, as shown thereon, to allow 6 inches variation in the levels without wasting water.

Dams in Rock River.—The dams in Rock River are of two distinct classes: (1) Those to rectify the channel at the mouth of the river by concentrating the flow of water, and by narrowing the channel to deepen it by scour, or maintain a dredged channel; and (2), the dams necessary to deepen the channel and establish navigation in the pools created by them by raising the low-water surface.

The dams of the first class are employed at the mouth of Rock River, and are shown in plan and detail on sheets numbered 25 and 77, respectively. The dams estimated for of this class are those shown below the mouth of the Slough behind Turkey Island, and are modeled in similar constructions that have been heretofore built upon the Wisconsin and Upper Mississppi rivers with successful results. The dams shown upon the map (No. 25) may not all ultimately be adopted as necessary, it being the experience on similar work that the results following the construction of one dam indicate the location and necessity for the next one to be constructed, etc. Nor can the exact necessary length or height of the dams be determined, in the absence of any knowledge of the hydraulics of the river, or of the action of currents upon the material of the bottom. It is not likely, however, that a greater development of dams of a different character than those indicated will be used. The estimates are for dams 2 feet above low water, and constructed as indicated on sheet No. 77. The channel here will probably be dredged to the proper depth, and the dams be constructed to maintain or preserve the depths thus secured, by scour.

The dams of the second class are either pile or crib dams, or a combination of pile and crib work. At the mouth of Rock River, to close the various chutes, crib-dams are proposed, which rest upon a natural rock foundation, and which are shown in location on sheets Nos. 24 and 25, and in cross-section on sheet No. 54. To prevent sliding, this dam is set in a shallow trench, formed by removing the surface rock. The dam at Milan, across the left-hand chute, is proposed to be raised 2 feet above the crests of the dams closing the other chutes, to cause the low-water discharge to flow through the main channel, instead of part of it through the chute back of "Big Island."

These dams are of ordinary crib construction, filled with loose stone, and sheeted on the up-stream face and backed with earth to prevent leakage.

The dam at Lock 35, Rock River (see sheets 52 and 53), is also a crib-dam of 3-foot lift only, placed upon a gravel or earth foundation, sheet-piled above and below, and filled with stone. Should investigation show a uniform earth foundation of considerable depth, this dam will probably be more advantageously built of piles, as shown on sheet No. 49, for the dam at Lock 34, of 5-foot lift. The crib-dam at Lock 35 is cut down to the constant level of the lower pool for a width of 300 feet, which cut, forming a sluice-way or pass at higher stages, is closed by the simplest form of movable dam, viz: Poirée needles sustained by trestles. The banks of Rock River are so low that it has been thought advisable to put sluice-ways in even this low dam. It may be found, however, after further surveys, that the dam may be made a fixed one without causing serious overflow. The details of this movable dam or weir are shown on sheet No. 53, and are of the usual form for such dams.

The dam at Lock No. 34, of 5-feet lift, is of piles, sheet-piled above, and covered on its sloping top with oak planking, and the intervals between the piles and under the sheeting filled with rip-rap. Two sluice-ways,

each 100 feet wide and 5 feet deep, are left in this dam, which are closed by gates or dams of novel design, recently invented and known as the "Parker" gate, from the name of the inventor. This gate, shown in detail on sheets No. 49 and 50, is a modification of the familiar "American Bear-Trap," by which the two leaves of the gate which in the original "Bear-Trap" form are detached, in the "Parker" gate are hinged together at their edges, and the upper leaf articulated or constructed in two hinged parts, to allow the gates to fold together when down. The joint between the parts of the upper leaf is covered and protected against deposits of sticks, leaves, etc., in the angle formed by the parts with a third (sliding) leaf, or "idler," which also protects the gate against impact of floating bodies.

The gate is maneuvered precisely as the "Bear-Trap" gate, by the hydrostatic pressure of water admitted under the gate when it is desired to raise it, and by withdrawing the water from beneath the gate and allowing the water-pressure on the upper leaf from the pool above to depress it.

The ports for emptying and filling the space beneath the gates, and other details of this construction, are so fully shown upon the plates that detailed description is unnecessary.

This modifiation of the "Bear-Trap" allows angles less than 90° between the upper and lower leaves of the gate when raised, so that the gate occupies less width than the "Bear-Trap." The lower leaf may be much shorter, or stand nearly or quite vertical, and consequently be made much lighter, and when the water beneath the gates is wholly or partly withdrawn, or added to, and the equilibrium disturbed, the difference in water-pressures on the upper and lower leaves, with certainty depresses or elevates the gate until an equilibrium is restored. This depression or elevation may be regulated by managing properly the supply and exit ports so that it may be complete, or the gate thrown flat or raised to its full height, or partially raised or lowered, and any desirable part of the capacity of the sluice-way attained. The gate, as shown by the only one of them yet constructed, at Menominee, Mich., is responsive and perfectly controllable.

The objections to it, in addition to what applies to the "Bear Trap," are:

(1) The difficulty of arranging four continuous axes of motion, parallel to each other.

(2) The difficulty of excluding trash from the angle between the articulations of the upper leaf.

(3) The additional expense of the third leaf, or "idler."

Both sluiceways in the plans shown are controlled from a center pier. This pier is reached from below by means of a walk sustained by piles. The walk being simple and inexpensive, is not included in the drawings.

Similar sluiceways are also designed for the dam at the head of the feeder, but it is likely that there will be found advisable more capacious sluices than shown on the plans in this latter dam, to prevent flowage of lands near Dixon. That matter requires more elaborate study and consideration than it has been possible to give it.

The dam at lock 34, just described, is a pile dam, with the section including the controllable sluiceway cut down, and the framework and piers of the sluices founded upon the piles so cut off. The dam at the head of the feeder is a combination pile and crib dam. The piles are cut off two feet above the low-water line; sheet-piled above and below; the space between the piles filled with stone, and the upper part of the dam built of crib-work founded upon these piles. During the construc-

tion of the dam the water level will be gradually raised, until the escape through the loose filling of the crib equals the low-water discharge. The coping plank of the dam will be placed, and, last, the sheeting on the upper face of the dam, abutting against the sheeting of the pile pile foundation, as shown upon the detailed drawings, will be placed and secured, and the dam backed with earth.

All sheet-piling used upon the dams on earth foundations is designed to be of the "Wakefield" type, which experience on the Illinois River has shown to be desirable and trustworthy, and when properly constructed, to be absolutely water-tight under such small heads of water as are encountered in these dams. This sheeting is composed of three dressed planks bolted together to form a tongued and grooved pile, and may vary in thickness to any extent necessary to stand driving in any soils that will allow wooden piles of any kind.

COST OF THE CANAL AND FEEDER.

The estimates given in the itemized tables here below cover all structures necessary to establish navigation over the route in question, except minor works specified hereafter; right of way; special damages due changes in roads, lines of fencing, farm buildings, etc.; permanent flowage of lands; and purchase of water power and mill at Dixon, Ill.

It is thought that the cost of certain minor works, referred to above as excepted, such as stop gates; gates for emptying, in emergencies, the separate levels of the canals for repairs; weirs and supply pipes or channels past the locks for feeding the levels, not indicated on the drawings and of small cost; levees and embankments at Dixon and on Rock River, and such other minor works, will be covered by the 10 per cent. allowed for contingent expenses.

The detailed estimates are given in the following tables:

				748,330	93,768	14,500	218,574			78,901		137,900		121,806					60,000		48,160	21,780	145,800		1,689,453
Add 10 per cent. for contingencies, etc																									168,945
Total for Feeder Line																									1,858,398

NOTE.—Asterisks (*) on the same horizontal line denote structures that are combined. In bridge columns S. denotes single track and D. double track.

RECAPITULATION.

Total for main line	$5,067,562
Total for Feeder Line	1,858,398
Grand total for the entire canal	6,925,960

The total cost of the work as given in detail in the above tables is, with 10 per cent. added for contingencies:

For the main line	$5,067,562
For the feeder line	1,858,398
Total	6,925,960

This estimate exceeds the estimate of 1886, which was $6,524,052.61, by $401,907.39. In my preliminary report, which was based upon partially completed estimates, it is stated:

> The detailed plans and estimates will give essentially the same results, and it may be said that this water-way, complete, will not differ in cost $250,000 more or less from that (1886) estimate.

It differs, however, $401,907.39, a variation from the original preliminary estimate of less than 7 per cent.

Upon comparing the two estimates it will be seen that in reality the preliminary estimate of 1886, based entirely upon rough designs and sketches now lost, was remarkably close to the present more elaborate and searching work; for certain works necessary to establish navigation over this route, and other works necessary for the operating and care of the canal, were omitted from the estimate of 1883–'86, and should be added to it to complete the estimate on the plans indicated in those reports.

These additional works necessary are as follows:

(1) A lock of 3 feet lift near the summit, to allow the drainage of the summit to be taken into the canal, as indicated in the text of the report of Assistant Herr (1883).

(2) Three sluices, "Taintor," to emit flood waters of Pond and Cow-catcher creeks, near the summit level on east slope.

(3) Thirty-seven lock-keepers' houses (main line).

(4) Double-track instead of single-track railroad bridges, made necessary by change in Chicago, Rock Island and Pacific R. R. since 1882.

(5) Partly movable instead of fixed dams, in Rock River.

(6) Lock-dwelling, dam, and sluice-ways at head of feeder.

(7) Excess in cost of guard-lock at Dixon instead of at feeder junction with main line, which latter location is an improper one.

If we complete the estimate of 1886 by adding thereto the cost of these additional necessary works not provided for in that estimate, nor considered in my preliminary report, the comparison of the two estimates, based on routes differing in location, as indicated in the reports and maps, will be as follows:

Published estimates of 1885; total		$6,524,052.61
Lock 24, 3-foot lift	$34,069.00	
3 sluiceways	25,358.00	
37 lock-dwellings, main line	90,000.00	
Excess double-track over single-track railroad bridges.	26,000.00	
Excess movable over fixed dams	41,584.00	
Lock-dwelling, dam, etc., head of feeder	134,296.00	
Excess in cost guard-lock at Dixon instead of at feeder junction with main line	52,232.21	
Total	403,566.21	
Add 10 per cent	40,356.62	443,922.83
Corrected estimate 1886		6,967,975.44
Estimate now submitted (1890)		6,925,960.00
Excess 1886 over 1890		42,015.44

or the estimates made complete on the two plans are practically the same.

The present estimate, however, contemplates the purchase of the mill and water-power at Dixon at a cost of $100,000, which is offset in the estimate of 1886 by the earthwork, etc., necessary to extend the feeder from its present proposed head up to the town of Dixon, or 2½ miles further than the terminus of the present proposed feeder line.

Although, of course, it is not known whether the condition of the market for labor and material will, throughout the time of construction of this work, if undertaken by Congress, verify or justify the prices per unit of work of various kinds specified in the estimates, the estimates are now considered liberal, as far as the construction work is concerned; but there must necessarily be elements of great uncertainty as to cost of the following items:

(1) Right of way, which must be obtained by agreement or condemnation.

(2) Damages by flowage of lands along Rock River, which will probably be judicially determined under the laws of the State of Illinois.

(3) Consequential damages to lands and farms from cutting through subdivisions, etc.

(4) Damages to railroad lines by crossing their tracks and introducing bridges both fixed and movable, or draw, into their lines.

These uncertain elements may increase the cost of the work. On the other hand it may probably be reduced by omitting the costly pile foundations under perhaps twenty-nine of the locks and several of the culverts, by which the estimates may possibly be reduced $150,000, and further examinations may better the location of the canal and feeder.

In this connection I have to say that the most difficult part of the line in an engineering sense is that part of it that lies in the valley of Pond Creek, where the available space is extremely contracted, due to the present location and right of way of the Chicago, Rock Island and Pacific Railroad, and the contracted valley. It may be found by further examination possible to follow further the valley of Bureau Creek with advantage, and attain the summit level north of the present proposed location.

The long feeder to Dixon is also expensive, although by making it navigable it adds materially to the value of the canal, and makes the extension of the navigation of Rock River towards its headwaters by slackwater, possibly even to Green Bay, via Lake Horicon and Fox River, more probable than without it.

Still it is doubtful whether this feeder is necessary as the only or least expensive plan to supply the summit level, for by cutting it down deeper Green River and the Winnebago swamp may be drawn upon, and may furnish a sufficient supply for the summit level for many years, or until the capacity of the canal is approximately reached. Subsidiary feeders for the eastern slope may be furnished from the drainage basin of Bureau Creek and for the western slope to make up losses from infiltration and evaporation from the swampy areas and high prairies through which the canal passes. These are points worthy consideration in the progress of the work on the main line, if it becomes necessary to consult economy instead of beneficence in its construction.

The question of the sufficiency of the Dixon feeder was discussed in the report of Major Benyaurd, in 1883, and there is no occasion now to modify his conclusions; there are other available sources of supply, and in any case sufficient water may be had at the summit for the full capacity of the summit level, and additional subsidiary supplies may be had as indicated herein above.

The extreme capacity of the canal as long as the combined lock is an

element in the system, is probably 3 boats each way per hour, or 144 boats per day of 300 registered tons each, or 8,640,000 tons in 200 days, the shortest probable season of navigation. Estimated by displacement of boats instead of by custom-house measurement, the extreme capacity of the canal is more than twice the above, but this may be taken as the attainable capacity of the route, as many boats will not be of equal tonnage to the maximum, nor the number of lockages, for various reasons, ever attain the theoretically possible number.

GENERAL CONSIDERATIONS RELATING TO THIS WORK.

The Illinois and Mississippi Canal is designed as a cut-off or short route from the Upper Mississippi River to Lake Michigan in connection with present existing water lines, or improved routes of greater capacity that have been contemplated for years.

The existing water route is: (1) Via Illinois and Michigan Canal, 97 miles to La Salle; (2) Illinois River from La Salle to its mouth at the Mississippi River, 223 miles; (3) Mouth of Illinois River to Rock River, 287 miles.

The present water-line from Chicago to the mouth of Rock River is as shown 607 miles, while by way of the proposed Illinois and Mississippi Canal (Hennepin) it will be only 188 miles, a saving in distance from Lake Michigan by water to all points on the Mississippi River above the mouth of Rock River of 419 miles over existing water routes. The route via the proposed canal will be shorter than via the Illinois River to all points on the Mississippi River above a point 78 miles by water above the mouth of the Illinois, and 209 miles below the mouth of Rock River.

Above the mouth of Rock River to St. Paul are 401 miles of river navigation, so that the proposed canal as a cut-off will shorten the distance from Lake Michigan by water to all points along the Upper Mississippi River for 610 miles of its course.

The Illinois River for 14 miles below La Salle forms one link in the proposed water-line, but the rest of the distance, 97 miles from La Salle to Chicago, the route is continued by the Illinois and Michigan Canal, a work of much less capacity than the proposed canal. Boats of the full capacity of the proposed locks for the Illinois and Mississippi Canal must stop at La Salle and transfer cargo to the less capacious Illinois and Michigan Canal.

To secure, therefore, the full benefits to be derived from the construction of the proposed line, either the Illinois and Michigan Canal should be enlarged to similar capacity or, still better, the Government extend the capacious channel now nearing completion on the Lower Illinois River to Lake Michigan via the Upper Illinois and Desplaines rivers and the canal across the Chicago Divide.

Without such work the proposed Illinois and Mississippi Canal will be simply a local highway of importance to the immediate neighborhood of its channel, and a regulator of local freights, but regarded as a national highway of but comparatively small significance.

While the construction of this canal even on the present basis must affect freight charges on all lines of transportation in competition with it by reducing them to nearly the cost of water transportation, it can not be of such value to commerce as would be possible were the line throughout of greater and more satisfactory capacity. The tonnage carried by the Illinois and Michigan Canal at present is about 1,000,000 tons per annum, and although this is a large tonnage it does not prob-

ably exceed one-third or one-fourth the capacity even of this small canal, but if anywhere near half the capacity of the proposed Hennepin Canal were added to its business this smaller canal would be overtaxed; but in addition to the business that will or may be furnished to it from the proposed work, that offered by the improved Lower Illinois must also be cared for by this inferior highway, which evidently will still further reduce the value of both the proposed canal and the Lower Illinois River improvement, the value of both works being gauged by the inferior connection.

The commercial advantages of this route have been fully discussed in former reports, notably by Maj. W. H. H. Benyaurd in the Annual Report of the Chief of Engineers for 1883; by Major Handbury in the report of the same officer for 1886, and by the Board of Engineers specially constituted to consider its relations to commerce, in 1886, in its report already referred to.

It is unnecessary therefore to go in detail into that question again, but a few observations may perhaps be proper here, although the law limits this investigation to plans and estimates and not to questions of merit or expediency.

It is a fact too well known to require extended discussion, that water routes generally when they come into competition with transportation by land are the most efficient and certain regulators of freight charges known. When free and of sufficient capacity they absolutely restrict freight charges to something near the actual cost of water transportation. The Erie Canal—of much smaller dimensions and capacity than the proposed canal—now absolutely restricts freight charges on grain and other products from Chicago and Duluth to the sea-board during the season of navigation to less than what is generally charged by the railroads from west of the Mississippi River to Chicago, less than one-third the distance. The freight charges from points on the Illinois River and Illinois and Michigan Canal to Chicago, as shown by the Board of Engineers of 1886, are similarly controlled by this latter water line.

The same results precisely must follow the construction of a short water route from Lake Michigan to the Mississippi whether a pound of freight is carried by the canal or not. The railroads must fix their rates for freight at or below the profitable cost of the cheaper water transportation or it will be carried by water.

It is evident, then, that this canal should be built, and it will as a public necessity some day be built. Whether it be constructed, however, by the General Government, by a State, or by corporations or individuals, is a very important and material question. If by a State, or by any other agency than the General Government, it will not probably be free from tolls, and can not therefore possibly subserve its purposes long. Its strong rivals, by depressing freights below a paying basis even for water carriage, would soon make the line a burden to its owners, and as a commercial or money-making enterprise it would soon fall a prey to and be dismantled and closed by its rivals, as has befallen so many canals of that character.

There is nothing so democratic as free water-ways and highways constructed and maintained by the public for the people, and every such means will be necessary to limit and restrain corporations, and are the most effective means to that end known.

Already in this country there are private citizens with their wealth invested mainly in means of transportation and securities based upon such properties, said to aggregate in the case of at least one of their

number an amount equal to one-third of the present public debt of the United States. If the policy of the holders and heirs of this fortune continue, as heretofore, that one huge estate will attract to itself by the mere force of interest compounded in a course of a few decades all of the present existing public lines of internal transportation and communication except the river and canal routes maintained free by the General Government.

It is possible that comparatively few years hence may witness the consolidation of all commercial highways, except the water routes, into the hands of one man or one family, or at least under the control of a few individuals, and this entire population tributary to him or them, by the mere gravitation, through interest, of property towards capital. Free water-ways as means of transportation seem the only method of limiting this power, or else a recourse to paternal socialism in the Government by which inheritances and legacies are limited. The latter will probably never come about, but the former method is practical and can be applied. As one of the means to this end the construction of this canal is favored here, provided that its utility be allowed to become evident, through the results that will follow the enlargement of the Illinois and Michigan Canal to an equal capacity, or, better still, as rendering this enlargement unnecessary, the prosecution to completion of the Illinois River scheme, already begun by the General Government on the lower Illinois, by which a water-way of sufficient capacity to accommodate the largest steam vessel that reaches the mouth of the Illinois River will be secured from Lake Michigan to the Mississippi River.

There is still another point to which it is desired to call attention, viz:

The locks proposed for this canal are of capacity sufficient to pass many steam-boats now existing upon the Mississippi River, but the bridges along the canal, as proposed, give only 15 feet headway under them, which exclude such boats. If these bridges were all made pivot-bridges, these steam boats could use the route, and its utility be very materially extended. The cost of the route would be increased, however, about one-quarter of a million dollars by this change, which, in my opinion, would be justified. Steam-boats of 250 tons register could use the route if this modification were made. The canal as designed is for navigation by barges and tugs only.

Respectfully submitted.

W. L. MARSHALL,
Captain, Corps of Engineers.

Brig. Gen. THOMAS L. CASEY,
Chief of Engineers, U. S. A.

REPORT OF MR. G. A. M. LILJENCRANTZ, ASSISTANT ENGINEER.

UNITED STATES ENGINEER OFFICE,
Chicago, Ill., May 21, 1890.

CAPTAIN: I have the honor to transmit herewith, a report on "Location of the Illinois and Mississippi Canal," with a navigable feeder from Rock River at Dixon, Ill., made in pursuance of an act of Congress of August 11, 1888.

The route approved by the Honorable, the Secretary of War, is identical with certain modifications herein specified, with the Main and Marais D'Osier routes of the Hennepin Canal, from Illinois River to the thirty-fifth mile, as reported on by Maj. W. H. H. Benyaurd, Corps of Engineers, U. S. Army, in report to the Chief of Engineers, U. S. Army (see Chief Engineer's report, 1883, Vol. II., p. 1754); thence with the Rock Island line, via Penny's Slough, to the seventy-sixth mile, reported on by Maj. Thos.

H. Handbury, Corps of Engineers (see Chief of Engineers' report for 1886, Vol III, p. 1711).

From the seventy-sixth mile the route follows the narrow channel north of Turkey Island, after descending through the last lock, No. 37, to 7½ feet below low water in Mississippi River, and thence through the main channel of Rock River to its mouth.

The last mentioned portion of the route was based on a survey from Milan to the mouth of Rock River, made under your direction by the undersigned, assisted by Mr. John Ericson, civil engineer, in September, 1889, and which has not been heretofore reported on.

The plans for the various structures having been designed by yourself and drawn under your direct supervision, this report will be confined to the location of the routes, and to alterations and modifications from former projects.

The location of the proposed route for the main line is shown on twenty sheets (30 inches by 40 inches in size), containing generally, 4 miles of the route, each, and drawn to a scale of 1-inch 600 = feet. Corresponding profiles are also shown at the bottom of each sheet.

The location of the feeder line is represented in a similar manner, on ten sheets.

An index map shows, besides the main and feeder lines of the proposed canal, their connection with Lake Michigan via the Illinois and Michigan Canal and Illinois River, and a profile of the whole distance of 193¾ miles.

The main line of the canal is 77 miles in length, 25 miles of which are in Rock River; is 59 feet wide at the bottom, and 80 feet wide at the water line, with a slope to the banks of one and one-half to one. The depth of water is 7 feet. Locks are 30 feet wide and 170 feet long between miter sills.

The feeder line is 34¾ miles long, and of the same dimensions as the main line.

The principal changes in the route, and in the kind and distribution of the structures, as compared with the original projects, are as follows:

THE MAIN LINE.

The location of the first mile is unchanged, but the entrance is made 200 feet wide instead of 50 feet, and Locks Nos. 1 and 2 are separated instead of combined, to save water in lockages, and reduce the otherwise very heavy cutting. The northerly bank is calculated to reach above extreme high water.

At the crossing of Peoria branch of Chicago, Rock Island and Pacific Railroad, on the second mile, a pivot bridge has been provided for in place of the arch estimated for in 1882, because at high water sufficient space (15 feet in the clear), could not be obtained without raising the track at least 8 feet, which would be impracticable, considering the high embankment and steep grade now existing at this place.

The crossing of the main line of Chicago, Rock Island and Pacific Railroad has been changed from the third to the seventh mile, to avoid two sand-hills, respectively 95 feet and 133 feet above the canal bottom, with the railroad track at their base, and which have been made the more objectionable by the addition of a second track to the railroad. The crossing is made by a pivot bridge, after which, the canal turning north and west, crosses Bureau Creek at a point 1,500 feet further up stream than originally proposed, where a bend in the creek offers a more favorable angle for crossing.

From the eighth to the eleventh mile the line is practically unchanged. Changes in the bed of the creek at some places have called for some slight modifications.

Lock No. 13 on the twelfth mile was originally located on the thirteenth mile, beyond the Bureau Creek crossing, but to secure a sufficient elevation of Aqueduct No. 3 at said crossing above high water the lock was moved back across the river about 2,200 feet, and to compensate for the short space thus made, 400 feet between this lock and Lock No. 12 a basin is placed between them on the plateau below the hill.

An important change has been made on the thirteenth and fourteenth miles. The canal was originally taken around a large bend in Bureau Creek partially on the slope of a high sand hill, but this bend having been disconnected with the channel proper by a "cut-off" made by the railroad company south of their track, has made it possible to take the canal across the bend without the need of any aqueduct, and in a nearly straight line.

The old bed having several rivulets emptying into it a large culvert has been arranged for at the lower crossing, there being a culvert to correspond in the railroad embankment near by. A spillway is placed at the upper crossing.

At the end of the fourteenth mile are located Locks Nos. 15 and 16 combined. The extra supply of water required by the combination is aided by a basin made in the deep depression in the ground found between Locks Nos. 16 and 17.

The fifteenth mile is practically the same as the original line, save that the length of aqueduct No. 4 over East Bureau Creek is reduced from 650 to 180 feet, the difference being in high embankment.

On the sixteenth mile the canal enters Pond Creek Valley, probably the most ob-

jectionable locality for a favorable location along the whole line. The original line had already a very limited space between the railroad track and the adjacent high ground, but the additional track has made the conditions in this repect still worse, and forced the line still further into the high ground.

After leaving the railroad on the seventeenth mile the canal follows the bed of Pond Creek, occupying this valley, and having an overflow weir at eack lock. It passes under a fixed double-track bridge of the Chicago, Burlington, and Quincy Railroad on this mile. At the beginning of the eighteenth mile the route crosses a divide, where rather heavy cutting must be made. To reduce this somewhat it was decided to modify the location (after this had been drawn on the maps), change the lifts of of two of the locks, move Lock No. 22 six hundred feet further back, and take the canal through a pond located half-way between the seventeenth and eighteenth mile stations. To show these changes on the maps would have involved so many changes on the plans, tables, etc., to correspond, and has therefore not been done, but the earthwork estimates are based on the modified plan.

Lock No. 23 at the beginning of the nineteenth mile is located near the site for the lock of the same number of 1882, but the latter brought the canal up to the summit level. As, however, the water surface in the extensive swamp, which the canal enters on the twentieth mile, has an elevation of 213, and that in the canal along the summit 215, and as it is desirable to take the water from the marsh into the canal it was decided to reduce the lift of Lock No. 23, and add a lock, No. 24, with 3-foot lift at the twentieth mile, thereby bringing the water surface in the canal below this lock 1 foot lower than the water surface in the swamp from which the water will then be taken over an inflow weir, into the canal.

Most of the nineteenth and twentieth miles run in the bed of Cow-catcher Creek, the present outlet for the above-mentioned swamp. Flood water will be disposed of by means of an overflow weir at Lock No. 23.

From the twentieth, to and including the forty-seventh mile the canal route is identical with that reported on in 1886.

On the forty-eighth mile some important changes have been made. The three Locks, Nos. 29, 30 and 31, combined, according to the project of 1886, have been separated, to economize water, and the basin then provided for as has been dispensed with. The ravine is included in the canal, and below the bluff, to the north, a bank is so arranged as to inclose a storage basin to supply the lock below with water.

In the bank is a spillway for the disposal of flood-water. The third of the locks just referred to is moved down to the forty-ninth mile. The location of the forty-ninth and fiftieth miles is unchanged.

At the beginning of the fifty first mile the canal enters Penny's Slough, descending through Lock No. 33 to the grade of 132. This grade was originally fixed at 138, at which but slight excavation would have been required, but having found by borings in this vicinity the indication of sand and mud of sufficient depth to admit of dredging, it was considered an advantage to thus lower the grade, which will increase the amount of dredging as compared with the original project, but will, on the other hand, greatly reduce the area of land which would be flooded, this land being frequently quite low, for considerable distances from the river.

With the exception of changes in the grade and location of locks, as suggested by borings in the river bed made in various places along Rock River in September, 1889, no alterations have been made until the seventy-fifth mile is reached at Milan, where a lock, No. 36, of novel design has been introduced. Through this lock, which has one set of upper and two sets of lower gates, it is designed to take the canal at times of low water into a channel formed by the natural bluffs on the east side, and a rip-rapped bank in the river on the west side, as far as to the head of Turkey Island, after which it follows the easterly shore of this island to the last lock, No. 37. The route as far as within 500 feet of this lock is practically the same, though with a lower grade, as the original route, which here turned northward towards Rock Island.

Below this last rock, which by a nine-foot lift brings the canal bottom down to 7½ feet below low water in Mississippi River, the canal follows the narrow channel north of Turkey Island, and enters the main channel of Rock River, which it follows to its mouth. Dredging will have to be done in the channel alongside of the island, but it is expected to secure the necessary depth in Rock River by scouring, produced by a series of brush and stone wing dams, as indicated on the map, sheet No. 25.

During high-water season, or when the river has a stage of about 6 feet or more above low water. the second set of lower gates in Lock No. 36 will lead directly into the river proper, which may at that stage, be freely navigated.

The estimated cost of the main line of the canal exceeds that made in 1885 by $188,751 or with 10 per cent added, by $207,627. The greatest difference is found in the cost of locks and railroad bridges. The former may be accounted for by the addition to the new estimates, of two locks, and by the fact that lock-keepers' dwellings now estimated to cost $90,000 were not considered in previous estimates. The bridges were undoubtedly held at too low figures in the original estimates. Sluice-ways,

weirs, and culverts as proposed are of more substantial construction than previously figured for, but estimates for dams and aqueducts are lower.

A table of estimates for the various structures and other items of expenditures is respectfully submitted herewith, and also forms a part of the atlas which will accompany your report.

THE FEEDER LINE.

It was originally planned to have the feeder leave Rock River above the dam at the Dixon flour mill, and run for a distance of 500 feet in a covered channel of diminished dimensions, but with greater fall than adopted for the balance of the line; and thence in an open canal, of the same dimensions as those decided upon for the main line along the street following the river bank. Along a portion of this street runs a railroad track to the mill, and several switch tracks.

Further on the then proposed route crossed the Illinois Central Railroad track, and not less than ten streets, which latter though not at present extensively improved, may all in time have required bridges. The wagon-road bridge at Galena street would have to be extended across the canal. All these bridges would add materially to the cost, besides being objectionable as obstructions to navigation. The right of way would necessarily also be expensive. Finally it would be necessary to build a new dam, the one at the mill being of neither suitable condition nor sufficient height to give the required slope to the water surface in the feeder. This has not previously been estimated for.

After consideration of all these facts it was decided to commence the feeder at a point about 2½ miles below the original starting-point, which involves the purchase of the water-power and mill at Dixon. A guard lock and dam with sluice-ways have been estimated for at this place.

These very expensive structures, not provided for in estimates of 1882, have caused an increase in the totals of the present estimate, though to a certain degree this has been counterbalanced by the exclusion of excavation, right of way, and other items of expense on the 2½ miles between Dixon and the new initial point.

From the starting-point to the place where the feeder line leaves the river, about 4 miles below Dixon, the north bank, partly built in the river, to a height of 2½ feet above high water, is heavily riprapped. Riprap is, furthermore, continued on the exposed north side of this bank to the eighth mile, where at station 395 the high water slope becomes identical with the water surface in the canal.

The feeder line from here on is identical with that projected in 1882, save the modifications made in the various structures.

The estimate for the feeder line, as shown on the table before referred to, exceeds the estimate of 1885 (which was that of 1882 adopted in toto) by $176,618, or with 10 per cent. added, $194,280, for reasons partly accounted for above.

The estimate of cost for canal and feeder, submitted herewith, is as follows:

Main line (including 10 per cent.)	$5,067,562
Feeder line (including 10 per cent.)	1,858,398
Total	6,925,960

I am, captain, very respectfully, your obedient servant,

G. A. M. LILJENCRANTZ,
Assistant Engineer.

Capt. W. L. MARSHALL,
Corps of Engineers, U. S. A.

UNITED STATES ENGINEER OFFICE,
Milwaukee, Wis., September 1, 1888.

SIR: Before it is practicable to intelligently submit a project for the location of the Illinois and Mississippi Canal, "on such line as the Secretary of War may approve," provided for by the river and harbor act of August 11, 1888, item Illinois River, I have to respectfully request instructions or information from the Department on the following points:

First. The balance of funds available, and title of the appropriation under the river and harbor act approved August 5, 1886, "for the examination of the Hennepin Canal and of the Illinois and Michigan Canal, by a Board of Engineers?"

Second. An interpretation of the word "locate;" whether it means that the embankments, excavations, locks, weirs, feeders, and other works shall be staked out and marked upon the ground, or whether the "location" shall consist in marking these works upon the maps, and preparing drawings, plans, etc., of the mechanical constructions?

Third. What route is approved by the Secretary of War?

It will be remembered that three lines of survey for this canal have been made from the Illinois River near the town of Hennepin, to the Mississippi River at or near Rock Island.

The portion of the surveyed routes from the town of Hennepin to the summit, 25 miles, is common to all, and, therefore, there can be no doubt as to the location of this portion. The feeder from the Rock River at Dixon is also common to all surveyed routes, but between the summit and the Mississippi the routes diverge—one to the Mississippi at Rock Island, one to near Albany via Marais d'Osier, one to Watertown. In going west the descending lockage by the Marais d'Osier route is 75 feet; by the Watertown route 86 feet; by the Rock Island route 101 feet.

The relative cost of the three routes is estimated:

First, or cheapest, Marais d'Osier, 64 miles long.

Second, Watertown, 64 miles long.

Third, Rock Island, 74.5 miles long.

The Marais d'Osier route has been preferred by Majors Handbury and Benyaurd, and by the Board of Engineers convened under the River and Harbor act of August 5, 1886, for the reasons stated in their reports. (Chief of Engineer's Reports, 1883, p. 1754 et seq., 1886, p. 1708 et seq., 1887, p. 2125 et seq.) The Watertown route is rejected by all.

The Chiefs of Engineers, Generals Newton and Duane, and Secretary of War, Mr. Endicott, have not accepted the recommendations of the local engineers and of the Board of Engineers, the Secretary of War and General Newton favoring the Rock Island terminus, and General Duane saying "it is by no means clear, in the present condition of the commercial relations existing on the two sides of the Mississippi River, that it (Marais d'Osier) would be the preferable route.

I do not think that further surveys will shed any additional light on the question of the relative merits of the points competing for the terminus of this canal on the Mississippi River, but the act of Congress of August 11, 1888, requires the canal to be located on the route approved by the Secretary of War, and it is necessary to know whether the letter of the Secretary of War forwarding the report of the Board of Engineers (in report of Chief of Engineers, 1887, p. 2127), in which he says "Although from the report of the Board it would appear that the Marais d'Osier route, regarded as an engineering question, is preferable, yet in view of the existing routes of travel and transportation and from military considerations I am inclined to coincide with the opinion of General Newton in favor of the Rock Island route," constitutes such an approval of this particular route as to require the location of the canal along that route without further action.

Very respectfully, your obedient servant,

W. L. MARSHALL,
Captain of Engineers.

The CHIEF OF ENGINEERS, U. S. A.

[First indorsement.]

OFFICE CHIEF OF ENGINEERS,
U. S. ARMY,
October 24, 1888.

Respectfully submitted to the Secretary of War. Referring to the points upon which Captain Marshall desires instructions or information, it may be stated that the balance of funds available from the appropriation in the river and harbor act of 1886 for the examination of the Illinois and Michigan Canal, and the proposed Hennepin Canal is, to-day, $14,497.44. The title of the appropriation is "Examination of Illinois and Michigan and Hennepin Canals." That in the judgment of this department the word "locate," as used in the act of August 11, 1888, means to *designate the site or place* of the proposed canal upon maps compiled from surveys sufficiently in detail to furnish a careful estimate of the cost of the work, and does not contemplate the staking out of the works upon the ground.

As to the third question, it is the understanding of this department that the Secretary of War in his letter to Congress of January 10, 1887, transmitting a report of a Board of Engineers upon the Hennepin Canal made in accordance with the act of August 5, 1886, approved the location of the "Rock Island route," and unless otherwise informed, Captain Marshall will be so instructed.

THOS. LINCOLN CASEY,
Brig. Gen., Chief of Engineers.

[Second indorsement.]

WAR DEPARTMENT, *October* 27, 1888.

The Chief of Engineers is authorized to instruct Captain Marshall as proposed in first indorsement.

By order of the Secretary of War:

HARRY BARTON,
Acting Chief Clerk.

PAY OF ARMY, ETC., FOR 1889.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A copy of a communication from the Secretary of War submitting an estimate of deficiency in the appropriation for "Pay, etc., of the Army, 1889," amounting to $3,513.83.

JUNE 30, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
June 30, 1890.

SIR: I have the honor to submit herewith, for the consideration of Congress, copy of a communication from the Secretary of War of the 28th instant, submitting an estimate of deficiency in the appropriation for "Pay, etc., of the Army, 1889," amounting to $3,513.83.

Respectfully, yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

WAR DEPARTMENT,
Washington, June 28, 1890.

SIR: I have the honor to forward herewith, for transmission to Congress, estimate, $3,513.83, required to meet deficiencies in the appropriation for "Pay, etc., of the Army, 1889."

Very respectfully,

L. A. GRANT,
Acting Secretary of War.

The SECRETARY OF THE TREASURY.

Supplemental estimates of appropriations required for the service of the fiscal year ending June 30, 1889, *by the Pay Department, U. S. Army.*

Pay, etc., of the Army, 1889: Mileage to officers when authorized by law (July 24, 1876; vol. 19, p. 100, sec. 1. March 3, 1883; vol. 22, p. 456, sec. 1. February 9, 1887; vol. 24, p. 396, sec. 1)	$3,513.83

W. R. GIBSON,
Acting Paymaster-General, U. S. Army.

NOTE.—The above estimate is explained by the following correspondence:

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE,
Washington, D. C., June 26, 1890.

SIR: Referring to an estimate published in House Ex. Doc. 174, Fifty-first Congress, first session, of $11,486.17, required to pay mileage accounts of officers on file in your office, being a deficiency in the appropriation for mileage for the fiscal year 1889, I have the honor to inform you that accounts amounting to $346 have been certified by the Second Auditor and Second Comptroller, but are not included in the above-mentioned estimate; and there are other accounts pending which will further increase the deficiency.

The exact amount of the deficiency can not, however, be stated at present. With the view of providing for all outstanding accounts properly chargeable to the appropriation in question, I suggest that your estimate be increased from $11,486.17 to $15,000, which it is believed will cover all deficiencies. Should the whole of this amount not be required, the balance will go to the surplus fund by operation of law.

Respectfully, yours,

J. H. FRANKLIN,
Acting Auditor.

The PAYMASTER-GENERAL, U. S. ARMY.

WAR DEPARTMENT, PAYMASTER-GENERAL'S OFFICE,
Washington, D. C., June 27, 1890.

SIR: I have the honor to transmit herewith a supplemental estimate of the amount that will be required to supply a deficiency in the amount appropriated for mileage to officers, under the title of "Pay, etc., of the Army, 1889," for the service of the fiscal year ending June 30, 1889.

This estimate is based on the accompanying letter from the Second Auditor, dated June 26, 1890.

The amount required under this estimate is $3,513.83.

Very respectfully,

W. R. GIBSON,
Acting Paymaster-General, U. S. Army.

The SECRETARY OF WAR.

ADDITIONAL ESTIMATE FOR PENSIONS.

COMMUNICATION

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A copy of a letter from the Secretary of the Interior, submitting additional estimates, transmitted by the Commissioner of Pensions, for the prompt execution of the act, entitled "An act granting pensions to soldiers and sailors who are incapacitated for the performance of manual labor, and providing for pensions to widows, minor children, and dependent parents."

JUNE 30, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
June 28, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of a communication from the Secretary of the Interior of the 27th instant, submitting additional estimates for the fiscal year ending June 30, 1891, as transmitted by the Commissioner of Pensions.

Respectfully, yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR,
Washington, June 27, 1890.

SIR: I have the honor to transmit herewith an estimate of additional appropriations, submitted by the Commissioner of Pensions, found necessary for the prompt execution of the act entitled "An act granting pensions to soldiers and sailors who are incapacitated for the performance of manual labor, and providing for pensions to widows, minor children, and dependent parents," and ask the favorable consideration of Congress thereon.

Very respectfully,

JOHN W. NOBLE,
Secretary.

The SECRETARY OF THE TREASURY.

DEPARTMENT OF THE INTERIOR,
BUREAU OF PENSIONS,
Washington, D. C., June 26, 1890.

SIR: I have the honor to submit herewith estimates in duplicate for the additional sums which, in my judgment, are necessary to be appropriated for the prompt execution of the act, if approved by the President, entitled "An act granting pensions to soldiers and sailors who are incapacitated for the performance of manual labor, and providing for pensions to widows, minor children, and dependent parents."

For surgeons' fees	$800,000
For clerk hire	100,000
For rent	10,000
For fuel	500
For lights	500
For stationery and other expenses, to be approved by the Secretary of the Interior	20,000
Total	931,000

Very respectfully,

GREEN B. RAUM,
Commissioner.

Hon. JOHN W. NOBLE,
Secretary of the Interior.

Additional estimates of appropriations required for the service of the fiscal year ending June 30, 1891, by the Bureau of Pensions, Department of the Interior.

Detailed objects of expenditure, and explanations.	Additional estimated amount which will be required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.
Fees and expenses of examining surgeons:		
For fees and expenses of examining surgeons, and each member of each examining board shall, as now authorized by law, receive the sum of $2 for the examination of each applicant, whenever five or less shall be examined on any one day, and $1 for the examination of each additional applicant on each day (March 1, 1889; vol. 26, p. 782, sec. 1)		$800,000
Expenses of pension agents:		
Clerk hire (March 3, 1885; vol. 23, p. 362, sec. 1. March 1, 1889; vol. 26, p. 782, sec. 1)	$100,000	
Rent (same acts)	10,000	
Fuel (same acts)	500	
Lights (same acts)	500	
Stationery and other necessary expenses, all to be approved by the Secretary of the Interior (same acts)	20,000	131,000
		931,000

DANIEL DONOVAN.

LETTER

FROM

THE ACTING SECRETARY OF THE TREASURY,

TRANSMITTING

A copy of a communication from the Commissioners of the District of Columbia in relation to an appropriation to pay the balance of a judgment rendered by the Court of Claims in favor of Daniel Donovan, being a deficiency to the appropriation for "payment of referees, Court of Claims, District of Columbia." (Act July 7, 1884.)

JULY 7, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT, *July* 5, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of a communication from the Commissioners of the District of Columbia of the 1st instant, in relation to an appropriation to pay the balance of a judgment rendered by the Court of Claims in favor of Daniel Donovan as referee in certain cases against the District, being a deficiency to the appropriation for "payment of referees, Court of Claims, District of Columbia." (Act July 7, 1884.)

Respectfully, yours,

GEO. S. BATCHELLER,
Acting Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

OFFICE OF THE COMMISSIONERS, DISTRICT OF COLUMBIA,
Washington, July 1, 1890.

SIR: Relative to your reference to this office of No. 3047, warrant division, inclosing transcripts of judgments of the Court of Claims for $450 and $350, respectively, in favor of Daniel Donovan as referee in certain cases against the District of Columbia, the Commissioners have

to reply that they have directed the payment of the $350 judgment, and of $30 on account of services in the Lucas case; and have to request that you will regard this as their estimate for a deficiency for a balance of $420 for the services of Mr. Donovan as referee in the latter case, viz, Thomas S. Lucas *vs.* The District of Columbia, and so report it to Congress.

Respectfully,

J. W. DOUGLASS,
President.

Hon. WILLIAM WINDOM,
Secretary of the Treasury.

ADDITIONAL CLERICAL FORCE FOR THE SECOND AUDITOR'S OFFICE.

LETTER

FROM

THE ACTING SECRETARY OF THE TREASURY,

TRANSMITTING

A communication from the Second Auditor recommending an appropriation for ten additional clerks, class 1, on account of recent pension legislation.

JULY 7, 1890.—Referred to the Committee on Appropriations

TREASURY DEPARTMENT, *July* 5, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, a communication from the Second Auditor, recommending an appropriation for ten additional clerks of class 1 to meet an expected increase of work growing out of recent pension legislation.

Respectfully, yours,

GEO. S. BATCHELLER,
Acting Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

TREASURY DEPARTMENT,
SECOND AUDITOR'S OFFICE,
Washington, D. C., July 5, 1890.

SIR: The act granting pensions to soldiers and sailors who are incapacitated, etc., approved June 27, 1890, will, it is reported, add 300,000 names to the pension list. It is, therefore, not unreasonable to expect that the work of this office will be considerably increased by additional calls from the Pension Office for information, not only in the cases of soldiers, but also in cases of widows and parents who may have furnished evidence for use in the settlement of their claims for arrears of pay and bounty, which will be of importance to the Pension Office. Additional calls may also be expected from the War Department for information required from the records of this office to enable it to respond to calls from the Commissioner of Pensions.

Since the Second Auditor's report for the fiscal year 1889 was submitted, showing that 456 inquiries from the Pension Office remained unanswered on June 30, 1889, the work of answering such inquiries has been brought up to date, there being only three inquiries awaiting an-

swers on the 1st instant. The other business of the office is also progressing satisfactorily, but clerks could not be withdrawn, even temporarily, from the work upon which they are now employed without detriment to the public service.

I have, therefore, the honor to recommend that Congress be asked to provide for the appointment of ten additional clerks of class 1, in order that the anticipated increase of work in connection with pension cases may be promptly disposed of.

Respectfully, yours,

J. N. PATTERSON,
Auditor.

The SECRETARY OF THE TREASURY.

ADDITIONAL FORCE NECESSARY TO MEET PAYMENTS UNDER NEW PENSION LEGISLATION.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A communication from the Assistant Treasurer of the United States at New York, submitting an estimate of the additional force required to properly transact the increased business under the new pension legislation.

JULY 7, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
July 2, 1890.

SIR: I have the honor to transmit herewith, with recommendation for its favorable consideration, an estimate of the additional force required to properly transact the increased business devolving upon the office of the Assistant Treasurer of the United States at New York, under the provisions of the dependent pension act.

Respectfully yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

OFFICE OF ASSISTANT TREASURER UNITED STATES,
New York City, June 26, 1890.

SIR: The pension act, now soon to become a law, promises to increase very largely the work of this office, and to call for an addition to the number of clerks, as those now employed and those granted by the pending legislative, executive, and judicial appropriation bill have all the duties which they can perform.

The attention of the Department has already been directed to the fact that a large and growing ratio of the total number of pension checks is drawn upon this office, now from 65 to 70 per cent. of all. Provision was made in the estimate for the increase expected without additional legislation. Careful estimates justify the conclusion that the new law will require an increase of five persons, viz: One clerk at $1,400; two

clerks at $1,200; one clerk at $1,000; one messenger at $900, say $5,700, even if the force of the Pension Office is not increased.

If, however, the request of the Commissioner of Pensions dated June 12, for an increased force is granted, so that cases may be decided much more rapidly, this office must, in order to meet payments promptly, have at least ten additional employés (in lieu of the number above stated), viz: Two clerks at $1,400; four clerks at $1,200; two clerks at $1,000; two messengers at $900, say $11,400. Probably one half of this number would suffice to make the payments until about December 1, as only a part of the cases would be decided so as to reach the rolls before the quarter-day in September. It might thus be better to provide for the additional force generally instead of specifically. Say under the conditions first mentioned the sum of $5,000; under the latter conditions the sum of $10,000.

I therefore respectfully ask that, in order to make it possible to meet the emergency, an appropriation be requested. The urgency of the need of preparation to handle such a large number of checks as will be drawn upon the office by this new legislation, is as obvious as it is imperative.

Very respectfully,

E. H. ROBERTS,
Assistant Treasurer United States, New York.

The SECRETARY OF THE TREASURY.

CLAIM OF ISAAC S. LYON.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A copy of a communication from the Attorney-General, submitting for an appropriation the claim of Isaac S. Lyon for $1,563.05.

JULY 10, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
July 9, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of a communication from the Attorney-General of the 8th instant, submitting for an appropriation the claim of Isaac S. Lyon for $1,563.05.

Respectfully, yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF JUSTICE,
Washington, D. C., July 8, 1890.

SIR: I herewith transmit for your consideration a claim of Isaac S. Lyon for services and disbursements amounting to the sum of $1,563.05. These services were rendered by Mr. Lyon under appointment from my predecessor, a copy of which appointment is herewith inclosed. The original claim made was for $1,713.05, but after careful consideration, it has been reduced by $150, leaving it as above. I also inclose copies of the claim in detail, with copies of the vouchers attached. I have caused the subject to receive careful consideration from the assistants in this Department, and entertain no doubt of the propriety of the settlement. Inasmuch as the account is now of long standing, I suggest the propriety of expedition in transmitting the same to Congress, that it may be placed in the present deficiency bill.

Very respectfully,

W. H. H. MILLER,
Attorney-General.

The SECRETARY OF THE TREASURY.

EXHIBIT A.

WASHINGTON, D. C., *December* 7, 1888.

		Jurat to this bill	.25
		Total	487.89

This is to certify that I was engaged in taking depositions and pursuing investigations in a cotton claim for the Department of Justice, and that the transportation by team charged for in this account was necessary for the public service, and that there was no public conveyance to the points visited.

ISAAC S. LYON.

This is to further certify that where board and lodging of a witness, together with feed for horse or mule, appear as items of charge in this account (vouchers 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 17, 18) such expenditure was necessary from the fact that these witnesses came from considerable distances, generally on horseback, and that the expense of maintaining themselves and horse at a hotel while awaiting their turn to be examined as witnesses would have been so great that they would not have appeared or staid to give their depositions, unless their entire expenses, including board for self and horse, and their per diem had been allowed, and that it was impossible to have sessions for taking testimony any nearer to the residence of the witnesses.

ISAAC S. LYON.

I do solemnly swear that the above account is correct and just; that I performed the services and was actually employed for the period stated therein; that the above expenditures were necessarily incurred and paid by me while in the discharge of my official duties, and that it was impracticable to obtain receipts other than those hereto annexed.

ISAAC S. LYON.

Subscribed and sworn to before me this 13th day of February, 1889.

G. W. BALLOCH,
Notary Public.

[SEAL.]

GRAND LAKE, ARK., *Jan'y* 2, '88.

ADDITIONAL CLERICAL FORCE FOR THE THIRD AND FOURTH AUDITORS OF THE TREASURY.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

Applications from the Third and Fourth Auditors for increased clerical force in consequence of the recent pension legislation.

JULY 12, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., July 12, 1890.

SIR: I have the honor to inclose herewith, for the consideration of Congress, applications of the Third and Fourth Auditors of the Treasury, for increased clerical force, required in consequence of recent pension legislation, as follows:

Office of Third Auditor.—Four clerks of class 2, four clerks of class 1.

Office of Fourth Auditor.—Two clerks of class 4, one clerk of class 3 one clerk of class 2, one clerk of class 1, two clerks at $1,000 each.

Respectfully yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE,
Washington, D. C., July 11, 1890.

SIR: In order to properly conduct the business of this office, in the event the additional clerical force made necessary by reason of recent pension legislation, asked for by the Commissioner of Pensions, is granted, it will require the services of eight additional clerks, and I would respectfully ask that authority be given for their employment. Their grades to be, four of class 2, $1,400; four of class 1, $1,200.

Respectfully,

W. H. HART, *Auditor.*

Hon. WM. WINDOM,
Secretary of the Treasury.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE,
Washington, D. C., July 7, 1890.

SIR: If an increase is made in the clerical force of the Pension Office, in consequence of recent pension legislation, the correspondence between the Pension Bureau and this office will be increased to such an extent as to necessitate an additional force in this office.

Anticipating an increase in the Pension Bureau (clerical force), I submit the following estimate of the number of additional clerks that will thus be made necessary for this office, viz: two clerks of class 4, one clerk of class 3, one clerk of class 2, one clerk of class one, two clerks of the $1,000 class.

Respectfully,

JOHN R. LYNCH,
Auditor.

Hon. WILLIAM WINDOM,
Secretary of the Treasury.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 441.

E. E. CHAPIN.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A copy of a communication from the Attorney-General submitting for an appropriation the claim of E. E. Chapin, assistant attorney for the eastern and western districts of Wisconsin, amounting to $787.50.

JULY 15, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT, *July* 14, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of a communication from the Attorney-General of the 11th instant, submitting for an appropriation the claim of E. E. Chapin, assistant attorney for the eastern and western districts of Wisconsin, for expenses in cases growing out of improvements made by the Government in the Fox and Wisconsin Rivers, $787.50.

Respectfully, yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF JUSTICE,
Washington, D. C., July 11, 1890.

SIR: I inclose herewith copy of a letter of the 18th ultimo from Hon. Philetus Sawyer, United States Senator, respecting the claim of E. E. Chapin, assistant attorney for the eastern and western districts of Wisconsin, in cases growing out of improvements made by the Government in the Fox and Wisconsin Rivers, usually called flowage cases, in the matter of rent of office by him while so employed.

Attached to the copy of the letter of Senator Sawyer is a presentation of an account of $787.50, made by Mr. Chapin on January 6, 1890. He presents vouchers for the payment of the rent. They are on file in this Department.

Attached to this is also a letter of Mr. Chapin of the 19th ultimo, relating to an interview between him and the Hon. S. J. Randall, late chairman of the Committee on Appropriations, House of Representatives.

There is no appropriation under the control of this Department for the payment of the account. It is forwarded for transmission to Congress for its action.

Respectfully,

W. H. H. MILLER,
Attorney-General.

The SECRETARY OF THE TREASURY.

UNITED STATES SENATE,
Washington, D. C., June 18, 1890.

DEAR SIR: You will please find inclosed a letter from Hon. E. E. Chapin, of Milwaukee, late special attorney for the Government in the overflow cases in Wisconsin. He expects office rent while in the employ of the Government. I presume it is a legitimate bill against the Government, and if there is no money at your disposal out of which the same can be paid, I presume a bill for the payment of the same can be passed through Congress if recommended by you.

Yours, truly,

PHILETUS SAWYER.

Hon. W. H. H. MILLER,
Attorney-General.

MILWAUKEE, WIS., *January* 6, 1890.

The United States to E. E. Chapin, special assistant United States attorney, appointed to represent the Government in the flowage damage claims and suits occasioned by the dams in the improvement of the Fox and Wisconsin Rivers, State of Wisconsin under the act of Congress approved March 3, 1875, and acts supplementary thereto.

For rent of office for the use of himself as such assistant United States attorney and the Government Commissioners duly appointed from June 30, 1886, to January 1, 1890, at $225 per annum $787.50

STATE OF WISCONSIN, *Milwaukee County, ss.:*

E. E. Chapin, of Milwaukee, Wis., being duly sworn, says that the foregoing statement and account is just and true; that the rent of office has been necessarily expended and paid out by him in and about the duties of his office as special assistant United States attorney aforesaid, and for the business of the Commissioners aforesaid exclusively; that there was no other place or room in and about the Government building at Milwaukee, Wis., wherein he could have an office for the discharge of the duties of his said office during said term; that the office so rented by him as aforesaid has been used for no other purpose or purposes except for Government business during said term; that the vouchers hereunto annexed, marked "Exhibit A," show the time of monthly payment for the rent above specified during said term, and that no part thereof has been paid to him as such, nor has he been reimbursed therefor, and that said sum of $787.50 is justly due him from the Government.

E. E. CHAPIN.

Subscribed and sworn to before me this 6th day of January, A. D. 1890.
[SEAL.]

CHAS. T. HICKOX,
Notary Public, Milwaukee County, Wis.

MILWAUKEE, *June* 19, 1890.

SIR: I have just received a letter from Senator Sawyer in relation to my office rent, an account for which, with vouchers, was sent to you the forepart of January, 1890.

Mr. Sawyer says that you have not as yet recommended payment on the same, but hopes that you will soon do so.

In January, 1889, when I was in Washington, I talked the matter over with Mr. Garland, who recommended its allowance up to January 1, 1889, which I took over to Mr. Sawyer, who advised me to present it to Mr. Randall, who would place it in the deficiency bill for that year. After my return home I received a letter from Mr. Randall the forepart of February, 1889, that he would attend to it, but for some reason it was omitted; and I was advised to wait until I had finished up with the Commissioners and until the Government building at Oshkosh was completed, which would give the Commissioners and myself an office, and then put in the full bill for the time for which the office was used absolutely for Government work in the flowage damage litigation, which I have done.

As you are aware from the correspondence in relation to this bill and my application for re-imbursement for this rent money, there was no office here in the Government building in Milwaukee, nor elsewhere, for myself and the Commissioners; and it was absolutely necessary that I should have an office for this Government work. No one disputes this. The bill is not large, but I need the money advanced by me for this rent.

You all do know that my entire time, for the time specified in the bill, was devoted to this important and responsible professional work, with small compensation, considering the importance and the amount of labor performed; and it would not be fair or just to deprive me of this amount due me for rent.

Senator Sawyer understands the whole matter and will explain to you more fully than I can write.

I trust, however, that you will allow and pay the bill, as I need it.

I am, as ever, yours, truly,

E. E. CHAPIN.

Hon. W. H. H. MILLER,
Attorney-General, Washington, D. C.

MAPS OF CHICKAMAUGA BATTLE-FIELD.

LETTER

FROM

THE SECRETARY OF THE TREASURY.

TRANSMITTING

An estimate submitted by the Secretary of War for an appropriation of $3,000 for maps of Chickamauga battle-field.

JULY 15, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
July 15, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, an estimate submitted by the Secretary of War for $3,000 for maps of the Chickamauga battle-field.

Respectfully yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

WAR DEPARTMENT,
Washington, July 15, 1890.

SIR: I have the honor to transmit herewith an estimate in the sum of $3,000, which is required for completing the series of maps now in process of preparation by this Department, relating to the Chickamauga and Chattanooga military campaign, Tennessee, and to recommend, in view of the importance of the matter, that the estimate may be sent to the Speaker of the House of Representatives as early as possible in order that it may, if possible, be submitted to the Committee on Appropriations to-day.

Very respectfully,

REDFIELD PROCTOR,
Secretary of War.

The SECRETARY OF THE TREASURY.

Estimates of appropriations required for the service of the fiscal year ending June 30, 1891, by the War Department.

Detailed objects of expenditure and explanations.	Total amount to be appropriated under each head of appropriation	Amount appropriated for the current fiscal year ending June 30, 1890.
Maps of Chickamauga battle-field.		
Completing the series of maps now in progress of execution relating to the Chickamauga and Chattanooga campaigns. (Act of April 4, 1890)	$3,000.00	$2,500.00
NOTE.—The estimated cost of the above, by items, is as follows: Three base maps of campaign, drawing and engraving, $1,500; surveying and office expenses, $500; printing one edition, $1,000.

SISSETON AND WAHPETON INDIANS.

LETTER

FROM

THE SECRETARY OF THE INTERIOR,

TRANSMITTING

A copy of a communication from the Commissioner of Indian Affairs, and also a copy of a report by United States Indian Agent William McKusick, Sisseton Agency, S. Dak., relative to the destitute condition of the Sisseton and Wahpeton Indians.

JULY 17, 1890.—Referred to the Committee on Indian Affairs.

DEPARTMENT OF THE INTERIOR,
Washington, July 15, 1890.

SIR: I have the honor to transmit herewith copy of a communication of 14th instant from the Commissioner of Indian Affairs, and accompanying copy of a report from United States Indian Agent William McKusick, Sisseton Agency, S. Dak., relative to the destitute condition of the Sisseton and Wahpeton Indians, and to the urgent necessity of ratifying the agreement with those Indians now before Congress.

Very respectfully,

JOHN W. NOBLE,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, D. C., July 14, 1890.

SIR: I have the honor to inclose herewith two copies of a letter from the United States Indian agent, Sisseton Agency, S. Dak., in relation to the destitute condition of the Sisseton and Wahpeton Indians living and having allotments on the Lake Traverse Reservation, and to request that one of them be forwarded to the House of Representatives with a view of showing that body the urgent necessity of ratifying the agreement with those Indians now before it.

Very respectfully,

T. J. MORGAN,
Commissioner.

The SECRETARY OF THE INTERIOR.

SISSETON AGENCY, S. DAK., *June* 25, 1890.

SIR: I have the honor of calling attention to the condition of the Sisseton and Wahpeton tribe of Indians living and having allotments on the Lake Traverse Reservation, South Dakota. My annual report, together with all other reports and references, show that this section of country suffered severely by drought during the summer of 1889, and that nearly all of the crops on the Lake Traverse Reservation were blasted and dried up. The Indians of this reservation having taken allotments in 1887 began to make quite an effort at farming in 1888 and 1889, and used up all the means they had in opening up land, building, etc., and became almost entirely dependent upon their crops for a living.

I found these Indians so poor and destitute in the fall of 1889, after the drought of that season, that I immediately reported their condition, and the honorable Secretary of the Interior at once authorized me to expend a sum not exceeding $2,000 in the purchase of flour, pork, and beans for the relief of the destitute. Said provisions were purchased in November last, and have been carefully issued as directed, and there are no further provisions for these destitute people. These Indians are in want of provisions. Their destitution presses them so hard that the few trees that should be left to grow are being cut and hauled away to purchase something to live on. They are digging the wild turnips, and I often hear of ponies and oxen being sold for their value to obtain provisions for their families. The agency physician, after visiting the sick, often reports the destitution and poverty of the families. These Indians have but few resources for obtaining the necessaries of life. They obtain a limited amount of fish from the lakes, and this is all the wild game on this reservation. There is but little timber, which is located around the lakes and in the ravines, and this is wrongfully being cut from necessity, as before stated.

A very few Indian men can get employment among the whites, as they are not that far advanced in civilization to command much pay as laborers. The old chief Renville and many of the leading men of the tribe have visited me of late, and called my attention to the destitution of the people. They say that if the tribe has anything coming to it from the Government from any source whatever, that it is the earnest desire of all that sufficient supplies and provisions be purchased and issued to the tribe to relieve them from their destitution and poverty. These leading Indians apply for food for the tribe and insist that such destitution and poverty should not be allowed to continue. They say that a small payment now will do more good than a large one after many of them have died from destitution and want. They despair of the relief from the bill now before Congress for the payment of back annuities, and earnestly apply for the earliest assistance that can be obtained.

In view of all that is heretofore represented and the uncertainty of the payment of their annuities, I earnestly recommend that $5,000 be expended in the purchase of flour, pork, and beans for the destitute Indians of the Lake Traverse Reservation, South Dakota, and be issued in such quantities and under such restrictions as the honorable Secretary of the Interior may direct. This would furnish relief for all immediate wants, and the future might place them in a more prosperous situation.

Very respectfully,

WILLIAM MCKUSICK,
United States Indian Agent.

Hon. T. J. MORGAN,
Commissioner of Indian Affairs, Washington, D. C.

○

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 444.

APPOINTMENTS AT LARGE TO UNITED STATES MILITARY ACADEMY.

LETTER

FROM

THE SECRETARY OF WAR,

TRANSMITTING

Petitions from officers of the U. S. Army praying that the number of appointments at large to the United States Military Academy be increased to twenty, and that such appointments be restricted to the sons of officers and soldiers and the lineal descendants of officers of the volunteer forces of the late war.

JULY 18, 1890.—Referred to the Committee on Military Affairs.

WAR DEPARTMENT,
Washington City, July 17, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, petitions from officers of the U. S. Army, praying for the reasons therein given that the number of appointments at large to the U. S. Military Academy may be increased to twenty, and that such appointments be restricted to the sons of officers and soldiers and to the lineal descendants of officers of the volunteer forces of the late war.

Very respectfully,

REDFIELD PROCTOR,
Secretary of War.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

COMMITTEE ON MILITARY AFFAIRS,
United States House of Representatives,
(Through the Secretary of War).

Your petitioners, commissioned officers of the Army of the United States, would humbly request that the number of appointments at large to the United States Military Academy be increased to twenty per annum, and that such appointments be restricted to the sons of Army officers and soldiers, and to the lineal descendants of officers of the volunteer forces of the late war, in such proportion as in your discretion may seem just.

Your petitioners would represent that there are 2,170 commissioned officers in the Army, a large proportion of whom are married and have sons whom they naturally desire to follow in their own footsteps. From the nature of their duties Army officers have no political influence, and their only chance for securing appointments for their sons is from the President. Under present rulings the latter can only have appointees at the Military Academy at one time (which is an average, allowing for casualties) of three per annum. Your petitioners would submit that so small a number of appointments is a practical exclusion of the sons of Army officers from the military profession.

In all other nations there are special schools for officers' sons, and they have exceptional opportunities of following their fathers' profession; it is believed that experience shows that as a class they make exceptionally valuable officers.

Your petitioners would also represent that Army officers are debarred from civil pursuits, and are therefore without those facilities for starting their sons in life that all fathers naturally seek. The proposed enlargement of appointments at large would tend to lessen this disability, and is believed to be an act of justice that will likewise benefit the country.

And your petitioners will ever pray.

Guy V. Henry, major, Ninth Cavalry; L. J. Hearn, first lieutenant, Twenty-first Infantry; E. D. Dimmick, captain, Ninth Cavalry; John S. Loud, captain, Ninth Cavalry; August V. Kautz, colonel, Eighth Infantry; R. F. Ames, first lieutenant, Regimental Quartermaster, Eighth Infantry; Thos. Wilhelm, captain, Eighth Infantry; E. B. Savage, captain, Eighth Infantry; Chas. Porter, captain, Eighth Infantry; Alfred T. Smith, lieutenant-colonel, Eighth Infantry; Patk. Cusack, captain, Ninth Cavalry; E. N. Jones, jr., second lieutenant, Eighth Infantry; W. P. Richardson, first lieutenant and adjutant, Eighth Infantry; Dan'l T. Wells, captain, Eighth Infantry; C. A. Earnest, captain, Eighth Infantry; Timothy Wilcox, captain and assistant surgeon; F. A. Whitney, captain, Eighth Infantry; W. A. Mercer, first lieutenant, Eighth Infantry; Edward Lynch, first lieutenant, Eighth Infantry; Julian M. Cabell, first lieutenant and assistant surgeon, U. S. Army; W. L. Pitcher, first lieutenant, Eighth Infantry; Edwin T. Cole, second lieutenant, Eighth Infantry; John F. McBlain, first lieutenant, Ninth Cavalry; Jos. Garrard, captain, Ninth Cavalry; G. P. H. Ellis, captain Thirteenth Infantry; John S. Bishop, captain Thirteenth Infantry; Paul R. Brown, assistant surgeon U. S. Army; Edw. P. Lawton, second lieutenant, thirteenth Infantry.

[First Indorsement.]

LITTLE ROCK BARRACKS, *June* 18, 1890.

Respectfully forwarded to the Adjutant-General U. S. Army.

P. H. ELLIS,
Captain Thirteenth Infantry, Commanding.

A petition, same as preceding, signed by—

Carl Koops, second lieutenant Thirteenth Infantry; Benj. W. Atkinson, second lieutenant Sixth Infantry; John S. Seibold, post chaplain; J.P. Schindell, captain Sixth infantry.

A petition, same as preceding, signed by—

W. M. Van Horne, captain Seventeenth infantry; C. H. Greene, captain Seventeenth infantry; Thomas Sharp, captain Seventeenth Infantry; Geo. H.Roach, first lieutenant Seventeenth Infantry; Wm. R. Dashiell, second lieutenant Seventeenth Infantry; Charles H. Muir, second lieutenant Seventeenth Infantry; J. A. Lockwood, first lieutenant Seventeenth Infantry; Clarence E. Bennett, captain Seventeenth Infantry, U. S. Army; A. H. Appel, assistant surgeon; C. S. Roberts, captain Seventeenth Infantry; Harry C. Egbert, major Seventeenth Infantry; M. R. Morgan, lieutenant-colonel, asssistant commisary-general of subsistence; D. P. Miller, captain and assistant quartermaster; G. W. Candee, paymaster U. S. Army; R. Williams, colonel and assistant adjutant general.

A petition, same as preceding, signed by—

M. A. Cochran, lieutenant-colonel Fifth Infantry; S. Allen Dyer, first lieutenant Twenty-third Infantry; Clarence R. Edwards, second lieutenant Twenty-third Infantry; E. P. Pendleton, first lieutenant Twenty-third Infantry; J. M. Partello, first lieutenant Fifth Infantry; T. M. K. Smith, captain Twenty-third Infantry; J. E. Normoyle, second lieutenant Twenty-third Infantry; O. W. Pollock, captain Twenty-third Infantry; J. O. Skinner, assistant surgeon U. S. Army; George Robinson; Wm. H. C. Bowen, first lieutenant Fifth Infantry; Frank D. Baldwin, captain Fifth Infantry; Robt. W. Rose, second lieutenant Fifth Infantry.

A petition, same as preceding, signed by—

Geo. B. Backus, first lieutenant first Cavalry; Jno. Q. Adams, captain First Cavalry; W. W. Gray, assistant surgeon, U. S. A.

A petition, same as preceding, signed by—

R. P. Strong, captain Fourth Artillery; Sam R. Jones, first lieutenant Fourth Artillery; Edward Field, captain Fourth Artillery; S. W. Taylor, first lieutenant Fourth Artillery.

A petition, same as preceding, signed by—

H. C. Hasbrouck, major Fourth Artillery; Frederick Fulger, captain Fourth Artillery; W. C. Gorgas, assistant surgeon, U. S. A.; Adelbert Cronkhite, first lieutenant Fourth Artillery; A. R. Paxton, first lieutenant Fifteenth Infantry; Morris K. Barron, second lieutenant Fourth Artillery.

[First indorsement.]

FORT BARRANCAS, Fla., *June* 19, 1890.

Respectfully forwarded to the Adjutant-General, U. S. A.

FREDERICK FUGER,
Captain Fourth Artillery, Commanding Post.

A petition, same as preceping, signed by—

Z. R. Bliss, colonel Twenty-fourth Infantry, U. S. A.; Alex. S. B. Keyes, captain Tenth Cavalry; F. Van Vliet, major Tenth Cavalry; H. S. Whipple, second lieutenant Tenth Cavalry; Chas. C. Wood, captain Twenty-fourth U. S. Infantry; Allen Allensworth, chaplain Twenty-fourth Infantry; Henry W. Hovey, first lieutenant Twenty-fourth Infantry; E. T. Comegys, assistant surgeon, U. S. A.; C. L. Collins, second lieutenant Twenty-fourth Infantry; Geo. H. Evans, first lieutenant Tenth Cavalry; J. D. Leitch, second lieutenant Twenty-fourth Infantry; Wm. H. Arthur, assistant surgeon, U. S. A.; J. J. Brereton, first lieutenant and adjutant Twenty-fourth Infantry.

A petition, same as preceding, signed by—

Richard I. Dodge, colonel Eleventh Infantry; J. D. Hall, surgeon, U. S. A.; P. M. B. Travis, first lieutenant Eleventh Infantry; Wm. Weigel, lieutenant Eleventh Infantry; Odon Gurovits, second lieutenant Eleventh Infantry; R. M. Blatchford, first lieutenant Eleventh Infantry; E. C. Gilbreath, captain Eleventh Infantry; H. R. Lee, second lieutenant Eleventh Infantry; Charles P. Russ, second lieutenant Eleventh Infantry; J. H. Philbrick, first lieutenant and adjutant Eleventh Infantry.

A petition, same as preceding, signed by—

E. C. Woodruff, major Fifth Infantry; Chas. B. Thompson, first lieutenant Fifth Infantry; Henry Romeyn, captain Fifth Infantry; Geo. P. Bordden, first lieutenant Fifth Infantry.

A petition, same as preceding, signed by—

Wm. H. Carter, captain Sixth Cavalry; A. M. Wetherill, captain Sixth Infantry; Chas. F. Mason, assistant surgeon, U. S. A.; G. M. Williamson, second lieutenant Sixth Cavalry; A. P. Blocksom, first lieutenant Sixth Cavalry; T. C. Tupper, major Sixth Cavalry; L. Daniel, second lieutenant Sixth Cavalry; Robert Hanna, captain Sixth Cavalry; A. B. Shattuck, second lieutenant Sixth Infantry; F. D. Webster, second lieutenant Sixth Infantry; W. J. Larkin, chaplain U. S. A., Fort Lewis, Colo.

A petition, same as preceding, signed by—

Adna R. Chaffee, major ninth cavalry. C. E. Price, captain and assistant surgeon U. S. A. Chaplain W. H. Scott, U. S. A. Wm. Wedemeyer, captain Sixteenth Infantry; L. H Ramsey, captain Ninth Cavalry; C. H. Noble, captain Sixteenth Infantry; S. R. Whitall, captain Sixteenth Infantry; C. R. Tyler, first lieutenant Sixteenth Infantry; R. R. Steedman, first lieutenant Sixteenth Infantry; Chas. P. George, second lieutenant Sixteenth Infantry; E. S. Wright, second lieutenant Ninth Cavalry.

A petition, same as preceding, signed by—
A. C. Wildrick, major Fifth Artillery; W. Butler Beck, captain Fitfh Artillery; W. H. Pearson, chaplain U. S. A.; C. C. Gallup, second lieutenant Fifth Artillery; Geo. W. Crabb, captain Fifth Artillery; O. E. Wood, first lieutenant Fifth Artillery.

A petition, same as preceding, signed by—
L. L. Livingston, lieutenant-colonel Third Artillery; Jno. A. Thurston, captain Third Artillery; Chas. G. Woodward, first lieutenant Third Artillery.

A petition, same as preceding, signed by—
R. Lodor, lieutenant-colonel, acting brevet colonel U. S. A.; H. W. Hubbell, captain First Artillery; E. M. Russell, captain First Artillery; Robert B. Benham, captain and assistant surgeon U. S. A.; Robert H. Patterson, first lieutenant First Artillery; Eugene T. Wilson, second lieutenant First Artillery; J. W. MacMurray, captain First Artillery; Jno. Pope, first lieutenant First Artillery; G. N. Whistler, first lieutenant Fifth Artillery.

A petition, same as preceding, signed by—
T. W. Jones, first lieutenant Tenth Cavalry; C. B. McClellan, major Tenth Cavalry; Wm. T. Littebrant, second lieutenant Tenth Cavalry; Wm. H. Beck, captain Tenth Cavalry; G. E. Stockle, second lieutenant Tenth Cavalry; Wm. H. Smith, first lieutenant Tenth Cavalry; W. E. Shipp, first lieutenant Tenth Cavalry.

A petition, same as preceding, signed by—
J. Ford Kent, major Fourth Infantry; G. L. Luhn, captain Fourth Infantry; Henry Seton, captain Fourth Infantry; Horace Neide, captain Fourth Infantry; H. T. Surrill, assistant surgeon U. S. Army; Joseph Kupp, captain Fourth Infantry; Ed. L. Bailey, first lieutenant Fourth Infantry; Magnus O. Hollis, second lieutenant Fourth Infantry; John J. O'Brien, first lieutenant Fourth Infantry; E. H. Browne, second lieutenant Fourth Infantry; Eli A. Helmick, second lieutenant Fourth Infantry.

A petition, same as preceding, signed by—
Henry Wygant, captain Twenty-fourth Infantry; Mason M. Maxon, captain Tenth Cavalry; F. H. Weaver, chaplain Tenth Cavalry; John Little, second lieutenant Twenty-fourth Infantry; Chas. V. Donaldson, second lieutenant Twenty-fourth Infantry; Ben. W. Leavell, first lieutenant Twenty-fourth Infantry; A. C. Ducat, jr., first lieutenant Twenty-fourth Infantry.

A petition, same as preceding, signed by—
Wm. Lassiter, second lieutenant First Artilery.

A petition, same as preceding, signed by—
H. F. Brewerton, captain Fifth Artillery; D. H. Kinzie, captain Fifth Artillery; E. M. Blosee, second lieutenant Fifth Artilery; Edward L. McGlachlin, jr., second lieutenant Fifth Artillery; G. Le R. Irwin, additional second lieutenant Fifth Artillery; G. W. Dunbar, post chaplain U. S. Army; Wm. R. Hamilton, first lieutenant Fifth Artillery; J. E. Sawyer, first lieutenant Fifth Artillery; Smith E. Pollard, first lieutenant First Infantry; J. R. Richards, jr., first lieutenant Fourth Cavalry; Louis P. Brant, first lieutenant First Infantry; Wm. H. Coffin, first lieutenant and adjutant Fifth Artillery; Wm. M. Graham, lieutenant-colonel Fifth Artillery, brevet brigadier-general U. S. Army; Thomas H. Barry, first lieutenant First Infantry; Chas. Morris, captain Fifth Artillery.

A petition, same as preceding, signed by—
M. C. Wyeth, captain, Medical Department U. S. Army.

A petition, same as preceding, signed by—
J. F. Bell, second lieutenant Seventh Cavalry; W. P. Burnham, second lieutenant Sixth Infantry; T. Q. Donaldson, jr., first lieutenant Seventh Cavalry; John S. Grisard, second lieutenant Thirteenth Infantry; George E. Pond, captain and acting quartermaster U. S. Army; James D. Mann, second lieutenant Seventh Cavalry; S. R. H. Tompkins, second lieutenant Seventh U. S. Cavalry; W. C. Bennell, second lieutenant Sixth U. S. Infantry; W. W. Robinson, jr., first lieutenant Seventh Cavalry; A. B. Dyer, first lieutenant Fourth Artillery; George W. Gatchell, second lieutenant Fourth Artillery; Eli D. Hoyle, first lieutenant Second Artillery; C. D. Parkhurst, first lieutenant Fourth Artillery; John A. Harman, second lieutenant Seventh Cavalry; E. C. Bullock, second lieutenant Seventh Cavalry; James W. Forsyth, colonel Seventh Cavalry; S. M. Whitside, major Seventh Cavalry; E. B. Williston, major Third Artillery; Jas. W. Powell, jr., captain Sixth Infantry; Ezra B. Fuller, first lieutenant Seventh Cavalry; W. S. Edgerly, captain Seventh Cavalry; Fred. W. Thibaut, captain Sixth Infantry; W. J. Nicholson, first lieutenant Seventh Cavalry; John Van P. Hoff, captain medical department U. S. Army; E. A. Brewer, first lieu-

tenant Seventh Cavalry; F. S. Strong, first lieutenant Fourth Artillery; F. C. Grugan, captain Second Artillery; M. Moylan, captain Seventh Cavalry; R. R. Ball, assistant surgeon U. S. Army; E. A. Garlington, first lieutenant Seventh Cavalry; J. C. Gresham, first lieutenant Seventh Cavalry; J. C. Waterman, second lieutenant Seventh Cavalry.

[Indorsement.]

FORT RILEY, KANS., *June* 27, 1890.

Respectfully forwarded to the Adjutant-General of the Army as requested by General Kautz in accompanying letter.

JAMES W. FORSYTH,
Colonel Seventh Cavalry, Commanding.

A petition, same as preceding, signed by—

Geo. L. Andrews, colonel, Twenty-fifth Infantry; Henry P. Ritzius, captain Twenty-fifth Infantry; Charles G. French, second lieutentant, Twenty-fifth Infantry; Calvin DeWitt, major and surgeon, U. S. Army; R. H. R. Loughborough, first lieutenant, Twenty-fifth Infantry; J. O. Green, second lieutenant, Twenty-fifth Infantry; T. H. McGuire, second lieutenant. Twenty-fifth Infantry; W. I. Sanborn, captain, Twenty-fifth Infantry; J. McMartin, first lieutenant, Twenty-fifth Infantry; C. A. Devol, first lieutenant and regimental quartermaster, Twenty-fifth Infantry; Geo. Andrews, first lieutenant and adjutant, Twenty-fifth Infantry; D. B. Wilson, captain, Twenty-fifth Infantry; J. C. Ord, first lieutenant, Twenty-fifth Infantry; U. G. McAlexander, second lieutenant, Twenty-fifth Infantry; Gaines Lawson, captain, Twenty-fifth Infantry.

A petition, same as preceding, signed by—

Lewis Johnson, captain, Twenty-fourth Infantry, brevet-lieutenant colonel, U. S. Army; Jas. N. Morgan, brevet major, U. S. Army, captain, Twenty-fourth Infantry; Edwin M. Mann, acting assistant surgeon, U. S. Army; M. C. Wessells, captain, Twenty-fourth Infantry; Powhatan H. Clarke, second lieutenant, Tenth Cavalry; J. W. Watson, first lieutenant, Tenth Cavalry; Chas. E. Tayman, second lieutenant, Twenty-fourth Infantry; Frank H. Mills, first lieutenant. Twenty-fourth Infantry.

[First indorsement.]

SAN CARLOS, ARIZ., *June* 17, 1890.

Respectfully forwarded,

LEWIS JOHNSON,
Captain, Twenty-fourth Infantry, Commanding Post.

[Second indorsement.]

HEADQUARTERS DEPARTMENT OF ARIZONA,
Los Angeles, Cal., June 21, 1890.

Respectfully forwarded through Headquarters Division of the Pacific. Approved

B. H. GRIERSON,
Brigadier-General, Commanding.

[Third indorsement.]

HEADQUARTERS DIVISION OF THE PACIFIC,
San Francisco, Cal., June 24, 1890.

Respectfully forwarded to the Adjutant-General of the Army. Approved and recommended.

NELSON A. MILES,
Brigadier-General, Commanding.

A petition, same as preceding, signed by—

James S. Brisbin, colonel First United States Cavalry; Chas. D. Viele, major First Cavalry; John W. French, captain Twenty-fifth Infantry; A. K. Arnold, lieutenant-colonel First Cavalry; Henry H. Hall, post chaplain U. S. Army; F. K. Upham, captain First Cavalry; S. Burkhardt, jr., second lieutenant Twenty-fifth Infantry; Max Wesendorff, captain First Cavalry; Owen J. Sweet, captain Twenty-fifth Infantry; H. A. Leonhauser, first lieutenant Twenty-fifth Infantry; J. G. Galbraith, lieutenant First Cav-

alry; Jno. Pitcher, lieutenant First Cavalry; R. P. Page Wainwright, first lieutenant and adjutant First Cavalry; Henry C. Barber, second lieutenant First Cavalry; A. G. Forse, captain First Cavalry; W.H. Miller, first lieutenant First Cavalry; S. C. Robertson first lieutenant First Cavalry; A. L. Mills, first lieutenant First Cavalry.

A petition, same as preceding, signed by—

H. DeLany, captain Ninth Infantry; E. B. Robertson, first lieutenant Ninth Infantry; E. Wittenmyer, second lieutenant Ninth Infantry; D. L. Huntington, surgeon U. S. Army; W. R. Maize, captain Twentieth Infantry; H. Sweeney, captain U. S. Army, retired.

A petition, same as preceding, signed by—

Emil Adam, major, Sixth Cavalry; J. M. Banister, captain and assistant surgeon, U. S. Army; G. L. Scott, first lieutenant, Sixth Cavalry; H. P. Kingsbury, captain, Sixth Calvary; J. J. Pershing, second lieutenant, Sixth Calvary; A. W. Brewster, second lieutenant, Fourth Infantry.

[First indorsement].

FORT STANTON, N. MEX., *June* 25, 1890.

Respectfully forwarded through the Adjutant-General to the Committee on Military Affairs, United States House of Representatives.

EMIL ADAM,
Major, Sixth Calvary, Commanding Post.

A petition, same as preceding, signed by—

F. E. Lacey, captain, Tenth Infantry; Bogardus Eldridge, first lieutenant, Tenth Infantry; I. W. Littell, first lieutenant, Tenth Infantry; Francis E. Lacey, jr., second lieutenant, Tenth Infantry.

A petition, same as preceding, signed by—

F. E. Trotter, captain Fourteenth Infantry; Dan W. Burke, captain Fourteenth Infantry; John Murphy, first lieutenant, Fourteenth Infantry; Frank F. Eastman, second lieutenant, Fourteenth Infantry; Jos. P. O'Niel, second lieutenant, Fourteenth Infantry; R. T. Yeatman, first lieutenant and adjutant, Fourteenth Infantry; E. T. Winston, second lieutenant, Fourteenth Infantry; W. P. Goodwin, first lieutenant, Fourteenth Infantry; C. H. Martin, second lieutenant, Fourteenth Infantry; C. A. Johnson, first lieutenant, Fourteenth Infantry; J. H. Gustin, first lieutenant, and regimental quartermaster, Fourteenth Infantry; Wm. K. Jones, second lieutenant, Fourteenth Infantry; C. H. Warrens, captain Fourteenth Infantry; G. H. G. Gale, first lieutenant, Fourth Cavalry; W. E. Waters, surgeon, U. S. Army; Patrick Hasson, captain, Fourteenth Infantry; H. G. Burton, assistant surgeon U. S. Army.

A petition, same as preceding, signed by—

A. B. MacGowan, captain Twelfth U. S. Infantry; B. A. Poore, second lieutenant Twelfth Infantry; A. G. Tassin, captain Twelfth Infantry; George J. Godfrey, second lieutenant Twelfth Infantry; Jno. L. Viven, captain Twelfth Infantry; Earl C. Carnahan, second lieutenant Twelfth Infantry.

A petition, same as preceding, signed by—

Wm. Sinclair, major Second Artillery; Geo. McCreery, assistant surgeon U. S. Navy; J. C. Scantling, captain Second Artillery; A. C. Taylor, captain Second Artillery; James E. Eastman, first lieutenant Second Artillery; W. S. Peirce, second lieutenant Second Artillery.

A petition, same as preceding, signed by—

J. J. Upham, lieutenant-colonel Third Cavalry; Geo. H. Torney, captain and assistant surgeon U. S. Army; C. E. Hargous, captain Fifth Infantry; J. O. Mackay, first lieutenant Third Cavalry; W. H. Chatfield, second lieutenant Fifth Infantry; E. S. Robins, second lieutenant Third Cavalry; H. L. Ripley, first lieutenant Third Cavalry; J. B. Johnson, captain Third Cavalry.

A petition, same as preceding, signed by—

D. M. Appel, assistant surgeon U. S. Army; E. P. Ewers, captain Third Infantry; Mason Carter, captain Fifth Infantry; T. M. Defrees, first lieutenant Fifth Infantry; F. C. Kimball, second lieutenant Fifth Infantry; S. W. Miller, first lieutenant and regimental quartermaster Fifth Infantry.

A petition, same as preceding, signed by—

S. M. Horton, surgeon U. S. Army; G. S. Grimes, captain Second Artillery; Harry C. Cushing, captain Fourth Artillery; George Mitchell, captain Second Artillery; Sebree Smith, first lieutenant Second Artillery; A. F. Curtis, second lieutenant Second Artillery; John Cochran, assistant surgeon U. S. Army; John Mendenhall, colonel Second Artillery.

O

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. Doc. No. 445.

REPORT

UPON THE

SEWERAGE OF THE DISTRICT OF COLUMBIA.

RUDOLPH HERING,
SAMUEL M. GRAY,
FREDERIC P. STEARNS,
Board of Sanitary Engineers.

June, 1890.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1890.

MESSAGE

FROM THE

PRESIDENT OF THE UNITED STATES,

RELATING TO

System of Sewerage in the District of Columbia.

JULY 17, 1890.—Referred to the Committee on District of Columbia.

To the Senate and House of Representatives:

The act making appropriations to provide for the expenses of the Government of the District of Columbia for the fiscal year ending June 30, 1890, provides among other things that the President shall appoint three competent sanitary engineers to examine and report upon the system of sewerage existing in the District of Columbia, together with such suggestions and recommendations as may to them seem necessary and desirable for the modification and extension of the same, which report was to be transmitted to Congress by the President at its next session.

In pursuance of the authority thus conferred, on the 17th day of August, 1889, I appointed Rudolph Hering, of New York, Samuel M. Gray, of Rhode Island, and Frederic P. Stearns, of Massachusetts, to make this examination and report.

The gentlemen named were believed to have such ability and experience as sanitary engineers as to guaranty an intelligent and exhaustive study of the problems submitted to them.

I transmit herewith their report, which has just been submitted to me, for the consideration of Congress.

BENJ. HARRISON.

EXECUTIVE MANSION, *July* 17, 1890.

PLATES ACCOMPANYING THE REPORT.

PLATE I. Map of the city of Washington, showing present main sewerage and sewage outfalls; also territory flooded in June, 1889.

II. Profile from Potomac River to Eastern Branch via B street and Missouri avenue, showing flooding of low district in June, 1889.

III. Sketch showing movement of sewage discharged at Easby's Point at ordinary high tide when the flow of the Potomac River is 2,300 cubic feet per second.

IV. Sketch showing movement of sewage discharged at Easby's Point at ordinary high tide when the flow of the Potomac River is 6,900 cubic feet per second.

V. Sketch of comparative sewage dispersion at the outlets during one tide when the flow of the Potomac River is 2,300 cubic feet per second.

VI. Growth of several population centers in the United States with estimated probable future population of the District of Columbia.

VII. Maximum rain-falls in several American cities, as recorded by automatic rain-gauges.

VIII. Curve showing amount of rain-water assumed to reach sewers, for the conditions prevailing in Washington.

IX. Map of proposed main sewerage and drainage works for the improvement of the sanitary condition of the District of Columbia. Project No. I. All sewage pumped. Recommended.

X. Project No. III. Sewage partly pumped and partly discharged by gravity. Not recommended.

XI. Profile of main sewers. Project No. I.

XII. Sketch plan of proposed pumping station and other works at foot of New Jersey avenue.

SEWERAGE IN THE DISTRICT OF COLUMBIA.

The PRESIDENT.

SIR: Under the provision of an act of Congress, approved March 2, 1889, entitled "An act making appropriations to provide for the expenses of the government of the District of Columbia, for the fiscal year ending June 30, 1890," in which it is stated that—

The President of the United States is hereby authorized to appoint three competent sanitary engineers who shall examine and report upon the system of sewerage existing in the District of Columbia, together with such suggestions and recommendations as may to them seem necessary or desirable for the modification and extension of the same, and such report shall be transmitted to Congress by the President at its next session.

the undersigned were appointed to make the stated examination, and respectfully present the following report:

PART I.

INTRODUCTION.

On August 17, 1889, after receiving further instructions from the President, we organized as a board, made arrangements for such assistance as was necessary to collect data, make drawings and estimates, and have since devoted as much of our time as practicable to the consideration of the subject referred to us. In the pursuance of our work we have received the cordial assistance of Engineer Commissioners Maj. Charles W. Raymond and Lieut. Col. Henry M. Robert; their assistant in charge of sewers, etc., Capt. James L. Lusk; superintendent of sewers, Mr. David E. McComb; and other officers of the government, to all of whom we are indebted for much valuable information.

In order to acquaint ourselves with the features of the problem placed before us we personally examined all the territory involved, with reference to the actual condition of the essential parts of the existing sewerage works, and of the Potomac River and Eastern Branch, so far as these bodies of water have a bearing upon the subject. And, further, to comprehend the reasons which led to the adoption of the existing plans of sewerage, including the outfalls, and to consider the merits of the various suggestions that have been made from time to time for the purpose of overcoming objectionable features, we carefully examined the official reports and other papers which have been written upon the essential points of the question.

The populous part of the District of Columbia and the territory now most in need of better sewage disposal, is situated north of the Eastern Branch. From the foot of Capitol Hill westerly to the Potomac River and southerly to the Eastern Branch there is a long flat area only a few feet above high tide. During freshets large portions of it are flooded. In June, 1889, for instance, 254 acres of streets and private lands, and 154 acres of parks and public grounds were submerged, as indicated upon the accompanying map, Plate I, and the profile on Plate II. In 1830 a canal nearly 3 miles long was built through it, for commercial purposes, from the Potomac River, near the foot of Seventeenth street, to the Eastern Branch, at New Jersey avenue. The high ground in the southwesterly section of the city was therefore isolated and formerly called "The Island." The canal received the drainage from the main parts of the city.

To the north and east the ground is undulating, but generally rising, and reaches the elevation of 93 feet above tide at Capitol Hill and 127 feet above tide in the northwestern part of the city. The soil of this elevated territory is mostly compact gravel, clay, and loam, and is comparatively dry. The main water-course was the old Tiber Creek, draining a large territory and having its headwaters in the grounds of the Soldiers' Home. The lower portion of the creek has been converted

into a large sewer, which reaches the elevation of tide-water in a deep depression between Capitol Hill and Judiciary Square. In the northwestern part of the District the Rock Creek flows through a deep ravine, and forms the boundary between Washington and Georgetown. Tide-water extends up this creek nearly half a mile, after which the bed rises rapidly.

The general topography of the city and its suburbs, the elevations of the ground, and also the outlines of the present main drainage areas, are shown upon Plate I.

At Little Falls the Potomac River enters its tidal basin and below Easby's Point widens rapidly. A narrow navigable channel is preserved, but otherwise the river is a shallow stream with more or less surface exposed at low tide. The Eastern Branch of the Potomac, or the Anacostia River, is a shallow estuary with its tidal basin extending as far inland as Bladensburg, where it is fed by a small creek having a drainage area of 115 square miles. A navigable channel extends a short distance above the navy-yard. Below the junction of the Eastern Branch the Potomac River decreases in width, has a well-defined channel, and no extensive areas exposed at low water.

The Coast Survey charts show the tide of the Potomac River at Washington to ebb and flow as follows:

	Feet.
Rise of mean high water above the plane of reference	2.9
Rise of high water, spring-tide, above the plane of reference, average	3.2
Fall of low water, spring-tide, below plane of reference, average	0.2
Rise of high water, neap-tide, above plane of reference, average	2.8
Height of low water, neap-tide, above plane of reference, average	0.2

Mean duration of rise, 5 hours 40 minutes; mean duration of fall, 6 hours 46 minutes.

The plane of reference is mean low water; city datum is 2.1 feet above the same.

The official reports give the heights to which freshets have risen in front of the city as follows:

Year.	Aqueduct Bridge.	G street.	Easby's Wharf.	Long Bridge.	Arsenal.
	Feet.	*Feet.*	*Feet.*	*Feet.*	*Feet.*
1877*	16.5	13.0	.....	9.1	8.4
1881†	14.03	13.71	†13.39	†12.26	7.01
1889‡	19.50	17.00	13.30	12.70	11.10

*Report of S. T. Abert, United States civil engineer, 1882.
†Heights affected by ice gorge.
‡Reports of Col. P. C. Hains.

These elevations are above mean low water; to reduce them to city datum, deduct 2.1 feet.

Before the year 1860 the city of Washington contained but a few large buildings and no well-paved streets. It was virtually a village. Georgetown had several large sewers with flat bottoms and vertical sides, having been given the place of natural water courses. Several roughly built brick sewers crossed Pennsylvania avenue and emptied into the old canal, near the line of B street, but with so little fall that they were always more or less filled with foul deposits. A portion of the Tiber Creek had been arched. Otherwise there was practically no sewerage.

During and after the war the population increased rapidly, and when the board of public works was created in 1871 extensive municipal improvements were inaugurated. Among other works the construction

of a system of sewerage was begun. The city was divided into drainage districts, but no comprehensive plan was adopted. Sewers were planned and built only where the rapid increase of population, and consequently of its waste water, made underground removal necessary at the time. Apparently no consideration was given to ultimate requirements. Instead of carrying the sewage to proper points in the channel of the river at once, or arranging to do so later, it was left to discharge into the canal at such elevations as to preclude its being subsequently carried into the river by sewers having a free discharge at high tide.

After thus creating a most dangerous nuisance by the continual accumulation of fouling deposits in the canal near the central portion of the city, it was decided to fill the canal, and to build in place of it two large sewers. The Tiber Creek sewer was extended to G street, and an open channel, called the James Creek Canal, was built to carry the sewage the rest of the distance to the Eastern Branch. This channel was walled most of the way. The B street sewer was built from Seventh to Seventeenth street, and beyond Seventeenth street a ditch, called the B street outlet canal, was excavated through the Kidwell Flats to convey the sewage to the river. These two large sewers have flat bottoms, and the flow of sewage is retarded by the tide to a distance of over 2 miles from the Eastern Branch in the Tiber Creek sewer and nearly 1½ miles from the river in the B street sewer.

The principal nuisances formerly existing had thus to some extent been abated; but they were merely transferred to points further from the populated parts of the city. The growth of population and increase of sewage soon caused them to re-appear together with other troubles. Owing to the absence of slope, and therefore of scouring velocities in these sewers and open canals, deep deposits of festering matter accumulated, throwing off bubbles of offensive gases. The lower portion of the B street outlet canal, being submerged at high tide, allowed the sewage to spread out over large portions of the Kidwell Flats. At the same time the health reports showed a continual increase of disease, which was attributed directly to the effects of imperfect soil drainage, sewers of deposit and polluted marshes.

Before many years had elapsed still other defects of the system became apparent. One was the insufficient size of the sewers for storm water removal; another was the wearing out of the brick inverts; a third was the obstruction of pipe sewers by roots of trees, and a fourth was the foulness of the sewer air due to the insufficient ventilation.

In 1874, after the city had been provided with about 80 miles of sewers, mostly pipes, the board of public works was abolished and the government of the District was placed in charge of three Commissioners. A further change was made in 1878, when it was provided that one of the Commissioners should be appointed from the Corps of Engineers, United States Army, and that the engineering work of the District should be placed in his charge. From the reports of the Engineer Department since 1874, we gather most of the following facts and suggestions:

The early reports show that the Slash Run, the Tiber Creek and B street sewers had been proportioned too small for the amount of storm water reaching them; and further, that the insufficient fall of the Tiber Creek and the B street sewers, on account of the entrance of tidewater, is the cause of the accumulation of deposits, which in the former sewer had then reached from 2 to 3 feet in depth and several thousand feet in length. The objectionable features of the existing outfalls are likewise dwelt upon.

To relieve Tiber Creek sewer it was decided in 1878 to build an auxiliary sewer along the northern boundary to the Eastern Branch. In the same year it was recommended to relieve the existing B street sewer by a second one on B street and an intercepting sewer on New York avenue.

To further protect the cellars and basements in the low grounds against flooding, self-acting flood valves were recommended, but proved unsatisfactory.

The report of 1878 says regarding the treatment of the low districts:

> If at any time in the future it should be considered advisable to provide for (the drainage of the) cellars and basements below tide or below freshets * * * the system of sewerage of the low grounds can be isolated and provision made for pumping the water supply, the sewage, and a part of the seepage of this area.

Regarding the necessary capacity of the new sewers the report of 1878 (page 255) says:

> The rain-storms of the District of Columbia appear to be exceptionally violent, both in the rate of precipitation and their duration. Washington is and probably will be mainly paved with asphaltum and water-proof stone-block pavements with no power of absorption. It has a rapid drainage within the city limits to the low grounds, and the county streams are fed from steep hill-sides. It was a storm of 3 inches per hour which ruptured the Tiber sewer. Under these circumstances I have assumed that 2 inches per hour may have to be actually carried off, the sewer running full bore.

A table of the adopted sizes is given in the report for 1883.

No recommendations were made at this time to permanently relieve the tendency to accumulate deposits in the Tiber Creek or B street sewers, because it was thought that when these deposits were once removed the accumulation thereafter would be very slow if proper attention were given to the cleaning of the silt or catch basins at the street corners.

The ventilation of the sewers, concerning which complaint had arisen is fully treated in the same report, and the conclusion is reached that, the best system for the purification of sewer air is by an abundant supply of and admixture with atmospheric air, obtained by the free use of perforated man-hole covers and by extending the house drains above the roof.

To overcome the extensive obstruction of the pipe sewers, due to the entrance and rapid growth of roots, it was found that nothing would answer but complete replacement by new pipes having their joints protected by concrete, and this method has since been followed.

The wearing out of the inverts on heavy grades by the sand and gravel, not retained in the catch basins, was sought to be prevented in large sewers by surfacing the inverts with trap-rock blocks, set in cement, and in smaller sewers by replacing the inverts with semi-circular, glazed, vitrified pipes. The latter it was expected would reduce also the foulness of the sewers, by giving the dry-weather sewage a smooth surface upon which to flow.

In 1880, after discussing in a general way the question of the disposal of the sewage of Washington, it is stated that as long as precautions are taken to prevent the creation of a nuisance, so long may be postponed the costly conveyance of sewage to distant points; and a plan was proposed for the disposal which provided for outlets into the Potomac by the way of Rock Creek and the B street outlet canal, and into the Eastern Branch by the way of the James Creek Canal. In addition to these outlets which then existed, it was proposed to build a sewer to intercept the sewage of the easterly portion of Washington and discharge it into the Eastern Branch at the Anacostia Bridge, and to

build other sewers to intercept the sewage discharged into the Washington channel and divert it into the James Creek Canal. In connection with this plan an additional water supply was proposed to further dilute the sewage flowing in the sewers.

The unsatisfactory condition of the sewerage works called out a large number of propositions from citizens and engineers for remedying the defects. Most of the suggestions were embodied in reports made to Congress by those who were called upon to give or who volunteered opinions. Mr. Karwiese (Mis. Doc. No. 13, U. S. Senate, 1878), Mr. Severson (Mis. Doc. No. 25, U. S. Senate, 1878), and Col. G. E. Waring, jr. (Smithsonian Mis. Coll., No. 349, 1880), treated the subjects more fully than others, but the suggestions they made are of little value.

In the mean time the regular work of sewering the interior part of the city progressed, and in 1885 several important conclusions were reached and embodied in the annual report of that year.

Regarding the question of proper capacity of sewers, it was determined to modify the assumption previously adopted that even the largest sewers should be made large enough to receive the entire water from a 2-inch rain-fall. The modification caused a reduction in the sizes of the remaining part of the Boundary sewer then about to be constructed. For small areas the sizes were later determined from a curve similar to and partly coincident with the one given in Plate VIII.

The growing necessity for a better disposal of the sewage elicited, during the same year, the following suggestions regarding the treatment of the four open channels into which the sewage was then and is still discharged :

B street outlet canal.—It was proposed to place tidal gates at the mouth of the B street sewer and to erect pumping works in the vicinity to pump the dry-weather flow through pipes laid on piles across the flats to the river. During storms the tidal gates were to open and allow storm-water to escape into the canal.

James Creek Canal.—A similar solution was proposed for the relief of the James Creek Canal, because the conditions are similar, although the foulness of this canal was less offensive than that below the B street outlet. It was proposed to pump the sewage into the present sewer on Second street east, and deliver it into deep water of the Eastern Branch.

Inner harbor.—To prevent the pollution of the Washington channel, an intercepting sewer was proposed on Water street to discharge by gravity at Arsenal Point.

Rock Creek.—The foulness of Rock Creek below Boundary street was to be prevented by laying iron pipes on the banks of the creek in order to intercept the sewage and deliver it by gravity under pressure into the main channel of the river.

No definite steps, however, were taken to carry out any of these suggestions. In the report of 1887 we find the question of improvements alluded to as follows:

> The proper method of treating the main outlets and a number of lesser outlets involves a comprehensive study of the whole matter of the disposal of the sewage of the city. The elaboration of a plan of this kind is a work of considerable magnitude, but should be undertaken without delay.

An appropriation of $5,000 was subsequently obtained to have this matter considered, but owing to the unfavorable condition of the river for making float observations during the first year and the subsequent merging of the appropriation, the benefit of a complete investigation was lost.

The annual report for 1888 contained a further recommendation for improving Rock Creek. It was proposed to construct a pair of tunnels on the line of Twenty-fifth street across the point of land near P street, and to arch the creek from this tunnel to the south line of Pennsylvania avenue.

In the same year it was decided to build an intercepting sewer down the valley to receive the sewage of the improved territory draining to it, which would eventually free the creek from its present offensive pollution. A portion of this sewer is now being constructed.

The last annual report of the Engineer Commissioner contains a report of Captain Symons on the reclamation of the low district, generally flooded during high freshets in the river. It is recommended that the entire area be raised to a minimum height of 1 foot above the height attained by the freshet of June, 1889, increasing this height slightly where necessary to provide proper surface drainage for all the streets affected. The area in question was divided into two parts, the more important one extending westerly from South Capitol street in the direction of North B street to the monument grounds, and the other lying on both sides of the James Creek Canal.

The cost of raising the public streets, avenues, alleys, and reservations to the proposed elevation, and for repairing the roadways and sidewalks, is estimated as follows:

For the area west of South Capitol street	$1,649,201.50
For the area in the vicinity of the James Creek Canal	371,492.55
Total	2,020,694.05

This estimate includes the replacing of cobble pavement (67,150 square yards) with asphalt, laying asphalt block pavement in alleys, and other incidental work required for replacing the public property in the same condition as before, such as the necessary changes in sewer and water systems and gas-lamps, removing and replanting the trees, etc.; but it does not include the cost of raising private buildings, filling private lots, changing grade of railroads, or of making changes in the gas or electric light systems.

According to the last annual report the District now contains the following lengths of sewers.

	Linear feet.
Circular brick and concrete sewers	219,507
Egg-shaped sewers	73,138
Pipe sewers	1,016,103
Old corporation sewers (laid before June 1, 1871)	22,845
	1,331,593

Or 252.2 miles.

The present methods of designing and building the sewers we found to be good. Among the earlier constructions, however, we observed a number of instances where marked improvements will be required, if the sewerage system is to be brought up to the standard of modern sanitary engineering.

The above résumé of the various steps taken to improve the sanitary condition of the District of Columbia, together with the personal examinations of the territory, and of the existing works as far as they are instrumental in causing the present objectionable effects, formed the ground-work upon which we based our further investigations.

The act of Congress authorizing the appointment of this board made no reference to the fact that we should consider the protection of the

low portions of the city from floods due to freshets in the river. But soon after we began our investigations it became evident that the works required for sewage disposal had so many features in common with those required for flood prevention, that they would have to be considered jointly. We have therefore made a careful study of the ways by which the low portions of the city can be protected against floods.

Concisely stated, the problem which we find placed before us, therefore, is to recommend a comprehensive system of sewerage and drainage, which will effectually remove the sewage from the inhabited parts of the District, and dispose of it in an unobjectionable manner, both to those in and out of the District, and which will prevent the rain-water of heavy storms from causing inconvenience and damage by flooding, and further, a provision in connection with the foregoing requirements, for preventing freshets in the Potomac River from overflowing the low areas in the central part of the city.

PART II.

DISPOSAL AND PURIFICATION OF THE SEWAGE.

The first question to be answered in solving the stated problem, refers to the manner of finally disposing of the sewage; for, upon the answer to it depends the character and arrangement of most of the works within the city.

The fundamental requirement for a proper disposal in this case is, that the sewage shall be purified, either directly or indirectly, or rendered innocuous, and thus prevent the unhealthful and otherwise objectionable conditions resulting from the putrefaction of organic matter in the neighborhood of human habitations.

The purification of sewage is accomplished by an oxidation of its organic substances through the agency of microbes in the presence of a sufficient supply of oxygen. In practice it can be brought about by allowing the sewage to percolate intermittently through a porous soil or by highly diluting it with water. In both cases the necessary oxygen can be supplied from the air contained in the interstices of the soil or dissolved in the water. The bacterial work in converting the organic into inorganic matter is comparatively slow, particularly where sewage is turned into a body of water, as the quantity of oxygen required is large. Therefore a considerable amount of land or very large quantities of water are respectively required. The solid particles containing less than half of the organic matter can, however, be removed more rapidly either by subsidence, by mechanical straining, or by chemical precipitation, leaving the sewage in a condition to require much less land or water for a final purification. The available opportunities and conditions for purifying the sewage in each particular locality will therefore indicate the proper way by which it should be accomplished.

The once widely cherished idea that all sewage could be converted into a valuable manure, paying not only for its conversion but a handsome profit besides, has to-day lost nearly all its advocates. Occasionally there are conditions where sewage farming can be made a profitable business. In the District of Columbia, however, such conditions do not prevail.

We shall now indicate the necessary requirements for purifying the District sewage or rendering it innocuous according to the above-mentioned methods, and shall first refer to those which effect only a partial purification.

SUBSIDENCE.

If the sewage matter is allowed to come to rest a segregation of the solid matter takes place. The heavier particles deposit and the lighter particles float to the surface, materially freeing the intermediate sewage from solids, and therefore leaving it in a better condition for subse-

quent purification on land or in water. In order to obtain the full benefit of subsidence special tanks must be built of sufficient size to allow the sewage to rest for some time. It is clear that in the present case they would have to be so large that their first cost would be great and the removal of deposits would involve a large annual expense. Without a covering they would also be offensive. A partial subsidence to remove the gravel and sand which finds its way into sewers is frequently advisable as a preparation for any method of final disposal.

STRAINING THROUGH COARSE FILTERS.

Sewage can be readily freed from some of the solid matter by flowing through a coarse filter or strainer, which can hold back the coarser substances and permit them to be separately removed. As only a small space is required, and as the strainer can be made more or less simple to suit the special conditions, this method is often advisable, as in the case of land disposal it relieves the surface of the soil of bulky matter, and in the case of disposal into a water-course it reduces the amount of deposits and prevents floating matter from stranding and polluting the shores.

CHEMICAL PRECIPITATION.

When sewage must be freed from still a greater amount of organic matter than is accomplished in the above ways, certain chemicals can be added to it to effect a rapid deposition of the solid and some of the dissolved substances. It was once hoped that this method alone would produce a complete purification of the sewage; but this has not been found to be feasible even when the best methods are employed. The removal of the suspended matters is, however, a great advantage, as the sewage can then be further purified upon a smaller quantity of land or turned into a much smaller stream without causing offense.

The precipitating agents are mainly lime, salts of alumina, and salts of iron. They coagulate the organic matter and cause it to sink to the bottom as a flocculent precipitate. A larger number of combinations of these materials, both among themselves and with still others, have been used more or less successfully. As the constituents of sewage and the required degree of purification vary in different cities, it is evident that the best proportions and even the kind of chemicals best suited for each case will likewise vary. The materials must be thoroughly mixed with the sewage, which is then allowed to be in comparative rest in large tanks, until precipitation has taken place and the clarified water may flow off. The smaller the water-course into which the clarified or effluent water is discharged, the greater is usually the required purity; and should the water subsequently be used for domestic purposes a very high standard is required, which can not be obtained by this process alone.

The deposited matter or sludge, containing about 90 per cent. of water, may be discharged on land and dried or plowed under, or it may be pumped into barges and carried to sea, where it can do no harm, or more usually it is compressed into cakes containing about 50 per cent. of water, in which form it has some value as a manure and its removal to distant points is less costly.

It will be seen that the chemical treatment of sewage requires large tanks, machinery for mixing chemicals and for handling the sludge, besides the chemicals themselves, and a force of men to operate the works. The process is therefore an expensive one, its annual cost for

operation in England being from 20 to 40 cents per head, and in the United States has been variously estimated from 37 to 75 cents per head.

In Washington, works for treating the sewage chemically should be located south of the Eastern Branch, and the adoption of this method would not therefore result in any reduction in the cost of the system of sewers.

Inasmuch as there is no need of so costly a treatment of the sewage at the present time or in the near future, we have not given this method any further consideration.

FILTRATION THROUGH LAND.

A complete purification of sewage can be effected by applying it properly upon porous land. The first part of the process is the straining of the sewage and the retention of the larger particles at or near the surface, where they are exposed to and are largely broken up by the effects of the sunlight and air and do not accumulate. The more minute particles and the soluble impurities contained in the sewage descend into the ground, and unless they are carried through it by too great a quantity of water, in which case the purification is incomplete, are arrested and dampen or coat the particles of earth or sand. The second part of the process is a sufficient exposure of the sewage in these thin films to the action of microbes and oxygen contained in the interstices of the soil, by which impurities are rapidly changed into harmless compounds.

The conditions which facilitate the existence and action of bacterial life and an abundant supply of oxygen to the soil are therefore, likewise favorable to the purification of the sewage. A warm temperature is more favorable to bacterial action than a cold one. As sewage even in winter usually retains a temperature which rarely drops below 42°, it has been found in much colder places than Washington that neither the filtration through land nor the purification of the sewage is seriously interfered with.

The practical conditions for sewage purification on land therefore are:

First. The soil must be sufficiently porous to allow a given quantity of sewage to percolate through it slowly to a depth, which has been found to be between 4 and 6 feet below the surface, where either natural or artificial drainage should freely remove the purified water.

Second. The application of sewage must be uniform, so that the soil becomes evenly and moderately wet. It must likewise be intermittent, so that the soil is alternately exposed to a thorough penetration of air.

Third. As purification requires a certain amount of time, depending on the character of the sewage, on the soil and its degree of porosity, on the temperature of the air and on the condition of the soil with regard to the existence of nitrifying organisms, the quantity of sewage which can be disposed of by an acre of land can only be determined by a careful investigation of the local conditions. From 10,000 to 30,000 gallons per acre have been purified in this manner in different localities. At these rates the purification of the sewage of Washington, by filtration, would require in the begining from 1,200 to 3,600 acres.

Fourth. Where soil is not porous, broad irrigation will also allow sewage to be purified, at least in warm climates. A thin sheet of sewage is allowed to flow uniformly over a large surface of gently sloping grass-land, where the suspended matter is retained on the surface and

the dissolved matter oxidized by a thorough exposure to sun and air. A regular and level territory and a much larger area than for filtration is necessary for broad irrigation, which is therefore still more costly.

As the flow of sewage from a city is continuous there must be a sufficient quantity of land available at all times to receive it. For this reason sewage farming has almost always been unprofitable. After heavy rains, for instance, the ground is so wet that the addition of sewage becomes injurious to crops, and several weeks before they ripen sewage irrigation is likewise undesirable. Under the conditions which prevail at Washington we feel certain that a sewage farm would be financially unsuccessful.

Where properly managed, filtration grounds are not necessarily offensive. A large experience in Europe has shown that in habitations at their borders or in their midst, the death-rate is low and the general health good. Nor does the adjoining property depreciate much in value.

We examined some of the territory south of the Eastern Branch with reference to sewage purification by filtration and found that the soil was in some cases fairly porous, while in others it was clayey and nearly impervious. Even assuming that as much as 20,000 gallons of sewage per acre per day could be purified, then for a population of 500,000 we should require nearly 6 square miles. The total amount of level land south of the Eastern Branch within the District represents only a small fraction of this area and if filtration is to be adopted at Washington it will be necessary to go further to find the necessary quantity of land. This would require a greater outlay for sewers alone than would be required for discharging the sewage into the Potomac, if a suitable outlet is found within the District, to say nothing of the cost of so large an area of land and its preparation and the annual cost of operating. In view of this obviously great expense, we did not think it necessary to enter into the details of a practical scheme of land purification, but turned our attention to the alternate one of discharging the sewage into the Potomac River, which promised to be much cheaper, more simple, and to answer all requirements of sanitation without offering any objectionable features.

DISCHARGE OF THE SEWAGE INTO THE POTOMAC RIVER.

General considerations.—It is well in the beginning to consider in a general way what troubles may be caused by the discharge of sewage into a body of water.

(1) The whole body of water may be made offensive to the senses by the insufficient dilution of the sewage and its subsequent putrefaction.

(2) The particles of suspended matter in the sewage may be deposited where they will putrefy and give off bubbles of offensive gases.

(3) Sand, gravel, and other heavy substances carried along by the currents in the sewers may deposit near the outlet and obstruct the water-way, or may become offensive because of the putrescible matters precipitated by the heavier particles.

(4) The coarser substances floating in the sewage or upon its surface may strand on the shore.

With regard to the first of these troubles it has been found by experience that when sewage is mixed with a sufficiently large volume of water it is entirely inoffensive, and chemical changes at once begin which will in time purify the whole mass. This process of purification is not very rapid, but, being mainly a process of oxidation, no offense is caused thereby. When the sewage is not sufficiently diluted to

render it harmless it may at first have the appearance of dilute sewage and subsequently, by putrefying, become very offensive.

Regarding the second-mentioned trouble, it is known that many of the particles, kept in suspension by the current in the sewers, settle when the sewage is discharged into water which is still or moves with only a sluggish current. If these particles accumulate, and especially when covered by polluted water, they will putrefy and give off offensive gases. By exposure to the air at low tide the deposits become still more offensive. When, on the other hand, the sewage is discharged into stronger currents, the suspended particles may not deposit, or, if they do, they may be so widely scattered that they will purify by oxidation without producing any ill effects.

The third trouble mentioned can be prevented by the interception of sand, gravel, and heavy substances, and their removal from the sewers.

The fourth trouble is also readily obviated. Few coarse substances float in the sewage or upon its surface, particularly when it is carried a long distance and agitated by being pumped, which causes their comminution. They can be intercepted by screens and in other ways and prevented from floating into the river and stranding.

In order to determine from what population sewage can be discharged into the Potomac River without first being purified, it is necessary to determine the ordinary and low-water discharges of the river.

Flow of the Potomac River.—The Potomac River at a point just below the Eastern Branch has a drainage area of 12,555 square miles. Of this area 83 square miles drain into Rock Creek, and 169 square miles into the Eastern Branch. The area drained by the river is for the most part mountainous, and the water runs very quickly into the streams causing at times high freshets. As there are no lakes, ponds or reservoirs on the water-shed to equalize the flow, the volume discharged by the river is subject to great variations. The average annual rainfall on the water-shed is about 41 inches. If 55 per cent. of this quantity finds its way into the streams, a fair proportion to assume under the existing conditions, the average discharge of the Potomac at Washington would be at the rate of 20,600 cubic feet per second.

The records of measurements of the low-water discharge of the Potomac are few. In September, 1839, a measurement was made at Little Falls by M. C. Ewing for the Great Falls Manufacturing Company, and the volume flowing was found to be 1,904 cubic feet per second.*

In August 1855, W. R. Hutton, C. E. measured the discharge of the river at Great Falls and found it to be 1,063 cubic feet per second.† This measurement was referred to in certain court cases several years afterwards and was admitted to be the minimum low-water flow.‡

A gauging was made under the direction of the engineer of the Aqueduct at Great Falls during the low stage of 1863, and the volume was found to be 2,183 cubic feet per second.§

In the report of S. T. Abert, United States civil engineer,‖ upon the improvement of the harbors of Washington and Georgetown, it is stated that "from Little Falls to a point near the Potomac Boat Club house in Georgetown there are down-stream currents and a fluvial discharge

§ Report of Board on the improvement of the Harbors of Washington and Georgetown, 1872. Senate Mis. Document, No. 15, Forty-second Congress, Third Session.

‖ Report of S. T. Abert, U. S. civil engineer, printed in the Annual Report of the Chief of Engineers for 1882, p. 983.

during the entire period of flood tide, so that the only effect of flood tidal current above Georgetown is to raise the surface of the water without causing any flood discharge." From this information it is feasible to estimate approximately the flow of the river, because the quantity of water discharged during the flood-tide would be equal to the volume of the prism between low and high water above the Potomac Boat Club house in Georgetown. The volume of this prism is 43,900,000 cubic feet. The duration of flood-tide averages five hours and forty minutes, equal to 20,400 seconds; hence the volume discharged equals 2,150 cubic feet per second.

As there has been no low stage of the river since our appointment, we have not been able to make any measurements of its low-water flow.

Summing up the obtainable information, we conclude that the minimum flow of the river at Washington is about 1,100 cubic feet per second; and that the low-water flow of an ordinary dry year is about 2,300 cubic feet per second.* We are also of the opinion that if the latter volume can dilute the sewage to such an extent as to prevent the water from becoming in any way offensive, or detrimental to the public health, then no serious harm will result from less dilution on the rare occasions when the river reaches a lower stage. We hold this opinion not only on account of the infrequency of extremely low stages of the river, but also because we believe that the evils of insufficient dilution are not so objectionable when this condition is of short duration.

While the ordinary low-water stages of the river are the most important when considering the disposal of sewage, it is also of value to know the distribution of flow throughout the year. No actual measurements at different seasons of the year are recorded; and in order to determine the distribution of flow, it is therefore necessary to depend upon the records of other streams, in connection with the measurements of the Potomac at low-water stages, the annual rainfall, and the physical character of the Potomac drainage area, mainly with regard to its topography. The results obtained from these data are presented in the following table, which gives the estimated flow by months in an ordinary year, beginning with the dryest month and ending with the wettest.

Estimated monthly flow of the Potomac River at Washington.

No. of month.	Average flow per second per square mile.	Average flow of river per second.
	Cubic feet.	*Cubic feet.*
Driest 1	0.186	2,300
2	0.326	4,038
3	0.491	6,082
4	0.685	8,484
5	0.913	11,308
6	1.181	14,628
7	1.496	18,529
8	1.866	23,112
9	2.303	28,525
10	2.825	34,990
11	3.452	42,756
Wettest 12	4.212	52,170
Average	1.661	20,600

* This volume is the same as that given for the low season flow of the Potomac River in ordinary dry years by Prof. G. F. Swain in Volume XVI of the Tenth Census, p. 561.

No claim is made that this table represents accurately the distribution of flow throughout the year. It is, however, thought to agree nearly enough with the facts for the purposes for which it is to be used.

The amount of dilution required to make sewage inoffensive is not well defined. There are many cases which show that an intolerable nuisance may be produced by insufficient dilution, and many other cases which show that with a very large dilution no harm results. There are, however, few if any cases where observations have been made of the relative volumes of sewage and stream flow when the maximum allowable amount of sewage was being discharged.

From such data as have been available from time to time, various authorities have concluded that a flow of water varying from 1.5 to 3.3 cubic feet per second will sufficiently dilute the sewage of 1,000 people to prevent offensiveness. This is equivalent to from 969 to 2,133 gallons per day per person. Using these figures, the population which would be provided for by the ordinary low-water flow of the Potomac is from 690,000 to 1,567,000 persons.

The drainage and water supply commission of the city of Chicago recommended* that the sewage of Chicago be diluted with a volume of water equal to 4 cubic feet per second per 1,000 inhabitants (2,585 gallons per day per person), and discharged through a canal into the Desplaines River. Upon the basis here given the ordinary low-water flow of the Potomac would take care of the sewage of a population of 575,000. It should be borne in mind, however, that the sewage of Washington would not require to be diluted as much as that of Chicago, since at the latter place there is a large quantity of foul matter from stock-yards and slaughter-houses, in addition to the domestic sewage.

There are two ways in which the effect of discharging sewage into a stream may be determined. One method, already alluded to, depends upon deductions drawn from actual experience regarding the discharge of sewage into rivers; the other seeks to determine the chemical character of water which has received the sewage of a given population. In the latter method we have as a basis the constituents of sewage as determined by analysis. In the ordinary analysis of sewage many constituents are determined; but the one which furnishes the best indication of the amount of decomposition which has taken place is the ammonia. The amount of ammonia contained in a gallon of sewage varies greatly, chiefly on account of the great variation in the quantity of water used per capita in different places. The ratio of ammonia to population is much more constant and is about 15 pounds daily per 1,000 inhabitants. With these figures as a basis, it is only a matter of calculation to determine the amount of ammonia which will be added to a given quantity of water by adding to it the sewage of a given population. For example, take the case of Washington with a future population of 500,000, discharging its sewage into the Potomac, at its ordinary low-water stage of 2,300 cubic feet per second. The total amount of ammonia in the sewage would be 7,500 pounds per day. A flow of 2,300 cubic feet of water per second equals 12,400 million pounds per day. Hence, if the sewage is uniformly mixed with the water, 0.605 pounds of ammonia will be added to each million pounds of water. The water of the Potomac River in its normal state contains very little ammonia, so that the amount added may be considered the total amount in the mixture of river water and sewage. Water containing this amount of

---

* Preliminary report of the drainage and water supply commission of the city of Chicago, 1887.

ammonia derived from sewage would be unfit for drinking, but it would not be offensive.

By reference to analyses of samples of water from the Eastern Branch near Buzzard's Point, given in Appendix D, it will be seen that one sample contained 0.660 parts per million of free ammonia, showing it to be as much polluted now as the water of the main river would be in its ordinary low stage when receiving the sewage of a population of 500,000. The sample from the Eastern Branch was collected during the latter part of the ebb-tide in order to represent the general character of the water in this estuary, and not to be directly affected by the discharge of any sewers. The water of the Eastern Branch distant from sewer-mouths has not caused complaint.

After considering all available information on the subject of river pollution, including some very recent investigations of rivers in Massachusetts made by the State board of health, we have concluded that the Potomac River will dispose of the sewage of a population of at least 800,000, provided the sewage is mixed uniformly with the whole volume of water discharged by the river. In order to meet sanitary requirements it is desirable, and under many circumstances necessary, that the water into which sewage has been discharged should not flow over flats which are exposed at low tide, or stand in places sheltered from currents where it can deposit its suspended particles.

Location of possible outlets.—The Eastern Branch is a large body of water, and the current in the lower portion of it is strong, so that it might seem at first sight to be well adapted to receive sewage. It is not so, however, because there is not enough upland water entering it to cause any well defined progressive movement of the water in this estuary towards the main river. If sewage is discharged into the upper portion, say above the navy-yard, the water, while oscillating back and forth with the tide, would receive the sewage in repeated doses and might remain in the estuary a very long time before it would reach the main river. If sewage is discharged near the mouth of the Branch the conditions are somewhat more favorable, as a portion of what is discharged on the ebb-tide may reach the main river and be carried down to a point from which it will not return; whatever is discharged on the flood-tide, however, may remain in the estuary many days or even weeks.

In addition to such unfavorable conditions, the depth of water over the extensive flats in the Eastern Branch is slight and constantly decreasing, so that already very large areas near the upper end and some small areas below are exposed at low tide. In view of all these unfavorable conditions it is desirable not only to avoid discharging sewage into the Eastern Branch, but also to avoid discharging any large quantity of sewage into the main river so near the Branch that it will be carried up the latter by the flood-tide.

An examination of the main river showed three locations for outlets having sufficient merit to be worthy of careful consideration; the sewage in all cases to be discharged into deep water at the main channel. These locations are as follows:

(1) Easby's Point.

(2) Above the Eastern Branch opposite Gravelly Point.

(3) Below the Eastern Branch at the first projecting point of land above the Naval Magazine.

The movement of sewage after it is discharged at either of these outlets may be determined in two ways.

In one of them the result is obtained by calculation, using as factors

the volume of upland water discharged by the river, the contents of the tidal prisms above various lines drawn across the river, and the contents of the river below low-water level between the lines crossing the river. This will be called for convenience the *piston method.* In the other way, the movement of the water is ascertained by observing the course of floats. By the *piston method* it is feasible to determine, through calculation from existing data, the approximate movements of the currents in the river for any assumed volume of upland water discharged. By the *float method* the results obtained represent only the movements of currents due to the flow of the river at the time of the observations.

Since our appointment the volume of water discharged by the river has at no time been very small, and we have not therefore been able to determine the currents by the *float method* at a low stage of the river, when the results would be far more valuable than at any other time. This is to be regretted. It is doubtful, however, if satisfactory results could have been obtained with floats unless the low stage of the river had lasted for an unusually long time, because it is very difficult to make satisfactory float observations in the Potomac River near Washington. Within the channel floats can be used of such length that their course would not be effected to any great extent by the wind, but it was found after some trials that they were liable to be carried out of the channel by lateral currents or the slight influence of wind, and to ground upon the flats. Floats short enough to pass over the flats would be moved by the wind so much in comparison with the sluggish movement of the water that the value of the observation would be greatly diminished.

The accompanying sketch (Plate III) shows, as calculated by the *piston method*, the movement of sewage discharged at Easby's Point at high tide, when the flow of the river is 2,300 cubic feet per second, which was assumed as the low-water flow of an ordinary dry year. It should be stated that it is assumed in this method that the particles of water move with an equal velocity in all parts of a cross-section of the stream, while in fact the water moves at a considerably greater velocity in the channel than upon the flats. This error does not prevent the results from being of value as a basis for determining the relative merits of different locations for sewage outlet.

To illustrate more clearly the process of determining the movement of sewage by the *piston method*, an example is given by taking the case of a discharge at Easby's Point (Line 1 on the sketch) at high tide. The tidal prism above Line 1 was obtained by measuring the area at high and low water of the tidal portion of the river above this line and multiplying the average area by the ordinary rise of the tide. The contents of this prism were thus found to be 58,000,000 cubic feet. The average duration of the ebb-tide is six hours and forty-six minutes; and in this time the discharge of the river at the rate of 2,300 cubic feet per second is 56,000,000 cubic feet. The sum of these two quantities, equal to 114,000,000 cubic feet, would pass Line 1 during the ebb-tide and would displace an equal volume in the river below this line. If the water pushed ahead without mingling with that below, the portion which first passed the line would move down stream during the ebb-tide to another line, at such a distance from the first that the *low-water* contents of the river between the two lines would equal the total volume passing Line 1. The low-water contents of the river from Line 1 to a point 12 per cent. of the distance from Line 3 to Line 4 are equal to this volume.

On the flood-tide the upward movement at any given point is caused

by the excess of volume contained in the tidal prism above that point over the natural flow of the river during the same time; and the extent of this upward movement is measured by the length of a stretch of the river, which at *high water* contains a volume equal to the excess above mentioned.

The movement of the sewage during successive tides, as indicated upon the sketch, was determined by the method above described with a few modifications to meet the following special conditions:

The proposed tidal reservoir opposite the Washington Monument, connecting the main river with the head of the Washington Channel, is to receive water from the main river during the flood-tide and to discharge it into the Washington Channel during the ebb-tide. This increases the flood-tidal movement between the inlet to the reservoir and the Eastern Branch.

Opposite the Eastern Branch the movement of sewage can not be satisfactorily determined by the *piston method*, as it is difficult to compute just how and where the tidal volume flowing from the Eastern Branch will affect this movement.

At several points along the river there are bays in which the currents are very sluggish, and in making the calculations their low-water contents within the dotted lines shown on the sketch have been excluded.

It is noticeable upon this sketch that the oscillations due to tidal movement are very much greater below the Eastern Branch than above it, while the progressive movement down-stream from tide to tide is less. No attempt has been made to indicate the movement of the sewage into the tidal reservoir and through the Washington Channel, or into the Eastern Branch, though it is obvious that some of the sewage discharged at Easby's Point would flow into each of these bodies of water.

Another sketch (Plate IV) is presented to show the movement of the sewage when the river is discharging 6,900 cubic feet of water per second. This volume is three times as large as that which we have assumed as the low-water flow of an ordinary dry year. It is, however, a common rate of flow in summer when the river is slightly raised above its lowest stage by rain, and in wet years it may represent the flow during the driest month.

The volume of water discharged by the river produces a downward current in the upper tidal reaches of the river at all stages of the tide. During the flood-tide this current grows less and less in going down stream, owing to the greater volume required to fill the tidal prism, until a place is reached where the up and down stream currents meet and there is no velocity. During the low-water flow of the river in an ordinary dry year this place is near Easby's Point, and during the ordinary summer and autumn stages of the river it is somewhere between Easby's Point and the Eastern Branch.

The Eastern Branch receives so little upland water that practically all that is needed to fill its tidal prism on the flood-tide, must be supplied from the main river. When the section of the main river, where there is no velocity at flood-tide, is above the mouth of the Branch, this water is brought by the flood-tide from the river below. When the section is below the mouth, the water coming down the river turns into and runs up the Branch, and when the section is directly opposite, water will flow into the Branch from both below and above its mouth.

A third sketch (Plate V) is given to show the extreme range of the sewage discharged at each of the three outlets selected for investigation during a single tide at the low stage of an ordinary dry year, when the

river is discharging 2,300 cubic feet of water per second. It is intended to indicate by this sketch, as nearly as practicable, the extreme distance to which the water receiving the sewage would flow in the channels; this distance we have assumed to be 20 per cent. greater than the average tidal range as determined by the *piston method.*

Having thus presented in a general way the movements of the currents in the river, the three locations for outlets will be considered in detail.

Outlet at Easby's Point.—This outlet has the advantages that sewage will flow to it by gravity from a large portion of the northerly section of the District; that the main channel of the river is near the shore so that it can be reached without much expense; that the sewage will not be carried up-stream far enough to do any harm, and that there are no dwellings near the shore below it. It has the disadvantages of being above the land reclaimed by filling the flats (which it is expected to utilize as a park in the future) above the inlet to the tidal reservoir and the flats on the Virginia side of the river, and also above the Eastern Branch. These disadvantages are aggravated by the fact that at the low stages of the river there is scarcely any current in either direction past Easby's Point during the flood-tide, so that large quantities of sewage discharged at such times would be insufficiently diluted.

Outlet into main channel opposite Gravelly Point.—This outlet was considered as one to which it might be feasible to take the sewage from the entire city. It is the most favorable outlet for sewage above the Eastern Branch, because it is so far below the tidal reservoir that little, if any, sewage would enter, and it is also a considerable distance above the Eastern Branch. Much of the sewage could be brought to this outlet by gravity, and we investigated the same with such an object in view. Like the Easby's Point outlet, it is open to the objection of allowing an incomplete dilution of the sewage at certain stages of the river during flood-tide, though to a much less extent. Some of the sewage discharged at this outlet would enter the Eastern Branch at any stage of the river. At low stages it would flow down the river to a point below the Branch, and then be carried back into it by the flood-tide. At higher stages, when the river is discharging 12,500 or more cubic feet of water per second, a part of the sewage discharged at this place would be carried during the flood-tide directly around the southerly point of the reclaimed land into the Eastern Branch. This condition would exist during about one-half of the year, but it is the half when the dilution of the sewage would be large. That this movement around the point into the Eastern Branch, as deduced by theory, actually takes place has been shown by the observation of floats. When the discharge of the river is such that the section of water having no velocity during flood-tide is near this outlet, it is probable that the meeting of the up and down-stream currents in the channel would produce lateral currents toward the shores, and mainly toward the Virginia side of the river.

Outlet at a point above the Naval Magazine.—The main disadvantage of this outlet is its distance from the city which requires all the sewage to be pumped to it, and necessitates crossing the Eastern Branch. It has the advantage, however, that the dilution of the sewage will be comparatively rapid and thorough at all stages of the river and tide, causing it from a sanitary point of view to be the best place that can be selected for a sewage outlet.

The sketch showing the tidal range (Plate V) indicates that at a very low stage of the river the sewage discharged here at the beginning of flood-tide may just enter the Eastern Branch; but as this represents only the sewage of about two or three hours per day during a very small part of the year, it may be said that practically none of the water into

which sewage has been discharged would ever reach the city of Washington, or go far enough up the Eastern Branch to pollute its waters or to cause deposits upon the flats.

The total volume of water flowing past this outlet in both directions during the flood and ebb tide at the low stage of the river is about ten times as great as at Easby's Point and three times as great as opposite Gravelly Point; moreover, the water flows past this outlet with nearly equal velocity at flood and ebb tide, and the only slack-water period is a short one at the turn of the tide, whereas, at the other outlets, during low stages of the river, slack-water exists, at times, during nearly the whole period of flood-tide. The conditions at this outlet, therefore, are very much better for mingling the sewage with the water, for keeping the sewage particles suspended until carried out to sea, or for dispersing them so much that those which deposit will be harmless.

The upland water of the river, in its progressive downward course, oscillates back and forth with the tides many times before finally passing this outlet (see Plate III), and each time it receives some sewage. As the volume of sewage has a fixed relation to the volume of upland water discharged by the river, regardless of the number of times it oscillates past the outlet and receives sewage, it follows that the greater the number of oscillations the less the amount of sewage received each time, and the more evenly is the sewage distributed through the whole volume of water.

This outlet and others between it and the Eastern Branch have been considered with reference to the discharge of the sewage during only the first few hours of the ebb-tide, which could be accomplished by storing the sewage in a reservoir at other times; but we are of the opinion that the use of a storage reservoir in this case presents no advantages from either an economical or sanitary point of view.

In summarizing our views regarding the discharge of unpurified sewage into the Potomac River, we conclude that there is enough water flowing in the river at all times to dispose of the sewage of at least 800,000 inhabitants without causing offense, provided it is mingled uniformly with the whole volume of river-water and is not carried to a place where the suspended particles therein contained can deposit and cause offense.

In view of this conclusion, there is no doubt in our minds that the best method of disposing of the sewage of the District of Columbia at present, and for a long time to come, is to discharge it directly into the channel of the Potomac River at one or more suitable outlets.

An outlet discharging into the channel opposite the point of land above the Naval Magazine not only removes the sewage so far from the city that it can not return on the flood-tide, but it also complies so well with the provisions above stated that we are of the opinion that the sewage of at least 800,000 inhabitants can be discharged at this place.

An outlet opposite Gravelly Point in the main channel of the river is next in order of merit, and we do not anticipate that discharging all the sewage of Washington at this outlet for the next fifteen or twenty years will produce any objectionable effects.

An outlet discharging at Easby's Point would be the least satisfactory. The discharge of as much sewage as could be brought to this outlet by gravity may not have any noticeable effects for many years, yet we hesitate to recommend the discharge of much sewage here, if an outlet can be provided farther down the river at a reasonable additional expense.

Very little sewage should be allowed to discharge into the Eastern Branch.

PART III.

PROTECTION OF LOW PORTIONS OF THE CITY FROM RIVER FLOODS.

We have already referred to the fact (in Part I) that a large tract of low land in the central portion of the city is subject to inundation by freshets in the Potomac River, and have presented a profile (Plate II) through the low district to show the depth of flooding on June 2, 1889, which is the date of the greatest freshet of which there is a trustworthy record.

There are two methods by which this flooding may be prevented: One is to raise the low portion of the city above the elevation reached by the highest freshets, and to provide sewers of sufficient capacity to discharge the storm-water at the highest stages of the river; the other is to prevent the entrance of the river-water by dikes and provide for pumping the storm-water from the diked area. Either of these methods, if carried out in a thorough manner, can be depended upon to prevent flooding, and the choice between them will depend chiefly upon the relative cost and the annoyance which will attend the execution of the works.

We have not made any careful estimate of the cost of raising the flooded district because we obtained sufficient information from the report of Capt. Thomas W. Symons upon this subject.* The estimate given by him provides for raising all the streets and reservations to an elevation of at least 1 foot above high water of the freshet of June 2, 1889, and slightly higher in some parts to give longitudinal surface drainage. It includes the cost of repaving the streets, of raising and putting in good order all structures belonging to the District, and amounts to $2,020,694. It does not include the cost of raising buildings and land not belonging to the District, of raising tracks and other structures in the streets, owned by corporations, nor the cost of additional large sewers to carry off the storm water, though these items would probably swell the total cost to $5,000,000. Even with this large expenditure the results would be unsatisfactory, as it is not improbable that another freshet may go a foot or two higher than the last one and again flood the streets over the whole territory. A freshet like that of last June would still flood all basements and cellars. If this district is to be raised the filling should certainly be carried to a greater height than that proposed, and the cost would be correspondingly increased.

In designing works for the reclamation of the flooded area, it is necessary to consider not only the freshets but other evils in this district which require to be remedied, namely:

(1) The flooding of streets and cellars by heavy storms at ordinary

* Report of the operations of the engineer department of the District of Columbia for the fiscal year 1888–'89, p. 42.

stages of the river, due to the insufficient size of the nearly level sewers in the low district, and to the reduction of their discharging capacity by deposits which rapidly accumulate in them. The tendency to flooding increases from year to year as more streets are paved and new sewers are built in the territory draining into this district.

(2) The unsanitary conditions of the present sewers due to their containing great masses of foul deposits, on account of the absence of a proper fall.

(3) The proximity of the ground water to the surface of the ground.

In designing a project for the protection of this district by diking and pumping, all of these points were given careful consideration and the following plan was finally adopted:

A dike is to be built on the line of Virginia avenue across the low land to the Monument grounds. It should be at least 50 feet wide at an elevation of 6 feet above the freshet height of June 2, 1889, with side slopes of three horizontal to one vertical. The portion of this dike outside of the streets need not be of uniform section, but should rather be so formed as to harmonize with the surroundings; the large amount of waste earth from the sewer trenches will permit this to be done with little expense.

Another dike is to cross the valley of the James Creek Canal at N street. It should take in the whole width of the street with its top 6 feet above freshet height in the Eastern Branch.

The sewers for draining the low district situated between these two dikes will be fully described in Part IV and Appendix A. In order that we may here present the proposed improvement for the exclusion of floods in a more complete form it is necessary to forestall the conclusions arrived at in Part IV and to briefly indicate the proposed sewers at this place.

High level sewers are to be built to intercept the storm-water from as much of the high lands as possible and thus diminish the amount to be taken care of in the low district. Without these sewers it would be very difficult and costly, if not impossible, to properly protect the low districts against flooding during very heavy storms.

A trunk sewer is to begin at the corner of Virginia avenue and B street (north) and run easterly through the middle of the low district to the corner of Canal and South Capitol streets, thence across Garfield Park and along New Jersey avenue to the Eastern Branch, where the pumping station is to be located. This sewer, which will be 15 feet in diameter at the lower end, with its top nearly at the level of high water, will convey the storm-water from the whole of the low district to the pumping station during freshets. It has, however, been made somewhat larger than would be necessary for this purpose, in order to enable it at ordinary stages of the river to discharge the storm-water of the heaviest rain-falls from the greater portion of this district by gravity. The smaller portion, which is provided with another outlet at ordinary stages of the river, comprises the parks bordering on B street. The present B street sewer can be used to take the storm-water from these parks, and should be extended about 1,000 feet to discharge into the small basin which communicates with the tidal reservoir west of the Monument. There can be no objection to this outlet from a sanitary point of view, as the water discharged will not be foul, and in fact it is only during heavy rains that any discharge will take place. The trunk sewer through the low district, although planned primarily for the disposal of storm-water, is designed to carry also the sewage of the northwesterly section of the city to the pumping station.

The total area draining into the diked district after the high level intercepting sewers are built will be 925 acres, of which 270 are in parks.

The pumping station will contain pumps for raising the sewage into an outfall sewer which will carry it to a suitable outlet, and other pumps for raising the storm-water into the Eastern Branch. The combined capacity of these pumps will be sufficient to meet all demands caused by the heaviest storms occurring when the river is above its ordinary stage.

The operation of this portion of the sewerage system will be somewhat unusual. In dry weather only the sewage will be flowing through the trunk sewer, and the sewage pumps can keep this at a low level. If a light rain falls additional sewage pumps should be started, and both rain-water and sewage pumped as rapidly as they come. With heavier rains, from which the flow exceeds the capacity of the sewage pumps, the level of the water in the trunk sewer will begin to rise, and an automatic regulating gate to be placed at Virginia avenue will then close across the sewer, forcing the diluted sewage from the northwesterly section of the city to discharge into the Potomac at Easby's Point. The trunk sewer, together with the Tiber and B street sewers, will have a storage capacity below the level of high tide equal to two-thirds of an inch of water spread over the entire low district. It is therefore evident that any discharge from this sewer into the Eastern Branch will take place but rarely. While the sewer is filling up, and generally during storms, its current will be sluggish, and any sand, gravel, or other heavy substances carried into the sewer will deposit on the bottom; but in a few hours after the storm ceases the water will be pumped down and the concentrated stream of sewage will remove the temporary accumulation of deposits. This large stream should maintain a degree of cleanliness in the sewer which it would be difficult to attain without it, even with a large outlay to increase the slope of the bottom.

The effect of the proposed sewers upon the ground water in the low district will be as follows: Ordinarily the water level in the trunk sewer will be far below low tide, enabling all sewers in the vicinity to discharge freely. During moderately heavy storms, when the trunk sewer is discharging by gravity into the Eastern Branch, the water in the sewer will not often rise more than a foot above the water in the branch. With extremely heavy rain-falls, such as occur only at intervals of years, the water in the upper portion of the trunk sewer may rise 3 feet above the water in the branch, and this possibility should be considered in building cellars. During freshets the water will not rise any higher than at other times. These results, as far as they affect the height of the ground water, are more favorable than would be obtained by raising the low district to the height proposed.

Tide-gates will be placed at the outlets of all sewers connected with the pumping system. They are to be restricted in size by subdividing the large sewers near their outlets, and should be in duplicate. The bottoms of the gates should be carried not more than 3 feet below low tide, and grooves provided outside, in which stop-planks or a wooden gate may be lowered to keep the tide-water out, and make the gates accessible for repairs. Nearly all of these gates are very near the pumping station and can be conveniently inspected to insure their efficiency. Tide-gates have been extensively used in Europe, and on the Main Drainage Works of Boston for six years, where they have always operated in a satisfactory manner.

As these works are used jointly for protecting the low district from floods and for sewage disposal, it is difficult to tell how much of their cost should be assigned to each. Their total cost is $2,395,000, and this is also about the sum which flood protection and the proper drainage of the low district would cost if sewage disposal is not considered. On the other hand, the value of these works for sewage disposal alone would be about $895,000. The amount properly chargeable to flood protection would therefore be about $1,500,000. This is very much less than the cost of raising the low district to the proper height, which would probably be $5,000,000 or more.

The cost of maintaining the storm-water pumping plant by the plan herein proposed would be small, as it would be used but a few days in the year; and the regular force operating the sewage-pumps could operate both plants on such occasions. The whole amount of rain-water falling upon the low district in a year could be pumped to the necessary height with 80 tons of coal; and, as the amount of water which enters the sewer is less than the total rain-fall, it is obvious that the cost of fuel for pumping the storm-water will be but a small item in the annual cost of the sewerage system.

The area which it is proposed to protect by dikes includes nearly all of the flooded territory now occupied by dwellings or stores and also much unoccupied land, but there are some comparatively small areas outside of the dikes which it is thought can best be protected from floods by raising the streets and lots, and by fixing a grade below which cellars shall not be permitted.

PART IV.

COLLECTION AND DELIVERY OF THE SEWAGE AT THE OUTFALL AND REMOVAL OF THE STORM WATER.

From the conclusion reached at the end of Part II we may place sewage outlets with certain limitations at Easby's Point and opposite Gravelly Point, or we may place one a short distance above the Naval Magazine. In Part III, indicating the best manner of protecting the low districts from the river floods, we found that for economical reasons the territory should be diked instead of filled in, and that provision should be made for removing the storm water and sewage, not only at ordinary times but also during freshets.

It now becomes necessary to indicate a system of sewerage for the District of Columbia which will most effectually and economically answer the following requirements:

First. Collect the sewage from the entire populated area and deliver it at either or several of the above-mentioned outlets.

Second. Provide for the discharge of storm water from the entire city at all times.

Third. Prevent the inundation of the low districts by freshets in the river.

Before we could ascertain the projects best accomplishing these ends, we were obliged to examine into numerous elements which more or less govern the design and to which we shall first refer in sufficient detail to warrant the conclusions finally reached.

FUTURE POPULATION OF THE DISTRICT OF COLUMBIA.

The development or growth of the District of Columbia is almost entirely due to the requirements for transacting Government business. It is therefore more directly dependent upon the increase of the population of the country than is the growth of other cities. On account of its location the District is not likely to have commercial importance, either as a trade or a manufacturing center; but, like most of the capitals in European countries, will rather tend to develop as a center for science and art. This circumstance, together with the mild winter climate, as compared with the large cities of the North, will offer the second principal inducement for its future growth.

In order to ascertain the probable population for which to provide sewerage, a comparison was made of the development of other large cities in the United States, as shown in the diagram on Plate VI. It is preferred for such a purpose to show their virtual population, including all adjacent towns and suburbs having a common interest, and therefore practically forming a part of the city, rather than to limit the population to the artificial boundaries prescribed by law. It will be

seen from the diagram that New York and Chicago show a quite similar and at the same time the most rapid growth, which is unquestionably due to their commercial eminence. Philadelphia, Boston, Baltimore, Cincinnati, and St. Louis are more conservative in the increase of their population. The District of Columbia and the United States represent the third group, which we will consider more in detail.

The following table shows their population since 1800:*

Date.	Washington.	Georgetown.	Suburban.	*Total for the District.	United States.	Ratio.
1800	3,210	2,993	1,941	8,144	5,308,483	.0015
1810	8,208	4,948	2,315	15,471	7,239,881	.0021
1820	13,247	7,360	2,726	23,333	9,633,822	.0024
1830	18,827	8,441	2,993	30,261	12,866,020	.0024
1840	23,364	7,312	3,069	33,745	17,069,453	.0020
1850	40,001	8,366	3.320	51,687	23,191,876	.0022
1860	61,122	8,733	5,225	75,080	31,443,321	.0024
1870	109,199	11,384	11,117	131,700	38,558,371	.0034
1878	131,947	11,571	16,533	160,051	.....	.....
1880	147,293	12,578	17,753	177,624	50,155,783	.0035
1885	173,606	14,322	15,531	203,459	.....	.....
1888	179,448	14,345	24,364	218,157	.....	.....
1890	.....	.....	.....	†229,796	.....	.....

*Alexandria city and county excluded. †Preliminary return Eleventh Census.

"The abnormal increase in 1830 in Georgetown was due to concentration there of laborers at work on the Chesapeake and Ohio Canal. * * * The item of 15,531 for suburban census of 1885 agrees with the official returns. The reported rate of increase in the city of Washington for that year is abnormally large to about the same extent that the suburban census is deficient, and is probably an error due to the consolidation of the returns from some suburban villages with the returns for that city."

The last column contains the ratio of the population of the District of Columbia to that of the entire country. It will be seen that between the years 1810 and 1860 this ratio is almost constant, indicating that its growth is in proportion to the growth of the country, as mentioned above. The year 1870, however, shows a marked change, due to the abnormal development during the war, and a much larger ratio is reached than the one holding prior thereto. In 1880 this larger ratio has not only been retained but is slightly exceeded. It is evident that since then the second cause of growth mentioned above is still exerting its influence, and it may be expected that hereafter the above ratio will continue to increase instead of remaining constant, as during the half century before the war. In forecasting the future growth we have preferred to give probable maximum and minimum curves between which the true growth will most likely be represented, rather than to mark a single line.

Basing our judgment upon the growth indicated by these two curves we believe it proper to provide sewerage works for a population of 500,000. Whether this is reached in the time indicated by the maximum or by the minimum curve, it is sufficiently far distant to cause moneys now invested to double in value before bringing any return. It is more economical to build supplementary works at such a time than to expend large sums at present to increase the size and extent of the present ones beyond the requirements of the above population.

---

* The District of Columbia. Synopsis of its Establishment and Government by William Tindall, 1889.

While it is proper to assume this population for proportioning the sizes of the outfall or main sewers, in which all or nearly all the sewage of the entire city will be concentrated, a larger aggregate should be assumed when providing for the separate drainage areas, because it is difficult, if not impossible, to estimate the relative rapidity of growth in different sections of the city.

Each district should therefore be considered as having a more rapid growth than the normal, the aggregate of which we have assumed as being equal to a population of 650,000, and we have considered that the branch sewers should be proportioned accordingly.

AMOUNT OF SEWAGE REQUIRING REMOVAL.

The quantity of sewage reaching sewers in dry weather has commonly been estimated as nearly equaling the water supply. The experience in many places, however, shows that the flow is materially increased by the ground water collected in the sewers, this increase more than offsetting the loss of water by evaporation in boilers and by its use for lawn sprinkling and street watering. In some cases the amount of ground water is very large but the conditions at Washington indicate that it will not be so in this case.

The following table gives the estimated population in the District each year from 1881 to 1888, the average daily water consumption for two consecutive days in the month of June, as given in the annual report of the Commissioners for 1888, and the rate per head in gallons per day:

Year.	Estimated population.	Water consumption.	Per head per day.
		Gallons.	*Gallons.*
1881	182, 791	26, 525, 991	145
1882	187, 958	29, 727, 864	158
1883	193, 125	24, 314, 715	126
1884	198, 292	24, 827, 013	125
1885	203, 459	25, 219, 194	124
1886	208, 358	25, 542, 476	123
1887	213, 258	26, 878, 424	126
1888	218, 157	29, 115, 774	133

In comparison with other cities, this water consumption per head of population is unusually large and is partly due to the non-resident population, not enumerated, but using the water, and also to the large number of public buildings and fountains. While we think that in addition a very large proportion of the water is wasted and that in the future such waste may be reduced, we have nevertheless thought it desirable to design the proposed works with reference to a sewage flow of 150 gallons, equal to 20 cubic feet per head per day, including the ground water which may find its way into the sewers.

The same annual report gives also the hourly variation of the consumption. While the hourly average is 1,104,955, the hourly maximum is 1,265,913, or 14½ per cent. greater, and the hourly minimum is 907,177 gallons, or 18 per cent. less than the mean. To provide for this slight fluctuation, as well as for a small amount of rain-water, we have thought it sufficient to proportion the intercepting sewers carrying the sewage to proper outlets, so that they will run half full with the above assumed quantity of 20 cubic feet per head per day.

MAXIMUM RAIN-FALLS AND AMOUNT OF STORM-WATER REACHING SEWERS.

To determine the proper discharging capacity for sewers designed to carry storm-water and thereby to prevent streets, cellars, and other property from being flooded during heavy rains, we must know the rate of precipitation during the most intense portions of the heavy rain-falls, their duration, the rapidity with which the water reaches the sewers and the proportion which finally enters them.

It is, therefore, necessary to have exact observations of parts of storms and of the extent, character, and slope of the respective drainage areas.

Although in large cities the damages from flooding are considerable, and notwithstanding that the cost of the sewers is so greatly affected by the question of size, few data are available which throw light upon this important matter.

Until recently the rain-fall records, both in America and Europe, with few exceptions, were kept so that only the total fall of each storm and perhaps also the duration were given, while for sewerage purposes it is particularly necessary to know the greatest intensity of fall. On Plate VII we have compiled such facts as have been recorded of late years by automatic gauges in Boston, Providence, New York, Philadelphia, and Washington, and in Appendix C we give the same information in tabular form.

A study of this compilation shows that occasionally some remarkable storms occur in the eastern portion of the United States. It also shows that there is but little difference, regarding the greatest intensities, in the territory between Washington and Boston, although the comparative frequency of heavy storms is probably greater towards the south of this area. It will likewise be noticed that the more intense the fall the shorter is its duration.

In regard to the proportion of water that will reach the sewers from given storms and areas of different character, very few data are available. But as the conditions vary so much it would in any case be necessary to study them independently, with reference to local and special necessities.

It is evident that the greater the slope and the more impervious the area by reason of its being covered with buildings and pavements, the greater is the proportion of rain-water that will flow off the surface and reach the sewers. On the other hand, flat and open territory covered with vegetation, or perhaps having depressions in which some water is retained, will shed much less water into the sewers during the heaviest falls. But when the same ground is rendered less pervious by previous rains or by freezing, the proportion flowing off is again increased. The latter condition, however, is of little consequence in proportioning city sewers, as the greatest down-pours do not occur in winter.

On small areas the water reaches the sewers from all parts very quickly, and extremely heavy falls of short duration should therefore be provided for. But on large areas much more time is required to concentrate the flow. The heavy falls of long duration therefore govern in this latter case, requiring much less capacity per acre for the larger sewers.

From a few observations here and there several formulæ have been suggested to approximate the maximum quantity of water which, under

different conditions, will reach the sewers. We will only allude to those of Hawksley, Burkli-Ziegler, McMath, and Kuichling. Arbitrary assumptions have generally been made in each city as to the quantity to be provided for. A comparison of the above-mentioned formulæ and assumptions for several American cities shows so much variance that we have preferred, in the present instance, to base our judgment regarding the desired quantities upon local experience and upon a careful examination into the local conditions which will probably obtain in the future, using as a guide besides the above compilation of maximum rain-falls also a few actual gaugings made in Providence and New York and some useful information collected in St. Louis.

We found the Department using a special formula which had been developed partly from others and partly from local experience. Our examinations lead us to approve of this formula for the smaller areas to which it has been applied, but to vary from it when applied to large areas, and we have arrived at results which are expressed by the curve shown on Plate VIII. While we considered this curve as being generally suitable for the Washington conditions, excepting as regards the park areas, we did not hesitate to vary from it where special conditions made it advisable.

We were shown the point where it is proposed soon to make continuous gaugings of the sewer flow. Inasmuch as exact knowledge of this matter represents an important factor in determining the size and therefore also the cost of sewers, we can not but express our hope that such gaugings may be made at this as well as at still other points.

It is intended to exclude the rain-water naturally reaching the low district from the higher territory, but in proportioning the storm sewers we have made a slight allowance for water accidentally passing over the intercepting line. It is highly important that this quantity should be kept at a minimum by a sufficient number of inlets judiciously placed.

FORM AND MATERIAL OF SEWERS AND MINIMUM VELOCITIES.

It is proposed that the sewers shall be circular in section, except in special cases referred to in the detailed description of the projects, where another form is best adapted to the local conditions.

Up to and including a diameter of 24 inches the sewers are to be vitrified pipes laid in a bed of concrete, and to have their joints covered with the same material to prevent the intrusion of roots of trees. This practice has prevailed in Washington for several years. Above 24 inches in diameter sewers are designed to be of brick masonry, and for the purpose of making estimates of cost those to be built in firm ground which can be excavated to the form required for the invert of the sewer are assumed to have the following thicknesses:

	Rings.	Inches.
From 2 feet to 6 feet in diameter	2	8½
From 6 feet to 12 feet in diameter (inclusive)	3	12¾
From 12 feet to 15 feet in diameter (inclusive)	4	17

Where there is reason to suspect that the soil may be loose or very wet, and where it will be necessary to support the sewers on piling, an allowance for side walls of concrete masonry has been made. The

adoption of a ring of brick-work of uniform thickness for purposes of estimate should not be considered a recommendation with regard to the proper disposition of the masonry of the sewer in the design for construction. The material can in most cases, and particularly in large sewers, be so placed as to resist more effectively the strains to be brought upon it; moreover, there may be a considerable advantage in many places by substituting concrete masonry in the lower portions of the sewers for the more expensive brick masonry, retaining only a thin lining of the latter. It may also be found practicable to substitute concrete for brick masonry in the arched covering of the sewer. If this should be done it will be necessary to make the concrete arches thicker than those of brick, but notwithstanding this increase it may be found cheaper, on account of the smaller cost of the same bulk of masonry, to use concrete arches in many places. We have not, however, thought it proper to reduce our estimates on this account in view of the limited experience gained with large sewers of this kind.

Where the sewer is in tunnel an allowance has been made for filling the space between the usual ring of brick-work and the sides of the tunnel with solid brick or other masonry.

The velocity in the intercepting sewers has been reckoned upon the assumption that these are to run one-third full in depth, that is, a depth which the sewage would assume in them soon after they are put in operation; and it was further assumed that with this depth the slope of the sewers should be such that the velocity would not be less than 2.7 feet per second. This is equivalent to a velocity of more than 3 feet per second when the sewer is running half full or full.

For sewers designed to carry storm-water, in which the ordinary flow of sewage occupies but a small part of the total depth, the aim was to provide a velocity of 2.7 feet per second or more with the ordinary flow of sewage, but it is not as essential to have a high velocity at all times in these sewers because the velocity is very much increased during storms.

PUMPING SEWAGE.

To pump the entire sewage of a city might at first appear to be an undertaking too great to attempt. But the difficulties are not great and there are many examples where all or much of the sewage is thus artificially raised, notably Boston and Milwaukee in the United States and London and Berlin in Europe.

Many cities have obtained their water supply by pumping, independently of the use of reservoirs, and yet we seldom if ever hear of any city being deprived of its water by a break-down of its pumping machinery, particularly where it was provided in duplicate. The same dependence can be placed in works for pumping sewage. In Washington, as will be shown later, the sewage could, in case of an accident, discharge temporarily by gravity.

To have a sewage pumping station within a city in the vicinity of habitations might appear to be a proposition of questionable merit. But as such a station, if properly arranged, does not permit sewage effluvia to escape into the street any more than a common sewer, there can be no reasonable objection entered on this account. In fact we have several instances in London and Berlin where sewage pumping works of large capacity are located in the interior of the city and are not found in the least offensive.

A carefully considered system of artificial ventilation can be made to

produce currents of air from all parts of the building to the chimney and thus discharge the offensive air where it becomes unobjectionable.

Sewage brings with it much solid and bulky matter, such as gravel, sticks, leaves, fruit skins, rags, occasionally dead animals, and a great variety of things which find their way into the sewers. But these articles do not interfere with the successful operation of pumping sewage.

To prevent the heavy and floating matters from interfering with the pumping machinery two important adjuncts are required: settling-tanks or deposit-sewers to arrest the heavy materials, and screens or filth-hoists to catch all coarse floating matter.

The settling-tanks consist of an enlargement in the line of the sewers, by which the velocity of the sewage is decreased, so that the heavy material which has been brought down by the current is allowed to settle. These tanks should be located near the pumping machinery and have a size sufficient to reduce the velocity of the sewage to 1 foot or less per second, which will cause sand, gravel, and other heavy material to deposit. These tanks should be in duplicate, and so arranged that the sewage can easily be turned into either one, and permit the deposits to be removed while the works are in operation. Proper machinery, such as sand-pumps and other appliances, should be provided for this purpose.

The screens should be located between the settling-tanks and the pumps, and should also be arranged in duplicate, so that one screen will always be in place while another is being cleaned. Facilities should be provided for properly disposing of the collected floating matter so as not to cause a nuisance.

GENERAL SYSTEMS OF SEWERAGE.

We do not feel called upon to discuss extensively the different methods of sewering which have been advocated from time to time. Some of them, such as the dry removal, were once thought the only proper systems; but in all large American communities, accustomed to an abundant water supply, and therefore dealing with large quantities of waste water or sewage, the water-carriage system is considered the only satisfactory one, by which the sewage itself becomes the vehicle which immediately and continuously carries away from the inhabited districts, both thoroughly and economically, all refuse matter which can be held by it either in solution or suspension.

The necessity of having underground pipes or sewers for this purpose, and the like necessity in large cities of an underground removal of rain-water, which, as it washes the surface of streets and yards, is generally laden with refuse matter, raised the question whether sewage and rain-water should be removed in the same channels or whether they should be removed independently in different channels. In the first instance we have the "combined," in the latter the "separate" system.

An endeavor to decide this question on sanitary grounds brought out a number of theoretical reasons in favor now of one, then of the other system; but no conclusive evidence has appeared showing any difference in this respect, and, if one exists at all, it is insignificant compared with the effects due to the more or less careful design, construction, and maintenance of either system. Engineers have therefore based the preference upon greater economy of construction and convenience of operation in each particular case.

In most of the populated part of the District, where the combined system has already been adopted, there can be no question of the greater

economy in continuing to use this method, and there is no reason for making any change in the system on sanitary grounds. It has been suggested, however, that it might be best to adopt the separate or, in this case, a double system in the low level district. The ground upon which this has been urged was the necessity of pumping the sewage of the low area, while discharging the storm-water by gravity, and therefore, of keeping the drains at a higher level than the sewers. A careful study has convinced us that no economical advantage can in this case be gained by a double system. We have, however, found that the surface water from the White Lot and from the parks on the south side of B street (north), which can be kept entirely free from sewage, may be advantageously collected in an independent drain, which ordinarily discharges into an adjacent sewer, but which during very heavy rain storms may discharge into the near tidal basin or reservoir in the reclaimed territory west of the Monument. Otherwise no strict separation in the built-up portions of the city can be recommended.

Up the valley of Rock Creek, where new streets are being laid out, but where sewers are not yet built, the conditions are different from those which obtain in the populated parts of the city, and for this district we advise the adoption of a modified separate system. The surface water from the streets should not be allowed to enter the sewers which carry the sewage, but should be collected in separate underground channels discharging into Rock Creek, or its larger branches, whenever underground removal becomes necessary. The pipes for the sewage should be made large enough to take roof water from buildings, though it would be well to keep out as much of it as could readily be disposed of through other channels. The main advantages of this plan are, that by it the main sewer down the valley of Rock Creek would be kept free from deposits of earth, which would otherwise be washed into it in large quantities from the newly graded streets, and that the overflows from the main sewer into Rock Creek, required for economical reasons, would not operate as frequently.

The great boundary sewer discharging into the eastern branch was designed to carry brook water and the overflow from sewers during storms. We believe that in accordance with this intention no sewage should be turned into this sewer. We believe also that it would be wise to build a drain for surface water only, leaving this sewer at First street (west) and extending to the Soldiers' Home grounds. Its purpose would be to intercept the water of the brooks in these grounds, the drainage water from the new reservoir, and as much other surface water as could be turned into it. The sewage of this valley would be collected in separate sewers which, being relieved of the brook water, would furnish a much smaller volume of sewage to be pumped and carried to a distant outlet.

Where, in a combined system, it is desirable to carry the sewage a long distance to a suitable outlet, while the storm-water can be discharged at near points, it is customary to build intercepting sewers, or interceptors, which collect the dry weather flow of sewage at suitable points, and permit the surplus water during storms to overflow into near water courses. The volume of storm-water during a heavy rain is vastly in excess of this dry-weather flow, and it is often impracticable, as well as unnecessary, to carry it as far as the sewage outlet. By proportioning the interceptors so that in addition to the sewage they will receive the water from very light rains and the first wash from heavier ones, the rest of the storm-water and diluted sewage overflowing may be safely discharged into a stream incapable of receiving con-

tinuously any considerable quantity of sewage. This possibility is due not only to the high dilution of the sewage overflowing with the storm-water, but also to the fact that such overflows would not operate one hour out of a hundred during the year. In Washington many favorable opportunities for storm overflows are afforded by the Potomac River, Eastern Branch, Rock Creek, and the great Boundary sewer, and we therefore recommend a system of interceptors proportioned to carry only the sewage proper and a small quantity of rain water.

GENERAL DESCRIPTION OF PROJECTS.

After having determined the various elements and preliminary conclusions necessary to intelligently outline any project for sewerage, we shall now briefly describe as many projects as were deemed worthy of a detailed study from a sanitary and economical point of view, and then state our reasons for recommending the one which we consider best suited to the topography of the District and to the controlling conditions which exist at the present time.

In Part II we have mentioned the best ways of finally disposing of the sewage, and with certain limitations recommended three possible outfalls into the Potomac River, one near Easby's Point, another opposite Gravelly Point, and a third near the Naval Magazine.

Whether the sewage is discharged above or below the mouth of the Eastern Branch, some of it, from the low district and adjoining areas, will have to be lifted by pumps. It will likewise be necessary to artificially raise the water of every rain-storm falling upon this territory, when the river is raised above ordinary high-tide by freshets.

If the outfall is above the mouth of the branch, at either of the two points considered admissible, a large portion of the sewage of the District can be delivered to them by gravity. But if the outfall is near the Naval Magazine all of the sewage, except from the higher territory south of the branch, will have to be pumped.

In comparing the relative value of the projects we will therefore be obliged to consider not only their greatest sanitary value and first cost, but also the annual expense of maintenance, which for the present purpose we may confine to the cost of pumping.

Among the numerous possible projects suggested to fulfill the requirements of the District we have considered five in detail, including a careful study of the alignments, special difficulties to be encountered, and the probable cost of construction and maintenance.

Certain general features are common to all of them. For the purpose of keeping the storm-water, falling upon the higher grounds, as far as possible from descending into the low central district, intercepting sewers are required to reduce to a minimum the amount of rain-water that will occasionally require pumping.

To protect the low district against flooding during the freshets all the projects contemplate the building of dikes; one on the line of Virginia avenue to the Monument Grounds, and the other on the line of South N street. To remove the rain-water falling upon the diked area during ordinary stages of the river by gravity, and during freshets by pumping, a large trunk sewer is proposed through the low district from the Monument grounds to the foot of New Jersey avenue, at the Eastern Branch, near which the pumping station should be located.

All of the projects utilize those of the existing sewers that are in a fairly good condition excepting the one passing through the White Lot from Fifteenth street to B street, which is to be abandoned because it

descends so low that a discharge of its sewage and storm-water by gravity at a proper outfall is impracticable.

Finally, all the projects obviate the necessity for preserving any part of the present B-street outlet canal, which can therefore be filled up. They likewise do not require the use of the James Creek Canal, which will require filling up from the mouth of the old Tiber sewer to the proposed dike at N street.

PROJECT I. (See Plate IX.)

This project contemplates the delivery of practically all the sewage of the District at the lowest proposed outlet, namely, at a projecting point a short distance north of the naval magazine. A small portion of Georgetown fronting on the river can always discharge its sewage directly into the channel without objection.

Interceptors will prevent the discharge of sewage into Rock Creek, the Eastern Branch, the Potomac River between these tributaries, or into the Washington Channel, and will deliver it to a pumping station at the foot of New Jersey avenue, near the Eastern Branch. At this station the sewage will be lifted to a sufficient height so that it can flow by gravity through iron inverted siphons, laid under the Eastern Branch to Popular Point, thence through a brick sewer to the bank of the Potomac, and then through iron outlet pipes to the channel. At the same station there will be a pumping plant sufficient to lift the storm water of the low district into the Eastern Branch, when the water in the latter is too high to permit of a discharge by gravity.

The interceptors may be divided into two general classes, one of which is to intercept both storm water and sewage and the other sewage only.

To the former class belong the F street and Easby's Point, the Four-and-a-half street, and the Tiber Creek and New Jersey avenue high-level interceptors, which are designed and located so as to intercept all the storm-water that naturally flows into the central low-lying basin, extending from the White Lot easterly to the Capitol Grounds and thence southerly through the Tiber Valley. These sewers are placed at the lowest level from which it is practicable to deliver storm-water by gravity to the river; they also serve to intercept the sewage from the district lying above them and deliver it in turn, except when considerably diluted by rain-fall into the second-class of interceptors, which are designed only for sewage and a very small quantity of storm water.

The F street and Easby's Point interceptor will receive all the sewage and storm-water north of F street which now flows into the B-street sewer and is discharged into the present B-street outlet-canal, and will also receive the flow of the New York avenue sewer now emptying into the same canal. It will intercept likewise the sewage and storm-water from a considerable area west of the White Lot, and north of C and D streets Its outlet for storm-water will be into the Potomac river a little south of Easby's Point.

The Four-and-a-half street interceptor will intercept all the area of South Washington which now drains into the central low district as far north as South B street, and as far east as Four-and-a-half street. Its outlet for storm-water will be into the Washington Channel at M street.

The *Tiber Creek and New Jersey avenue interceptor* will intercept the old Tiber sewer, which now drains into and through the easterly part of the low district to the James Creek Canal, at the lowest practicable point in its course, and will discharge during storms into the Eastern

Branch at the foot of New Jersey avenue. It will also receive the sewage from the Capitol and nearly all the drainage from the Capitol Grounds, and intercept all other sewers between its upper terminus and Virginia avenue which now flow from the east side of the low district into the lower part of the Tiber sewer.

The completion of the Boundary sewer, discharging through an open channel into the Eastern Branch, relieved the old Tiber sewer not only of the storm-water naturally flowing into it from its drainage area north of the boundary line, but also of the storm-water from a considerable tract (indicated on Plate IX) inside of the city limits. It is proposed, however, to intercept the sewage from all this area, on both sides of the city line, thus preventing its entrance into the Boundary sewer and discharge into the Eastern Branch, and to conduct it through existing sewers into the Tiber Creek and New Jersey avenue interceptor.

The low-level sewage interceptors have been located so as to be able to intercept the sewage from local sewers to be built in the future as well as from existing ones, and also to intercept the sewage from the above-described high-level interceptors near their points of discharge into the Potomac and its branches. These interceptors are designated as the Rock Creek and B street, the east side, and the Water and M street interceptors, and the B street and New Jersey avenue trunk sewer. The last one will pass through the center of the low district and receive all the storm-water of this district in addition to its sewage.

The *Rock Creek and B street interceptor* will intercept the entire sewage of the Rock Creek Valley above as well as below the boundary, including Georgetown north of Bridge (M) street and the sewage of the F street and Easby's Point high-level interceptor at the point of crossing at Twenty-second street. It discharges at Virginia avenue into the head of the B street and New Jersey avenue trunk sewer.

The *east side interceptor* will receive the sewage of the entire eastern part of the city not tributary to the Tiber Creek system, and empty into the B street and New Jersey avenue trunk sewer at M street.

The *Water and M street interceptor* will intercept all the sewage of South Washington now discharging into the Washington Channel and the sewage of the James Creek Valley south of H street; it will also intercept in its lower portion all the storm-water from the low area situated between the proposed dam on N street and H street. This interceptor will empty into the B street and New Jersey avenue trunk sewer at M street.

Lastly, *the B street and New Jersey avenue trunk sewer* will receive directly or through its branches all the rain-water of the low district requiring pumping; it will also receive at its upper end the contents of the Rock Creek and B street interceptor, and near its terminus the contents of all the other sewage interceptors, thus delivering to the pumping station all the sewage of the city and all the storm-water from the low district.

The existing B street sewer will act as an adjunct to this trunk sewer-receiving no sewage, but only the storm-water from the park area between B street north and B street south and the streets traversing it, and also from the White Lot south of the F street and Easby's Point interceptor. This existing sewer will discharge the water of moderate rain-falls into the proposed trunk sewer, to run parallel with it, through two or more connections, which will be provided with swing gates to prevent any flow in the opposite direction; but during heavy or prolonged storms when water from other sources fills the proposed trunk sewer, the existing sewer will discharge into the tidal reservoir through a con-

nection to be made with it from its present terminus at Seventeenth street. This reservoir will therefore receive only the rain-fall from park areas and a few traversing streets; and this only at infrequent intervals and after the washings from the early part of the rain-fall have passed off into the trunk sewer.

Automatic regulators will be provided wherever necessary, mainly at points of sewage interception, to prevent the intercepting sewers from being overcharged. The diluted sewage thus prevented from entering the interceptors will continue in the local sewers and pass directly to the river or its branches. Double sets of tidal gates, wherever necessary, should be placed at the river outlets of the old sewers, as well as at the mouths of the high level interceptors and the trunk sewers.

The estimated cost of the project (see Appendix B) is	$3,598,003
The estimated annual cost is—	
Interest on first cost and depreciation at 4 per cent	143,920
Operating and maintaining pumping station	19,920
Total	163,840

PROJECT II. (See Plate IX.)

This project is identical with the one just described down to the pumping station; but instead of pumping the sewage across the Eastern Branch to the lower outfall, it is proposed to have it pumped westerly to the river opposite Gravelly Point. The outfall sewer would extend from the pumping station along the line of O street to Water street, thence by inverted siphons of iron pipe under the Washington Channel and across the flats to the point of discharge in deep water of the main channel, as indicated by dotted lines.

The sewage of the territory south of the Eastern Branch should be carried by an independent sewer to an outlet at the point above the Naval Magazine. In order to properly compare the cost of the different projects, we have estimated upon an outfall sewer below Poplar Point, where its line would be practically identical with the line of the outfall sewer of Project I. The cost of such a sewer, 3 feet 6 inches in diameter is approximately estimated at $144,600. As this sewer might not be built for a number of years, we have thought it proper to include in the comparisons but $100,000 for the present value of a sewer in this place.

The estimated cost of the project (see Appendix B) is—	
North of Eastern Branch	$3,243,902
South of Eastern Branch	100,000
Total	3,343,902
The estimated annual cost is—	
Interest on first cost and depreciation at 4 per cent	133,756
Operating and maintaining pumping station	19,920
Total	153,676

PROJECT III. (See Plate X.)

This and the remaining projects contemplate the discharge of all sewage, except from the central low district by gravity, the outfalls being in the main channel above and below the mouth of the Eastern Branch.

The Rock Creek and B street interceptor (Project I) would stop at G street and have a permanent outlet in the Potomac slightly below the mouth of Rock Creek.

The F street and Easby's Point high-level interceptor would be identical with that of the same name in Project I, except that it will be provided with outlet pipes to carry the sewage to deep water, but it would deliver both sewage and storm water permanently at Easby's Point.

The Water and M street low-level interceptor, the new outlet for the old B street sewer, and the Tiber Creek and New Jersey avenue high-level interceptor would be identical in size and functions with the same sewers of Project I, except that the last-mentioned interceptor would receive only storm-water.

The East side interceptor would be located at such an elevation as to enable it to discharge by gravity at an outlet in the main channel, opposite Gravelly Point. At New Jersey avenue and M street this interceptor would receive the sewage, pumped from the central low district and from South Washington, and then follow along N street to South Capitol street, where it would receive the sewage of the Upper Tiber Valley, collected by the Tiber Creek and South Capitol street sewage interceptor.

The N street outfall sewer begins at South Capitol street and runs through N street as a brick sewer to a point near Water street, from which cast-iron pipes would be laid as inverted siphons across the Washington Channel and across the flats to deep water in the main channel. Above the inlet to the siphon pipes provision would be made for screening the sewage and settling the heavier substances in it, thus removing substances which might obstruct the pipes.

In this project there is very little sewage in the low district to flow through the upper portion of the B street and New Jersey avenue trunk sewer, which is principally designed for storm water and has flat gradients. This sewer would, therefore, have to be supplemented by a small sewage interceptor laid with steeper gradients as far as the junction with the old Tiber sewer, in order to obtain sufficient velocity to prevent deposits.

Below this junction the large sewer is designed to have a small channel in the bottom to concentrate the flow of sewage, and produce enough velocity to prevent deposits of sewage matter. A velocity sufficient to remove sand and gravel could be obtained only by lowering the large sewer to give more slope, thereby increasing the cost.

The trunk sewer and the lower portion of the Tiber Creek and New Jersey avenue high-level interceptor, on account of being so much below tide-level, will have a sluggish current during all ordinary storms when the depth of water is increased, causing sand and gravel washed into them to deposit. As in this project there will not be sufficient current to remove these deposits after the sewer is pumped down, removal by hand may be necessary.

Short siphons will be required where the Tiber Creek and South Capitol street sewage interceptor crosses the old Tiber sewer and the Tiber Creek and New Jersey avenue high-level interceptor near its upper end.

About six-tenths of the sewage from north of the Eastern Branch, both from existing population and from the estimated future population, would be discharged at the outlet opposite Gravelly Point and about four-tenths in the vicinity of Easby's Point and at the foot of G street.

The estimated cost of the project (see Appendix B) is—	
North of Eastern Branch	$3,298,825
South of Eastern Branch	100,000
Total	3,393,825
The estimated annual cost is—	
Interest on first cost and depreciation, at 4 per cent	135,753
Operating and maintaining pumping station	11,474
Total	147,227

PROJECT IV.

For the purpose of reducing the cost, the foregoing project might be slightly modified, as follows:

The Tiber Creek and South Capitol street sewage interceptor can be discarded, and in its place the F street and Easby's Point interceptor can be extended as a sewage interceptor only, along F street from Seventh to North Capitol streets, thence to three points of interception on North Capitol, F, and G streets. As a result of this change a much larger quantity of sewage is discharged at Easby's Point, and this interceptor would be increased in size, while the N street sewer below South Capital Street, and the outlet pipes extending to opposite Gravelly Point, would be diminished in size.

The relative proportion of sewage discharged at the latter place and in the vicinity of Easby's Point would be nearly reversed by the adoption of this project, viz, about one-third of the present and future amount would be discharged opposite Gravelly Point, and about two-thirds would enter the river near and above Easby's Point. In this project several siphons would be required at crossings of proposed and existing sewers.

The estimated cost of the project (see Appendix B) is—	
North of Eastern Branch	$3,195,676
South of Eastern Branch	100,000
Total	3,295,676
The estimated annual cost is—	
Interest on first cost and depreciation, at 4 per cent	131,827
Operating and maintaining pumping station	11,474
Total	143,301

PROJECT V.

We have finally examined into the details of a project delivering no sewage near Easby's Point, but discharging it instead opposite Gravelly Point.

To attain this object the Rock Creek and Twenty-seventh street interceptor, of Project III, would have to be raised, its gradients flattened, and its size increased. It would be extended across the low land to the Monument Grounds in the proposed dike and through South Washington to a junction with the N street sewer, modified and extended, at K street, receiving on its way the sewage from the F street and Easby's Point interceptor. From its junction with the N street sewer the outlet pipes would be the same as required in Project II, except that they would start from K street instead of O street.

In order to deliver sewage into this sewer, the F street and Easby's Point interceptor would have to be raised several feet at the crossing.

This flattens its slope and brings it nearer the surface of the streets than is desirable.

With the exception of a little change in the routes of the N street sewer, and the Tiber Creek and South Capitol street sewage interceptor and a slight elevation of the grade of the east side interceptor, the other sewers of this project would be identical with those in Project III (shown on Plate X).

The estimated cost of the project (see Appendix B) is—

North of Eastern Branch	$3,773,671
South of Eastern Branch	100,000
Total	3,873,671

The estimated annual cost is—

Interest on first cost and depreciation, at 4 per cent	154,947
Operating and maintaining pumping station	11,474
Total	166,421

COMPARISON OF PROJECTS.

The five projects just described provide about equally well for the removal of storm water from the entire city, and for a protection of the low parts during the highest freshets in the river. They vary as to the location of the outlets into the Potomac River, as to the relative quantity there delivered, as to the presence of unsatisfactory features, and as to the cost.

From the following condensed table it will be seen that the differences of cost are not great:

No. of project.	Main outfalls.	Total cost.	Annual cost.
I	Near Naval Magazine	$3,598,003	$163,840
II	Opposite Gravelly Point	3,343,902	153,676
III	Four-tenths near Easby's Point and six-tenths opposite Gravelly Point	3,393,825	147,227
IV	Two-thirds near Easby's Point and one-third opposite Gravelly Point	3,295,676	143,301
V	Opposite Gravelly Point	3,873,671	166 421

In making comparisons of cost it is necessary to consider only the last column, as it includes a sufficient annual charge to pay the interest and ultimately the principal invested in the works. If interest is reckoned at 3 per cent., the principal would be extinguished in forty-seven years.

In comparing the projects it is easy to eliminate Project V, as its outlet is the same as that of Project II, while its cost is greater and the system of sewers within the city is much less satisfactory. Likewise Project IV can be eliminated by comparison with Project III, because the slightly smaller annual cost of the former is entirely insufficient to offset the disadvantage of discharging so much sewage near Easby's Point, in the vicinity of wharves and population, above the proposed park along the river front, and where, for reasons stated at length in Part II, the sewage will not be as well mingled with the river water as at the other outlets.

In comparing Projects I and II, which are substantially the same as regards everything except the outlets, the question is narrowed down to this: Is it justifiable to increase the annual cost 7 per cent. ($10,200), in order to discharge the sewage at the lower outlet? From our ex-

aminations and studies of the relative merits of these outlets, as presented in Part II, and having due consideration for future requirements, we are of the opinion that the advantages of the lower outlet would justify not only this additional expenditure, but a much greater one.

A comparison of Projects I and III, with reference to outlets alone, leads us to recommend the former, for the reasons above stated, though it would cost annually 11 per cent. ($16,600) more than the latter. In this case, however, we shall make a comparison in detail so as to indicate more fully the differences between the two schemes.

The former has the following relative advantages:

(1) The outlet is located where there will be a more even mingling of the sewage with the river water, and much better currents to cause wide dispersion. It is so far down the river that the sewage can not come back into the Eastern Branch, Washington Channel, or the tidal reservoir at its head, and is not near wharves and docks, populous districts or parks.

(2) The passage of the sewage through screens and pumps, and the longer distance to the outlet, will cause the offensive solid matter to be more highly comminuted before it is discharged into the river.

(3) The concentration of all the sewage at one pumping station permits, at a reasonable cost, the removal of coarse substances and heavy matters which might otherwise strand on the shores or obstruct the channels, while in Project III such removal at the upper outfalls is not so easily accomplished, and we have not embodied its probable cost in our estimates.

(4) Only one siphon is required in Project I, and it is located just beyond the pumping station, where it can be thoroughly flushed by the high velocity which the pumps can create; while in Project III, one large and two small siphons, less favorably situated, are required.

(5) The B Street and New Jersey avenue trunk sewer and the Tiber Creek and New Jersey avenue high level interceptor, both of which accumulate deposits of sand and gravel during storms, will, in Project I, for the most part, be scoured out in dry weather by the concentrated flow of sewage, while in Project III these deposits will often require removal by hand. The annual cost of this removal has not been included in the estimates.

(6) Considering the possible future improvements which in places may occupy the streets to a considerable depth below the present surface, such as subways or changes of grade to avoid surface crossings of railroad tracks, Project I has the advantage in having a greater length of sewers sufficiently low to avoid interference.

(7) In Project I the upper end of the East Side intercepting sewer can be placed low enough to intercept the sewage from the Boundary sewer, if it should ever be necessary, and from considerable territory adjacent to the Eastern Branch near and above the Boundary, which in Project III could only be taken into the main system by establishing an auxiliary pumping station.

These advantages have convinced us that Project I is the best, and we therefore recommend its adoption.

CONCLUSIONS.

The more important features and the merits of the recommended project may now be summarized as follows:

The proposed plan includes deeply-laid intercepting sewers to carry practically all the sewage of the city to a suitable outlet in deep water of

the Potomac River, storm-water sewers to drain the low districts and to intercept the waters which would otherwise reach it from the higher districts, dikes to prevent the entrance of river water during freshets, and pumps to lift the sewage at all times and the storm water of the low district when the river is unusually high. The pumps for both purposes are to be at one station near the foot of New Jersey avenue. The large sewers designed primarily for storm water removal, serve also as sewage interceptors.

Estimated cost of the works	$3,598,003
Annual cost for interest and depreciation	143,920
Annual cost of pumping	19,920
Total annual cost	163,840

Of the first cost, approximately, $1,650,000 may be charged to the improved system of sewage disposal, and $1,948,000 to the protection of the low district from flooding. The combination of the works required for these two purposes has resulted in a saving of about $900,000, so that to obtain the cost of either one independently $450,000 should be added to each of the amounts above given.

Provision is made in all parts of the project for the sewage of a population of at least 500,000. The storm-water sewers, which represent nearly one-half of the total cost, are large enough to take the sewage of the densest population which can contribute to them.

The sewage will be discharged so far below the city that it can not come back with the tide, and at a point where the dilution will be so great that no offense can be caused until the population of the District exceeds 800,000, and additional works are required.

The flooding of the low district by heavy storms and river freshets will be prevented.

The present foul canals will be abandoned and can be filled up.

The low, flat, and unsanitary sewers in the low district will also be abandoned as sewage carriers, but can be utilized to carry only storm water and the overflow of very dilute sewage from the new sewers during heavy storms.

The currents in the proposed sewers will be sufficiently strong to prevent deposits.

The ground water in the low district will be permanently lowered.

Ample provision has been made for the removal of storm water from within the city limits.

The sewers are laid at such a depth that they will not interfere with future underground constructions in the streets.

We have endeavored to make the estimates large enough to cover all contingencies, such as experience has shown are liable to be met with on works of this magnitude, even when carefully planned in advance and built under good management; and we believe that, with sufficient appropriations to prevent delay and with present market prices, the works can be built for the sum estimated by us.

We have not thought it necessary to determine the order in which the works should be built, as this can best be done when their execution is decided upon. We wish to say, however, that we were unable to devise a scheme which would be economical and efficient, and at the same time give any large measure of relief by building only one of its parts. We therefore urge the importance of providing at one time for the construction of the entire works. Partial relief may in a few instances

be provided before the completion of the works. For instance, by the construction of the Rock Creek sewer as far as G street, the pollution of this stream can be prevented. The F street and Easby's Point interceptor can prevent the surcharging of the present B street sewer during heavy storms. It is also probable that the low district may be protected from river freshets by a comparatively small additional expenditure for temporary works; but this protection would be efficient only so long as there is no heavy rain-fall at the time of the freshet. Relief at all times from flooding can only be obtained when the permanent works have been completed.

As the proposed project contains several features which have not heretofore existed in the sewerage system of Washington, and in order to forestall criticism by those who are not familiar with the more recent experience in sewerage works, we desire to add the following remarks.

The proposed work and its cost do not reach an unusual magnitude. In Europe and America there are instances where works of much greater extent have been or are to be built. London required for her sewage removal interceptors and pumping stations costing over $25,000,000, and present extensions looking towards a partial sewage purification will require the additional sum of about $10,000,000. Berlin has spent about $15,000,000 for improved sewerage, including works for disposal. In the United States, the city of Boston has expended $5,500,000 for main sewerage works, and with its suburbs is about to spend as much more, making a total cost of $11,000,000. Providence has begun the construction of a series of interceptors and of a plant for precipitation to cost about $3,500,000. Chicago has also begun to build works for purposes of sewage removal which will cost over $25,000,000. The estimated cost of proposed works for Milwaukee is $3,900,000. The total expenditure required for the District of Columbia is estimated at $3,598,000, and this includes not only the removal of sewage, but also the protection of the low district from freshets.

That the entire sewage of a city can be pumped without difficulty is made evident by experience in London, Berlin, Paris, Boston, and Milwaukee. A sewage pumping station, if suitably arranged and ventilated, is entirely inoffensive. Of this we have instances in London, and particularly in Berlin, where such works, of large capacity, are located in the interior of the city and are not found in the least objectionable.

The use of tide-gates and automatic regulators may appear to complicate the operation of the system, but carefully designed apparatus of this class has been quite satisfactorily used in several European cities, and in Boston, Mass., in sewers even further below tide level than those proposed for Washington. The tide-gates and regulators in Boston have not shown one instance of failure during the six years that the works have been in operation. They require but little attention to insure their proper operation, and there is no reason why this can not be guaranteed in Washington as well as elsewhere.

Regarding the depression of the bottoms of the two largest sewers to a considerable depth below high tide, we desire to say that they will operate successfully. During heavy rains they will fill up with water and the current will not be strong, so that some of the heavier matter will deposit. This condition, however, will be of short duration, for as soon as the water is pumped down and the concentrated flow of sewage is re-established they will again become self-cleansing. If there was no pumping station connected with them, and they consequently remained nearly full at all times, deposits would accumulate as they now do in the old Tiber Sewer.

We have endeavored to devise the best possible plan for the improvement of the sanitary condition of the District, and feel gratified that we can present a project which accomplishes the end for a relatively small cost and is so free from sanitary and engineering objections.

Before concluding, we desire to express our special obligations to Mr. J. Foster Flagg, civil engineer, who has been our principal assistant in making these investigations and preparing the plans and estimates.

Respectfully presented.

RUDOLPH HERING.
SAMUEL M. GRAY.
FREDERIC P. STEARNS.

JUNE, 1890.

APPENDIX A.

DETAILED DESCRIPTION OF WORKS RECOMMENDED.

PROJECT I.

THE ROCK CREEK AND B STREET INTERCEPTOR.

This sewer will commence at the Boundary, at or near Twenty-second street, northwest, and after receiving the discharge of the new Rock Creek Valley sewer, now under construction, it will pass under the Boundary sewer and through Twenty-second street to M street and there intercept the large Slash Run sewer; thence it will pass through M street to Twenty-sixth street, uniting there with the branch interceptor from Georgetown; thence through Twenty-sixth, and Twenty-seventh, and upper Water streets to Twenty-second street, there intercepting the sewage from the F street and Easby's Point high level interceptor, continuing through upper Water and B streets to Virginia avenue, where it will discharge into the upper end of the Trunk sewer.

The Georgetown branch of this interceptor will start at a point on Bridge street about 250 feet west of Twenty-eighth street, there intercepting the present sewer, and pass through Bridge street and across M street bridge to its junction with the main interceptor at Twenty-sixth and M streets. It will be supported at the crossing of Rock Creek on trusses erected on the abutments of M street bridge under the south sidewalk in the same manner that the 48-inch iron water-pipe is supported under the north sidewalk. The sewer will not be below the level of the bottom of the existing roadway trusses. A lateral on Twenty-seventh street in Georgetown will intercept the sewage coming from the northwest. The Bridge street sewer can be extended to the western end of the street so as to intercept, if it should ever be necessary, the entire area north of it. This extension is not needed at the present time, nor does it seem likely to be in the near future, and therefore is not provided for in the estimates. As between I street and the Boundary the interceptor will be almost entirely in tunnel (generally in rock), and in most cases much below the level of the existing sewers which it is intended to intercept, the use of regulating gates would be expensive and somewhat difficult. It is proposed, therefore, for this section of the line to regulate the flow from the local sewers into the interceptor by using restricted openings at the connections and providing low overflows over which the storm water can pass to the existing outlets of the sewers. Should any surplus storm water enter the interceptor at these openings, it will be provided for by an overflow into the Potomac at G street. A large regulating-gate below this overflow will prevent surcharge of the interceptor below.

Another large regulator will be placed upon the interceptor just above Virginia avenue to keep the sewage from entering the trunk sewer in the low district during storms and force it to discharge through the F street and Easby's Point interceptor into the Potomac.

From near the Boundary to Twenty-seventh and K streets the line of the sewer will probably be mostly in rock, and as its invert for this portion will be from 27 to 58 feet below the surface of the streets, it is proposed to build it in tunnel.

The interceptor will be circular in form and its diameter will vary from 4 feet 4 inches at the upper end to 6 feet 6 inches at the lower end, the Georgetown branches being 2 feet 6 inches and 15 inches in size, respectively, and the G street outlet 4 feet in diameter. Including the branches it will have a length of 14,670 feet, and its estimated cost $377,888.

THE EAST SIDE INTERCEPTOR.

This interceptor is intended to receive all the sewage which would naturally flow into the Eastern Branch, east of New Jersey avenue, both above and below the Boundary. It is, however, shown on the plan as beginning at the Boundary sewer because the territory beyond is not sufficiently improved to enable a proper route to be determined. Even between this sewer and the jail grounds the route is somewhat uncertain, as the streets are not graded, nor are their eventual elevations even determined.

It may be as follows:

Starting at the Boundary sewer on E street between Seventeenth and Eighteenth streets, thence via E to Seventeenth street, Seventeenth to D street, D to Twentieth street, Twentieth to C street, C to Twenty-first street, Twenty-first to East Capitol street, East Capitol to Twenty-second street, Twenty-second to A street (south), A to Twenty-third street, Twenty-third to the jail grounds; thence its course will be due south across the jail grounds to G street, through G street to Twentieth street, and Twentieth to the southeast corner of the Congressional Cemetery, skirting the cemetery to Pennsylvania avenue. It will then pass through Water street to N street, and through N, Ninth, and M streets to its confluence with the B street and New Jersey avenue trunk sewer.

The size of the interceptor, circular in form, will vary from 3 feet at its upper end to 4 feet 2 inches at its outlet, which will be sufficient to permit its extension whenever necessary and provide for the sewage from a considerable area north of the city and east of Bladensburgh road. Its length will be about 18,000 feet.

As a large portion of its drainage area is as yet unsewered and but little occupied with dwellings, it is not necessary to build this interceptor at present beyond N and Twelfth streets. The portion which it is proposed to build will at first have only a small quantity of sewage flowing through it, and will therefore have somewhat less velocity than is desirable; as its upper end is close to the Eastern Branch and below tide level, provision should be made for flushing it occasionally from this source. The cost of this portion of the sewer, amounting to $85,468, is included in the estimates. The cost of the portion not so included will be in the neighborhood of $165,000.

WATER AND M STREET INTERCEPTOR.

This interceptor will commence in Water street, South Washington, 150 feet west of Thirteen-and-a-half street, and pass southerly through Water street to M street, where it will unite with a branch running

northerly on Water street from O street, thence after intercepting the sewage of the Four-and-a-half street high level interceptor it will pass through M street to its junction with the trunk sewer at New Jersey avenue.

Its size will vary from its upper terminus to the James Creek Canal from 15 inches to 2 feet 6 inches; at the latter point, as it will then also receive the storm-water from the low district, its size will be increased to 5 feet 3 inches, and at One-half street west it will again enlarge to 8 feet 6 inches for the remainder of its length. The southerly branch in Water street has a diameter of 12 inches throughout its length.

A branch sewer, draining a part of the low district, from 7 feet to 7 feet 9 inches in size, will commence at I street and run through One-half street west to the junction at M street.

The total length of this interceptor and its branches will be 11,175 feet, and their aggregate cost $162,174.

If necessary in the future, a branch sewage interceptor from the southern end of Buzzard's Point can be built along Second street to the Water and M street interceptor, and provide for the sewage from the western slope of the point. The eastern slope can similarly be provided for by a sewage interceptor discharging into the trunk sewer at N street. The cost of these sewers is not included in any of the estimates.

F STREET AND EASBY'S POINT HIGH-LEVEL INTERCEPTOR.

This sewer will take the storm-water and sewage from an area of 537 acres. As this includes, however, 29 acres of the White Lot, from which about two-thirds as much storm-water as from other portions of the area would enter the sewer, one-third of the area has been deducted from the total, leaving 527 acres as the equivalent populated area. The sewer will commence at Seventh and F streets northwest and thence it will pass through F and Fifteenth streets to Pennsylvania avenue, where, after receiving the sewage and storm-water from the existing New York avenue sewer, it will enter the White Lot and cross it to the corner of D and Seventeeth streets, thence it will pass through D, Eighteenth, C, and Twenty-first streets. It will then cross to Twenty-second street at the corner of Water street, where its sewage will be intercepted by the Rock Creek and B street interceptor. To discharge the storm-water it will cross over this interceptor and after running westerly a short distance in Water street, will take the most direct course to the banks of the Potomac.

The crown of the Rock Creek and B street interceptor, at the crossing, will project above the level of the invert of the F street and Easby's Point interceptor, thus forming a dam to divert the ordinary flow of sewage through a connecting pipe into the sewage interceptor. This connecting pipe will be supplied with a regulator to throttle or stop the flow into the lower sewer during storms. A second connection of large size will lead from the lower sewer into the upper one below the crossing and will be provided with a double set of tide-gates to prevent backflow. This overflow will operate during all heavy storms when the regulating gates at Virginia avenue, already mentioned, close to prevent the sewage from entering the trunk sewer in the low district.

Duplicate tide-gates will be required on the upper sewer just below the crossing to keep the river water out during high tides and freshets.

The high-level interceptor from its junction with the New York avenue sewer at Fifteenth street and Pennsylvania avenue to its outlet, is proportioned for a flow equal to the entire water from a rain-fall of $1\frac{1}{4}$

inches per hour upon its drainage area of 527 acres, when running full but not surcharged. By allowing the hydraulic gradients to rise at Fifteenth street and Pennsylvania avenue 2.6 feet above the crown of the sewer, its capacity will be increased to the equivalent of 1½ inches per hour, and with this elevation of the hydraulic gradients, the upper portions of this sewer will have the full capacity for which they were designed, namely, an excess over the 1½ inches per hour, increasing as the size of the drainage area decreases.

From its upper terminus to the crossing of the Rock Creek and B street interceptor at Twenty-fifth street the sewer will be circular in form, and vary from 4 feet 3 inches to 11 feet 3 inches in diameter. From the latter point it will have a horseshoe-shaped section with curved invert, 11 feet 3 inches in diameter at the springing line by 10 feet 3 inches in height.

The total length of this sewer will be 10,535 feet and its cost $275,368.

FOUR-AND-A-HALF STREET HIGH-LEVEL INTERCEPTOR.

This interceptor will start from the intersection of B and Seventh streets southwest, where a connection will be made with it from the buildings in the park, and it will receive the flow of the sewers running northward on Seventh street. Thence it will pass through B, Sixth, C, Four-and-a-half, and M streets to Water street, where, to have its dry-weather flow of sewage intercepted, a connection will be made with the Water and M street interceptor. The sewer thence is carried across Water street to discharge the storm water into the Washington Channel. In order to keep down the hydraulic gradient during storms, and thereby cause less backing up of sewage in the lateral sewers discharging into it, the invert of this interceptor, just above the tidal gates at its mouth, where its diameter is 6 feet 9 inches, will be placed at 4.2 feet below datum (or 5 feet below mean high tide). The sill of the tidal gates will, however, be placed at mean low tide, so as to render them more accessible. Just above the tide-gates the dry-weather flow of this sewer will be discharged into the Water and M street interceptor through a connection provided with a regulator.

This high-level interceptor, which drains 105 acres, is proportioned to carry the amount of water indicated by the curve on Plate VIII.

The total length of this interceptor will be 6,464 feet, its diameter varying from 4 feet 2 inches to 6 feet 9 inches, and its cost is estimated at $112,550.

TIBER CREEK AND NEW JERSEY AVENUE HIGH-LEVEL INTERCEPTOR.

This interceptor will commence at the corner of C and First streets northwest, where it will intercept the old Tiber sewer at the lowest point at which it is possible to receive the storm-water for the purpose of delivering it by gravity to the Eastern Branch. Its course will then be through C and Arthur streets to the Capitol Grounds, thence through the Capitol Grounds on the line of Arthur street to about the line of the southern side of the Capitol, and thence southeasterly to the junction of Delaware avenue and South B street. From South B street it will pass through Delaware avenue to Canal street, through Canal street to Garfield Park, across Garfield Park to New Jersey avenue, and through New Jersey avenue to the Eastern Branch. This location of the outlet has been chosen because it gives the shortest distance to the river from the point of interception, saving very much in cost over a route by the way of the valley of the James Creek Canal.

At the foot of New Jersey avenue, a little above the proposed pumping station, the Tiber Creek and New Jersey avenue interceptor will discharge its dry-weather flow into the B street and NewJersey avenue trunk sewer through a connecting pipe which will be provided with a positive gate and with an automatic gate for cutting off or regulating the flow.

The Tiber Creek and New Jersey avenue interceptor will have a uniform diameter of 14 feet down to the connecting pipe, where the level of the invert will be 9.25 feet below datum. From this point to the tide-gates at the bank of the Eastern Branch the section of the sewer will be modified by increasing its width and raising the invert so as to bring its contents to the tide-gate chamber as nearly opposite the tide-gates as possible. These gates, to be accessible, should not extend very far below low tide, and it would be of little advantage to extend them more than a foot above high tide, because the water flowing from the sewer would not rise to fill them. As the height of the gates is thus limited to 6 or 7 feet, and the width of each gate is also limited by practical considerations, it will be necessary, in order to provide for the efflux, without excessive velocity, of the maximum amount of storm-water which this sewer can bring, to have several gates side by side. The suggested plan for this section of the sewer is to change just beyond the point of interception by a bell-mouth from the 14-foot sewer to twin sewers, each 12 feet wide and 10 feet high, having their inverts slightly curved and higher than that of the 14-foot sewer. These sewers would rise gradually to the gate chamber and would again widen before reaching it. On the opposite side of the chamber from the sewers eight double sets of tide-gates are to be placed side by side in bays 4.5 feet wide. The outer end of these bays to be provided with grooves, in which stop-planks or a wooden gate can be placed whenever it becomes necessary to repair the tide-gates. This interceptor will have sufficient capacity to discharge the entire water of a rainfall of 1.16 inches per hour from its drainage area of 1,149 acres, as indicated on Plate IX. Under existing conditions this drainage area is somewhat larger on account of a small territory now draining southerly from which the water is to be diverted into the Boundary sewer.

The total length of the interceptor will be 8,584 feet, and its cost $483,511.

B STREET AND NEW JERSEY AVENUE TRUNK SEWER.

This sewer will commence at Virginia avenue and B street northwest, forming a continuation of the Rock Creek and B street interceptor, and thence will pass through B street, Sixth street, Missouri avenue, Third and Canal streets to Garfield Park; thence across Garfield Park to New Jersey avenue, and through New Jersey avenue to the Eastern Branch where the pumping station is located. This sewer will under different circumstances discharge its contents in three different ways. In dry weather the sewage flowing through it will be intercepted just south of N street and conveyed to the sewage pumps. Ordinary storms will be intercepted at the same place and disposed of in the same way. Heavy storms at ordinary stages of the river will overflow through tide-gate openings into the Eastern Branch; while those occurring when the river is raised above its ordinary level by freshets will be diverted to the sewage pumps and to additional storm-water pumps, and lifted by them into the main river and the Eastern Branch. From the point below N street where the sewage is intercepted to the

Eastern Branch this sewer will be treated in the same general way as that last described. The total area of tide-gate openings should, however, be greater in proportion to the drainage area than in the other case, so that the maximum velocity through them due to the heaviest storm will not exceed 4 feet per second. The crown of the sewer is kept nearly at the level of high tide for its whole length so that the entire cross-section of the sewer will be available for conveying the storm-water, thereby keeping its surface as low as possible. The sewer varies in diameter from 7 feet at its upper end to 15 feet at its lower end where the sewage is intercepted. The direct drainage area of this sewer comprises 717 acres, of which 62 acres are parks.

It is assumed that only one-half as much water will reach the sewer during heavy storms from these parks as from the populated territory, and for convenience one-half of their area has been deducted from the total, leaving 686 acres as the equivalent populated area. In addition to this direct drainage area there are 208 acres of parks, equal to 104 acres of populated territory, from which the water will drain directly into the present B street sewer and discharge, during very heavy storms at ordinary stages of the river, into the tidal reservoir. During freshets, when this outlet will be closed, this water will be carried through the trunk sewer to the pumps making its drainage area during freshets 790 acres. The trunk sewer, with the aid of portions of the Tiber Creek and Missouri avenue sewers, which run parallel with it and will be utilized as supplementary channels during heavy storms, is designed to carry the entire water of a rainfall of $1\frac{1}{4}$ inches per hour upon its direct drainage area, when the water in its upper end at Virginia avenue is but 3 feet above high tide in the Eastern Branch.

During freshets when the larger area must be drained through this sewer it will have somewhat less capacity per acre but will still be of ample size, as experience has shown that the freshets do not come at the same season of the year with the rainfalls of greatest intensity.

A branch from the trunk sewer at Garfield Park will drain a portion of the James Creek Valley south of the Baltimore and Potomac Railroad, which is not provided for by the Water and M street interceptor. The upper end of this branch will be at G and South Capitol streets. The old Tiber sewer will continue to bring the sewage from the small territory tributary to it below the point of interception at the corner of C and First streets northwest, but in order to prevent the deposits which would occur if used in its present condition, a semicircular concrete channel is to be constructed in it along one side, to carry the sewage and the flow from ordinary storms. Branches entering the opposite side of the Tiber sewer will be extended across it to the semicircular channel by open channels on arches or piers so arranged as to permit the passage through the Tiber sewer of any overflow of water which may take place during heavy storms. The diameter of the semicircular channel is to vary from 15 inches at its upper end to 2 feet 6 inches at its junction with the Tiber sewer; the slope to be 1 in 250 above B street and 1 in 350 below it.

The present B-street sewer which is to receive surface water from the parks will, on all ordinary occasions, discharge into the trunk sewer through two or more connections, provided with swing gates which will prevent any flow of sewage in the opposite direction. To provide for the discharge of very heavy storms at ordinary stages of the river it is proposed to extend the B-street sewer by building a covered brick channel 5 feet 3 inches high, 7 feet 6 inches wide, and 1,000 feet long to the small basin of the tidal reservoir west of the Monument. This

channel is intended to have a slightly curved invert and low side-walls surmounted by a semicircular arch. Its bottom will be at nearly the same level as the end of the present sewer in B street. Its outer end is to be protected by tide-gates. As this outlet will discharge into the tidal reservoir only during heavy storms and then only the clean water from the parks, it is not thought that there can be any sanitary objection to its use. It is not, however, an essential feature of the proposed scheme, as the trunk sewer can be enlarged to take all the water from the low district to the Eastern Branch. This enlargement would, however, cost much more than the extension of the B-street sewer.

The manner in which the trunk sewer will operate, and its effect upon the level of the ground-water in the low district, have already been fully described in Part III.

This sewer, including its branches, will have a total length of 15,711 feet, and its cost is estimated at $719,101. The cost of the extension of the B-street sewer is estimated at $30,716.

DIKES.

(A description of the dikes is given in Part III.)

PUMPING STATION.

The pumping station is to be located near the Eastern Branch, at the foot of New Jersey avenue. It may be placed in the center of the avenue, where there is now a dock, or on land on either side.

The former location has some advantages which lead us to favor its adoption, and a sketch (Plate XII) has been prepared to indicate the general arrangement of a pumping station and its appurtenances at this place. The same general features should be included in the pumping station, if located on one side of the avenue.

This neighborhood permits the pumping station, both for lifting the dry-weather flow of sewage into the siphon and for relieving the diked areas of excessive storm-water to be combined into one, thus reducing not only the cost of construction but very materially the cost of operation.

The dry-weather sewage will be diverted from the trunk sewer and pass, first, through deposit sewers, where sand and gravel or other heavy material is allowed to settle, next through screens removing all coarse substances, then to the sewage pumps lifting it to the siphon chamber, from which it will flow by gravity to the outlet into the Potomac River. During ordinary storms the diluted sewage will take this same course. During heavier storms, when the sewage is much more diluted, the excess over the amount which can be lifted by the sewage pumps will be allowed to overflow into the Eastern Branch, provided it is not raised by freshets above its ordinary level. If it is higher this excess will be diverted to the storm-water pumps and lifted into the Branch.

The deposit sewers should be constructed in duplicate, and provided with gates at both ends to regulate the flow through them, and to disconnect either one for cleaning or repairs while the other is in use. They may each consist of an enlargement of the sewer by deepening and widening so that the velocity will be reduced to 1 foot a second or less, which permits the heavy material brought down by the current of sewage to settle. It is proposed to have machinery for removing the deposited material while the sewers are in operation, and to raise it to elevated tanks in the pumping-station building. In these tanks the

material can be washed and the lighter, offensive matters removed and turned back into the sewer. The sand and gravel can be removed in carts or in such other way as may be found best.

The screens should be in duplicate openings, with duplicate screens in each opening, so that one can be in place while the other is removed for cleaning. Provision should be made for removing the substances caught by the screens while the works are in operation. Judging from experience, these screens intercept but a small quantity of material per day, which can be freed from water by a press and burned.

The sewage pumps should have a total capacity of 230 cubic feet a second (which is equal to that of the outfall sewer), with a maximum lift of 25 feet. The ordinary lift will be about 18 feet. This capacity is much more than will be needed for pumping the ordinary flow of sewage for many years, but it will be useful for pumping the dilute sewage during ordinary storms to a suitable outlet, thereby preventing its discharge into the Eastern Branch. The pumps are to be of various sizes to accommodate the varying quantity of sewage, and each should be by itself in a well provided with a gate, or otherwise arranged so that it can be easily isolated and emptied for inspection and repairs. An auxiliary pump should be provided to pump out the lower part of these wells, as this can not be done by the large pumps. Centrifugal pumps operated by high-duty engines are recommended for this work rather than reciprocating pumps, because they are simpler, less liable to serious accident, cost much less, and do not require as expensive foundations or as large a pumping station; moreover, with a low lift, such as is required at Washington, some recent examples of pumps of this class give nearly as great an efficiency as would be given by the best examples of high-duty reciprocating pumping-engines.

The best instance of centrifugal sewage pumping machinery to compare with that proposed for Washington is found at Milwaukee, where 86 cubic feet per second of mixed sewage and water are pumped daily to a height of 16 feet, with a yearly consumption of 2,300 tons of coal. The annual cost of maintaining this station is $21,000. The average daily quantity of sewage and storm-water to be pumped at Washington would not exceed three-fourths of the amount pumped at Milwaukee, and the expense for fuel would therefore be somewhat less.

The storm-water pumps should supplement the sewage pumps to such an extent that the total capacity of both will equal 800 cubic feet per second. The maximum lift of the storm-water need not exceed 8 feet during the highest freshets, and with ordinary freshets would be much less. For this service two kinds of pumps have been considered; centrifugal pumps similar to those recommended for pumping the sewage, and propeller pumps like one in use at the flushing works at Milwaukee. This pump lifts about 700 cubic feet of water per second to a height of 3 feet, with much economy in the use of fuel. If this class of pump will lift to a height of 8 feet with approximately the same efficiency, as claimed by the makers, it would be cheaper, and would meet the requirements at Washington better than centrifugal pumps. We have, however, concluded to base our estimates upon the latter form of pumps, because experience has shown them capable of doing the required work, which can not yet be said of the others. We recommend, however, that the relative merits of these two classes of pumps be further investigated before finally deciding which to adopt.

All the storm-water pumps may be in a single well, separate from the sewage pumps, and the water flowing to them from the trunk sewer needs to pass only through a very coarse screen. In selecting engines

to operate the storm-water pumps simplicity should be aimed at rather than a high duty.

While we have designed to take care of rains of great intensity occurring simultaneously with high freshets in the river, this condition will exist but very rarely. We are, therefore, of the opinion that while the total plant should have sufficient capacity to pump the above-stated 800 cubic feet of water per second, when running at a safe speed, it is unnecessary to have additional pumps in reserve to be used in case of break down on such rare occasions. On all ordinary occasions there will be enough of the plant in reserve to provide for all contingencies.

The siphon chamber should be located within the exterior walls of the pumping station, as near the sewage pumps as it is feasible to place it. The force mains from all of the sewage pumps should enter it, and the siphon pipes start from it. Provision should be made for using any one or more of the siphon pipes at one time, and the chamber should be sufficiently elevated to give a large head for thoroughly flushing them.

Complete and ample ventilation should be provided, which will remove through the chimney enough air from the pump wells, deposit sewers, screen chambers, and other similar parts of the works, to prevent this air from escaping into the other parts of the station or into the street. The chimney should be designed with this service in view.

The station should be supplied with a store-house, repair shop and other conveniences for operating the works properly.

The cost of the pumping station, including all appurtenances, is estimated at $627,250.

INVERTED SIPHONS.

From the pumping station the sewage will pass through a triple line of 48-inch cast-iron inverted siphons laid beneath the bed of the Eastern Branch to Poplar Point.

The silt forming the bed in the shallower portions is too soft to permit the pipes to be laid directly upon it, and it is therefore proposed to support them upon piles. The estimates are based upon the following methods of construction: The piles to support the pipes are to be driven in bents of three, in a dredged channel. They should be cut off and capped at such a depth that to prevent flotation the pipes can be covered with riprap which will not project above the bed of the Branch.

In addition to the permanent piles others are to be driven on each side of the pipe line, to support a temporary staging, on which the pipes can be joined together in sections about 100 feet long, and then lowered into place; the sections can then be joined together by divers.

We have been unable to determine the character of the material in the bottom of the channel, and can not therefore say definitely what method of construction would be best for this portion. It is probable that a pipe with flexible joints will be required. The distance across the channel represents only a small part of the total distance across the Branch, and a sufficient provision has been made in the estimates for the extra cost of this portion of the work.

Two lines of 54-inch pipe would have sufficient capacity for this siphon, and they might be used instead of the 48-inch pipe if it should be found that they would cost less.

The length of each line of pipe will be about 2,680 feet, and their total estimated cost is $201,000.

At Poplar Point the siphons will connect, through an entrance chamber, with the outfall sewer.

OUTFALL SEWER.

This sewer, starting from Poplar Point, will take a direct course to the highway crossing of the Alexandria Branch of the Baltimore and Ohio Railroad, immediately north of the insane asylum grounds, where it will pass underneath the railroad track and around the houses to the east of it, so as to enter the asylum grounds on the plateau near the river bank. Through these grounds the sewer has been located near the shore of the river, keeping as much as possible in the plateau, so as to be in cutting. Thence the line skirts the right of way of the Alexandria Branch Railroad, on its eastern side, to a point about 8,170 feet from Poplar Point, where it passes again to the west side of the railroad. From this crossing it continues parallel with the railroad to a point about 13,000 feet from Poplar Point, where, with two deflections, it turns to the proposed sewer outlet at the first projecting point in the river bank north of the naval magazine.

The stream flowing into the Eastern Branch south of Poplar Point, and crossing the proposed line of the sewer, will be diverted so as to have its mouth north of Poplar Point. The other streams encountered will be provided for by culverts, passing under or over the sewer.

For this sewer, 15,483 feet in length, a horseshoe section with curved invert, 9 feet 4 inches wide by 8 feet 4 inches high, is proposed. The estimated cost, including right of way, entrance and outlet chambers and culverts, including diversion of streams where necessary, is $450,877.

OUTLET PIPES.

From the chamber at the terminus of the outfall sewer, two 48-inch cast-iron outlet pipes will be laid to the edge of the channel about 500 feet from shore.

The channel ends of these pipes will be protected by crib-work, weighted with stone and supported on a group of piles, the whole being at such a depth as not to interfere with vessels. The pipes should be supported upon piles from the shore to the crib, if found necessary.

The length of each outlet pipe will be about 550 feet, and the estimated total cost of both, including piling, is $27,500.

APPENDIX D.

ANALYSES OF RIVER WATER, MADE BY CLIFFORD RICHARDSON, CHEMIST, DISTRICT OF COLUMBIA.

Analyses of samples of water taken from the Potomac River, south of Long Bridge, between buoys 4 and 6.

[Parts per million.]

	Ser. No. 2758.	Ser. No. 2778.	Ser. No. 2862.
	Collected Dec. 1, 1889, 1 h. 18 m. before high tide.	Collected Dec. 9, 1889, 4 h. 34 m. after high tide.	Collected Dec. 30, 1889, 1 h. 25m. before high tide.
Condition	Turbid	Sl. turb	Clear.
Color	0.0	0.3	0.0
Total residue on evaporation	126.	132.	144.
Organic and volatile	60.	42.	76.
Non-volatile	66.	90.	68.
Free ammonia	0.008	0.008	0.048
Nitrogen as free ammonia	0.007	0.007	0.039
Albuminoid ammonia	0.140	0.112	0.180
Nitrogen as albuminoid ammonia	0.115	0.092	0.148
Oxygen consumed	1.46	0.90	1 28
Nitrogen as nitrites	0.000	Trace.	Trace.
Nitrogen as nitrates	0.5	0.8	0.8
Chlorine	4.5	4.5	4.5

Analyses of samples of water taken from the Eastern Branch, opposite a point between First and Second streets (east) shortly before high water.

[Parts per million.]

	Ser. No. 2759.	Ser. No. 2779.	Ser. No. 2860.
	Collected Dec. 1, 1889, 43 m. before high water.	Collected Dec. 10, 1889, 1 h. 7 m. before high water.	Collected Dec. 30, 1889, 55 m. before high water.
Condition	Turbid	Clear	Sl. turb.
Color	0.0	0.5	0.0
Total residue on evaporation	144.	126.	144.
Organic and volatile	68.	38.	60.
Non-volatile	76.	88.	84.
Free ammonia	0.220	0.180	0.300
Nitrogen as free ammonia	0.181	0.147	0.247
Albuminoid ammonia	0.208	0.152	0.204
Nitrogen as albuminoid ammonia	0.171	0.125	0.168
Oxygen consumed	3.38	1.06	1.26
Nitrogen as nitrites	Trace.	Trace.	Trace.
Nitrogen as nitrates	.5	.6	.5
Chlorine	4.5	4.5	4.5

Analyses of samples of water taken from the Eastern Branch, opposite Buzzard's Point, shortly before low water.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 446.

REGIMENTAL BANDS FOR THE ARMY.

LETTER

FROM

THE SECRETARY OF WAR,

INCLOSING

A letter from Chief Musician Charles Lamar, Twenty-first Infantry, and a petition from the members of the band of that regiment, asking that the provisions of House bill No. 5944, "to reorganize the band of the United States Military Academy," may be extended so as to apply to the regimental bands of the Army.

JULY 19, 1890.—Referred to the Committee on Military Affairs.

WAR DEPARTMENT,
Washington City, July 19, 1890.

SIR: I have the honor to inclose for the consideration of Congress a letter from Chief Musician Charles Lamar, Twenty-first Infantry, dated the 8th instant, and its accompanying petition from the members of the band of that regiment, asking that the provisions of House bill No. 5944, "to reorganize the band of the United States Military Academy," may be extended so as to apply to the regimental bands of the Army.

Very respectfully,

REDFIELD PROCTOR,
Secretary of War.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

FORT SIDNEY, NEBR., *July* 8, 1890.

SIR. I have the honor, very respectfully, to inclose herewith a petition of the Twenty-first Infantry band, who are seeking legal recognition and just remuneration at the hands of Congress. At present the Government permits each regiment in our Army to have a band, but actually recognizes one only, that at West Point. But while there is no provision made for the maintenance of regimental bands, Congress allows a chief musician, for whom special provisions are made, and the commanding officer, under certain regulations, may form a band by detailing two men from each of the companies for the purpose of being

instructed in music until they are able to play acceptably upon some one of the band instruments.

The term of service being for five years, in this time some few of the men taught have naturally made good progress and become really efficient performers. But now their term of enlistment expires, and having nothing to hope for in the way of advancement, they turn their backs upon the source whence their knowledge had been derived and make a debut in the big world outside the military post, where the prospects for the future are more alluring than in the service at $13 per month. These men can not honestly be blamed for so doing, but it bears none the less excessively hard upon the band leader, who has the mortification of constantly beholding his most promising pupils leave, while those he would willingly part with remain upon his hands. Thus the band is kept in constant unrest, and this is why our Army bands, as a rule, are so wofully deficient as musical organizations. At present we do not possess the numerical strength, neither the material, for the formation of bands worthy of the name. The regimental bands of all Europe are the pride of their nations, and only the bands of the U. S. Army are the tabooed institutions of the civilized world.

In the United States the most competent musicians are to be found out of the service. In Europe the exact opposite of this is the case. If only one-twentieth part of what has been written of the beneficent influence of music be true there is ample to furnish solid grounds for the statement that music is an indispensable necessity in the moral education of both soldier and citizen. But whether viewed from this higher moral stand-point, or the lower plane, where it is considered in the aspect of a minister to pleasure only, it must readily be obvious that music is at once an essential ornament and an indispensable requisite of Army life. With these thoughts respectfully submitted,

I am, sir,

Very respectfully, your obedient servant,

CHARLES LAMAR,
Chief Musician Twenty-first Infantry.

The SECRETARY OF WAR,
Washington, D. C.

[First indorsement.]

ADJUTANT-GENERAL'S OFFICE,
July 15, 1890.

Respectfully submitted to the Major-General Commanding the Army.

C. MCKEEVER,
Acting Adjutant-General.

[Second indorsement.]

HEADQUARTERS OF THE ARMY,
Washington, July 17, 1890.

Respectfully submitted to the Secretary of War, suggesting that a copy of this letter be sent to the Military Committee of the Senate, in connection with S. 601, Fifty-first Congress, first session, to provide for regimental bands.

J. M. SCHOFIELD,
Major-General Commanding.

The CHAIRMAN HOUSE COMMITTEE ON MILITARY AFFAIRS,
Washington, D. C. (Through War Department.)

The undersigned members of the Twenty-first Infantry Band, U. S. Army, earnestly and respectfully petition that the bill prepared by your committee to reorganize the band of the Military Academy be extended so as to apply to the regimental bands in the service.

Charles Lamar, John Bergeman, Wm. Fritz, Charles Roth, Fred. A. Coan, Albert Schwat, Peter Walst, Peter Costello, John Peisl, Herman Kruse, William Steeber, Carl Wieland, Rudolf Remmler, Henry Downs, Gustav Pruefer, George Schellkopt, Johann Mayer, Jesse F. Roberts, Charles E. Martin, Franz H. W. Eck.

I fully concur with the members of the band of the Twenty-First Infantry in above petition.

HENRY A. MORROW,
Colonel Twenty-first Infantry.

(The House Committee on Military Affairs has prepared a substitute for H. R. 5944, to reorganize the band of the Military Accademy. The bill provides for one leader with assimilated rank and pay of a second lieutenant of cavalry, ten men of the first class at $34 per month, twenty men of the second class at $20 per month, and one sergeant-major at $34 per month.)

O

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 447.

CLAIM OF JAMES H. SAVILLE.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A copy of a communication from the Commissioners of the District of Columbia in relation to a judgment of the Court of Claims in favor of James H. Saville for $1,260.

JULY 19, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT, *July* 18, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of a communication from the Commissioners of the District of Columbia of the 16th instant, in relation to a judgment of the Court of Claims in favor of James H. Saville for $1,260 for services as referee in the case of Matthew J. Laughlin *vs.* District of Columbia, which requires an appropriation for payment thereof under the title "Payment of referees, Court of Claims, District of Columbia," act June 16, 1880 (21 Stat., p. 285).

Respectfully yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

OFFICE OF THE COMMISSIONERS, DISTRICT OF COLUMBIA,
Washington, July 16, 1890.

SIR: Referring to number 5535 from your office, respecting the claim of J. H. Saville for $1,260 for services as referee in the case of M. J. Laughlin *vs.* the District of Columbia, the Commissioners have to state that, as they reported to your Department on the 1st instant, they have applied to the payment of the claim of Daniel Donovan the $380 reported as then being to the credit of the appropriation for the payment of referees of the Court of Claims.

They inclose herewith certificate of the Court of Claims of the aforesaid award to Mr. Saville, for such use as it may be to your department in acting upon the request of Mr. Saville's attorney that the amount of such indebtedness to him be reported to Congress for incorporation in the current deficiency bill.

Respectfully,

J. W. DOUGLASS,
President Board of Commissioners, District of Columbia.

HON. WILLIAM WINDOM,
Secretary of the Treasury.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 448.

CLAIM OF THE STATE OF MISSOURI UNDER PUBLIC ACT NO. 72.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A copy of the report of the Third Auditor, of the amount found due the State of Missouri, (namely, $996.37), in pursuance of an act of Congress, Public No. 72, approved April 17, 1890.

JULY 21, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
July 19, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of the report of the Third Auditor, of this date, of the amount found due the State of Missouri under the provisions of the act of Congress approved April 17, 1890—public act No. 72.

Respectfully, yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE,
Washington, D. C., July 19, 1890.

SIR: The act of Congress approved April 17, 1890, directed the Secretary of the Treasury to cause an examination of certain claims of the State of Missouri, and to report to Congress at the earliest practicable day the result of the examination, and the amount, if anything, due the State upon such claims. I now transmit a copy of the report made by me to the Second Comptroller upon said claims, and a copy of his finding concurring in the report—the amount so found due the State being $996.37.

Very respectfully,

W. H. HART,
Auditor.

Hon. WILLIAM WINDOM,
Secretary of the Treasury.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE,
June 26, 1890.

In pursuance of an act of Congress, Public No. 72, approved April 17, 1890, providing for an examination of a claim of the State of Missouri for re-imbursement of moneys expended by it since 1862, for military services rendered by officers and enlisted men of the Missouri militia in the suppression of the rebellion 1861–'65, I certify that there is due from the United States to the State of Missouri the sum of $996.37, as will appear as follows.

The claim consists of six vouchers:

Vou. 2.	Jas. M. Hutchinson, 2nd lt., "B," 6th Pro. En. Mo. Militia, services, Oct. 31, 1863, to July 31, 1864	$852.15
5.	Franklin Carrier, prt., "M," 2nd Pro. En. Mo. Militia, services, July 1, 1863, to Oct. 28, 1863	83.20
7.	Wm. A. Rogers, prt., "L," 62nd En. Mo. Militia, services, Aug. 30, 1864, to Oct., 12, 1864	2.25
9.	James Crites, prt., "D," 56th En. Mo. Militia, services, Oct. 1, 1862, to May 15, 1863	7.15
11.	Sam'l Foster, prt., "H," 60th En. Mo. Militia, services, June 23, 1863, to Aug. 5, 1863	39.35
12.	Marcus Morton, prt., "M," 2nd Pro. En. Mo. Militia, services, Aug. 1, 1863, to Oct. 5, 1863	12.27
	Total	996.37

It is needless in this connection to rehearse the history of the militia of Missouri. It is sufficient to say that it was organized for State service; served in the State during the war, but was never mustered into the service of the United States, and that by act of April 17, 1866, Congress authorized re-imbursement to the State for moneys expended in enrolling, equipping, and provisioning this force employed in aiding United States forces in suppressing the rebellion. The records show that between $6,000,000 and $7,000,000 have already been paid Missouri by authority of said act.

The names of the foregoing militiamen are all borne on the proper pay-rolls of their respective organizations, but they did not receive pay for their services until 1883, when payment was made by the State. It is not explained why they were not paid with others at the time the service was performed.

Reports by the Third Auditor accompany the vouchers showing the time each man was engaged in active service as gathered from the rolls. In these reports the Auditor also says that no evidence of payment by the State to the soldiers appears in the claims of Missouri on file in his office. I have examined the rolls and find the facts to be as stated.

The cases above enumerated are now presented by the governor of Missouri as being, and evidently are. those which said act directed the Secretary of the Treasury to cause to be examined, and to make report thereon to Congress.

All the papers are herewith transmitted for such action as you may deem proper.

W. H. HART,
Auditor.

HON. SECOND COMPTROLLER.

SECOND COMPTROLLER'S OFFICE,
July 16, 1890.

I admit and certify that there appears to be due from the United States to the State of Missouri a balance of $996.37 under the act of April 17, 1890, as reported by the Third Auditor of the Treasury.

B. F. GILKESON,
Comptroller.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE,
July 19, 1890.

I certify that the foregoing are true copies of the originals, on file in this office.

W. H. HART,
Auditor.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 449

CLAIM OF GEORGE C. FOULK.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A communication from the Secretary of State, submitting for an appropriation the claim of George C. Foulk, late a lieutenant in the United States Navy and naval attaché to the legation of the United States at Seoul, Corea.

JULY 23, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
July 23, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, a communication from the Secretary of State of the 19th instant, submitting for an appropriation the claim of George C. Foulk, late a lieutenant in the United States Navy and naval attaché to the legation of the United States at Seoul, Corea.

Respectfully yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF STATE,
Washington, July 19, 1890.

SIR: I have the honor to transmit herewith a draught of a proposed amendment to the pending general deficiency bill for the relief of George C. Foulk, late a lieutenant of the junior grade in the United States Navy.

Mr. Foulk, at the time an ensign in the Navy and in the line of promotion, was, on the 12th of November, 1883, designated by the President as naval attaché to the legation of the United States at Seoul, Corea. On the 22d of December, 1884, he was by force of circumstances over which he had no directing control and by reason of his availability and competency, placed in charge of the legation upon the departure from Seoul of the minister, General Foote.

Mr. Foulk remained in charge until the 12th of June, 1886. On the 14th of May, 1885, he was instructed by the Secretary of State that from and after the departure of General Foote from Seoul he was entitled to draw upon this Department for compensation as chargé d'affaires *ad interim* at one-half of the salary of the minister, namely, $2,500 per annum, and for the contingent expenses of the legation in like manner at the rate of $3,000 per annum, which included the salary of an interpreter; and he was further advised at the same time that his salary as chargé was in lieu of the amount due him as an officer in the United States Navy. Accordingly his salary as an officer of the Navy for the period I have indicated and in the sum of $2,210.96, was withheld. On the 13th of June, 1886, Mr. Foulk was relieved, and thereupon proceeded, in ill health, to Japan, whence, about two months later, he was peremptorily ordered to return to Seoul and again take charge of the legation in his former capacity. He arrived there and took charge on the 1st of September, 1886, and remained as chargé d'affaires until the 11th of the following December, during which period his pay as an officer of the Navy, amounting to $419.18, was again withheld upon the ground, as stated by the Fourth Auditor of the Treasury, that no person could hold two offices not compatible and receive the compensation provided by law for each at the same time.

I dissent from that ruling, and in this relation I have the honor to invite your attention to the case of the United States against Saunders, reported in vol. 120, United States Supreme Court Reports, pp. 126–130, which was a case on appeal from the Court of Claims, January, 1887, and in which the opinion of the Supreme Court was expressed in the following language:

> We are of opinion that, taking these sections altogether [sections 1763, 1764, and 1765, Revised Statutes of the United States], the purpose of this legislation was to prevent a person holding an office or appointment, for which the law provides a definite compensation by way of salary or otherwise, which is intended to cover all the services which, as such officer, he may be called upon to render, from receiving extra compensation, additional allowances, or pay for other services which may be required of him either by act of Congress or by order of the head of his Department, or in any other mode, added to or connected with the regular duties of the place which he holds, but that they have no application to the case of two distinct offices, places, or employments, each of which has its own duties and its own compensation, which offices may both be held by one person at the same time. In the latter case, he is in the eye of the law two officers, or holds two places or appointments, the functions of which are separate and distinct, and, according to all the decisions, he is in such case entitled to recover the two compensations. In the former case, he performs the added duties under his appointment to a single place, and the statute has provided that he shall receive no additional compensation for that class of duties unless it is so provided by special legislation.

I am informed that the accounting officers of the Treasury do not regard the opinion in the Saunders case as applicable to the case of Mr. Foulk, again alleging as a reason the "incompatibility" of the two offices he held. But I do not find that the honorable court considered the question of compatibility as at all essential to the conclusions reached, and I am inclined to regard the opinion as clearly, if not peculiarly applicable to the case of Mr. Foulk. There is, however, another and parallel view of the matter to which I have the honor to invite your attention.

Section 1686, Revised Statutes of the United States, provides that—

> When to any diplomatic office held by any person there is superadded another, such person shall be allowed additional compensation for his services in such superadded office, at the rate of fifty per centum of the amount allowed by law for such superadded office, and for such time as shall be actually and necessarily occupied in making the transit between the two posts of duty, at the commencement and termination of the period of such superadded office, and no longer, and such superadded office shall be deemed to continue during the time to which it is limited by the terms thereof.

Mr. Foulk's functions and duties were dual. He was instructed to report both to the Navy Department and the Department of State, and he did so, as I am informed and believe, with great acceptability. Regarded as a naval officer performing the additional duties as chargé d'affaires, the opinion in the Saunders case would seem to govern his own; regarded as a diplomatic officer (naval attaché), performing the same additional duties in the office of minister, under the designation of chargé d'affaires, section 1686 of the Revised Statutes would, it appears, determine the rate of his compensation.

I have been moved to urge his apparent rights upon your attention, not only by reason of the law and equity in his case, but as well because of the peculiar hardships entailed upon him through the anomalous position he occupied under instructions from this Department, and the exigencies of the situation in Corea during the two periods of his incumbency as chargé there. He was obliged, at no desire of his own, to perform the duties and maintain the official and social status of a regularly accredited minister, but without adequate means of defraying the necessary incidental expense.

Compliance with his repeated request to the Department of State for relief (by the appointment of a minister) appears to have been unavoidably delayed. He was subject to humiliations, he was compelled to borrow money to maintain his official as well as his personal standing, and there is no doubt that, as he alleges, he suffered both physically and mentally. He was careful, prompt, and intelligent in the discharge of his duties, and the Secretary of State was glad to compliment him officially in unmistakable terms in a letter to the Secretary of the Navy dated November 1, 1887.

During both the periods in which he acted as chargé d'affaires at Seoul, Mr. Foulk was an officer of the Navy entitled to the pay of a lieutenant of the junior grade, at the rate of $1,500 per annum, through promotion by operation of law afterwards confirmed by an examination successfully passed. He has since resigned from the Navy.

The Department will be obliged if you will immediately bring this request to the attention of Congress, to the end that the appropriation asked for may be included, if possible, in the pending deficiency bill.

I have the honor to be, sir, your obedient servant,

ALVEY A. ADEE,
Acting Secretary.

The SECRETARY OF THE TREASURY.

DRAUGHT OF PROPOSED AMENDMENT TO THE GENERAL DEFICIENCY BILL.

[For the payment of $2,630.14 salary to George C. Foulk, as a lieutenant junior grade in the United States Navy, from December 22, 1884, to June 12, 1886, inclusive, and from September 1, 1886, to December 11, 1886, inclusive, and not heretofore paid.]

That the proper accounting and disbursing officers of the Treasury be, and they are hereby, authorized and directed to audit and pay, upon presentation of a proper account and vouchers, to George C. Foulk, late a lieutenant of the junior grade in the Navy of the United States, the sum of two thousand six hundred and thirty dollars and fourteen cents, salary as such lieutenant at the rate of one thousand five hundred dollars per annum, for a period from the twenty-second day of December, eighteen hundred and eighty-four, to the twelfth day of June, eighteen hundred and eighty-six, inclusive, and for an additional period from the first day of September, eighteen hundred and eighty-six, to the eleventh day of December, eighteen hundred and eighty-six, inclusive, not heretofore paid; and that the said sum of two thousand six hundred and thirty dollars and fourteen cents be, and the same is hereby, appropriated for the purpose out of any moneys in the Treasury not otherwise appropriated.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 450.

SEAL FISHERIES OF BEHRING SEA.

MESSAGE

FROM THE

PRESIDENT OF THE UNITED STATES,

TRANSMITTING

A letter from the Secretary of State, with accompanying papers, touching the subjects in dispute between the Government of the United States and the Government of Great Britain in the Behring Sea, including all communications since March 4, 1889.

JULY 23, 1890.—Referred to the Committee on Foreign Affairs.

To the House of Representatives:

In response to the resolution of the House of Representatives, requesting me, if in my judgment not incompatible with the public interest, to furnish to the House the correspondence since March 4, 1889, between the Government of the United States and the Government of Great Britain touching the subjects in dispute in the Behring Sea, I transmit a letter from the Secretary of State which is accompanied by the correspondence referred to in the resolution.

BENJ. HARRISON.

EXECUTIVE MANSION,
July 23, 1890.

BAR HARBOR, MAINE, *July* 19, 1890.

To the PRESIDENT:

The official correspondence between the Government of the United States and the Government of Great Britain,—touching the seal fisheries of Behring Sea,—whose transmission to the House of Representatives you directed on the 11th instant, is herewith submitted. All communications since March 4, 1889, are included. A map will accompany my dispatch of June 30, 1890. I sincerely regret the delay in transmission. The correspondence is still in progress.

I am, sir, with great respect, your obedient servant,

JAMES G. BLAINE.

No. 1.

Mr. Edwardes to Mr. Blaine.

BAR HARBOR, *August* 24, 1889.

SIR: In accordance with instructions which I have received from Her Majesty's Principal Secretary of State for Foreign Affairs, I have the honor to state to you that repeated rumors have of late reached Her Majesty's Government that United States cruisers have stopped, searched, and even seized British vessels in Behring Sea outside of the 3-mile limit from the nearest land. Although no official confirmation of these rumors has reached Her Majesty's Government there appears to be no reason to doubt their authenticity.

I am desired by the Marquis of Salisbury to inquire whether the United States Government are in possession of similar information, and further to ask that stringent instructions may be sent by the United States Government, at the earliest moment, to their officers, with the view to prevent the possibility of such occurrences taking place.

In continuation of my instructions I have the honor to remind you that Her Majesty's Government received very clear assurances last year from Mr. Bayard, at that time Secretary of State, that pending the discussion of the general questions at issue no further interference should take place with British vessels in Behring Sea.

In conclusion, the Marquis of Salisbury desires me to say that Sir Julian Pauncefote, Her Majesty's Minister, will be prepared on his return to Washington in the autumn to discuss the whole question, and Her Majesty's Government wish to point out to the United States Government that a settlement can not but be hindered by any measures of force which may be resorted to by the United States.

I have, etc.,

H. G. EDWARDES.

No. 2.

Mr. Blaine to Mr. Edwardes.

BAR HARBOR, *August* 24, 1889.

SIR: I have the honor to acknowledge the receipt of your communication of this date, conveying to me the intelligence "that repeated rumors have of late reached Her Majesty's Government that United States cruisers have stopped, searched, and even seized British vessels in Behring Sea outside the 3-mile limit from the nearest land." And you add that, "although no official confirmation of these rumors has reached Her Majesty's Government, there appears to be no reason to doubt their authenticity."

In reply I have the honor to state that the same rumors, probably based on truth, have reached the Government of the United States, but that up to this date there has been no official communication received on the subject.

It has been and is the earnest desire of the President of the United States to have such an adjustment as shall remove all possible ground of misunderstanding with Her Majesty's Government concerning the existing troubles in the Behring Sea; and the President believes that the responsibility for delay in the adjustment can not be properly charged to the Government of the United States.

I beg you will express to the Marquis of Salisbury the gratification with which the Government of the United States learns that Sir Julian Pauncefote, Her Majesty's minister, will be prepared, on his return to Washington in the autumn, to discuss the whole question. It gives me pleasure to assure you that the Government of the United States will endeavor to be prepared for the discussion, and that in the opinion of the President, the points at issue between the two governments are capable of prompt adjustment on a basis entirely honorable to both.

I have, etc.,

JAMES G. BLAINE.

No. 3.

Mr. Edwardes to Mr. Blaine.

BAR HARBOR, *August* 25, 1889.

SIR: I had the honor to receive yesterday your note in which you have been good enough to inform me, with respect to the repeated rumors which have of late reached Her Majesty's Government of the search and seizure of British vessels in Behring Sea by United States cruisers, that the same rumors, probably based on truth, have reached

the United States Government, but that up to this date there has been no official communication received on the subject.

At the same time you have done me the honor to inform me that it has been and is the earnest desire of the President of the United States to have such an adjustment as shall remove all possible ground of misunderstanding with Her Majesty's Government concerning the existing troubles in the Behring Sea; and that the President believes that the responsibility for delay in that adjustment can not be properly charged to the Government of the United States.

You request me at the same time to express to the Marquis of Salisbury the gratification with which the Government of the United States learns that Sir Julian Pauncefote, Her Majesty's minister, will be prepared on his return to Washington in the autumn to discuss the whole question, and you are good enough to inform me of the pleasure you have in assuring me that the Government of the United States will endeavor to be prepared for the discussion, and that, in the opinion of the President, the points at issue between the two Governments are capable of prompt adjustment on a basis entirely honorable to both.

I shall lose no time in bringing your reply to the knowledge of Her Majesty's Government, who, while awaiting an answer to the other inquiry I had the honor to make to you, will, I feel confident, receive with much satisfaction the assurances which you have been good enough to make to me in your note of yesterday's date.

I have, etc.,

H. G. EDWARDES.

No. 4.

Mr. Edwardes to Mr. Blaine.

WASHINGTON, *September* 12, 1889.

MY DEAR MR. BLAINE: I should be very much obliged if you would kindly let me know when I may expect an answer to the request of Her Majesty's Government, which I had the honor of communicating to you in my note of the 24th of August, that instructions may be sent to Alaska to prevent the possibility of the seizure of British ships in Behring Sea. Her Majesty's Government are earnestly awaiting the reply of the United States Government on this subject, as the recent reports of seizures having taken place are causing much excitement both in England and in Canada.

I remain, etc.,

H. G. EDWARDES.

No. 5.

Mr. Blaine to Mr. Edwardes.

BAR HARBOR, *September* 14, 1889.

SIR: I have the honor to acknowledge the receipt of your personal note of the 12th instant, written at Washington, in which you desire to know when you may expect an answer to the request of Her Majesty's Government, "that instructions may be sent to Alaska to prevent the possibility of the seizure of British ships in Behring Sea."

I had supposed that my note of August 24 would satisfy Her Majesty's Government of the President's earnest desire to come to a friendly agreement touching all matters at issue between the two Governments in relation to Behring Sea, and I had further supposed that your mention of the official instruction to Sir Julian Pauncefote to proceed, immediately after his arrival in October, to a full discussion of the question, removed all necessity of a preliminary correspondence touching its merits.

Referring more particularly to the question of which you repeat the desire of your Government for an answer, I have the honor to inform you that a categorical response would have been and still is impracticable,—unjust to this Government, and misleading to the Government of Her Majesty. It was therefore the judgment of the President that the whole subject could more wisely be remanded to the formal discussion so near at hand which Her Majesty's Government has proposed, and to which the Government of the United States has cordially assented.

It is proper, however, to add that any instruction sent to Behring Sea at the time of your original request, upon the 24th of August, would have failed to reach those waters before the proposed departure of the vessels of the United States.

I have, etc.,

JAMES G. BLAINE.

No. 6.

The Marquis of Salisbury to Mr. Edwardes.

[Left at the Department of State by Mr. Edwardes.]

FOREIGN OFFICE, *October* 2, 1889.

SIR: At the time when the seizures of British ships hunting seals in Behring's Sea during the years 1886 and 1887 were the subjects of discussion the minister of the United States made certain overtures to Her Majesty's Government with respect to the institution of a close time for the seal fishery, for the purpose of preventing the extirpation of the species in that part of the world. Without in any way admitting that considerations of this order could justify the seizure of vessels which were transgressing no rule of international law, Her Majesty's Government were very ready to agree that the subject was one deserving of the gravest attention on the part of all the Governments interested in those waters.

The Russian Government was disposed to join in the proposed negotiations, but they were suspended for a time in consequence of objections raised by the Dominion of Canada and of doubts thrown on the physical data on which any restrictive legislation must have been based.

Her Majesty's Government are fully sensible of the importance of this question, and of the great value which will attach to an international agreement in respect to it, and Her Majesty's representative will be furnished with the requisite instructions in case the Secretary of State should be willing to enter upon the discussion.

You will read this dispatch and my dispatch No. 205, of this date, to the Secretary of State, and, if he should desire it, you are authorized to give him copies of them.

I am, etc.,

SALISBURY.

No. 7.

The Marquis of Salisbury to Mr. Edwardes.

[Left at the Department of State by Mr. Edwardes.]

FOREIGN OFFICE, *October* 2, 1889.

SIR: In my dispatch No. 176 of the 17th August last I furnished you with copies of a correspondence which had passed between this department and the colonial office on the subject of the seizure of the Canadian vessels *Black Diamond* and *Triumph* in the Behring's Sea by the United States revenue cutter *Rush*.

I have now received and transmit herewith a copy of a dispatch from the governor-general of Canada to the secretary of state for the colonies, which incloses copies of the instructions given to the special officer placed on board the *Black Diamond* by the officer commanding the *Rush*, and of a letter from the collector of customs at Victoria, together with the sworn affidavits of the masters of the two Canadian vessels.

It is apparent from these affidavits that the vessels were seized at a distance from land far in excess of the limit of maritime jurisdiction which any nation can claim by international law.

The cases are similar in this respect to those of the ships *Caroline*, *Onward*, and *Thornton*, which were seized by a vessel of the United States outside territorial waters in the summer of 1887. In a dispatch to Sir L. West dated September 10, 1887, which was communicated to Mr. Bayard, I drew the attention of the Government of the United States to the illegality of these proceedings, and expressed a hope that due compensation would be awarded to the subjects of her Majesty who had suffered from them. I have not, since that time, received from the Government of the United States any intimation of their intentions in this respect, or any explanation of the grounds upon which this interference with the British sealers had been authorized. Mr. Bayard did, indeed, communicate to us unofficially an assurance that no further seizures of this character should take place pending the discussion of the questions involved between the two governments. Her Majesty's Government much regret to find that this understanding has not been carried forward into the present year, and that instructions have been issued to cruisers of the United States to seize British vessels fishing for seals in Behring's Sea outside the limit of territorial waters. The grounds upon which these violent measures have been taken have not been communicated to Her Majesty's Government, and remain still unexplained.

But in view of the unexpected renewal of the seizures of which Her Majesty's Government have previously complained, it is my duty to protest against them, and to state that, in the opinion of Her Majesty's Government, they are wholly unjustified by international law.

I am, etc.,

SALISBURY.

[Inclosure.]

Mr. Bramston to the Under-Secretary of State for Foreign Affairs.

COLONIAL OFFICE, *September* 10, 1889.

SIR: With reference to previous correspondence respecting the seizures of Canadian sealers in Behring's Sea, I am directed by Lord Knutsford to transmit to you for communication to the marquis of Salisbury a copy of a dispatch from the governor-general of the Dominion with its inclosures on the subject.

I am, etc.,

JOHN BRAMSTON.

[Inclosure 2.]

Lord Stanley of Preston to Lord Knutsford.

CITADEL, QUEBEC, *August* 26, 1889.

MY LORD: With reference to previous correspondence respecting the seizure of the *Black Diamond* and the detention of the *Triumph* in Behring Sea, I have the honor to forward herewith a copy of an approved minute of the privy council submitting copies of the instructions given to the special officer placed on board the *Black Diamond* by the captain of the United States revenue cutter *Rush*, and of a letter from the collector of customs at Victoria, together with the affidavits of the masters of the two vessels.

I have, etc.,

STANLEY OF PRESTON.

[Inclosure 3.]

Certified copy of a report of a committee of the honorable the privy council, approved by his excellency the governor-general in council, on the 22d of August, 1889.

On a report dated the 13th of August, 1889, from the minister of marine and fisheries, submitting, in reference to the seizure in the Behring sea of the schooner *Black Diamond* and the boarding of the schooner *Triumph*, the original instructions given to the special officer placed by the captain of the United States revenue cutter *Rush* on board the *Black Diamond* at the time of the latter's seizure, and also a letter from the honorable Mr. W. Hamley, collector of customs at Victoria, British Columbia, together with the following affidavits:

1. Affidavit of Owen Thomas, of Victoria, British Columbia, master of the British sealing schooner *Black Diamond*.

2. Affidavit of Daniel McLean, of Victoria, British Columbia, master of the British sealing schooner *Triumph*.

The minister recommends that copies of the inclosures herewith be immediately forwarded for the information of Her Majesty's Government.

The committee concurring advise that your excellency be moved to forward this minute, together with copies of the inclosures, to the right honorable the secretary of state for the colonies.

All of which is respectfully submitted.

JOHN J. MCGEE,
Clerk Privy Council

[Inclosure 4.]

Captain Shepard to Mr. Hankanson.

U. S. REVENUE STEAMER RUSH, BEHRING SEA,
Latitude 56° 22′ *N., longitude* 170° 25′ *W., July* 11, 1889.

SIR: You are hereby appointed a special officer, and directed to proceed on board the schooner *Black Diamond*, of Victoria, British Columbia, this day seized for violation of law (Section 1956, Revised Statutes of the United States), and assume charge of the said vessel, her officers and crew, twenty-five in number, all told, excepting the navigation of the vessel, which is reserved to Capt. Owen Thomas, and which you will not interfere with unless you become convinced that he is proceeding to some other than your port of destination, in which event you are authorized to assume full charge of the vessel. Everything being in readiness, you will direct Capt. Owen Thomas to make the best of his way to Sitka, Alaska, and upon ar rival at that port you will report in person to the United States district attorney for the district of Alaska, and deliver to him the letter so addressed, the schooner *Black Diamond*, of Victoria, British Columbia, her outfit, and the persons of Capt. Owen Thomas and Mate Alexander Galt, and set her crew at liberty. After being relieved of the property and persons entrusted to your care, you will await at Sitka the arrival of the *Rush*.

Very respectfully, etc.

L. G. SHEPARD,
Captain U. S. Revenue Steamer Rush.

[Inclosure 5.]

Mr. Hamley to the Minister of Customs.

CUSTOM-HOUSE, *Victoria, August* 5, 1889.

SIR: I forward herewith, in original, the orders given by Captain Shepard, of the United States revenue cutter *Rush*, to J. Hankanson, special officer, to proceed on board the British schooner *Black Diamond*, seized in Behring Sea, and to take her to Sitka. The master of the schooner reports to me that the Indians employed as hunters in the schooner would, he believes, have murdered Hankanson if an attempt had been made to take her to Sitka. The master got out of the sea and sailed at once for Victoria without any opposition on the part of Hankanson, and I think it is very probable that the orders given him privately by the captain of the *Rush* were not to interfere in any way with the destination of the vessel.

She arrived here on Saturday evening, the 3d of August. The object of the revenue cutter was no doubt attained in taking her skins, rifles, and Indian spears away and sending the vessel out of Behring Sea. Her certificate of registry was also taken away. Shall I give her a fresh certificate?

I have, etc.,

W. HAMLEY.

[Inclosure 6.]

Declaration of Owen Thomas.

In the matter of the seizure of the sealing schooner Black Diamond by the United States revenue cutter Richard Rush on the 11*th day of July*, 1889.

I, Owen Thomas, of the city of Victoria, British Columbia, master mariner, do solemnly and sincerely declare that:

1. I am a master mariner and was, at the time of the occurrences hereinafter mentioned and still am, the master of the schooner *Black Diamond*, of the port of Victoria, British Columbia.

2. On the 11th day of July, 1889, whilst I was on board and in command of the said schooner, and she being then on a sealing expedition, and being in latitude 56° 22′ north, and longitude 170° 25′ west, and at a distance of about 35 miles from land, the United States revenue cutter *Richard Rush* overhauled the said schooner, and having hailed her by shouting a command which I could not distinctly hear, steamed across the bows of said schooner, compelling her to come to. A boat was then lowered from the said cutter and Lieutenant Tuttle and five other men from the United States vessel came aboard the said schooner. I asked the lieutenant what he wanted, and on his stating he wished to see the ship's papers, I took him down to my cabin and showed them to him. He then commanded me to hand the papers over to him; this I refused to do and locked them up in my locker.

At this time there were 131 seal-skins aboard the schooner, 76 of which had been salted and 55 of which were unsalted, and Lieutenant Tuttle ordered his men to bring up the skins and to take the salted ones on board the *Richard Rush*. The cutter's men accordingly transferred all of the salted skins from my schooner to the *Richard Rush* and also took aboard the cutter two sacks of salt and a rifle belonging to the schooner. Lieutenant Tuttle then again demanded me to give up the ship's papers and told me that if I would not give them up he would take them by force. As I still declined to part with them he signaled to the cutter and a boat came off with the master-at-arms, who came on board the schooner. Lieutenant Tuttle asked me for the keys of the locker, so that he might get the papers, and upon my refusing to give them to him he ordered the master-at-arms to force open the locker. The master-at-arms then unscrewed the hinges of the locker, took out the ship's papers, and handed them to Lieutenant Tuttle. Lieutenant Tuttle then returned to the *Richard Rush* and came back to the schooner again, bringing on board with him one whose name I have since heard to be John Hawkinson and who I believe to be a quartermaster of the *Richard Rush*. Lieutenant Tuttle then told me to take the schooner to Sitka. I told him that I would not go unless he put a crew on board to take the schooner there. He gave Hawkinson directions to take the ship to Sitka and gave him letters to give to the United States authorities on arrival.

Lieutenant Tuttle before leaving my schooner ordered twenty Indian spears which were aboard for sealing purposes to be taken on to the *Richard Rush*. I asked the lieutenant to give me a receipt for the papers, skins, etc., he had taken; this he refused to do, and he then returned to the *Richard Rush*, taking the said spears with him

and leaving the man Hawkinson in charge of the schooner; shortly afterwards the cutter steamed away without returning the ship's papers, seal skins, and other goods before mentioned.

After the departure of the United States vessel, I directed my course to Ounalaska, hoping to meet with an English man-of-war. We arrived there on the 15th of July. My crew at this time consisted of a mate, Alexander Gault, two white seamen, deck hands, and a white cook and twenty Indians. The Indians, thinking we were going to Sitka, became mutinous, and told me the best thing I could do to avoid trouble was to take the schooner home; they also warned the other white men on board that if they thought I meant to take the schooner to Sitka they would throw us all overboard.

There being no man-of-war at Ounalaska, I left there and directed my course to Victoria, and arrived at that port at about 7 p. m. on Saturday, the 3d of August last, having on board the said John Hawkinson, who during the cruise to Victoria had not tried to give me any directions or made any suggestions as to the course to be taken by the schooner. On arrival at Victoria, Hawkinson was put on shore by one of my boats.

And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the oaths ordinance 1869.

OWEN THOMAS.

Declared at the city of Victoria, British Columbia, the 7th day of August, 1889, before me,

ERNEST V. BODWELL,
A Notary Public for the Province of British Columbia.

[Inclosure 7.]

Affidavit of Daniel McLean.

I, Daniel M'Lean, of the city of Victoria, in the province of British Columbia, Dominion of Canada, being duly sworn, depose as follows:

That I am master and part owner of the British schooner *Triumph*, registered at the port of Victoria, British Columbia; that in conformity with the laws of the Dominion of Canada I regularly cleared the said schooner *Triumph* for a voyage to the North Pacific Ocean and Behring Sea, and that in pursuance of my legitimate business did enter the said Behring Sea on 4th day of July, 1889, and did in a peaceful manner proceed on my voyage, and being in latitude 56° 05′ north, longitude 171° 23′ west, on the 11th day of July, 1889, at the hour of 8.30 a. m., was hailed by commander of the United States revenue cutter *Richard Rush*, the said revenue cutter being a vessel belonging to the Government of the United States and regularly commissioned by the same; a boat having been lowered by officer and crew, I was boarded by the same.

The officer in charge of the boat being one Lieutenant Tuttle, who demanded the official papers of my vessel, and after reading the same proceeded to search my vessel for seals, and finding no evidence of the same, informed me that orders had been issued by the Secretary of the United States under the proclamation of the President, instructing the commanding officer of the said revenue cutter *Rush* to seize all vessels found sealing in Behring Sea; he also told me that should he again board me and find seal skins on board he would seize and confiscate the vessel and catch; he furthermore informed me that he had already seized the British schooner *Black Diamond*, of Victoria, British Columbia, and that she had been sent to Sitka, and that therefore, by reason of his threats and menaces, I was caused to forego my legitimate and peaceful voyage on the high seas and return to the port of my departure, causing serious pecuniary loss to myself, crew, and owners, for which a claim will be formulated and forwarded in due course. And I make this solemn affidavit, conscientiously believing the same to be true, and by virtue of the oaths ordinance 1869.

DANIEL M'LEAN,
Master of schooner Triumph.

Sworn before me this 8th August, 1889, at Victoria, British Columbia.

G. MORRISON, J. P.,
A Justice of the Peace for the Province of British Columbia.

No. 8.

Mr. Edwardes to Mr. Blaine.

BRITISH LEGATION,
Washington, October 14, 1889.

MY DEAR MR. BLAINE: When I had the honor to read to you on Saturday, the 12th instant, two dispatches addressed to me by the Marquis of Salisbury on the subject of the seizures of British sealers in Behring Sea, you inquired of me when I reached the passage which runs as follows, "Mr. Bayard did indeed communicate to us, unofficially, an assurance that no further seizures of this character should take place pending the discussion of the questions involved between the two Governments," if I could tell you in what way this assurance was unofficially communicated to Her Majesty's Government. I replied that I believed it had been so communicated in a letter addressed by Mr. Bayard to Sir Lionel West, and that that letter would be found in the printed correspondence on the subject which was laid before Congress this year.

I have since learnt that the assurance which Lord Salisbury had in mind when writing the dispatch I read was not that to which I referred in my reply to you, but was an assurance communicated unofficially to his lordship by the United States minister in London, and also by Mr. Bayard to Sir Lionel West in the month of April last year.

I have, etc.,

H. G. EDWARDES.

No. 9.

Mr. Blaine to Sir Julian Pauncefote.

DEPARTMENT OF STATE,
Washington, January 22, 1890.

SIR: Several weeks have elapsed since I had the honor to receive through the hands of Mr. Edwardes copies of two dispatches from Lord Salisbury complaining of the course of the United States revenue cutter *Rush* in intercepting Canadian vessels sailing under the British flag and engaged in taking fur seals in the waters of the Behring Sea.

Subjects which could not be postponed have engaged the attention of this Department and have rendered it impossible to give a formal answer to Lord Salisbury until the present time.

In the opinion of the President, the Canadian vessels arrested and detained in the Behring Sea were engaged in a pursuit that was in itself *contra bonos mores*, a pursuit which of necessity involves a serious and permanent injury to the rights of the Government and people of the United States. To establish this ground it is not necessary to argue the question of the extent and nature of the sovereignty of this Government over the waters of the Behring Sea; it is not necessary to explain, certainly not to define, the powers and privileges ceded by His Imperial Majesty the Emperor of Russia in the treaty by which the Alaskan territory was transferred to the United States. The weighty considerations growing out of the acquisition of that territory, with all the rights on land and sea inseparably connected therewith, may be safely left out of view, while the grounds are set forth upon which this Government

rests its justification for the action complained of by Her Majesty's Government.

It can not be unknown to Her Majesty's Government that one of the most valuable sources of revenue from the Alaskan possessions is the fur-seal fisheries of the Behring Sea. Those fisheries had been exclusively controlled by the Government of Russia, without interference or without question, from their original discovery until the cession of Alaska to the United States in 1867. From 1867 to 1886 the possession in which Russia had been undisturbed was enjoyed by this Government also. There was no interruption and no intrusion from any source. Vessels from other nations passing from time to time through Behring Sea to the Arctic Ocean in pursuit of whales had always abstained from taking part in the capture of seals.

This uniform avoidance of all attempts to take fur seal in those waters had been a constant recognition of the right held and exercised first by Russia and subsequently by this Government. It has also been the recognition of a fact now held beyond denial or doubt that the taking of seals in the open sea rapidly leads to their extinction. This is not only the well known opinion of experts, both British and American, based upon prolonged observation and investigation, but the fact had also been demonstrated in a wide sense by the well-nigh total destruction of all seal fisheries except the one in the Behring Sea, which the Government of the United States is now striving to preserve, not altogether for the use of the American people but for the use of the world at large.

The killing of seals in the open sea involves the destruction of the female in common with the male. The slaughter of the female seal is reckoned as an immediate loss of three seals, besides the future loss of the whole number which the bearing seal may produce in the successive years of life. The destruction which results from killing seals in the open sea proceeds, therefore, by a ratio which constantly and rapidly increases, and insures the total extermination of the species within a very brief period. It has thus become known that the only proper time for the slaughter of seals is at the season when they betake themselves to the land, because the land is the only place where the necessary discrimination can be made as to the age and sex of the seal. It would seem, then, by fair reasoning, that nations not possessing the territory upon which seals can increase their numbers by natural growth, and thus afford an annual supply of skins for the use of mankind, should refrain from the slaughter in open sea where the destruction of the species is sure and swift.

After the acquisition of Alaska the Government of the United States, through competent agents working under the direction of the best experts, gave careful attention to the improvement of the seal fisheries. Proceeding by a close obedience to the laws of nature, and rigidly limiting the number to be annually slaughtered, the Government succeeded in increasing the total number of seals and adding correspondingly and largely to the value of the fisheries. In the course of a few years of intelligent and interesting experiment the number that could be safely slaughtered was fixed at 100,000 annually. The company to which the administration of the fisheries was intrusted by a lease from this Government has paid a rental of $50,000 per annum, and in addition thereto $2.62\frac{1}{2}$ per skin for the total number taken. The skins were regularly transported to London to be dressed and prepared for the markets of the world, and the business had grown so large that the earnings of

English laborers, since Alaska was transferred to the United States, amount in the aggregate to more than twelve millions of dollars.

The entire business was then conducted peacefully, lawfully, and profitably—profitably to the United States, for the rental was yielding a moderate interest on the large sum which this Government had paid for Alaska, including the rights now at issue; profitably to the Alaskan Company, which, under governmental direction and restriction, had given unwearied pains to the care and development of the fisheries; profitably to the Aleuts, who were receiving a fair pecuniary reward for their labors, and were elevated from semi-savagery to civilization and to the enjoyment of schools and churches provided for their benefit by the Government of the United States; and, last of all, profitably to a large body of English laborers who had constant employment and received good wages.

This, in brief, was the condition of the Alaska fur-seal fisheries down to the year 1886. The precedents, customs, and rights had been established and enjoyed, either by Russia or the United States, for nearly a century. The two nations were the only powers that owned a foot of land on the continents that bordered, or on the islands included within, the Behring waters where the seals resort to breed. Into this peaceful and secluded field of labor, whose benefits were so equitably shared by the native Aleuts of the Pribylov Islands, by the United States, and by England, certain Canadian vessels in 1886 asserted their right to enter, and by their ruthless course to destroy the fisheries and with them to destroy also the resulting industries which are so valuable. The Government of the United States at once proceeded to check this movement, which, unchecked, was sure to do great and irreparable harm.

It was cause of unfeigned surprise to the United States that Her Majesty's Government should immediately interfere to defend and encourage (surely to encourage by defending) the course of the Canadians in disturbing an industry which had been carefully developed for more than ninety years under the flags of Russia and the United States—developed in such manner as not to interfere with the public rights or the private industries of any other people or any other person.

Whence did the ships of Canada derive the right to do in 1886 that which they had refrained from doing for more than ninety years? Upon what grounds did Her Majesty's Government defend in the year 1886 a course of conduct in the Behring Sea which she had carefully avoided ever since the discovery of that sea? By what reasoning did Her Majesty's Government conclude that an act may be committed with impunity against the rights of the United States which had never been attempted against the same rights when held by the Russian Empire?

So great has been the injury to the fisheries from the irregular and destructive slaughter of seals in the open waters of the Behring Sea by Canadian vessels, that whereas the Government had allowed one hundred thousand to be taken annually for a series of years, it is now compelled to reduce the number to sixty thousand. If four years of this violation of natural law and neighbor's rights has reduced the annual slaughter of seal by 40 per cent., it is easy to see how short a period will be required to work the total destruction of the fisheries.

The ground upon which Her Majesty's Government justifies, or at least defends the course of the Canadian vessels, rests upon the fact that they are committing their acts of destruction on the high seas, viz, more than 3 marine miles from the shore-line. It is doubtful whether

Her Majesty's Government would abide by this rule if the attempt were made to interfere with the pearl fisheries of Ceylon, which extend more than 20 miles from the shore-line and have been enjoyed by England without molestation ever since their acquisition. So well recognized is the British ownership of those fisheries, regardless of the limit of the 3-mile line, that Her Majesty's Government feels authorized to sell the pearl-fishing right from year to year to the highest bidder. Nor is it credible that modes of fishing on the Grand Banks, altogether practicable but highly destructive, would be justified or even permitted by Great Britain on the plea that the vicious acts were committed more than 3 miles from shore.

There are, according to scientific authority, "great colonies of fish" on the "Newfoundland banks." These colonies resemble the seats of great populations on land. They remain stationary, having a limited range of water in which to live and die. In these great "colonies" it is, accoring to expert judgment, comparatively easy to explode dynamite or giant powder in such manner as to kill vast quantities of fish, and at the same time destroy countless numbers of eggs. Stringent laws have been necessary to prevent the taking of fish by the use of dynamite in many of the rivers and lakes of the United States. The same mode of fishing could readily be adopted with effect on the more shallow parts of the banks, but the destruction of fish in proportion to the catch, says a high authority, might be as great as ten thousand to one. Would Her Majesty's Government think that so wicked an act could not be prevented and its perpetrators punished simply because it had been committed outside of the 3-mile line?

Why are not the two cases parallel? The Canadian vessels are engaged in the taking of fur seal in a manner that destroys the power of reproduction and insures the extermination of the species. In exterminating the species an article useful to mankind is totally destroyed in order that temporary and immoral gain may be acquired by a few persons. By the employment of dynamite on the banks it is not probable that the total destruction of fish could be accomplished, but a serious diminution of a valuable food for man might assuredly result. Does Her Majesty's Government seriously maintain that the law of nations is powerless to prevent such violation of the common rights of man? Are the supporters of justice in all nations to be declared incompetent to prevent wrongs so odious and so destructive?

In the judgment of this Government the law of the sea is not lawlessness. Nor can the law of the sea and the liberty which it confers and which it protects, be perverted to justify acts which are immoral in themselves, which inevitably tend to results against the interests and against the welfare of mankind. One step beyond that which Her Majesty's Government has taken in this contention, and piracy finds its justification. The President does not conceive it possibie that Her Majesty's Government could in fact be less indifferent to these evil results than is the Government of the United States. But he hopes that Her Majesty's Government will, after this frank expression of views, more readily comprehend the position of the Government of the United States touching this serious question. This Government has been ready to concede much in order to adjust all differences of view, and has, in the judgment of the President, already proposed a solution not only equitable but generous. Thus far Her Majesty's Government has declined to accept the proposal of the United States. The President now awaits with deep interest, not unmixed with solicitude, any proposition for reasonable adjustment which Her Majesty's Gov-

ernment may submit. The forcible resistance to which this Government is constrained in the Behring Sea is, in the President's judgment, demanded not only by the necessity of defending the traditional and long-established rights of the United States, but also the rights of good government and of good morals the world over.

In this contention the Government of the United States has no occasion and no desire to withdraw or modify the positions which it has at any time maintained against the claims of the Imperial Government of Russia. The United States will not withhold from any nation the privileges which it demanded for itself when Alaska was part of the Russian Empire. Nor is the Government of the United States disposed to exercise in those possessions any less power or authority than it was willing to concede to the Imperial Government of Russia, when its sovereignty extended over them. The President is persuaded that all friendly nations will concede to the United States the same rights and privileges on the lands and in the waters of Alaska which the same friendly nations always conceded to the Empire of Russia.

I have, etc.,

JAMES G. BLAINE.

No. 10.

Sir Julian Pauncefote to Mr. Blaine.

WASHINGTON, *February* 10, 1890.

SIR: Her Majesty's Government have had for some time under their consideration the suggestion made in the course of our interviews on the question of the seal fisheries in Behring's Sea, that it might expedite a settlement of the controversy if the tripartite negotiation respecting the establishment of a close time for those fisheries which was commenced in London in 1888, but was suspended owing to various causes, should be resumed in Washington.

I now have the honor to inform you that Her Majesty's Government are willing to adopt this suggestion, and if agreeable to your Government will take steps concurrently with them to invite the participation of Russia in the renewed negotiations.

I have, etc.

JULIAN PAUNCEFOTE.

No. 11.

Mr. Blaine to Sir Julian Pauncefote.

DEPARTMENT OF STATE,
Washington, March 1, 1890.

MY DEAR SIR JULIAN: I have extracted from official documents and appended hereto a large mass of evidence, given under oath by professional experts and officers of the United States, touching the subject upon which you desired further proof, namely, that the killing of seals in the open sea tends certainly and rapidly to the extermination of the species. If further evidence is desired, it can be readily furnished.

I have, etc.

JAMES G. BLAINE.

[Inclosure.]

Memorandum.

From the official report made to the House of Representatives in 1889:

In former years fur-seals were found in great numbers on various islands of the South Pacific Ocean, but after a comparatively short period of indiscriminate slaughter the rookeries were deserted, the animals having been killed or driven from their haunts; so that now the only existing rookeries are those in Alaska, another in the Russian part of Behring Sea, and a third on Lobos Island, at the mouth of the river Plate in South America.

All these rookeries are under the protection of their several governments.

The best estimate as to the number of these animals on the Alaska rookeries places it at about 4,000,000; but a marked diminution of the numbers is noticed within the last two or three years, which is attributed by the testimony to the fact that unauthorized persons during the summers of 1886, 1887, and 1888 had fitted out expeditions and cruised in Alaskan waters, and by the use of fire-arms destroyed hundreds of thousands of these animals without regard to age or sex.

The law prohibits the killing of fur seals in the Territory of Alaska or the waters thereof, except by the lessee of the seal islands, and the lessee is permitted to kill during the months of June, July, September, and October only; and is forbidden to kill any seal less than one year old, or any female seal, "or to kill such seals at any time by the use of fire-arms, or by any other means tending to drive the seals away from those islands." (Revised Statutes, section 1960.)

Governor Simpson, of the Hudson Bay Company, in his "Overland Journey Round the World," 1841–'42, p. 130, says:

"Some twenty or thirty years ago there was a most wasteful destruction of the seal, when young and old, male and female, were indiscriminately knocked in the head. This imprudence, as any one might have expected, proved detrimental in two ways. The race was almost extirpated, and the market was glutted to such a degree, at the rate for some time of 200,000 skins a year, that the prices did not even pay the expenses of carriage. The Russians, however, have now adopted nearly the same plan which the Hudson Bay Company pursues in recruiting any of its exhausted districts, killing only a limited number of such males as have attained their full growth, a plan peculiarly applicable to the fur-seal, inasmuch as its habits render a system of husbanding the stock as easy and certain as that of destroying it."

In the year 1800 the rookeries of the Georgian Islands produced 112,000 fur-seals. From 1806 to 1823, says the Encyclopædia Britannica, "The Georgian Islands produced 1,200,000 seals, and the island of Desolation has been equally productive." Over 1,000,000 were taken from the island of Mas-á-Fuera and shipped to China in 1798–'99. (Fanning's "Voyages to the South Sea," p. 299.)

In 1820 and 1821 over 300,000 fur-seals were taken at the South Shetland Islands, and Captain Weddell states that at the end of the second year the species had there become almost exterminated. In addition to the number killed for their furs, he estimates that "not less than 100,000 newly born young died in consequence of the destruction of their mothers." (See Elliott's Rep., 1884, p. 118.)

In 1830 the supply of fur-seals in the South Seas had so greatly decreased that the vessels engaged in this enterprise "generally made losing voyages, from the fact that those places which were the resort of seals had been abandoned by them." (Fanning's Voyages, p. 487.)

At Antipodes Island, off the coast of New South Wales, 400,000 skins were obtained in the years 1814 and 1815.

Referring to these facts, Professor Elliott, of the Smithsonian Institution, in his able report on the Sea Islands, published by the Interior Department in 1884, says:

"This gives a very fair idea of the manner in which the business was conducted in the South Pacific. How long would our sealing interests in Behring Sea withstand the attacks of sixty vessels carrying from twenty to thirty men each? Not over two seasons. The fact that these great southern rookeries withstood and paid for attacks of this extensive character during a period of more than twenty years speaks eloquently of the millions upon millions that must have existed in the waters now almost deserted by them."

Mr. R. H. Chapel, of New London, Conn., whose vessels had visited all the rookeries of the South Pacific, in his written statement before the Committee on Commerce of the House of Representatives, said:

"As showing the progress of this trade in fur-seal skins, and the abuses of its prosecution, resulting in almost total annihilation of the animals in some localities, it is stated on good authority that, from about 1770 to 1800, Kerguelen Land, in the Indian Ocean, yielded to the English traders over 1,000,000 skins: but open competition swept off the herds that resorted there, and since the latter year hardly 100 per annum

could be obtained on all its long coast. Afterwards, Mas-á-Fuera Island, near Juan Fernandez, was visited, and 50,000 a year were obtained; but as every one that desired was free to go and kill, the usual result followed—the seals were exterminated at that island, and also at the Galapagos group, near by.

"Falkland and Shetland Islands, and South American coasts, near Cape Horn, came next in order; here the seal were very abundant. It is stated that at the Shetlands alone 100,000 per annum might have been obtained and the rookeries preserved, if taken under proper restrictions; but in the eagerness of men they killed old and young, male and female; little pups a few days old, deprived of their mothers, died by thousands on the beaches, carcasses and bones strewed the shores, and this productive fishery was wholly destroyed. It is estimated that in the years 1821 and 1822 no less that 320,000 of these animals were killed at the Shetlands alone. An American captain, describing in after years his success there, says: 'We went the first year with one vessel and got 1,200; the second year with two vessels, and obtained 30,000; the third year with six vessels, getting only 1,700—all there was left.'

"A small rookery is still preserved at the Lobos Islands, off the river La Plata; this, being carefully guarded under strict regulations by the Government of Buenos Ayres, and rented to proper parties, yields about 5,000 skins per annum. As late as the year 1854, a small island, hardly a mile across, was discovered by Americans in the Japan Sea, where about 50,000 seals resorted annually. Traders visited it, and in three years the club and knife had cleaned them all off. Not 100 a season can now be found there."

Hon. C. A. Williams of Connecticut, who inherited the whaling and sealing business from his father and grandfather, speaking of the seal in the South Pacific, gave the following testimony before the Congressional committee:

The history of sealing goes back to about 1790, and from that to the early part of this century.

In the earlier period of which I speak there were no seals known in the North Pacific Ocean. Their peculiar haunt was the South Atlantic. They were discovered by Cook, in his voyages, on the island of Desolation; by Widdall, in his voyages to the south pole, on the island of South Georgia and Sandwichland; and by later voyagers, whose names escape me, in the islands of the South Pacific Ocean. When the number of seals on those islands were first brought to the notice of British merchants, they pursued the hunting of these animals on the island of Desolation.

The most authentic authority we have about the matter is derived from reports made by these voyagers as to the number of seals taken from those places, and, although they are not entirely accurate, I think they are fully as accurate as could be expected, considering the lapse of time. On the island of Desolation it is estimated that 1,200,000 fur-seals were taken; from the island of South Georgia a like number were taken, and from the island of Mas-á-Fuera probably a greater number were taken. As to the Sandwichland the statistics are not clear, but there can be no doubt that over 500,000 seals were taken from that locality, and in 1820 the islands of South Shetland, south of Cape Horn, were discovered, and from these islands 320,000 fur-seals were taken in two years. There were other localities from which seals were taken, but no others where they were found in such large numbers.

* * * * * * *

The cause of the extermination of seals in those localities was the indiscriminate character of the slaughter. Sometimes as many as fifteen vessels would be hanging around these islands awaiting opportunity to get their catch, and every vessel would be governed by individual interests. They would kill every thing that came in their way that furnished a skin, whether a cow, a bull, or a middle-grown seal, leaving the young pups just born to die from neglect and starvation. It was like taking a herd of cattle and killing all the bulls and cows and leaving the calves. The extermination was so complete in these localities that the trade was exhausted, and voyages to those places were abandoned. About 1870, nearly fifty years after the discovery of the South Shetland Islands, when the occupation of Alaska by the cession of Russia to the United States of the Behring Sea was brought about——

The CHAIRMAN. I want to interrupt you to ask a question on that point. Were those rookeries in the South Seas never under the protectorate of any government at all?

The WITNESS. Never. I was going to say that when the cession was made by Russia to the United States of this territory, and the subject of the value of fur-seals, or the possible value, was brought to mind, people who had been previously engaged in that business revisited these southern localities after a lapse of nearly fifty years, and no seals were found on the island of Desolation. These islands have been used as the breeding place for sea-elephants, and that creature can not be exterminated on that island, for the reason that certain beaches known as "weather beaches"

are there. The sea breaks rudely upon these beaches, and it is impossible to land upon them. There are cliffs, something like 300 to 500 feet, of shore ice, and the sea-elephant finds a safe resort on these beaches, and still preserves enough life to make the pursuit of that animal worth following in a small way.

I have vessels there, and have had, myself and father, for fifty or sixty years. But this is incidental. The island of South Shetland, and the island of South Georgia, and the island of Sandwichland, and the Diegos, off Cape Horn, and one or two other minor points were found to yield more or less seal. In this period of fifty years in these localities seal life had recuperated to such an extent that there was taken from them in the six years from 1870 to 1876 or 1877 perhaps 40,000 skins.

Q. After they had been abandoned for fifty years?—A. Yes; to-day they are again exhausted. The last year's search of vessels in that region—I have the statistics here of a vessel from Stonington from the South Shetland Islands, reported in 1888, and she procured 39 skins as the total result of search on those islands and South Georgia.

One of my own vessels procured 61 skins, including 11 pups, as the total result of her voyage; and, except about Cape Horn, there are, in my opinion, no seals remaining. I do not think that 100 seals could be procured from all the localities mentioned by a close search. Any one of those localities I have named, under proper protection and restrictions, might have been perpetuated as a breeding place for seals, yielding as great a number per annum as do the islands belonging to the United States.

Now, the trade in those localities is entirely exhausted, and it would be impossible in a century to restock those islands, or bring them back to a point where they would yield a reasonable return for the investment of capital in hunting skins. That, in brief, completes the history of the fur-seal in the South Atlantic Ocean.

DANGER OF THE EXTERMINATION OF THE ALASKA ROOKERIES.

We have already mentioned that the present number of seals on St. Paul and St. George islands has materially diminished during the last two or three years. The testimony discloses the fact that a large number of British and American vessels, manned by expert Indian seal hunters, have frequented Behring Sea and destroyed hundreds of thousands of fur-seals by shooting them in the water, and securing as many of the carcasses for their skins as they were able to take on board. The testimony of the Government agents shows that of the number of seals killed in the water not more than one in seven, on an average, is secured, for the reason that a wounded seal will sink in the sea; so that for every thousand seal-skins secured in this manner there is a diminution of seal life at these rookeries of at least 7,000. Added to this is the fact that the shooting of a female seal with young causes the death of both. If the shooting is before delivery, that, of course, is the end of both; if after, the young seal dies for want of sustenance.

During the season of 1885 the number of contraband seal-skins placed on the market was over 13,000; and in 1886, 25,000; in 1887, 34,000; and in 1888 the number of illicit skins secured by British cruisers was less than 25,000, which number would have been largely increased had not the season been very stormy and boisterous. American citizens respected the law and the published notice of the Secretary of the Treasury, and made no attempt to take seals.

From this it appears that, during the last three years, the number of contraband seal-skins placed on the market amounted to over 97,000, and which, according to the testimony, destroyed nearly three-quarters of a million of fur-seals, causing a loss of revenue amounting to over $2,000,000, at the rate of tax and rental paid by the lessee of the seal islands.

LIMITATION: THE LESSEE FORBIDDEN TO KILL ANY FEMALE SEAL.

The following is an extract from the official report to Congress:

The lessee is permitted to kill 100,000 fur-seals on St. Paul and St. George Islands, and no more, and is prohibited from killing any female seal or any seal less than one year old, and from killing any fur-seal at any time except during the months of June, July, September, and October, and from killing such seals by the use of fire-arms or other means tending to drive the seals from said islands, and from killing any seal in the water adjacent to said islands, or on the beaches, cliffs, or rocks where they haul up from the sea to remain.

Further extract from report:

It is clear to your committee from the proof submitted that to prohibit seal killing on the seal islands and permit the killing in Behring Sea would be no protection; for it is not on the islands where the destruction of seal life is threatened or seals are unlawfully killed, but it is in that part of Behring Sea lying between the eastern and

western limits of Alaska, as described in the treaty of cession, through which the seals pass and repass in going to and from their feeding grounds, some 50 miles southeast of the rookeries, and in their annual migrations to and from the islands.

Extract from report of L. N. Buynitsky, agent of the Treasury in 1870, to Hon. George L. Boutwell, Secretary of the Treasury. It will be observed that this report was made in 1870, before any dispute had arisen with the Canadian sealers.

When the herd has been driven a certain distance from the shore a halt is made, and a sorting of the game as to age, sex, and condition of the fur is effected. This operation requires the exercise of a life-long experience, and is of the utmost importance, as the killing of females, which are easily mistaken for young males, even by the natives, would endanger the propagation of the species.

The same witness, when not an employé of the Treasury, gave testimony on another point in 1889:

Q. Where are those seals born? Where do the female seals give birth to their young?—A. They are born on the rookeries.

Q. Are they an animal or a fish, or what are they; how do you classify them?—A. They are hot-blooded animals born on the land; they are not a fish.

Q. And born on the United States territory, are they?—A. Yes; all those born on the islands of St. Paul and St. George.

Q. That is in United States territory?—A. Yes, sir. "Fisheries" is a misnomer all the way through, and always was.

H. A. Glidden, an agent of the Treasury Department, was on the Pribylov Islands from May, 1882, to June, 1885. In describing before the Congressional committee the mode of killing seals by the lessee of the islands the following occurred:

Q. Do they kill any females?—A. They never kill females. I do not know of but one or two instances in my experience where a female seal was ever driven out with the crowd.

* * * * * * *

Q. Do you believe seal life can be preserved without Government protection over them?—A. I do not.

W. B. Taylor, a Treasury agent, was asked the same question as to the killing of female seals, and he said that "he had never known but one or two killed by the leesee on the islands, and they by accident." He was further asked as follows:

Q. When they kill the seals in the waters, about what proportion of them do they recover?—A. I do not believe more than one-fourth of them.

Q. The others sink?—A. They shoot them and they sink.

Q. Have you ever noticed any wounded ones that came ashore that have been shot?—A. No, sir; I do not think I did.

The same witness testified as follows:

Q. You do not think, then, that the value of the seal fisheries and the seal rookeries could be preserved under an open policy?—A. No, sir; I do not. I think if you open it they will be destroyed without question.

Q. Do you think it necessary to protect the seals in the sea and down in their feeding grounds in the Pacific, if possible, in order to preserve their full value and the perpetuity of seal life? Do you think they ought to be protected everywhere as well as on the rookeries?—A. Yes, sir; I think they ought to be protected not alone on the rookeries but on the waters of the Behring Sea. I do not think it is necessary to go outside of the Behring Sea, because there is no considerable number of them.

Q. Are they so dispersed in the Pacific that they would not be liable to destruction?—A. Yes, sir; they are scattered very much, and no hunters do much hunting in the Pacific, as I understand. Another reason why they should be protected in all the waters of the Behring Sea is this: A large number of seals that are on the islands of course eat a great many fish every twenty-four hours, and the fish have become well aware of the fact that there are a good many seal on the seal islands, and they stay out a longer distance from the islands, and they do not come near the shore. It becomes necessary for the seal themselves, the cows, to go a good distance into the sea in order to obtain food, and it is there where most of the damage is done by these vessels. They catch them while they are out

Q. So on the rookeries they go out daily for food?—A. The cows go out every day for food. The bulls do not go; they stay on the island all summer. The cows go 10 and 15 miles and even farther—I do not know the average of it—and they are going and coming all the morning and evening. The sea is black with them around about the islands. If there is a little fog and they get out half a mile from shore, we can not see a vessel—100 yards even. The vessels themselves lay around the islands there where they pick up a good many seal, and there is where the killing of cows occurs when they go ashore. I think this is worse than it would be to take 25,000 more seal on the islands than are now taken. I think there is some damage done in the killing and shooting of the cows, and leaving so many young without their mothers.

Q. Is it your opinion that a larger number of seals may be taken annually without detriment to the rookeries?—A. No, sir; I would not recommend that. The time may come, but I think that one year with another they are taking all they ought to take, for this reason:

I believe that the capacity of the bull seal is limited, the same as any other animal, and I have very frequently counted from thirty to thirty-five and even, at one time, forty-two cows with one bull. I think if there were more bulls there would be less cows to one bull, and in that way the increase would be greater than now. While the number of seal in the aggregate is not apparently diminished, and in fact there is undoubtedly an increase, yet if you take any greater number of seal than is taken now, this ratio of cows to one bull would be greater, and for that reason there would be a less number of young seals, undoubtedly. I look upon the breeding of the seal as something like the breeding of any other animal, and that the same care and restriction and judgment should be exereised in this breeding.

The same witness testified as follows:

Q. What will be the effect upon the seal rookeries if this surreptitious and unlawful killing in the Behring Sea is to be permitted?—A. In my judgment it would eventually exterminate the seal.

Mr. C. A. Williams, of Connecticut, before referred to, testified as follows:

Q. I would like to know—I do not know that it is just the proper time—but I would like to get the idea of those conversant with the habits and nature of the seal as to what their opinion is upon the effect of the indiscriminate killing of them while they are coming to and going from the islands.—A. That is a question which I think most any of us here can answer. If you note the conformation of the Aleutian Islands, which form a wall, and note the gaps through which the seals come from the Pacific Ocean seeking the haunt on these islands, that is the whole point. When they come through these various passes, generally through the Oomnak Pass, the sea is reasonably shallow, and the cows come laden with pups, waiting until the last moment in the water to go ashore to deliver, because they can roll and scratch and help themselves better than if they haul out when heavy with pup, so they stay in the water playing about until their instinct warns them it is time to go ashore, and during that time they are massed in great quantities in the sea.

Q. Now, in that view of it, the destruction of them there is almost practically the same as the destruction of them on the islands?—A. Yes, sir.

Q. And the conditions are as bad?—A. Yes, sir; and often worse, for this reason: If you kill a pup you destroy a single life, but in killing a cow you not only destroy the life that may be, but the source from which life comes hereafter, and when they are killed there in the water by a shot-gun or a spear the proportion saved by the hunters is probably not one in seven. That was their own estimate: that out of eight shots they would save one seal and seven were lost. If they were killed on the land, those seven would go towards filling out their score.

The same witness also testified as follows:

Q. Have you instructed your agents to comply strictly with the laws and regulations of the Treasury Department?—A. In every case; yes.

Q. Do you kill seals with fire-arms at the islands, or do you prohibit that?—A. No, sir; never; it is not allowed by the act.

Q. Do you kill the female seals or allow them to be killed?—A. Never with our knowledge.

Q. Do you kill any during the month of August for their skins?—A. Not a seal; no.

Q. Do you kill any seals under two years old?—A. Not that we are aware of.

The same witness further testified:

Q. Now, I would like to have your opinion as to the insufficiency of the present measures taken by the Government for the protection of the rookeries, and your opinion as to whether any additional safeguards are necessary for their protection.—

A. That the present measures are somewhat insufficient is shown by the fact that for the last three or four years there have been increased depredations annually upon the rookeries. More seals are taken within the limits of the Behring Sea. Formerly seals were only taken outside of Behring Sea, as they passed up to British Columbia, and off the mouth of Puget Sound, in the waters of the Pacific Ocean. That was a legitimate place to take them, and one against which no objection could be raised. Seals which come up that way enter through the passages of the Aleutian Islands nearest to the mainland, and it has always been the custom in British Columbia and our Sound to intercept the seal and get what they could. Within the last two or three years marauders have followed them through the passages into Behring Sea, and have with guns and spears taken the seals as they lay upon the water, as I stated before, waiting to haul ashore and have their pups. The cows are heavy with pup, and they do not like to go ashore until the last moment, and so they lie there in the water, and this affords an opportunity for these marauders to shoot and spear them. This is done by gangs of Indians which they have. They hire gangs of Indians and take them with them. The effects of this shooting is not alone upon the seals which are at that point, but also upon those all around, and it startles them and raises a suspicion in their minds and there is a general feeling of disturbance, such as you notice among cattle when bears are about or something of that kind.

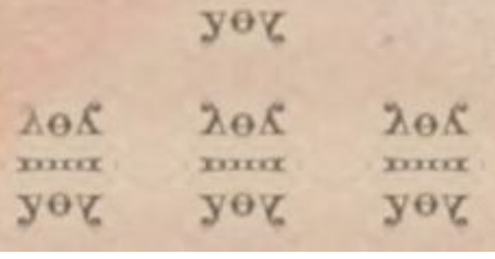
And again:

Q. Now, Mr. Williams, should it be finally ascertained and considered by our Government that under the treaty of cession by which we acquired Alaska from Russia, and under the laws of nations, the United States does possess and has absolute dominion and jurisdiction over Behring Sea and the waters of Alaska, would you think it would be a wise policy to adhere to and maintain that jurisdiction and dominion complete, or would it be wiser to declare it the high sea in the legal sense?—A. In the light of to-day I should say, keep what you have got.

Q. Hold it as a closed sea?—A. Fisheries within those limits are yet to be developed, and it would seem to be very unwise to open up possible fishery contentions which are very likely to arise by such a course.

Q. You think that it would be, then, the wiser policy, to maintain such jurisdiction and dominion as we have, and to concede to the vessels of other nations such rights as are not inconsistent with the interests which our nation has there and which need protection?—A. Exactly that; the right of transit through the sea wherever they please, but positive protection to seal life.

Q. You do not think it would be wise to grant anything else?—A. No, sir; not at all.



Q. And in no case to surrender the power of policing the sea?—A. No, sir; under no circumstances.

Q. Could that power and jurisdiction be surrendered and yet preserve this seal life on these rookeries and the value of our fisheries that may be developed there?—A. Only with very great risk; because, if that right is surrendered, and thereby the right to police the sea, the depredations that are made upon the seal wherever they may be found, wherever men thought they could carry them out without being taken in the act would be carried out. So it would be difficult in regard to the fisheries. Wherever they could kill these seals they certainly would be there, and it would be impossible to prevent them.

In the statements and statistics relative to the fur-seal fisheries, submitted by C. A. Williams, in 1888, to the Committee of Congress on Merchant Marine and Fisheries, appears the following:

Examination of the earliest records of the fur-seal fishery shows that from the date of man's recognition of the value of the fur the pursuit of the animal bearing it has been unceasing and relentless. Save in the few instances to be noted hereafter, where governments have interposed for the purpose of protecting seal life, having in view benefits to accrue in the future, the animal has been wantonly slaughtered, with no regard for age, sex, or condition. The mature male, the female heavy with young, the pup, dependent for life on the mother, each and all have been indiscriminately killed or left to die of want. This cruel and useless butchery has resulted in complete extermination of the fur-seal from localities which were once frequented by millions of the species; and, so far as these localities are concerned, has obliterated an industry which a little more enlightened selfishness might have preserved in perpetuity to the great benefit of all ranks of civilized society. Nothing less than stringent laws, with will power to enforce them against all violators, can preserve for man's benefit the remnant of a race of animals so interesting and so useful.

The most valuable "rookery," or breeding place, of these animals ever known to man is now in the possession of the United States. How it has been cared for in former years and brought to its present state of value and usefulness will be shown later on.

But the matter of its preservation and perpetuation intact is the important question of the moment, and that this question may be considered intelligently the evidence is here presented of the wanton destruction that has befallen these animals when left unprotected by the law to man's greed and selfishness, which, it is fair to say, is all that could be expected from the unlicensed hunter, whose nature seeks individual and immediate gain, with no regard for a future in which he has no assurance of personal advantage.

The following statistics are gathered from the journals of early navigators, and such commercial records as are now available are submitted:

Kerguelen Land.—An island in southern Indian Ocean, discovered about 1772. The shores of this island were teeming with fur-seal when it first became known. Between the date of its discovery and the year 1800 over 1,200,000 seal skins were taken by the British vessels from the island, and seal life thereon was exterminated.

Crozetts.—The Crozett Islands, in same ocean and not far distant, were also visited and hunted over and the seal life there totally exhausted.

Mas-á-Fuera.—An island in southern Pacific Ocean, latitude 38° 48′ south, longitude 80° 34′ west, came next in order of discovery, and from its shores in a few years were gathered and shipped 1,200,000 fur-seal skins.

Delano, chapter 17, page 306, says of Mas-á-Fuera:

"When the Americans came to this place in 1797 and began to make a business of killing seals, there is no doubt but there were 2,000,000 or 3,000,000 of them on the island. I have made an estimate of more than 3,000,000 that have been carried to Canton from thence in the space of seven years. I have carried more than 100,000 myself and have been at the place when there were the people of fourteen ships or vessels on the island at one time killing seals."

South Shetlands.—In 1821–'23 the South Shetland Islands, a group nearly south from Cape Horn, became known to the seal hunters, and in two years over 320,000 seals were killed and their skins shipped from these islands.

South Georgia.—Later still, seal were found on the island of South Georgia, South Atlantic Ocean, and from this locality were obtained over 1,000,000 of fur-seal, leaving the beaches bare of seal life.

Cape Horn.—From the coasts of South America and about Cape Horn many thousands of fur-seal have been taken, and of the life once so prolific there nothing is now left save such remnants of former herds as shelter on rocks and islets almost inaccessible to the most daring hunter.

This record shows the nearly complete destruction of these valuable animals in southern seas. Properly protected, Kerguelen Land, Mas á-Fuera, the Shetlands, and South Georgia might have been hives of industry, producing vast wealth, training-schools for hardy seamen, and furnishing employment for tens of thousands in the world's markets where skins are dressed, prepared, and distributed. But the localities were no man's land, and no man cared for them or their products save as through destruction they could be transmitted into a passing profit.

The seal life of to-day available for commercial purposes is centered in three localities:

(1) The Lobos Islands, situated in the mouth of the river La Plata, owned and controlled by the Uruguay Republic, and by that Government leased to private parties for the sum of $6,000 per annum and some stipulated charges. The annual product in skins is about 12,000. The skins are of rather inferior quality. Insufficient restrictions are placed upon the lessees in regard to the number of skins permitted to be taken annually, consequently there is some waste of life; nevertheless the measure of protection allowed has insured the preservation of the rookery, and will continue so to do.

(2) Komandorski Couplet, which consists of the islands of Copper and Behring, near the coast of Kamchatka, in that portion of Behring Sea pertaining to Russia. These islands yield about 40,000 skins per annum, of good quality, and are guarded by carefully restrictive rules as to the killing of seal, analogous to the statutes of the United States relative to the same subject. The right to take seals upon them is leased by the Russian Government to an association of American citizens, who also hold the lease of the islands belonging to the United States, and are thus enabled to control and direct the business in fur-seal skins for the common advantage and benefit of all parties in interest. These islands can hardly be said to have been "worked" at all for salted seal-skins prior to the cession of Alaska by Russia to the United States, and the United States Government now profits by the industry to the extent of the duty of 20 per cent. collected on the "dressed skins" returned to this country from the London market. From 1873 to 1887, inclusive, this return has been 121,275 skins.

(3) The Pribylov group consists of the islands of St. Paul and St. George, and is a Government reservation in that part of Behring Sea ceded to the United States by Russia, together with and a part of Alaska. So exhaustive an account of these islands and their seal life has been given by Mr. H. W. Elliott, special agent of

Treasury Department in 1874, and since intimately connected with the Smithsonian Institution, which account has been made a part of Tenth Census report, that it would be intrusive here to attempt to supplement aught, and therefore only generalizations based on said report and such statements of life and procedure on the islands to-day are presented as may be pertinent in this connection.

In an article on fur-seals, which appeared in Land and Water, July 14, 1877, Mr. Henry Lee (Englishman), F. L. S., says:

It has been stated that during a period of fifty years not less than 20,000 tons of sea-elephant's oil, worth more than £1,000,000, was annually obtained from New Georgia, besides an incalculable number of fur-seal skins, of which we have no statistics. Some idea may be had of their numbers in former years when we learn that on the island of Mas-á-Fuera, on the coast of Chili (an island not 25 miles in circumference), Captain Fanning, of the American ship *Betsy*, obtained in 1798 a full crop of choice skins and estimated that there were left on the island at least 500,000 seals. Subsequently there were taken from this island little short of a million skins. The seal catching was extensively prosecuted there for many years, the sealing fleet on the coast of Chili alone then numbering thirty vessels. From Desolation Island, also discovered by Cook, and the South Shetlands, discovered by Weddell, the number of skins taken was at least as great; from the latter alone 320,000 were shipped during the two years 1821 and 1822. China was the great market to which they were sent, and there the price for each skin was from $4 to $6. As several thousand tons of shipping, chiefly English and American, were at that time employed in fur-seal catching, the profits of the early traders were enormous.

Does the reader ask what has become of this extensive and highly remunerative southern fur trade? It has been all but annihilated by man's grasping greed, reckless improvidence, and wanton cruelty. The "woeful want" has come that "woeful waste" has made. Without thought of the future the misguided hunters persistently killed every seal that came within their reach. Old and young, male and female, were indiscriminately slaughtered, in season and out of season, and thousands of little pups not thought worth the trouble of knocking them on the head were left to die of hunger alongside the flayed and gory carcasses of their mothers. Every coast and island known to be the haunt of the seals was visited by ship after ship, and the massacre left unfinished by one gang was continued by the next comers and completed by others until, in consequence of none of the animals being left to breed, their number gradually diminished, so that they were almost exterminated, only a few stragglers remaining where millions were once found. In some places where formerly they gathered together in such densely packed crowds upon the shore that a boat's crew could not find room to land till they had dispersed them for a space with oars and boat-hooks, not one fur-seal was to be found even so long ago as 1835.

Dr. H. H. McIntyre, superintendent of the seal fisheries of Alaska for the lessees, testified before the Congressional committee as follows:

Q. What proportion of the seals shot in the water are recovered and the skins taken to market?—A. I think not more than one-fifth of those shot are recovered. Many are badly wounded and escape. We find every year embedded in blubber of animals killed upon the islands large quantities of bullets, shot, and buckshot. Last year my men brought to me as much as a double handful of lead found by them embedded in this way.

* * * * * * *

Q. I want to ask you whether or not the three-year-old seals, or many of them, which should have returned this year did not return because they had been killed?—A. That seems to be the case. The marauding was extensively carried on in 1885 and 1886, and in previous years, and of course the pups that would have been born from cows that were killed in 1885, or that perished through the loss of their mothers during that year, would have come upon the islands in 1888, and we should have had that additional number from which to make our selection this year. The deficiency this year is attributed to that cause—to the fact that the cows were killed. And I would say further that if cows are killed late in the season, *say in August*, after the pups are born, the latter are left upon the island deprived of the mother's care, and of course perish. The effect is the same whether the cows are killed before or after the pups are dropped. The young perish in either case.

* * * * * * *

Q, It being conceded that the islands are their home, and no one being interested other than the American and Russian Governments, there would be no special reason why other nations would object?—A. Only the Governments of the United States and England are interested in the Alaskan seal fisheries to any great extent. The United States is interested in it as a producer of raw material, and England as a manufact-

urer of furs. If these two nations were agreed that seal life should be protected, I think there would be no trouble in fully protecting it. It is a question of quite as much interest to England as to the United States, for she has a large number of skilled workmen and a large amount of capital engaged in this industry.

Professor Elliott, of the Smithsonian Institution, who has spent some time in scientifically examining the seal islands and the habits of the seal, thus describes the killing power of the seal hunter at sea:

His power to destroy them is also augmented by the fact that those seals which are most liable to meet his eye and aim are the female fur-seals, which, heavy with young, are here slowly nearing the land, soundly sleeping at sea by intervals, and reluctant to haul out from the cool embrace of the water upon their breeding grounds until that day, and hour even, arrives which limits the period of their gestation.

The pelagic sealer employs three agencies with which to secure his quarry, viz: He sends out Indians with canoes from his vessel, armed with spears; he uses shotguns and buckshot, rifles and balls, and last, but most deadly and destructive of all, he can spread the "gill-net" in favorable weather.

With gill-nets "underrun" by a fleet of sealers in Behring Sea, across these converging paths of the fur-seal, anywhere from 10 to 100 miles southerly from the Pribylov group, I am moderate in saying that such a fleet could utterly ruin and destroy those fur-seal rookeries now present upon the seal islands in less time than three or four short years. Every foot of that watery roadway of fur-seal travel above indicated, if these men were not checked, could and would be traversed by those deadly nets; and a seal coming from or going to the islands would have, under the water and above it, scarcely one chance in ten of safely passing such a cordon.

Open those waters of Behring Sea to unchecked pelagic sealing, then a fleet of hundreds of vessels, steamers, ships, schooners, and what not, would immediately venture into them, bent upon the most vigorous and indiscriminate slaughter of these fur-seals; a few seasons of greediest rapine, then nothing would be left of those wonderful and valuable interests of our Government which are now so handsomely embodied on the seal islands; but which, if guarded and conserved as they are to-day, will last for an indefinite time to come as objects of the highest commercial good and value to the world, and as subjects for the most fascinating biological study.

Shooting fur-seals in the open waters of the sea or ocean with the peculiar shot and bullet cartridges used involves an immense waste of seal life. Every seal that is merely wounded, and even if mortally wounded at the moment of shooting, dives and swims away instantly, to perish at some point far distant and to be never again seen by its human enemies; it is ultimately destroyed, but it is lost, in so far as the hunters are concerned. If the seal is shot dead instantly, killed instantly, then it can be picked up in most every case; but not one seal in ten fired at by the most skillful marine hunters is so shot, and nearly every seal in this ten will have been wounded, many of them fatally. The irregular tumbling of the water around the seal and the irregular heaving of the hunter's boat, both acting at the same moment entirely independent of each other, making the difficulty of taking accurate aim exceedingly great and the result of clean killing very slender.

Mr. George R. Tingle, United States Treasury agent in charge of the fur-seal islands from April, 1885, until August, 1886, testified as follows:

Q. It is Mr. McIntyre's opinion that they have not only not increased, but have decreased?—A. There has been a slight diminution of seals, probably.

Q. To what do you attribute that?—A. I think there have been more seals killed in the sea than ever before by marauders. I estimated that they secured 30,000 skins in 1887, and in order to secure that number of skins they would have had to kill half a million seals, while this company in taking 100,000 on shore destroyed only 31 seals. Those were killed by accident. Some times a young seal, or one not intended to be killed, pops up his head and gets a blow unintentionally.

Q. The waste of seal life was only 53 in 1887?—A. Yes, sir; in securing 100,000 skins, while these marauders did not kill last year less than 500,000. The logs of marauding schooners have fallen into my hands, and they have convinced me that they do not secure more than one seal out of every ten that they mortally wound and kill, for the reason that the seals sink very quickly in the water. Allowing one out of ten, there would be 300,000 that they would kill in getting 30,000 skins. Two hundred thousand of those killed would be females having 200,000 pups on shore. Those pups would die by reason of the death of their mothers, which added to the 300,000, makes half a million destroyed. I am inclined to think, because the seals show they are not increasing, or rather that they are at a stand-still, that more than 300,000 are killed by marauders.

Q. You are of the opinion, then, that the marauders are killing more seals than the

Alaska Commercial Company?—A. At least five or six times as many as the Alaska Commercial Company are killing.

Q. What will be the effect if more stringent measures are not taken to protect the seals by the Government?—A. If more stringent measures are not taken, it is only a question of time when these seals will be driven ultimately to seek some other home where they will not be molested. They will not continue to be harassed; and, if this marauding is continued, they will, in my opinion, either be gradually exterminated or will leave the islands permanently and land at some other place. They may go on the Russian side.

Q. Will marauding increase if the Government does not take steps to prevent it?—A. I think so.

Q. Is it practicable to prevent it?—A. Yes, sir. If we did not allow these cheeky, persistent, insolent, British Columbia seamen to go there and defy the United States and its authorities, it would very soon be stopped. When our revenue cutters seize the British schooners, the captains are very insolent and defiant, and claim that they have a strong government at their backs. I am now referring particularly to Captain Warner, of the *Dolphin*. He said in 1887, when captured, "We have got a strong government at our backs, and we will fight you on this question." "Very well," says Captain Shepherd, "I have got a strong government at my back, and I am going to do my duty. My government sends me to protect these seal rookeries. I am charged by this administration to enforce the law, and I will seize all marauders."

* * * * * * *

Q. You were speaking a while ago in regard to the amount of seal life destroyed by marauders, and that a captain had given the number of seals destroyed. Have you seen any of the log books of those vessels?—A. Yes, sir.

Q. Will you state what you remember with regard to the number of seals lost or captured by those vessels?—A. I remember reading the log-book of the *Angel Dolly*, which I captured. There was an entry in that log-book that read as follows: "Issued to-day to my boats, three hundred rounds of ammunition. At night they came in with the ammunition all expended, and one seal skin."

Q. They had shot three hundred rounds of ammunition?—A. Yes, sir. Another entry I saw was: "Seven seals shot from the deck, but only secured one." All lost but one. Another entry: "It is very discouraging to issue a large quantity of ammunition to your boats, and have so few seals returned." An entry was made in another place, where he gave it as his opinion that he did not secure one seal-skin out of every fifty seals wounded and killed.

Q. Have you seen seal-skins upon the island that had been shot?—A. Very often. We gather handfuls of shot every season.

Q. Does that injure the market value of the skins?—A. Undoubtedly. Any hole is an injury to the skin.

Extract from Mr. Tingle's report to the Treasury Department.

I am now convinced from what I gather, in questioning the men belonging to captured schooners and from reading the logs of the vessels, that not more than one seal in ten killed and mortally wounded is landed on the boats and skinned; thus you will see the wanton destruction of seal life without any benefit whatever. I think 30,000 skins taken this year by the marauders is a low estimate on this basis; 300,000 fur-seals were killed to secure that number, or three times as many as the Alaska Commercial Company are allowed by law to kill. You can readily see that this great slaughter of seals will, in a few years, make it impossible for 100,000 skins to be taken on the islands by the lessees. I earnestly hope more vigorous measures will be adopted by the Government in dealing with these destructive law-breakers.

William Gavitt, an agent of the United States Treasury, gave this testimony.

Q. I understand you to say—for instance, taking 1887 or 1888—that the 100,000 seals taken upon the islands, and the 40,000 taken and killed in the water, if no greater amount was taken, that there would be no perceptible diminution in the number of seal; that by the natural increase the company might take 40,000 more than now, if it were not for the depredations?—A. I had in mind an average between 25,000 killed in 1888 and about 40,000 in 1887.

Q. What I want to know is this: Is it your opinion that the number taken in the sea, when they are on the way from the islands to the feeding grounds, have a tendency to demoralize the seal and to break up their habits, their confidence, etc.?—A. It would be likely to do it. They are very easily frightened, and the discharge of fire-arms has a tendency to frighten them away.

By Mr. MACDONALD:

Q. No seals are killed by the company in this way?—A. No, sir; they are all killed on the islands with clubs.

Jacob H. Moulton, an agent of the Government, testified:

Q. Do you think it essential to the preservation of seal life to protect the seal in the waters of Alaska and the Pacific?—A. There is no doubt about it.

Q. The herd could be exterminated without taking them upon the islands?—A. They could be exterminated by a system of marauding in the Behring Sea, but I think the number killed along the British Columbia coast did not affect the number we were killing on the islands at that time, because there was apparently an increase during these years. There had been for five or six years up to that time. Since that time in Behring Sea the seal have been gradually decreasing.

Q. You think their decrease is attributable to unlawful hunting in Behring Sea?—A. There is no doubt of that.

Q. As a result of your observation there, could you suggest any better method of preserving seal life in Behring Sea than that now adopted?—A. Not unless they furnished more revenue vessels and men-of-war.

Q. So as to patrol the sea closely?—A. I think so. I do not think the seals scatter much through any great distance during the summer season, although very late in the summer the smaller seals arrive. The females, after giving birth to their young, scatter out in Behring Sea for food. We know they leave the islands to go into the water, because they are coming and going. They suckle their young the same as most animals.

Q. Lawless hunters kill everything they find, I believe, females or not?—A. Yes, sir.

Q. When a female is nursing her young and goes out for food and is killed or wounded, that results also in the death of her young?—A. Yes, sir. As her young does not go into the water, it does not do anything for some time, and can not swim and has to be taught.

Q. The seals are born upon those islands?—A. Yes, sir; they come there for that purpose. They come there expressly to breed, because if they dropped their young in the water the pup would drown.

Q. Do you think the value of the seals justifies the policy that the Government pursues for their preservation and protection?—A. Yes, sir; I do.

Q. And under a rigidly enforced system protecting seal life in the waters of these seas, do you think the herd could be materially increased?—A. I think it would. I think there is no doubt but what it would.

Edward Shields, of Vancouver Island, a sailor on board the British schooner *Caroline*, engaged in seal hunting in Behring Sea in 1886, testified, after the vessel was seized, that the 686 seals taken during the whole time they were cruising in the open sea were chiefly females.

Mr. H. A. Glidden, Treasury agent, recalled, testified as follows:

Q. From the number of skins taken you estimated the number killed?—A. That season I know there were thirty-five vessels in the sea, and we captured fifteen vessels. The catches of the vessels were published in the papers when they arrived home and averaged from 1,000 to 2,500 skins each.

Q. You estimate, then, that during the season 40,000 skins were taken? In killing them in the open sea they do not recover every seal they kill?—A. No, sir; I do not think they do. In fact, I know they do not, judging from the amount of shot and lead taken from the seals that are afterwards killed on St. Paul and St. George Islands.

Q. So that the destruction of the seals in the open sea would be much in excess of the number taken, probably?—A. I have no very accurate information on which to base an opinion, but I should judge that they lost from 40 to 60 per cent. of them. I saw a good many shot from the boats as I was approaching, and think they lost two or three out of five or six that I saw them shoot at.

Q. From your observations have you any recommendations or suggestions to offer, the adoption of which would lead to the better preservation of seal life in these waters than is now provided by law?—A. There is a difference of opinion as to the construction of the law. I firmly believe that the Government should either protect the islands and water in the eastern half of Behring Sea or throw up their interest there. If the Behring Sea is to be regarded as open for vessels to go in and capture seals in the water, they would be exterminated in a short time.

No. 12.

Sir Julian Pauncefote to Mr. Blaine.

[Extract.]

BRITISH LEGATION,
Washington, D. C., March 9, 1890.

DEAR MR. BLAINE: I have the pleasure to send you herewith the memorandum prepared by Mr. Tupper on the seal fishery question, to which he has appended a note by Mr. Dawson, an eminent Canadian official.

Believe me, etc.,

JULIAN PAUNCEFOTE.

[Inclosure 1.]

SYNOPSIS OF REPLY TO MR. BLAINE'S LETTER TO SIR JULIAN FAUNCEFOTE, OF MARCH 1, 1890.

	Page.
Mr. Blaine's reference to indiscriminate slaughter—note in point	29
Extraordinary productiveness of seals	29
Rookeries in South Pacific withheld extensive raids for years	29
None of Pacific fisheries ever equaled those of the Pribylov group	29
History of South Shetland Islands, and wholesale destruction thereon	29
Destruction at Mas-á-Fuera	29
Chapel of opinion that 100,000 a year could have been taken from the Shetlands under proper restrictions	29
Pups in thousands found dead on beaches	29
Incorrect statement in report of the House of Representatives as to rookeries of the world	30
Russian memorandum of July 25, 1888, enumerating rookeries	30
Cape of Good Hope rookeries, and the protection of same	30
Destruction on these rookeries formerly—plague—revival of rookeries under regulations.	
Seals shot—statement that 1 only in 7 is shot—contradicted by Canadian hunters	30
Mr. Elliott on unerring aim of Indian hunters	30
Practice of hunters	30
Statement of facts prior to and at time lease of islands to Alaska Commercial Co pany (1870)—lessees permitted to take 100,000 a year	30
Slaughter under Russian rule	30
Table showing catch 1817–'60	31
Undiminished condition of islands, 1868, though 6,000,000 taken 1841–'70	31
50,000 seals killed on the island of St. George in 1868	31
150,000 killed on the island of St. Paul during the same year	32
General onslaught—300,000 killed in 1869	32
Notwithstanding the above destruction, 100,000 a year might, Mr. Boutwell stated, be killed with protection in and around the islands	32
Mr. Dall of same opinion in 1870 (100,000 a year may safely be killed)	32
Tenure of lease allowed 100,000 a year—any male seal of one year or over—natives to kill pups for food	32
Opinion of committee of House of Representatives that seals require protection during migration, and for 50 miles southeast of rookeries whilst searching for food, which differs from Mr. Blaine's proposition	32
Mr. Glidden's testimony—merely his opinions, not based on practical knowledge	32
Mr. Taylor's testimony	32
On islands in 1881—as to seals' intelligence and hours for feeding.	
No bulls remain on islands all summer—writers and agents contradict this	32
Mr. Taylor admits that killing occurs inshore, where the sea is black with seals.	33
This witness, while stating that young pups are lost, does not instance finding dead pups on the islands—his admission that seals have not diminished.	
Chief damage due to insufficient protection of islands	33
Mr. Williams's testimony	33
No personal knowledge as to the seal—refers to want of protection on islands and danger of seals being taken when passing Aleutian Islands—increased depredations upon the rookeries for last three or four years.	

Page.

Mr. McIntyre, Government agent, afterwards a superintendent of the company. 34
Thinks one-fifth only of seals shot are recovered—found seals with shot—attributes deficiency of seals in 1888 to the fact that cows were killed—attempts to reduce estimate, as to number, of Elliott and Dall by one-half—large decrease in 1887, 1888—decrease since 1882, especially since 1884—considerable percentage of killed made up of males—40,000 skins in 1886 and 1887 taken in Behring Sea—this merely a surmise—80 or 90 per cent. of catch females—positive testimony of this witness on matters of opinion or hearsay—his statement that islands unmolested from 1870 to 1885 incorrect, as well as statement as to decrease from 1882 and 1884.
Mr. Elliott's testimony 34, 35
Report regarding him by Mr. Morris in 1879—Mr. Elliott's evidence before Congressional committee goes further than his previous writings—his statement regarding loss of wounded seals contradicted.
Mr. Tingle's testimony 35, 36
On islands 1885 to 1886—slight diminution probably—calculation of catch from entry in log of *Angel Dolly*—extraordinary log and extraordinary crew of *Angel Dolly*—Mr. Tingle contradicts Mr. McIntyre—increase since Mr. Eliott's count, 1876, 2,137,000—criticism of Mr. Elliott's statement *re* decrease, and points out that Mr. Elliott was not on the islands for fourteen years.
Mr. W. Gavitt's testimony 36, 37
On St. George Island, 1887, 1888—bad character of employés of company—no means of agents knowing of unlawful killing—no agent can say when seals are captured off the islands—lessees buy seals killed at Oonalaska—agents drawing two salaries, one from Government and one from the company.
Mr. Moulton's testimony, 1877, 1885 37
Increase in number of seals to 1882—decrease to 1885—opinion and evidence as to catch of mothers.
Edward Shields, sailor, as to catch of 686 seals, chiefly females—custom of hunters to class all skins of seals under those of mature seals as females 37
Mr. Glidden, recalled, based his estimate of 40,000 catch from newspapers 37
Inexperience of witnesses 37
No cross-examination of witnesses 37
The opinions of witnesses 37
Their opinions are substantially that females nursing go out for food—when away from islands are shot—greater part of catch in Behring Sea made up of females—many of the seals shot are lost.
Issue joined on these by Canadian Government. Seals can be protected and increased in number by (1) proper patrol of Islands, (2) killing of pups prohibited, (3) reduction of pups to be killed on islands, (4) limit of months for killing, (5) prevention of killing by Aleuts at the Aleutian Islands 37
Difference between House of Representatives committee and Mr. Blaine as to when injury began to islands—1886 or 1885 38
Important to show how insignificant catch of Canadian sealers compared with depredations successfully survived by islands 38
Depredations on islands and catch outside islands, 1870 38
1872 38
1874 38
1875 38
1876 38
1877 38
1878 38
1879 38
1880 38
1881 39
1882 39
1883 39
1884 39
1885 39
1886 39
None of the depredations were committed by Canadian sealers 40
Mr. Blaine refers to increase and profitable pursuit of industry down to 1886 .. 40
Present value and condition of islands better than ever 40
Comparative offers for lease of islands 1870–1890 40
Enormous rental and profits received by the United States from the islands ... 40
Receipts and expenses—$9,525,283 received by the United States in excess of purchase price of Alaska 40

Page.
Marvelous increase of seals in spite of depredations referred to 40
1869, 1,728,000; 1874, 4,700,000; 1884, increasing; 1885, no change, countless numbers; 1887, still on the increase; 1888, no change.
With total of 4,700,000 in 1874, Lieutenant Maynard of opinion 112,000 young male seals can be safely killed annually 41
Reference to Maynard's and Bryant's report as to habits of seals supports Canadian contention 41
Canadian Government contends few females in calf ever taken in sea 41
More females in a herd than males 41
Canadian contention supported by following facts: (1) Seals on rookeries still increasing: (2) old bulls go into water at end of rutting season and do not return to islands—Clark on males driving others off; (3) two-thirds of males not permitted to land at rookeries—occasional visits to land—yearlings arrive middle July—non-breeding male seals equal breeding seals (1,500,000)—bachelors not long on shore—females do not feed until young go into water 41, 42
Bulk of seals confined to island until ice surrounds islands 42
Never out until departure (*see* Mr. McIntyre's report, p. 48) 42
Bulls prevent mothers taking to water 42
Rookeries full to July 25, and remain in limits 42
No seals sick or dying on islands 43
Canadian contention supported by report on International Fisheries Exhibition (London, 1883)—nature has imposed a limit to their destruction 43
Mr. Elliott, in 1874, agrees with the above contention—the equilibrium of life regulated 43
Seals get their fish in North Pacific 43
Mr. McIntyre's report as to habits of seals, 1869 43
Seals take no food until their departure from islands in November 44
The duty of Government to patrol islands—Mr. Tingle in 1886 asks for cutters to patrol islands—Mr. Morgan recommends launches—Mr. Wardman alludes to inadequacy of protection to islands 44
Mr. Williams points out insufficiency of protection to islands 44
Mr. Taylor says, in 1881, the difficulty arises from the want of better protection—Mr. Glidden agrees 44, 45
Mr. Boutwell, Secretary of the Treasury, in 1870, conceived the duty of the Government was to efficiently guard "in and around the islands" 45, 46
The interests on behalf of a monopoly cause divergent views respecting the protection of seals 46
Mr. Bryant shows the value of the lease in conferring a monopoly—Mr. Moore illustrates this 46
When the company took less than 100,000 seals it did so because the market did not demand them 46
Mr. McIntyre shows that 800,000 were once thrown into the sea as worthless, when the market was glutted 47
Killer-whales and sharks the enemies of seals 47
Man's assaults at sea small in comparison to the natural enemies of the seal 47
Canadian system of hunting 47, 48
Mr. Elliott shows that if temporary diminution does occur on the islands of St. Paul and St. George, the missing seals are probably on the Russian islands 48

[Inclosure 2.]

Mr. Tupper to Sir Julian Pauncefote.

THE ARLINGTON,
Washington, March 8, 1890.

DEAR SIR JULIAN: I have the honor to inclose herewith a memorandum prepared by me in reply to the memorandum sent to you by Mr. Blaine, and which you handed to me upon the 3d instant.

I send you a copy for yourself, one for Mr. Blaine, and one for M. de Struvé, the Russian ambassador.

I also have the honor to forward herewith a valuable paper upon the subject, prepared hurriedly by the assistant director of the geological survey of Canada, George Dawson, D. S., F. G. S., F. R. S. C., F. R. M. S.

I may add that Dr. Dawson was in charge of the Yukon expedition in 1887.

Copies of his paper are also inclosed for Mr. Blaine and M. de Struvé.

I am, etc.,

CHARLES H. TUPPER.

[Inclosure 3.]

MEMORANDUM ON MR. BLAINE'S LETTER TO SIR JULIAN PAUNCEFOTE, DATED MARCH 1, 1890.

In the appendix to Mr. Blaine's letter of March 1, on the 3d page, is an extract from a report to the House of Representatives, as follows:

"In former years fur-seals were found in great numbers on various islands of the South Pacific Ocean, but after a comparatively short period of indiscriminate slaughter the rookeries were deserted, the animals having been killed or driven from their haunts."

While it is admitted that indiscriminate slaughters upon the rookeries are most injurious to the maintenance of seal life, it is denied that in the history of the fur-seal industry any instance can be found where a rookery has ever been destroyed, depleted, or even injured by the killing of seals at sea only.

Mr. Elliott, who is quoted by Mr. Blaine, admits that the rookeries in the South Pacific withstood attacks of the most extensive and destructive character for twenty years, when young and old males and females were indiscriminately knocked on the head upon their breeding grounds; and Mr. Clark (H. R. Report 3883, 50th Cong., 2d sess., p. 91) tells us that in 1820 thirty vessels on the islands (South Shetlands) took in a few weeks 250,000 skins, while thousands were killed and lost. In 1821 and 1822 320,000 skins were taken and 150,000 young seals destroyed. None of these islands, however, were ever frequented by the millions which have been found on the Pribylov group for over twenty years.

"These islands constitute the most valuable rookery or breeding place of these animals ever known to man. (H. R. Report 3883, 50th Cong., pp. 111, 112, Hon. C. A. Williams's written statement.)"

Professor Elliott (in his evidence, p. 142) mentions one person who, when with him at the islands, estimated the number at 16,000,000.

The report of the Congressional committee on the Alaska seal fisheries states that indiscriminate slaughter in the early part of the nineteenth century caused a desertion of the rookeries, and it goes on to say that in 1820 and 1821 300,000 were taken in an indiscriminate fashion at the South Shetlands, and, at the end of the second year, the species had there been almost exterminated.

The Hon. C. A. Williams, whose evidence is cited and relied upon by Mr. Blaine, supports this view (see p. 111, H. R. Report No. 3883, 50th Cong.); but, as a matter of fact, while seals are admittedly not so plentiful in South Shetlands as heretofore, owing to wholesale destruction on the breeding grounds, so prolific are they that, in 1872, 8,000 skins of "the choicest and richest quality were obtained from these islands. In the next season 15,000 skins were taken there, and in 1874 10,000 skins, and from 1870 to 1880 the sealing fleet brought home 92,756 fur-seal skins from the South Shetlands and the vicinity of Cape Horn and Terre del Fuego." (A. Howard Clark, p. 402, Commission of Fisheries, Fishery Industries United States, sec. 5, vol. ii, 1887.) In this regard, it may here be noted that this extract refers only to the catch of sealers which fitted out at New London, Conn., and does not embrace the operations of sealers from other countries.

Mr. Clark describes the manner in which the seals at Mas-á-Fuera were attacked. At page 407 of the article above cited he points out that between the years 1793 and 1807 3,500,000 seals were obtained from this island by English and American vessels, and in 1824 the island was "*almost* abandoned by these animals." Mr. Clark also shows that in 1797 there were only 2,000,000 on the islands, and yet in seven years more than 3,000,000 were carried from the islands to Canton, China.

Mention is made, too, of fourteen ships' crews on the island at one time killing seals. At page 408 mention is made of from twelve to fifteen crews on shore at the same time (American and English), and that "there were constantly more or less of ships' crews stationed here for the purpose of taking fur-seals' skins" —from 1793 to 1807.

It is contended by the Canadian Government that a reference to the history of this island is entirely beside the contention on the part of the United States that it is necessary to keep sealing craft hundreds of miles away from rookeries in order to preserve the seal life on the breeding grounds.

The cause of injury is the same in all the cases mentioned, and Mr. Chapel, in the appendix to Mr. Blaine's letter, now under consideration, at page 5 well says:

"It is stated that at the Shetlands alone [which never equaled the present condition of the Pribylov group, mentioned by Hon. C. A. Williams, already quoted] 100,000 per annum might have been obtained and the rookeries preserved if taken under proper restrictions; but, in the eagerness of men, old and young male and female seals were killed, and little pups a few days old, deprived of their mothers, died by thousands on the beaches—[it may here be observed that not a case of dead pups was ever found on the Pribylov group, so far as the reports on the islands show]—carcasses and bones strewed on the shores."

This statement, cited in the United States' case, is direct authority for the Canadian contention. It illustrates three important points:

(1) That indiscriminate slaughter on the breeding grounds is injurious and in time destructive.

(2) That when the mothers are killed, the young pups, dying in consequence, are found on the island.

(3) That regulations of the number to be killed on the island, with careful supervision, will maintain the rookeries independently of prohibiting sealing in the waters.

The report of the House of Representatives states:

"The only existing rookeries are those in Alaska, another in the Russian part of Behring Sea, and a third on Lobos Island, at the mouth of the river Plate, in South America."

The statement is incorrect. Important omissions occur, since the cases left out, when examined, show that, notwithstanding all of the extraordinary and indiscriminate slaughter of past years, it is possible, by careful supervision of the rookeries alone, and of the seals while on land, to revive, restore, and maintain lucrative rookeries.

Quoting from an extract from a Russian memorandum respecting the hunting of seals, communicated by M. de Staël to the Marquis of Salisbury, and dated July 25, 1888, it is found that other rookeries are by no means deserted. The extract reads as follows:

"The places where fur-seal hunting is carried on may be divided in two distinct groups. The first group would comprise Pribylov Islands, Behring Sea, 100,000 killed in 1885; Commander Islands (Behring and Copper Islands, 45,000; Seal Islands, Okhotsk Sea, 4,000); total, 149,000.

"The second group, the sea near the coast of Victoria, 20,000; Lobos Islands, 15,000; islands near Cape Horn and the South Polar Sea, 10,000; islands belonging to Japan, 7,000; Cape of Good Hope, 5,000; total, 57,000."

An important omission is the case of Cape of Good Hope, in reference to which the committee of the House of Representatives, previous to their report, had been informed (see H. R. Report 3883, 50th Cong., 2d sess., p. 114) that from the *Cape of Good Hope* islands, under protection of the Cape Government, a yearly supply of 5,000 to 8,000 skins is derived, and that from Japan, it was stated, sometimes 15,000 and sometimes 5,000 a year are received. These islands are now rigidly protected by the governments of the countries to which they belong; but neither does the Government of the Cape, of Japan, nor of Urugnay, in case of the Lobos Islands, consider it necessary to demand the restriction of the pursuit of seals in the open sea.

United States' vessels have visited the islands off the Cape of Good Hope from 1800 to 1835, and have taken on some days 500 to 700 skins, securing several thousands of skins annually. In 1830 Captain Gurdon L. Allyn, of Gale's Ferry, Conn., mentions finding a thousand carcasses of seals at one of the islands, the skins of which had been taken. He landed and took seals in considerable numbers. He was again on a sealing voyage on this coast in 1834, and shot seals on the rookeries.

In 1828 a plague visited these rookeries, and 500,000 seals perished during the plague (Clark in the report of the U. S. Com. of Fish and Fisheries, 1887, sec. v, vol. ii, pp. 415, 416), and yet to-day we find a renewal of the industry by regulations applied *solely* to the rookeries, and *exclusive* of the deep sea operations.

Upon page 7 of the appendix now under review, the report of the Congressional committee on Alaska seal fisheries refers to testimony of United States Government agents regarding the number of seals shot and not secured, and a calculation is referred to, to the effect that one in every seven is alone secured by the hunter who follows seals on the sea. The experience of Canadian hunters is directly opposed to this theory, and shows that a loss of 6 per centum is all that ever takes place, while Indian hunters seldom lose one. Solemn declarations to this effect have been made under the Canadian statute relating to extrajudicial oaths.

In confirmation of this, reference may be had to Mr. H. W. Elliott, in the United States Fish Commissioner's report, vol. ii, sec. v, p. 489, where he says:

"The Aleuts fire at the otter at 1,000 yards range, and that when hit in the head nine times out of ten the shot is fatal."

In the case of hunting the seals, the practice of the white hunters, all expert shots, is to paddle up to the seal while asleep in the water, shoot it in the head, and at once haul it into the boat; while the Indians approach it in a canoe and spear the seal, the head of the spear separating itself and being attached to a rope by which the seal is dragged into the canoe.

Reference is made on page 4 of the appendix to Mr. Blaine's letter to the limitations in the lease of 1870. These conditions, it is contended, are most inconsistent with the present view of the United States regarding the danger to the preservation of seal life. With respect to this the following facts should be carefully noted:

(1) Up to 1862 no law in Russia existed prohibiting or forbidding the killing of

seals, and in that year an inoperative law was promulgated. (See Russian memorandum, Mr. de Staël to Lord Salisbury, 25 July, 1888.)

Mr. McIntyre, a special agent of the Treasury Department (H. R. Ex. Doc. 36, 41st Cong., 2d. sess., page 18), records the catch taken from the Pribylov Islands under the Russian-American company as follows:

Table showing the number of fur-seals taken by the Russians on St. Paul and St. George Islands from 1817 *to* 1860.

Year.	Number of seals.	Year.	Number of seals.
1817	60,188	1840	*8,000
1818	59,856	1841	*8,000
1819	52,225	1842	10,370
1820	50,220	1843	11,240
1821	44,995	1844	11,924
1822	36,469	1845	13,637
1823	29,873	1846	15,070
1824	25,400	1847	17,703
1825	30,100	1848	14,650
1826	23,250	1849	21,450
1827	19,700	1850	6,770
1828	23,228	1851	6,564
1829	20,811	1852	6,725
1830	18,034	1853	18,035
1831	16,034	1854	26,146
1832	16,446	1855	8,585
1833	16,412	1856	23,550
1834	15,751	1857	21,082
1835	6,580	1858	31,810
1836	6,590	1859	22,000
1837	6,802	1860	21,590
1838	*6,000		
1839	*6,000	Total in forty-four years	765,687

*Approximative.

Referring to this table, Mr. McIntyre says:

"The number of seals on St. Paul Island is variously estimated at from 3,000,000 to 4,000,000, including all classes, and on St. George at about one-third as many. I think it may be safely stated that there are not less than 4,000,000 on the two islands. The table from the records of the late Russian-American Company, appended to this report, exhibits the number of seals taken from each island from 1817 to 1837, and from 1842 to 1860. Previously to 1817, says the late Bishop Veniamnoff, no records were kept. From the same authority we learn that during the first few years following the discovery of the islands in 1781 over 100,000 skins were annually obtained; but this, it seems, was too large a number, for the decrease in the yearly return was constant until 1842, when they had become nearly extinct, and in the next decade the whole number secured was 129,178, being in 1852 but 6,564; but from 1842, under judicious management, there appears to have been an increase, and in 1858 31,810 were taken, which was the largest *catch* in any one year, until 1867, when, as I am informed, some 80,000 or 100,000 were secured; under the supposition that the Territory would soon be transferred to the United States. 'The decrease from 1817 to 1838,' says Bishop Veniamnoff, 'averaged about one-eighth of the whole number annually, so that in 1834 there were produced on both islands, instead of 60,000 to 80,000, only 15,751, and in 1837, 6,802.' From the most careful computation I have been able to make, I am of the opinion that no more than 100,000—75,000 on St. Paul and 25,000 from St. George—can be annually taken without incurring the risk of again diminishing the yearly production, as we observe the Russians to have done in former years."

See also Wick, chief of land service, Russian-American telegraph expedition, who reported in 1868 on undiminished condition of the seal fishery (H. R. Ex. Doc. No. 177, 40th Cong., 2d sess.).

Six million seals had been taken from this sea between 1841 and 1870. (*Vide* Dall on Alaska and its resources, 1870, p. 492.)

(2) In 1868 Hutchinson and Morgan, the promoters and founders of the Alaska Commercial Company, and afterwards lessees of the islands, saw that, unless restrictions were imposed *upon the islands*, there would be ruin to the rookeries (H. W. Elliott, "Our Artic Province," pp. 247, 248); consequently, by act of Congress approved July 27, 1868, the killing of fur-seals *on the islands* was prohibited (W. H. McIntyre, special agent Treasury Department, H. R. Ex. Doc. No. 36, 41st Cong., 2d sess., p. 12). Notwithstanding the act to which reference has been made, 50,000 were

killed on St. George and 150,000 on St. Paul by traders in 1868 (Dall, p. 496), 100,000 in 1869 (W. H. McIntyre, H. R. Ex. Doc. No. 36, 41st Cong., p. 13).

Mr. Wardman, an agent of the United States Treasury at the Seal Islands, in his "Trip to Alaska," published 1884, on page 92, says:

"General onslaught, threatening extermination, by American vessels during the interregnum of departure of Russian and installation of United States Governments took place."

And the same officer, in his sworn testimony given before the Congressional committee, stated that 300,000 were killed in 1869.

(3) Notwithstanding this condition of affairs, Secretary Boutwell reported in 1870 (H. R. Ex. Doc. No. 129, p. 2, 41st Cong., 2d sess.) that "if the animals are protected, it is probable that about 100,000 skins may be taken each year without diminishing the supply," and that "great care was necessary for the preservation of the seal fisheries *upon the islands of St. Paul and St. George.*"

So Dall, in his book on Alaska (1870, p. 496), in referring to slaughter by Russians, believed that 100,000 seals could safely be killed annually under regulations, and Mr. Blaine, in his dispatch to Sir Julian Pauncefote of the 27th of January, says:

"In the course of a few years of intelligent and interesting experiment the number that could be safely slaughtered was fixed at 100,000 per annum."

Mr. Boutwell, as will be seen on reference to his report, was opposed to a lease, and remarked that it was necessary in any event to maintain *in and around* the islands an enlarged naval force for the protection of the same. This report was followed by the legislation under which a lease was executed in May, 1870.

(4) In drawing the terms of the lease and regulations concerning the islands the United States permitted, in the then state of affairs, the lessees to take 100,000 seals a year for twenty years, and they were permitted to make up this number from any male seals of one year of age or over.

(5) The natives were allowed to destroy on the islands pup seals of either sex for food, numbering in some years 5,000.

(6) The 100,000 could be killed by the lessees in the months of June, July, September, and October.

Upon page 8 of the appendix to Mr. Blaine's note the opinion of the committee of House of Representatives is given to the effect that the protection of the islands is not enough, but that the seals must be protected in their annual migrations to and from the rookeries, and for 50 miles southeast of the rookeries to their feeding grounds. This is a far different proposal from that submitted by the Secretary of State, since it does not embrace the whole of the Behring Sea, but locates the feeding grounds, so called, within 50 miles of the islands.

The other points, on page 8 of the appendix to Mr. Blaine's letter to Sir Julian Pauncefote of the 3d instant, need hardly be dealt with in discussing the necessity for a close season, reference being made therein to the sorting of the herd for killing on land so as not to kill the females. This is admittedly wise, since the killing is done June 14, when the pups are being dropped. The rest of page 8 of Mr. Blaine's memorandum raises the point that a seal is not a fish.

So on page 9 testimony is cited touching the necessity for not killing females on the rookeries, when wholesale slaughter of 100,000 a year goes on, and this is not here controverted. The opinion of Mr. Glidden, whose experience was confined to the *land operations*, regarding the proportion of seals recovered when shot in deep sea, can not be of weight. It is, therefore, unnecessary to dwell upon the fact that he is a Government employé, giving his views in favor of his Government's contention in 1888, after the seizures of 1885 had taken place. This officer was on St. George Island from the 25th of May to August in 1881 only. His opinion that an "open policy" would not preserve the value of the seal fisheries, and that it is necessary to protect the seals in Behring Sea, as well as on the islands, is not based upon much practical knowledge. He further stated that not much hunting was done in the Pacific.

Hon. Mr. Williams, at page 107 of evidence before the Congressional committee, says:

"Three miles beyond land (in Pacific) you do not see them; where they go no one knows."

The British Columbian sealers and the record of their catches in the Pacific for twenty years weakens the standing of these witnesses as experts.

Mr. Taylor, another witness, ascribes to the fish of Behring Sea a very high order of intelligence. He deposes that in Behring Sea the seals eat a great many fish every twenty-four hours, and as "the fish have become well aware of the fact that there is a good many seals on the seal islands, they keep far out to sea." He stands alone in testifying so positively to what can, at best, be a matter for conjecture, and he fails to show he had the slightest means of ascertaining this knowledge. He further stated that the bulls remain on the islands all summer.

This is contradicted by writers and other United States' witnesses, as will be seen hereafter. It is, therefore, evident that this gentleman was testifying simply to his

own peculiar theories regarding seal life upon very limited experience. He says, at one place, that while the cows are out (and they go, he tells us, 10 to 15 miles and even further) the sealers catch them; while, at another place he states:

"The sea is black with them *around the islands*, where they pick up a good many seal, and *there is where the killing of cows occurs—when they go ashore.*"

So that, evidently, he may have seen cows killed when *around the islands*, the only place at which he apparently could observe them, and he has merely conjectured the distance that they go from land and the number actually shot in deep water.

This witness "thinks there is some damage done in killing and shooting of the cows and leaving so many young without their mothers." There would be less doubt respecting the cows being shot or lost if it was satisfactorily shown that large numbers of young pups were found dead in the rookeries. The witness, if able, would have certainly pointed to this. The reverse, however, is the fact; and, with the exception of one witness before the Congressional committee, whose evidence will be examined again, not an agent of the Government nor a writer ever stated that pups were found dead in any numbers on the islands from loss of mothers; the fact being that mothers never go far from their young until the young are well able to care for themselves. This witness, notwithstanding his allusion to supposed damage by the killing of mothers, the killing of cows by vessels in shore—where the sea is black with them—had to admit, "the number of seal, in the aggregate, is not apparently diminished." His knowledge is confined to one year (1881), and we have better and undisputed testimony that long after this a great increase had taken place—an increase of millions. Mr. Taylor, it should be observed, however, gave other testimony than that quoted by Mr. Blaine. He said that—

"These predatory vessels are generally there (in Behring Sea) in the spring of the year when the cows are going to the island to breed * * * most of the seals that are killed by these marauding vessels are cows with young."

He estimates the number taken in 1881 at from 5,000 to 8,000.

"These vessels will take occasion to hang around the islands, and when there is a heavy fog to go on the rookeries very often."

The chief damage, according to Mr. Taylor, is not the killing of mothers out at sea when their young are on shore depending upon the return of *their mothers*, as is contended, but it is due, he says, to the insufficient protection of the island. This can, as will be pointed out, be remedied if the suggestions of Government agents are acted upon in the line of better police guarding of the rookeries.

Mr. Williams's testimony is next referred to on page 10 of the appendix to Mr. Blaine's letter. This gentleman was engaged in the whaling business for forty years (page 73 of evidence before Congressional committee). As regards fur-seals, his knowledge is not based upon experience, but "from reading and from conversation with my captains" (p. 73). He was called by request of attorney for the Alaska Commercial Company, of which Mr. Williams was a stockholder.

No importance, it is submitted, can be attached to his testimony regarding the habits and nature of the seal after such a frank confession.

His evidence that females in pup mass together in the sea before landing may therefore be dismissed, since he does not produce any authority for a statement which is contradicted by expert testimony. Neither is his statement that hunters admit that out of eight shots they would save one seal only correct.

On pages 11 and 12 of the appendix Mr. Williams naturally gives his views for holding the control over seal life in Behring Sea. It is not denied that every lessee of the Pribylov group would agree entirely with him in this. It may be remarked that he does not share the theory of the United States that the chief danger lies in killing the mothers when out in the deep sea for food, having left their nurslings on shore.

At pages 10, 11, and 12 of the appendix Mr. Williams is quoted to show that the danger to the females lies in the journey through the Aleutian Islands, with young, to the breeding grounds. On page 90 of his evidence before the committee, he illustrates the ineffective means of protecting the rookeries by stating:

"Last fall a schooner landed at one of the rookeries and killed 17 cows and bulls right on the breeding rookeries."

Again, at page 106 he says:

"That the present measures are somewhat insufficient is shown by the fact that for the last three or four years there have been increased depredations annually *upon the rookeries.*

"A revenue-cutter goes upon the grounds and then is ordered north for inspection, or for relief of a whaling crew, or something of that kind, and they are gone pretty much the whole time of the sealing season, and there appears to be insufficiency of the method of protection."

On page 108 he says:

"They shoot them as they find them. * * * A vessel can approach within less than half a mile or a quarter of a mile of the island and not be seen (on account of

fog), and can send her boats on the beaches and get off fifty or a hundred skins before the inhabitants can find it out."

Evidently Mr. Williams does not consider the shooting of females far from land is much indulged in, as he insists that the damage is done inshore, where no police protection is enforced.

The history of the rookeries, given on pages 12, 13, and 14 of the appendix, has been dealt with already in this paper.

On pages 14 and 15 of the appendix an article on fur-seals, from Land and Water, written in 1877 by a Mr. Lee, is referred to.

He merely alludes to the indiscriminate slaughter which was practiced on the rookeries, which no one defends or justifies.

Mr. McIntyre, superintendent of the seal fisheries of Alaska for the lessees, is then brought forward by Mr. Blaine.

This gentleman went to the island as a Government agent to inspect the operations of the company. His reports were favorable to and highly eulogistic of the company, and they were immediately followed by his resignation as a Government official and his appointment to a lucrative position under the company.

His testimony is naturally more in favor of the company and of the Government's contention, which is so directly in the interest of the company, than the testimony of any other witness.

He thinks only one-fifth of the seals shot are recovered, and his reason is that he has found seals with bullets in their blubbers on the islands. He attributes a deficiency in the number of seals in 1888 to the fact that cows were killed. He mentions that if cows are killed in August, and their young deprived of their mother's care, the young perish. The young perish also if the mother is killed before they are born. In this way he endeavors to represent such a practice obtains, but it is to be borne in mind that he does not go so far as to say that pups are found dead on the islands in any number. When this officer was reporting on the operations of the company, and before the present contention was raised, he gave a glowing account of the increasing numbers of seals at the islands, as will be shown; but at page 116 of the evidence before the Congressional inquiry he labors to reduce the estimates of both Elliott and Dall by one-third or one-half. He concludes that the number of seals has largely decreased in the last two years (1887 and 1888). The company, however, killed their 100,000 in each of these years. The Government had the discretion to reduce the limit. The Government did not deem it necessary to do so. The number, this witness says, was increasing until 1882, and then other parties began the killing of seals, "especially since 1884." All this told upon the rookeries, and, he added, "a considerable percentage" of the killing was made up of male seals (evidence, p. 117). Mr. McIntyre attempted to count the catch in 1886 and in 1887, and stated that 40,000 skins a year were taken, nearly all in Behring Sea water, and in a few instances by raids on the land. How he obtained this information is not shown. From his position on the island of St. Paul during all that time his statement is obviously a mere surmise.

He could only know *personally* of the catch from raids which were made on the *island* in 1886 and 1887, and which were due to ineffective protection of the islands. After telling us that a large percentage of the catch of the marauders was made up of adult males, he entirely forgets this, as we find him saying (at p. 118):

"A majority of the skins taken by marauders, in fact 80 or 90 per cent., are from females."

It is submitted that this witness, whose interest on behalf of the company (the lessees) is shown in his confession that it was at times necessary, in order to control the price in the markets, for the company to take less than 100,000 seals (evidence, p. 121) has not strengthened his testimony on the main point by speaking positively to the following, which could only have been known to him by hearsay:

(*a*) Russia destroyed marauding vessels.

(*b*) A British vessel in 1887 took 450 seals in Behring Sea, secreted them on a small island, left them, and returned to the sea for more.

(*c*) Marauders kill 100,000 each season.

(*d*) It is not true that vessels are seized when pursuing legitimate business.

He goes on to say that for the first fifteen years of the company's lease, viz, from 1870 to 1885, the lessees were unmolested (p. 129), which statement has been shown to be incorrect. He observed that since 1882, and especially since 1884, other parties have been destroying seals, "reducing the equilibrium of the sexes." As will be submitted hereafter, he has been contradicted in regard to this by expert writers, historians, travelers, and agents of the United States Government.

Mr. H. W. Elliott, whose experience is limited to 1872, 1874, and 1876, when, as Mr. McIntyre says, no injury was done by marauders, is next referred to by Mr. Blaine (page 16 of appendix). He is referred to as a member of the Smithsonian Institution; he was also a special agent of the Treasury. The following are extracts taken from

a "report upon the customs districts, public service, and resources of Alaska Territory," by W. L. Morris, special agent of the Treasury Department, 1879:

"In the November number of Harper's Magazine, 1877, appears an article entitled 'Ten years' acquaintance with Alaska, 1867-'77.' The authorship is correctly ascribed to Mr. Henry W. Elliott, now connected with the Smithsonian Institution in subofficial capacity. This gentlemen was formerly a special agent of the Treasury Department, under a special act of Congress, approved April 22, 1874, appointed for the purpose of ascertaining at that time the condition of the seal fisheries in Alaska, the haunts and habits of the seal, the preservation and extension of the fisheries as a source of revenue to the United States, with like information respecting the fur-bearing animals of Alaska generally, the statistics of the fur trade and the condition of the people or natives, especially those upon whom the successful prosecution of the fisheries and fur trade is dependent.

"This report of Mr. Elliott will be further noticed hereafter, and, upon the threshold of criticising anything he has written upon Alaska, occasion is here taken to give him full credit for his valuable contribution in regard to fur-seals. It is to be regarded as authority and well conceived. The views of Mr. Elliott, however, in reference to other matters of moment in the Territory are so diametrically opposed and antagonistic to my own that I feel constrained to review some of his statements, glittering generalities, and the wholesale method with which he brushes out of existence with his facile pen and ready artist's brush anything of any essence of value, light, shade, or shadow in the broad expanse of Alaska that does not conform precisely to the rule of investigation and recital laid down by himself, and which contradicts his repeated assurances that outside of the seal islands and the immediate dependencies of the Alaska Commercial Company there is nothing in Alaska.

"This magazine article bears a sort of semi-official indorsement, its authority is not denied, and with this explanation for using the name of Mr. Elliott in connection therewith a few of its crudities and nudities will be noticed."

"THE SENSE-KEEPER OF ALASKA.

"So little is known about Alaska that whenever any thing comes up in Congress relating to it information is sought wherever it can readily be found. The 'informant' is ever on hand, with his work on fur seals comfortably tucked underneath his left arm, to impart all the knowledge extant about the country, 'for he knows more about Alaska than any man living.'

"A decade has passed since we acquired this Territory, and for a decade it has afforded employment and subsistence for its present sense-keeper; but the next decade is warming into national existence, and it is about time this bubble was pricked and the bladder not quite so much inflated.

"I am fully aware of all the consequences to be dreaded, the responsibility assumed, when rash enough to dispute the heretofore self-established authority from the Arctic Ocean to the Portland Canal.

"This man seems to be the natural foe of Alaska, prosecuting and persecuting her with the brush of the pencil and the pen of an expert whenever and wherever he can get an audience, and I attribute the present forlorn condition of the Territory to-day more to his ignorance and misrepresentation than to all other causes combined. He is accused of being the paid creature and hired tool of the Alaska Commercial Company, and belonging to them body and soul. I have made diligent inquiry, and ascertain he is not in their employ, and furthermore they repudiate the ownership. They should not be held responsible for the indiscreet utterings of the sense-keeper, notwithstanding the charge of ownership might cause him to be more readily listened to.

"Doubtless when they have been attacked through the columns of the press they have employed this individual, who is unquestionably possessed with the *cacoethes scribendi* to reply to unjustifiable onslaughts, and paid him for it, as they would any other penny-liner who makes literature and writing for the press his profession."

His evidence in 1888 is open advocacy of the United States' contention. His writings and reports prior to the dispute will be referred to, and it will be submitted that his statements and experiences before 1888 hardly support his later theories. His statement on page 17 of the appendix, that wounded seals swim away to perish at a point never to be seen again is contradicted by the last witness, Mr. McIntyre, who picked handfuls of buckshot, etc., out of seals clubbed on the islands. His theory of the difficulty of shooting seals is contrary to the known practice of the hunters to creep upon the seal as it lies floating in the calm waters of the sea, and by his own testimony, before quoted, of the unerring aim of the Indian hunters.

Mr. Tingle, an agent of the Treasury, in charge of the fur-seal islands from April, 1885, to August, 1886, is quoted by Mr. Blaine (appendix, p. 17).

Mr. Tingle is not able to go so far as Mr. McIntyre, although he was at the islands in 1886 (evidence, p. 153), but he stated "there has been a *slight* diminution of seals,

probably." He estimated 30,000 were taken by marauders, and to do this he guesses that 500,000 were killed. This gentleman, as an agent of the Treasury, was confined to the islands during his tenure of office (evidence, p. 153).

He bases his contention on the log of a marauding schooner which fell into his hands. This log was, it may be remarked, not produced, and no excuse is given for withholding it. He produced what he said was a copy. As his opinions are based upon this curious statement, his testimony can hardly be seriously pressed. He testified to insolence of sealers when seized, though he does not appear to have been present at any of the seizures. The log-book, it should be observed, is said to have belonged to the *Angel Dolly*.

This is not the name of a Canadian sealer, and it may here be stated that no Canadian sealer has ever been found within the 3-mile limit. The operations on the schooner *Angel Dolly* must have been rather expensive, and they do not corroborate the allegation that large catches were made, since three hundred rounds of ammunition (Mr. Tingle said) were wasted for the capture of one seal. Another supposed entry in the log is most extraordinary for the captain of a sealer under any circumstances to make. The statement referred to is as follows:

"It is very discouraging to issue a large quantity of ammunition to your boats and have so few seals returned."

There is not a magistrate's court in the country that would listen to this oral testimony as to the contents of a log. A reference to this pretended log—a copy of a portion thereof only being produced by Mr. McIntyre (p. 332 of evidence)—shows that the captain had an exceptionally bad crew. The captain described them in the following terms: "The hardest set of hunters in Behring Sea;" *he* "never will be caught with such a crowd again; they are all a set of curs." The captain added, however, that if "we only had hunters we would be going home now with 1,500 skins at the very least;" and, from the log, it would appear that he had no regular hunters on board. It is worthy of remark that the statements made by Mr. Tingle respecting the entries in this alleged log are not confirmed by an inspection of the transcript Mr. McIntyre produces. (On p. 332 of evidence.)

Mr. Tingle contradicts Mr. McIntyre regarding the number of seals on the island. He states (p. 162, evidence) that there had been an increase of seals since Mr. Elliott's count in 1876 of 2,137,500. He expressed natural astonishment (p. 163) at the statement of Mr. Elliott regarding a decrease. He says:

"I am at a loss to know how Mr. Elliott gets his information, as he has not been on the islands for fourteen years."

Pushed by the chairman of the committee by the following question, viz, "It is Mr. McIntyre's opinion that they have not only not increased, but have decreased," the witness in reply stated that "there has been a *slight* dimunition of seals, *probably*."

The next authority quoted by the United States is William Gavitt, a special agent of the Treasury at St. George Island from May, 1887, to August, 1888. The evidence of this witness is not referred to at any length by Mr. Blaine. The witness testified before the Congressional committee, however, that the employés of the company (the lessees) did not respect the laws of God or man. He named particularly Mr. Webster, Doctor Luty, John Kirk, and John Hall (p. 180). And he added that the rules of the company were violated (p. 181). The committee handled this witness rather roughly, Mr. Jeffries saying to him (p. 188):

"You had better understand what you are talking about."

On page 191 he rebukes other officers of the Treasury who had testified positively to matters without the means of knowledge. The witness was asked:

"What was the result of your observations and opinions that you deem reliable in respect to the unlawful killing of seal annually?"

The witness answered that—

"We have *no means* of knowing that."

He was then pressed in this way:

"It is a mere matter of estimate, of course, but I wish it based upon as reliable information as you have."

When the witness said—

"I think the first season the revenue-cutter captured 15,000 stolen skins (p. 191); where they were stolen, *whether in the sea or out of it, no agent can truthfully say.*"

He also showed that the lessees of the islands were not so particular as other agents pretend, when he tells us (p. 191) that they brought from the natives at Oonalaska 5,000 seals killed by them there (p. 196). The United States puts forward this officer as a reliable witness, and it is therefore but fair to attach importance to a statement which weakens the force of the *ex parte* statement and opinion of the special agents sent from time to time to the islands, and who have now been brought forward on behalf of the United States as witnessess in support of a case which concerns not merely the Government, but most directly the lessees. The witness states that one of the employés of the company told him that when a Government officer came

there and got along with the company it was profitable. Upon being asked by the committee before whom he was giving evidence to explain, he replied that—

"A man could draw two salaries, like Mr. Falkner and Judge Glidden—one from the Government and one from the company." (P. 191.)

Mr. Moulton's evidence is next presented (p. 19 of appendix). He was a Government agent from 1877 to 1885. He said that there was an apparent increase during the first five years, *i. e.*, to 1882, then a decrease to 1885. (Evidence, p. 255.) In this statement he has been contradicted by official reports, as will be shown.

The witness admits, however, that female seals, after giving birth to their young, *scatter* out in Behring Sea; and he is of opinion that lawless hunters kill all they find, and that they find mothers away from their nurslings. No special reason for this opinion is given, however.

A sailor, Edward Shields, of Vancouver, formerly on the sealing schooner *Caroline,* is said to have testified, where and when it is not stated (p. 20 of appendix to Mr. Blaine's letter), that in 1886 out of 686 seals taken by the *Caroline* the seals were chiefly females. Upon this it may be said that it is the custom among hunters to class all seals the skins of which are the size or near the size of the female as "females," for their guidance as to the quality of skins in the catch. It may also be remarked that it does not appear that these females were in milk, and this is always known when skinning the seal. "Dry cows" are caught, as has been admitted, and taking this evidence, given *ex parte* as it was, it is at best, if true, an exceptional case in a very small catch.

Mr. Glidden was recalled by the committee, and explained that his estimate of 40,000 skins was based on newspaper reports of the catch of the sealers. He was, of course, unable to show how many of these were taken near the Aleutian Islands, in the North Pacific, or on the west coast of British Columbia, or in the Puget Sound, but he evidently credits the whole estimated catch to Behring Sea. Consequently he was of opinion that sealing in Behring Sea should be ended, to lead to the better preservation of seal life.

It is to be observed that not one of these witnesses, whose opinions are relied upon both as to the catch, the habits, and sex of the seal in deep water and the method of shooting, etc., has had any experience as a hunter or with hunters. They were not experts. They were sent to the islands to see that the lessees performed their obligations as covenanted in the lease. The experience of most of them was limited to a few years' residence on the seal islands, associated with and under the natural influence of a company admittedly a monopoly and desirous of restricting the catch so as to control the market of the world as far as seals are concerned.

None of the witnesses were, moreover, submitted to a cross-examination, and they were to a large extent led by the examiners in the questions put to them. The only facts that were possibly within their knowledge relate to seal life on the islands, to the mode of killing, and to the times when killed there, and to their habits when in and upon the rookeries.

The opinions of the gentlemen given before the Congressional committee in 1888 for the most part, though sometimes contradictory, are in favor of the under-mentioned theories:

(1) That the female seals while nursing their young go great distances in search of food.

(2) That when out a great distance female seals are shot, and the pups on shore are lost for want of their mothers' care.

(3) That the greater part of the catch in Behring Sea is made up of female seals.

(4) That the destruction of the seals when hunted on the sea is great in consequence of many wounded seals being lost.

All of these opinions are put forward in support of the main proposition of the United States, viz, that since 1882, and especially since 1884, the number of seals usually collecting on the breeding ground has constantly diminished.

The Canadian Government joins issue upon this, and the counter assertion is made that there has been no appreciable diminution of seals frequenting the rookeries, and it is claimed that the seals are more numerous and more valuable upon the rookeries to-day than ever in their previous history; that this is the fact notwithstanding the rookeries have been for twenty years practically unprotected from frequent and most dangerous raids upon the actual breeding grounds and many other injuries, all within the control of the Government of the United States, as hereinafter specified:

The Canadian Government asserts that the seal life upon the islands can not only be maintained, but greatly increased, by the adoption on the part of the United States of—

First. An efficient means for the patrol and protection of the islands.

Second. By the prohibition of the killing of pups by the natives for food.

Third. By reducing the number of yearling seals to be killed by the lessees.

Fourth. By not permitting any killing of seals upon the islands, except in July, August, and September.

Fifth. By preventing the Aleuts from killing seals on their migration through the Aleutian Islands on their way to and from the breeding grounds.

In Mr. Blaine's dispatch to Sir Julian Pauncefort, of the 27th of January, 1890, he proceeds upon a somewhat different ground than the evidence already reviewed, in order to show the necessity for prohibition of sealing in the waters of Behring Sea.

The *ex parte* evidence before the Congressional committee satisfied that committee that "the present number of seals on St. Paul and St. George Islands has materially diminished during the last two or three years," viz., from 1886 to 1889, while Mr. McIntyre, whose evidence is so much relied upon by the United States, dates the decrease from 1882.

Mr. Blaine, however, adopts the view that the rookeries were in prime condition and undiminished until 1885, when, as he says, Canadian sealers made their advent into Behring Sea and the injury began.

It is therefore important to point out that the operations of the Canadian sealers were absolutely harmless compared with the numerous depredations upon the islands for the last century, which, however, have not yet begun to affect the value and number of seals on these wonderful rookeries.

Already evidence has been cited in this paper establishing the fact that extraordinary slaughter occurred prior to 1870, and that after all this, when the total number of seals on St. Paul and St. George Islands was admittedly less than now, it was deemed safe to permit 100,000 male seals of one year or over to be killed annually for twenty years, etc.

In 1870 Collector Phelps, of San Francisco, reported:

"I am assured the entire number taken south of the islands of St. George and St. Paul will aggregate, say, 10,000 to 20,000 per annum." (H. R. Ex. Doc. No. 35, 44th Cong., 1st sess.)

The Acting Secretary of the Treasury Department, in September, 1870, gave permission to the company to use fire-arms *for protection of the islands against marauders.* (H. R., 44th Cong., 1st sess., Ex. Doc. 83, p. 30.)

In 1872 Collector Phelps to Mr. Secretary Boutwell reports expedition fitting out in Australia and Victoria for sealing in Behring Sea with the object of capturing seals on their migrations to and from St. Paul and St. George Islands. Secretary Boutwell did not consider it expedient to interfere with these operations if they were carried on 3 miles from land.

In 1874 Mr. Secretary Sawyer, writing to Mr. H.W. Elliott, referred to British vessels taking fur-seals in United States waters and to the seals becoming more numerous.

In 1875 Mr. William McIntyre, an assistant agent of the Treasury, describes having been told that the crew of the schooner *Cygnet*, as she lay at anchor in Zapadnee Bay in 1874, were shooting seals from the deck, skinning them, and throwing the carcasses overboard, which was alarming the seals and driving them from their breeding grounds. And he said:

"I wished to give the captain of the vessel timely warning before proceeding to harsh measures. I had armed the natives with the intention of repelling by force any *attempts to kill seal on the rookeries or within rifle-shot of the shore*, if the crews still persisted in doing so after the receipt of my letter to the captain."

He described the operations of the *Cygnet* under the cliff near the rookery, which alarmed the seals so that they left the rookery in large numbers. (Ex. Doc. No. 83, p. 124, 44th Cong., 1st sess.)

This vessel is again reported by Special Agent Bryant in May 12, 1875. (Ex. Doc. 83, p. 125, 44th Cong., 1st sess.)

From 1874 to 1878 Mr. F. J. Morgan, attorney for the Alaska Company, was on the islands during the years 1868, 1869, and from 1874 to 1878. He speaks of several raids upon the islands in his time, and he says the whole question is *one or more cruisers to protect the rookeries on the islands.* (H. R. Ex. Doc. 3883, 50th Cong., pp. 58, 71, 109.)

In 1875 the evidence of Darius Lyman contains the following information. (Report, Committee on Ways and Means, House report No. 623, 44th Cong., 1st sess.)

Answering Mr. Burchand as to what he knew about the seizure of the *San Diego*, Mr. Lyman replied:

"There was a seizure made of the *San Diego*, a schooner, near St. Paul Island on the 27th of July last (1875), on board of which were 1,660 fur-seal skins. The *San Diego* was sent down to California, and arrived there in August."

On page 73 of the same report, Mr. Elliott, in answer to Mr. Chapin, says that the skins taken from the *San Diego* were from *Otter Island*, one of the leased group.

In 1880 Mr. McIntyre reported the estimated annual slaughter of 5,000 pregnant females on the British Columbia coast.

From reports of Special Agent Ottis and Captain Bailey respecting the people of Alaska and their condition (Senate Ex. Doc. 132, 46th Cong., 2d sess., vol. 4, p. 4), Captain Bailey says:

"During April and May all the coast Indians, from the mouth of the straits of Fuca to the north end of Prince of Wales Island, find profitable employment in taking fur-

seals which seem to be making the passage along the coast to the north, being probably a portion of the vast number that finally congregate at the Seal Island later in the season. I am informed by the Indians that most of the seals taken along this coast are females, and their skins find a market at the various Hudson Bay posts."

On page 34 of the same report, in a list of the vessels boarded, he gives the United States schooner *Loleta*, Dexter master, seized at the seal islands by Special Agent Ottis.

In a report by Special Commissioner Ivan Petroff in the year 1880, he says:

"As these seals pass up and down the coast as far as the Straits of Fuca and the mouth of Columbia River, quite a number of them are secured by hunters, who shoot or spear them as they find them asleep at sea. Also small vessels are fitted out in San Francisco, which regularly cruise in these waters for the purpose alone of shooting sleeping seal." (H. R. Ex. Doc. No. 40, 46th Cong., 3d sess., vol. 18, p. 65.)

At page 61 of the same report this officer speaks of the natives securing 1,200 to 1,400 young fur-seals *in transitu* through Oonalga Pass.

Special Agent D. B. Taylor, in 1881, states that the company was powerless to protect the islands, but *that if a harbor was built and a steam-launch stationed at each island they could be protected.* He states that vessels *go to the islands and kill* 10,000 *to* 15,000 *a year, and that one hundred vessels have been prowling about these islands for twenty years.* (H. R. Ex. Doc. No. 3883, 50th Cong., p. 58.)

Mr. Treasury Agent H. A. Glidden, who was on the islands from 1882 to 1885, shows that the trouble is at *the islands.* The hunters go there on moonlight nights. He stated that he took possession of a vessel while the crew were on shore killing seals. The Government, he goes on to say, did not keep vessels there in his time, and he recommended that a revenue cutter should be kept there to guard the islands. (H. R. Ex. Doc. 3883, 50th Cong., p. 28.)

Prior to the decision of the United States to arrest vessels outside the 3-mile limit in Behring Sea experience had shown that the police force at the islands could not protect them from raids. This is illustrated in a letter from the Secretary of the Treasury, Mr. W. McCulloch, dated the 24th of February, 1885, wherein he recommends that $25,000 be obtained for the protection of seals and the enforcement of the laws.

"The seal fisheries"—

He states—

"yield annually to the Government a revenue of about $300,000. The islands on which the seals are taken are protected from incursions of marauding vessels alone through the cruising of the revenue-cutters. Last year the officers of the *Corwin* seized a schooner engaged in taking seals unlawfully. Without the use of cutters the fur-seal industry has no protection."

The letter closes by asking for $25,000 "in the estimates for next year." (H. R. Ex. Doc. 252, 48th Cong., 2d sess., vol. 29.)

September 1, 1884, the Hamburgh schooner *Adele* was seized for violation of section 1956, Revised Statutes United States.

In 1884 Captain McLean, master of the schooner *Mary Ellen*, was in Behring Sea from the 8th of July to the 22d of August. He took 2,007 seals, and was not interfered with. (See his declaration under act for the suppression of extrajudicial and voluntary oaths.)

Mr. George Wardman, an officer of the United States Government, was at the seal islands May, 1885. He was also there in 1879, and, in addition to his evidence before the Congressional committee, he has reported to his Government and has written a book upon Alaska and Behring Sea, "Wardman's Trip to Alaska," published in 1884. At page 116 of this is given an account of the raiding of Otter Islands and the consequent request for a revenue-marine guard at that place during the sealing season, which was granted.

In 1885 Captain McLean again visited Behring Sea in the *Mary Ellen.* He was there from the 4th of July to the 3d of September. He took 2,300 seals, and was not interfered with.

Captain Healy, in reporting on the cruise of the *Corwin* in the Behring Sea, in 1885, when speaking of the seal fisheries, said:

"During the year quite a number of vessels have raided Alaskan waters for seals and other fur-bearing animals." (H. R. Ex. Doc. No. 153, 49th Cong., 1st sess., vol. 32.)

In 1886 the governor of Alaska, in his report for that year (p. 43), states that an indiscriminate slaughter was carried on *previous* to the seizures of 1885.

In 1886 Special Agent Tingle, to Secretary Fairchild, congratulated the Government on the arrest of the *San Diego*, which he called "an old offender." "This," Mr. Tingle remarked, "will do much to break up marauding business *around the islands.*" He further urged the Government to keep a cutter *about the islands* from July 1 to the 1st of November.

The above references, it is submitted, establish conclusively the defenseless con-

dition of the islands from the depredations of the marauders or poachers upon the rookeries (not one being a Canadian) ever since the islands came into the possession of the United States.

Mr. Blaine, in his dispatch of the 27th of January, 1890, remarks that—

"Proceeding by a close obedience to the laws of nature, and rigidly limiting the number to be annually slaughtered, the Government succeeded in increasing the total number of seals and adding correspondingly and largely to the value of the fisheries."

And in the same dispatch he speaks of the profitable pursuit of this business down to the year 1886.

To show that at the present time the value of the islands is greater and their condition is better than ever, it is only necessary to observe that while the late lessees paid to the Government of the United States an annual rental of $50,000 in addition to $2.62½ per skin for the total number taken, the offers, when the islands were put up for competition in 1890, were enormously exceeded, as will be seen on reference to a schedule of the proposals submitted to the United States' Treasury Department in response to the advertisements of the Treasury inviting offers for the privileges, dated December 24, 1889, and February 20, 1890.

Upon reference to the evidence before the Congressional committee (H. R. No. 3883, 50th Cong., 2d sess.), it will be seen that "the Government now, *without any care or risk*, gets $317,000 a year for the lease." And at page 99 of the same report it is stated that the annual income from skins to the Government was $512,736, and that in sixteen years the United States' Government received from the Alaskan fur-seal industry $8,203,776.

It is further stated that the Government had then already been repaid the capital sum paid for the whole Territory of Alaska, and more, with "her many varied, and, as I believe, incomparably great national resources, to represent the investment of capital first made."

"FIFTH.—THE RECEIPTS AND EXPENSES OF THE GOVERNMENT ON ACCOUNT OF SAID CONTRACT.

"The total amount paid by the lessees on account of said contract up to June 30, 1888, inclusive, was $5,597,100. The total amount expended by the Government during the same period was about $250,000 for salaries and traveling expenses of agents of the Treasury Department at the seal islands, and about $150,000 for the revenue-cutters cruising Alaskan waters.

"To the amount already received direct from the company should be added the sum received by the United States from customs duties on Alaskan dressed seal-skins imported from Europe, amounting to $3,426,000, to which should be added the sum of $502,000 customs duties on imported seal-skins taken by said company under its contract with Russia, making an aggregate amount received by the Government on account of this industry of $9,525,233, being $2,325,283 in excess of the amount paid to Russia for the Territory" (Report of Congress, 1888.)

It can now be shown how marvelous has been the increase of seals on these islands, notwithstanding the absence of the protection to the rookeries and 3-mile limit, whether around the islands or at the different passes in the Aleutian range, where the breeding seals in pup go twice a year.

In 1869 Special Agent Bryant estimated the number of seals to be as follows (41st Cong., 3d sess., No. 32, Senate, p. 7):

On St. Paul Island	1,152,000
On St. George Island	576,000
Total	1,728,000

In 1874 Mr. Elliott, after examination, estimated the number of seals to be:

On St. Paul Island	3,030,000
On St. George Island	163,420
Total	3,193,420

Exclusive of non-breeding seals, and adding those to the estimate of Mr. Elliott just quoted, he himself said that the total would reach 4,700,000.

In 1884, long after the period when McIntyre stated that the seals were decreasing—as he said since 1882—Mr. Wardman, when writing from the islands, tells us—

"The number of seals is steadily increasing." ("A Trip to Alaska," p. 93.)

Mr. H. A. Glidden, an agent of the Treasury from 1882 to the 8th of June, 1885, an authority quoted by Mr. Blaine in support of the United States' contention, told the Congressional committee in 1888, in replying to the question, "What do you say

about the increase or diminution of the number of seals on the rookeries of St. Paul and St. George?"

"I did not notice any change. * * * I could not see any particular difference. They come and have their young and go away. The period of gestation is eleven months, and then they come back in the spring following. They are there during the season in countless numbers." (Evidence before Congressional committee, p. 27.)

Mr. George R. Tingle, a special agent of the Treasury, gave his evidence before the same committee, and he is put forward by Mr. Blaine in support of the United States' contention. (Appendix to Mr. Blaine's letter to Sir Julian Pauncefote, March 1, p. 17.)

Confirming Mr. Glidden's opinion, as above quoted, Mr. Tingle said:

"From Mr. Elliott's statement I understand that there are no more seals *now* than there were in 1872. I am at a loss to know how Mr. Elliott got his information, as he had not been on the islands for fourteen years."

The same Mr. Tingle, in 1887, reported to Secretary Fairchild that—

"He found the lines of occupancy extending beyond those of last year, and the cows quite as densely packed on the ground on most of the rookeries, whilst on two rookeries there is some falling off. *It is certain*, however, this vast number of animals, so valuable to the Government, are still on the increase. The condition of all the rookeries could not be better." (Appendix to report, Congressional committee, 1888, p. 359.)

In a report of the Alaska Commercial Company (December 13, 1887), it is stated that Mr. George R. Tingle, the agent appointed by the Secretary of the Treasury, substantially confirms Mr. Elliott in his view referred to above, excepting that, upon a careful survey by himself in 1886, he estimated that the fur-seals upon the two islands had increased in number about 2,000,000 up to that time. Mr. Tingle's estimate for 1886 is 6,537,750 (H. R. Ex. Doc. No. 31, 50th Cong., 1st sess.), and in December the Alaska Commercial Company, in their report, said that the seals were on the increase.

The latest definite information appearing in the United States documents regarding the condition of the rookeries is contained in the report of Mr. Tingle, who, as special agent of the Treasury Department, wrote from St. Paul Island, Alaska, July 31, 1888, as follows:

"I am happy to be able to report that, although late landing, the breeding rookeries are filled out to the lines of measurement heretofore made, and some of them much beyond these lines, showing conclusively that seal life is not being depleted, but is fully up to the estimates given in my report of 1887."

From the above United States officials it is clear that, with only partial protection on the islands, the seals have increased in an amazing degree. These islands, containing in 1874 the largest number of seals ever found in the history of sealing at any place, contain to-day a more astounding number.

When the number was less than half of what it is at present, Lieut. Washburn Maynard, of the U. S. Navy, was instructed to make an investigation into the condition of the fur trade of the Territory of Alaska, and in 1874 he reported that 112,000 young male seals had been annually killed in each year, from 1870 to 1874, on the islands comprising the Pribylov group, and he did not think that this diminished the numbers. Lieutenant Maynard's report (44th Cong., 1st sess., H. R. No. 43), as well as that of Mr. Bryant in 1869 (Ex. Doc. No. 32, 41st Cong., 2d sess.), largely supports the contention of the Canadian Government respecting the productiveness of the seal and their habits during the breeding season.

It is not denied that seals enter Behring Sea for the purpose of resorting to the islands to propagate their species, and because the immense herd is chiefly confined to the islands for this purpose during the breeding season it is that the seals have so constantly increased.

Notwithstanding the lax efforts on the part of the United States to guard or patrol the breeding islands, the difficulty of approaching the rough coasts thereof, the prevalence of fogs and other causes have, in a large degree, prevented too destructive or too numerous raids being made upon the rookeries.

The Canadian Government contends that while seals in calf are taken on and off the coasts of British Columbia and California, and also during their migrations near the Aleutian Islands by Indians and Aleuts, the bulk of the seals taken in the open sea of that part of the Pacific Ocean called Behring Sea are bulls both old and young—but chiefly young—and that most of the cows when taken are known as "dry cows," *i. e.*, cows that have nursed and weaned their young, or cows that are barren, or those that have lost pups from natural causes.

It must also be noted that there are more females than males in a herd of seals. ('Trip to Alaska," Wardman, p. 94.)

The position taken by the Canadian Government is supported:

(1) By the history of the rookeries as above given and the great increase shown despite the constant killing and raids upon the islands during the past century.

(2) By the fact that the old bulls that have been able to hold their position on the rookeries go into the water at the end of the rutting season, between 1st and 10th of August. (H. R. Ex. Doc. No. 83, 44th Cong., 1st sess., app., p. 132.)

Mr. Clark, on the Antarctic seal fisheries, in "The Fisheries and Fishery Industries in the United States," 1887, pp. 423, 424, says:

"In very stormy weather, when they (the seals) are driven into the sea, they are forced to betake themselves to the sheltered side of the island, hence the men find that stormy weather pays them best. Two or three old males, termed "beach masters," hold a beach to themselves and cover it with cows, but allow no other males to haul up. The males fight furiously, and one man told me that he had seen an old male take up a younger one in his teeth and throw him into the air. The males show fight when whipped, and are with great difficulty driven into the sea.

"They are sometimes treated with horrible brutality. The females give birth to the young soon after their arrival.

"After leaving the rookeries the bulls do not return to them again that season."

(3) By the fact that two-thirds of all the males that are born are never permitted to land upon the same ground with the females. This large band of bachelors, *when it visits land*, herds miles away from the breeding grounds. (H. W. Elliott, H. R. No. 3883, 50th Cong., p. 112.)

They are driven off into the water. (Clark's article on Antarctic seal fishery industries of the United States, sec. v, vol. ii, 1887, p. 431.)

Young seals are prevented from landing on rookeries. (Ex. Doc. 83, 44th Cong., 1st sess., p. 93; see also Elliott, H. R., 44th Cong., 1st sess., Ex. Doc. No. 83.)

Yearling seals arrive about the middle of July accompanied by a few of the mature males, remaining a greater part of the time in the water. (H. H. McIntire, 41st Cong., 2d sess., H. R. No. 36, p. 14; also H. R. Ex. Doc. 43, 1st sess., 44th Cong., p. 4.)

Mr. Samuel Falkner, assistant Treasury agent, writing from St. George Island August 1, 1873, to Mr. Bryant, Treasury agent for the seal islands, says:

"I notice on some of the rookeries the passage ways, formerly occupied by young bachelors in hauling upon the background, are completely blocked up by females, thus preventing the young seals from landing, and, as the greater portion of this island shore is composed of high cliffs, it renders it difficult for any great number to effect a landing. There are also numerous old males constantly guarding the shore line, which makes it still more difficult for the young ones to work their way on the background."

Then, again, it must be remembered that the non-breeding seals, consisting of all the yearlings and all the males under six or seven years of age, nearly equal in number the breeding seals, and Mr. Elliott estimated, when there were 4,700,000 seals on the island, 1,500,000 of this number were non-breeding seals. (Elliott, app. to H. R. Ex. Doc. No. 83, 44th Cong., 1st sess., p. 79.)

On thick, foggy days bachelor seals numbering over a million will often haul out on different hauling grounds, and on the recurrence of fine weather disappear into the water. (Elliott, p. 144, H. R., 44th Cong., 1st sess., Ex Doc. 83.)

The young bachelors do not remain on shore long at a time. (P. 4, 44th Cong., 1st sess., Ex. Doc. No. 43.) They are so numerous, however, that thousands can be seen upon the hauling grounds, as all of them are never either on shore or in the water at the same time. (*Ibid.*, p. 44.) By the fact that the cows remain with their pups and suckle them until all have left.

They do not go on the rookeries until three years of age. (H. R. Ex. Doc., 44th Cong., 1st sess., No. 43, p. 4.)

They do not go far from shore until the young are reared. Peron says that both parent elephant seals stay with the young without feeding at all until the young are six or seven weeks old, and that then the old ones conduct the young to the water. (Clark's article on Antarctic seals, p. 424.)

The young are suckled by the females for some time and then left to themselves, lying on the beach, where they seem to grow fat without further feeding. ("The Fisheries and Fishing Industries of the United States," sec. v, vol. ii, 1887, p. 424.) For this reason those that are pupped in June are off in the water in August.

So, also, on the African coast the seal remains until the young can take care of themselves. (*Ibid.*, p. 416.)

The bulk of the seals are confined to the islands until ice surrounds them. (H. R. Ex. Doc. No. 45, 44th Cong., 1st sess., p. 2.)

The seals never leave their places, seldom sleep, and never eat anything from May to August, when they take to the water, but, it is believed, take no food until their final departure in November. (H. H. McIntyre, H. R. Ex. Doc. No. 36, 41st Cong., 2d sess., vol. 5.) Mr. Elliott says, "perhaps she feeds." (P. 130 his report on Alaska, 1874, H. R. No. 83 Ex. Doc., 44th Cong.)

The bulls, while on the island, prevent the mothers taking to the water. (Marine mammals, by Captain Shannon, "United States Revenue Marine," 1874, p. 152.)

From 10th to 25th of July the rookeries are fuller than at any other time during the

season, as the pups have all been born, and all the bulls, cows, and pups *remain within their limits.* (H. R. Ex. Doc. No. 43, 44th Cong., 1st sess., p. 3.)

It has been shown that when in the rookeries mothers were destroyed, the young were found dead, etc., but Professor Elliott, in reference to the Pribylov Islands, says:

"With the exception of those animals which have received wounds in combat, no sick or dying seals are seen upon the islands.

"Out of the great numbers, thousands upon thousands of seals that must die every year from old age alone, not one have I ever seen here. They evidently give up their lives at sea." (His report on Alaska, 1874, H. R. Ex. Doc. 83, 44th Cong., p. 150.)

To further prove that the contention of the Canadian Government is not at all unreasonable, it may be said that at the International Fisheries Exhibition, London, 1883, Mr. Brown Goode, of the U. S. Fish Commission, having stated the regulations of the United States concerning the Pribylov group, the official report upon the exhibition, says:

"Every animal, both in sea and on land, reproduces its kind in greater numbers than can possibly exist. In other words, all animals tend to multiply more rapidly than their food; many of them must in consequence either die or be destroyed, and man may rest satisfied that so far as the open ocean is concerned, the fish which he destroys, if he abstain from destroying, would perish in other ways. With respect to the former (seals), I have already pointed out that the restriction which the United States' Government has placed on the destruction of seals in the Alaskan islands seem unnecessarily large."

He added that nature has imposed a limit to their destruction.

Professor Elliott himself was of the opinion in 1874 (see his report on Alaska already referred to, pp. 88, 89) that—

"With regard to the *increase* of the seal life, I do not think it within the power of human management to promote this end to the slightest appreciable degree beyond its present extent and condition in a state of nature; for it can not fail to be evident, from my detailed description of the habits and life of the fur-seal on these islands during a great part of the year, that, could man have the same supervision and control over this animal during the *whole* season which he has at his command while they visit the land, he might cause them to multiply and increase, as he would so many cattle, to an indefinite number, only limited by time and means; but the case in question, unfortunately, takes the fur-seal six months out of every year far beyond the reach, or even cognizance of any one, where it is exposed to known powerful and destructive natural enemies, and many others probably unknown, which prey upon it, and, in accordance with a well-recognized law of nature, keep it at about a certain number, which has been for ages, and will be for the future, as affairs now are, *its maximum limit of increase.* This law holds good everywhere throughout the animal kingdom, regulating and preserving the equilibrium of life in a state of nature. Did it not hold good, these seal islands and all Behring Sea would have been literally covered, and have swarmed with them long before the Russians discovered them; but there were no more seals when first seen here by human eyes in 1786–'87 than there are now, in 1874, as far as all evidence goes.

* * * * * * *

"What can be done to promote their increase? We can not cause a greater number of females to be born every year; we do not touch or disturb these females as they grow up and live, and we save more than enough males to serve them. Nothing more can be done, for it is impossible to protect them from deadly enemies in their wanderings for food.

"This great body of four and five millions of hearty, active animals must consume an enormous amount of food every year. They can not average less than 5 pounds of fish each per diem (this is not half enough for an adult male), which gives the consumption of over *three million tons* of fish every year!

"To get this immense food supply the seals are compelled to disperse over a very large area of the North Pacific and fish. This brings them into contact more and more with their enemies as they advance south, until they reach a point where their annual destruction from natural foes is equal to their increase, and at this point their number will remain fixed. About the seal islands I have failed to notice the least disturbance among these animals by anything in the water or out, and from my observation I am led to believe that it is not until they descend well to the south in the North Pacific that they meet with sharks and voracious killer-whales."*

The following extract from the report of Mr. H. H. McIntyre, special agent of the Treasury at the islands in 1869, largely supports the foregoing views:

"The habits of the fur-seal are peculiar, and in considering the action necessary

---

* "In the stomach of one of these animals (year before last) *fourteen* small harp-seals were found."—*Michael Carroll's report, Canadian Fisheries,* 1872.

to their protection deserve careful attention. From the statements of the employés of the late Russian-American Company, the information derived from the intelligent native chief of St. Paul Island, and my own observation during the summer of 1869 I have reached the following conclusions: The seals reach the islands of St. Paul and St. George in May, June, and July of each year in the following order: first, a small number of old male seals, known as *wigs*, visit the islands ve y early in the spring, or as soon as the ice has melted sufficiently to allow them to reach the rocks upon the shore. Their object at this time seems to be solely to reconnoiter their old rookeries with a view to re-occupy them, if they have not been disturbed, and the natives, so understanding it, avoid any noise likely to alarm them, and in case the wind is in such direction as to carry the smoke from the settlement towards the rookeries all fires are extinguished. After a few days these pioneers take their departure, and as the season advances, if they have been undisturbed on the occasion of their first visit, they return, bringing with them all the males of mature age, above five or six years old, who are able to maintain their places in the breeding rookeries. Climbing up on the rocks, each seal selects his position and takes possession of and occupies through the season, if sufficiently strong, from 1 to 3 square rods of ground.

"Still later in the season, when the ice has nearly disappeared, the females arrive, conveyed by the young males above one year of age, who are unable to occupy the rookeries with their seniors. The females, immediately on reaching the shore, are appropriated by the old males and taken to the places respectively selected by them for the season, which is generally the same for many successive years. It is asserted that the same male seal has been known to occupy one rock for more than twenty seasons. The young seals above one year of age, called bachelors, take their positions around the edges of the rookeries or remain in the water, and are constantly trying to steal the females from their respective masters, who also rob each other of their families, by stealth or strength, whenever occasion offers, and thus an incessant quarrel is maintained at all points, which keeps the old males constantly on the alert. They never leave their places, seldom sleep, nor do they eat anything whatever during the entire season from May to August, when they go into the water, but, as far as can be ascertained, take no food until their final departure in November. It may be remarked, however, that they are very fat on arrival and quite as lean at the time of leaving, in autumn. The young seals are supposed to feed while in the water, but this has not been definitely proved, nor is the nature of their food well known, since an examination of their stomachs seldom reveals more than a green, mucilaginous matter. Following all others, the yearling seals arrive about the middle of July, accompanied by a few of the older males, and remain for the greater part of the time in the water. Soon after their arrival, in the months of June and July, the females bring forth their young." (Ex. Doc., 41st Cong., 2d sess., No. 36, p. 14.)

Reference has been made to the raids upon the rookeries, and to the fact that insufficient care has been taken of the breeding ground. It is contended that it is the duty of the Government drawing an enormous rental from these islands to carefully guard and protect them, and it is undoubted that with efficient protection the increase of seal life will be more marvelous than ever.

Mr. Tingle, in 1886, in his report to Secretary Fairchild, urges the Government to keep a cutter around the islands from the 1st of July to the 1st of November.

Mr. Morgan, in 1888, in his evidence before Congress (p. 23), said there were not sufficient cutters for the protection of the islands, and Mr. Wardman, special agent of the Treasury at the islands, 1881 to 1885, said:

"I think the Government ought to keep at least one revenue steamer therein and about these two islands up until the middle of October at least. The trouble has been in the revenue marine service. The appropriations were all right, and a fellow would be sent up to nominally protect the seal islands, but he would also be ordered to look for the north pole as well as watch the seal islands. He might find the north pole, but not around the seal islands. He would be away just at the time he would be needed around there." (Evidence before Congressional committee, p. 38.)

The Hon. Mr. Williams said:

"The Government practice, through the Treasury Department, has been to protect these waters so far as they could with the revenue-cutters which are at their command. Still, it has frequently happened that a revenue-cutter goes upon the seal ground and then is ordered north for inspection, or for the relief of a whaling crew or something of that kind, and they are gone pretty much the whole time of the sealing season, and there seems to be an insufficiency in the method of protection." (Evidence before Congressional committee, p. 106.)

Mr. Taylor, special agent of the Treasury in 1881, said before the same committee (p. 58):

"The difficulty heretofore has been that our revenue-cutters have been obliged to cover a territory of 800 miles long and 700 or 800 miles wide, north and south, and they would get around to the seal islands about twice during a season. They never happened to be there when needed, and, as far as rendering any service whatever is con-

cerned, they were practically useless so far as the seal islands were concerned. That has been the experience, I believe, of all who have been there."

This officer recommended steam-launches for Government agents at the islands. (Evidence before Congressional committee, p. 109.)

Mr. Glidden, another agent of the Treasury from 1882 to 1885, says (evidence Congressional committee, p. 28) when he was at the islands the Government kept no vessels there.

"They landed our officers on a little island 6 miles from St. Paul to watch. * * * In every report I made I recommended that they should keep a revenue-cutter there. One vessel can not protect those islands and visit the Arctic Ocean besides. The cruising ground is far too extensive, covering, as it does, a distance of several thousand miles, and while the cutter is absent in the Arctic much damage can be done by the marauding vessels to the seal islands."

That Congress regarded it at the outset as the duty, at least, of the administration, to simply guard and regulate the islands is clear from the act first dealing with the subject.

Mr. Boutwell, the Secretary of the Treasury, reported in 1870 (41st Cong., 2d sess., Ex. Doc. 109) as follows:

"A suggestion has been made to this Department, in various forms, that the Government should lease these islands for a long period of time to a company or firm, for an annual sum of money, upon the condition that provision should be made for the subsistence and education of the natives, and that the fisheries themselves should be preserved from injury. This plan is open to the very grave objection that it makes a monopoly of a branch of industry, important not only for the people of the islands but to the people of the United States, if the preparation and manufacture of the skins for use should be transferred from London to this country. Such a monopoly is contrary to the ideas of the people, and not many years would pass before serious efforts would be made for its overthrow. Moreover, the natives of the islands would be under the control of the company, and, as the expiration of the lease approached, the inducements to protect them and preserve the fisheries would diminish, especially if the company saw, as would probably be the case, that it had no hope of a renewal of its privileges. Under these circumstances the Government of the United States would necessarily be subjected to great expense and trouble.

"For these reasons, briefly stated, but valid, as they appear to me, I can not concur in the suggestion that the islands should be leased to any company for a period of years.

"Inasmuch as it will be necessary for the Government of the United States to maintain in and around the islands a military and naval force for the protection of its interests under any plan that can be devised, I am of opinion that it is better that the Government should assume the entire control of the business of the islands, and exclude everybody but its own servants and agents; that it should establish a rigid system of police, excluding from the islands distilled spirits and fire-arms, and subject vessels that touch there to forfeiture, except when they are driven to seek shelter or for necessary repairs. The conditions of such occupancy and control by the Government of the United States seem to me to be these:

"First, the exclusion of other parties; second, the supply to the natives of such articles as they are accustomed to use; third, compensation to the natives for their labor, and the payment of a sufficient additional sum each year to enable them to live in the manner to which they have been accustomed; fourth, an equitable division of the value of the skins over the payments made to the natives, and the cost to the Government of the United States of maintaining such force as is necessary for the protection of the business.

"The portion of the surplus equitably belonging to the natives might be set aside for the purpose of education and religious teaching, the erection of more suitable dwellings than they now possess, and generally for their physical, intellectual, and moral improvement.

"If the Government were to lease the islands it would not be possible to withdraw entirely the military and naval forces, or to neglect a careful supervision, and the additional expense consequent upon retaining possession of the business of the islands in the hands of the Government would not be large.

"Ordinarily, I agree in the opinion that a government, especially one like that of the United States, is not adapted to the management of business; but this clearly is a business which can not be left open to individual competition; and if it is to be a monopoly, whether profitable or otherwise, the interest of the Government is so large, and the expenses incident to the protection of these islands so great, that it can not afford to substitute to any extent the monopoly of an individual or of a company for its own lawful supervision.

"Should the Government fail in the attempt to manage the business through its own agents, there will then be opportunity to lease the fisheries to private parties;

but my opinion is that a larger revenue can be obtained from them by actual management than by a lease.

"In further reply to the resolution, I have to say that the skins taken in 1868 were removed by Messrs. Kohl, Hutchinson & Co., the Solicitor of the Treasury being of opinion that the Government had no legal authority to detain them. Those taken in 1869 are upon the islands, but no decision has been made touching the rights of the Government.

"In concluding this report, I desire to call the attention of Congress to the fact that it is necessary to legislate immediately so far as to provide for the business of the present year. The natives will commence the capture of seals about the 1st of June.

"If the islands are to be leased for the present year it should be done immediately, that the lessee may make provision for the business of the year. If the business of the present year is to be conducted by the Government, as I think it should be, whatever our future policy, legislation is necessary; and I suggest that the Secretary of the Treasury be authorized to appoint agents in Alaska, who shall be empowered to superintend the capture of the seals and the curing of the skins; and that an appropriation shall be made of $100,000, out of which the natives shall be paid for the labor performed by them and the other expenses incident to the business met.

"The Secretary of the Treasury should also be authorized to sell the skins at public auction or upon sealed proposals at San Francisco or New York, as he may deem most for the interest of the Government.

"It should be observed in this connection that the Government derived no benefit whatever from the seal fishery of the year 1868, and that the skins taken in 1869 are, nominally at least, the property of two companies, while the Government, during the last year, has furnished protection to the natives and the fishery, and has no assurance at present that it will derive any benefit whatever therefrom.

"If legislation is long delayed the business of the year 1870 will be but a repetition of that of 1869."

While the Canadian contention is supported, as has been seen, by many extracts from the reports of officials of the United States Government, it is apparent that the desire of the lessees, and indirectly that of the officials, has been to create a monopoly in the fur-seal industry, since in this way the market for the skins is largely enhanced and the value of the islands greatly increased.

This is no doubt one reason for the divergent opinions entertained as to the best regulations for the preservation of seal life between those who control the islands and those who are compelled to hunt the seals in the ocean.

In support of the above assertion the following authorities are in point:

Mr. Bryant, in 1869 (Senate Ex. Doc. No. 32, 41st Cong., 2d sess.), stated that the large number taken in 1867 and in 1868 decreased the London valuation to $3 and $4 a skin.

Mr. Moore, in a report to the Secretary of the Treasury (H. R. Ex. Doc. No. 83, p. 196, 44th Cong., 1st sess.), says, when alluding to the advisability of killing more seals than prescribed by the act of July 1, 1870:

"It seems that the 100,000 fur-seals from our own islands, together with the 30,000 obtained by them from Asiatic islands, besides the scattering fur-seals killed in the south seas, are all the market of the world can conveniently take. In fact, it is pretty evident that the very restriction of the numbers killed is about the most valuable part of the franchise of the Alaska Commercial Company, and it is only another proof of the absurdity of the frequent charges made against them that they surreptitiously take from our islands 20,000 to 30,000 more seals than they are entitled to take.

* * * * * * *

"There does not exist any doubt, nor indeed is it denied by the Alaska Commercial Company, that the lease of the islands of St. Paul and St. George is highly lucrative. The great success of this franchise is, however, owing, as far as I could ascertain, to three principal causes: First, the Alaska Commercial Company, owing to the fact that they have the sole control of the three Asiatic islands on which fur-seals are found, as well as on our own islands, as St. Paul and St. George, virtually manage the sale of 80 per cent. of all the fur-seals killed annually in the world; secondly, the arbitrary and somewhat eccentric law of fashion has raised the price of fur-seals in the markets of the world during the last four years fully 100 per cent. in value; thirdly, time and experience have given this controlling company most valuable advantages. For instance, in the island of St. Paul, where a reputed number of from 3,000,000 to 3,500,000 of seals congregate, the comparatively small quantity only of formerly 75,000 and now 90,000 are killed. The company employs experts in selecting easily the kind that are the most valuable in the market, and have no difficulty in getting 90,000 out of a flock of 3,000,000 to 3,500,000, which are the select of the select; and it is owing to this cause, and to the care taken in avoiding cuts in the skins, as also in properly preparing them for the market, that the high prices are

obtained. Indeed, the fact is that a fur-seal selling now in London for £2 10*s.* or £3 is, owing to its superior quality and excellent condition, cheaper than the fur-seals which five years ago fetched 30 shillings sterling. The former mode of the indiscriminate killing of fur-seals was as detrimental to the value of the skins as it was to the existence of the breed. With such a valuable franchise, secured by a contract that has still fifteen years to run, but which could, without notice, be terminated by the Secretary of the Treasury for cause, it would indeed be a suicidal policy on the part of the company to infringe on the stipulations of the contract."

All this is explained in the evidence before the Congressional committee, pages 77, 101, 105, and 121, where the company is shown not to have taken the full quota in two years.

"Not because we could not get enough seals, but because the market did not demand them. There were plenty of seals." (Evidence before Congressional Committee, p. 121.)

Mr. McIntyre, once a special agent, has already been quoted, and was afterwards in the service of the company, reported, in 1869, to the Speaker of the House of Representatives, Mr. Blaine (H. R. Ex. Doc. No. 36, 41st Cong., 2d sess.), that—

"The number of skins that may be secured, however, should not be taken as the criterion on which to fix the limit of the yearly *catch*, but rather the demand of the market, keeping, of course, always within the annual production. It appears that under the Russian management a much larger number was sometimes killed than could be advantageously disposed of. Thus, in 1803, after the slaughter had been conducted for some years without regard to the market, an accumulation of 800,000 skins was found in the storehouses on the islands, 700,000 of which were thrown into the sea as worthless. At several times since that date the market has been glutted, and sales almost or quite suspended. A few months previously to the transfer of Alaska to the United States seal-skins were worth in London only $1.50 to $3 each, and several thousand skins owned by the Russian-American Company were sold to parties in San Francisco, at the time of the transfer, at 50 cents to $1.25, a sum insufficient to pay the present cost of securing and transporting them to that city. Soon afterwards, however, fur-seal garments became fashionable in Europe, and in the expectation that the usual supply would be cut off by reason of the transfer of Alaska, prices advanced to $4 to $7 per skin; contrary to the expectation of dealers more than 200,000 skins were taken by the various parties engaged in the business on the islands in 1868, and the London price has declined to $3 to $4 per skin; and I am assured that if the raw skins now held by dealers in London were thrown upon the market, a sufficient sum to pay the cost of transportation from the islands could hardly be realized. The number of raw skins now upon the market is not less than 350,000, and it is predicted that several years must elapse before the demand will again raise the price above the present rate, if, indeed, the large surplus of skins does not carry it much lower before reaction begins."

Many of the dangers to seal life have been mentioned, and it has been shown that the herd still thrives; but the wonderful productiveness of the seal is further shown by an allusion to a danger greater than all the assaults of man in the deep sea—a danger ever existing, which naturally tends to keep the seals inshore, or, when outside, to scatter.

Reference is made to the killer-whales and sharks. (H. R. Ex. Doc. 83, 44th Cong., 1st sess., p. 177, and pp. 80, 87 of appendix to the same document; also page 359 of evidence before Congressional committee, 1888.)

"That these animals are preyed upon extensively by killer-whales (*Orca gladiator*) in especial, and by sharks, and probably other submarine foes now unknown, is at once evident; for were they not held in check by some such cause they would, as they exist to-day on St. Paul, quickly multiply, by arithmetical progression, to so great an extent that the island, nay, Behring Sea itself, could not contain them. The present annual killing of 100,000 out of a yearly total of over a million males does not in any appreciable degree diminish the seal life, or interfere in the slightest with its regular, sure perpetuation on the breeding grounds every year. We may, therefore, properly look upon this aggregate of four and five millions of fur-seals as we see them every season on these Pribylov Islands as the maximum limit of increase assigned to them by natural law. The great equilibrium which nature holds in life upon this earth must be sustained at St. Paul as well as elsewhere. (Elliott's report, pp. 62, 64.)

"When before the Committee of Ways and Means on the 17th of March, 1876, on the investigation before alluded to, Mr. Elliott made a similar statement, giving in somewhat greater detail the reasons for his conclusions. His evidence will be found annexed to the report of the committee." (Report No. 623, H. R., 44th Cong., 1st sess.)

Respecting the practice of sealing as known in Canada, it may be said: Canadian sealers start out upon their sealing voyages some time in the beginning of the year. The vessels go down to a point off San Francisco, and from thence work north. The

seals taken by them off the coast are of both sexes, many in pup, some young bulls; very few old bulls run in the Pacific Ocean.

The catch of each vessel will average between 500 and 700 seals a year between 1st of January and the end of May.

When an untrained crew is taken, many shots may be fired without hitting the seals at all, since the novice expects he can hit when at considerable distance, the seals in such cases escaping entirely; but with Indian hunters and expert whites a seal is nearly always captured when hit. An expert never shoots until after he has arrived at close quarters, and generally when the seal is asleep.

In Behring Sea the catch is made up largely of young bachelors.

Sealing captains contend that no male becomes fit for the rookeries until six years of age. This contention is supported by the authorities to whom reference has already been made.

It is further contended that should a temporary diminution of seal life become apparent upon the islands of the Pribylov group, it would not follow that the herds were decreasing. Professor Elliott, in his report of 1874 upon Alaska, so frequently referred to in this paper, argues on pages 265 and 266 that in such a case a corresponding augmentation may occur in Copper or Behring Island, since "these animals are not particularly attached to the respective places of their birth."

"Thus it appears to me necessary that definite knowledge concerning the Commander Islands and the Kuriles should be possessed; without it I should not hesitate to say that any report made by an agent of the Department as to a visible diminution of the seal life on the Pribylovs due, in his opinion, to the effect of killing as it is conducted was without good foundation; that this diminution would have been noticed just the same in all likelihood had there been no taking of seals at all on the islands, and that the missing seals are more than probably on the Russian grounds.'

[Inclosure 4.]

NOTE ON THE QUESTION OF THE PROTECTION OF THE FUR-SEAL IN THE NORTH PACIFIC.

(By Mr. George Dawson, D. S., F. G. S., F. R. S. C., F. R. M. S., Assistant Director of the Geological Survey of Canada.)

The mode of protection which is apparently advocated by the United States Government in the case of the fur-seal, viz, that of leasing the privilege of killing the animal on the breeding grounds and prohibiting its capture elsewhere, is a new departure in the matter of such protection. If, indeed, the whole sweep of the Pacific Ocean north of the equator was dominated and effectively controlled by the United States, something might be said in favor of some such mode of protection from a commercial point of view; but in the actual circumstances the results would be so entirely in favor of the United States, and so completely opposed to the interests and natural rights of citizens of all other countries, that it is preposterous to suppose that such a mode of protection of these animals can be maintained.

Such an assumption can be based in this case on one or other only of two grounds:

Stated briefly, the position of the United States in the matter appears to be based on the idea of allowing, for a money consideration, the slaughter of the maximum possible number of seals compatible with the continued existence of the animals on the Pribylov Islands, while, in order that this number shall not be reduced, no sealing is to be permitted elsewhere.

(1) That Behring Sea is a *mare clausum*.

(2) That each and every fur-seal is the property of the United States.

Both claims have been made in one form or other, but neither has, so far as I know, been officially formulated.

The first is simply disproved by the geographical features of Behring Sea, by the fact that this sea and Behring Strait contribute the open highway to the Arctic and to part of the northern shore of Canada, by the previous action of the United States Government when this sea was nearly surrounded by Russian territory, and by the fact that from 1842 to the date of the purchase of Alaska fleets of United States and other whalers were annually engaged in Behring Sea. It is scarcely possible that any serious attempt will be made to support this contention. (Bancroft's History, vol. 33, Alaska, p. 583 *et seq.*)

The second ground of claim is candidly advanced by H. W. Elliott, who writes:

"The fur-seals of Alaska, collectively and individually, are the property of the General Government. * * * Every fur-seal playing in the waters of Behring Sea around about the Pribylov Islands, no matter if found so doing 100 miles away from

those rookeries, belong there, has been begotten and born thereon, and is the animal that the explicit shield of the law protects. No legal sophism or quibble can cloud the whole truth of my statement. * * * The matter is, however, now thoroughly appreciated and understood at the Treasury Department, and has been during the past four years, as the seal pirates have discovered to their chagrin and discomfiture." (U. S. 10th Census, vol. 8, Fur-Seal Islands, p. 157.)

Waiving for the moment the general objection which may be raised to the enforcement of such a principle on the high seas—an enforcement which the United States, in the interest of the Alaska Fur Company, appear to have undertaken—the facts upon which the assumption are based may be questioned. Mr. Elliott, in fact, himself writes, on the same page (referring to the presence of a large sealing fleet in Behring Sea), that it could not fail "in a few short years in so harassing and irritating the breeding seals as to cause their withdrawal from the Alaska rookeries, and probable retreat to those of Russia—a source of undoubted Muscovite delight and emolument and of corresponding loss and shame to us."

This remark implies that the seals may resort to either the Pribylov or the Russian islands, according to circumstances; and who is to judge, in the case of a particular animal, in which of these places it has been born? The old theory that the seals returned each year to the same spot has been amply disproved. Elliott himself admits this, and it is confirmed (op. cit., p. 31) by Capt. Charles Bryant, who resided eight years in the Pribylov Islands as Government agent, and who, having marked 100 seals in 1870, on St. Paul Island, recognized, the next year, 4 of them in different rookeries on that island and 2 on St. George Island. (Monograph on North American Pinnipedes, Allen, 1880, p. 401.)

It is, moreover, by no means certain that the fur-seals breed exclusively on the Russian and United States seal islands of Behring Sea, though these islands are no doubt their principal and important breeding places. They were formerly, according to Captain Shannon, found in consider able numbers on the coast of California; and Capt Bryant was credibly informed ("Marine Mammals of Coast of Northwest North America," p. 152, 154, quoted by Allen, op. cit., p. 332) of the existence in recent years of small breeding colonies of these animals on the Queen Charlotte Islands of British Columbia. Mr. Allen further quotes from the observations of Mr. James G. Swan, field assistant of the United States Commissioner of Fish and Fisheries.

"Mr. Swan" (I quote from Mr. Elliott) "has passed nearly an average life-time on the Northwest coast, and has rendered to natural science and to ethnology efficient and valuable service."

His statements may therefore be received with respect. He writes:

"The fact that they (the fur-seals) do bear pups in the open ocean, off Fuca Strait, is well established by the evidence of every one of the sealing captains, the Indians, and my own personal observations. Dr. Power says the facts do not admit of dispute. * * * It seems as preposterous to my mind to suppose that all the fur-seals of the North Pacific go to the Pribylov Islands as to suppose that all the salmon go to the Columbia or Fraser River or to the Yukon."

To this Prof. D. S. Jordon, the well-known naturalist, adds:

"I may remark that I saw a live fur-seal pup at Cape Flattery, taken from an old seal just killed, showing that the time of bringing them forth was just at hand."

On these statements Mr. Allen himself remarks:

"These observations, aside from the judicious suggestions made by Mr. Swan, are of special interest as confirming those made some years ago by Captain Bryant, and already briefly recorded in this work. They seem to show that at least a certain number of fur-seals repair to secluded places, suited to their needs, as far south as the latitude of Cape Flattery, to bring forth their young." (Allen, *op. cit.*, pp. 411, 772, 773.)

Mr. Elliott, of course, stoutly denies the authenticity of all these observations, it being necessary to do so in order to maintain his contention as to the ownership of the United States Government, or the Alaska Fur Company, as the case may be, in the seals.

It has further been often stated that the killing of fur-seals in the open sea off the North Pacific coast is a comparatively new departure, while it is, as a matter of fact, morally certain that the Indians of the whole length of that coast have pursued and killed these animals from time immemorial. As the value of the skins has, however, only of late years become fully known and appreciated, it is naturally difficult to obtain much trustworthy evidence of this without considerable research. Some facts can, however, be adduced. Thus, Captain Shannon described the mode of hunting seals in canoes employed by the Indians of Vancouver Island, and refers to the capture of seals by the Indians off the Straits of Fuca, where, he adds, they appear—

"Some years as early as the 1st of March, and more or less remain till July or August, but they are most plentiful in April and May. *During these two months the Indians devote nearly all their time to sealing when the weather will permit.*"

In 1843 to 1864 only a few dozen skins are known to have been taken annually, but in 1869 fully 5,000 were obtained. Mr. Allen, writing in 1880, states that—

"During the winter months considerable numbers of seal-skins are taken by the natives of British Columbia, some years as many as 2,000." (Allen, *op. cit.*, pp. 332, 371, 411.)

The protection of the fur-seals from extermination has from time to time been speciously advanced as a sufficient reason for extraordinary departures from the respect usually paid to private property and to international rights; but any protection based on the lease of the breeding grounds of these animals as places of slaughter, and an attempt to preserve the seals when at large and spread over the ocean, as they are during the greater part of each year, is unfair in its operation, unsound in principle, and impracticable in enforcement.

Referring to the interests of the Indians of the Northwest coast, it is true that a certain number of Aleuts now on the Pribylov Islands (398 in all, according to Elliott) are dependent on the sealing business for subsistence, but these islands were uninhabited when discovered by the Russians, who brought these people here for their own convenience. Further south along the coast the natives of the Aleutian Islands, of the southeast coast of Alaska, and of the entire coast of British Columbia have been, and still are, accustomed annually to kill considerable numbers of seals. This it would be unjust to interfere with, even were it possible to carry out any regulations with that effect. The further development of oceanic sealing affords employment to, and serves as a mode of advancement and civilization for, these Indians, and is one of the natural industries of the coast. No allusion need be made to the prescriptive rights of the white sealers, which are well known.

The unsoundness of this principle of conservation is shown by what has occurred in the southern hemisphere in respect to the fur-seals of that region. About the beginning of the century very productive sealing grounds existed in the Falkland Islands, Kerguelen Islands, Georgian Islands, the west coast of Patagonia, and many other places similarly situated, all of which were in the course of a few years almost absolutely stripped of seals, and in many of which the animal is now practically extinct. This destruction of the southern fur-sealing trade was not caused by promiscuous sealing at sea, but entirely by hunting on and around the shores, and, had these islands been protected as breeding places, the fur-seals would in all probability be nearly as abundant in the south to-day as they were at the date at which the trade commenced.

The impracticability of preventing the killing of seals on the open sea and of efficiently patrolling the North Pacific for this purpose is sufficiently obvious. The seals, moreover, when at sea (in marked contrast with their boldness and docility in their breeding places), are extremely wary, and the number which can be obtained by legitimate hunting at sea must always be small as compared with the total. Elliott, in fact, states that the seal, when at sea, "is the shyest and wariest your ingenuity can define." (*Op. cit.*, p. 65.)

The position is such that at the present time the perpetuation or the extermination of the fur-seal in the North Pacific as a commercial factor practically depends entirely on the regulations and restrictions which may be applied by the United States to the Pribylov Islands, and now that this is understood a regard for the general interest of its own citizens, as well as for those of other countries, demands that the extermination or serious depletion of the seals on their breeding islands should be prevented. It is probably not necessary for this purpose that the killing of seals on these islands should be entirely prohibited. Both Elliott and Bryant show good reason for believing that a large number of seals may be killed annually without reducing the average aggregate number which can find suitable breeding grounds on these islands, and after the very great reduction in numbers which occurred, owing to an inclement season about 1836 (Elliott), or 1842 (Bryant), the seals increased very rapidly again, and in a few years being nearly as numerous as in 1873, when the total number on the islands was estimated at over 4,700,000.

By retaining an efficient control of the number of seals to be killed on the Pribylov Islands, and by fixing this number anew each season in accordance with circumstances, the United States Government will be in a position to counteract the effect of other causes tending to diminish the number of seals, whether climatic or resulting from the killing of a larger number at sea. There is no reason to apprehend that the number of seals which might thus be safely killed on the islands would under any circumstances be so small as to fail to cover the cost of the administration and protection of the islands. If such a policy as this, based on the common interests in the preservation of the seals, were adopted, it might be reasonable to agree (for the purpose of safeguarding the islands and for police purposes) that the jurisdiction of the United States in this matter should be admitted to extend to some greater distance than this usual one of 3 marine miles, though, as shown further on, the necessary distance would not be great.

The situation of the Pribylov Islands and the habits of the seal together cause the problem of its preservation to be one of extreme simplicity if approached from the point of view of protection on and about the islands, but one of very great difficulty if looked at from any other stand-point. The long-continued and presumably accurate observations which have been made on the habits of the seals show that during the entire breeding season they are very closely confined to the immediate shores of the breeding islands, and that neither in arriving nor in departing from these islands do they form schools or appear together in such numbers as to render promiscuous slaughter at sea possible. The old bulls actually remain on shore during the entire breeding season, while the females, though leaving their young from time to time for the water, are described as haunting the immediate vicinity of the shores just beyond the line of surf. Even the bachelor seals (Elliott, op. cit., pp. 45. 64 *et passim;* Allen, op. cit., p. 386), which constitute a distinct body while ashore and are not actually engaged in breeding or protecting the young, are said to remain close to the shore. If, however, any seals are to be found at this time going to or returning from the sea at some distance from land, these belong to the "bachelor" class, which is the very class selected for the killing by the fur company. The young females, after leaving the islands in the year of their birth, do not return at all till after reaching maturity in their third year. (Allen, op. cit., p. 402.)

The evidence obtained by Captain Bryant shows that while "small groups of small seals (apparently one and two years old)" are met with at large in Behring Sea during July and August, no considerable numbers of schools are to be found. (Allen, op. cit., p. 411.)

It is thus apparent that the perfect security of the seals actually engaged in breeding and suckling their young may be secured without extending the limits of protection beyond the usual distance of 3 miles from the shores of the breeding islands, but that for the purpose of increasing the facilities of supervision a somewhat wider limit might reasonably be accorded. Possibly by defining an area inclosed by lines joining points 3 miles off the extreme headlands and inlets of the Pribylov group, an ample and unobjectionable area of protection might be established.

It is allowed by all naturalists that the habits of the fur-seal sof the southern hemisphere are identical with those of the seal of the North Pacific, and it is therefore admissible to quote the observations of Dampier on Juan Fernandez Island in further confirmation of the fact that these animals go only for a very short distance from land during the breeding season, even when in immense multitudes on the shore. Dampier writes:

"Here are always thousands, I might say possibly millions of them, either sitting on the bays or going and coming in the sea round th e islands, which is covered with them (as they lie at the top of the water playing and sunning themselves) *for a mile or two from the shore.*" ("A New Voyage Round the World," 1703; quoted by Allen, op. cit., p. 334.)

These rookeries have, like others in the South, been long since d epleted and abandoned.

The circumstance that the female fur-seal becomes pregnant within a few days after the birth of its young, and that the period of gestation is nearly twelve months, with the fact that the skins are at all times fit for market (though for a few weeks, extending from the middle of August to the end of September, during the progress of the shedding and renewal of the longer hair, they are of less value) show that there is no natural basis for a close season generally applicable. Thus, should any close season be advocated, its length and the time of year during which it shall occur, can only be determined as a matter of convenience and be of the nature of a compromise between the various interests involved. The pelagic habits of the seals during fully six months of each year, and the fact that they are during the entire winter season widely dispersed over the Pacific, constitute a natural and unavoidable close season. It is thus only possible, from a commercial point of view, to kill the seals during the period of their approximate concentration for migration or when in Behring Sea. This is the period fixed by nature during which seals may be taken, and any artificial close season can be effective only if applied to the further curtailment of the time at which it is possible to carry on the fishery. It may be assumed, therefore, as such a close season for seal hunting at sea must be purely arbitrary and artificial, that any close season proposed by the United States or the lessees of the seal islands will be chosen entirely in the interest of sealing on shore, and so arranged as to render the time of sealing on the open sea as short and unprofitable as possible. It is thus important that the sea-going sealers should at least have an equal voice in the matter of the time and duration of a close period if such should be contemplated.

GEORGE M. DAWSON.

MARCH 5, 1890.

No. 13.

Sir Julian Pauncefote to Mr. Blaine.

WASHINGTON, *April* —, 1890. (Received April 30.)

DEAR MR. BLAINE: At the last sitting of the Conference on the Behring Sea Fisheries question, you expressed doubts, after reading the memorandum of the Canadian Minister of Marine and Fisheries, which by your courtesy has since been printed, whether any arrangement could be arrived at that would be satisfactory to Canada.

You observed that the proposal of the United States had now been two years before Her Majesty's Government, that there was nothing further to urge in support of it; and you invited me to make a counter proposal on their behalf. To that task I have most earnestly applied myself, and while fully sensible of its great difficulty, owing to the conflict of opinion and of testimony which has manifested itself in the course of our discussions, I do not despair of arriving at a solution which will be satisfactory to all the Governments concerned. It has been admitted, from the commencement, that the sole object of the negotiation is the preservation of the fur-seal species for the benefit of mankind, and that no considerations of advantage to any particular nation, or of benefit to any private interest, should enter into the question.

Such being the basis of negotiation, it would be strange indeed if we should fail to devise the means of solving the difficulties which have unfortunately arisen. I will proceed to explain by what method this result can, in my judgment, be attained. The great divergence of views which exists as to whether any restrictions on pelagic sealing are necessary for the preservation of the fur seal species, and if so, as to the character and extent of such restrictions, renders it impossible in my opinion to arrive at any solution which would satisfy public opinion either in Canada or Great Britain, or in any country which may be invited to accede to the proposed arrangement, without a full inquiry by a mixed commission of experts, the result of whose labors and investigations, in the region of the seal fishery, would probably dispose of all the points in dispute.

As regards the immediate necessities of the case I am prepared to recommend to my Government for their approval and acceptance, certain measures of precaution which might be adopted provisionally and without prejudice to the ultimate decision on the points to be investigated by the commission. Those measures, which I will explain later on, would effectually remove all reasonable apprehension of any depletion of the fur seal species, at all events, pending the report of the commission.

It is important, in this relation, to note that while it has been contended on the part of the United States Government that the depletion of the fur seal species has already commenced and that even the extermination of the species is threatened within a measurable space of time, the latest reports of the United States agent, Mr. Tingle, are such as to dissipate all such alarms.

Mr. Tingle in 1887 reported that the vast number of seals was on the increase and that the condition of all the rookeries could not be better.

In his later report, dated July 31, 1888, he wrote as follows:

> I am happy to be able to report that, although late landing, the breeding rookeries are filled out to the lines of measurement heretofore made and some of them much beyond those lines, showing conclusively that seal life is not being depleted, but is fully up to the estimate given in my report of 1887.

Mr. Elliott, who is frequently appealed to as a great authority on the subject, affirms that, such is the natural increase of the fur-seal species that these animals, were they not preyed upon by killer-whales (orca gladiator), sharks, and other submarine foes, would multiply to such an extent that "Behring Sea itself could not contain them."

The Honorable Mr. Tupper has shown in his memorandum that the destruction of seals caused by pelagic sealing is insignificant in comparison with that caused by their natural enemies, and he gives figures exhibiting the marvelous increase of seals in spite of the depredations complained of.

Again the destructive nature of the modes of killing seals by spears and fire-arms has apparently been greatly exaggerated as may be seen from the affidavits of practical seal hunters which I annex to this letter, together with a confirmatory extract from a paper upon the "Fur-Seal Fisheries of the Pacific Coast and Alaska," prepared and published in San Francisco and designed for the information of eastern United States Senators and Congressmen.

The Canadian Government estimate the percentage of seals so wounded or killed and not recovered at 6 per cent.

In view of the facts above stated, it is improbable that pending the result of the inquiry, which I have suggested, any appreciable diminution of the fur-seal species should take place, even if the existing conditions of pelagic sealing were to remain unchanged.

But in order to quiet all apprehension on that score, I would propose the following provisional regulations.

I. That pelagic sealing should be prohibited in the Behring Sea, the Sea of Ochotsk, and the adjoining waters, during the months of May and June, and during the months of October, November, and December, which may be termed the "migration periods" of the fur-seal.

II. That all sealing vessels should be prohibited from approaching the breeding islands within a radius of 10 miles.

These regulations would put a stop to the two practices complained of as tending to exterminate the species; firstly, the slaughter of female seals with young during the migration periods, especially in the narrow passes of the Aleutian Islands; secondly, the destruction of female seals by marauders surreptitiously landing on the breeding islands under cover of the dense fogs which almost continuously prevail in that locality during the summer.

Mr. Taylor, another agent of the United States Government asserts that the female seals (called cows) go out from the breeding islands every day for food. The following is an extract from his evidence:

> The cows go 10 and 15 miles and even farther. I do not know the average of it—and they are going and coming all the morning and evening. The sea is black with them round about the islands. If there is a little fog and they get out half a mile from shore we can not see a vessel 100 yards even. The vessels themselves lay around the islands there where they pick up a good many seal, and there is where the killing of cows occurs when they go ashore.

Whether the female seals go any distance from the islands in quest of food, and if so, to what distance, are questions in dispute, but pending their solution the regulation which I propose against the approach of sealing vessels within 10 miles of the islands for the prevention of surreptitious landing practically meets Mr. Taylor's complaint, be it well founded or not, to the fullest extent; for, owing to the prevalence of fogs, the risk of capture within a radius of 10 miles will keep vessels off at a much greater distance.

This regulation if accepted by Her Majesty's Government would cer-

tainly manifest a friendly desire on their part to co-operate with your Government and that of Russia in the protection of their rookeries and in the prevention of any violation of the laws applicable thereto. I have the honor to inclose the draught of a preliminary convention which I have prepared, providing for the appointment of a mixed commission who are to report on certain specified questions within two years.

The draught embodies the temporary regulations above described together with other clauses which appear to me necessary to give proper effect to them.

Although I believe that it would be sufficient during the "migration periods" to prevent all sealing within a specified distance from the passes of the Aleutian Islands I have out of a deference to your views and to the wishes of the Russian minister, adopted the fishery line described in Article V, and which was suggested by you at the outset of our negotiation. The draught, of course, contemplates the conclusion of a further convention after full examination of the report of the mixed commission. It also makes provision for the ultimate settlement by arbitration of any differences which the report of the commission may still fail to adjust, whereby the important element of finality is secured, and in order to give to the proposed arrangement the widest international basis, the draught provides that the other powers shall be invited to accede to it.

The above proposals are, of course, submitted *ad referendum*, and it only now remains for me to commend them to your favorable consideration and to that of the Russian minister. They have been framed by me in a spirit of justice and conciliation, and with the most earnest desire to terminate the controversy in a manner honorable to all parties and worthy of the three great nations concerned.

I have, etc.,

JULIAN PAUNCEFOTE.

[Inclosure 1.]

THE NORTH AMERICAN SEAL FISHERY CONVENTION.

TITLE.

Convention between Great Britain, Russia, and the United States of America in relation to the fur-seal fishery in the Behring Sea, the Sea of Ochotsk, and the adjoining waters.

PREAMBLE.

The Governments of Russia and of the United States having represented to the Government of Great Britain the urgency of regulating by means of an international agreement the fur-seal fishery in Behring Sea, the Sea of Ochotsk, and the adjoining waters, for the preservation of the fur-seal species in the North Pacific Ocean; and differences of opinion having arisen as to the necessity for the proposed agreement, in consequence whereof the three Governments have resolved to institute a full inquiry into the subject, and, pending the result of such inquiry, to adopt temporary measures for the restriction of the killing of seals during the breeding season, without prejudice to the ultimate decision of the questions in difference in relation to the said fishery.

The said three Governments have appointed as their respective plenipotentiaries, to wit:

Who, after having exchanged their full powers which were found to be in good and due form, have agreed upon the following articles:

ARTICLE I.

MIXED COMMISSION OF EXPERTS TO BE APPOINTED.

The High Contracting Parties agree to appoint a mixed commission of experts who shall inquire fully into the subject and report to the High Contracting Parties within two years from the date of this convention, the result of their investigations together with their opinions and recommendations on the following questions:

(1) Whether regulations properly enforced upon the breeding islands (Robin Island in the Sea of Ochotsk and the Commander Islands and the Pribylov Islands in the Behring Sea) and in the territorial waters surrounding those islands are sufficient for the preservation of the fur-seal species?

(2) If not, how far from the islands is it necessary that such regulations should be enforced in order to preserve the species?

(3) In either of the above cases what should such regulations provide?

(4) If a close season is required on the breeding islands and territorial waters, what months should it embrace?

(5) If a close season is necessary outside of the breeding islands as well, what extent of waters and what period or periods should it embrace?

ARTICLE II.

ON RECEIPT OF REPORT OF COMMISSION QUESTION OF INTERNATIONAL REGULATIONS TO BE FORTHWITH DETERMINED.

On receipt of the report of the Commission and of any separate reports which may be made by individual commissioners, the High Contracting Parties will proceed forthwith to determine what international regulations, if any, are necessary for the purpose aforesaid, and any regulations so agreed upon shall be embodied in a further Convention to which the accession of the other powers shall be invited.

ARTICLE III.

ARBITRATION.

In case the High Contracting Parties should be unable to agree upon the regulations to be adopted, the questions in difference shall be referred to the arbitration of an impartial government, who shall duly consider the reports hereinbefore mentioned, and whose award shall be final and shall determine the conditions of the further Convention.

ARTICLE IV.

PROVISIONAL REGULATIONS.

Pending the report of the Commission and for six months after the date of such report, the High Contracting Parties agree to adopt and put in force as a temporary measure and without prejudice to the ultimate decision of any of the questions in difference in relation to the said fishery, the regulations contained in the next following articles Nos. 5 to 10 inclusive.

ARTICLE V.

SEAL FISHERY LINE.

A line of demarcation to be called the "seal fishery line" shall be drawn as follows:

From Point Anival at the southern extremity of the Island of Saghalien in the Sea of Ochotsk to the point of intersection of the 50th parallel of north latitude with the 160th meridian of longitude east from Greenwich, thence eastward along the said 50th parallel to its point of intersection with the 160th meridian of longitude west from Greenwich.

ARTICLE VI.

CLOSE TIME.

The subjects and citizens of the High Contracting Parties shall be prohibited from engaging in the fur-seal fishery and the taking of seals by land or sea north of the seal fishery line from the 1st of May to the 30th of June, and also from the 1st of October to the 30th of December.

ARTICLE VII.

PREVENTION OF MARAUDERS.

During the intervening period in order more effectively to prevent the surreptitious landing of marauders on the said breeding islands, vessels engaged in the fur-seal fishery and belonging to the subjects and citizens of the high contracting parties, shall be prohibited from approaching the said islands within a radius of ten miles.

ARTICLE VIII.

FURTHER PROVISIONAL REGULATIONS.

The high contracting parties may, pending the report of the commission, and on its recommendation or otherwise, make such further temporary regulations as may be deemed by them expedient for better carrying out the provisions of this convention and the purposes thereof.

ARTICLE IX.

PENALTY FOR VIOLATION OF PROVISIONAL REGULATIONS.

Every vessel which shall be found engaged in the fur-seal fishery contrary to the prohibitions provided for in articles 6 and 7, or in violation of any regulation made under article 8, shall, together with her apparel, equipment, and contents, be liable to forfeiture and confiscation, and the master and crew of such vessel, and every person belonging thereto, shall be liable to fine and imprisonment.

ARTICLE X.

SEIZURE FOR BREACH OF PROVISIONAL REGULATIONS. TRIAL OF OFFENCES.

Every such offending vessel or person may be seized and detained by the naval or other duly commissioned officers of any of the high contracting parties, but they shall be handed over as soon as practicable

to the authorities of the nation to which they respectively belong, who shall alone have jurisdiction to try the offence and impose the penalties for the same. The witnesses and proofs necessary to establish the offence shall also be sent with them and the court adjudicating upon the case may order such portion of the fines imposed or of the proceeds of the condemned vessel to be applied in payment of the expenses occasioned thereby.

ARTICLE XI.

RATIFICATION. COMMENCEMENT AND DURATION OF CONVENTION.

This convention shall be ratified and the ratifications shall be exchanged at ——— in six months from the date thereof or sooner if possible. It shall take effect on such day as shall be agreed upon by the high contracting parties, and shall remain in force until the expiration of six months after the date of the report of the commission of experts to be appointed under Article I; but its duration may be extended by consent.

ARTICLE XII.

ACCESSION OF OTHER POWERS.

The high contracting parties agree to invite the accession of the other powers to the present convention.

[Inclosure 2.]

[Extract from pamphlet entitled "Fur Seal Fisheries of the Pacific Coast and Alaska," published by C. D. Ladd, 529 Kearny street, San Francisco, California.]

It is claimed that many seals are shot that sink and are lost.

Undoubtedly there are some lost in this way, but the percentage is light—probably one in thirty or forty, not more than this. It is also claimed that ten are shot and wounded that die to one that is secured. This is also an error. Many seals are shot at that are not hit at all, but when a seal is wounded so that in the end it will die, it is most always secured by the hunter, who may have to shoot at it several times in order to get it, as the seal in the water exposes only its head, and when frightened exposes only a small portion of that, so that together with the constant diving of the seal, the motion of the boat, etc., makes it very hard to hit. This is where it is claimed that ten are shot and wounded to one that is secured; but it is nearer the truth that one is lost to ten that are secured, for the reason that when a seal is wounded it can not remain under water any length of time and therefore the hunter can easily follow it up and secure it.

THOMAS HOWE.

In 1886, on board the *Theresa* and *Pathfinder*, I got for the season 397 seals and lost about 20. In 1887, on the schooner *Penelope*, I got 510 and lost about 30. In 1888, on the *Lily Lad*, I got 316 and lost 12. In 1889, on board the *Viva*, I got 587 and lost 27.

THOMAS HOWE.

FREDERICK GILBERT.

I am a seal hunter. I have been four years on board sealing vessels; one year I was a boat rower and three years a hunter. I have always been with white hunters, and have used the shot-gun and rifle for shooting seals.

In 1887 I got 518 seals and lost 14; in 1888 I got 244 and lost 5; in 1889 I got 454 and lost 16; or in the three years I got 1,216 and lost 35, or $2\frac{4}{5}$ per cent. I never shot or saw pups with the cows in the water, nor have I ever heard of such a case. Some hunters lose a few more than I do, but the most unlucky hunters I have met with did not lose twice as many.

FRED. GILBERT.

VICTORIA, BRITISH COLUMBIA, *September* 12, 1889.

CAPT. WILLIAM O'LEARY.

I am a master mariner, and have been seal hunting on the Pacific coast four years, three of which I was in Behring's Sea as well. One year I had Indian hunters only, and the three years I had white hunters only—all on the schooner *Pathfinder*. My experience with Indian hunters is that they lose none—at most a few—of the seals they spear. The spears are "bearded," some with one, some with two beards, and once the seal is struck, capture is certain.

White hunters use shot-guns and rifles, according to distance and state of water. On smooth water and at long ranges the rifle is generally used, but the majority of hunters use the shot-gun, and the great majority of seals are shot with guns.

The number of seals lost by white hunters does not exceed six in one hundred, and many hunters lose much less than that number. About half of the seals taken along the coast are cows, and perhaps two-thirds of the cows are with young. Putting a vessel's catch at four hundred, and from one hundred and fifty to one hundred and seventy-five might be cows with young. In Behring's Sea the average of cows with young killed will not average one in one hundred, for the reason that as soon as the cows reach the sea they go to the breeding islands, where their young are born.

I never saw cows in the water with their young with them. I do not think there is any decrease in the number of seal entering Behring's Sea. I never saw so many seal along the coast as there were this year; and in Behring's Sea they were more numerous than I ever saw before. This year I shot forty-four seals and lost one.

WM. O'LEARY.

VICTORIA, BRITISH COLUMBIA, *September* 12, 1889.

CAPTAIN SIEWARD.

I have been a master sealer for two years. In 1888 I commanded the *Araunah* and in 1889 the *Walter L. Rich*, and during both years sealed along the coast from off Point Northward to Behring's Sea. In 1888 I had Indian hunters and this year white hunters. The Indians lose very few seals, for if the spear strike the seal is got, and if the spear misses the seal of course escapes unhurt. The white hunters use rifles and shot-guns, the latter much more than the former. Rifles are used only by good shots, and then at only long range. The seals lost by white hunters after being shot or wounded do not, on the lower coast, exceed six in one hundred, and on the Alaska coast and in the Behring's Sea not over four in one hundred.

On sailing I generally take ten per cent. additional ammunition for waste shot; that is, if calculating on a catch of 3,000 seals I would take ammunition for 3,300 shots. That was double the excess the hunters would consider necessary and I never knew that percentage of waste shot to be used. I never saw a female seal with her young beside her in the water. Out of catch of 1,423 seals this year I had only 55 seals under two years old, *i. e.* between one and two years old.

When at Ounalaska this year I learned that the Alaska Commercial Company last year fitted out two small schooners, belonging to private parties, with large deep nets several hundred fathoms long, which were set across the passes from Behring's Sea for the purpose of catching young seals. One of these schooners got 700 of these young seals about four months old, and sold them to the Alaska Commercial Company at $2.50 apiece.

A schooner, the *Spencer F. Baird*, 10 or 12 tons, was then at Ounalaska fitting up to go to Akoutan Pass for the same purpose this fall. The law forbids the killing of all fur-bearing animals in Alaskan waters by any hunters except the natives, yet such is done every year at Kodiak, Sanaka, and the Aleutian Islands by white hunters, fitted out by the Alaska Commercial Company, under the agreement that the furs must be sold to the company.

H. F. SIEWARD,
Master American Schooner Walter L. Rich.

VICTORIA, BRITISH COLUMBIA, *August* 10, 1889.

GEORGE HOWE.

My first year's sealing, 1886, was on board the *Theresa*, from San Francisco to Victoria. We left San Francisco on the 20th January, and arrived at Victoria on the 7th April. I got 159 seals, of which I lost about 7. I used a shot-gun principally, the rifle only for long range shooting, say from 30 to 60 yards. At Victoria I left the *Theresa* and joined the *Pathfinder*. The *Pathfinder* left Victoria on the 4th of May for Behring's Sea, and that trip I got 442 seals and lost about 20. In 1887 I joined the *Penelope* and left Victoria on the 3d February. I got 618 seals during the season and lost 31. In 1888 I did not go sealing, but in 1889 I was engaged on the schooner *Viva*. We left

Victoria on the 19th January, and I got 734 seals during the season and lost 37. I never saw a young pup alongside its cow in the water.

About one-third of the seals taken on the coast are cows with pup or capable of being with pup. In Behring's Sea I got four cows with pups in them.

GEORGE HOWE.

WILLIAM FEWINGS.

I have beenthree years hunting seals on the Pacific coast and in Behring's Sea. In 1887 I was on board the sealing schooner *Favourite*, in 1888 on the *Viva*, and in 1889 on board the *Triumph*. In each year the vessel I was on entered the Behring's Sea early in July and left the sea the latter part of August or early in September, except this year, when the *Triumph* left the sea on the 11th July under threat of seizure, after searched by the United States cutter *Rush*. In 1887 the hunters I was with were partly Indians and partly whites. In the two last years the hunters were all whites, using shot-guns and rifles. The rifles were used by the more experienced hunters and better shots for long range shooting, up to 100 yards, but few hunters attempted that range. The general range for rifles is not over 50 yards and most shots are made at a less range.

A few hunters used the rifle for all distances. I used either rifle or shot-gun, according to the distance and position of the seal and the condition of the water.

My first year I got about four hundred seals. In getting this number I failed to capture about twenty-five shot at, or killed or wounded, but which escaped. In my second year I got over five hundred, and lost about thirty. This year I got one hundred and forty, and lost only one. I have frequently shot from two to five seal in a bunch, and got them all. One day in 1887 I got two bunches of five each, and another of four, and got the whole fourteen.

Indian hunters use spears, and either get every seal they throw at or it escapes unhurt, or but slightly wounded. Indians, it can be safely said, get every seal they kill.

Oscar Scarr, a hunter on the *Viva*, in 1888 got over six hundred seals, and lost only about twenty. The average number lost by white hunters does not exceed six in one hundred, and by the Indian not six in one thousand. I have never shot, nor have I ever seen, a female seal with a young one beside or with her. It is very seldom a female is killed in Behring's Sea carrying her young with her, and out of one thousand killed on the coast earlier in the season less than one-third are females carrying their young.

WM. FEWINGS.

VICTORIA, BRITISH COLUMBIA, *August* 9, 1889.

WALTER HOUSE.

I was a hunter on the schooner *Walter L. Rich* on her sealing voyage this year. It was my first year on the Pacific coast, but I had seven years' experience on the Newfoundland coast catching hair-seals. This year on the *Rich* I got one hundred and eighty-five seals and lost five, which sank before I reached them. I used a shot-gun. The hunters on the *Rich* lost about the same proportion, some a few more, some less. I never saw a cow seal in the water with her young beside her or near her, nor have I ever heard of such a case.

WALTER HOUSE.

VICTORIA, BRITISH COLUMBIA, *August* 10, 1889.

JAMES WILSON.

I was carpenter on board the sealing schooner *Triumph* on her voyage this year. One of the hunters was drowned just before entering Behring's Sea, and I took his place. I was out hunting seals about a week, but the weather was bad and I got only twenty-three seals. I had had no experience. I used a breech-loading shotgun, and shot seals at a range of from 10 to 15 yards. I lost one seal through the carelessness of the boat hands running the boat over the seal, which sank directly under the boat.

Most of seals lost by hunters are shot at long ranges with the rifles. One hunter on the *Triumph* this year got over sixty seals and only lost one. I never saw a cow seal with her young beside her. Out of the twenty-three I got, five or six were cows carrying their young.

JAMES WILSON.

VICTORIA, BRITISH COLUMBIA, *August* 9, 1889.

CAPT. J. D. WARREN.

I am a master mariner, and have been actively engaged in the deep-sea sealing business for twenty years. I have owned and commanded sealing vessels on voyages along the Pacific coast from 47 or 48 north latitude to 56 or 57 north latitude within Behring Sea. I have generally employed Indians except in 1886 and 1887, the last years, I was out, when I had white hunters as well. White hunters use rifles and shotguns entirely, Indian hunters use spears. Bullets weighing from 300 to 400 grains are used with rifles, and ordinary buckshot with guns. Both rifles and shotguns are breech-loading and of the best make. Seals are approached by the hunters in boats, to 10 or 15 yards, lying generally asleep on the water. Frequently seals are taken alive when asleep, especially by the Indians, who, in their canoes, get within from a spear's length (14 or 15 feet) to 30 feet before they throw. Indians rarely lose a seal they strike, and if one escapes it is always but slightly wounded. Of seals killed by white hunters, probably not over 10 per cent. are killed with rifle, which is generally used for only a long range.

Sealers divide the seals for hunting purposes into two classes, "sleepers" and "feeders" or "travelers. Sleepers" are almost always shot at from 10 to 15 yards range, and are seldom lost. "Feeders" are shot at just as their heads emerge from the water. From this fact the range is always from a few feet to 100 yards, though few are fired at at that distance. Hunters use a "gaff," a pole about 10 or 12 feet long, with one to three hooks upon it, with which they catch the seal and bring it into the boat. If the seal sinks, the "gaff" is run down, and the seal hooked up. The British sealing vessels employ more Indian than white hunters. My experience with white hunters is not so extensive as with Indians, but from what I have seen while engaged in sealing I can say that not over six in every one hundred seals killed by white hunters are lost or escape.

Experienced hunters seldom lose a seal; the losses are chiefly made by inexperienced hunters, only a few of whom are employed, for the reason that as hunters are paid so much a skin, inferior men can not make good wages. I have noticed no diminution in the number of seals during the twenty years I have been in the business, but if any change at all, an increase. Of the seals taken along the coast about one-half are females, and of the females not more than one-half are with young. In Behring Sea not one in one hundred of those taken by the hunters are females with young, because as soon as the females carrying their young get into the sea they go to the breeding islands or rookeries, and in a few days their young are born. The cows remain with their young until they are quite able to take care of themselves. I do not think that out of the seals taken by Indian and white hunters more than 30 per cent. are females actually breeding or capable of breeding.

"Old bulls," "bachelors," "two-year old pups," and "barre cows" make up the great majority. Cows actually breeding are very watchful, and while on the voyage northward are ever on the alert, so they are difficult to take. On the other hand, the other classes above named make up the great class of "sleepers," from which fully 90 per cent. of the whole catch of hunters is derived. I never saw or heard of a "cow" having her young beside her in the water, either on the coast or in Behring Sea.

J. D. WARREN.

VICTORIA, BRITISH COLUMBIA, *August* 10, 1889.

No. 14.

The Marquis of Salisbury to Sir Julian Pauncefote.

[Left at the Department of State on June 5 by Sir Julian Pauncefote.]

No. 106.] FOREIGN OFFICE, *May* 22, 1890.

SIR: I received in due course your dispatch No. 9, of the 23d January, inclosing copy of Mr. Blaine's note of the 22d of that month, in answer to the protest made on behalf of Her Majesty's Government on the 12th October last, against the seizure of Canadian vessels by the United States revenue-cutter *Rush* in Behring Sea.

The importance of the subject necessitated a reference to the Government of Canada, whose reply has only recently reached Her Majesty's Government. The negotiations which have taken place between

Mr. Blaine and yourself afford strong reason to hope that the difficulties attending this question are in a fair way towards an adjustment which will be satisfactory to both Governments. I think it right, however, to place on record, as briefly as possible, the views of Her Majesty's Government on the principal arguments brought forward on behalf of the United States.

Mr. Blaine's note defends the acts complained of by Her Majesty's Government on the following grounds:

1. That "the Canadian vessels arrested and detained in the Behring Sea were engaged in a pursuit that is in itself *contra bonos mores*— a pursuit which of necessity involves a serious and permanent injury to the rights of the Government and people of the United States."

2. That the fisheries had been in the undisturbed possession and under the exclusive control of Russia from their discovery until the cession of Alaska to the United States in 1867, and that from this date onwards until 1886 they had also remained in the undisturbed possession of the United States Government.

3. That it is a fact now held beyond denial or doubt that the taking of seals in the open sea rapidly leads to the extinction of the species, and that therefore nations not possessing the territory upon which seals can increase their numbers by natural growth should refrain from the slaughter of them in the open sea.

Mr. Blaine further argues that the law of the sea and the liberty which it confers do not justify acts which are immoral in themselves, and which inevitably tend to results against the interests and against the welfare of mankind; and he proceeds to justify the forcible resistance of the United States Government by the necessity of defending not only their own traditional and long established rights, but also the rights of good morals and of good government the world over.

He declares that while the United States will not withhold from any nation the privileges which they demanded for themselves, when Alaska was part of the Russian Empire, they are not disposed to exercise in the possessions acquired from Russia any less power or authority than they were willing to concede to the imperial government of Russia when its sovereignty extended over them. He claims from friendly nations a recognition of the same rights and privileges on the lands and in the waters of Alaska which the same friendly nations always conceded to the Empire of Russia.

With regard to the first of these arguments, namely, that the seizure of the Canadian vessels in the Behring's Sea was justified by the fact that they were "engaged in a pursuit that is initself *contra bonos mores*— a pursuit which of necessity involves a serious and permanent injury to the rights of the Government and people of the United States," it is obvious that two questions are involved: first, whether the pursuit and killing of fur-seals in certain parts of the open sea is, from the point of view of international morality, an offense *contra bonos mores;* and secondly, whether if such be the case, this fact justifies the seizure on the high seas and subsequent confiscation in time of peace of the private vessels of a friendly nation.

It is an axiom of international maritime law that such action is only admissible in the case of piracy or in pursuance of special international agreement. This principle has been universally admitted by jurists, and was very distinctly laid down by President Tyler in his special message to Congress, dated the 27th February, 1843, when, after acknowledging the right to detain and search a vessel on suspicion of piracy, he goes on to say: "With this single exception, no nation has,

in time of peace, any authority to detain the ships of another upon the high seas, on any pretext whatever, outside the territorial jurisdiction."

Now, the pursuit of seals in the open sea, under whatever circumstances, has never hitherto been considered as piracy by any civilized state. Nor, even if the United States had gone so far as to make the killing of fur-seals piracy by their municipal law, would this have justified them in punishing offenses against such law committed by any persons other than their own citizens outside the territorial jurisdiction of the United States.

In the case of the slave trade, a practice which the civilized world has agreed to look upon with abhorrence, the right of arresting the vessels of another country is exercised only by special international agreement, and no one Government has been allowed that general control of morals in this respect which Mr. Blaine claims on behalf of the United States in regard to seal-hunting.

But her Majesty's Government must question whether this pursuit can of itself be regarded as *contra bonos mores*, unless and until, for special reasons, it has been agreed by international arrangement to forbid it. Fur-seals are indisputably animals *feræ naturæ*, and these have universally been regarded by jurists as *res nullius* until they are caught; no person, therefore, can have property in them until he has actually reduced them into possession by capture.

It requires something more than a mere declaration that the Government or citizens of the United States, or even other countries interested in the seal trade, are losers by a certain course of proceeding, to render that course an immoral one.

Her Majesty's Government would deeply regret that the pursuit of fur-seals on the high seas by British vessels should involve even the slightest injury to the people of the United States. If the case be proved, they will be ready to consider what measures can be properly taken for the remedy of such injury, but they would be unable on that ground to depart from a principle on which free commerce on the high seas depends.

The second argument advanced by Mr. Blaine is that the "fur-seal fisheries of Behring Sea had been exclusively controlled by the Government of Russia, without interference and without question, from their original discovery until the cession of Alaska to the United States in 1867," and that "from 1867 to 1886 the possession, in which Russia had been undisturbed, was enjoyed by the United States Government also without interruption or intrusion from any source."

I will deal with these two periods separately.

First, as to the alleged exclusive monopoly of Russia. After Russia, at the instance of the Russian-American Fur Company, claimed in 1821 the pursuits of commerce, whaling, and fishing from Behring Straits to the 51st degree of north latitude, and not only prohibited all foreign vessels from landing on the coasts and islands of the above waters, but also prevented them from approaching within 100 miles thereof, Mr. Quincy Adams wrote as follows to the United States minister in Russia:

> The United States can admit no part of these claims; their right of navigation and fishing is perfect, and has been in constant exercise from the earliest times throughout the whole extent of the Southern Ocean, subject only to the ordinary exceptions and exclusions of the territorial jurisdictions.

That the right of fishing thus asserted included the right of killing fur-bearing animals is shown by the case of the United States brig *Loriot*. That vessel proceeded to the waters over which Russia claimed

exclusive jurisdiction for the purpose of hunting the sea-otter, the killing of which is now prohibited by the United States statutes applicable to the fur-seal, and was forced to abandon her voyage and leave the waters in question by an armed vessel of the Russian navy. Mr. Forsyth, writing on the case to the American minister at St. Petersburg on the 4th of May, 1837, said:

> It is a violation of the rights of the citizens of the United States, immemorially exercised and secured to them as well by the law of nations as by the stipulations of the first article of the convention of 1824, to fish in those seas, and to resort to the coast for the prosecution of their lawful commerce upon points not already occupied.

From the speech of Mr. Sumner when introducing the question of the purchase of Alaska to Congress, it is equally clear that the United States Government did not regard themselves as purchasing a monopoly. Having dealt with fur-bearing animals, he went on to treat of fisheries, and after alluding to the presence of different species of whales in the vicinity of the Aleutians said: "No sea is now *mare clausum*; all of these may be pursued by a ship under any flag, except directly on the coast or within its territorial limit."

I now come to the statement that from 1867 to 1886 the possession was enjoyed by the United States with no interruption and no intrusion from any source. Her Majesty's Government can not but think that Mr. Blaine has been misinformed as to the history of the operations in Behring Sea during that period.

The instances recorded in Inclosure 1 in this dispatch are sufficient to prove from official United States sources that from 1867 to 1886 British vessels were engaged at intervals in the fur-seal fisheries with the cognizance of the United States Government. I will here by way of example quote but one.

In 1872 Collector Phelps reported the fitting out of expeditions in Australia and Victoria for the purpose of taking seals in Behring Sea, while passing to and from their rookeries on St. Paul and St. George Islands, and recommended that a steam-cutter should be sent to the region of Ounimak Pass and the islands of St. Paul and St. George.

Mr. Secretary Boutwell informed him, in reply, that he did not consider it expedient to send a cutter to interfere with the operations of foreigners, and stated: "In addition, I do not see that the United States would have the jurisdiction or power to drive off parties going up there for that purpose, unless they made such attempt within a marine league of the shore."

Before leaving this part of Mr. Blaine's argument, I would allude to his remark that "vessels from other nations passing from time to time through Behring's Sea to the Arctic Ocean in pursuit of whales have always abstained from taking part in the capture of seals," which he holds to be proof of the recognition of rights held and exercised first by Russia and then by the United States.

Even if the facts are as stated, it is not remarkable that vessels pushing on for the short season in which whales can be captured in the Arctic Ocean, and being fitted specially for the whale fisheries, neglected to carry boats and hunters for fur-seals or to engage in an entirely different pursuit.

The whalers, moreover, pass through Behring Sea for the fishing grounds in the Arctic Ocean in April and May as soon as the ice breaks up, while the great bulk of the seals do not reach the Pribylov Islands till June, leaving again by the time the closing of the ice compels the whalers to return.

The statement that it is "a fact now held beyond denial or doubt that the taking of seals in the open sea rapidly leads to their extinction" would admit of reply, and abundant evidence could be adduced on the other side. But as it is proposed that this part of the question should be examined by a committee to be appointed by the two Governments, it is not necessary that I should deal with it here.

Her Majesty's Government do not deny that if all sealing were stopped in Behring Sea except on the islands in possession of the lessees of the United States, the seal may increase and multiply at an even more extraordinary rate than at present, and the seal fishery on the island may become a monopoly of increasing value; but they can not admit that this is sufficient ground to justify the United States in forcibly depriving other nations of any share in this industry in waters which, by the recognized law of nations, are now free to all the world.

It is from no disrespect that I refrain from replying specifically to the subsidiary questions and arguments put forward by Mr. Blaine. Till the views of the two Governments as to the obligations attaching, on grounds either of morality or necessity, to the United States Government in this matter, have been brought into closer harmony, such a course would appear needlessly to extend a controversy which Her Majesty's Government are anxious to keep within reasonable limits.

The negotiations now being carried on at Washington prove the readiness of Her Majesty's Government to consider whether any special international agreement is necessary for the protection of the fur-sealing industry. In its absence they are unable to admit that the case put forward on behalf of the United States affords any sufficient justification for the forcible action already taken by them against peaceable subjects of Her Majesty engaged in lawful operations on the high seas.

"The President," says Mr. Blaine, "is persuaded that all friendly nations will concede to the United States the same rights and privileges on the lands and in the waters of Alaska which the same friendly nations always conceded to the Empire of Russia."

Her Majesty's Government have no difficulty in making such a concession. In strict accord with the views which, previous to the present controversy, were consistently and successfully maintained by the United States, they have, whenever occasion arose, opposed all claims to exclusive privileges in the non-territorial waters of Behring Sea. The rights they have demanded have been those of free navigation and fishing in waters which, previous to their own acquisition of Alaska, the United States declared to be free and open to all foreign vessels.

That is the extent of their present contention and they trust that, on consideration of the arguments now presented to them, the United States will recognize its justice and moderation.

I have to request that you will read this dispatch to Mr. Blaine and leave a copy of it with him should he desire it.

I am, etc.,

SALISBURY.

[Inclosure.]

In 1870 Collector Phelps reported "the barque *Cyane* has arrived at this port (San Francisco) from Alaska, having on board 47 seal skins." (See Ex. Doc. No. 83, Forty-fourth Congress, first session.)

In 1872 he reported expeditions fitting out in Australia and Victoria for the purpose of taking seals in Behring Sea, and was informed that it was not expedient to interfere with them.

In 1874 Acting Secretary Sawyer, writing to Mr. Elliott, special agent, said:

"It having been officially reported to this Department by the collector of customs at Port Townsend, from Neea-ah Bay, that British vessels from Victoria cross over into American waters and engage in taking fur seals (which he represents are annually becoming more numerous on our immediate coast) to the great injury of our sealers, both white and Indian, you will give such proper attention to the examination of the subject as its importance may seem to you, after careful inquiry, to demand, and with a view to a report to the Department of all facts ascertained." (Ditto, May 4, No. 117, p. 114.)

In 1875, Mr. McIntyre, Treasury agent, described how "before proceeding to harsh measures" he had warned the captain of the *Cygnet*, who was shooting seals in Zapadnee Bay, and stated that the captain appeared astonished that he was breaking the law. (Ditto, March 15, 1875, No. 130, p. 124.)

In 1880, the fur-seal trade of the British Columbia coast was of great importance. Seven vessels were then engaged in the fishery, of which the greater number were, in 1886 and 1887, seized by the United States Government in Behring Sea.

In 1884, Daniel and Alexander McLean, both British subjects, took the American schooner *San Diego* to Behring Sea, and were so successful that they returned there in 1885, from Victoria, with the *Mary Ellen* and the *Favourite*.

No 15.

Sir Julian Pauncefote to Mr. Blaine.

WASHINGTON, *May* 23, 1890.

SIR: I have the honor to inform you that a statement having appeared in the newspapers to the effect that the United States revenue cruisers have received orders to proceed to Behring Sea for the purpose of preventing the exercise of the seal fishery by foreign vessels in non-territorial waters, and that statement having been confirmed yesterday by you, I am instructed by the Marquis of Salisbury to state to you that a formal protest by Her Majesty's Government against any such interference with British vessels will be forwarded to you without delay.

I have, etc.,

JULIAN PAUNCEFOTE.

No. 16.

Mr. Blaine to Sir Julian Pauncefote.

DEPARTMENT OF STATE,
Washington, May 26, 1890.

SIR: I have the honor to acknowledge the receipt of your note of the 23d instant, in which you inform me that Her Britannic Majesty's Government will formally protest against certain action recently taken by this Government for the protection of the Alaskan seal fisheries.

I have, etc.,

JAMES G. BLAINE.

No. 17.

Mr. Blaine to Sir Julian Pauncefote

DEPARTMENT OF STATE,
Washington, May 29, 1890.

SIR: Your note of the 23d instant, already acknowledged, informs this Government that you "have been instructed by the Marquis of Salisbury to state that Her Majesty's Government would forward without delay a protest" against the course which this Government has found it necessary, under the laws of Congress, to pursue in the waters of the Behring Sea.

In turn, I am instructed by the President to protest against the course of the British Government in authorizing, encouraging, and protecting vessels which are not only interfering with American rights in the Behring Sea, but which are doing violence as well to the rights of the civilized world. They are engaged in a warfare against seal life, disregarding all the regulations which lead to its protection and committing acts which lead ultimately to its destruction, as has been the case in every part of the world where the abuses which are now claimed as British rights have been practiced.

The President is surprised that such protest should be authorized by Lord Salisbury, especially because the previous declarations of his lordship would seem to render it impossible. On the 11th day of November, 1887, Lord Salisbury, in an official interview with the minister from the United States (Mr. Phelps), cordially agreed that "a code of regulations should be adopted for the preservation of the seals in Behring Sea from destruction at improper times, by improper means, by the citizens of either country." And Lord Salisbury suggested that Mr. Phelps "should obtain from his Government and submit to him (Lord Salisbury) a sketch of a system of regulations which would be adequate for the purpose." Further interviews were held during the following month of February (1888) between Lord Salisbury and the American minister, and between Lord Salisbury and the American minister accompanied by the Russian ambassador. In answer to Lord Salisbury's request Mr. Phelps submitted the "regulations" which the Government of the United States desired; and in a dispatch of February 25 Mr. Phelps communicated the following to Mr. Bayard, Secretary of State:

Lord Salisbury assents to your proposition, to establish by mutual arrangement between the governments interested, a close time for fur seals, between April 15 and November 1, and between 160 degrees of longitude west and 170 degrees of longitude east in the Behring Sea. And he will cause an act to be introduced into Parliament to give effect to this arrangement so soon as it can be prepared. In his opinion there is no doubt that the act will be passed.

He will also join the United States Government in any preventive measures it may be thought best to adopt, by orders issued to the naval vessels of the respective governments in that region.

Early in April (1888) the Russian ambassador, Mr. de Staal, advised the American chargé "that the Russian Government would like to have the regulations which might be agreed upon for the Behring Sea extended to that portion of the latter in which the Commander Islands are situated, and also to the Sea of Okhotsk, in which Robben Island is situated."

On the 16th of April, at Lord Salisbury's invitation, the Russian ambassador and Mr. White, the American chargé (Mr. Phelps being absent from London) met at the foreign office "for the purpose of discussing

with Lord Salisbury the details of the proposed conventional arrangement for the protection of seals in Behring Sea."

"With a view to meeting the Russian Government's wishes respecting the waters surrounding Robben Island, his lordship suggested that beside the whole of Behring Sea those portions of the Sea of Okhotsk and of the Pacific Ocean north of north latitude 47, should be included in the proposed arrangement. His lordship intimated furthermore, that the period proposed by the United States for a close time, from April 15 to November 1, might interfere with the trade longer than absolutely necessary for the protection of seals, and he suggested October 1, instead of a month later, as the termination of the period of seal protection." Furthermore, Lord Salisbury "promised to have a draft convention prepared for submission to the Russian ambassador and the American minister."

On the 23d of April the American chargé was informed by Lord Salisbury that "it is now proposed to give effect to a seal convention by order in council, not by act of Parliament." It was understood that this course was proposed by Lord Salisbury in order that the regulations needed in Behring Sea might be promptly applied.

You will observe, then, that from the 11th of November, 1887, to the 23d of April, 1888, Lord Salisbury had in every form of speech assented to the necessity of a close season for the protection of the seals.

The shortest period which he named was from the 15th of April to the 1st of October—five and one-half months. In addition, his lordship suggested that the closed sea for the period named should include the whole of the Behring Sea and should also include such portion of the Sea of Okhotsk as would be necessary to protect the Russian seal fishery on Robben Island; that the closed season be extended as far south as the 47th degree of north latitude—120 miles south of the northern boundary of the United States on the Pacific Ocean. He promised further to draft a convention upon the subject between England, Russia, and the United States.

These assurances were given to the American minister, to the American chargé, to the Russian ambassador, and on more than one occasion to two of them together. The United States had no reason, therefore, to doubt that the whole dispute touching the seal fisheries was practically settled. Indeed to have distrusted it would have been to question the good faith of Lord Salisbury. In diplomatic intercourse between Great Britain and the United States, be it said to the honor of both governments, a verbal assurance from a minister has always been equal to his written pledge. Speaking the same language, there has been no room for misunderstanding between the representatives of the two governments, as may easily happen between those of different tongues. For a period of six months, therefore, without retraction or qualification, without the suggestion of a doubt or the dropping of a hint, the understanding between the two governments, on the assurance of Lord Salisbury, was as complete as language could make it.

On the 28th of April, five days after Lord Salisbury's last pointed assurance, five days after he had proposed to perfect the scheme, not by the delay of Parliament, but by the promptness of an order in council, the American chargé was informed that the act of Parliament would be necessary in addition to the order in council, and that neither act nor order could be drafted "until Canada is heard from."

For several weeks following April 28th, there were many calls by the American chargé at the foreign office to learn whether "Canada had been heard from." He called alone and called in company with the Rus-

sian ambassador. Finally, on the 20th of June, Lord Salisbury told him that an urgent telegram had been "sent to Canada a week ago with respect to the delay in its expedition," and that a reply had been "received by the secretary of state for the colonies, saying that the matter will be taken up immediately." Mr. White, relying entirely upon these assurances, ventured to "hope that shortly after Mr. Phelps' return the British Government will be in a condition to agree upon the terms of the proposed convention."

Mr. Phelps returned to London on the 22d of June, two days after Mr. White's interview with Lord Salisbury, and immediately after the urgent telegram had been sent to Canada. On the 28th of July Mr. Phelps had received no assurances from Lord Salisbury, and telegraphed the department of state his "fear that owing to Canadian opposition we shall get no convention." In a dispatch to his Government of the 12th of September, he related having had interviews with Lord Salisbury respecting the convention, which, he says, had been "virtually agreed upon, except in its details." Mr. Phelps goes on to say:

> The consideration of it has been suspended for communication by the British Government with the Canadian government, for which purpose an interval of several months had been allowed to elapse. During this long interval the attention of Lord Salisbury had been repeatedly called to the subject by the American legation, and on those occasions the answer received from him was that no reply from the Canadian authorities had arrived.

Mr. Phelps proceeds in the dispatch of September 12 to say:

> I again pressed Lord Salisbury for the completion of the convention, as the extermination of seals by the Canadian vessels was understood to be rapidly proceeding. His lordship, in reply, did not question the propriety or the importance of taking measures to prevent the wanton destruction of so a valuable industry, in which, as he remarked, England had a large interest of its own; but his lordship stated that the Canadian government objected to any such restrictions, and that until its consent could be obtained Her Majesty's Government was not willing to enter into the convention.

It was thus finally acknowledged that the negotiation into which Lord Salisbury had cordially entered, and to which he had readily agreed, even himself suggesting some of its most valuable details, was entirely subordinated to the judgment and desire of the Canadian government. This Government can not but feel that Lord Salisbury would have dealt more frankly if, in the beginning, he had informed Minister Phelps that no arrangement could be made unless Canada concurred in it, and that all negotiation with the British Government direct was but a loss of time.

When you, Mr. minister, arrived in this country a year ago, there seemed the best prospect for a settlement of this question, but the Russian minister and the American Secretary of State have had the experiences of Mr. Phelps and the Russian ambassador in London repeated. In our early interviews there seemed to be as ready a disposition on your part to come to a reasonable and friendly adjustment as there has always been on our part to offer one. You will not forget an interview between yourself, the Russian minister, and myself, in which the lines for a close season in the Behring Sea laid down by Lord Salisbury were almost exactly repeated by yourself, and were inscribed on maps which were before us, a copy of which is in the possession of the Russian minister, and a copy also in my possession. A prompt adjustment seemed practicable—an adjustment which I am sure would have been honorable to all the countries interested. No obstacles were presented on the American side of the question. No insistance was made upon

the Behring Sea as *mare clausum;* no objection was interposed to the entrance of British ships at all times on all commercial errands through all the waters of the Behring Sea. But our negotiations, as in London, were suddenly broken off for many weeks by the interposition of Canada. When correspondence was resumed on the last day of April, you made an offer for a mixed commission of experts to decide the questions at issue.

Your proposition is that pelagic sealing should be prohibited in the Behring Sea during the months of May, June, October, November, and December, and that there should be no prohibition during the months of July, August, and September. Your proposition involved the condition that British vessels should be allowed to kill seals within 10 miles of the coast of the Pribylov Islands. Lord Salisbury's proposition of 1888 was that during the same months, for which the 10-mile privilege is now demanded, no British vessel hunting seals should come nearer to the Pribylov Islands than the 47th parallel of north latitude, about 600 miles.

The open season which you thus select for killing is the one when the areas around the breeding islands are most crowded with seals, and especially crowded with female seals going forth to secure food for the hundreds of thousands of their young of which they have recently been delivered. The destruction of the females which, according to expert testimony, would be 95 per cent. of all which the sealing vessels might readily capture, would inflict deadly loss upon the rookeries. The destruction of the females would be followed by the destruction of their young on the islands, and the herds would be diminished the next year by this wholesale slaughter of the producing females and their offspring.

The 10-mile limit would give the marauders the vantage ground for killing the seals that are in the water by tens of thousands searching for food. The opportunity, under cover of fog and night, for stealing silently upon the islands and slaughtering the seals within a mile or even less of the keeper's residence, would largely increase the aggregate destruction. Under such conditions the British vessels could evenly divide with the United States, within the 3-mile limit of its own shores and upon the islands themselves, the whole advantage of the seal fisheries. The respect which the sealing vessels would pay to the 10-mile limit would be the same that wolves pay to a flock of sheep so placed that no shepherd can guard them. This arrangement, according to your proposal, was to continue for three months of each year, the best months in the season for depredations upon the seal herd. No course was left to the United States or to Russia but to reject the proposition.

The propositions made by Lord Salisbury in 1888 and the propositions made by Her Majesty's minister in Washington in 1890 are in significant contrast. The circumstances are the same, the conditions are the same, the rights of the United States are the same in both years. The position of England has changed, because the wishes of Canada have demanded the change. The result then with which the United States is expected to be content is that her rights within the Behring Sea and on the islands thereof are not absolute, but are to be determined by one of Her Majesty's provinces.

The British Government would assuredly and rightfully complain if an agreement between her representative and the representative of the United States should, without notice, be broken off by the United States on the ground that the State of California was not willing that it should be completed. California has a governor chosen independently of the

executive power of the National Government; Canada has a governor appointed by the British Crown. The legislature of California enacts laws with which the executive power of the United States has no right whatever to interfere; Canada enacts laws with which the executive power of Great Britain can interfere so far as absolutely to annul. Can the Government of the United States be expected to accept as final a decision of the Government of Great Britain that an agreement with the United States can not be fulfilled because the province of Canada objects?

This review of the circumstances which led to the present troubles on the Behring Sea question, has been presented by direction of the President in order to show that the responsibility does not rest with this Government. The change of policy made by Her Majesty's Government without notice and against the wish of this Government, is in the President's belief the cause of all the differences that have followed. I am further instructed by the President to say that while your proposals of April 30 can not be accepted, the United States will continue the negotiation in hope of reaching an agreement that may conduce to a good understanding and leave no cause for future dispute. In the President's opinion, owing to delays for which this Government is not responsible, it is too late to conclude such negotiation in time to apply its result the present season. He therefore proposes that Her Majesty's Government agree not to permit the vessels (which in his judgment do injury to the property of the United States) to enter the Behring Sea for this season, in order that time may be secured for negotiation that shall not be disturbed by untoward events or unduly influenced by popular agitation. If this offer be accepted, the President believes that before another season shall open, the friendly relations existing between the two countries and the mutual desire to continue them, will lead to treaty stipulations which shall be permanent, because just and honorable to all parties.

I have, etc.,

JAMES G. BLAINE.

No. 18.

Mr. Blaine to Sir Julian Pauncefote.

DEPARTMENT OF STATE,
Washington, June 2, 1890.

MY DEAR SIR JULIAN: I have had a prolonged interview with the President on the matters upon which we are endeavoring to come to an agreement touching the fur-seal question. The President expresses the opinion that an arbitration can not be concluded in time for this season. Arbitration is of little value unless conducted with the most careful deliberation. What the President most anxiously desires to know is whether Lord Salisbury, in order to promote a friendly solution of the question, will make for a single season the regulation which in 1888 he offered to make permanent. The President regards that as the step which will lead most certainly and most promptly to a friendly agreement between the two Governments.

I have, etc.,

JAMES G. BLAINE.

No. 19.

Sir Julian Pauncefote to Mr. Blaine.

BRITISH LEGATION,
Washington, D. C., June 3, 1890.

DEAR MR. BLAINE: In reply to your letter of yesterday evening, touching the fur-seal question, I beg to state that I am in a position to answer at once the inquiry "Whether Lord Salisbury, in order to promote a friendly solution of the question, will make for a single season the regulation which in 1888 he offered to make permanent."

The words which I quote from your letter have reference no doubt to the proposal of the United States that British sealing vessels should be entirely excluded from the Behring Sea during the seal fishery season. I shall not attempt to discuss here whether what took place in the course of the abortive negotiations of 1888 amounted to an offer on the part of Lord Salisbury "to make such a regulation permanent."

It will suffice for the present purpose to state that the further examination of the question which has taken place has satisfied His Lordship that such an extreme measure as that proposed in 1888 goes far beyond the requirements of the case.

Her Majesty's Government are quite willing to adopt all measures which shall be satisfactorily proved to be necessary for the preservation of the fur-seal species, and to enforce such measures on British subjects by proper legislation. But they are not prepared to agree to such a regulation as is suggested in your letter for the present fishery season, as, apart from other considerations, there would be no legal power to enforce its observance on British subjects and British vessels.

I have, etc.,

JULIAN PAUNCEFOTE.

No. 20.

Mr. Blaine to Sir Julian Pauncefote.

DEPARTMENT OF STATE,
Washington, June 4, 1890.

SIR: I have your favor of the 2d instant. The President sincerely regrets that his considerate and most friendly proposal for adjustment of all troubles connected with the Behring Sea should be so promptly rejected. The paragraph in your note in which you refer to Lord Salisbury's position needs explanation. I quote it in full:

> It will suffice for the present purpose to state that the further examination of the question which has taken place has satisfied His Lordship that such an extreme measure as that proposed in 1888 goes far beyond the requirements of the case.

I do not know what may have been the "examination of the question" that "has satisfied Lord Salisbury that such an extreme measure as that proposed in 1888 goes far beyond the requirements of the case." I only know that the most extreme measure proposed came from Lord Salisbury himself in suggesting a close season as far south as the forty-seventh parallel of latitude, to last from April 15 to October 1 in each year.

At the close of his negotiations with Mr. Phelps in September, 1888, His Lordship, still approving the "measures to prevent the wanton

destruction of so valuable an industry," declared, apparently with regret, that "the Canadian Government objected to any such restrictions" (*i. e.*, as those which His Lordship had in part proposed and wholly approved), and that "until its consent would be obtained Her Majesty's Government was not willing to enter into the convention." It is evident, therefore, that in 1888 Lord Salisbury abruptly closed the negotiations because in his own phrase "the Canadian Government objected." He assigned no other reason whatever, and until your note of the 2d was received this Government had never been informed that His Lordship entertained any other objections than those expressed in September, 1888.

It is proper to recall to your recollection that at divers times in personal conversation I have proposed to you, on behalf of this Government, a close season, materially shorter, in point of time, than was voluntarily offered by Lord Salisbury and much less extended in point of space. Instead of going as far south as the forty-seventh parallel I have frequently indicated the willingness of this Government to take the dividing line between the Pacific Ocean and the Behring Sea—the line which is tangent to the southernmost island of the Aleutian group—being as near as may be the fiftieth parallel of north latitude.

Early in April you will remember that you suggested to me the advantage that might follow if the sailing of the revenue cutters for Behring Sea could be postponed till the middle of May. Though that was a matter entirely under the control of the Treasury Department, Secretary Windom promptly complied with your request, and by the President's direction a still longer postponement was ordered in the hope that some form of equitable adjustment might be proposed by Her Majesty's Government. Even the revenue cutter, which annually passes through Behring Sea carrying supplies to the relief station at Point Barrow in the Arctic Ocean—seventy-second degree of North latitude—was held back lest her appearance in Behring Sea might be misrepresented as a non-observance of the understanding between us.

It is perfectly clear that if your claim for British vessels to kill seals within 10 miles of the Pribylov Islands, directly after the mothers are delivered of their young, should be granted, the Behring Sea would swarm with vessels engaged in sealing—not forty or fifty, as now, but many hundreds, through the summer months. If that privilege should be given to Canadian vessels, it must, of course, be conceded at once to American vessels. If the rookeries are to be thrown open to Canadians, they would certainly, as matter of common right, be thrown open to citizens of the United States. The seal mothers, which require an area of from 40 to 50 miles from the islands, on all sides, to secure food for their young, would be slaughtered by hundreds of thousands, and in a brief space of time there would be no seals in the Behring Sea. Similar causes have uniformly produced similar effects. Seal rookeries in all parts of the world have been destroyed in that way. The present course of Great Britain will produce the same effect on the only seal rookery of any value left in the waters of the oceans and seas of the globe. The United States have leased the privilege of sealing because only in that way can the rookeries be preserved, and only in that way can this Government derive a revenue from the Pribylov Islands. Great Britain would perhaps gain something for a few years, but it would be at the expense of destroying a valuable interest belonging to a friendly nation—an interest which the civilized world desires to have preserved.

I observe that you quote Treasury Agent George R. Tingle in your dispatch of April 30 as showing that, notwithstanding the depredations

of marauders, the total number of seals had increased in the Behring Sea. The rude mode of estimating the total number can readily lead to mistakes; and other agents have differed from Mr. Tingle. But aside from the correctness or incorrectness of Mr. Tingle's conclusions on that point, may I ask upon what grounds do the Canadian vessels assert a claim, unless they assume that they have a title to the increase of the seal herd? If the claim of the United States to the seals of the Pribylov islands be well founded, we are certainly entitled to the increase as much as a sheep-grower is entitled to the increase of his flock.

Having introduced Mr. Tingle, who has very extensive knowledge touching the seals in Behring Sea, as well as the habits of the Canadian marauders, I trust you will not discredit his testimony. The following statement made by Mr. Tingle in his official report to the Treasury Department at the close of the season of 1887 is respectfully commended to your consideration:

> I am now convinced from what I gather in questioning the men belonging to captured schooners and from reading the logs of the vessels, that not more than one seal in ten killed and mortally wounded is landed on the boats and skinned; thus you will see the wanton destruction of seal life without any benefit whatever. I think 30,000 skins taken this year is a low estimate on this basis; 300,000 fur-seals were killed to secure that number, or three times as many as the Alaska Commercial Company are allowed by law to kill. You can readily see that this great slaughter of seals will, in a few years, make it impossible for 100,000 skins to be taken on the islands by the lessees. I earnestly hope more rigorous measures will be adopted by the Government in dealing with these destructive law-breakers.

Both of Mr. Tingle's statements are made in his official capacity, and in both cases he had no temptation to state anything except what he honestly believed to be the truth.

The President does not conceal his disappointment that even for the sake of securing an impartial arbitration of the question at issue, Her Majesty's Government is not willing to suspend, for a single season, the practice which Lord Salisbury described in 1888 as "the wanton destruction of a valuable industry," and which this Government has uniformly regarded as an unprovoked invasion of its established rights.

I have, etc.,

JAMES G. BLAINE.

No. 21.

Sir Julian Pauncefote to Mr. Blaine.

WASHINGTON, *June* 6, 1890.

SIR: I have the honor to acknowledge the receipt of your official note of the 4th instant, commenting upon the reply which I returned to the inquiry contained in your letter of the 2d instant, whether the Marquis of Salisbury would, in order to promote a friendly solution of the fur-seal question, agree to the total exclusion of British sealers from the Behring Sea during the present fishery season. You express the regret of the President that "his considerate and most friendly proposal for the adjustment of all trouble connected with the Behring Sea should be so promptly rejected."

I have this day transmitted a copy of your note to Lord Salisbury, and pending further instructions I will abstain from pursuing the discussion on the various points with which it deals, especially as the

views of Her Majesty's Government on the main questions involved are stated with great precision in Lord Salisbury's dispatch of the 22d of May, which I had the honor to read to you yesterday, and of which, in accordance with your desire, I left a copy in your hands. I would only observe that as regards the sufficiency or insufficiency of the radius of ten miles around the rookeries "within which Her Majesty's Government proposed that sealers should be excluded" no opportunity was afforded me of discussing the question before the proposals of Her Majesty's Government were summarily rejected.

I may mention, also, that I fear there has been some misapprehension as regards a request which you appear to have understood me to make respecting the date of the sailing of United States revenue-cutters for Behring Sea. I have no recollection of having made any suggestion with reference to those revenue-cutters, except that their commanders should receive explicit instructions not to apply the municipal law of the United States to British vessels in Behring Sea outside of territorial waters.

I have, etc.,

JULIAN PAUNCEFOTE.

No. 22.

Sir Julian Pauncefote to Mr. Blaine.

[Extract from telegram from the Marquis of Salisbury.]

(Received June 9, 1890.)

Lord Salisbury regrets that the President of the United States should think him wanting in conciliation, but his lordship can not refrain from thinking that the President does not appreciate the difficulty arising from the law of England.

It is entirely beyond the power of Her Majesty's Government to exclude British or Canadian ships from any portion of the high seas, even for an hour, without legislative sanction. Her Majesty's Government have always been willing, without pledging themselves to details on the questions of area and date, to carry on negotiations, hoping thereby to come to some arrangement for such a close season as is necessary in order to preserve the seal species from extinction, but the provisions of such an arrangement would always require legislative sanction so that the measures thereby determined may be enforced.

Lord Salisbury does not recognize the expressions attributed to him. He does not think that he can have used them, at all events, in the context mentioned.

No. 23.

Mr. Blaine to Sir Julian Pauncefote.

DEPARTMENT OF STATE,
Washington, June 11, 1890.

SIR: I have shown to the President the extract from the telegram of Lord Salisbury of June 9, in which his lordship states that "it is beyond the power of Her Majesty's Government to exclude British or

Canadian ships from any portion of the high seas, even for an hour, without legislative sanction."

Not stopping to comment upon the fact that his lordship assumes the waters surrounding the Pribylov Islands to be the "high seas," the President instructs me to say that it would satisfy this Government if Lord Salisbury would by public proclamation simply request that vessels sailing under the British flag should abstain fron entering the Behring Sea for the present season. If this request shall be complied with, there will be full time for impartial negotiations, and, as the President hopes, for a friendly conclusion of the differences between the two Governments.

I have, etc.,

JAMES G. BLAINE.

No. 24.

Sir Julian Pauncefote to Mr. Blaine.

WASHINGTON, *June* 11, 1890.

SIR: I have the honor to acknowledge your note of this day with reference to the passage in a telegram from the Marquis of Salisbury, which I communicated to you at our interview of the 9th instant, to the effect that "it is beyond the power of Her Majesty's Government to exclude British or Canadian ships from any portion of the high seas, even for an hour without legislative action."

You inform me that without commenting on the fact that his lordship assumes the waters surrounding the Pribylov Islands to be the high seas, the President instructs you to say that it would satisfy your Government if Lord Salisbury would by public proclamation simply request that vessels sailing under the British flag should abstain from entering the Behring Sea for the present season. You add, if this request shall be complied with, there will be full time for impartial negotiations, and, as the President hopes, for a friendly conclusion of the differences between the two Governments.

I have telegraphed the above communication to Lord Salisbury, and I await his lordship's instructions thereon. In the meanwhile I take this opportunity of informing you that I reported to his lordship, by telegraph, that at the same interview I again pressed you for an assurance that British sealing vessels would not be interfered with in the Behring Sea by United States revenue cruisers while the negotiations continued, but you replied that you could not give such assurance. I trust this is not a final decision, and that in the course of the next few days, while there is yet time to communicate with the commanders, instructions will be sent to them to abstain from such interference.

It is in that hope that I have delayed delivering the formal protest of Her Majesty's Government announced in my note of the 23d of May.

I have, etc.,

JULIAN PAUNCEFOTE.

No. 25.

Sir Julian Pauncefote to Mr. Blaine.

WASHINGTON, *June* 14, 1890.

SIR: With reference to the note which I had the honor to address to you on the 11th instant, I desire to express my deep regret at having failed up to the present time to obtain from you the assurance, which I had hoped to receive, that during the continuance of our negotiations for the settlement of the fur-seal fishery question British sealing vessels would not be interfered with by United States revenue cruisers in the Behring Sea outside of territorial waters.

Having learned from statements in the public press and from other sources that the revenue cruisers *Rush* and *Corwin* are now about to be dispatched to the Behring Sea, I can not, consistently with the instructions I have received from my Government, defer any longer the communication of their formal protest announced in my notes of the 23d ultimo and the 11th instant against any such interference with British vessels.

I have accordingly the honor to transmit the same herewith.

I have, etc.

JULIAN PAUNCEFOTE.

[Inclosure.]

Protest.

(Received June 14, 12.35, 1890.)

The undersigned, Her Britannic Majesty's envoy extraordinary and minister plenipotentiary to the United States of America, has the honor, by instruction of his Government, to make to the Hon. James G. Blaine, Secretary of State of the United States, the following communication:

Her Britannic Majesty's Government have learned with great concern from notices which have appeared in the press, and the general accuracy of which has been confirmed by Mr. Blaine's statements to the undersigned, that the Government of the United States have issued instructions to their revenue cruisers about to be despatched to Behring Sea, under which the vessels of British subjects will again be exposed, in the prosecution of their legitimate industry on the high seas, to unlawful interference at the hands of American officers.

Her Britannic Majesty's Government are anxious to co-operate to the fullest extent of their power with the Government of the United States in such measures as may be found to be expedient for the protection of the seal fisheries. They are at the present moment engaged in examining, in concert with the Government of the United States, the best method of arriving at an agreement upon this point. But they can not admit the right of the United States of their own sole motion to restrict for this purpose the freedom of navigation of Behring Sea, which the United States have themselves in former years convincingly and successfully vindicated, nor to enforce their municipal legislation against British vessels on the high seas beyond the limits of their territorial jurisdiction.

Her Britannic Majesty's Government are therefore unable to pass over without notice the public announcement of an intention on the

part of the Government of the United States to renew the acts of interference with British vessels navigating outside the territorial waters of the United States, of which they have previously have to complain.

The undersigned is in consequence instructed formally to protest against such interference, and to declare that Her Britannic Majesty's Government must hold the Government of the United States responsible for the consequences that may ensue from acts which are contrary to the established principles of international law.

The undersigned, etc.,

JULIAN PAUNCEFOTE.

JUNE 14, 1890.

No. 26.

Sir Julian Pauncefote to Mr. Blaine.

WASHINGTON, *June* 27, 1890.

SIR: I did not fail to transmit to the Marquis of Salisbury a copy of your note of the 11th instant, in which, with reference to his lordship's statement that British legislation would be necessary to enable Her Majesty's Government to exclude British vessels from any portion of the high seas "even for an hour," you informed me, by desire of the President, that the United States Government would be satisfied "if Lord Salisbury would by public proclamation simply request that vessels sailing under the British flag should abstain from entering the Behring Sea during the present season."

I have now the honor to inform you that I have been instructed by Lord Salisbury to state to you in reply that the President's request presents constitutional difficulties which would preclude Her Majesty's Government from acceding to it, except as part of a general scheme for the settlement of the Behring Sea controversy, and on certain conditions which would justify the assumption by Her Majesty's Government of the grave responsibility involved in the proposal.

Those conditions are:

I. That the two Governments agree forthwith to refer to arbitration the question of the legality of the action of the United States Government in seizing or otherwise interfering with British vessels engaged in the Behring Sea, outside of territorial waters, during the years 1886, 1887, and 1889.

II. That, pending the award, all interference with British sealing vessels shall absolutely cease.

III. That the United States Government, if the award should be adverse to them on the question of legal right, will compensate British subjects for the losses which they may sustain by reason of their compliance with the British proclamation.

Such are the three conditions on which it is indispensable, in the view of Her Majesty's Government, that the issue of the proposed proclamation should be based.

As regards the compensation claimed by Her Majesty's Government for the losses and injuries sustained by British subjects by reason of the action of the United States Government against British sealing vessels in the Behring Sea during the years 1886, 1887, and 1889, I have already informed Lord Salisbury of your assurance that the United States Government would not let that claim stand in the way of an amicable ad-

justment of the controversy, and I trust that the reply which, by direction of Lord Salisbury, I have now the honor to return to the President's inquiry, may facilitate the attainment of that object for which we have so long and so earnestly labored.

I have, etc.,

JULIAN PAUNCEFOTE.

No. 27.

Mr. Blaine to Sir Julian Pauncefote.

DEPARTMENT OF STATE,
Washington, June 30, 1890.

SIR: On the 5th instant you read to me a dispatch from Lord Salisbury dated May 22, and by his instruction you left with me a copy. His Lordship writes in answer to my dispatch of the 22d January last. At that time, writing to yourself touching the current contention between the Governments of the United States and Great Britain as to the jurisdiction of the former over the waters of the Behring Sea, I made the following statement:

> The Government of the United States has no occasion and no desire to withdraw or modify the positions which it has at any time maintained against the claims of the Imperial Government of Russia. The United States will not withhold from any nation the privileges which it demanded for itself when Alaska was part of the Russian Empire. Nor is the Government of the United States disposed to exercise any less power or authority than it was willing to concede to the Imperial Government of Russia when its sovereignty extended over the territory in question. The President is persuaded that all friendly nations will concede to the United States the same rights and privileges on the lands and in the waters of Alaska which the same friendly nations always conceded to the Empire of Russia.

In answer to this declaration Lord Salisbury contends that Mr. John Quincy Adams, when Secretary of State under President Monroe, protested against the jurisdiction which Russia claimed over the waters of Behring Sea. To maintain this position his lordship cites the words of a dispatch of Mr. Adams, written on July 23, 1823, to Mr. Henry Middleton, at that time our minister at St. Petersburg. The alleged declarations and admissions of Mr. Adams in that dispatch have been the basis of all the arguments which Her Majesty's Government has submitted against the ownership of certain properties in the Behring Sea which the Government of the United States confidently assumes. I quote the portion of Lord Salisbury's argument which includes the quotation from Mr. Adams:

> After Russia, at the instance of the Russian-American Fur Company, claimed in 1821 the pursuits of commerce, whaling, and fishing from Behring's Straits to the 51st degree of north latitude, and not only prohibited all foreign vessels from landing on the coasts and islands of the above waters, but also prevented them from approaching within 100 miles thereof, Mr. Quincy Adams wrote as follows to the United States minister in Russia:
>
> "The United States can admit no part of these claims; their right of navigation and fishing is perfect, and has been in constant exercise from the earliest times throughout the whole extent of the Southern Ocean, subject only to the ordinary exceptions and exclusions of the territorial jurisdictions."

The quotation which Lord Salisbury makes is unfortunately a most defective, erroneous, and misleading one. The conclusion is separated from the premise, a comma is turned into a period, an important qualification as to time is entirely erased without even a suggestion that it

had ever formed part of the text, and out of eighty-four words, logically and inseparably connected, thirty-five are dropped from Mr. Adams' paragraph in Lord Salisbury's quotation. No edition of Mr. Adams' work gives authority for his lordship's quotation; while the archives of this Department plainly disclose its many errors. I requote Lord Salisbury's version of what Mr. Adams said, and in juxtaposition produce Mr. Adams's full text as he wrote it:

[Lord Salisbury's quotation from Mr. Adams.]

The United States can admit no part of these claims; their right of navigation and fishing is perfect, and has been in constant exercise from the earliest times throughout the whole extent of the Southern Ocean, subject only to the ordinary exceptions and exclusions of the territorial jurisdictions.

[Full text of Mr. Adams' paragraph.]

The United States can admit no part of these claims. Their right of navigation and of fishing is perfect, and has been in constant exercise from the earliest times, *after the peace of* 1783, throughout the whole extent of the Southern Ocean, subject only to the ordinary exceptions and exclusions of the territorial jurisdictions, *which so far as Russian rights are concerned, are confined to certain islands north of the fifty-fifth degree of latitude, and have no existence on the continent of America.*

The words in italics are those which are left out of Mr. Adams' paragraph in the dispatch of Lord Salisbury. They are precisely the words upon which the Government of the United States founds its argument in this case. Conclusions or inferences resting upon the paragraph, with the material parts of Mr. Adams' text omitted, are of course valueless.

The first object is to ascertain the true meaning of Mr. Adams' words which were omitted by Lord Salisbury. "Russian rights," said Mr. Adams, "are confined to certain islands north of the 55th degree of latitude." The islands referred to are as easily recognized to-day as when Mr. Adams described their situation sixty-seven years ago. The best known among them, both under Russian and American jurisdiction, are Sitka and Kadiak; but their whole number is great. If Mr. Adams literally intended to confine Russian rights to those islands, all the discoveries of Vitus Behring and other great navigators are brushed away by one sweep of his pen, and a large chapter of history is but a fable.

But Mr. Adams goes still farther. He declares that "Russian rights have no existence on the continent of America." If we take the words of Mr. Adams with their literal meaning, there was no such thing as "Russian Possessions in America," although forty-four years after Mr. Adams wrote these words, the United States paid Russia seven millions two hundred thousand dollars for these "Possessions" and all the rights of land and sea connected therewith.

This construction of Mr. Adams' language can not be the true one. It would be absurd on its face. The title to that far northern territory was secure to Russia as early as 1741; secure to her against the claims of all other nations; secure to her thirty-seven years before Captain Cook had sailed into the North Pacific; secure to her more than half a century before the United States had made good her title to Oregon. Russia was in point of time the first power in this region by right of discovery. Without immoderate presumption she might have challenged the rights of others to assumed territorial possessions; but no nation had shadow of cause or right to challenge her title to the vast region of land and water which, before Mr. Adams was Secretary of State, had become known as the "Russian Possessions."

Mr. Adams' meaning was not, therefore, and indeed could not be, what Lord Salisbury assumed. As against such interpretation I shall endeavor to call his lordship's attention to what this Government holds to be the indisputable meaning of Mr. Adams' entire paragraph. To that end a brief review of certain public transactions and a brief record of certain facts will be necessary.

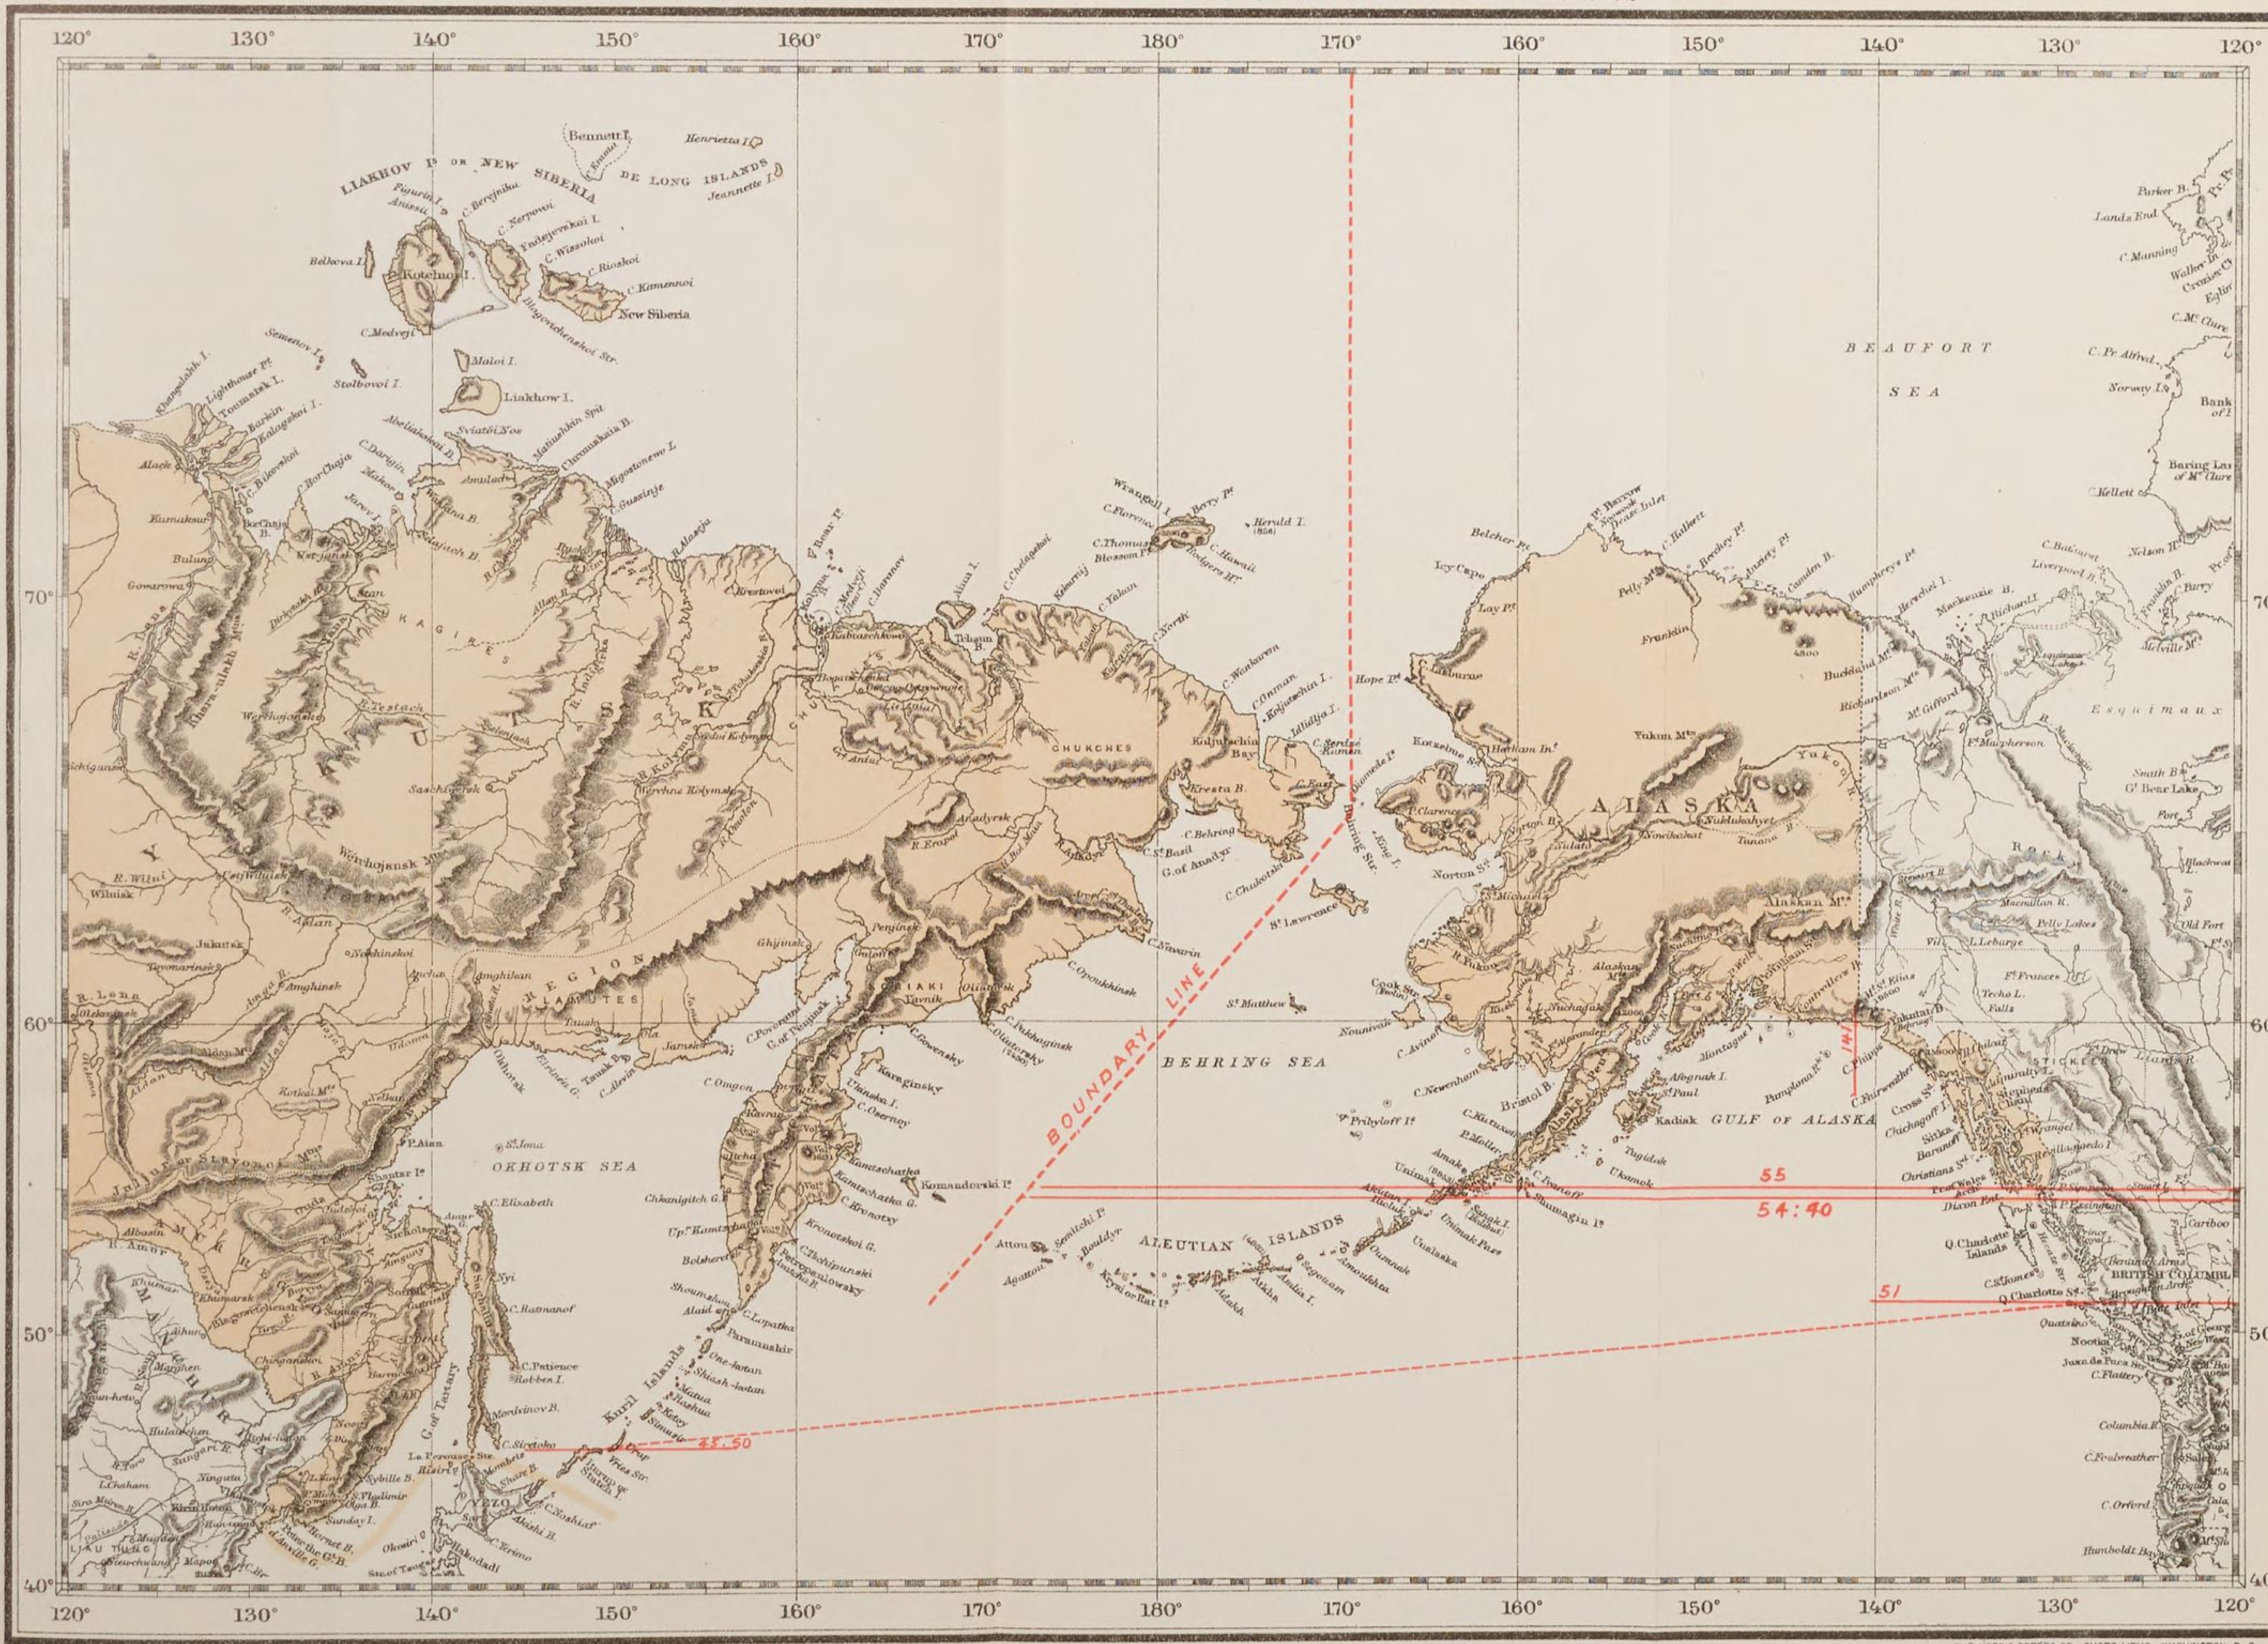
At the close of the year 1799, the Emperor Paul, by a ukase, asserted the exclusive authority of Russia over the territory from the Behring Strait down to the fifty-fifth degree of north latitude on the American coast, following westward "by the Aleutian, Kurile, and other islands" practically inclosing the Behring Sea. To the Russian American Company, which was organized under this ukase, the Emperor gave the right "to make new discoveries" in that almost unknown region, and "to occupy the new land discovered" as "Russian possessions." The Emperor was assassinated before any new discoveries were announced, but his successor, the Emperor Alexander I, inherited the ambition and the purpose of his father, and, in a new ukase of September 4, 1821, asserted the exclusive authority of Russia from Behring Strait southward to the fifty-first degree of north latitude on the American coast, proclaiming his authority, at the same time, on the Asiatic coast as far south as the forty-fifth degree, and forbidding any vessel to approach within 100 miles of land on either continent. I quote the two sections of the ukase that contain the order and the punishment:

SECTION 1. The transaction of commerce, and the pursuit of whaling and fishing, or any other industry on the islands, in the harbors and inlets, and, in general, all along the northwestern coast of America from Behring Strait to the fifty-first parallel of northern latitude, and likewise on the Aleutian Islands and along the eastern coast of Siberia, and on the Kurile Islands; that is, from Behring Strait to the southern promontory of the island of Urup, viz, as far south as latitude forty-five degrees and fifty minutes north, are exclusively reserved to subjects of the Russian Empire.

SEC. 2. Accordingly, no foreign vessel shall be allowed either to put to shore at any of the coasts and islands under Russian dominion as specified in the preceding section, or even to approach the same to within a distance of less than 100 Italian miles. Any vessel contravening this provision shall be subject to confiscation with her whole cargo.

Against *this larger claim of authority* (viz, extending farther south on the American coast to the 51st degree of north latitude), Mr. Adams vigorously protested. In a dispatch of March 30, 1822, to Mr. Poletica, the Russian minister at Washington, Mr. Adams said:

This ukase now for the first time extends the claim of Russia on the northwest coast of America to the 51st degree of north latitude.



And he pointed out to the Russian minister that the only foundation for the new pretension of Russia was the existence of a small settlement, situated, not on the American continent, but on a small island in latitude 57—Novo Archangelsk, now known as Sitka.

Mr. Adams protested, not against the ukase of Paul, but against the ukase of Alexander; not wholly against the ukase of Alexander, but only against his extended claim of sovereignty southward on the continent to the 51st degree north latitude. In short, Mr. Adams protested, not against the old possessions, but against the new pretensions of Russia on the northwest coast of America—pretensions to territory claimed by the United States and frequented by her mariners since the peace of 1783—a specification of time which is dropped from Lord Salisbury's quotation of Mr. Adams, but which Mr. Adams pointedly used to fix the date when the power of the United States was visibly exercised on the coast of the Pacific Ocean.

The names and phrases at that time in use to describe the geography

MAP TO GO AS EXPLANATORY OF No. 27, OF JUNE 30th, 1890 (Mr. BLAINE to Sir JULIAN PAUNCEFOTE).

SECTION OF A TRACK CHART OF THE WORLD, COVERING THE BEHRING SEA.

THE NORRIS PETERS CO., PHOTO-LITHO., WASHINGTON, D. C.

H Ex 450 511

included within the area of this dispute, are confusing and at certain points apparently contradictory and irreconcilable. Mr. Adams' denial to Russia of the ownership of territory on "the Continent of America" is a fair illustration of this singular contradiction of names and places. In the same way the phrase "Northwest coast" will be found, beyond all possible doubt, to have been used in two senses, one including the northwest coast of the Russian possessions, and one to describe the coast whose northern limit is the 60th parallel of north latitude.

It is very plain that Mr. Adams' phrase "the Continent of America,' in his reference to Russia's possessions, was used in a *territorial* sense, and not in a *geographical* sense. He was drawing the distinction between the territory of "America" and the territory of the "Russian possessions." Mr. Adams did not intend to assert that these territorial rights of Russia had no existence on the continent of North America. He meant that they did not exist as the ukase of the Emperor Alexander had attempted to establish them—southward of the Aleutian peninsula and on that distinctive part of the continent claimed as the territory of the United States. "America" and the "United States" were then, as they are now, commonly used as synonymous.

British statesmen at the time used the phrase precisely as Mr. Adams did. The possessions of the crown were generically termed British *America*. Great Britain and the United States harmonized at this point and on this territorial issue against Russia. Whatever disputes might be left by these negotiations for subsequent settlement between the two powers there can be no doubt that at that time they had a common and very strong interest against the territorial aggrandizement of Russia. The British use of the phrase is clearly seen in the treaty between Great Britain and Russia, negotiated in 1825, and referred to at length in a subsequent portion of this dispatch. A publicist as eminent as Stratford Canning opened the third article of that treaty in these descriptive words:

> The line of demarcation between the possessions of the high contracting parties, upon the coast of the continent, and the islands of America to the northwest. * * *

Mr. Canning evidently distinguished "the islands of America" from the "islands of the Russian possessions," which were far more numerous; and by the use of the phrase "*to the Northwest*" just as evidently limited the coast of *the Continent* as Mr. Adams limited it, in that direction, by the Alaskan peninsula. A concurrence of opinion between John Quincy Adams and Stratford Canning, touching any public question, left little room even for suggestion by a third person.

It will be observed as having weighty significance that the Russian ownership of the Aleutian and Kurile Islands (which border and close in the Behring Sea, and by the dip of the peninsula are several degrees south of latitude 55) was not disputed by Mr. Adams, and could not possibly have been referred to by him when he was limiting the island possessions of Russia. This is but another evidence that Mr. Adams was making no question as to Russia's ownership of all territory bordering on the Behring Sea. The contest pertained wholly to the territory on the northwest coast. The Emperor Paul's ukase, declaring his sovereignty over the Aleutian and Kurile Islands, was never questioned or denied by any power at any time.

Many of the acts of Mr. Adams' public life received interesting commentary and, where there was doubt, luminous interpretation in his personal diary, which was carefully kept from June 3, 1794, to January 1, 1848, inclusive. The present case affords a happy illustration of the

corroborative strength of the diary. During the progress of this correspondence Baron Tuyll, who had succeeded Mr. Poletica as Russian minister in Washington, called upon Mr. Adams at his office on July 17, 1823, six days before the date of the dispatch upon which I have been commenting, and upon which Lord Salisbury relies for sustaining his contention in regard to the Behring Sea. During an animated conversation of an hour or more between Mr. Adams and Baron Tuyll, the former said:

> I told Baron Tuyll specially that we should contest the right of Russia to *any* territorial establishment on this continent. * * *

It will be observed that Mr. Adams uses the same phrase in his conversation that has misled English statesmen as to the true scope and meaning of his dispatch of July 23, 1823. When he declared that we should "contest the right of Russia to any territorial establishment on this continent" (with the word "any" italicized), he no more meant that we should attempt to drive Russia from her ancient possessions than that we should attempt to drive England from the ownership of Canada or Nova Scotia. Such talk would have been absurd gasconade, and Mr. Adams was the last man to indulge in it. His true meaning, it will be seen, comes out in the next sentence when he declares:

> I told Baron Tuyll that we should assume distinctly the principle that the American continents are no longer subjects for any *new* European colonial establishments.

In the message of President Monroe to the next Congress (the 18th) at its first session, December 2, 1823, he announced that at the proposal of the Russian Government the United States had agreed to "arrange by amicable negotiations the respective rights and interests of the two nations on the northwest coast of this continent." A similar proposal had been made by Russia to Great Britain and had been likewise agreed to. The negotiations in both cases were to be at St. Petersburg.

It was in connection with this subject, and in the same paragraph, that President Monroe spoke thus:

> In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been judged proper for asserting, as a principle in which the rights and interests of the United States are involved, that *the American continents, by the free and independent condition which they have assumed and maintained, are henceforth not to be considered as subjects for future colonization by any European power.*

This very brief declaration (in fact merely the three lines italicized), constitutes the famous "Monroe doctrine." Mr. Adams' words of the July preceding clearly foreshadowed this position as the permanent policy of the United States. The declaration removes the last doubt, if room for doubt had been left, that the reference made by Mr. Adams was to the future, and had no possible connection with the Russian rights existing for three-quarters of a century before the dispatch of 1823 was written.

It was evident from the first that the determined attitude of the United States, subsequently supported by Great Britain, would prevent the extension of Russian territory southward to the 51st parallel. The treaties which were the result of the meeting at St. Petersburg, already noted, marked the surrender on the part of Russia of this pretension and the conclusion was a joint agreement that 54 degrees and 40 minutes should be taken as the extreme southern boundary of Russia on the northwest coast, instead of the 55th degree, which was proclaimed by the Emperor Paul in the ukase of 1799.

The treaty between Russia and the United States was concluded on the 17th of April, 1824, and that between Russia and Great Britain, ten

months later, on the 16th of February, 1825. In both treaties Russia acknowledges 54.40 as the dividing line. It was not determined which of the two nations owned the territory from 54.40 down to the 49th parallel, and it remained in dispute between Great Britain and the United States until its final adjustment by the "Oregon treaty," negotiated by Mr. Buchanan and Mr. Pakenham under the administration of Mr. Polk in 1846.

The Government of the United States has steadily maintained that in neither of these treaties with Russia was there any attempt at regulating or controlling, or even asserting an interest in, the Russian Possessions and the Behring Sea, which lie far to the north and west of the territory which formed the basis of the contention. This conclusion is indisputably proved by the protocols which were signed during the progress of the negotiation. At the fourth conference of the plenipotentiaries, on the 8th day of March (1824), the American minister, Mr. Henry Middleton, submitted to the Russian representative, Count Nesselrode, the following:

> The dominion can not be acquired but by a real occupation and possession, and an intention (animus) to establish it is by no means sufficient.
>
> Now, it is clear, according to the facts established, that neither Russia nor any other European power has the right of dominion upon the continent of America between the fiftieth and sixtieth degrees of north latitude.
>
> Still less has she the dominion of the adjacent maritime territory, or of the sea which washes these coasts, a dominion which is only accessory to the territorial dominion.
>
> Therefore she has not the right of exclusion or of admission on these coasts, nor in these seas which are free seas.
>
> The right of navigating all the free seas belongs, by natural law, to every independent nation, and even constitutes an essential part of this independence.
>
> The United States have exercised navigation in the seas, and commerce upon the coasts above mentioned, from the time of their independence; and they have a perfect right to this navigation and to this commerce, and they can only be deprived of it by their own act or by a convention.

'This is a clear proof of what is demonstrated in other ways, that the whole dispute between the United States and Russia and between Great Britain and Russia related to the Northwest coast, as Mr. Middleton expresses it, between the "50th and the 60th degrees of north latitude." This statement is in perfect harmony with Mr. Adams' paragraph when given in full. "The United States," Mr. Middleton insists, "have exercised navigation in the seas and commerce upon the coasts above mentioned, from the time of their independence;" but he does not say one word in regard to our possessing any rights of navigation or commerce in the Behring Sea. He declares that "Russia has not the right of exclusion or admission on these coasts [between the 50th and 60th degrees north latitude] nor in these seas which are *free* seas," evidently emphasizing "free" to distinguish those seas from the Behring Sea, which was recognized as being under Russian restrictions.

Mr. Middleton wisely and conclusively maintained that if Russia had no claim to the continent between the 50th and the 60th degrees north latitude; "still less could she have the dominion of the adjacent maritime territory," or, to make it more specific, "of the sea which washes these coasts." That sea was the Great Ocean, or the Pacific Ocean, or the South Sea, the three names being equally used for the same thing.

The language of Mr. Middleton plainly shows that the lines of latitude were used simply to indicate the "dominion" on the coast between the 50th and 60th parallels of north latitude.

The important declarations of Mr. Middleton, which interpret and enforce the contention of the United States, should be regarded as in-

disputable authority, from the fact that they are but a paraphrase of the instructions which Mr. Adams delivered to him for his guidance in negotiating the treaty with Count Nesselrode. Beyond all doubt they prove that Mr. Adams' meaning was the reverse of what Lord Salisbury infers it to be in the paragraph of which he quoted only a part.

The four principal articles of the treaty negotiated by Mr. Middleton are as follows:

ART. I. It is agreed that, in any part of the Great Ocean, commonly called the Pacific Ocean or South Sea, the respective citizens or subjects of the high contracting powers shall be neither disturbed nor restrained, either in navigation or in fishing, or in the power of resorting to the coasts, upon points which may not already have been occupied, for the purpose of trading with the natives, saving always the restrictions and conditions determined by the following articles:

ART. II. With a view of preventing the rights of navigation and of fishing exercised upon the Great Ocean by the citizens and subjects of the high contracting powers from becoming the pretext for an illicit trade, it is agreed that the citizens of the United States shall not resort to any point where there is a Russian establishment, without the permission of the governor or commander; and that, reciprocally, the subjects of Russia shall not resort, without permission, to any establishment of the United States upon the Northwest coast.

ART. III. It is moreover agreed that, hereafter, there shall not be formed by the citizens of the United States, or under the authority of the said States, any establishment upon the Northwest coast of America, nor in any of the islands adjacent, to the north of fifty-four degrees and forty minutes of north latitude; and that, in the same manner, there shall be none formed by Russian subjects, or under the authority of Russia, south of the same parallel.

ART. IV. It is, nevertheless, understood that during a term of ten years, counting from the signature of the present convention, the ships of both powers, or which belong to their citizens or subjects, respectively, may reciprocally frequent, without any hindrance whatever, the interior seas, gulfs, harbors, and creeks, upon the coast mentioned in the preceding article, for the purpose of fishing and trading with the natives of the country.

The first article, by carefully mentioning the *Great Ocean* and describing it as the ocean "commonly called the Pacific Ocean or South Sea," evidently meant to distinguish it from some other body of water with which the negotiators did not wish to confuse it. Mr. Adams used the term "South Sea" in the dispatch quoted by Lord Salisbury, and used it with the same discriminating knowledge that pervades his whole argument on this question. If no other body of water existed within the possible scope of the treaty, such particularity of description would have had no logical meaning. But there was another body of water already known as the Behring Sea. That name was first given to it in 1817—according to English authority—seven years before the American treaty, and eight years before the British treaty, with Russia; but it had been known as a *sea*, separate from the ocean, under the names of the Sea of Kamchatka, the Sea of Otters, or the Aleutian Sea, at different periods before the Emperor Paul issued his ukase of 1799.

The second article plainly shows that the treaty is limited to the Great Ocean, as separate from the Behring Sea, because the limitation of the "Northwest coast" between the 50th and 60th degrees could apply to no other. That coast, as defined both by American and British negotiators at that time, did not border on the Behring Sea.

The third article shows the compromise as to territorial sovereignty on the Northwest coast. The United States and Great Britain had both claimed that Russia's just boundary on the coast terminated at the 60th degree north latitude, the southern border of the Aleutian peninsula. Russia claimed to the 51st parallel. They made a compromise by a nearly equal division. An exactly equal division would have given Russia 54.30; but 10 miles farther north Prince of Wales' Island presented a better geographical point for division, and Russia accepted

a little less than half the coast of which she had claimed all and 54.40 was thus established as the dividing point.

The fourth article of the treaty necessarily grew out of the claims of Russia to a share of the Northwest coast in dispute between the United States and Great Britain. Mr. Adams, in the instruction to Mr. Middleton so often referred to, says:

> By the third article of the convention between the United States and Great Britain, of the 20th of October, 1818, it was agreed that any country that might be claimed by either party on the Northwest coast of America, westward of the Stony Mountains, should, together with its harbors, bays, and creeks, and the navigation of all rivers within the same, be free and open, for the term of ten years from that date, to the vessels, citizens, and subjects of the two powers, without prejudice to the claims of either party or of any other state.
>
> You are authorized to propose an article of the same import for a term of ten years from the signature of a joint convention between the United States, Great Britain, and Russia.

It will be observed that the fourth article relates solely to the "Northwest coast of America" so well understood as the coast of the Pacific Ocean, between the 50th and the 60th degrees north latitude, and therefore does not in the remotest degree touch the Behring Sea or the land bordering upon it.

The several articles in the treaty between Great Britain and Russia, February 16, 1825, that could have any bearing on the pending contention are as follows:

Articles I and II (substantially the same as in the treaty between Russia and the United States).

ARTICLE III. The line of demarcation between the possessions of the high contracting parties, upon the coast of the continent, and the islands of America to the Northwest shall be drawn in the manner following:

Commencing from the southernmost point of the island called Prince of Wales Island, which point lies in the parallel of 54 degrees 40 minutes north latitude, and between the one hundred and thirty-first and the one hundred and thirty-third degree of west longitude (meridian of Greenwich), the said line shall ascend to the north along the channel called *Portland Channel*, as far as the point of the continent where its strikes the fifty-sixth degree of north latitude; from this last mentioned point the line of demarcation shall follow the summit of the mountains situated parallel to the coast as far as the point of intersection of the one hundred and forty-first degree of west longitude (of the same meridian); and, finally, from the said point of intersection the said meridian line of the one hundred and forty-first degree in its prolongation as far as the frozen ocean shall form the limit between the Russian and British possessions on the continent of America to the northwest.

Article V. (Substantially the same as Article III of the treaty between Russia and the United States.)

ARTICLE VI. It is understood that the subjects of His Britannic Majesty, from whatever quarter they may arrive, whether from the ocean or from the interior of the continent, shall forever enjoy the right of navigating freely and without any hindrance whatever all the rivers and streams which, in their course towards the Pacific Ocean, may cross the line of demarcation upon the line of coast described in Article III of the present convention.

ARTICLE VII. It is also understood that, for the space of ten years from the signature of the present convention, the vessels of the two powers, or those belonging to their respective subjects, shall mutually be at liberty to frequent without any hindrance whatever all the inland seas, the gulfs, havens, and creeks on the coast mentioned in Article III, for the purposes of fishing and of trading with the natives.

After the analysis of the articles in the American treaty there is little in the English treaty that requires explanation. The two treaties were draughted under circumstances and fitted to conditions quite similar. There were some differences because of Great Britain's ownership of British America. But these very differences corroborate the position of the United States. This is most plainly seen in Article VI. By that

article the subjects of Her Britannic Majesty were guarantied the right of navigating freely the rivers emptying into the Pacific Ocean and crossing the *line of demarcation upon the line of coast described in Article III.* The line of demarcation is described in Article III as following "the summit of the mountains situated parallel to the coast *as far as the point of intersection of the one hundred and forty-first degree of west longitude.*" Article IV, qualifying Article III, specifies that "wherever the summit of the mountains which extend in a direction parallel to the coast, from the fifty-sixth degree of north latitude to the point of intersection of the one hundred and forty-first degree of west longitude, shall prove to be at a distance of more than ten marine leagues from the ocean, the limit between the British possessions and the line of coast which is to belong to Russia, as above mentioned, shall be formed by a line parallel to the windings of the coast, and shall never exceed the distance of ten marine leagues therefrom."

By both these articles the line of demarcation ceases to have any parallel relation to the coast when it reaches the point of intersection of the one hundred and forty-first degree of west longitude.

From that point the one hundred and forty-first degree of west longitude, as far as it extends continuously on land northward, is taken as the boundary between the territories of the two powers. It is thus evident that British subjects were guarantied the right of navigating only such rivers as crossed the line of demarcation *while it followed the line of coast.* They were limited, therefore, to the rivers that emptied into the Pacific Ocean between 54:40 and 60 degrees north latitude, the latter being the point on the coast opposite the point where the line of demarcation diverges—Mount St. Elias.

By this agreement Great Britain was excluded from all rivers emptying into the Behring Sea, including the great Yukon and its affluent, the Porcupine, which rise and for a long distance flow in British America. So complete was the exclusion from Behring Sea that Great Britain surrendered in this case a doctrine which she had aided in impressing upon the Congress of Vienna for European rivers. She did not demand access to the sea from a river whose source was in her territory. She consented, by signing the treaty of 1825, to such total exclusion from the Behring Sea as to forego following her own river to its mouth in that sea.

It shows a curious association of political events that in the Washington treaty of 1871 the United States conceded to Great Britain the privilege of navigating the Yukon and its branch, the Porcupine, to the Behring Sea in exchange for certain privileges conceded to the United States on the St. Lawrence. The request of Great Britain for the privilege of navigating the Yukon and Porcupine is a suggestive confession that it was withheld from her by Russia in the treaty of 1825; —withheld because the rivers flowed to the Behring Sea.

The seventh article is practically a repetition of the fourth article in the treaty between Russia and the United States, and the privilege of fishing and trading with the natives is limited to the coast, mentioned in Article III, identically the same line of coast which they were at liberty to pass through to reach British America or to reach the coast from British America. They are excluded from going north of the prescribed point on the coast near Mount St. Elias, and are therefore kept out of Behring Sea.

It is to be noted that the negotiators of this treaty, in defining the boundary between the Russian and British possessions, cease to observe particularity exactly at the point on the coast where it is intersected by

the sixtieth parallel. From that point the boundary is designated by the almost indefinite prolongation northward of the one hundred and forty-first degree of longitude west. It is plain, therefore, that this treaty, like the Russo-American treaty, limited the "northwest coast" to that part of the coast between the fiftieth and sixtieth parallels of north latitude,—as fully set forth by Mr. Middleton in the protocols preceding the treaty between the United States and Russia. The negotiators never touched one foot of the boundary of the Behring Sea, whether on continent or island, and never even made a reference to it. Its nearest point, in Bristol Bay, was a thousand miles distant from the field of negotiation between the powers.

It must not be forgotten that this entire negotiation of the three powers proceeded with full knowledge and recognition of the ukase of 1821. While all questions touching the respective rights of the powers on the northwest coast between the fiftieth and sixtieth parallels were discussed and pressed by one side or the other, and finally agreed upon, the terms of the ukase of 1821, in which the Emperor set forth so clearly the rights claimed and exercised by Russia in the Behring Sea, were untouched and unquestioned. These rights were therefore admitted by all the powers negotiating as within the exercise of Russia's lawful authority then, and they were left inviolate by England during all the subsequent continuance of Russia's dominion over Alaska.

These treaties were therefore a practical renunciation, both on the part of England and the United States, of any rights in the waters of Behring Sea during the period of Russia's sovereignty. They left the Behring Sea and all its coasts and islands precisely as the ukase of Alexander in 1821 left them,—that is with a prohibition against any vessel approaching nearer to the coast than 100 Italian miles, under danger of confiscation. The original ukase of Alexander (1821) claimed as far south as the fifty-first degree of north latitude, with the inhibition of 100 miles from the coast applying to the whole.

The result of the protest of Mr. Adams, followed by the co-operation of Great Britain, was to force Russia back to 54.40 as her southern boundary. But there was no renunciation whatever on the part of Russia as to the Behring Sea, to which the ukase especially and primarily applied. As a piece of legislation this ukase was as authoritative in the dominions of Russia as an act of Parliament is in the dominions of Great Britain or an act of Congress in the territory of the United States. Except as voluntarily modified by Russia in the treaty with the United States, April 17, 1824, and in the treaty with Great Britain, February 16, 1825, the ukase of 1821 stood as the law controlling the Russian possessions in America until the close of Russia's ownership by transfer to this Government. Both the United States and Great Britain recognized it, respected it, obeyed it. It did not, as so many suppose, declare the Behring Sea to be *mare clausum*. It did declare that the waters, to the extent of 100 miles from the shores, were reserved for the subjects of the Russian Empire. Of course many hundred miles east and west and north and south, were thus intentionally left by Russia for the whale fishery and for fishing open and free to the world, of which other nations took large advantage. Perhaps in pursuing this advantage foreigners did not always keep 100 miles from the shore, but the theory of right on which they conducted their business unmolested was that they observed the conditions of the ukase.

But the 100-mile restriction performed the function for which it was specially designed in preventing foreign nations from molesting, disturbing, or by any possibility sharing in the fur trade. The fur trade formed

the principal, almost the sole employment of the Russian American Company. It formed its employment, indeed, to such a degree that it soon became known only as the Russian American *Fur* Company, and quite suggestively that name is given to the company by Lord Salisbury in the dispatch to which I am replying. While, therefore, there may have been a large amount of lawful whaling and fishing in the Behring Sea, the taking of furs by foreigners was always and under all circumstances illicit.

Eighteen years after the treaty of 1825 (in 1843) Great Britain made a commercial treaty with Russia, based on the principle of reciprocity of advantages, but the rights of the Russian American Company, which under both ukases included the sovereigntry over the sea to the extent of 100 miles from the shores, were reserved by special clause, in a separate and special article, signed after the principal articles of the treaty had been concluded and signed. Although British rights were enlarged with nearly all other parts of the Russian Empire, her relations with the Russian possessions and with the Behring Sea remained at precisely the same point where the treaty of 1825 had placed them.

Again in 1859 Great Britain still further enlarged her commercial relations with the Empire of Russia, and again the "possessions" and the Behring Sea were held firmly in their relations to the Russian American Company as they had been held in the treaty of 1843.

It is especially notable that both in the treaty of 1843 and the treaty of 1859 it is declared that "in regard to commerce and navigation in the Russian possessions on the northwest coast of America the convention concluded at St. Petersburg, February 16, 1825, shall continue in force." The same distinction and the same restrictions which Mr. Adams made in regard to the northwest coast of America were still observed, and Great Britain's access from or to the interior of the continent was still limited to that part of the coast between 54.40 and a point near Mount Saint Elias. The language of the three Russo-British treaties of 1825, 1843, and 1859 corresponds with that employed in Mr. Adams' dispatch to Mr. Middleton, to which reference has so frequently been made. This shows that the true meaning of Mr. Adams' paragraph is the key, and indeed the only key by which the treaties can be correctly interpreted and by which expressions apparently contradictory or unintelligible can be readily harmonized.

Immediately following the partial quotation of Mr. Adams's dispatch, Lord Salisbury quotes the case of the United States brig *Loriot* as having some bearing on the question relating to the Behring Sea. The case happened on the 15th of September, 1836, and Mr. Forsyth, Secretary of State, in a dispatch to the United States minister at St. Petersburg, declared the course of the Russians in arresting the vessel to be a violation of the rights of the citizens of the United States. He claimed that the citizens of the United States had the right immemorially as well as by the stipulations of the treaty of 1824 to fish in those waters.

Lord Salisbury's understanding of the case differs entirely from that held by the Government of the United States. The *Loriot* was not arrested in Behring Sea at all, nor was she engaged in taking furs. She was arrested, as Mr. Forsyth in his dispatch says, in latitude 54:55, more than sixty miles south of Sitka, on the "northwest coast," to which, and to which only, the treaty of 1824 referred. Russia upheld its action on the ground that the ten-year term provided in the fourth article of the treaty had closed two years before. The case was made the basis of an application on the part of the United States Government

for a renewal of that article. This application was pressed for several years, but finally and absolutely refused by the Russian Government. Under the claim of Russia that the term of ten years had expired, the United States failed to secure any redress in the *Loriot* case. With all due respect to Lord Salisbury's judgment, the case of the *Loriot* sustains the entire correctness of the position of the United States in this contention.

It only remains to say that whatever duty Great Britain owed to Alaska as a Russian province, whatever she agreed to do or to refrain from doing, touching Alaska and the Behring Sea, was not changed by the mere fact of the transfer of sovereignty to the United States. It was explicitly declared, in the sixth article of the treaty by which the territory was ceded by Russia, that "the cession hereby made conveys all the rights, franchises, and privileges now belonging to Russia in the said territory or dominions and appurtenances thereto." Neither by the treaty with Russia of 1825, nor by its renewal in 1843, nor by its second renewal in 1859, did Great Britain gain any right to take seals in Behring Sea. In fact, those treaties were a prohibition upon her which she steadily respected so long as Alaska was a Russian province. It is for Great Britain now to show by what law she gained rights in that sea after the transfer of its sovereignty to the United States.

During all the time elapsing between the treaty of 1825 and the cession of Alaska to the United States in 1867, Great Britain never affirmed the right of her subjects to capture fur-seal in the Behring Sea; and, as a matter of fact, her subjects did not, during that long period, attempt to catch seals in the Behring Sea. Lord Salisbury, in replying to my assertion that these lawless intrusions upon the fur-seal fisheries began in 1886, declares that they had occurred before. He points out one attempt in 1870, in which forty-seven skins were found on board an intruding vessel; in 1872 there was a rumor that expeditions were about to fit out in Australia and Victoria for the purpose of taking seals in the Behring Sea; in 1874 some reports were heard that vessels had entered the sea for that purpose; one case was reported in 1875; two cases in 1884; two also in 1885.

These cases, I may say without intending disrespect to his lordship, prove the truth of the statement which he endeavors to controvert, because they form just a sufficient number of exceptions to establish the fact that the destructive intrusion began in 1886. But I refer to them now for the purpose of showing that his lordship does not attempt to cite the intrusion of a single British sealer into the Behring Sea until after Alaska had been transferred to the United States. I am justified, therefore, in repeating the questions which I addressed to Her Majesty's Government on the 22d of last January, and which still remain unanswered, viz:

Whence did the ships of Canada derive the right to do, in 1886, that which they had refrained from doing for nearly ninety years?

Upon what grounds did Her Majesty's Government defend, in the year 1886, a course of conduct in the Behring Sea which had been carefully avoided ever since the discovery of that sea?

By what reasoning did Her Majesty's Government conclude that an act may be committed with impunity against the rights of the United States which had never been attempted against the same rights when held by the Russian Empire?

I have, etc.,

JAMES G. BLAINE.

No. 28.

Sir Julian Pauncefote to Mr. Blaine.

WASHINGTON, *June* 30, 1890.

SIR: In your note of the 29th of May last, which I duly transmitted to the Marquis of Salisbury, there are several references to communciations which passed between the two Governments in the time of your predecessor.

I have now received a dispatch from Lord Salisbury, copy of which I have the honor to inclose, pointing out that there is some error in the impressions which you have gathered from the records in the State Department with respect to those communications.

I have, etc.,

JULIAN PAUNCEFOTE.

[Inclosure.]

The Marquis of Salisbury to Sir Julian Pauncefote.

No. 126.] FOREIGN OFFICE, *June* 20, 1890.

SIR: I have to acknowledge your dispatch No. 83 of the 30th ultimo, inclosing copy of a note from Mr. Blaine dated the 29th ultimo.

It contains several references to communications which passed between the two Governments in the time of Mr. Blaine's predecessor, especially in the spring of 1888. Without referring at present to other portions of Mr. Blaine's note I wish only now to point out some error in the impressions which he has gathered from the records in his office with respect to those communications. He states that on the 23d April of that year I informed the American chargé d'affaires, Mr. White, that it was proposed to give effect to a seal convention by order in council, not by act of Parliament. This was a mistake. It was very natural that Mr. White should not have apprehended me correctly when I was describing the somewhat complicated arrangements by which agreements of this kind are brought into force in England. But two or three days after the 23d April he called to make inquiry on the subject, and in reply to his question the following letter was addressed to him by my instructions:

FOREIGN OFFICE, *April* 27, 1888.

MY DEAR WHITE: Lord Salisbury desires me to express his regret that he is not yet in a position to make any further communication to you on the subject of the seal fisheries in Behring Sea. After his interview with you and M. de Staal he had to refer to the Canadian Government, the Board of Trade, and the Admiralty, but has as yet only obtained the opinion of the Admiralty. The next step is to bring a bill into Parliament.

Yours, etc.,

ERIC BARRINGTON.

On the 28th, Mr. White replied:

LEGATION OF THE UNITED STATES, *London, April* 28, 1888.

MY DEAR BARRINGTON: Thanks for your note, respecting the final sentence of which, "The next step is to bring a bill into Parliament," I must trouble you with a line.

I understood Lord Salisbury to say when I saw him with M. de Staal, and again last week alone, that it is now proposed to give effect to the conventional arrangement for the protection of seals by an order in council, not by act of Parliament.

When Mr. Phelps left the latter was thought necessary, and last week I received a telegram from the Secretary of State, asking me to obtain confidentially a copy of the proposed act of Parliament, with a view to assimilating our contemplated act of

Congress thereto. I replied, after seeing Lord Salisbury last Saturday, that there would be no bill introduced in Parliament, but an order in council.

May I ask if this be now incorrect, as, in that event, I should particularly like to correct my former statement by this day's mail.

To this the following reply was on the same date addressed to Mr. White:

FOREIGN OFFICE, *April* 28, 1888.

MY DEAR WHITE: Lord Salisbury is afraid that he did not make himself understood when last he spoke to you about the Seal Fisheries Convention.

An act of Parliament is necessary to give power to our authorities to act on the provisions of the convention when it is signed. The order in council will be merely the machinery which the act will provide for the purpose of bringing its provisions into force. The object of this machinery is to enable the Government to wait till the other two powers are ready. But neither convention nor bill is drafted yet, because we have not got the opinions from Canada which are necessary to enable us to proceed.

Yours, etc.,

ERIC BARRINGTON.

It is evident from this correspondence that if the United States Government was misled upon the 23d April into the belief that Her Majesty's Government could proceed in the matter without an act of parliament, or could proceed without previous reference to Canada, it was a mistake which must have been entirely dissipated by the correspondence which followed in the ensuing week.

Mr. Blaine is also under a misconception in imagining that I ever gave any verbal assurance, or any promise of any kind, with respect to the terms of the projected convention. Her Majesty's Government always have been, and are still, anxious for the arrangement of a convention which shall provide whatever close time in whatever localities is necessary for the preservation of the fur-seal species. But I have represented that the details must be the subject of discussion, a discussion to which those who are locally interested must of necessity contribute. I find the record of the following conversation about the date to which Mr. Blaine refers:

The Marquis of Salisbury to Sir L. West.

FOREIGN OFFICE, *March* 17, 1888.

SIR: Since forwarding to you my dispatch No. 23 of the 22d ultimo, I have been in communication with the Russian ambassador at this court, and have invited his excellency to ascertain whether his Government would authorize him to discuss with Mr. Phelps and myself the suggestion made by Mr. Bayard in his dispatch of the 7th February, that concerted action should be taken by the United States, Great Britain, and other interested powers, in order to preserve from extermination the fur seals which at certain seasons are found in Behring Sea.

Copies of the correspondence on this question which has passed between M. de Staal and myself is inclosed herewith.

I request that you will inform Mr. Bayard of the steps which have been taken, with a view to the initiation of negotiations for an agreement between the three powers principally concerned in the maintenance of the seal fisheries. But in so doing you should state that this action on the part of Her Majesty's Government must not be taken as an admission of the rights of jurisdiction in Behring Sea exercised there by the United States authorities during the fishing seasons of 1886–'87 and 1887–'88, nor as affecting the claims which Her Majesty's Government will have to present on account of wrongful seizures which have taken place of British vessels engaged in the seal-fishing industry.

I am, etc.,

SALISBURY.

In pursuance of this dispatch, the suggestion made by Mr. Bayard, to which I referred, was discussed, and negotiations were initiated for an agreement between the three powers. The following dispatch con-

tains the record of what I believe was the first meeting between the three powers upon the subject:

The Marquis of Salisbury to Sir L. West.

FOREIGN OFFICE, *April* 16, 1888.

SIR: The Russian Ambassador and the United States chargé d'affaires called upon me this afternoon to discuss the question of the seal fisheries in Behring Sea, which had been brought into prominence by the recent action of the United States.

The United States Government had expressed a desire that some agreement should be arrived at between the three Governments for the purpose of prohibiting the slaughter of the seals during the time of breeding; and, at my request, M. de Staal had obtained instructions from his Government on that question.

At this preliminary discussion it was decided *provisionally, in order to furnish a basis for negotiation, and without definitively pledging our Governments*, that the space to be covered by the proposed convention should be the sea between America and Russia north of the 47th degree of latitude; that the close time should extend from the 15th April to the 1st November; that during that time the slaughter of all seals should be forbidden, and vessels engaged in it should be liable to seizure by the cruisers of any of the three powers, and should be taken to the port of their own nationality for condemnation; that the traffic in arms, alcohol, and powder should be prohibited in all the islands of those seas; and that, as soon as the three powers had concluded a convention, they should join in submitting it for the assent of the other maritime powers of the northern seas.

The United States chargé d'affaires was exceedingly earnest in pressing on us the importance of dispatch, on account of the inconceivable slaughter that had been and was still going on in these seas. He stated that in addition to the vast quantity brought to market, it was a common practice for those engaged in the trade to shoot all seals they might meet in the open sea, and that of these a great number sank, so that their skins could not be recovered.

I am, etc.,

SALISBURY.

It was impossible to state more distinctly that any proposal made was provisional, and was merely made for the purpose of enabling the requisite negotiations to proceed. The subsequent discussion of these proposals was undoubtedly delayed in consequence of the length of time occupied by the Canadian Government in collecting from considerable distances the information which they required before their opinion on the subject could be thoroughly formed, and after that it was delayed, I believe, chiefly in consequence of the political events in the United States unconnected with this question. I think it desirable to correct the misconceptions which have arisen with respect to these transactions, though I do not think that, even if the view of them which is taken by Mr. Blaine is accurate, they would bear out the argument which he founds upon them.

I shall be glad if you will take the opportunity of informing Mr. Blaine of these corrections.

I am, etc.,

SALISBURY.

No. 29.

Sir Julian Pauncefote to Mr. Blaine.

WASHINGTON, *June* 30, 1890.

SIR: I have received a dispatch from the Marquis of Salisbury with reference to the passage in your note to me of the 4th instant, in which you remark that in 1888 his lordship abruptly closed the negotiations because "the Canadian government objected," and that he "assigned no other reason whatever."

In view of the observations contained in Lord Salisbury's dispatch

of the 20th of June, of which a copy is inclosed in my last preceding note of this date, his lordship deems it unnecessary to discuss at any greater length the circumstances which led to an interruption of the negotiations of 1888.

With regard, however, to the passage in your note of the 4th instant above referred to, his lordship wishes me to call your attention to the following statement made to him by Mr. Phelps, the United States minister in London, on the 3d of April, 1888, and which was recorded in a dispatch of the same date to Her Majesty's minister at Washington.

"Under the peculiar political circumstances of America at this moment," said Mr. Phelps, "with a general election impending, it would be of little use, and indeed hardly practicable, to conduct any negotiation to its issue before the election had taken place."

I have, etc.,

JULIAN PAUNCEFOTE.

No. 30.

Mr. Blaine to Sir Julian Pauncefote.

DEPARTMENT OF STATE,
Washington, July 2, 1890.

SIR: Your note of the 27th ultimo, covering Lord Salisbury's reply to the friendly suggestion of the President, was duly received. It was the design of the President, if Lord Salisbury had been favorably inclined to his proposition, to submit a form of settlement for the consideration of Her Majesty's Government which the President believed would end all dispute touching privileges in Behring Sea. But Lord Salisbury refused to accept the proposal unless the President should "*forthwith*" accept a formal arbitration, which His Lordship prescribes.

The President's request was made in the hope that it might lead to a friendly basis of agreement, and he can not think that Lord Salisbury's proposition is responsive to his suggestion. Besides, the answer comes so late that it would be impossible now to proceed this season with the negotiation the President had desired.

An agreement to arbitrate requires careful consideration. The United States is perhaps more fully committed to that form of international adjustment than any other power, but it can not consent that the form in which arbitration shall be undertaken shall be decided without full consultation and conference between the two Governments.

I beg further to say that you must have misapprehended what I said touching British claims for injuries and losses alleged to have been inflicted upon British vessels in Behring Sea by agents of the United States. My declaration was that arbitration would logically and necessarily include that point. It is not to be conceded, but decided with other issues of far greater weight.

I have the honor to be, sir, etc.,

JAMES G. BLAINE.

No. 31.

Mr. Blaine to Sir Julian Pauncefote.

BAR HARBOR, MAINE, *July* 19, 1890.

SIR: I regret that circumstances beyond my control have postponed my reply to your two notes of June 30th, which were received on the 1st instant, on the eve of my leaving Washington for this place. The note which came to hand on the forenoon of that day inclosed a dispatch from Lord Salisbury, in which his lordship, referring to my note of May 29th, expresses "a wish to point out some errors" which he thinks I "had gathered from the records in my office."

The purpose of Lord Salisbury is to show that I misapprehended the facts of the case when I represented him, in my note of May 29, as having given such "verbal assurances" to Mr. Phelps as warranted the latter in expecting a convention to be concluded between the two Governments for the protection of the seal fisheries in Behring Sea.

Speaking directly to this point his lordship says:

> Mr. Blaine is under a misconception in imagining that I ever gave any verbal assurance or any promise of any kind with respect to the terms of the proposed convention.

In answer to this statement I beg you will say to Lord Salisbury that I simply quoted, in my note of May 29, the facts communicated by our minister, Mr. Phelps, and our chargé d'affaires, Mr. White, who are responsible for the official statements made to this Government at different stages of the seal fisheries negotiation.

On the 25th day of February, 1888, as already stated in my note of May 29th, Mr. Phelps sent the following intelligence to Secretary Bayard, viz:

> Lord Salisbury assents to your proposition to establish by mutual arrangement between the Governments interested a close time for fur-seals between April 15th, and November 1st in each year, and between 160 degrees of longitude west, and 170 degrees of longitude east in the Behring Sea. And he will cause an act to be introduced in Parliament to give effect to this arrangement, so soon as it can be prepared. In his opinion there is no doubt that the act will be passed. He will also join the United States Government in any preventive measures it may be thought best to adopt by orders issued to the naval vessels of the respective Governments in that region.

Mr. Phelps has long been known in this country as an able lawyer, accurate in the use of words and discriminating in the statement of facts. The Government of the United States necessarily reposes implicit confidence in the literal correctness of the dispatch above quoted.

Sometime after the foregoing conference between Lord Salisbury and Mr. Phelps had taken place, his lordship invited the Russian ambassador, M. de Staal, and the American chargé, Mr. White (Mr. Phelps being absent from London), to a conference held at the foreign office on the 16th of April, touching the Behring Sea controversy. This conference was really called at the request of the Russian ambassador, who desired that Russian rights in the Behring Sea should be as fully recognized by England as American rights had been recognized in the verbal agreement of February 25 between Lord Salisbury and Mr. Phelps. The Russian ambassador received from Lord Salisbury the assurance (valuable also to the United States), that the protected area for seal life should be extended southward to the 47th degree of north latitude, and also the promise that he would have "a draught

convention prepared for submission to the Russian ambassador and the American chargé."

Lord Salisbury now contends that all the proceedings at the conference of April 16 are to be regarded as only "*provisional, in order to furnish a basis for negotiation, and without definitely pledging our Government.*" While the understanding of this Government differs from that maintained by Lord Salisbury, I am instructed by the President to say that the United States is willing to consider all the proceedings of April 16, 1888, as canceled, so far as American rights may be concerned. This Government will ask Great Britain to adhere only to the agreement made between Lord Salisbury and Mr. Phelps on the 25th of February, 1888. That was an agreement made directly between the two Governments and did not include the rights of Russia. Asking Lord Salisbury to adhere to the agreement of February 25, we leave the agreement of April 16 to be maintained, if maintained at all, by Russia, for whose cause and for whose advantage it was particularly designed.

While Lord Salisbury makes a general denial of having given "verbal assurances," he has not made a special denial touching the agreement between himself and Mr. Phelps, which Mr. Phelps has reported in special detail, and the correctness of which he has since specially affirmed on more than one occasion.

In your second note of June 30, received in the afternoon of July 1, you called my attention (at Lord Salisbury's request) to a statement which I made in my note of June 4 to this effect:

> It is evident, therefore, that in 1888 Lord Salisbury abruptly closed the negotiation because, in his own phrase, "the Canadian Government objected."

To show that there were other causes for closing the negotiation Lord Salisbury desires that attention be called to a remark made to him by Mr. Phelps on the 3d day of April, 1888, as follows: "Under the peculiar circumstances of America at this moment, with a general election impending, it would be of little use and indeed hardly practicable to conduct any negotiation to its issue before the general election has taken place."

I am quite ready to admit that such a statement made by Mr. Phelps might now be adduced as one of the reasons for breaking off the negotiation, if in fact the negotiation had been then broken off, but Lord Salisbury immediately proceeded with the negotiation. The remark ascribed to Mr. Phelps was made, as Lord Salisbury states, on the 3d of April, 1888. On the 5th of April Mr. Phelps left London on a visit to the United States. On the 6th of April Lord Salisbury addressed a private note to Mr. White to meet the Russian ambassador at the foreign office, as he had appointed a meeting for April 16 to discuss the questions at issue concerning the seal fisheries in Behring Sea.

On the 23d of April there was some correspondence in regard to an order in council and an act of Parliament. On the 27th of April Under Secretary Barrington, of the foreign office, in an official note, informed Mr. White that "the next step was to bring in an act of Parliament."

On the 28th of April Mr. White was informed that an act of Parliament would be necessary in addition to the order in council, but that "neither act nor order could be draughted *until Canada is heard from.*"

Mr. Phelps returned to London on the 22d of June, and immediately took up the subject, earnestly pressing Lord Salisbury to come to a conclusion. On the 28th of July he telegraphed his Government expressing the "fear that owing to Canadian opposition we shall get no convention."

On the 12th of September Mr. Phelps wrote to Secretary Bayard that Lord Salisbury had stated that "the Canadian Government objected to any such restrictions [as those asked for the protection of the seal fisheries], and that until Canada's consent could be obtained, Her Majesty's Government was not willing to enter into the convention."

I am justified, therefore, in assuming that Lord Salisbury can not recur to the remark of Mr. Phelps as one of the reasons for breaking off the negotiation, because the negotiation was in actual progress for more than four months after the remark was made, and Mr. Phelps himself took large part in it.

Upon this recital of facts I am unable to recall or in any way to qualify the statement which I made in my note of June 4th, to the effect that Lord Salisbury "abruptly closed the negotiation because the Canadian Government objected, and that he assigned no other reason whatever."

Lord Salisbury expresses the belief that even if the view I have taken of these transactions be accurate they would not bear out the argument which I found upon them. The argument to which Lord Salisbury refers is, I presume, the remonstrance which I made by direction of the President against the change of policy by Her Majesty's Government without notice and against the wish of the United States. The interposition of the wishes of a British province against the conclusion of a convention between two nations, which, according to Mr. Phelps, "*had been virtually agreed upon except as to details*," was in the President's belief a grave injustice to the Government of the United States.

I have, etc.,

JAMES G. BLAINE.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 451.

TRADE-DOLLAR BULLION.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

SUBMITTING

A report of the Director of the Mint in reply to the House resolution of the 23d instant, inquiring why the "trade-dollar bullion" so called has not been recoined into standard silver dollars or subsidiary coin, as required by section 2 of the act of March 3, 1887.

JULY 26, 1890.—Referred to the Committee on Coinage, Weights, and Measures.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., July 25, 1890.

SIR: I have the honor to acknowledge the receipt of House resolution, dated 23d instant, providing as follows:

Whereas the statement of the assets and liabilities of the Treasury of the United States, made by the Treasurer of the United States, under date of May 31, 1890, shows that there is carried $6,074,538 "trade-dollar bullion," as an asset of the Government; and

Whereas, under section 2 of the act of March 3, 1887, providing for the retirement and recoinage of trade-dollars, it is required that the trade-dollars received under said act "shall be transmitted to the coinage mints and recoined into standard silver dollars or subsidiary coin:" Therefore, be it

Resolved, That the Secretary of the Treasury be requested to inform the House why the trade-dollars so received and held in the Treasury as an asset, aforesaid, have not been coined as required by said act,

and to inclose herewith copy of report of this date from the Director of the Mint, to whom the resolution had been referred, which report contains the information desired.

Respectfully, yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
Washington, D. C., July 25, 1890.

SIR: Acknowledging the receipt of your reference of the 24th instant of a resolution of the House of Representatives requesting to be informed

why the trade-dollars redeemed and held in the Treasury as an asset have not been coined, I have the honor to report as follows :

The total number of trade-dollars redeemed under the act of March 3, 1887, was 7,689,036. Of this number 603,000 were redeemed by the assistant treasurer at San Francisco and transferred to the mint in that city and have all been converted into subsidiary silver coin. There were redeemed at the sub-treasuries east of the Rocky Mountains 7,086,036, of which 3,495,533 were redeemed at the sub-treasury at New York and transferred to the United States assay office in that city and melted into large bars, where they are still on storage. The balance, 3,590,503, redeemed at the other sub-treasuries were transferred to the mint at Philadelphia, and a part of them have been used in the coinage of dimes.

The act of March 3, 1887, authorizing the redemption of the trade-dollars, provided that they should be "recoined into standard silver dollars or subsidiary coin, at the discretion of the Secretary of the Treasury; provided, that the trade-dollars recoined under this act shall not be counted as part of the silver bullion required to be purchased and coined into standard silver dollars, as required by the act of February 28, 1878."

Owing to the fact that the coinage of the bullion purchased under the act of 1878 was mandatory, and has, together with the heavy and continuous demand for minor coins for the last four years, taxed to the utmost the capacity of the mint of the United States at Philadelphia, it has not been practicable to recoin the entire amount of trade-dollars redeemed at Eastern treasury offices.

In addition to the minor coins required to be manufactured by the mint at Philadelphia, in order to relieve the sub-treasuries and, at the same time, supply a demand for fractional silver coins, large amounts of worn and uncurrent silver coins have been transferred to that mint and have been converted into dimes.

It is the intention of the Department to coin the trade-dollar bullion on hand into silver coins of the United States as fast as the mandatory business of the mint at Philadelphia will permit and the demands of the Department require.

The resolution is herewith returned.

Respectfully, yours,

E. O. LEECH,
Director of the Mint.

Hon. WILLIAM WINDOM,
Secretary of the Treasury.

O

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 452.

ESTIMATES FOR THE UNITED STATES COURTS.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A copy of a communication of the Attorney-General, submitting estimates of appropriations to defray expenses of the United States courts for the fiscal year 1890 *and for prior years.*

JULY 31, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT, *July* 30, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of a communication from the Attorney-General of July 28, 1890, submitting estimates of appropriations required to defray the expenses of United States courts for the fiscal year 1890 and for prior years, amounting to $155,740.33.

Respectfully yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF JUSTICE,
Washington, D. C., July 28, 1890.

SIR: You are respectfully requested to state to the Speaker of the House of Representatives that appropriations are needed to defray the expenses of the courts for the fiscal year 1890 and prior years, as follows:

Special compensation of district attorneys for unofficial services for fiscal year—

1890	$5,000.00
1889	3,599.95
1888	2,900.00
1887	630.00
1886	430.00
1885	610.00
1884	2,600.00

The item for 1890 is made up of accounts that have been approved, or are in hand for approval, or will be presented for approval, as authority has already been given to incur them.

Pay of assistant attorneys, 1888	$440.00
Pay of regular assistant attorneys, 1890	3,000.00
Services special assistant attorneys:	
1890	8,000.00
1889	16,931.47
1888	7,013.03
1887	4,796.20
1886	1,700.00
Fees United States commissioners:	
1888	1,975.17
1889	23,975.96
1890	45,000.00

The appropriation for 1890 became practically exhausted May 24, 1890. There remain to be paid the unsettled accounts of the third quarter and all of the accounts of the fourth quarter of the fiscal year 1890.

Expenses under this appropriation have grown during the last year from increased business in the courts at Muscogee, Ind. T.; Paris, Tex.; Fort Smith, Ark., and the various places where new courts have been established in the States during the past few years.

Miscellaneous expenses for 1890 ..... $25,000.00

Although the appropriation for miscellaneous expenses in the words of the statute is, "For payment of such miscellaneous expenses as may be authorized by the Attorney-General," the exclusive jurisdiction of the Attorney-General over these expenses is, at times, practically overborne.

The marshals incur expenses upon the orders of the judges which the Attorney-General might hesitate to authorize if he were first consulted, and there are many expenses that must be met at once by the marshal that can not be postponed for authority to be first obtained from the Attorney-General, a fact especially true of distant districts.

Defending suits in claims against the United States, 1890 ..... $2,138.55

in lieu of the amount on page 51 of the pending deficiency bill, lines 22 and 23; this increase having come to the knowledge of the Department within a few days.

Very respectfully,

W. H. H. MILLER,
Attorney-General.

The SECRETARY OF THE TREASURY.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 453.

LAND PATENTS TO THE UNION PACIFIC RAILWAY COMPANY.

LETTER

FROM

THE SECRETARY OF THE INTERIOR,

TRANSMITTING,

In response to a resolution of July 21, 1890, *information relative to the issuing of patents for land within the limits of the grant to the Union Pacific Railway Company, etc.*

JULY 31, 1890.—Referred to the Committee on the Public Lands.

DEPARTMENT OF THE INTERIOR,
Washington, July 31, 1890.

SIR: Your honorable body adopted the 21st instant, and duly transmitted to this Department, a resolution as follows:

That the Secretary of the Interior be, and he is hereby, requested to inform the House of Representatives, as soon as practicable, by what authority and why he has authorized and directed the issue of patents to the Union Pacific Railroad Company for the lands granted to the said company prior to the payment of the debt due the United States from said company, and that he also report to the House the amount of land that has been patented or certified to each of the land-grant corporations of the Union Pacific Railway system up to this date.

On June 28, 1890, a reply from the Secretary of the Interior had been transmitted to the Senate to a resolution that was as follows:

That the Secretary of the Interior be directed to report the cause of withholding patents for lands within the grant to the Union Pacific Railway Company which are free from all claims and were not reserved at the date of the definite location of the company's road.

That reply was duly printed by that honorable body as "Senate Executive Document No. 169 of the Fifty-first Congress, first session," and it may be adopted here as an answer for the most part, because the resolution of your very honorable body demands why the Secretary directs the issue of patents, which that of the honorable Senate differs from mainly by demanding for what cause he withheld the same patents. (A copy of the reply, as printed, is herewith transmitted.) It is therein stated as the conclusion of the Secretary:

That the indebtedness of the railroad company to the United States does not authorize this Department to withhold patents to lands granted to the company and for which lists have been filed. It is a subject for legislative control, if it can be controlled at all.

It is there also stated that—

A large portion of the lands unpatented lie in the States of Kansas and Nebraska and have already passed into the hands of innocent purchasers from the railroad company. These lands are being cultivated by the citizens of those States for farms, and on them the homes of the people have been established. There never has been an act introduced whereby such lands, under any circumstances, would be seized for the United States from the possession of the present occupants; to deprive whom of these possessions under any decision that might be rendered as to the railroad, would be an act of the greatest injustice. Delay in giving these settlers full title to land they have fully paid for and improved can not be justified.

It is also a fact that a great number of applications and petitions received from those on these lands prove that while the railroad company that has sold the lands suffers comparatively little, many of these settlers are in great distress from the want of a complete chain of title of record to their lands. The company reports to December 31, 1889, that it has sold 13,188,396.69 acres of land for $31,325,294.90, and that there were outstanding on accouut of time sales $11,661,676.14.

It is to be observed that title to these lands does not pass by the patents executed and delivered, but only by force of the very statute itself. The patents are merely evidences (the highest and best, to be sure, as any other deeds) that the title has passed, but yet merely evidences. If the patents were never issued, the railroad company would own the land just the same if built within the time required.

These plain propositions are not technical, nor does it require any professional education to understand them—they are apparent upon the plain reading of the statute itself in the light of the opinions of the Supreme Court of the United States.

Thus in the case of Schulenberg *vs.* Harriman (21 Wallace Reports, p. 44) it is decided that where the grants are "*in præsenti*" they pass the title to the railroad of the odd sections designated to be afterwards located; when the route is fixed their location becomes certain and the title, which was previously imperfect, acquires precision and becomes attached to the land; that the lands granted do not revert to the United States, although the road is not constructed within the period prescribed, no action having been taken either by legislative or judicial proceedings to enforce a forfeiture of the grants.

In the present case the road was built on time, as hereinafter more particularly stated, and so the title vested beyond possibility of forfeiture. Let the statute be examined for a moment. The original act is dated July 1, 1862 (12 Stats., 489). By section 3 it was therein ordained—

that there be and *is hereby granted* to the said company, for the purpose of aiding in the construction of said railroad and telegraph line, and to secure the safe and speedy transportation of the mails, troops, munitions of war, and public stores thereon, every alternate section of land designated by odd numbers, to the amount of five alternate sections per mile on each side of said railroad on the line thereof, and within the limits of 10 miles on each side of said road, not sold, reserved, or otherwise disposed of by the United States and to which a pre-emption or homestead claim may not have attached at the time the line of said road is definitely fixed.

It was also provided in the same section:

All such lands so granted by this section which shall not be sold or disposed of by said company within three years after the entire road shall have been completed shall be subject to settlement and pre-emption, like other lands, at a price not exceeding $1.25 per acre, to be paid to said company.

By section 4 it was provided that whenever the company shall have completed 40 consecutive miles of any portion of said railroad and telegraph line, ready for the service contemplated by the act, and supplied all appurtenances of a first-class railroad, the President should ap-

point three commissioners to examine and report to him in regard thereto, and it appearing to the President that 40 consecutive miles had been completed and equipped in all respects as required by the act, "*patents shall* issue" conveying the right and title to said lands to said company on each side of said road as far as the same is completed, to the amount aforesaid; and patents shall in like manner issue as each 40 miles of said railroad and telegraph line are completed, upon certificate of the commissioners.

The grant was afterwards enlarged by the act of July 2, 1864 (13 Stats., 356), to 20 miles on each side of the road.

By the terms of section 17 (12 Stats., 497) it was provided that if the roads named in the act were not completed as required by July 1, 1876, the whole of the railroads before mentioned, together with their lands and property of every kind and character, should be forfeited to and be taken possession of by the United States.

The time of completion was extended a short period by a subsequent act.

As heretofore mentioned the entire line of this company was constructed within the time limited by law, and was accepted by the President after inspection by the commissioners appointed for the purpose. The title passed by the statute and the performance of this condition absolutely to the company. Unless, therefore, there is some other reason than that designated in the statute, and mentioned in the resolution of the House, the patents for the lands designated in the grant should not be withheld; but the Secretary should on careful inspection of the lists approve the same so far as they are correct, and the President should execute and cause to be delivered the patents provided for, unless the legislative branch of the Government, for reasons deemed just and sufficient by it, chooses by controlling action to interfere.

The contention that a pecuniary liability of the company to the United States authorizes the Executive to withhold these patents was not deemed by President Cleveland well founded. His language is in strict accordance with the opinion of the Supreme Court above cited. President Cleveland said:

> If donated lands are not yet granted these companies, and if their violation of contract and of duty are such as in justice and morals forfeits their rights to such lands, *Congressional action* should intervene to prevent further consummation. *Executive power must be exercised according to existing laws, and Executive discretion is probably not broad enough to reach such difficulties.*

See also United States *vs.* Union Pacific Railway Company, 91 U. S. S. C. R., p. 72.

The Congress to which these words were addressed not having acted the present Secretary of the Interior, in his annual report dated November 15, 1889, transmitted by the President with his message to the present Congress, states (page 29):

> * * * Where the railroad company is claiming the land by virtue of the grant it imposes a great burden upon the Commissioner of the Land Office and the Secretary of the Interior to have to determine whether the patents shall be issued or not. * * * If Congress intends to forfeit the lands, all the facts are before it. The failure to act may well be taken as an indication on the part of the Government that the forfeiture will not be insisted upon. * * * There should certainly be found somewhere the moral courage to give the evidence of title to the railroads as it is given to the individual, if it is intended that any possible forfeiture will not be insisted upon.
>
> The obligation, however, fairly rests on Congress, and it is hoped that the latter will assume it and act without further delay. Not only the railroad companies are interested in the decision of these matters, but also the Government in order that its business may be disposed of, the citizens, who have purchased from the company, relying upon the grant, and the settlers who, in anticipation of the restoration of their lands to the public domain, have settled upon them under the homestead or other laws.

With this report before it the honorable Senate, first on December 21, 1889, and afterwards on March 10, 1890, instead of intimating any disposition to forfeit any railroad lands, demanded of the Secretary the cause of withholding patents for the lands within the limits of the grant to the Union Pacific Railway Company as hereinbefore set forth, and the honorable House of Representatives had given no intimation on the subject of these lands whatever. The resolution of the Senate demanded immediate investigation, some conclusion of judgment by the Secretary and a reply. This duty was performed and the reply made hereinbefore in part set forth.

In harmony with the reasoning herein presented that reply also stated—

> That the actual titles to the lands passed to this railroad company, *by force of and under the statute itself*, just so soon as its conditions were complied with, as has repeatedly been decided by the Supreme Court, and the executive action of the Secretary in approving lists or issuing patents is the exercise of a plain duty under the law. He was not consulted as to its enactment and he should not be expected to nullify its operation. No reason is deemed to exist, therefore, why the Secretary should not proceed now to deliver to the Union Pacific Railroad Company the lands that have been earned, and it is his intention to certify these lists, commencing at the eastern portion of the unpatented lands in Kansas and Nebraska, where the lands are agricultural, have been sold, and are in the use of actual settlers.
>
> If there is any objection existing on the part of Congress this action may be prevented by any resolution or act that may be controlling in its effect. The patent that has been executed already by the previous Executive will be recorded, patents will be issued on the lists approved by the previous Secretary, and lists not yet approved will be examined in due order.
>
> This conclusion, I will add, is in accordance with the recommendation of the Commissioner of the General Land Office and also with the opinion of the Assistant Attorney-General assigned to this Department.

This reply, besides being printed by the Senate, found its way almost complete into the Associated Press dispatches. It acquired an extraordinary publicity.

This reply was immediately followed by an order to the Commissioner of the General Land Office, a copy whereof is herewith transmitted, whereby the Secretary informed him distinctly as to the reply to the Senate resolution, and inclosing to him a copy thereof, and the Secretary saying therein, among other things, "I have decided that the Union Pacific Railroad Company is entitled to the approval of its lists as the same may be examined by me and found correct."

The Commissioner was therein also instructed to act in accordance with the views therein expressed:

> You will have the patents, heretofore signed by the President, completely recorded and delivered. You will have patents upon list No. 28, approved April 21, 1887, duly executed, recorded, and issued.
>
> You will find herewith also list No. 21, Union Pacific Railway Company, Topeka district, Kans., approved by me this day, on which patents shall be executed, recorded, and issued; and all orders to the contrary are hereby rescinded. * * *

There was also a list for Nebraska sent that or the next day.

This letter and order were not only letter-pressed in the lands and railroads division of the Secretary's office for public inspection, and so became a public record, but it became the necessary and public order and authority for any action by the Commissioner in the General Land Office.

There has not been a hasty step taken nor an act or order concealed; but from the annual report of last year to the present the conclusion has been slowly reached and the record made and preserved step by step.

There was an opinion prepared by the Secretary, at the same time with

the order, discussing the rights of the Union Pacific Company under these and other conditions therein stated which was not promulgated to the public, it being deemed but prudent before so doing, its general conclusion having been effected by the letter and order to the Commissioner, to await any answer the Senate might make as to the position taken by the Secretary's reply. But since the presentation of the resolution of your honorable body, and chiefly because of the suspicion expressed on the floor that the order of the Secretary was a secret one, this opinion has been made public without further delay. A copy thereof is herewith transmitted.

In this opinion the question of whether the patents should be issued pending the general indebtedness of the company to the United States is referred to. This opinion affirmed the position of the Commissioner of the General Land Office expressed in his letter to the Secretary, dated December 30, 1889, wherein he says:

> The legislation suggested by the Pacific Railway Commission to authorize the withholding of patents to lands granted until the Government indebtedness, not yet due, is satisfied or futher secured, is, in my opinion, not feasible. (Union Pacific and Central Pacific Railroad Company *vs.* United States, 99 U. S., 719.) The innocent purchasers are the real sufferers, and judging from the numerous letters received narrating their distressing hardships and urging that their titles may be freed from seeming cloud, both justice and equity warrant an early issue of patents to all lands to which the company is justly entitled.

The argument for the Secretary's authority summed up is, that the United States granted the lands to the company by the act of July 1, 1862, and as of that date (*in præsenti*), which title attached to the particular alternate sections on the final location of the road filed and only to be forfeited upon failure to build the road within the period limited in the act; that the road was built on time and accepted accordingly by the President for the United States; if any other cause of forfeiture exists it must be declared by Congress and not attempted to be enforced by the Executive, and in event of any forfeiture it will not and can not in justice be applied to the innocent purchasers and settlers occupying the lands.

There has now herein been presented, it is thought, sound authority in the Secretary to act as he has done, and at least ordinarily good precedent in the opinions of his late predecessors, and it is submitted also that the reason "why" he acted at the time he did was because one part of the honorable Congress was demanding he should act at the time he did, as your own honorable portion of the same Congress now, after he has acted, is demanding "why" he did.

As has been said herein and in other papers by the present Secretary, if Congress deems it proper to relieve him from proceeding, he is as willing to have the responsibility transferred to others as he has been to assume that which belonged to his official position. It is his purpose only to perform his duty with justice to all alike.

The following tables exhibit the amount of land that has been patented or certified to each of the land-grant corporations of the Union Pacific Railway system up to the date of the resolution, July 21, 1890:

Union Pacific main line:

	Acres.
Before March 4, 1887 (the inauguration of President Harrison)	2,616,258.08
On patent signed by President Cleveland, but not completely recorded until June 28, 1890	381,899.14
On lists approved by Assistant Secretary Muldrow	87,985.79
On lists approved by the present Secretary	none

The pending selections of this company are:

	Acres.
In Nebraska	139,425.39
In Utah	107,778.09
In Wyoming	1,915.11
Total	249,118.59

Kansas Pacific and Denver Pacific.

	Acres.
Patents issued before March 4, 1889 (inauguration of President Harrison)	1,128,435.54
Clear lists pending at date last named, as far as then examined	780,173.55
Of which patents have been ordered June 28, 1890, for	16,788.03
Selections pending in Kansas and Colorado for	1,636,277.82

There were some land and patents within the "quadrant" south and west of Denver which have been excluded from the grant, and a suit is now pending to recover said lands.

The Union Pacific grant.

The estimated quantity of land embraced in the limits of the grant of the Union Pacific is as follows:

Union Pacific:	Acres.
Maine line	12,000,000
Kansas Pacific	6,000,000
Denver Pacific	1,000,000
Total	19,000,000

The Union Pacific has no indemnity belt; hence its losses will reduce the estimate, as they can not be restored from the indemnity as in grants to many other companies.

The great obstacle to the adjustment of these grants is the lack of surveys from non-appropriation of funds by Congress.

Most respectfully,

JOHN W. NOBLE,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

[Senate Ex. Doc. No. 169, Fifty-first Congress, first session.]

Letter from the Secretary of the Interior, in further response to resolution of December 21, 1889, relative to the withholding of patents for lands within the limits of the grant to the Union Pacific Railroad.

DEPARTMENT OF THE INTERIOR,
Washington, June 28, 1890.

SIR: There was received at this Department a resolution of the honorable Senate, dated December 21, as follows:

> That the Secretary of the Interior be directed to report the cause of withholding patents for lands within the limits of the grant to the Union Pacific Railway Company, which are free from all claims and were not reserved at the date of the definite location of the company's road.

This was duly acknowledged, and as the subject was under consideration it was expected to make a further reply as soon as conclusions were arrived at. The resolution was repeated March 10, 1890, and

transmitted to the Department, and thereto also reply was made to the same effect as that to the first.

Further and full reply to these several resolutions is now submitted; and I have to state that the delay in making this final response has been caused by the consideration due to the very important questions connected with the right of the Union Pacific Railway to the lands claimed by it under its grant. The perception of these difficulties is not of recent origin. During the last administration lists involving thousands of acres of these lands were applied for by the railroad company, were duly considered and signed by the proper clerks in the Land Office, approved by the Commissioner, and ordered to patent by the Secretary. Indeed, a patent for part of these lands was duly executed April 25, 1887, by President Cleveland, for 381,899.14 acres, but was suspended before it was recorded. In cases where the patents were not executed, the lists were suspended and have so remained to the time of the present decision.

It thus appears that not only was it deemed by the previous administration that the Union Pacific Railroad Company had earned its title to its lands in Kansas and Nebraska, but the right thereto had been acknowledged by the Commissioner of the General Land Office and the Secretary. This action was acquiesced in also by the then President, Mr. Cleveland. But at this juncture a letter was received at the Department from the Pacific Railway Commission, organized under the act of March 3, 1887, making inquiries as to the issue of these patents, pending the then announced indebtedness of the railroads to the United States, and the President, Mr. Cleveland, in transmitting the report of the Commission, and referring to the suspension of patents for the company's land grants, said, "the executive power must be exercised according to existing laws, and executive discretion is probably not broad enough to reach such difficulties." Yet the Fiftieth Congress, to which this language was addressed, adjourned without enacting any further legislation on the matter.

The subject has now received, as it is thought, sufficient consideration, and the conclusion has been reached that the indebtedness of the railroad company to the United States does not authorize this Department to withhold lands granted to the company and for which lists have been filed. It is a subject for legislative control, if it can be controlled at all. A large portion of the lands now unpatented lie in the States of Kansas and Nebraska, and have already passed into the hands of innocent purchasers from the railroad company. These lands are being cultivated by the citizens of those States for farms, and on them the homes of the people have been established. There has never been an act introduced whereby such lands, under any circumstances, would be seized for the United States from the possession of the present occupants; to deprive whom of these possessions, under any decision that might be rendered as to the railroad, would be an act of the greatest injustice. Delay in giving these settlers full title to lands they have fully paid for and improved can not be justified.

This railroad was built on time and has complied, so far as is known, with all of the conditions of the land grant. No mineral claims exist thereon, and therefore there is no need to exercise that greater strictness that must be applied in mineral districts. That the actual titles to the lands passed to this railroad company by force of and under the statute itself, just so soon as its conditions were complied with, has repeatedly been decided by the Supreme Court, and the executive action of the Secretary in approving lists or issuing patents in the exercise of

a plain duty under the law. He was not consulted as to its enactment, and he should not be expected to nullify its operations. No reason is deemed to exist, therefore, why the Secretary should not proceed now to deliver to the Union Pacific Railroad Company the lands which have been earned, and it is his intention to certify these lists, commencing at the eastern portion of the unpatented lands in Kansas and Nebraska, where the lands are agricultural, have been sold, and are in the use of actual settlers.

If there is any objection existing on the part of Congress this action may be prevented by any resolution or act that may be controlling in its effect. The patent that has been executed already by the previous Executive will be recorded. Patents will be issued on the lists approved by the previous Secretary, and lists not yet approved will be examined in due order.

This conclusion, I will add, is in accordance with the recommendation of the Commissioner of the General Land Office and also with the opinion of the Assistant Attorney-General assigned to this Department.

Most respectfully,

JOHN W. NOBLE,
Secretary.

The PRESIDENT OF THE SENATE.

DEPARTMENT OF THE INTERIOR,
Washington, June 28, 1890.

SIR: I have this day sent to the Senate in response to its resolution requiring the same, a statement of the position of the Department in regard to the land grant of the Union Pacific Railroad. A copy of this is herewith inclosed, from which you will perceive that I have decided that the Union Pacific Railroad Company is entitled to the approval of its lists as the same may be examined by me and found correct; that the previous patents signed by the President (Mr. Cleveland) shall be recorded, and that the previous lists approved by the Secretary of the Interior preceding me shall go to patent. I have, therefore, to instruct you to act in accordance with the views therein expressed. You will have the patents heretofore signed by the President completely recorded and delivered.

You will have patents upon List No. 28 approved April 21, 1887, duly executed, recorded and issued.

You will find herewith also List No. 21 Union Pacific Railway Company, Topeka District, Kansas, approved by me this day, on which patents shall be executed, recorded and issued; and all orders to the contrary are hereby rescinded.

My opinion upon the general rights of the Union Pacific Railroad Company to its grant has been signed and sent to the Lands and Railroad Division for promulgation.

Very respectfully,

JOHN W. NOBLE, *Secretary.*

The COMMISSIONER OF THE GENERAL LAND OFFICE.

UNION PACIFIC RAILWAY COMPANY, KANSAS DIVISION—SUSPENSION OF PATENTS.

DEPARTMENT OF THE INTERIOR,
Washington, June 28, 1890.

SIR: By letter of December 17, 1887, your office submitted a statement relative to the suspension of patents for lands in the State of Kansas, granted by acts of July 1, 1862, and July 2, 1864, to the Leavenworth, Pawnee and Western, afterwards the Kansas Pacific Railroad Company, now known as the Union Pacific Railway Company, Kansas Division.

Said report states that—

On October 1, 1883, the governor of the State of Kansas addressed a letter to the Department in which, after referring to petition and argument respecting said grant filed in the Department of Hon. S. J. Crawford, attorney for the State, and to the fact that lists embracing several hundred thousand acres had been, or were about to be filed in this office for certification, regardless of the failure of said company to comply with the law as shown by Mr. Crawford he requested that no more lands be certified to the railway company until the grant had been adjusted according to law, in order that the rights of the State as well as the settlers might be protected. November 3, 1883, Hon. S. J. Crawford filed in this office a printed copy of his petition and argument referred to by the governor and asked that the issue of patents to said company be suspended until the questions submitted were determined.

It appears from said report that thereupon an order directing that the issue of such patents be suspended was made by your office.

Said report further states that—

The Union Pacific Railway has, since 1883, filed lists of selections and applications for patents for upwards of 800,000 acres and has paid the fees for selecting and surveying the same.

On the 22d October, 1886, Messrs. Shellabarger & Wilson, of this city, attorneys for said company, requested that patents for such of the selected lands as were clearly subject to the company's selection be issued at the earliest practicable day.

Your office after a review of the questions presented concluded in said report that the points raised by Mr. Crawford "do not reach to the right of the company to the lands now in controversy," and proposed, with the approval of the Department, to prepare and submit for approval lists of the selected lands as a basis for patent.

I have considered the questions presented, as will appear by the following:

By section 1 of the act of Congress approved July 1, 1862 (12 Stat., 489), the Union Pacific Railroad Company was authorized to construct a railroad from a point on the one hundredth meridian of longitude west from Greenwich, between the south margin of the valley of the Republican River and the north margin of the valley of the Platte River, in the Territory of Nebraska, to the western boundary of Nevada Territory.

By section 7 it was provided:

"That within two years after the passage of this act said company shall designate the general route of said road, as near as may be, and shall file a map of the same in the Department of the Interior, whereupon the Secretary of the Interior shall cause the lands within 15 miles of said designated route or routes to be withdrawn from pre-emption, private entry and sale; and when any portion of said route shall be finally located, the Secretary of the Interior shall cause the said lands hereinbefore granted to be surveyed and set off as fast as may be necessary for the purposes herein named."

By section 9 thereof the Leavenworth, Pawnee and Western Railroad Company of Kansas was authorized—

To construct a railroad and telegraph line from the Missouri River at the mouth of the Kansas River, on the south side thereof, so as to connect with the Pacific Railroad

of Missouri, to the aforesaid point, on the one hundredth meridian of longitude west from Greenwich, as herein provided, upon the same terms and conditions in all respects as are provided in this act for the construction of the railroad and telegraph line first mentioned.

Said section further provided that the route in Kansas west of the meridian of Fort Riley was to be subject to the approval of the President, to be determined by him on actual survey, and the company was required to file its acceptance of the conditions of said act in the Department of the Interior within six months after the passage of the act.

It is urged by Mr. Crawford that said company failed to file its acceptance of said grant under seal, and is therefore disqualified from receiving the lands granted.

It should be noted that the provision in section 7 of said act, "That said company shall file their assent to this act under the seal of said company in the Department of the Interior," applies in terms only to the Union Pacific Company. The road in question is not mentioned until section 9 thereof is reached, and that section provides that it shall file its "acceptance of the conditions of this act in the Department of the Interior, within six months after the passage of this act." The requirement of the seal is omitted.

But if this is not a conclusive answer to the objection, the records of the Department show that on November 24, 1862, a resolution of the board of directors of the Leavenworth, Pawnee and Western Railroad Company was received, transmitted by J. H. McDowell, president of the company, and certified by the secretary thereof, as taken by him from the books of the company, accepting the provisions of said act. This resolution was accepted by the Department as a proper one, and its receipt acknowledged. Subsequently, in response to a resolution of the Senate, the Department transmitted a copy of said resolution to that body on March 4, 1864, pending the passage of the amendatory act of that year increasing the grant to said company. The validity of the acceptance has never been questioned. The Department has acted on it, the road has been built, and Congress, with a full knowledge of the character of the acceptance, has conferred additional grants on the company.

The Government, in two of its branches, and the company have treated the acceptance as valid and titles have vested on the faith of that transaction. As between them there can be no question of the validity of the acceptance. Perhaps it will not be questioned that a corporation may bind itself by acts not under seal. It is well settled in the United States that the acts of a corporation evidenced by vote are as completely binding upon it, and are as complete authority to its agents, as the most solemn acts done under its corporate seal. Angell and Ames on Corporations, section 237. Bank of United States *vs.* Dandridge, 12 Wheat., 64; 2 Kent Com., 288; Garrison *vs.* Coombs, 22 Am., Dec. 120 (7 J. J. Marshall, 84 Kentucky).

The conditions of the amendatory act of 1864 were accepted by the company, under seal.

The main objection urged against the issue of patents has reference to a change of the route of the road. The following recital of facts becomes necessary:

By letter dated July 2, 1862, Mr. Thomas Ewing, as attorney for the Leavenworth, Pawnee and Western Railroad Company, filed in your office a map of the State of Kansas and the Territory of Nebraska, on which was indicated in pencil the "probable" route of the road from a point on the Kansas River, opposite the town of Lawrence, thence

up said river to the mouth of the Republican River, thence up that river to the one hundredth meridian of longitude. On July 17, 1862, the local officers for the proper land districts in Kansas and Nebraska were directed to withdraw the lands within 15 miles of said probable route from settlement and entry. This withdrawal was subsequently modified so as to open the lands in the even numbered sections to entry under the pre-emption and homestead laws at the double minimum price.

By said act of Congress approved July 2, 1864 (13 Stat., 356), the act of July 1, 1862, was amended so as to increase the grant to ten sections per mile, to be taken within a limit of 20 miles on each side of the road, and to provide for the withdrawal of the odd sections within 25 miles of the road on filing map of general route.

By section 5 of said act the time for designating the general route of said railroad, and of filing the map of the same, and the time for the completion of that part of the railroad required by the terms of the act of 1862 of each company, was extended one year from the time designated in the act of 1862.

On July 1, 1865, a map showing the general route of the road in question from the Missouri River to the one hundredth meridian of west longitude, was filed. The line shown upon said map was almost identical with the line of "probable route" designated by the map filed by Mr. Ewing in 1862. The map was referred to your office for appropriate action and with your office letter of July 3, 1865, returned to the Department, with the recommendation that as the odd sections within fifteen miles of the line shown thereon were already withdrawn, no further withdrawal should be ordered until the road had been surveyed and located and a map thereof filed in the Department. No further withdrawal was made at that time.

By act of Congress approved July 3, 1866 (14 Stat., 79), amendatory of said act of 1864, the Union Pacific Railway Company, Eastern Division was authorized to designate the general route of its road, and file a map of the same, at any time before December 1, 1866, and upon the filing of said map of general route, the Secretary of the Interior was directed to withdraw from sale the lands along the entire line, so far as the same might be designated. It was provided, however, that said company should connect its road with the Union Pacific Railroad, but not at a point more than 50 miles westwardly from the meridian of Denver.

On July 11, 1866, the company filed a map designating the general route of its road from Fort Riley, up the Smoky Hill River, to the western boundary of Kansas, whereupon the odd sections within 25 miles of such route were withdrawn from entry by order of the Secretary of the Interior, and in November following such of the lands withdrawn along the route up the Republican as were not within 25 miles of the new route were restored to settlement and entry.

The road west of Fort Riley was definitely located in sections, the maps of which were filed as follows:

From Fort Riley to Fort Harker, May 8, 1867.

From Fort Harker to Fort Hays, September 21, 1867.

From Fort Hays to the three hundred and thirty-fifth mile-post, December 6, 1867.

From the three hundred and thirty-fifth to the four hundred and fifth mile-post, May 6, 1870.

From the four hundred and fifth mile-post to Denver, Colo., May 26, 1870.

The line of definite location as shown upon these maps is not identical

with the line of general route, the distance between the two lines amounting in some places to as much as 25 miles.

Following the filing of these maps the withdrawal previously ordered on the line of general route was adjusted to the line of definite location, *i. e.*, such of the lands within the 25-mile limits of the withdrawal on general route as were not within 20 miles of the line of definite location were restored to entry, and at the same time such of the lands within 20 miles of the line of definite location as were not within the limits of the withdrawal on general route were withdrawn for the benefit of the grant.

It is urged that the action of the company in departing from its line of general route, and locating and constructing its road upon another and different route, was an abandonment of its grant to the extent of such departure, or at least an abandonment of such lands as are outside the withdrawal on general route, though within the withdrawal on definite location.

This question is very thoroughly considered by your office in said report, as follows:

> If the designation of the line of 1866 was such a designation of the line of the road that the right of the company thereby attached to the odd-numbered sections along such line, it follows that such line could not afterwards be changed so as to affect the grant without the consent of Congress. (Van Wyck *vs.* Knevals, 106 U. S., 360.)
>
> The question, then, is whether the right of the company attached to lands along the line of 1866, upon the filing of the map designating the same.
>
> The grant to the Kansas Pacific Railway Company is of the alternate odd-numbered sections within 20 miles on each side of its road, "not sold, reserved, or otherwise disposed of by the United States, and to which a homestead or pre-emption claim may not have attached at the time the line of said road is definitely fixed."
>
> The seventh section of the act of July 1, 1862, as amended by act of July 2, 1864, provides:
>
> "That within two years after the passage of this act, said company shall designate the general route of same in the Department of the Interior, whereupon the Secretary of the Interior shall cause the lands within 25 miles of said designated route or routes to be withdrawn from pre-emption, private entry, and sale."
>
> Here, apparently, are two separate and distinct lines; first, a preliminary or general line, to be followed by a withdrawal of the odd sections within 25 miles thereof, and, second, a final or definite line the designation of which identifies and attaches the company's right to the granted lands.
>
> Until the line of the road was definitely fixed the grant was in the nature of a float, requiring a definite location to attach or anchor it to the particular sections granted.
>
> In the case of Kansas Pacific Railway *vs.* Dunmeyer (113 U. S., 629), the Supreme Court, discussing the grant to said company, distinguished between the general route and the definite location, and defined the purpose and effect of each, and its decision in that case is conclusive of the question involved herein. Speaking of the line of definite location, the court said:
>
> "Wherever the road might go the grant was limited originally to five sections, and, by the amendment of 1864, to ten sections on each side of it within the limit of 20 miles.
>
> "When the line was fixed, which we have already said was by the act of filing this map of definite location in the General Land Office, then the criterion was established by which the lands to which the road had right were to be determined. Topographically this determined which were the ten alternate sections on each side of that line where the surveys had then been made."
>
> And in the case of Butts *v.* Northern Pacific Railroad Company (119 U. S., 55) the court said:
>
> "The act of Congress not only contemplates the filing by the company in the office of the Commissioner of the General Land Office of a map showing the definite location of the line of its road and limits the grant to such alternate sections as have not at that time been reserved, sold, granted, or otherwise appropriated, and are free from pre-emption, grant, or other claims or rights, but it also contemplates a preliminary designation of the general route of the road and the exclusion from sale, entry, or pre-emption of the adjoining odd sections, within 40 miles on each side, until the definite location is made."

These and similar decisions hold that the designation of the general route in no way controlled the grant, and that its purpose was to preserve the lands from other appropriation until the road could be definitely located. (Kansas Pacific Railway Company *v.* Dunmeyer; Butts *v.* Northern Pacific Railroad Company, *supra;* Northern Pacific Railroad Company, 10 Copp, 74.)

In the Dunmeyer case the Supreme Court, discussing the effect of the filing of the map of general route of the Kansas Pacific Railway, said:

"This action does not, like the filing of the line of definite location, vest in the company a right to any specific piece of land. It establishes no claim to any particular section with an odd number. It authorizes the Secretary to withdraw certain lands from sale, pre-emption, etc.

"The grant being of the odd numbered sections within 20 miles of the line of definite location, and no right to any specific lands being vested in the company by the designation of the general route, it follows that in fixing its definite location the company was not necessarily required to conform to the line of general route."

Said report further truly states that—

This Department has uniformly permitted a change of line after filing of a map of general route, and after such change has adjusted the withdrawal on general route to the line of definite location.

I concur in the conclusion reached by your office on this point.

Again it is urged that the designation of the route west of Fort Riley and the withdrawal thereon were illegal because that portion of the route was not approved by the President and that consequently the grant west of Fort Riley has failed.

It is said that, in ordering the unauthorized, unlawful, and forbidden withdrawal of July 11, 1866, Secretary Harlan, following in the footsteps of Commissioner Edmunds, seems to have disregarded all statutory requirements, legal principles, and advisory opinions. In support of this objection the opinion of Assistant Attorney-General Smith, of October 3, 1871, approved by Secretary Delano (1 C. L. L., 365), is cited.

That opinion held that the Kansas Pacific did not acquire a right to lands west of the meridian of Fort Riley under the act of 1862, because its route was not approved by the President, but that it did acquire such right by the third section of the act of March 3, 1869 (15 Stat., 324).

To this it must be answered that said opinion is in conflict with that of the United States Supreme Court, delivered in 1878, in the case of the Missouri, Kansas and Texas Railway Company *v.* Kansas Pacific Railway Company (97 U. S., 491). The court there held (syllabus) that by the act of July 3, 1866 (14 Stat., 79), the Kansas Pacific Railway Company was authorized to designate the general route of its road, and to file a map thereof at any time before December 1, 1866; Provided, that after the filing of the map the lands along its entire line, so far as designated, should be reserved from sale by the Secretary of the Interior. Within the specified time, the company filed a map designating as such general route a line from Fort Riley to the western boundary of Kansas, by way of the Smoky Hill river.

The lands upon this route, embracing among others those now in controversy, were accordingly withdrawn from sale; and in January, 1867, the road was completed for 25 miles, approved by the commissioners appointed to examine it, and accepted by the President. *Held:* 1. "That the title of the company attaching to those lands by the location of the road, followed by the construction thereof, took effect, by relation, as of the date of the said act of 1862, so as to cut off all intervening claimants, except in the cases where reservations were specially made in it, and the amendatory act of 1864." The lands there in question lay west of Fort Riley.

The provision of the statute on this point is:

> The route in Kansas, west of the meridian of Fort Riley, to the aforesaid point, on the one hundredth meridian of longitude, to be subject to the approval of the President of the United States, and to be determined by him on actual survey.

The route of 1866 was not approved by the President in person. The company, however, constructed its road upon the line of definite location and the same was accepted and approved by the President. This would appear to meet the requirement of the granting act independently of the decision of the supreme court. The map of the route was filed and accepted by the Secretary of the Interior, and on the faith of this the road was built. The President never disapproved of the route.

As a matter of fact, however, it is evident that the Department, after the passage of the act of 1866, treated this provision as not extending to the new route authorized by said act, but as still applicable to the abandoned route up the Republican where an actual survey and approval by the President was required for the purpose of ascertaining the amount of bonds of the United States to which the company would have been entitled had it constructed its road upon that route, it being restricted to that amount by the terms of the act of 1866.

A survey of the route from Fort Riley to a connection with the Union Pacific Railroad at the one hundredth meridian was accordingly made during the summer of 1868, under the direction of the Department of the Interior, by Brevet-Maj. C. W. Howell, captain of Engineers, U. S. Army, for the purpose of ascertaining "the most direct and practicable route for a railroad upon the route prescribed by the provisions of the act of 1862," which survey, to gether with the recommendation of Secretary Browning that the amount of bonds to be issued to said company in aid of the construction of its road along the new route be restricted to the length of the old route as ascertained by said survey, was approved by the President October 30, 1868.

Said report further says:

> I deem it proper, however, to add that the Pacific Railway Commission has called for much information from this office in respect to the status of grants of land to the Pacific Railroad corporations, and I have understood that some recommendation may possibly be made to Congress by said Commission touching the control or disposition of unpatented lands. I am not advised of the nature of the report that has been made by the Commission, but I think it proper to submit for your consideration the question of the expediency of deferring the perfection of railroad titles by issue of further patents to the companies which are in default in their indebtedness to the United States, pending the report of the Commission, or of action by Congress in the matter of adjustment of such indebtedness.

The facts with reference to this matter are as follows: Pursuant to the provisions of the act of Congress of March 3, 1887 (24 Stat., 488), the United States Pacific Railway Commission on April 17, 1887, was appointed by the President. The act was entitled "An act authorizing an investigation of the books, accounts, and methods of railroads which have received aid from the United States, and for other purposes." The report of the Commission was submitted to Congress with a message from the President dated January 17, 1888.

The message was devoted largely to the question of the indebtedness of said companies to the Government. It says:

> The majority of the Commission are in favor of an extension of the time for the payment of the Government indebtedness of these companies, upon certain conditions. But the chairman of the Commission, presenting the minority report, recommends, both upon principle and policy, the institution of proceedings for the forfeiture of the charters of the corporations and the winding up of their affairs.

In reference to the land grants the President said:

I desire to call attention also to the fact that if all that was to be done on the part of the Government to fully vest in these companies the grants and advantages contemplated by the acts passed in their interest has not yet been perfected, and if the failure of such companies to perform in good faith their part of the contract justifies such a course, the power rests with the Congress to withhold further performance on the part of the Government. If donated lands are not yet granted to these companies, and if their violation of contract and of duty are such as in justice and morals forfeit their rights to such lands, Congressional action should intervene to prevent further consummation. Executive power must be exercised according to existing laws, and Executive discretion is probably not broad enough to reach such difficulties.

With all the facts and the recommendations of the President before it, the Fiftieth Congress expired without enacting any further legislation on this subject.

I have thus carefully examined all the objections urged and suggested against the issuance of the patents here in question, and have found no reason to justify the further suspension of the same. The road has been completed, the selections have been made, and the fees paid, and the objections urged are not founded in law. There are no adverse claims. I, therefore, concur in the proposal of your office that proper lists of the selected lands be prepared and submitted for approval, as a basis for patent.

The existing law on this subject is found in the fourth section of said act of 1862, as follows:

And be it further enacted, That whenever said company shall have completed forty consecutive miles of any portion of said railroad and telegraph line, ready for the service contemplated by this act, and supplied with all necessary drains, culverts, viaducts, crossings, sidings, bridges, turn-outs, watering-places, depots, equipments, furniture, and all other appurtenances of a first-class railroad, the rails and all other iron used in the construction and equipment of said road to be American manufacture of the best quality, the President of the United States shall appoint three commissioners to examine the same and report to him in relation thereto; and if it shall appear to him that forty consecutive miles of said railroad and telegraph line have been completed and equipped in all respects as required by this act, then, upon certificate of said commissioners to that effect, patents shall issue conveying the right and title to said lands to said company, on each side of the road as far as the same is completed, to the amount aforesaid; and patents shall in like manner issue as each forty miles of said railroad and telegraph line are completed, upon certificate of said commissioners.

Very respectfully,

JOHN W. NOBLE,
Secretary.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

DEPARTMENT OF THE INTERIOR,
Washington, July 25, 1890.

SIR: I have the honor to acknowledge receipt of the Senate resolution of the 3d instant, which is as follows:

Resolved, That the Secretary of the Interior be directed to inform the Senate whether he has knowledge of the guarantee actual or proposed by the Union Pacific Railroad Company of the bonds or stock of any other corporation, more especially those of the Oregon Railway and Navigation Company, and of the Denver and South Park Railroad Company. Whether said Union Pacific Railroad has paid out of its surplus earnings or otherwise the indebtedness or any part thereof of said or other companies, if so, whether such guarantee or such payment or both are in accordance with law, and consistent with the obligations of said Union Pacific Railroad Company to the United States; and that the Secretary of the Interior be directed to communicate to the Senate all information in possession of his Department on the subject.

In response, I beg to state that it appears from a letter of the Commissioner of Railroads that the Union Pacific Railway Company has guaranteed at different times the bonds and interest of quite a number of other corporations, whose names, and the amount for which the guarantees have been made, will be found in the papers herewith transmitted. It appears that the payment of dividends on stock of only one company, that of the Oregon Railway and Navigation Company, has been guaranteed, and this has been done indirectly, by guaranteeing the performance of a covenant made by the Oregon Short Line Company to that effect.

Some of the roads, so far as built, whose bonds and interest have been thus guaranteed, have been operated in connection with the Union Pacific Company and as feeders thereto, and the deficiency of their operating expenses has been paid by it. Those in process of construction, whose bonds this company has agreed to guarantee, will be operated in the same way and will doubtless have their expenses and debts paid in like manner. The Denver and South Park Railroad Company had its operating expenses and fixed charges paid by the Union Pacific prior to its re-organization, as stated by the Commissioner, and will, I take it, be paid in like manner under the new arrangement, if necessary.

The guarantees spoken of have been made in pursuance of the fixed policy which the Union Pacific has followed for years, as a means of increasing the business and earnings of the main line. The policy adopted and pursued by the company in this respect has been the subject of frequent investigations on the part of the Government, and in each instance has been approved by its officers. The Government directors in the company commended the policy as wise and calculated to benefit the Government, in their reports of 1876, 1877, 1878, 1879, 1880, 1883, 1884, and 1885, as will be seen by reference to the report of the Commissioner of Railroads, May 20, 1890. The special commission, appointed under the act of March 3, 1887 (24 Stat., 488), examined the whole subject extensively, and the majority report commends the policy adopted.

The special committee appointed by your honorable body, on the President's message transmitting said report, examined into the course of the Union Pacific Company in this respect, commend its action, and say, on page 9 of its report, submitted February 10, 1890, "all but one or two (of the branches) are of value now as feeders to the main line, with reasonable prospects of large increases of business." In summing up, said committee said on page 10:

> It was demonstrated that the net earnings of the present company, derived from business turned over by or interchanged with its branch lines, amounted to $3,277,070.92, and for the last year to more than $4,000,000. In other words, the net earnings of the Union Pacific are now increased by upwards of $4,000,000 from revenues derived from traffic that was carried over its main lines, through, and because of its control over these branch or feeding lines. Without regard to other advantages that the Union Pacific Railroad may have enjoyed, or still enjoys, through its investments in this direction, it is evident that without the branch-line system it could not hold its own.

Inasmuch as, according to the report of the Commissioner of Railroads, herewith sent, said company has complied with, and continues to comply with, all the requirements of Congress as to the payments to be made to the United States, and has made the investment referred to out of its own proper share of earnings, I do not see how its action in the premises can be fairly regarded as endangering or injuring the interests of the United States as creditor of said company, or be considered otherwise than as legitimate and proper in the prosecution of its

business. It has given no lien or mortgage on, or made any pledge of, its assets on which the United States have a lien, but seems to have simply used its credit and its share of income, as it had a right to do in promotion of its proper purposes.

The legal aspects of the inquiry made by your body were referred to the Assistant Attorney-General for this Department. His opinion, which I herewith also send you, is to the effect that on the facts as shown by the Railroad Commissioner there has been no violation of the United States Statutes governing this corporation by the company in these matters, or of its obligations to the Government. In these views I concur.

Believing I have fully answered the inquiries of the Senate, I submit the foregoing and the accompanying papers.

Very respectfully,

JOHN W. NOBLE,
Secretary

The PRESIDENT OF THE SENATE.

IMPROVEMENTS IN GALVESTON HARBOR, TEXAS.

LETTER

FROM

THE ASSISTANT SECRETARY OF WAR,

TRANSMITTING

Copies of the reports of the engineers in charge of the improvements in Galveston Harbor, Texas, in response to a House Resolution, dated August 1, 1890.

August 5, 1890.—Referred to the Committee on Rivers and Harbors.

WAR DEPARTMENT,
OFFICE OF THE ASSISTANT SECRETARY,
Washington, August 5, 1890.

SIR: I have the honor to transmit to the House of Representatives a letter from the Chief of Engineers, dated the 4th instant, and its accompanying copy of the annual report of Major Charles J. Allen, Corps of Engineers, in charge of the improvements in the harbor at Galveston, Tex., together with copies of the reports which accompany the same, in response to resolution of August 1, 1890, as follows:

Resolved, That the Secretary of War be requested to furnish this House with a copy of the reports made this year by the engineers in charge of the improvements in the harbor at Galveston, Texas, especially the reports of Major Allen and H. C. Ripley, assistant engineer.

Very respectfully,

L. A. GRANT,
Assistant Secretary of War.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

OFFICE OF THE CHIEF OF ENGINEERS,
UNITED STATES ARMY.
Washington, D. C., August 4, 1890.

SIR: I have the honor to acknowledge receipt of resolution of the 1st instant, of the House of Representatives, requesting the Secretary of War to furnish the House with a copy of the reports made this year by the engineers in charge of the improvements in the harbor at Galveston, Tex., especially the reports of Major Allen and H. C. Ripley, assistant engineer, and in answer to its reference to this office I

beg to submit the accompanying copy of the annual report of Major Charles J. Allen, Corps of Engineers, the officer in charge of the work, for the fiscal year ending June 30, 1890, together with copies of the reports which accompany the same.

The resolution of the House of Representatives is herewith returned.

Very respectfully, your obedient servant,

THOS. LINCOLN CASEY,
Brig. Gen., Chief of Engineers.

Hon. REDFIED PROCTOR,
Secretary of War.

IMPROVEMENT OF ENTRANCE TO GALVESTON HARBOR, TEXAS.

REPORT OF MAJOR CHAS. J. ALLEN, CORPS OF ENGINEERS.

The project for this improvement was adopted in 1874, modified in 1880, and again modified in 1886, the object being to deepen the channel so as to admit sea-going vessels of the deepest draught. The project of 1886 embraces the construction of two jetties, to be built to a height of 5 feet above mean low tide, their effect to be supplemented, if found necessary, by dredging.

The natural depth upon the outer bar was 12 feet and upon the inner bar about 13 feet, both at mean low tide. The general plan of the work is shown upon the accompanying map.

At the date of the last annual report there had been constructed, but not entirely finished, 15,200 linear feet of the south jetty, including what is known as the shore branch, 9,564 feet long and 5,636 linear feet of jetty extending seaward. The total length of railway constructed upon the crest of the jetty, including 2,175 feet in advance of the stone-work, was 17,375 feet. The railway is used for transporting material to be deposited in the jetty.

The effect of the works at the close of the last fiscal year was found in a depth of 13¼ feet upon the outer and 21 feet upon the inner bar, both at mean low tide, and a general reduction in width of the outer bar.

The amount expended to July 1, 1889, was, including outstanding liabilities, $1,967,176.27.

The work of construction continued during the past fiscal year under the contract with A. M. Shannon & Company, dated October 13, 1888. This contract was to have been completed June 30, 1889. It was extended as to time to December 31, 1889; again extended to June 30, 1890; and further extended to August 30, 1890. All additional expense caused to the United States by the extensions to be deducted from the sums due or to become due the contractors.

The work accomplished during the past year has resulted in an extension of the rock work for 4,000 linear feet, about 1,200 feet of which is not entirely completed. In addition, the rock work was completed upon 8,559 feet of shore branch, and portions of the old work received more or less repair. The railway trestle has been extended to a point 428 feet beyond the incomplete rock work. It is expected, with funds in hand, to further extend the jetty several hundred feet.

The total of rock work, complete and incomplete, is, to date, 19,200 linear feet.

A full survey of the harbor, including shore-lines, was made in April, May, and June of this year (1890). A complete map of the survey will be forwarded as soon as it can be finished. A map on a scale of 1-40,000 is herewith, containing the contours of this year and last, from which may be noted the principal changes that have occurred during the year.

There has been a deepening of about 1 foot at the shoalest part of the Galveston Channel, and some enlargement of its area, embraced within the 30-foot contour, near its junction with Bolivar Channel. There has been some slight diminution in the width of the area of Bolivar Channel, between the 30-foot contours, west of its junction with Galveston Channel, and also some increase in deep-water area east of that junction.

The 30-foot depth inside of the outer bar has advanced gulfward about 1,000 feet, the 24-foot depth about 200 feet, the 20-foot depth about 350 feet, and the 18-foot depth about 200 feet, taking the average. The 24-foot area has also been enlarged, mainly on the north side near its outer end. On the Gulf side of the bar from the jetty northward the 12-foot contour has advanced about 300 feet, the 18-foot contour about 200 feet, the 20-foot contour about 400 feet, the 24-foot contour about 600 feet, and the 30-foot contour 200 feet.

The distance between the 30-foot contours on the harbor and Gulf sides of the bar has decreased about 800 feet.

In the jetty channel the width between the 13-foot contours has decreased, but the depth in the jetty channel is, at mean low tide, $13\frac{1}{4}$ feet. There has been a notable accretion of sand on the south side of the jetty.

The work was under the immediate supervision of Mr. H. C. Ripley, assistant engineer, a copy of whose report, dated July 1, containing details of work and survey, is herewith.

The amount expended during the fiscal year ending June 30, 1889, is $205,935.39.

The tidal observations in Galveston Bay and at the harbor entrance, inaugurated in 1888, were continued. Eight self-registering tide-gauges were under observation and their records plotted. For a full account of these gauges, attention is invited to the report, hereto appended, of Lieutenant Langfit, Corps of Engineers.

In March last, running a line of precise levels to connect the zeros of the tide-gauges with each other and with the permanent bench-mark on the Hendley Building at Galveston, was commenced. The season has been one of floods for the rivers discharging into Galveston Bay, so that the work of connecting bench-marks at Galveston with those at Bolivar Point had to be done across Bolivar Gorge. The connection was made, however, and carried to the tide-gauge at Hanna's Reef, though under most disadvantageous circumstances of weather. This work of leveling is, therefore, not completed. A more extended account of the leveling is given in the report, herewith, of Mr. Gerald Bagnall, assistant engineer.

For the statement of shipments for Galveston contained in the table herewith of commercial statistics for the port of Galveston for the year ending June 30, 1890, I am indebted to Mr. Julius Runge, president of the Galveston Cotton Exchange. For the number, character, and tonnage of vessels entered and cleared for the same period, acknowledgment is due Mr. N. W. Cuney, collector of the port.

The statistics for this and other works in charge of this office were compiled by Mr. Elliott Jones, chief clerk.

It is recommended that the sum of $2,350,000 be appropriated for the fiscal year ending June 30, 1892, of which $850,000 is the amount required for extending the south jetty to the crest of the bar, and $1,500,000 for building the north jetty to the same point.

The original estimated cost of this work as revised in 1886, is	$8,478,000.00
The aggregate amount appropriated to July 1, 1890, is	2,278,000.00
The total amount expended, including outstanding liabilities, is	2,173,111.66

In addition to this there was expended the sum of $100,000 subscribed by the city of Galveston in 1883.

The work is located in the collection district of Galveston. The nearest light-houses are at Bolivar Point and Fort Point, at entrance to Galveston Bay.

The amount of revenue collected at the port of Galveston for the fiscal year ending June 30, 1890, was $131,613.17.

The increase in tonnage over last year was 174,008 tons.

Abstract of appropriations made by Congress for improving harbor at Galveston, Texas.

By act approved—	
July 11, 1870	* $25,000.00
March 3, 1871	* 20,000.00
June 10, 1872	* 31,000.00
June 23, 1874	60,000.00
March 3, 1875	150,000.00
August 14, 1876	142,000.00
June 7, 1878	75,000.00
June 18, 1878	50,000.00
March 3, 1879	100,000.00
June 14, 1880	175,000.00
March 3, 1881	250,000.00
March 4, 1882	100,000.00
By act passed August 2, 1882	300,000.00
By act approved August 5, 1886	300,000.00
By act of August 11, 1888	500,000.00
Total	$2,278,000.00

Money statement.

July 1, 1889, amount available		$38,763.46
July 1, 1890, amount expended during fiscal year, exclusive of liabilities outstanding July 1, 1889, and exclusive of payments made on contracts in force July 1, 1889	$19,022.19	
July 1, 1890, outstanding liabilities	123.25	
July 1, 1890, amount covered by uncompleted contracts made during the fiscal year ending June 30, 1089		19,145.44
July 1, 1890, balance available		19,618.02
Amount (estimated) required for completion of existing project		$6,200,000.00
Amount that can be profitably expended in fiscal year ending June 30, 1892		2,350,000.00

Submitted in compliance with requirements of sections 2 of river and harbor acts of 1866 and 1867.

* These appropriations were mostly expended in small dredging operations prior to the adoption of the project of 1874.

H Ex. 454. 51 1

REPORT OF FIRST LIEUT. WILLIAM C. LANGFIT, CORPS OF ENGINEERS.

UNITED STATES ENGINEER OFFICE,
Galveston, Tex., June 30, 1890.

MAJOR: I have the honor to submit the following progress report on the tidal observations of Galveston Bay:

As stated in my last report, three new gauges were put in operation at the places designated, the record from them beginning in July, 1889. The relative elevations of the zeros of the new gauges, referred to the adopted plan of reference, were determined in the usual manner by water comparisons.

It being evident that the presence of a gauge located in the gorge of the harbor would give results of great importance, it was decided, in view of the fact that the records from Round Point and Morgan's Point gauges were so similar, that one of them could be dispensed with, to dismantle the Round Point gauge and establish it in the gorge. This has been done, the Round Point record ceasing in March, and the gorge record commencing in April, 1890. The Round Point tide-gauge house was left standing with two staff-gauges on different piles with their zeros at the same level. A line of precise levels can be run to them at any time and tie in the records already obtained.

On the 3d, 4th, 5th, and 6th of April a freshet occurred in the San Jacinto River, during the course of which the current of the river entering Morgan's Canal completely carried away the tide-gauge house at Morgan's Point and the revetment of the canal on the same side as the house. The keeper, Mr. Warren, thoughtfully saved the instrument and all movable property. The gauge was located on the east side of the canal and behind the revetment. It was erected in 1887.

The gauges have been inspected much more frequently this year, resulting in a marked improvement in the records.

A greater part of the time I have been unaided in the reduction and plotting of the records, and have had to compile all numerical data for myself. As a consequence, the new matter which I can present in this report is meager, and, in fact, no complete report can be made until further physical data are obtained, notably, the relative elevations of the zeros of the gauges, current observations, including relative velocities of ebb and flood currents, with their relative durations and times of slack.

A party is now engaged in running a line of precise levels to connect the various zeros, but the results so far reported have not been received in time to be used.

While I have some data reduced from records of the new gauges, the results depend upon too few observations to be comparable with those from the older ones; they are consequently reserved for future discussion.

For these reasons the remaining portion of this report is abridged as far as may be, only such results of my reductions being given as will give relatively correct results when compared with my report of last year, together with a short explanation of the cause of the one tide a day during large declinations of the moon.

The following table gives the same facts as given in Table I of last year's report, revised to include the results of the year 1889, viz: Elevation of mean low tide referred to the plane of reference adopted at Galveston; mean fluctuation of the tide at the various gauges for the great and small declination tides, the intermediate tides, and mean of

all the tides. The bar record for 1889 is much broken, record having been obtained in eight months only—no single month complete and some with but very little record at all.

TABLE I.—*Rise and fall of tide (a).*

Location of gauge.	Plane of M. L. T. above established plane of reference (*b*).	G. D. T.	S. D. T.	I. D. T.	M. T.
	Feet.	*Feet.*	*Feet.*	*Feet.*	*Feet.*
Bar	−0.10	2.63	1.27	2.00	1.91
Government Wharf	+0.36	1.57	0.67	1.16	1.05
Rollover	+0.17	1.50	0.84	1.19	1.12
Morgan's Point	+0.56	0.81	0.42	0.67	0.60
Round Point	+0.46	0.85	0.44	0.74	0.65

(*a*) Record used begins in May, 1887, and runs to inclnde December, 1889. All records more or less broken and some very much so. (*b*) Plane of reference is the plane of M. L. T. at Government Wharf as determined by Mr. Ripley, United States assistant engineer, from observation in 1872 and 1873.

A comparison of this table with that of last year shows:

(1) That the plane of M. L. T. at the bar has been largely lowered by the additional observations, while the mean fluctuation has been largely increased. This can be partially accounted for by the fact that the whole number of observations is small and the additional ones introduced happened to contain a relatively large number of tides with very low low-water and large fluctuation.

(2) That the plane of M. L. T. at all the gauges has been lowered. The plane of M. L. T. at the various gauges for 1889 only, is as follows:

Bar	−0′.17
Government Wharf	+0′.28
Rollover	+0′.07
Morgan's Point	+0′.53
Round Point	+0′.43

all of which show a lower plane than heretofore.

(3) The plane of M. L. T. at Rollover still continues lower than at Government Wharf and its mean fluctuation slightly larger.

(4) The mean fluctuation at all the gauges has been slightly increased.

Tables IV and V of last year's report are combined in the following table, the results being determined from the observations to include 1889:

TABLE II.—*Rise of G. D. T. and S. D. T. divided by rise of M. T.**

Location.	$\frac{\text{G. D. T.}}{\text{M. T.}}$	$\frac{\text{S. D. T.}}{\text{M. T.}}$
Government Wharf	1.495	0.638
Rollover	1.339	0.750
Morgan's Point	1.350	0.700
Round Point	1.308	0.674

*See remark (a) Table I.

These results give the same indications as those given last year, yet when the absolute differences are so small a positive conclusion can not be drawn until a longer series of observations confirm the results in their relative values.

Tables II and VI of last year's report are consolidated in the following table, and extended to include the various classes of tides and the

mean tide. These results differ somewhat from the partial determination of the delays in high and low water given last year, but the conclusions are in nowise affected, as the relation between the values is still in the same direction. The time of high and low water at the Government Wharf gauge was taken as the origin, in the reduction and the results transferred to the bar gauge as an origin, by adding to the difference of time found between the Government gauge and the other gauges, the difference of time found between that gauge and the bar gauge. Owing to the limited amount of record from the bar gauge, these last differences are not so well determined, but as their absolute amounts are relatively small the other results are, I think, practically correct.

TABLE III.—*Delay of high and low water.**

Location of gauge.	Distance from bar gauge.	Delay high water.				Delay low water.			
		G. D. T.	I. D. T.	S. D. T.	M. T.	G. D. T.	I. D. T.	S. D. T.	M. T.
	Miles.	*Hrs.*	*Hrs.*	*Hrs.*	*Hrs.*	*Hrs.*	*Hrs.*	*Hrs.*	*Hrs.*
Government wharf...	6¼	1.28	1.35	1.10	1.226	1.23	1.12	1.01	1.110
Rollover	30	4.63	4.55	4.30	4.474	5.61	5.20	4.79	5.169
Morgan's Point	30¾	8.30	7.26	5.26	6.706	6.32	5.89	5.45	5.848
Round Point	35½	8.13	7.33	5.80	6.811	6.62	6.14	5.81	6.153

*See remark (*a*) Table I.

This table brings out two facts very clearly: First, that the delay for the large tides is larger than that for the smaller ones, and second, that the delay in high water is greater than that in low water, the Rollover gauge excepted, this gauge again giving an unexpected result.

Below is given Table VII of last year's report, revised to include results of 1889. It was obtained by adding to the plane of M. L. T. (Table V), for each kind of tide, its corresponding half fluctuation.

TABLE IV.—*Mid level of water.**

Location.	G. D. T.	S. D. T.	I. D. T.	M. T.
	Feet.	*Feet.*	*Feet.*	*Feet.*
Bar.....	0.815	0.915	0.830	0.855
Government wharf	0.775	0.955	0.880	0.885
Rollover	0.670	0.770	0.725	0.730
Morgan's Point.....	0.875	0.840	0.875	0.860
Round Point.....	0.775	0.800	0.770	0.785

*See remark (*a*) Table I.

This table gives about the same relative results as Table VII of last year's report, but, as there stated, the quantities are so nearly equal that no positive conclusion can be drawn from them.

In Table VIII of last year's report I gave the results obtained for the plane of M. L. T. taken out for each kind of tide independently. This table is here repeated, revised to include results of observations of 1889:

TABLE V—*Plane of M. L. T. for G. D. T., I. D. T., and S. D. T.**

Location of gauge.	G. D. T.	I. D. T.	S. D. T.
	Feet.	*Feet.*	*Feet.*
Bar	−0.50	−0.17	+0.28
Government wharf	−0.01	+0.30	+0.62
Rollover	−0.08	+0.13	+0.35
Morgan's Point	+0.47	+0.54	+0.63
Round Point	+0.35	+0.40	+0.58

* See Remark (*a*), Table I.

The explanation of these results will be found in the following remarks on the observed tide and its components:

So far as I know no explanation has ever been given by this office for the apparent anomaly of only one tide a day here during parts of a lunation, and two during the remainder. Stated briefly the reason is this: That as the moon leaves her node there is developed a tide having a period approximately of a day, which increases in size as the moon's declination increases (either north or south), and soon passes in magnitude the regular tide which occurs twice a day. This last tide is called the semi-diurnal component, and the former the diurnal component of the observed tide, the latter being produced by the combination of the two. Plate I, herewith,* presents a graphical analysis of the tide observed at the Bar Gauge into its diurnal and semi-diurnal components, and will give a good idea of their relative importance during a lunation.

Assuming that each component follows the law of the sines, either one, at any particular time can be represented by an equation of the following form:

$$y = A \cos 2\pi \frac{t}{T}$$ in which

y=ordinate of curve referred to an axis midway between high and low water.

t=time in hours from place of maximum ordinate

T=duration of one tide

A=Coefficient.

Taking two equations of the above form and combining them we get for the equation of the complex curve

$$y = A \cos (2\pi \frac{t}{T} - E) + A' \cos 2\pi \frac{t}{T}$$ in which

y=ordinate of complex curve

t, T, and A=same quantities as above.

T′ and A′=quantities for the semi-diurnal curve similar to T and A for the diurnal curve.

E=distance between the place of the maximum ordinate of the diurnal component and the maximum ordinate of preceding semi-diurnal component.

For a particular case I deduced the values of the coefficients and of E in the equation and then calculated the resultant curve. This is shown on Plate I, and just below it the corresponding observed curve. The agreement is all that could be expected from such a rough determination.

It is evident that this decomposition explains all or nearly all the

* Omitted.

circumstances of the rise and fall of the tide; as, for instance, when the moon's declination is large, the sudden rise to high water, the subsequent rapid fall for a short time followed by a more slow decline, stand or small rise, and then rapid fall to low water. These remarks suppose wind effects small.

The value of E in the above equation determines largely the character of the complex curve, as do also the relative magnitudes of the coefficients A and A′. With a correct value of E, and proper changes in value of A and A′ any observed form of curve can be produced. I have not had time nor sufficient data to determine the law of the changes in these coefficients.

These methods of analysis are not new. The graphical method has been used in the office of the United States Coast Survey for many years. Again, Professor Bache, formerly superintendent of that service, gives an analytical expression similar in form to the one given above, for the tides at Cat Island, Gulf of Mexico (report of 1866). His expression is

$$C \cos 2t + D \cos (t - E) - y = O, \text{ in which}$$

t = time in hours from place of maximum ordinate of semi-diurnal curve. C, D, E and y are similar quantities to A′, A, E, and y in the equation given above.

It may be of interest to state that at Cat Island E is about nine hours, while for Galveston Bar it is about five hours.

On Plate II* is given a similar graphical analysis for the tide at the Government Wharf gauge. A comparison of the two will show the changes undergone in passing from the bar to the Government Wharf, a distance of about $6\frac{1}{4}$ miles.

Before closing this report I wish to call attention to an error in the last table (VIII) in the published copies of my report of last year. The signs of all the quantities in the table should be *plus* except that of the top number (0.32) in the column headed G. D. T., which is correctly minus.

Very respectfully, your obedient servant,

WM. C. LANGFITT,
First Lieut., Corps of Engineers.

Maj. CHAS. J. ALLEN,
Corps of Engineers, U. S. A.

REPORT OF MR. H. C. RIPLEY, ASSISTANT ENGINEER.

UNITED STATES ENGINEER OFFICE,
Galveston, Tex., July 1, 1890.

MAJOR: I have the honor to make the following report relating to the improvement of Galveston Harbor, Texas, for the fiscal year ending June 30, 1890:

JETTY CONSTRUCTION.

At the end of the last fiscal year the work under contract with A. M. Shannon & Co. for the construction of the jetty was less than half completed, their contract having been extended at their request to December 31, 1889. At that date the work was still unfinished, and the contract was again extended to June 30, 1890. In anticipation that the work would not be finished by the 30th of June the contractors ap-

* Omitted.

plied for and received a further extension of time to the 30th of August, 1890. The work was therefore continued under the same contract as for the previous year, but by the terms of this contract the expense of inspection and measurement of material, amounting to $4,540.33, has been deducted from payments made to the contractors since the 30th of June, 1889.

CONDITION AND PROGRESS OF THE WORK.

The condition of the work at the end of the year and the progress made were as follows:

The railroad trestle has been extended from station 173+75′ to station 196+28′, a distance of 2,253 feet.

The rock-work has been completed from station 9+60′ to station 70+70′, and from station 71+15′ to station 95+64′ on the shore branch, a distance of 8,559 feet from station 150 to station 180 on the Gulf extension, a distance of 3,000 feet, making the total extension of the completed work 11,559 feet. The rock-work is incomplete from station 180 to station 192, a distance of 1,200 feet.

That portion of the work designated as incomplete has progressed as follows:

The riprap work has been built up to full height ready for the placing of blocks to station 181, a length of 100 feet and the riprap work is incomplete from station 181 to 192, a length of 1,100 feet.

Blocks have been deposited on the sides of the work in quantity sufficient to nearly complete the covering from station 180 to station 180+50′, a length of 50 feet and in quantity not nearly sufficient to complete the covering from station 180+50′ to station 191, a length of 1,050 feet.

REPAIRS TO OLD WORK.

At the close of the last fiscal year the repairs to the old work necessitated by settlement along the axis where clay had been used and by some sliding down of blocks on the sides were incomplete.

During the year further settlement along the axis and some sliding down on the sides have occurred. The sliding down of blocks, however, has been confined to the north side. The repairs, therefore, have been prosecuted from time to time as were required. There have been expended in these repairs 2,728 cubic yards of riprap and 957 cubic yards of blocks.

AMOUNT OF STONE USED.

The following table (No. 1) shows the number of cars and amount of each kind of stone placed during each month throughout the year.

Table No. 1, *showing kind and amount of stone used.*

Month.	Cars.	Riprap.	Cars.	Blocks.	Total cars.
		Cub. Yds.		*Cub. Yds.*	
July	175	2,807.11	152	1,381.15	327
August	288	4,624.70	211	1,891.93	499
September	187	3,578.06	201	1,791.56	388
October	177	3,116.56	124	1,036.25	301
November	197	3,552.02	171	1,386.32	368
December	240	3,884.73	216	1,585.17	456
January	248	3,980.83	168	1,218.55	416
February	391	6,245.15	297	2,027.95	688
March	514	7,507.31	316	2,044.54	830
April	575	8,071.44	333	2,203.45	908
May	432	6,057.74	248	1,662.04	680
June	356	4,780.81	183	1,120.06	539
Total	3,780	58,206.46	2,620	19,258.97	6,400

It will thus be seen that the total number of cars of stone placed during the year was 6,400. Of these 3,780 cars contained 58,206 cubic yards of riprap and 2,620 cars contained 19,259 cubic yards of blocks, making a total of 77,465 cubic yards of stone placed.

The average amount of stone per car was for riprap $15\frac{2}{5}$ cubic yards and for block $7\frac{1}{3}$ cubic yards. The average value of a car of stone was for riprap $32.03 and for blocks $31.61.

METHOD OF CONSTRUCTION.

The method of construction has been similar to that of last year, but a slight modification in the order of placing the stone has resulted in a smaller cross-section and consequent reduction in cost.

Instead of depositing the whole amount of riprap and bringing it to full height before the blocks were deposited, as was done last year, the riprap was only brought up to the water surface and then blocks were deposited on the sides, bringing them to a height somewhat above that of the riprap.

Additional riprap was then deposited and brought to full height, the presence of the blocks on the side preventing any of the riprap from rolling down on the sides and hence any increase in the width of the core was impossible.

Additional blocks were then deposited and placed with the derrick as before.

This order of placing the stone extends from station 165 onward and has resulted in a reduction in cost of not less than $10 per linear foot.

COST OF THE WORK.

The following table (No. 2) shows the quantities of stone used and the cost of the same in the work and other items of expense, not including office and inspection expenses. Previous expenditures are also included in the table so that the grand total gives the total cost of the work to date under the project of 1886.

It will thus be seen that the average cost per foot of jetty has been as follows:

From station 0 to station 79+64′, $17.04; from station 79+64′ to station 84+64′, $32.37; from station 84+64′ to station 95+64′, $26.30; from station 95+64′ to station 107+64′, $32.92; from station 107+64′ to station 138+64′, $69.66; from station 138+64′ to station 144+12′, $71.29; from station 144+12′ to station 150, $58.30; from station 150 to station 160, $54.54; from station 160 to station 170, $53.70; from station 170 to station 180, $38.29; from station 180 to station 190 (unfinished), $27.01; and from station 190 to station 196+28′ (unfinished), $10.22.

The cost of the repairs to the old work for the year from station 95+64′ to station 144+12′ has been at the rate of $2 per linear foot, which is about $3\frac{1}{3}$ per cent. of the total cost to date.

The cost of the repairs to the track over the same length for the year has been at the rate of 8 cents per foot.

SOURCES OF SUPPLY.

The stone used during the year has been brought by rail from three places, as follows:

Riverside, on the line of the International and Great Northern Railway, 130 miles from Galveston; Quarry Station and Heber Stone Quarry, on the line of the Gulf, Colorado and Santa Fé Railway, the former 143 miles and the latter 153 miles from Galveston. The supply, however, has come mainly from the Heber Stone Quarry, as only about 4 per cent. has come from Riverside and 6 per cent. from Quarry Station of the whole amount received.

SURVEYS.

At the close of the last fiscal year a portion of the field notes of the annual survey had not been plotted, and hence the changes in the hydrography of the inner harbor and in the shore lines was not given in my last annual report. These omissions were supplied in my report of November 16, 1889.

During December and January last a survey was made, embracing an area of about 9 square miles of hydrography, extending from the 30-foot depth in Bolivar Channel to the same depth in the Gulf and for a width sufficient to cover that portion of the outer bar probably liable to change; also the shore line, extending from the foot of Tremont street along the Gulf shore to the jetty, a distance of about 4 miles. The results of this survey were given in my report of February 8, 1890.

During April, May, and June a complete survey of the harbor and entrance was made. The hydrography embraces an area of about 30 square miles, and includes the outer bar to a depth of 30 feet in the Gulf and the inner harbor to the limit of the 12-foot depth. The soundings were taken between April 17 and May 31.

The topography embraces the mean high and mean low water shorelines of the east end of Galveston Island, the north shore of Pelican Island and Spit, and the west end of Bolivar Peninsula, an aggregate length of shore of about 21 miles.

The shore-line locations were executed in June. For want of time only a portion of the notes have been plotted. Embraced in these are the shore-line locations and that portion of the hydrographic work west of the 30-foot depth in Bolivar Channel and north of Pelican Island.

Comparing the results obtained, however, with the survey of one year ago, we find that the Galveston Channel has suffered only slight changes, and these are favorable to an increased width and depth. At its shoalest point the depth has apparently increased from 21 to 22 feet, although the shoal area is not covered with soundings as well as could be desired, and the width between the 20-foot contours at the narrowest part of the channel has increased from 300 to 360 feet. The area embraced in the 30-foot contour near its junction with Bolivar Channel has considerably enlarged, increasing its length from 1,340 feet to 1,940 feet, and its width from 200 feet to 500 feet.

In Bolivar Channel the changes have been more extensive. West of its junction with Galveston Channel the width of the 30-foot area has somewhat diminished. The contour on the north side of the channel has moved south about 200 feet and on the south side of the channel this contour has fluctuated somewhat but on the whole has maintained about the same position as last year. The width, therefore, between these contours has diminished about 200 feet. There has also been some southerly movement of the 18-foot and 24-foot contours, but less in amount. East of its junction with Galveston Channel there has been some enlargement of its deep-water areas. The 30-foot depth has advanced gulfward about 1,000 feet, the 24-foot depth about 200 feet, the 20-foot depth about 350 feet, and the 18-foot depth about 200 feet.

The 24-foot area also has been enlarged mainly on the north side near its outer end. Upon the crest of the outer bar there has been a pretty general shoaling of from one-fourth to one-half of a foot. The depth in the jetty channel however still remains at $13\frac{1}{4}$ feet, but the width of the channel between the 13-foot contours has considerably diminished and the distance from the 14-foot depth inside to the 14-foot depth outside has increased from 2,000 feet to 2,600 feet. The bar has also advanced very perceptibly gulfward.

On the Gulf side of the bar from the jetty northward the average and maximum advance is as follows:

For the 12-foot contour the average is about 300 feet and the maximum 470 feet; for the 18-foot contour the average is about 200 feet and the maximum 540 feet; for the 20-foot contour the average is about 400 feet and the maximum 740 feet; for the 24-foot contour the average is about 600 feet and the maximum 1,100 feet, and for the 30-foot contour the average is about 200 feet and the maximum 340 feet.

The long shoal north of Bolivar Channel and separating it from the swash or shore channel has increased its height somewhat and has been extended eastward, the 8-foot contours having advanced about 1,000 feet while its western end has been cut away, the 12-foot and 8-foot contours having receded about 650 feet. For a length of about 6,000 feet immediately south of Bolivar Point this shoal has moved bodily towards Bolivar Channel, as has also the swash channel for nearly the same distance. The amount of this movement is about 200 feet. The depth in the swash channel has suffered no further increase since last year.

The shoal immediately north of the jetty has continued its gulfward advance. The amount of this advance is for the 6-foot contour about 600 feet, for the 8-foot contour about 350 feet, and for the 12-foot contour about 800 feet.

The shallow trench along the north edge of the old mattress jetty near its outer end which had developed last year has become entirely obliterated, and the indications are that the probable effect of the further building up of the south jetty will be the obliteration of the jetty channel itself. The shoal immediately south of the jetty has ap-

parently ceased its westward movement and has commenced extending itself eastward. An island has been formed at its western end which at average tide is about 1,000 feet long and at its highest point about 4 feet above the water surface. The shore of Fort Point and this island are approaching each other and will probably join in the near future. The amount of the eastward advance of this shoal is for the 3-foot contour about 1,500 feet, and for the 8-foot contour about 640 feet. The little bay between Fort Point Light-House and this new island has shoaled from 1 to 2 feet. The deep trench on the south side of and along the outer portion of the old mattress jetty has diminished somewhat in extent and depth, although the reduction in these respects is much less than for the previous year. It will be noted that the deepest water is no longer close to the base of the work, but is at a distance of from 140 feet to 240 feet therefrom.

These changes indicate a further increase in the outward resultant of force and may be reasonably attributed to the further extension of the jetty work. The erosion at the west end of the shoal north of Bolivar Channel is an indication of a relative weakening of the flood component of force at that point. This point being so remote from the artificial works and being to the rear of them, and the result being exactly the opposite of what should have been expected, if we consider only the direct action of the jetty itself, an explanation must be sought in a change in the character of the tidal currents as a result of these artificial works. An investigation in water slopes and other tidal phenomena, made in February last, and which was submitted to you on the 14th of that month in a paper entitled "Tidal Phenomena of Galveston Harbor," brought out some facts which have so direct a bearing upon this subject and furnish so reasonable an explanation for this change that I beg to include that paper as a part of my annual report. That investigation brought out the fact that any obstruction to the tidal flow to and from the bay would increase the ebb slopes and reduce the flood slopes, and the cutting off of the west end of the north shoal would seem to indicate that the work done upon the jetty has already had an appreciable effect upon the character of the tidal currents in the harbor in the direction indicated by theory. The gulfward advance of the bar is not an unexpected result of the extension of the jetty, and I think we may expect a continuation of this advance until the equilibrium has been restored or the supply of sand exhausted.

It has been seen that the greatest shoaling in the deep trench along the south side of the old mattress jetty near its outer end has been near the base of the work. This indicates that the sand has accumulated on the north side of the jetty and some has passed over the crest and settled next to the base. This is another indication of the loss of force in the littoral current at that point, and also shows from which direction the sand is moving that has caused the shoaling in the trench itself. To be sure this sand may have been brought out of the harbor by the ebb currents, but the fact to be emphasized is that this material did not come from the west.

PROFILE OF SOUTH JETTY.

The profile of the old mattress portion of the south jetty compared with that of one year ago shows no indication of any further subsidence of that work. Indeed the result of the more numerous soundings taken this year over last year give a somewhat greater average height to that work than the average of last year. Commencing at the outer end of

the average depth on the axis for the first 5,000 feet is 8.71 feet, for the second 5,000 feet is 7.88 feet, and for the next 2,400 feet it is 8.71 feet. This shows a subsidence of the outer 5,000 feet of but .45 of a foot in the last two years. No comparison for the balance of the distance can be made from the fact that for the last two years most of this portion has been covered with sand. It is probable therefore that no subsidence has occurred.

EXAMINATION OF NEW WORK.

Bi-monthly soundings of the bottom adjacent to the new work have been taken from station 80 onward throughout the year at intervals of 200 feet, in order to detect any changes which might occur that would endanger the foundation of the work. These soundings have been plotted and have accompanied my monthly reports showing a comparison with those previously taken. The annual cross-sections and profile of the work for comparison with those taken last June have not been taken, however.

It was found that an increase of the engineering force would be necessary to complete them in time for the annual report, and also in consideration of the fact that the contract will be completed two months hence, it was therefore decided to defer the sections until a later date. When these are taken the results will be made the subject of a supplemental report.

Very respectfully, your obedient servant,

H. C. RIPLEY,
United States Assistant Engineer.

Maj. CHAS. J. ALLEN,
Corps of Engineers, U. S. A.

REPORT OF MR. GERALD BAGNALL, ASSISTANT ENGINEER.

GALVESTON, TEX., *July* 4, 1890.

SIR: I have the honor to make the following report on the precise leveling operations which are about to be suspended. It is impossible, however, to give more than a short outline of what has been done, as the field notes have not yet been worked up.

One leveling party was organized on March 20, and commenced running a line up Bolivar Peninsula, starting from the light-house. The party consisted of Mr. A. L. Johnson, observer in charge; Mr. T. P. Griffith, recorder; and Messrs. G. W. Allen and Houston Jones, rodmen; and three attendants and axmen. It was proposed to run a line around Galveston Bay, commencing at Bolivar Point, to be afterwards connected with the different tide-gauges in the bay. This plan, however, as the work progressed and the difficulty of leveling over marsh land, and of going around the flooded country adjacent to the Trinity, San Jacinto, and other streams became more apparent, was abandoned in favor of one which contemplated the starting of two separate lines from Galveston; one across the gorge to connect with the Gorge, Bar, Hannah's Reef, and Rollover gauges; the other to cross West Bay and connect with the two Red Fish and Morgan's Point gauges. This latter plan, however, could not be adopted until the practicability of taking long shots across water on platforms had been tested.

As no information on this subject could be found in reports of leveling

done heretofore it was decided to connect the bench-mark at Elm Grove with the Hannah's Reef gauge, as an experiment before proceeding further. Platforms were accordingly constructed and reciprocal levels taken across two spans one-fourth of a mile long, two spans one-half of a mile long, with check lines across one span of one-half of a mile and one of one mile. Although but one series was taken in each of these check lines the greatest discrepancy found was only four millimeters, from which it may be safely assumed that the results obtained by the levels across the four spans is fully up to the standard of accuracy required on shore work.

The platforms consisted of three piles, well braced, for the instrument to stand on, surrounded by sheet-piling to protect them from the force of the waves and were 6 feet high above water. The practicability of taking shots of at least a mile caused the adoption of the plan which embraced crossing the gorge, and work was commenced there immediately on the completion of the Elm Grove work. Platforms were erected off Pelican Spit, on Bird Island Shoal, and near the Gorge gauge. These, as at Elm Grove, consisted of a triangle of sheet-piling with three piles in the center, but they had to be of much stronger construction and with the exception of the one on Bird Island Shoal had a stone apron around them to prevent scour. The latter was carried away, the current having scoured out around it before stone could be placed.

It was decided not to rebuild the platform on Bird Island Shoal, but to run from Quarantine to the gange platform by Pelican, and also by Fort Point light-house, and thence to Bolivar Peninsula, also by two different routes, thus getting a complete check across the Gorge. From quarantine to Gorge gauge platform, going by Pelican, embraces one span of 4,500 feet, and one of 6,200 feet; going by Fort Point light-house, one span of 5,900 feet, these lines checked to within 1.8 millimeters. The two lines from Gorge gauge platform to Bolivar also checked well.

One platform has been constructed on the bar at a distance of 1 mile from shore. It resembles the others in design, but is stronger and has a wave breaker of piling 20 feet from the sheet-piling on the exposed sides.

On the completion of this platform it was decided to suspend work on account of want of sufficient funds to complete it.

The unprecedented weather of April, May, and a part of June, retarded the work very seriously. During that period only about 10 per cent. of the time was suitable for leveling on platforms, and to this cause must be attributed the failure to complete the work with the money allotted.

During the progress of the work current measurements were taken when possible, especially with regard to the flow of water through Bolivar Beach Channel. The observations taken show a strong current both at ebb and flood tide through that channel.

A continuous line of levels has now been finished to Hannah's Reef gauge, connecting it with the Gorge gauge and the Hendley building, and one of the three platforms required to connect the bar gauge completed.

It is to be regretted that the results obtained can not be given in this report. The work, which under the most favorable circumstances would require the greatest care, was rendered very much more difficult by the physical condition of the locality and by the unfavorable weather.

Before concluding I wish to acknowledge the services of Mr. A. L.

Johnson, assistant engineer, to whose assistance the success of the work is largely due. Thanks are also due the other members of the party for their faithful services.

Very respectfully, your obedient servant,

GERALD BAGNALL.
Assistant Engineer.

Major CHAS. J. ALLEN,
Corps of Engineers, U. S. A.

COMMERCIAL STATISTICS OF GALVESTON HARBOR, TEXAS, FOR FISCAL YEAR ENDING JUNE 30, 1890.

[Compiled from statements made by Julius Runge, esq., president of the Cotton Exchange, and N. W. Cuney, esq., collector of the port of Galveston, Texas.]

Steam-vessels entered	302	
Sailing vessels entered	145	
Total		447
Steam-vessels cleared	304	
Sailing vessels cleared	118	
Total		422
Total tonnage of vessels entered, tons	501,695	
Total tonnage of vessels cleared, tons	492,677	
Total tonnage		994,372

Amount and value of freight shipped.

Articles.	Quantity.	Tons.	Value, approximate.	Freight charges, approximate.
Cotton ..... bales..	853,000	223,486	$46,900,000	$3,522,625
Wool ..... bags..	68,800	6,883	2,712,000	82,594
Cottonseed-cake ..... do...	921,000	69,095	1,313,000	414,571

BILLS FOR THE SPECIFIC ACTION OF CONGRESS.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A communication from the Attorney-General recommending the payment of certain bills amounting to $8,965.15 on file in the Department of Justice, which do not fall within any appropriation under its control.

AUGUST 6, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
August 5, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, a communication from the Attorney-General of the 1st instant, in relation to certain bills amounting to $8,965.15, together with exhibits therefor.

Respectfully yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF JUSTICE,
Washington, D. C., August 1, 1890.

SIR: You are requested to state to the Speaker of the House of Representatives that the following bills, amounting to $8,965.15, on file in the Department of Justice, do not fall within any appropriation under its control.

They can not be audited and certified for payment by the accounting officers of the Treasury.

Account of District-Attorney White, Washington (Bishop Nesqually *vs.* John Gibbons), Exhibit A (Ex. Doc. 352, 51st Congress)	$3,000.00
Account of A. C. King, West. Dist. Arkansas, defending deputy marshal (Exhibit 17, Ex. Doc. 121, 51st Congress)	1,000.00
Account of J. P. Gilbreath and R. E. Pennell, deputy marshals, West. Dist. North Carolina, expenses of their prosecution for discharge of official duty (Exhibit 7, Ex. Doc. 121, 51st Congress)	75.00
Account of C. C. Goddard, South. Dist. Ohio, habeas corpus case (Exhibit 11, Ex. Doc. 121, 51st Congress)	25.00
Account of C. P. Connelly, Montana, Oct. term, 1889, services against Charles Miller (Exhibit F, Ex. Doc. 121, 51st Cong., 2d sess.)	50.00
Account of Philip Tillinghast, Idaho, April term, 1889, defending Titus Thompson, Indian (Exhibit S, Ex. Doc. 121, 51st Congress)	250.00
Account of S. C. Ward, in matter of Mission Indians, California (account herewith submitted)	2,000.00
Account of M. H. Williams, Arizona, Nov. term, 1888, defending Apache Indians, 1889 (Exhibit N, Ex. Doc. 332, 51st Congress)	1,000.00

Account of C. L. Batcheller, Nor. Dist. California, services Mission Indians (Exhibit P, Ex. Doc. 332, 51st Congress)		$594.95
Account of Will Haight, Nor. Dist. Georgia, Mch. term, 1889, services during illness of district attorney (Exhibit B, Ex. Doc. 332, 51st Cong.)		200.00
Account of George F. Moore, Nor. Dist. Alabama, Apl. term, 1889, services in absence of district attorney (Exhibit G, Ex. Doc. 332, 51st Cong.)		300.00
Account of Newton McCoy, before receiver of land office, Oregon (Exhibit N, Ex. Doc. 332, 51st Cong.)		560.00
Account of T. C. Lyon, special counsel, cotton claims.		
1872	$100.00	
1873	100.00	
1874	210.20	
(Exhibit H, Ex. Doc. 332. 51st Cong.)		410.20
Account of Foreman and Lewis, West Virginia, defending Union soldier, F. Isaac Thompson; letter to Secretary of the Treasury, Jan. 22, 1890..		500.00

They can not be paid as fees of district attorneys or as compensation of assistant attorneys, being for services of counsel appointed by the court in certain cases of emergency, or were necessary services in cases in which the United States had a secondary interest.

They are presented to Congress for its specific action at the request of the claimants, and their payment is respectfully recommended.

Very respectfully,

W. H. H. MILLER,
Attorney-General.

The SECRETARY OF THE TREASURY.

DEPARTMENT OF THE INTERIOR,
Washington, June 6, 1890.

SIR: I have the honor to transmit herewith for such action as may be deemed proper copy of a communication of the 4th instant, from the Commissioner of Indian Affairs, and its inclosures, relative to the claim of Shirley C. Ward, esq., for legal services rendered the Government as special United States attorney for the Mission Indians of California.

I have the honor to be, very respectfully,

J. W. NOBLE,
Secretary.

The ATTORNEY-GENERAL.

UNITED STATES INDIAN SERVICE, MISSION CONSOLIDATED AGENCY,
Colton, May 3, 1890.

SIR: I have the honor to submit the inclosed bill of Shirley C. Ward, esq., for legal services rendered the Government as special United States attorney for the Mission of California, from May 5, 1888, to April 1, 1890.

Also a copy of a letter from Mr. Ward to Attorney-General Miller, the original of which letter, accompanied by a copy of the inclosed bill, has been forwarded by Mr. Ward to the honorable Attorney-General, with the request that the bill be approved by the Department of Justice, and that Congressional appropriation to pay it be obtained as soon as possible.

The bill has been approved both by myself and my predecessor, Col. J. W. Preston, and letter of approval sent to the Attorney-General.

I now submit the same to you for your approval. If approved, I will be pleased if you will use your influence to aid in obtaining a Congressional appropriation for its payment at this session of Congress.

Very respectfully yours,

HORATIO N. RUST,
United States Indian Agent.

Hon. THOMAS J. MORGAN,
Commissioner of Indian Affairs.

United States of America to Shirley C. Ward, special counsel for the Mission Indians of California, Dr.

To service rendered as special United States attorney for the Missions in California between May 5, 1888, and April 1, 1890, under appointment dated January 14, 1886 (see letter N. T. N. R. 218, Department of Justice), as follows, viz:

Services in case of John Morongo *et al. vs.* John G. North and Richard Gird, in the circuit court of the United States for the southern district of California. Suit in equity to quiet and establish the Indians' title to their lands in the Porero Reservation at and near Benning, in San Bernardino County, Cal., and also to stay proceedings in ejectment suit of North and Gird *vs.* J. W. Preston *et al.*, transferred from State to Federal court under instructions from Indian Department. Indian title based upon occupancy and possession under Mexican laws at the time of the transfer of sovereignty, and also based upon executive orders setting aside such lands as Indian reservation. Defendants title based upon Congressional grant to the Southern Pacific Railroad Company and upon patent from the State of California. Testimony still being taken, and case not yet submitted	$1,500
Services in contest between the Indians and John J. Walsh, involving title to lands in sections 24 and 25, in T. 10 S. 3 E. and in section 10, T. 10 S. R. 4 E., S. B. M. in San Diego County, Cal. Testimony taken at Julien, San Diego County, and decided in favor of the Indians by the register and receiver of the local land office, and by the Commissioner of the General Land Office, and now on appeal to the Secretary of the Interior	200
Services in the matter of investigating property rights of the Indians in the College Rancho in Santa Barbara County, and in negotiation with the owners of such rancho, looking to any adjustment of the rights of the Indians on such rancho, by setting off to them a desirable and definite tract of land and furnishing them with houses and ample water for irrigation (negotiations still pending, and not yet consummated)	250
Services in the matter of collecting data in the way of causing surveys to be made, gathering evidence and preparation for bringing of fourteen suits to quiet and establish the Indian title to fourteen tracts of land on Mexican grants, and in negotiating settlement with the owners of such tracts of lands, which tracts are as follows, viz: On the Rancho San Jose del Valle, in San Diego County, Agua Caliente, San Jose, and Puerto de la Cruz; on the Rancho Valle de San José, La Puerto and Matajuai; on the Pauma Ranch, San Diego County, Lower Potrero, Upper Potrero, Paunis Village, Francisco Maji, Jose Pobango, and Juan Sawyer; on the Rancho Santa Ysabel, San Diego County, Carriseta, Manuel's, Santa Ysabel Village	750
Services rendered from time to time in the way of general legal advice to and counsel with the Indians and Indian Agent	300
Total	3,000

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 456.

ENROLLMENT OF CHEROKEE FREEDMEN, DELAWARES, AND SHAWNEES.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

The estimates of the Secretary of the Interior for an additional sum of $10,000, *to carry into effect the provisions of the act of March* 2, 1889, *for the "enrollment of the Cherokee Freedmen, Delawares, and Shawnees."*

AUGUST 9, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT, *August* 7, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, an estimate by the Secretary of the Interior, under date of the 5th instant, for an additional sum of $10,000, to carry into effect the provisions of the act of March 2, 1889 (25 Stat., p. 994), for the "enrollment of Cherokee Freedmen, Delawares, and Shawnees."

Respectfully yours,

P. L. SPAULDING,
Acting Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR,
Washington, August 5, 1890.

SIR: I have the honor to transmit herewith a copy of a communication of the 2d instant from the Commissioner of Indian Affairs, and accompanying estimate of the additional appropriation deemed necessary to enable John W. Wallace, special commissioner, to complete the work contemplated by the provision of the act of Congress, approved March 2, 1889 (25 Stat., 994).

The estimate as submitted by Mr. Wallace is as follows:

Shortage to July 24, 1890	$847.50
To meet increased enumeration	5,000.00
Expenses of disbursement	1,500.00
To cover incidental and emergency expenses	2,652.50
Total	$10,000.00

The Commissioner, in reporting upon this estimate, says he knows no objection to the item of $5,000 to cover the increased enumeration and to the item of $847.50 to cover the shortage of the present appropriation, but that he is not sufficiently informed as to express an intelligent opinion upon the other items.

In regard to this estimate, I desire to say that $4,000 of the $5,000 appropriated by the act of March 2, 1889, to enable the Secretary of the Interior to ascertain who are entitled to share in the appropriation of $75,000 made by act of Congress approved October 19, 1888, have been placed to the credit of Mr. Wallace; that the unsettled claims due Mr. Wallace amount to $1,847.50, as shown by the accompanying statement, leaving a shortage of $847.50.

Mr. Wallace in his work was antagonized by the Cherokees and was obliged to examine a large number of people and their witnesses, in order to ascertain who were entitled to share in the appropriation. This consumed much time and money, and therefore additional funds are required as stated.

The item of $5,000, or so much thereof as is necessary, is required to pay those enrolled of all classes in excess of the number on which the estimate of $75,000, in act of 1888, was based, making the sum to be disbursed per capita $80,000, or so much thereof as may be necessary, instead of $75,000 as appropriated by act of 1888.

To disburse the sum of $80,000 the item of $1,500 is required.

The item of $2,652.50 is required for the purpose of paying any additional persons found entitled to enrollment their per capita shares, and for such other incidental and necessary expenses that may arise in completing the work.

This appropriation being necessary to complete the work required by the act of March 2, 1889, I respectfully request that it receive early and favorable action of your committee.

Very respectfully,

JOHN W. NOBLE,
Secretary.

The SECRETARY OF THE TREASURY.

DEPARTMENT OF THE INTERIOR,
Washington, August 2, 1880.

SIR: I have the honor to acknowledge the receipt of your letter of the 21st ultimo, requesting this office to prepare and submit to the Department an estimate of the additional appropriation deemed necessary to enable Mr. John W. Wallace to complete the work contemplated in the provision of the act of Congress, approved March 2, 1889, (25 Stat., 994), in which the sum of $5,000 was appropriated to enable the Secretary of the Interior to ascertain who are entitled to share in the appropriation of $75,000, made by the act of Congress, approved October 19, 1888, and also to cover the amount of the expense already incurred in excess of former appropriation.

With regard to the work performed by Mr. Wallace, I would respectfully state that, in accordance with the direction of the Department, this office detailed a clerk who was engaged for about three weeks in revising the report of Mr. Wallace, and another clerk was detailed for about the same period to assist in the preparation and examination of his statement of account. It is understood that Mr. Wallace is now on duty in this city under his appointment, at a compensation of $10 per

day, but I am not advised with regard to the details of the particular work upon which he is engaged at present.

Mr. Wallace has prepared and submitted to this office an estimate of the additional appropriation deemed by him to be necessary for the adjustment of present indebtedness, and the completion of the work.

It will be seen that he itemizes the amounts as follows:

Shortage to July 24, 1890	$847.50
To meet increased enumeration	5,000.00
Expenses of disbursement	1,500.00
To cover incidental and emergency expenses	2,652.50
Total	10,000.00

I know of no objection to the item of $5,000 to cover the increased enumeration, and the item of $847.50 to cover the shortage in the present appropriation, but, with regard to the other items presented by Mr. Wallace, I have the honor to state that this office is not sufficiently informed to express an intelligent opinion.

I therefore respectfully submit the matter to the Department, with the recommendation that the additional appropriation be made in such terms that the amount appropriated, or so much thereof as may be necessary, can be used, and the remainder covered back into the Treasury.

Very respectfully, your obedient servant,

T. J. MORGAN,
Commissioner.

The SECRETARY OF THE INTERIOR.

DEPARTMENT OF THE INTERIOR,
Washington, July 31, 1890.

SIR: I have the honor to submit herewith, in response to a verbal request from your Department, an estimate of the additional appropriation, which I deem necessary to complete my work in connection with the Cherokee Freedmen, Delaware, and Shawnee Indian rolls, and to make the final payment thereon.

Shortage to July 24, 1890	$847.50
To meet increased enumeration	5,000.00
Expenses of disbursement	1,500.00
Estimated to cover incidental and emergency expenses	2,652.50
Total	10,000.00

Whatever of the amount that is not required to be returnable to the Treasury. The appropriation made to effect the payment to the beneficiaries alluded to, was based upon an estimate made by Commissioner Atkins, my rolls show that an increased appropriation is necessary, owing to the omission made in the roll from which he based his conclusion. This also applies to the amount appropriated to ascertain who of the various classes were properly entitled.

Very respectfully,

JOHN W. WALLACE,
Commissioner, etc.

Hon. T. J. MORGAN,
Commissioner of Indian Affairs.

Statement of unsettled amounts due on account of enrollment of Cherokee Freedmen, Delaware and Shawnee Indians.

Due on account services:		
C. S. Shelton, clerk		$81.00
S. S. Clover, clerk		50.00
T. Dougherty, interpreter		82.50
W. Breedlove, clerk		152.00
L. Foreman, messenger		11.00
		376.50
Per diem of Commissioner, balance March 31		260.40
Per diem of Commissioner, April to June 30, 91 days		910.00
Per diem of Commissioner, July 1 to July 24		240.00
Traveling expenses, Fort Smith to Washington		37.00
Incidental expenses paid by Commissioner:		
March 6, omitted from account J. W. Stapler, 1 trunk	$7.00	
March 6, omitted from account Brown & Co., stationery	5.00	
April 10, expressage on report	.25	
May 1, Samuel Edmonds on replevin, Cherokee rolls	2.50	
May 3, expressage trunk of evidence	6.50	
		21.25
To amount due W. C. Patton & Co., unsettled bill		2.35
Total		1,847.50

NOTE.—One thousand dollars of the original appropriation act of March 2, 1889, is still in the Treasury, leaving a deficiency of $847.50 to be appropriated by Congress.

O

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 457.

PENSION TO NANCY SMITH.

LETTER

FROM

THE SECRETARY OF THE INTERIOR,

TRANSMITTING

A communication from the Commissioner of Pensions recommending that a special act of Congress be passed authorizing the War Department to change its records so as to give a discharge pro forma to George W. Smith, late husband of Nancy Smith, whereby the said Nancy Smith may receive a pension.

AUGUST 9, 1890.—Referred to the Committee on Invalid Pensions.

DEPARTMENT OF THE INTERIOR,
Washington, August 7, 1890.

SIR: I have considered the accompanying communication from the honorable Commissioner of Pensions, and respectfully submit the same to you in pursuance of the suggestion expressed therein by the Commissioner.

The subject of this communication is the application, number 269542, of Nancy Smith, for pension as the widow of George W. Smith, late of Company F, Phelps's regiment, Missouri Infantry.

The facts of the case set forth by the Commissioner, who is unable to adjudicate the claim upon its merits, because of the fact that her late husband, after serving in the line of duty six months, retired from the service on account of sickness, without a discharge, and was thereafter impersonated in the service by his son, Patrick, who, standing in his father's place, answered to his father's name at roll-call, and was killed in action, March 7, 1862, his death being recorded as that of George W. Smith, who, in fact, was at home, sick, and remained so until his death, in 1874. Patrick Smith, who had not enlisted in the service as such, was killed in battle, but his father, whose substitute he became, survived the war and was never formally discharged from the service. A discharge from the service is a prerequisite of pension, and, in order that claimant, as the widow of George W. Smith, may acquire a pensionable status, the War Department must so amend its records as to give George W. Smith a discharge, *pro forma*, from the date of his withdrawal from the service, as alleged, six months after his enlistment; but it is assumed that the records of the War Department can not be so amended without a special act of Congress ex-

pressly authorizing it. It is to this fact that I respectfully call your attention, in view of the statements contained in the accompanying communication from the Commissioner of Pensions.

If the facts in the case are as alleged, then the claim is a meritorious one, coming within the purview of the joint resolution of Congress, as approved May 29, 1830, and which is still in force, as follows:

Resolved by the Senate and House of Representatives of the United States in Congress assembled, That the heads of Departments who may severally [be] charged with the administration of the pension laws of the United States of America, be and they are, respectively, directed and required, as soon as may be after the opening of each session of Congress, to present to the Senate and House of Representatives a several list of such persons, whether revolutio' ary, invalid, or otherwise, as shall have an application for a pension, and as, in their opinion, respectively, ought to be placed upon the pension-roll, or otherwise provided for, and for doing which they have no sufficient power or authority, with the names and residences of such persons, the capacity in which they served, the degree of relief proposed, and a brief statement of the grounds thereof, to the end that Congress may consider the same.

This Department is aware that it is not customary for the head of the Department to recommend to Congress an alteration of the record of another Department, nor to otherwise interfere with such records; yet, inasmuch as the Adjutant-General has voluntarily called attention to the practicability of so amending the records of the War Department, in this case, as to give claimant a pensionable status, provided Congress shall grant special authority to do so, it is respectfully urged that the Adjutant-General's suggestion may solve the difficulty that obstructs the claimant's application for widow's pension; and, therefore, the matter is submitted here, in pursuance of the foregoing joint resolution, for such action as Congress may choose to take.

Very respectfully,

JOHN W. NOBLE,
Secretary.

HON. THOMAS B. REED,
House of Representatives.

DEPARTMENT OF THE INTERIOR,
BUREAU OF PENSIONS,
Washington, D. C., August 1, 1890.

SIR: In conformity with Order No. 51, dated August 14, 1877, and made in pursuance to act of Congress, approved May 29, 1830, I have the honor to call your attention to the above-described claim for pension of Nancy Smith, with a view to having special legislation by Congress taken in the same.

This is a case of great hardship to the claimant, owing to the incongruity of the soldier's record.

The facts are as follows: George W. Smith, the soldier of record, enlisted October 18, 1861, and was mustered into service November 18, 1861, where he served until he was too sick for duty, when he was sent, or permitted to go home, and his son, Patrick Smith, took his place, performed duty, answered to the name of George W. Smith, and was killed in action March 7, 1862. This disposes of the George W. Smith, so far as the record in the War Department is concerned; when, as a matter of fact, said George W. Smith was at home sick, and remained so until his death, in 1874. There is no record in the War Department of the services and death of Patrick Smith as a substitute.

The widow bases her claim for pension upon the services and death of George W. Smith, in 1874, caused by hemorrhoids and fistula in ano, contracted in line of duty, which was rejected July 23, 1890, on the ground that the soldier, George W. Smith, was never killed (the record shows that he was) nor discharged from the service; it appearing that his son, Patrick, was accepted as a substitute, and killed while so acting.

The Adjutant-General, U. S. Army, under date of May 6, 1890, states that "while the unlawful act of exchange may not have worked any injury to the Government, it yet was unlawful, and the Secretary of War does not feel that he has the authority to give it the character of legality, and that it appears to be a case in which Congress alone can afford relief." I would, therefore, suggest that Congress be asked to instruct the Adjutant-General, U. S. Army, to so amend his record as to show that George W. Smith was mustered out at the expiration of his six months' term of service, thereby completing his military history, and giving the widow a pensionable status before this bureau, she having otherwise established a prima-facie case.

Very respectfully,

GREEN B. RAUM,
Commissioner.

Hon. JOHN W. NOBLE,
Secretary of the Interior, Washington, D. C.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 458.

CONTRACTS FOR FOREIGN MAILS.

COMMUNICATION

FROM

THE POSTMASTER-GENERAL,

TRANSMITTING

Information in response to a House resolution passed August 7, 1890, asking for contracts, conditions, and rate of payments for carrying the mails of the United States to foreign countries.

AUGUST 12, 1890.—Referred to the Committee on the Post-Office and Post-Roads.

OFFICE OF THE POSTMASTER-GENERAL,
Washington, D. C., August 11, 1890.

SIR: I have the honor to acknowledge receipt of the resolution of the House of Representatives, passed August 7, 1890, as follows:

That the Postmaster-General be requested to report to the House of Representatives copies of the agreements or contracts made for carrying the mails of the United States to foreign countries, the conditions on which the awards are made, and the rate of payments for such service.

I have the honor to report that there are no contracts or agreements in force for the conveyance of the United States mails for foreign countries except in the case of Cuba, which will be hereinafter mentioned. The United States mails for all other foreign countries except Cuba are dispatched in accordance with the provisions of section 4009 of the Revised Statutes of the United States, under which the conveying steamers (if of United States registry) are allowed and paid the full sea and United States inland postage collected on the articles contained in the mails; that is to say, for letters and post cards $1.60 per pound, and for other articles 8 cents per pound, calculated upon the net weights of the mails as ascertained and reported to this Department by the postmasters who make up the mails; and if of foreign registry the "sea postage" only on the articles contained in the mails, which is calculated at the rate of 5 francs per kilogram (about 44 cents per pound) for letters and post cards and 50 centimes per kilogram (about 4½ cents per pound) for other articles, these being the rates fixed by the Convention of the Universal Postal Union for a single sea transit of mails passing by sea from one country of the Postal Union to another.

There are only two exceptions to the foregoing rates of compensation, viz: (1) In the case of mails dispatched by sea to Canada the steamers

are allowed compensation at the rate of 1 cent per letter, the postage on letters for Canada being 2 cents per ounce; and (2) in the case of mails for the Australasian colonies the steamers are allowed compensation at the rate of $50,000 per annum, that sum being estimated to represent the postage collected on the articles based upon the weights of the mails dispatched during the preceding year, the rate of postage on letters for those colonies being 12 cents per one-half ounce, and the service being performed by vessels of United States register.

Settlement is made with steam-ship companies quarterly upon separate orders of the Postmaster-General, the companies being advised of the weights of the mails and the rates of compensation.

As a rule the mails are dispatched to foreign countries by every steamer whose services are tendered to this Department for that purpose. In the case of competing vessels, sailing for the same destination at about the same time, the mails are invariably awarded to that vessel which from its previous record of speed will probably deliver the mails soonest at destination.

As to Cuba, above mentioned, I have the honor to state that there is a domestic contract in force with Henry B. Plant for the conveyance of the mails between Cuba and Tampa and Key West, Fla. A copy of this contract, containing detailed information upon this subject, is herewith transmitted. This contract, I may add, was made under authority of the act of Comgress approved March 3, 1885, which reads as follows:

> The Postmaster-General is authorized to contract for inland and foreign steam-boat mail service, when it can be combined in one route, where the foreign office or offices are not more than 200 miles distant from the domestic office, on the same terms and conditions as inland steam-boat service, and pay for the same out of the appropriation for inland steam-boat service.

I am respectfully, your obedient servant,

JNO. WANAMAKER,
Postmaster-General.

Hon. THOMAS B. REED,
Speaker of the House of Representatives.

ROUTE NO. 16091.—*Steam-boat service.*

These articles of contract, made this third day of May, in the year one thousand eight hundred and ninety, between the United States of America (acting in this behalf by the Postmaster-General) and Henry B. Plant, of New York, N. Y., and Henry Sanford and Walter S. Chisholm, sureties.

Witness, that whereas the said H. B. Plant has been accepted according to law as contractor for transporting the mails on route No. 16091, from Port Tampa, by Key West, Fla., to Havana, Cuba, and return, touching at Key West each way, in safe and suitable steam-ships, said steam-ships being hereinafter particularly mentioned, and by a schedule satisfactory to the Department, for and during the term of two years, commencing on the first day of July, 1890, and ending on the thirtieth day of June, 1892, three times a week from November 1 to April 30 of each year and twice a week from May 1 to October 31 of each year, for the sum of fifty-seven thousand five hundred and seventy-eight dollars and seventy-four cents ($57,578.74) per annum. Now, therefore, the said contractor and his sureties do jointly and severally undertake, covenant, and agree with the United States and do bind themselves.

First. To carry the mails of the United States, and such other mails of whatever origin or country, regardless of character, size, weight, or increase, during the term of this contract as may, by or under authority of the Postmaster-General, be ordered carried either way by a schedule of departures and arrivals to be prescribed by the Postmaster-General, and not to exceed twenty-five hours' running time each way, except a reasonable time for stopping at and coaling at Key West, subject to the

approval of the Postmaster-General, but to continue no longer than such arrangement shall be necessary unless the same be altered by the Postmaster-General, and so to carry said mails until said schedule is altered by the authority of the Postmaster-General, as hereinafter provided; and then to carry according to said altered schedule; and the schedule may be changed from time to time, or at any time the Postmaster-General may think the interests of the service to require it, without any allowance or additional pay; provided the schedule made shall not require the mails or any part thereof to be delivered in the port of Havana between sunset and sunrise, unless the consent of the public authorities at that port shall be given, so that the vessel may enter and depart at the time fixed by the Postmaster-General.

Second. The mails to be carried within the meaning of this contract are all such mails of the United States, or of any other Government, that the Postmaster-General shall require to be carried.

Third. To carry said mail in a safe and secure manner, free from wet and other injury, and in separate and convenient apartments on each steam-ship, to be suitably fitted up under the order and to the satisfaction of the Postmaster-General at the expense of the contractor, for the assorting and safe-keeping of the mail, and for the sole and exclusive occupation, use, and accommodation of the Post-Office Department and its agent or postal clerk, with suitable accommodations for sleeping for the exclusive use of the agent or clerk; to convey such agent or clerk on every trip, and furnish him with the board and all privileges of a first-class cabin passenger whenever the Postmaster-General shall deem the public interests to require such agent or clerk to be on any such vessel. In case the contractor fails to furnish such suitable accommodations, the Postmaster-General shall have the right to provide a separate and convenient apartment, or other suitable accommodations, at the expense of the contractor, and to impose such fine or reduction as he shall deem fit.

Fourth. To take the mail and every part of it, from, and deliver it, and every part of it, into the post-office at Key West, and in Havana, in accordance with the custom and rules of that port, and from and into the post-office and railroad station or postal-car at port Tampa, Fla., as may be required at any time.

Fifth. The steam-ships to be used in the performance of this service shall be the *Mascotte* and the *Olivette*, now sailing on said route; and in the event of the loss or disability of either or both of said steam-ships, the steam-ships substituted therefor shall be safe, suitable, and satisfactory to the Postmaster-General, and equal in all respects to the *Mascotte* or *Olivette* or both, in passenger capacity and accommodations, tonnage and sea-going qualities, and adequate to make the speed required to perform this contract acceptably to the Postmaster-General.

Sixth. Whenever no agent or postal clerk shall be provided on any trip or vessel to have on board a suitable person who shall be an officer of the steam-ship, for whom the contractor shall be answerable, to whom the said contractor shall commit the care and transportation of the mail, and be accountable to the United States for any damages which may be sustained through his unfaithfulness or want of care; and the said contractor shall discharge any employé in charge of said mail whenever required to do so by the Postmaster-General; also, he will not transmit, by himself or his agent, or be concerned in transmitting, intelligence more rapidly than by mail; and that he will not carry out of the mail letters, newspapers, or other mailable matters which should go by post; and that he will not knowingly convey any person carrying on the business of transporting letters or other mail matter without the consent of the Postmaster-General; and further, that the said contractor will convey, without additional charge, post-office blanks, mail bags, mail keys, and post-office supplies and materials, and also any post-office inspector traveling on the business of the Department on presentation of his credentials. In the event of there being no mail agent of the Department on any steam-ship employed in the performance of this service, an officer of the steam-ship, duly sworn, as provided by the act of March 3, 1874, shall have custody of and attend to the receipt and delivery of the mail without further charge.

Seventh. They further undertake, covenant, and agree with the United States, that the said contractor will collect quarterly, if required by the Postmaster-General, of postmasters on said route, the balances due from them to the United States and faithfully render an account thereof to the Postmaster-General in the settlement of quarterly accounts, and pay over to the United States all balances remaining in his hands.

Eighth. It is hereby further stipulated and agreed by the said contractor and his sureties that in the event of mails of any foreign Government being sent by or upon any steam-ship employed in the performance of service under this contract, or any steam-ship of the said contractor, the sum received, if any, by the contractor or said steam ship for the conveyance of any and all such foreign mails, shall be accounted for, belong, and be paid to the United States of America, it being the express purpose of this contract to make every steam-ship on said route the sea-going mail carrier of the United States, solely, in both directions.

Ninth. The Postmaster-General may increase, extend, or change the service, he allowing not to exceed pro rata increase of compensation, within the restrictions imposed by law, for the additional service required; the Postmaster-General may also curtail, reduce, or discontinue the service in whole or in part, he allowing one month's extra pay on the amount dispensed with, and not to exceed pro rata compensation for the service retained.

Tenth. It is hereby also stipulated and agreed by the said contractor and his sureties, that in all cases there may be a forfeiture of the pay of a round trip when the trip is not run; and of not more than three times the pay of a trip when the trip is not run, and no sufficient excuse for the failure is furnished; a forfeiture of at least one-fourth part of the pay of a round trip when the running is so far behind time as to lose connection with a depending mail, unless it is shown that the same was not caused by neglect or want of proper skill, or misconduct; and a forfeiture of a due proportion of it when a grade of service is rendered inferior to the mode of conveyance above stipulated for; and that these forfeitures may be increased into penalties of a higher amount, according to the nature or frequency of the failure, and the importance of the mail; also, that fines may be imposed upon the contractor, unless the delinquency be satisfactorily explained to the Postmaster-General in due time; for failure to take from or deliver at a post-office the mail or any part of it; for suffering it to be wet, injured, lost, or destroyed; for carrying it in a place or manner that exposes it to depredation, loss, or injury, by being wet or otherwise; for refusing, after demand, to convey a mail by any steam-ship which the contractor runs, or is concerned in running, on the route, beyond the number of trips above specified; or for not arriving at the time set in the schedule, unless not caused by neglect or want of proper skill, or by misconduct; and for setting up or running an express to transmit letters or intelligence in advance of the mail, or for transporting, knowingly, or after being informed, any one engaged in transporting letters or mail matter, in violation of the laws of the United States, a penalty of fifty dollars may be exacted for each offense, and for each article so carried. Also, for the loss and destruction of any mail, a penalty may be imposed in a sum not to exceed one and a fourth times the value of the contents lost thereby; provided the loss be occasioned by the fault of the contractor, his agent, or employé.

Eleventh. And it is hereby further stipulated and agreed by the said contractor and his sureties that the Postmaster-General may annul the contract for repeated failures; for violating the Post-Office Laws or Regulations; for disobeying the instructions of the Department; for refusing to discharge any person having charge of the mail by his direction, when required by the Department; for setting up or running an express as aforesaid; or for transporting persons conveying mail matter out of the mail as aforesaid; or whenever the contractor shall become a postmaster, assistant postmaster, or member of Congress, or shall admit to any share or part of, or any benefit to arise from, this contract any Member of, or Delegate to Congress; or whenever, in the opinion of the Postmaster-General, the service can not be safely continued, the revenues collected, or the laws maintained on the route herein named; and this contract shall be subject to all the conditions imposed by law and by the several acts of Congress relating to post-offices and post-roads.

For which services, when performed and satisfactory evidence thereof shall have been filed with the Postmaster-General, the United States of America (acting in this behalf by the Postmaster-General), will pay the said Henry B. Plant, contractor, at the rate of fifty-seven thousand five hundred and seventy-eight dollars and seventy-four cents ($57,578.74) per annum for the aforesaid contract term, to-wit, quarterly, in the months of November, February, May, and August of each year, beginning with November, 1890, or as soon thereafter as accounts can be stated and settlements made, through the postmasters on the route or otherwise, at the option of the Postmaster-General; said pay to be subject, however, to be reduced or discontinued by the Postmaster-General, as hereinbefore stipulated, or to be suspended in case of delinquency.

In witness whereof the said Postmaster-General has caused the seal of the Post-Office Department to be hereto affixed, and has attested the same by his signature; and the said contractor and his sureties have hereunto set their hands and seals the day and year set opposite their names respectively.

Signed, sealed, and delivered by the Postmaster-General in the presence of ——— ———, and the interlineation of the word "port," in the eighth line of page 1 and in the eleventh line of page 3, of the words "or clerk," in the twenty-sixth line of page 2, and the words "or both," in the fourteenth line of page 3, made before signing.

Signed this 18th day of June, 1890.

JNO. WANAMAKER,
Postmaster-General.

And by other parties hereto in the presence of—
G. H. TILLEY,
S. LOUGHMAN,
Witnesses.

Signed this seventh day of June, 1890.

HENRY B. PLANT,
Contractor.

Signed this seventh day of June, 1890.

HENRY SANFORD,
Surety.

Signed this seventh day of June, 1890.

WALTER S. CHISHOLM,
Surety.

POST OFFICE, *New York, June* 14, 1890.

I hereby certify that Henry Sanford and Walter S. Chisholm are good and sufficient sureties for the amount of the foregoing contract.

C. VAN COTT,
Postmaster.

I, Henry B. Plant, do solemnly swear that I will faithfully perform all the duties required of me, and abstain from everything forbidden by the laws in relation to the establishment of the post-offices and post-roads within the United States, and that I will honestly and truly account for and pay over any money belonging to the said United States which may come into my possession or control; and I also further swear that I will support the Constitution of the United States: so help me God.

HENRY B. PLANT.

Sworn before the subscriber, Cornelius Van Cott, postmaster at New York, State of New York, this 14th day of June, 1890; and I also certify that the person above named is above the age of twenty-one years to the best of my knowledge and belief.

C. VAN COTT,
Postmaster at New York, N. Y.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 459.

PUBLIC BUILDING AT DAYTON, OHIO.

LETTER

FROM

THE ACTING SECRETARY OF THE TREASURY,

INCLOSING

A letter from the Supervising Architect, requesting that an appropriation of $10,000 on account of the public building at Dayton, Ohio, may be included in the deficiency bill.

AUGUST 15, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., August 14, 1890.

SIR: I have the honor to inclose for appropriate action copy of a letter this day addressed to me by the Supervising Architect of this Department, requesting that an appropriation, in amount $10,000, on account of the public building at Dayton, Ohio, may be included in the deficiency bill.

Respectfully, yours,

O. L. SPAULDING,
Acting Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES,
Washington, D. C.

TREASURY DEPARTMENT,
OFFICE OF THE SUPERVISING ARCHITECT,
Washington, D. C., August 14, 1890.

SIR: I have the honor to request your consideration of the matter of a further appropriation on account of the construction of the post-office, etc., at Dayton, Ohio.

In brief, I may state that an item of $10,000 for the building named was included in the deficiency estimate, Executive Document 174, but during the interval a bill was introduced for an appropriation to increase the size of the building, and no provision was made for the appropria-

tion of $10,000 asked. It is believed that no further action has been taken in regard to this extension of limit, and as all preliminary arrangements have been perfected to invite proposals for the supply of the interior finish as originally contemplated, it is submitted that an item of $10,000 should be included in the deficiency bill to enable proper procedure with the work.

Respectfully, yours,

JAS. H. WINDRIM,
Supervising Architect.

Hon. WILLIAM WINDOM,
Secretary of the Treasury, Washington, D. C.

PUBLIC BUILDING AT KEY WEST, FLORIDA

LETTER

FROM

THE ACTING SECRETARY OF THE TREASURY,

INCLOSING

A letter from the Supervising Architect requesting that an appropriation of $10,000 on account of the public building at Key West, Fla., may be included in the deficiency bill.

AUGUST 15, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., August 14, 1890.

SIR: I have the honor to inclose for appropriate action copy of a letter this day addressed to me by the Supervising Architect of this Department requesting that an appropriation in amount $10,000 on account of the public building at Key West, Fla., may be included in the deficiency bill.

Respectfully, yours,

O. L. SPAULDING,
Acting Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES,
Washington, D. C.

TREASURY DEPARTMENT,
OFFICE OF THE SUPERVISING ARCHITECT,
Washington, D. C., August 14, 1890.

SIR: I have the honor to request that some favorable consideration may be given to a further appropriation on account of the court-house and post-office at Key West, Fla.

In explanation I may state that the original estimate for the building named provided for the heating of the building by furnace, and made no provision for the supply of an elevator.

In view of the fact that the third story will be occupied by important officers connected with the Customs and Internal Revenue Depart-

ment it is proper that an elevator should be supplied for the building, in which event the proposed use of furnace should be abandoned and in lieu thereof a steam-heating apparatus be supplied, jointly utilizing the force necessary to run the elevator.

To permit of this action indicated being taken a further appropriation of $10,000 will be necessary, and I have the honor to request that this amount may be included in the deficiency bill.

Respectfully, yours,

JAS. H. WINDRIM,
Supervising Architect.

Hon. WILLIAN WINDOM,
Secretary of the Treasury, Washington, D. C.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 461.

PUBLIC BUILDING AT WINONA, MINN.

LETTER

FROM

THE ACTING SECRETARY OF THE TREASURY,

INCLOSING

A letter from the Supervising Architect requesting an appropriation of $10,000 on account of a public building at Winona, Minn., may be included in the deficiency bill.

AUGUST 15, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., August 14, 1890.

SIR: I have the honor to inclose for appropriate action copy of a letter this day addressed to me by the Supervising Architect of this Department, requesting that an appropriation, in amount $10,000, on account of the public building at Winona, Minn., may be included in the deficiency bill.

Respectfully, yours,

O. L. SPAULDING,
Acting Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES,
Washington, D. C.

TREASURY DEPARTMENT,
OFFICE OF THE SUPERVISING ARCHITECT,
Washington, D. C., August 14, 1890.

SIR: I have the honor to invite your attention to the appropriation for the court-house, post-office, etc., at Winona, Minn.:

The limit of cost for the building named is		$150,000
Appropriation made	$100,000	
Appropriation contemplated by sundry civil bill	40,000	
		140,000
Leaving a balance to be appropriated under the limit		10,000

In view of the fact that under favorable conditions it has become feasible to secure betterments of the building and in order to permit contract being made for the heating apparatus and so secure the entire completion of the building during the early part of the coming year, the time for completion, March 1, 1891, having been fixed by contract, I respectfully ask that favorable action may be taken by including in the deficiency bill an amount of $10,000, and thus appropriate all money contemplated by the limit and as requested in the regular estimates.

Respectfully, yours,

JAS. H. WINDRIM,
Supervising Architect.

Hon. WILLIAM WINDOM,
Secretary of the Treasury, Washington, D. C.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 462.

INCREASE OF FORCE IN KITTERY NAVY-YARD.

LETTER

FROM

THE SECRETARY OF THE NAVY,

IN REPLY

To a resolution of the House of Representatives of August 5, 1890, relative to an increase of force at the Kittery navy-yard.

AUGUST 27, 1890.—Referred to the Committee on Rules.

NAVY DEPARTMENT,
Washington, August 18, 1890.

SIR: I have the honor to acknowledge the receipt, on the 11th instant, of the following resolution of the House of Representatives, adopted August 5, 1890:

Resolved, That the Secretary of the Navy be directed to inform the House of the necessity of increasing the force employed at the Kittery navy-yard, near Portsmouth, N. H., at this time, as ordered by the Department; whether the best interests of the public service require that the buildings destroyed by fire in January last should be reconstructed; whether the gunnery-ship *Lancaster* should be completed; whether repairs and alterations should be made on the training-ship *Monongahela;* whether there is any necessity for increasing at this time the water supply and completing the hydrant system at said navy-yard, and for constructing a ferry-boat thereat; whether the contemplated employment of such increased force at said navy-yard at this time is or is not intended to affect the approaching Congressional election in the State of Maine, rather than to subserve the public interests, and to inform the House the reasons for said order and of any precedents therefor.

In reply to the above inquiry I have the honor to state that the necessity for an increase in the working force in the month of July was due to the fact that the appropriations for the current fiscal year, provided by the act of June 30 last, became available July 1. Of these appropriations some were to be applied to new work specifically directed by the act; others to new work authorized in general terms, which could only be undertaken when the funds for the new fiscal year became available; others again to partly completed work which had been suspended in the month of May and June, owing to the exhaustion of appropriations then current. To whichever class the work belonged, it involved an increase of the force during the month of July.

Under the act approved June 30, 1876—

No increase of the force at any navy-yard shall be made at any time within sixty days next before any election to take place for President of the United States, or member of Congress, except when the Secretary of the Navy shall certify that the needs of the public service make such increase necessary at that time, which certificate shall be immediately published when made.

The election in the State of Maine being fixed for the 8th of September, any increase between July 8 and September 8 of the force at the Portsmouth navy-yard, situated at Kittery, Me., could only be made after the publication of the certificate, and the following order and certificate were issued, July 23, in accordance with the law:

NAVY DEPARTMENT, *July* 23, 1890.

SIR: In compliance with your request of the 18th instant I have made a certificate, which is herewith inclosed, as to the necessity of increasing at this time the force at the navy-yard under your command for the purposes of reconstructing buildings numbered 45 and 46, destroyed by fire in January last, of completing the gunnery-ship *Lancaster*, of making necessary repairs and alterations of the training-ship *Monongahela*, increasing the water supply, completing hydrant system, and constructing a ferry-boat, the appropriations for which objects became available at the beginning of the current month.

The authority accompanies this for the publication of the certificates two times, consecutively, in the Chronicle, Portsmouth, N. H.

Very respectfully,

B. F. TRACY,
Secretary of the Navy.

The COMMANDANT OF THE NAVY-YARD,
Portsmouth, N. H.

CERTIFICATE.

JULY 23, 1890.

In compliance with the act of Congress approved June 30, 1876, I hereby certify that the needs of the public service make it necessary to increase at this time the force employed at the navy-yard, Portsmouth, N. H., for the purposes of reconstructing buildings numbered 45 and 46, destroyed by fire in January last, of completing the gunnery-ship *Lancaster*, of making necessary repairs and alterations of the training-ship *Monongahela*, increasing the water supply, completing hydrant system, and constructing a ferry-boat, the appropriations for which objects became available at the beginning of the current month.

B. F. TRACY,
Secretary of the Navy.

The changes in the force under all bureaus of the Portsmouth yard, as shown by the monthly returns, have been as follows: June 1, 1890, the force numbered 419, July 1, 347, August 1, 448; showing an increase of thirty over the normal strength of the force in June. The great decrease at the beginning of July, the close of the fiscal year, was due to exhausted appropriations. The increase of thirty will undoubtedly grow larger as the work progresses.

The precedents for the above certificate, which are called for in the resolution of inquiry, run back to the Presidential election in the year 1876, immediately following the passage of the act.

The records show that certificates have been issued in every election year since that time. The increase between September 1 and November 1 in these three years at the five principal yards, namely—Portsmouth, Boston, New York, Norfolk, and Mare Island—with the exception of 1876 and 1878, the records of which are imperfect, is as follows:

	Men.
1880	433
1882	949
1884	721
1886	857
1888	1467

The orders and certificates issued in the last-mentioned year (1888) were fifteen in number, of which two referred to Portsmouth. Several of these certificates are given in full, being those upon which the Department more particularly relied on the present occasion. The Portsmouth certificates are as follows:

NAVY DEPARTMENT,
Washington, August 10, 1888.

SIR: In accordance with your request of the 6th instant, you are authorized to increase the force at the yard one hundred and eighty men. The certificate required by law in the case is herewith inclosed, accompanied by an order for its publication in the Times, of Portsmouth, N. H.

Very respectfully,

W. C. WHITNEY,
Secretary of the Navy.

Capt. R. F. BRADFORD, U. S. N.,
Portsmouth, N. H.

NAVY DEPARTMENT,
Washington, August 10, 1888.

In compliance with an act of Congress approved June 30, 1876, I hereby certify that the needs of the public service make it necessary to increase, at this time, the force at the navy-yard, Portsmouth, N. H., for the prosecution of the work of repairs upon the *Portsmouth*, and for other necessary purposes.

W. C. WHITNEY,
Secretary of the Navy.

NAVY DEPARTMENT,
Washington, September 1, 1888.

SIR: In accordance with your request of the 30th ultimo, you are authorized to increase the force at the yard two hundred men.

The certificate required by law in the case is herewith inclosed, accompanied by an order for its publication in the Times, of Portsmouth, N. H.

Very respectfully,

D. B. HARMONY,
Acting Secretary of the Navy.

Capt. R. F. BRADFORD, U. S. N.,
Commandant, Navy-Yard, Portsmouth, N. H.

NAVY DEPARTMENT,
Washington, September 1, 1888.

In compliance with an act of Congress approved June 30, 1876, I hereby certify that the needs of the public service make it necessary to increase, at this time, the force at the navy-yard, Portsmouth, N. H., for the prosecution of the work upon the *Saratoga*, and for other necessary purposes.

D. B. HARMONY,
Acting Secretary of the Navy.

The total increase authorized at the Portsmouth yard under these orders was three hundred and eighty men.

Up to this time it had been customary to specify in the order or advertisement the number of men. On the 21st of September, 1888, the following order was issued.

To all yards:

Should it be necessary to ask an increase of force at the yard in pursuance of the act of June 30, 1876, the number of men need not be specified, but the work or job requiring the increase should be.

By direction of the Secretary of the Navy.

Very respectfully,

JNO. W. HOGG,
Chief Clerk.

In accordance with this order, the certificates issued immediately prior to the Presidential election of this year omitted the number of men required, and this precedent was followed in the present certificate.

The certificates of September and October, 1888, were as follows:

BOSTON.

NAVY DEPARTMENT, *September* 29, 1888

In compliance with an act of Congress approved June 30, 1876, I hereby certify that the needs of the public service make it necessary to increase, at this time, the force at the navy-yard, Boston, for the prosecution of the work under the appropriation "Water-pipes, navy-yard, Boston."

D. B. HARMONY,
Acting Secretary of the Navy.

Five other certificates were issued for various purposes at Boston, on October 4, 12, 15, 20, and 25.

BROOKLYN.

NAVY DEPARTMENT, *September* 15, 1888.

In accordance with an act of Congress approved June 30, 1876, I hereby certify that the needs of the public service make it necessary at this time to increase the force in the navy-yard, Brooklyn, N. Y., to work on building No. 7, the yard wall, and boiler-shop wing to machine-shop.

W. C. WHITNEY,
Secretary of the Navy.

Three other certificates were issued in reference to Brooklyn, as follows:

September 28, "for the prosecution of the work upon the *Yantic*, *Galena*, *Miantonomah*, and *Terror*, and for other necessary purposes."

October 5, "for work upon building No. 29, and to repair walls along the water front."

October 20, "for the purpose of handling supplies in the construction department."

One certificate was issued for Norfolk as follows:

NAVY DEPARTMENT, *September* 19, 1888.

In compliance with an act of Congress, approved June 30, 1876, I hereby certify that the needs of the public service make it necessary to increase, at this time, the force at the navy-yard, Norfolk, Va., for the prosecution of the work upon the *Pensacola* and for other necessary purposes.

W. C. WHITNEY,
Secretary of the Navy.

MARE ISLAND.

NAVY DEPARTMENT, *September* 20, 1888.

In compliance with an act of Congress, approved June 30, 1876, I hereby certify that the needs of the public service make it necessary to increase at this time the force at the navy-yard, Mare Island, Cal., for the prosecution of the work upon the *Ranger*, and for other necessary purposes.

W. C. WHITNEY,
Secretary of the Navy.

One other certificate was issued for Mare Island October 3, "for the prosecution of the work upon the *Mohican*, *Monongahela*, *Iroquois*, and *Monadnock*, and for other necessary purposes."

In reference to the specific works that are the subject of inquiry in the resolution, the Department replies as follows:

(1) Whether the best interests of the public service require that the buildings destroyed by fire in January last should be reconstructed.

In view of the fact that on the 30th of June, less than one month before the publication of the order covering this work, Congress directed the work by law, and emphasized its urgency by making the appropri-

ation immediately available, it would seem to be unbecoming in an Executive Department, whose duty is to obey and execute the law, to make any comment, even by way of answer to an inquiry, on the opinion thus clearly pronounced by the legislature.

The facts are as follows:

The buildings were destroyed by fire January 27, 1890. An appropriation to rebuild them was urgently asked for by the Chief of the Bureau of Construction, who stated February 26, 1890, that—

> A suitable building for wood-working machinery and a ship-fitter's shop should be erected on the site of the one burnt with as little delay as possible in the best interest of the Government; and to this end the bureau recommends that the Department be requested to ask that an amount sufficient for this purpose be inserted in the naval appropriation bill.

The Bureau of Yards and Docks on March 4, 1890, submitted an estimate for this object, and the act of June 30 appropriated therefor the sum of $50,000. The date of the passage of the act has reduced the time available for outdoor work, and it is clear that with the season so far advanced there should be no postponement in beginning the brick walls of these buildings.

(2) Whether the gunnery ship *Lancaster* should be completed.

The gunnery ship *Lancaster* should undoubtedly be completed, and with the least possible delay. The work was begun in October last. It was assigned to Portsmouth because Portsmouth has for eight years past been reserved for the repair of wooden vessels. Its progress prior to the 1st of July was obstructed by want of funds. At that date the new appropriations began to run, and the work will now be pushed to completion. The ship is in the dry-dock, her decks have been cut to receive new boilers, and a portion of her planking is being replaced. The materials for her decks are in part delivered and available for use.

The importance of this gunnery ship, fitted with a modern armament for the training of apprentices, can hardly be overestimated. The Chief of the Bureau of Navigation, Commodore F. M. Ramsay, states that—

> The training service has no ship with a modern battery. No cruising ship can be spared for this service.

In consequence of this defect, a large number of naval apprentices go through their course of training in absolute ignorance of the use and fittings of modern guns.

It may be added that the repair of the *Lancaster* has received express sanction from Congress, in the naval appropriation act of June 30, 1890, which contains the following item under the Bureau of Equipment:

> For installing the U. S. steam-ship *Lancaster* with an electric lighting plant, $10,000;

and which states that one of the items in the appropriation of $2,500,000 for armament, under the Bureau of Ordnance, is for "the armament with modern batteries of a gunnery training-ship."

(2) Whether repairs and alterations should be made on the training-ship *Monongahela*.

The necessity for repairs and alterations on the training-ship *Monongahela* is no less urgent. The bureau charged with the training of apprentices describes the exigency of the situation as follows:

> The training service at the present time is in a desperate state as regards means for instructing apprentices to supply the wants of the cruising ships. At present there are but two cruising training-ships, the *Portsmouth* and *Jamestown*. These vessels accommodate one hundred and thirty apprentices each. The period of instruction on

board of a cruising training-ship for apprentices is one year. The number authorized to be enlisted per annum is seven hundred and fifty. In order to supply the wants of the service a large number of apprentices must always be in training. Two more cruising training-ships are absolutely necessary for this purpose.

It being found that the *Monongahela* could be spared from duty as a store-ship in the Pacific, and that she was in fair condition, this vessel was ordered East, that she might be altered and used as a training ship for apprentices. She is a live-oak ship, and, if properly fitted at the start will last many years; will carry about two hundred and fifty apprentices, and will be superior in every way to the ships now being used for this purpose. At the present moment there are no apprentices available for the *Philadelphia*, *San Francisco*, and *Alert*, in consequence of not having ships in which to train them. There are a large number of apprentices at the training station at Newport, awaiting opportunity to go on training-ships.

It is respectfully urged that the *Monongahela* and *Lancaster* be fitted for this purpose with all possible dispatch.

It is hoped and believed that with proper training-ships, there will be no difficulty in supplying the wants of the service with American seamen. Without training-ships, we can only hope to supply our wants by enlisting such aliens as may choose to enter our service temporarily.

F. M. RAMSAY,
Chief of Bureau.

The selection of Portsmouth as the place of repairing the *Monongahela*, apart from the assignment of that yard to the repair of wooden vessels, has an additional reason in the fact that the vessel having been rebuilt there in 1867, all her patterns are at the yard and can be made available in work now required, as well as the fittings from her condemned sister ship, the *Juniata*.

(4) Whether there is any necessity for increasing at this time the water supply and completing the hydrant system at said yard, and for constructing a ferry-boat thereat.

The increase of the water supply and the completion of the hydrant system have been undertaken by the Department under the same authority that applied to the reconstruction of the burned buildings, namely, that in the act of Congress approved June 30, 1890, the work was specifically directed by law.

These improvements have been urgently recommended by the commandant of the yard, as shown by his last annual report, dated August 10, 1889, and by reports of the Chief of the Bureau of Yards and Docks. No better evidence of their urgency can be adduced than the fact that to the defective water supply was largely due the conflagration of January last, in which the two buildings now to be reconstructed were burned down.

The necessity of entering promptly upon the work in such a climate as that of Portsmouth, N. H., requires no demonstration. It involves the laying of water-pipes, ditching, cleaning out of supply ponds, and other out-door labor, which could not be done after the advent of frost.

Finally, in reference to the ferry-boat, the Department has to state that the boat in question is a launch 60 feet long, 14 feet beam, and 4 feet 3 inches draught, to be used in carrying persons employed at the yard and mails to and from the city of Portsmouth. The boat now in use has been running for twenty years, and the Bureau of Construction reports it as unsound. The Department approved the plan June 2, 1890, upon the following recommendation of the commandant of the navy-yard, dated May 20:

I have to call the attention of the Bureau to the necessity of extensively repairing the ferry-boat *Emerald* at this yard. She has been in continuous service for abont twenty years, receiving at intervals slight repairs, as necessity and opportunity permitted.

Owing to the generally unsound condition of the boat, both externally and internally, to the extensive repairs reqnired to place her in proper condition, and to the cost involved, I would respectfully suggest, as a matter of economy, that a boat be bu[illegible]ke her place.

If the Bureau favors the proposition, and work on the new boat is commenced at an early date, the *Emerald* could in the meantime, with care, be kept on the route with slight repairs.

Very respectfully,

J. S. SKERRETT,
Commodore, U. S. Navy, Commandant.

(5) Whether the contemplated employment of such increased force at said navy-yard at this time is or is not intended to affect the approaching Congressional election in the State of Maine rather than to subserve the public interests.

This question calls upon the Department to explain its motives in undertaking these particular works at this place and at this time.

The statement of facts already given shows:

(1) That as to the six works that are the subject of inquiry all were urgently required by the exigencies of the service and four had been specifically directed by Congress.

(2) As to the place selected for these works, that three of them, the repairs of the *Lancaster* and of the *Monongahela*, and the building of the launch, were assigned to Portsmouth as the yard which for many years had been reserved for works of this character; that the assignment of the *Lancaster* was made eleven months prior to the approaching election, and that good and sufficient reasons, apart from the usual employment of the Portsmouth yard, made the assignment expedient in the case of the *Monongahela*. As to the remaining works, that is to say, the reconstruction of the buildings, the completion of the water supply and hydrant system, at Portsmouth, all of which were specifically ordered by Congress, it is clear that the Department could not have selected any other place for their performance.

(3) As to the time appointed to do the work, which happens to be coincident with the approach of a Congressional election, the course of legislation prevented any work before the 1st of July, and the local climate is such that it would have been sheer negligence in the Department to have postponed it until the middle of September.

In view, however, of the character of this interrogatory, in which the House of Representatives, in direct terms, asks the head of an Executive Department whether he has or has not been guilty of a gross abuse of power in public administration, I deem it proper, in terms equally direct, to deny that the contemplated employment of such increased force at said navy-yard is intended to affect the approaching Congressional election in the State of Maine rather than to subserve the public interests, or that any increase of force at any time has been or will be made by the Navy Department, under its present administration, for the purpose of influencing an approaching election, or for the purpose of electing or defeating any particular candidate; and I have the honor to add that the Navy Department, while pursuing steadily this policy, does not propose that the progress of public work, directed by law and by law committed to its charge, shall be interrupted or postponed by the occurrence of an election, or that it shall be deterred from the performance of what it believes to be its duty by any fear that unjust and unfounded suspicions may call in question the motives of its action.

Very respectfully,

B. F. TRACY,
Secretary of the Navy.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. Doc. No. 463.

FRAUDS UPON THE POST-OFFICE DEPARTMENT.

LETTER

FROM

THE POSTMASTER-GENERAL,

TRANSMITTING

Facts and papers in answer to House resolution of August 16, 1890, *reciting that frauds were charged to have been practiced upon the Post-Office Department by one Alexander J. Wedderburn.*

AUGUST 29, 1890.—Referred to the Committee on the Post-Office and Post-Roads.

OFFICE OF THE POSTMASTER-GENERAL,
Washington, D. C., August 28, 1890.

SIR: On the 16th instant a resolution was adopted in the House of Representatives reciting that it had been charged in the columns of responsible journals that gross frauds had been practiced on the Post-Office Department by one Alexander J. Wedderburn, in connection with the transmission through the mails of a large number of newspapers entitled "The National Farm and Fireside," at one-eighth of the rates established by law; that said newspapers, printed in Alexandria, Va., were mailed at a post-office called Grange Camp, established at the request of Wedderburn, one of whose employés was postmaster; that an investigation of these facts had been made by the Post-Office Department, with the result of discontinuing the said post-office; that it had been asserted that criminal proceedings were not instituted against Wedderburn, the Department of Agriculture having interposed in his behalf; and requesting the Postmaster-General to transmit to the House all the facts in possession of the Post-Office Department in this matter, including the reports of the post-office inspectors, together with any correspondence had with the Department of Agriculture.

A copy of this resolution, signed by the Clerk of the House, reached this Department on Monday the 18th instant. I had left the city for a few days on the preceding Friday, the 15th instant, and the Third Assistant Postmaster-General, who, in addition to myself, alone had full knowledge of all the facts in this case, was absent at the death-bed of his mother, having left Washington on the 9th instant. Immediately upon my return I caused the papers to be prepared, and have the honor to submit them to you herewith, in answer to the call of the House of Representatives.

This Department has had no correspondence in this matter with the Department of Agriculture.

The facts in this case may be briefly summarized as follows: Grange Camp is not a city, town, or village, nor a place of resort, except that once a year an agricultural fair is held there for a period of about two weeks. It is a flag station on the railroad, distant in one direction a mile from the next post-office, and in another direction a mile and a half. There is no commercial or private business transacted at that place. There were but two families permanently accommodated by the post-office, in addition to the proprietor of a weekly paper, nominally issued there, but, in reality, published at Alexandria, Va., and one of these families receives part of its mail through a rented box at a neighboring post-office. The only person really benefited by the continuance of the office was Mr. A. J. Wedderburn, proprietor of "The National Farm and Fireside," the editions of which, printed at Alexandria, he has been regularly sending by express to Grange Camp, to be mailed through that post-office.

The Department's investigation discloses that the post-office was originally established through the exertions of Mr. Wedderburn, April 22, 1887; that an order for its discontinuance was made April 16, 1888, which order was rescinded April 24, 1888, and that the person appointed to be postmaster, and who served as such until the office was discontinued, was not a resident of the place, performed none of the duties of the office, and was postmaster in name only. The business of the post-office was performed by one of Mr. Wedderburn's employés, who permitted Wedderburn to obtain his supplies of postage-stamps on credit, and to mail issues of his paper without requiring advance payment of postage, both of these being acts in violation of plain provisions of the statutes, and is alleged to have received all the emoluments of the office. Mr. Wedderburn, therefore, although not an employe of the postal service, was absolute director of the post-office at Grange Camp, mailed his papers there in unlimited quantities, and brought or sent there other mail matter from Alexandria and from Washington, thus swelling the amount of his stamp cancellations, exercising all the power of the postmaster, realizing all its benefits, and being almost its sole patron. It thus resulted that while the receipts of the office during the time it was in existence amounted to $1,495.81, $1,215.02, or 81 per cent. of the whole, went to pay the commissions of the postmaster. The receipts from other business than that of Mr. Wedderburn averaged a little more than two cents a day. Because the salaries of the post-offices at Washington, D. C., and Alexandria, Va., are fixed by law, and the compensation of the respective postmasters is not a variable sum, dependent upon the cancellations of stamps, the whole, or nearly the whole, amount of these commissions, $1,215.02, paid on cancellations of mail matter diverted from the two offices mentioned, was a complete loss to the Government.

Upon these facts, developed by post-office inspectors, the post-office at Grange Camp was discontinued.

The paper above mentioned has not yet been denied admission at second-class rates. That matter is still under consideration, and the Department is awaiting further proofs.

The question as to the prosecution of Mr. Wedderburn has been submitted to the Attorney-General for his opinion.

For convenience, a list of inclosures is given below.

I have the honor to be, very respectfully, your obedient servant,

JNO. WANAMAKER,
Postmaster-General.

Hon. THOMAS B. REED,
Speaker of the House of Representatives.

LIST OF INCLOSURES.

A.—Correspondence in Office of Third Assistant Postmaster-General.
1. Third Assistant to Chief Inspector, May 22, 1890.
2. Third Assistant to postmaster Grange Camp, June 17, 1890.
3. Third Assistant to First Assistant, June 17, 1890.
4. Third Assistant to postmaster, Grange Camp, June 20, 1890.
5. Third Assistant to Chief Inspector, June 20, 1890.
6. Third Assistant to Mr. Wedderburn, June 27, 1890.
7. Mr. Wedderburn to Postmaster-General, August 13, 1890.
8. Memorandum as to compensation of postmaster at Grange Camp and amount of postage paid on "National Farm and Fireside."
9. Specimens of "National Farm and Fireside."

B.—Papers in Office of First Assistant Postmaster-General.
1. Original jacket and inclosure in matter of first establishment of office at Grange Camp, April 22, 1887.
2. Jacket and inclosures in regard to discontinuance of office at Grange Camp, April 16, 1888, and the subsequent rescinding of that order, April 24, 1888.
3. Jacket and inclosures in regard to discontinuance of post-office at Grange Camp, June 25, 1890.
4. Jacket and inclosures (not acted upon) in regard to the re-establishment of the post-office at Grange Camp, July 8, 1890.
5. Postmaster Dunn-Loring to First Assistant Postmaster-General, reporting closing of Grange Camp office, June 25, 1890.
6. Letters from Hon. E. H. Conger, M. C.; Hon. E. H. Funston, M. C.; Hon. E. P. Allen, M. C.; Hon. M. B. Wright, M. C.; postmaster Alexandria, Va.; Mr. R. R. Farr, Fairfax C. H. Va.; Mr. Albert Peacock, Lewinsville Va.; and reply of Third Assistant Postmaster-General, July 16, 1890.
7. Report of Inspector Arrington, July 9, giving reasons why post-office at Grange Camp should not be re-established.
8. Letter from Hon. A. Paddock, United States Senate, to Postmaster-General, July 16, 1890.

C.—Papers in Office of Chief P. O. Inspector.
1. Report of Inspector Arrington, July 12, 1890.
2. Report of Inspector Arrington, July 31, 1890.
3. Statement of A. J. Wedderburn, June 20, 1890.
4. Statement of A. J. Wedderburn, June 24, 1890.
5. Statement of A. J. Wedderburn, to editor Star.
6. Third Assistant Postmaster-General to Chief Inspector, June 20, 1890.
7. Chief Inspector to Inspector King, July 8, 1890.
8. Inspector Arrington to Inspector King, July 12, 1890.
9. Application for admission of "Farm and Fireside" at second class rates, through Alexandria post-office.
10. Chief Inspector to Inspector King, June 21, 1890.
11. Chief Inspector to Inspector King, July 16, 1890.
12. A. Freeman to Postmaster-General, July 15, 1890.
13. Hon. A. S. Paddock, United States Senate, to Postmaster-General, July 7, 1890.
14. Reply of Postmaster-General to Senator Paddock, July 15, 1890.

D. 1.—Copy of resolution of the House of Representatives, August 16, 1890.

A.—CORRESPONDENCE IN OFFICE OF THIRD ASSISTANT POSTMASTER-GENERAL.

POST-OFFICE DEPARTMENT,
OFFICE OF THE THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., May 22, 1890.

SIR: The National Farm and Fireside was accepted for entry and mailing as second-class matter at Grange Camp, Va., November 8, 1887.

It has recently been represented to this office:

That it is printed at Alexandria, Va., and sent to Grange Camp by express, and there mailed at the pound rate of postage.

That much of the business of the publication is transacted through post-office box 33 (?), Washington, D. C.

That the legitimate circulation of the paper does not exceed from 300 to 500 copies.

That from 10,000 to 15,000 copies of each issue are being mailed, and that the so-called sample copies are paid for at the rate of 3 cents apiece by John P. Squire & Co., of Boston, Mass., who are advertisers, and are circulating it for the purpose of influencing legislation on a bill now pending before Congress.

That each issue contains a blank petition, which each reader is requested to sign and return.

That Mr. W. W. Kimball, of Boston, Mass., now in this city, is the agent of Squire & Co., and that sample copies are mailed under his direction.

That the publisher of the National Farm and Fireside mails his correspondence at Grange Camp, Va., having an arrangement with the postmaster by which he receives all the emoluments of the office in excess of an amount agreed upon, which is paid the daughter of the postmaster, who is assistant.

That the Department is being defrauded by the improper diversion to that place of business properly belonging to Washington and Alexandria.

I will thank you to cause an early and thorough investigation of all the facts in the case.

Yours, very respectfully,

A. D. HAZEN,
Third Assistant Postmaster-General.

E. G. RATHBONE, Esq.,
Chief Inspector, Post-Office Department.

POST-OFFICE DEPARTMENT,
OFFICE OF THE THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., June 17, 1890.

SIR: The National Farm and Fireside, published at your place, has been decided by this office, after consideration of the application and papers submitted by the publishers, to be not entitled to admission into the mails at the second-class rate of postage, under the provisions of Paragraph 4, Section 328, Postal Laws and Regulations.

You are directed to inform the publishers of the action of the Department, and to require postage at the third-class rate on all copies of the publication presented for mailing at your office.

Yours, very respectfully,

A. D. HAZEN,
Third Assistant Postmaster-General.

POSTMASTER, *Grange Camp Va.*

POST-OFFICE DEPARTMENT,
OFFICE OF THE THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., June 17, 1890.

DEAR SIR: I beg leave to submit herewith a copy of a report of P. O. Inspector T. M. Arrington, in case of the National Farm and Fireside, a weekly newspaper that purports to be published at Grange Camp, Va. In accordance with the recommendation of the inspector the privileges of the second-class rates of postage have been withdrawn from the publication.

As this appears to be a case where the post-office has been run in the interest of the publisher of the paper, I respectfully recommend that the office be discontinued.

Very respectfully,

A. D. HAZEN,
Third Assistant Postmaster-General.

Hon. J. S. CLARKSON,
First Assistant Postmaster-General.

POST-OFFICE DEPARTMENT,
OFFICE OF THE THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., June 20, 1890.

SIR: The order sent you yesterday, withdrawing the privilege of entry as second-class matter at your office of the National Farm and Fireside, is hereby modified so far (and no farther) as to permit the publisher to mail the edition of the paper for this week.

Yours, very respectfully,

A. D. HAZEN,
Third Assistant Postmaster-General.

POSTMASTER, *Grange Camp, Va.*

POST-OFFICE DEPARTMENT,
OFFICE OF THE THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., June 20, 1890.

SIR: In compliance with your verbal request of yesterday I return herewith the report of Post-Office Inspector Arrington relative to the status of the National Farm and Fireside, published at Grange Camp, Va., and of the post-office at that place. I send you also copy of a report made on the 2d of March, 1888, by Post-Office Inspector W. S. Ridgely upon the affairs of the post-office at Grange Camp, which exhibits a state of things at that time somewhat similar to what is shown by the report of Inspector Arrington. It seems that shortly after the receipt by this office of Inspector Ridgely's report, namely on March 20, 1888, a copy of it was transmitted to the First Assistant Postmaster-General with a recommendation for the discontinuance of the office, and that an order to discontinue was made on the 16th of April, 1888, but rescinded ten days afterwards.

I inclose also copies of two applications made by Alexander J. Wedderburn, publisher of the National Farm and Fireside, for the entry of that paper at Grange Camp, Va., and for the entry at Alexandria, Va., of what is called the Virginia edition of the National Farm and Fireside; and although this office is not aware of any fraud in connection with these applications it may be that upon special investigation fraud will be discovered. I should be glad to have you specially investigate the status of the Virginia edition of the National Farm and Fireside, with the view of discovery whether it is advisable to exclude it from the mails as second-class matter.

There is still another paper, it seems—"The Progress"—published at Alexandria, Virginia, by Mr. Wedderburn, the status of which it might be well to inquire into.

I send also paper showing sales, cancellations, and commissions of the postmaster at Grange Camp from the second quarter of 1887 to the fourth quarter of 1889, inclusive, and suggest that inquiry be made to ascertain whether the postmaster, or his assistants or agents, have been guilty of making false returns, in order to increase the compensation of the office.

In transmitting to you the above-mentioned papers, I beg leave to call your attention to the fact that the present assistants of the postmaster at Grange Camp, a Mr. Swayze and his daughter, have, according to Inspector Arrington's report, been habitually violating the act of Congress of June 17, 1878, in selling stamps to the publisher of the National Farm and Fireside, Alexander J. Wedderburn, without requiring payment therefor in cash, an offense which is punishable by fine or imprisonment, and which would seem to be in this case of sufficient gravity to warrant a criminal prosecution of the offenders.

After the investigation is completed, I should be glad to have you communicate the result to this office.

Yours, very respectfully,

A. D. HAZEN,
Third Assistant Postmaster General.

E. G. RATHBONE, Esq.,
Chief Post-Office Inspector, Washington, D. C.

POST-OFFICE DEPARTMENT,
OFFICE OF THE THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., June 27, 1890.

SIR: Pending a further investigation, which has been directed, into the status of your paper (the National Farm and Fireside), heretofore entered and mailed as second-class matter, the order recently issued excluding it from the privileges of second-class matter has been suspended until further notice. Since, however, the post-office at Grange Camp has been discontinued, your right to mail the paper at another post-office can be decided only through a new application.

Yours, very respectfully,

A. D. HAZEN,
Third Assistant Postmaster-General.

A. J. WEDDERBURN, Esq.,
Alexandria, Va.

WASHINGTON, D. C., *August* 13, 1890.

DEAR SIR: The letter sent by General Hazen to various members of Congress, and others who have recommended the re-establishment of the post-office at Grange Camp, Virginia, based doubtless upon the information received from the "intelligent In-

spector of the Department" to whom the case was intrusted, is so full of erroneous statements, and naturally so misleading in consequence, that I feel constrained to direct attention thereto.

Presuming from the prompt and just manner in which you acted in ordering the revocation of General Hazen's ord r to suppress my paper that you desire to act without prejudice and with entire justice, I shall ask your attention to the following facts:

The Latin motto *falsus in unum, falsus in omnibus* would certainly easily discredit the report of your "intelligent Inspector" were only one of his statements capable of contradiction; but of the fifteen reasons given for discontinuing the office it appears to me that only one is of sufficient importance to need consideration, except those which can readily be shown to be erroneous or misleading. Allow me to take up and dispose of them *Et Seriatum:*

The causes given for the action of the Department are fifteen in number, and I shall take them up and reply thereto *et seriatum:*

Charge 1. Grange Camp is neither a city nor town; is without commercial or manufacturing interests; and it is only used once a year for a fair.

Reply 1. While not a city, town, manufacturing or commercial center, Grange Camp is a pleasure-ground, used oftener than once a year.

Charge 2. It is a flag-station on a Virginia railroad.

Reply 2. Neither can its being a flag-station on a Virginia railroad affect this matter, as post-offices are frequently established outside of cities, towns, commercial and manufacturing centers, and they are also often established at flag-stations even on Virginia railroads. If the truth must be told, the large majority of fourth-class offices are located at some lonely cross-road store in the backwoods, or, worse still, in the home of some country gentleman; therefore, these reasons amount to nothing in arguing the case, except to show that probably the writer had fully and carefully studied the art of "how not to do it" when it was desired that he should not. And the assertion that a truth half told leads to incorrect conclusions holds good in this case as in others.

Charge 3. It is situated within a mile of Dunn-Loring and 1½ miles of Vienna—both post-office villages.

Reply 3. The distance is incorrectly stated. To Dunn-Loring it is 1½ miles and to Vienna over 2½ miles by county road. What constitutes a post-office village in the eyes of the writer I am at a loss to understand. Let us compare Grange Camp with the "manufacturing and commercial" center of the post-office village of Dunn-Loring, and mark the result. Dunn-Loring consists of one depot, one store and dwelling occupied, two other dwellings, one of which never has been occupied, and one other family a few hundred yards distant. When compared with the population of Grange Camp, as given below, any intelligent person can see where the advantage belongs.

Charges 4 and 5. That, besides myself, only two families were benefitted by the mail facilities, etc.; that the mail from Grange Camp, besides my own, would not exceed 2 cents per day.

Replies 4 and 5. These statements are incorrect, and must have been known to the "intelligent inspector," as is easily proven. The Williams families, Mr. Johnston, Mr. Swayzie, and my own, all white, live immediately upon the grounds or on the farms adjacent thereto. In Mr. Johnston's and my families are employed five colored persons, all of whom write and receive letters far above the ordinary average for colored persons. Mr. A. C. Williams, as secretary of the Grange Camp Association, paid in for that association last year on one voucher over $24, which alone exceeds by over 300 per cent. the amount stated by your inspector. As secretary of the District Grange of Northern Virginia my mail has exceeded $7.30 per year (which again disproves it). The personal mail of Mr. Williams is not inconsiderable, and I am confident that, leaving out my individual and Grange mail, the cancellations of the office would compare favorably with those of a large majority of fourth-class offices, if it would not rank very high in the average scale. Your inspector seems to have ignored entirely the existence of Mr. Johnston's family, and also that Mr. Swayzie (the assistant postmaster), who, together with his family of five, have resided on the ground for over eighteen months. That the inspector knew of their existence can be easily shown. He not only conversed with Mr. Swayzie, but was in his house, and certainly saw and conversed with Miss Swayzie, his daughter, and the clerk in the post-office. Was it possible, under such circumstances, for him to have forgotten their existence in his enumeration of the population of Grange Camp? Or could it have been an intentional omission, made by a man sent to see only what he wanted?

Charge 6. That of the twenty-eight signers to the petition, six belonged to the two Williams families and five to mine, and "the remainder are said to be residing within the delivery of other post-offices."

Reply 6. It may be true that six of the signers to the petition belonged to the Williams families and five to mine, but if all of these persons write and receive letters is there any reason why they should be denied proper postal facilities under an

administration which announces its avowed policy to be to accommodate the public and increase the postal facilities? Admit, for argument's sake, in passing, that some of your other charges are sufficient to warrant my punishment, is the entire community to be made to suffer for my misdeeds, real or supposed?

Having disposed of eleven of the twenty-eight signers to the petition thus summarily, the writer asserts, with his usual incorrectness, that the balance of the signers reside within the limits of other post-offices. The facts are that of the other seventeen, seven reside on the grounds, as follows: M. Diggs, J. Wilson, A. Wilson, E. Hawkins, R. Pullen, R. L. Johnston, and U. M. Johnston. The remaining ten all live nearer to Grange Camp than to any other post-office, unless one or two may be nearer to the recently-established post-office of Merrifield, viz: Messrs. Durant, Charles Taylor, T. Brent and wife, M. Brown, H. Nickens, H. Brown, and Jerre Smith. This leaves only one out of the twenty-eight not accounted for, all of whom reside within from one-quarter of a mile to 1 mile nearer Grange Camp than any other office.

Upon a cursory examination of the locality I find that there reside nearer to Grange Camp than to any other office twenty-two families, and had your inspector taken the pains he should have done, if he desired information, there would have been no trouble in his ascertaining the correctness of this statement. Of these families, ten are white and twelve are colored, not including the colored families on the grounds. That there may be no mistake as to this, I append their names as follows: The white families are those of A. C. Williams, Frank Williams, Mr. Durant, Oscar Moore, Mr. Terrett, Mrs. Hunter, Mr. Pickett, Mr. Johnston, Mr. Swayzie, A. J. Wedderburn, in all ten. The colored families are those of Mrs. Harney, Marlow Brown, H. Nickens, F. Williams, H. Brown, H. Bell, Jerre Smith, T. Bell, M. Bell, Dobie, T. Brent, Chas. Taylor, in all twelve. The last-named person resides on the Dunn-Loring farm. With few exceptions all of these persons reside within the mile limit for special-delivery letters.

Charge 7. The only person benefited by this office was myself, as the editor of the National Farm and Fireside, which I regularly sent by express to mail from Grange Camp.

Reply 7. As to being the only person served by the office, and consequently benefited thereby, the preceding paragraphs show the incorrectness of this statement.

Regarding the National Farm and Fireside being sent from Alexandria to Grange Camp, I have to say:

First. I know no law to forbid the printing of a newspaper in one place and mailing it in another. So far as I know the postal laws have been faithfully observed in its publication.

Second. For seventeen years the paper ran on in the even tenor of its way without hindrance (except on one occasion, when the Department thought I was advertising my fertilizer business too heavily; but they receded from that position on investigation), until I presumed to advocate the passage of the Conger lard bill; when suddenly the postal authorities pounced upon my paper without a word of warning, and issued an illegal and unwarranted order denying it the United States mails at newspaper rates.

When the office was established at Grange Camp, and the National Farm and Fireside entered there as second-class matter—and for many months thereafter, however, it was printed there, as well as mailed from that place—owing to reasons perfectly legitimate it was deemed best to remove the printing to Alexandria. The greater portion of the editorial work was and is still done at Grange Camp, as I reside there from April to November (which again disproves the inspector's statement that I reside most of the time in Alexandria.) I would like to know as to the objections to printing a paper in one place and mailing it at another. And, further, has the Department ruled that a paper can not be printed in whole or in part in one place and mailed from another as second class matter? If such rule exists, how does it coincide with the law, which says that agents and dealers can mail to subscribers at offices other than that of publication? If there is no such regulation, what has that to do with the matter?

Charge 8. The office was originally established upon my exertions, and the person appointed postmaster, and who continued as such until the office was discontinued, was not a resident of the place, etc.

Reply 8. It is an undisputed fact that the office was created at my request and for my benefit principally, as my written application and papers in the case will show, wherein are set forth the kind, quantity, and character of the mail to be sent therefrom; and this, after a protest from the nearest (Dunn-Loring) office and an investigation by the Department.

The idea intended to be conveyed regarding the postmaster, Mr. Luckett, is calculated to deceive if not so intended. Mr. Luckett, at the time of his appointment, *was* a resident of Grange Camp.

Charge 9. The duties of the office were performed by an employé of mine, who allowed me to get my stamps on credit.

Reply 9. There has been no attempt to deny that an employé of mine performed the duties of postmaster. If it was illegal to have sold me stamps on credit I was unaware of it, and presumed the Government only desired to get the amounts due at the end of each quarter, which the Treasurer's receipts will show have been paid.

Charge 10. That I received the emoluments of the office.

Reply 10. This appears to me to be of no concern except to the postmaster and myself, but as the office was suspended a few months after it was started on precisely the same ground (that I was its chief patron and chief beneficiary), and as the whole subject was then fully discussed, and the authorities decided that the question of the disposition of the profits of the office was one for the consideration of the postmaster and not of the Post-Office Department, and the office was at once re-established, I am at a loss to see what blame attaches either to Mr. Luckett or myself.

Charge 11. I was the absolute director of the office, and mailed my paper in unlimited quantities, "*without liability* of being questioned as to its legitimacy."

Reply 11. For years I have mailed each year several large editions of the National Farm and Fireside, and intend to do so in the future, unless a general rule is made to the contrary, applicable to other papers as well as mine. I remember eight years ago sending into Pennsylvania an edition of twenty-five thousand, advocating the election of that friend of the farmer, Governor Pattison, as my contribution to his successful canvass, and its "legitimacy" was not even then questioned.

Charge 12. That I brought "other mail matter" from Alexandria and Washington so as to swell the cancellations at Grange Camp.

Reply 12. The insinuation that I secured mail from Washington and Alexandria other than my own and that on which I paid the postage is absolutely false.

Charge 13. The receipts of the office are shown to be large enough to pay the Government during its continuance $280.79.

Reply 13. The strangest of all reasons given for the suppression of the office is the one that it was a paying fourth-class office.

The figures presented show that the Government received something every quarter. That so far from being an expense, like 75 per cent. of all the fourth-class post-offices of the country, it actually paid 19 per cent. profit.

In the thirty-eight months of its existence it paid $280.79 into the United States Treasury.

When millions have to be appropriated every year for the support of fourth-class offices, it seems remarkable that one of the few paying offices should be discontinued, while non-paying offices are allowed to continue, and are constantly being established under the rule alluded to.

Charge 14. That the receipts from mail other than mine did not average 2 cents per day.

Reply 14. This charge has been disposed of above.

Charge 15. That the whole, or nearly the whole, of the commissions paid were a dead loss to the Government.

Reply 15. This charge I also deny, for two reasons:

First, Had the large majority of the mail not been sent from Grange Camp, it would have had to be mailed from some other fourth-class post-office in this neighborhood, in which event the Government would not have received any more than it did in this case.

Second, The commissions enabled me to circulate very much more mail (which mail, by the way, was in connection with my Grange work, and not for my individual benefit) than I otherwise could have done.

Taken together, I believe the Government is a gainer rather than a loser by the transaction, as the writer tries so hard to show.

These being the facts, it hardly seems that this injustice should be permitted, as there was no intention to discontinue the office (as shown by the request for a new bond dated June 14, 1890) until the attempt was made to stop the National Farm and Fireside. And if you examine the conversation between Inspector Rathbone and myself, on June 20, 1890, you can not but see that I have strong presumptive evidence for believing that that attempt to suppress my paper was due to its advocacy of the Conger lard bill, and instigated by the opponents of that measure. The Department having found itself in the awkward position of having violated the constitutional right of the freedom of the press, in its attempt to shield itself, descends to the small expedient of trying to suppress a fourth-class post-office, which not only inconveniences myself but many others.

Yours, respectfully,

ALEX. J. WEDDERBURN.

Hon. JOHN WANAMAKER,
Postmaster-General.

Compensation of the postmaster at Grange Camp, Va., and amount of postage paid on National Farm and Fireside, mailed at that office from May 14, 1887, *to March* 31, 1890, *by quarters.*

Quarter ending—	Sales.	Cancellations.	Compensation of postmaster.	Postage on National Farm and Fireside.
June 30, 1887	$62.96	$65.83	$59.50	$9.68
Sept. 30, 1887	74.25	82.38	69.43	10.49
Dec. 31, 1887	170.98	165.43	117.71	16.15
Mar. 31, 1888	163.02	217.68	143.84	17.98
June 30, 1888	71.02	87.09	72.25	20.42
Sept. 30, 1888	179.44	189.66	129.83	17.01
Dec. 31, 1888	105.30	118.10	90.86	21.10
Mar. 31, 1889	58.46	60.64	56.38	8.48
June 30, 1889	63.12	63.28	57.97	8.09
Sept. 30, 1889	56.12	58.56	55.14	9.79
Dec. 31, 1889	95.90	97.98	78.79	3.33
Mar. 31, 1890	77.91	82.24	69.34	11.13
Total	1,178.48	1,288.87	1,001.04	153.65

Mem.—Swayze, asst. p. m., says that paper has about 500 subscribers, which would make the average *legitimate* mailing *a quarter* about 400 lbs. or less. It would thus seem that the greatest part of the papers mailed nearly every quarter have been sent as sample copies.

(Here follow five copies of the National Farm and Fireside.)

B.—PAPERS IN OFFICE OF FIRST ASSISTANT POSTMASTER-GENERAL.

[No. 1012.]

POST-OFFICE DEPARTMENT,
OFFICE OF THE FIRST ASSISTANT P. M. GENERAL,
April 7th, 1887.

New office, in the State of Virginia, county of Fairfax, to be named Grange Camp.
For P. M. Ludwell H. Luckett.
Applied for by 40 citizens.
Queries sent April 7th, 1887, to Ludwell H. Luckett, care of the postmaster at Fairfax C. H.
Queries returned April 10th, 1887, ——— and answered as follows:
It will be situated in the ——— quarter of Section ———, Township ———, Range ———. ——— Route No. ———, from Washington to Leesburgh, and will increase the distance ———.
Between the offices of Dunn Loring, 1 mile east, and Vienna, 5 miles west.
Nearest office not on route, ———.
Its distance is ——— miles in a ——— direction.
Population to be supplied, 20 families.
Number of inhabitants within village, summer resort.
Or not on any established route, but to receive special supply from ———, distant ——— miles, and supplied by ——— for ———.
(Indorsed:) No. 1012, April 7th, 1887, Grange Camp office, Fairfax County, Virginia State.
Papers to Fairfax C. H. $500 bond.
Referred to Contract Office, April 12, 1887. Contract Office returns case April 12, 1887, and reports can be supplied from R. R. route No. 11,004, provided the mails are taken to and from the post-office without expense to the Department.—Sweney.
Establish Grange Camp on route 11,004, and appoint Ludwell H. Luckett, P. M.—A. Leo Knott, Acting P. M. General.
April 22, 1887.
Hon. W. H. F. LEE.

GRANGE CAMP, VA., *April* 4, '87.

DEAR SIR: In asking for a post-office at Grange Camp it was suggested that such reasons should be given for its establishment as may seem to justify it, in view of the proximity to the offices at Vienna and Dunn Loring. I will therefore state:

First. The wagon-road to Dunn Loring is about 1½ miles; to Vienna between 2½ and 3 miles. That they are almost impassable at times, and I understand neither are public roads.

Second. There are to be published at Grange Camp, two papers; one weekly with nearly 2,500 regular circulation, and one monthly with about 500 circulation.

Third. Grange Camp hotel will be opened on May 1, as a regular summer resort and excursion grounds, and in addition to the neighborhood mail, there will be a large transit mail from the office.

Fourth. I find upon investigation, as shown by the petition annexed hereto, that over twenty families will be greatly convenienced by the office.

Fifth. The office shall not cost the Government one dollar more than the present offices would, and will add considerably to its revenue, and aid in developing and improving this section.

Sixth. If it be found necessary to erect a crane, or to go to any other expense for the purpose of establishing the office, it will be done at the expense of the management of Grange Camp.

Seventh. There is held by the association, annually, an exhibition lasting one week, at which time thousands of people gather on the grounds, and the office would be a source of great convenience to the members of the Grange Camp Association and their exhibitors and visitors.

Eighth. The District Grange of Northern Virginia have recently organized a Mutual Fire Insurance Company, and are preparing to organize a life association. The headquarters of both of these concerns will be established at Grange Camp provided this office is established.

As the various enterprises hereinbefore mentioned will necessitate considerable outlay, and will add greatly to material prosperity of the neighborhood, it is earnestly requested that the office be established at the earliest practicable moment.

Yours respectfully,

ALEX. J. WEDDERBURN,
Sec'y Grange Camp Association.

To the POSTMASTER GENERAL,
Washington, D. C.

RICHMOND AND DANVILLE RAILROAD COMPANY,
DUNN LORING STATION, *April* 8, 1887.

DEAR SIR: I am informed that Mr. A. J. Wedderburn is trying to establish a post-office at the "Grange Camp." I therefore write you to not allow the office for that place, as the Dunn Loring office is but a little over three-fourths of a mile to the Grange Camp and will answer all purposes for mail matter for the Grange Camp and would not be of any benefit to any others.

I hope you will not establish any new post-offices inside of 2 miles to my office.

I remain, yours, respectfully,

F. BRENIZERS,
Postmaster, Dunn Loring.

FIRST ASSISTANT POSTMASTER-GENERAL.

[Local. (1040.) Grange Camp Office, Fairfax County, State of Virginia.]

POST-OFFICE DEPARTMENT,
OFFICE OF FIRST ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., April 12, 1887.

Respectfully referred to the Superintendent of the Railway Mail Service for his opinion as to the name proposed.

Respectfully,

_____ _____,
Chief Clerk.

OFFICE OF THE GENERAL SUPERINTENDENT RAILWAY MAIL SERVICE,
Washington, D. C., April 12, 1887.

Respectfully returned approved.

T. E. NASH,
General Superintendent.

To the POSTMASTER-GENERAL,
Washington, D. C.:

We, the undersigned, most respectfully solicit the opening of a post-office at Grange Camp, Fairfax County, Virginia, with Ludwell Henry Luckett as postmaster.

Alex. J. Wedderburn, Grange Camp Association of Northern Virginia; Liberty Publishing Company (monthly), Patrons Mutual Fire Insurance Association, National Farm and Fireside Publishing Company (weekly), Mrs. I. S. Wedderburn, Thos. B. Critenden, Alex. J. Wedderburn, Secretary District Grange of Northern Virginia; Jno. M. Fletcher, L. H. Luckett, Mrs. Dr. Wedderburn, Gus Wedderburn, Franklin Williams, F. Williams, jr., Mrs. H. Williams, A. C. Williams, F. A. Williams, Mrs. M. F. Williams, William Durant, Chas. A. Denison, Mrs. C. A. Denison, Fannie Williams, T. A. King, Mary Haney, Lizy Bell, Harriet Bell, Reial Mabre, Margret Harrison, Jos. Frey, Harriet Brown, Francis Williams, Andrew Williams, Frank Williams, George Brandt, John E. Carter, Oscar A. Hudson, Henry Hudson, Susin Jackson, Katie West, Mrs. Hannah Hudson, Miss Missouri Hudson, Henry Vickens, Maria Vickens, Austin Cramp, George Burley.

(No. 1015.)

7TH APRIL, 1888.

Grange Camp office, Fairfax County, Virginia State, Ludwell H. Luckett, P. M., appointed 22d April, 1887.

Reasons: P. O. inspector recommends, office not needed.

Referred to contract office, 7th April, 1888. Contract office returns case 12th Apl., 1888, and reports no objection. Route 11004, Hagerty.

Discontinue, to take effect April 20, 1888.—A. E. S., First Assistant P. M. General.

Apr. 16, 1888, papers to Dunn Loring.

The order of April 16, 1888, discontinuing the post-office at Grange Camp, Fairfax County, Virginia, to take effect April 20, 1888, is hereby rescinded.—A. E. Stevenson, First Assistant P. M. General.

Recommendations.—Inspector's report recommends discontinuance.

POST-OFFICE DEPARTMENT,
OFFICE OF THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., March 20, 1888.

SIR: I have the honor to transmit herewith the report of Inspector Ridgely in the case against L. H. Luckett, postmaster at Grange Camp, Fairfax County, Va., from which it will be seen that large quantities of matter are being diverted from a presidential office to Grange Camp for a consideration and in order to increase the postmaster's compensation.

I beg leave to state that the best interest of the postal revenue demands that the Department should take prompt and earnest steps to have the practice, referred to by Inspector Ridgely, discontinued.

Respectfully, etc.,

H. R. HARRIS,
Third Assistant Postmaster-General.

Hon. A. E. STEVENSON,
First Assistant Postmaster-General.

POST-OFFICE DEPARTMENT, OFFICE OF POST-OFFICE INSPECTOR,
Grange Camp, Va., March 2, 1888.

W. P. RYAN,
Inspector in Charge:

I visited Grange Camp this date. I find the following condition of facts relating to this office. The postmaster, Ludwell H. Luckett, is only nominally postmaster. He does not reside at Grange Camp and rarely visits it. At the time of his appointment he was a traveling agent to sell phosphate for Alex. J. Wedderburn, and his name was used by Mr. Wedderburn for purpose of obtaining an office at Grange Camp, the benefits of which have chiefly inured to Mr. Wedderburn. The name of Luckett has been retained, but the office is conducted by a young man who, though

nominally assistant to Luckett, is actually the general agent of Alex J. Wedderburn. The latter gets all the cancellations and profits of the post-office. While not nominally postmaster the post-office is conducted in his interest and for his benefit. In this connection see paper filed herewith marked Exhibit B.

This being the case the solicitation of matter within the delivery of Washington post-office (D. C.), as shown by letter files herewith (marked Exhibit No. A) of Rider & Addison, of Washington, D. C., and the statement marked fourth, in answer of Thomas B. Crittenden, in Exhibit B, was in violation of the spirit of postal laws, Sec. 515. Mr. Wedderburn, while conducting this post-office at Grange Camp in the name of another person and getting sole benefit from its cancellations, has been soliciting mail matter in Washington City to be deposited for mailing at Grange Camp, and has actually received and deposited the same at the Grange Camp post-office and reaped the benefit of all the cancellations upon said mail matter so solicited and obtained.

This fact, in connection with the further fact, that the Grange Camp post-office appears to be merely a subterfuge, by means of which Mr. Wedderburn gets his mail matter through the mails at the expense of the United States and with little cost to himself, and this in large quantities, as shown by statement of the sales and cancellations marked "C," establishes a condition of affairs which is discreditable. The pretense of using the name of Ludwell H. Luckett for A. J. Wedderburn's benefit is a fraud which ought not to be permitted.

It appears from this statement, "C," that Mr. Wedderburn's cancellations in 1887 amounted to $246.64, and that the Post-Office Department carried mail matter for him to that amount during three quarters of that year without cost to said Wedderburn. In addition to this amount of stamps actually furnished to Wedderburn without cost, the expense of keeping up a post-office at Grange Camp is incurred by the Department chiefly for the benefit of Alex. J. Wedderburn. An examination of the third answer of Thomas B. Crittenden's sworn statement (marked Exhibit B), shows that besides the mailing of Alex. J. Wedderburn's mail matter the business of the office will not average more than two stamps per day or about ($3.96) three dollars and ninety-six cents per quarter. This being the case, and the further fact that post-offices are located at convenient distances on either side of Grange Camp, one at Vienna and the other at Dunn Loring, I believe that the interests of the Post-Office Department will be subserved by the discontinuance of the post-office at Grange Camp, and therefore recommend that it be discontinued.

WM. S. RIDGELY,
Post-Office Inspector.

WASHINGTON, D. C., *March* 1, 1888.

DEAR SIR: Answering your inquiry as to how some of our calendars, addressed "City," came to be mailed from "Grange Camp, Va.," we desire to say that Mr. A. J. Wedderburn requested us to let him mail them and to give him credit for the stamps on his account.

The amount credited was $5.25.

Yours respectfully,

RIDER & ADDISON.

Mr. RIDGELY.

(No. 1015.)

20 JUNE, 1890.

Grange Camp office, Fairfax County, Virginia State, Ludwell H. Luckett, P. M. Appointed 22 April, 1887.

Reasons: P. O. inspector's report recom'ds, office not needed.

Referred to contract office, 20 June, 1890. Contract office returns case June 20, 1890, and reports no objection to its discontinuance from R. R. route No. 11,004—Wm. J. Pollock.

Discontinue to take effect June 25, 1890.—J. W., *P. M. General.*

June 23, 1890.

Papers to Dunn Loring.

POST-OFFICE DEPARTMENT,
OFFICE OF THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., June 17, 1890.

DEAR SIR: I beg leave to submit herewith a copy of a report of P. O. Inspector T. M. Arrington, in case of the National Farm and Fireside, a weekly newspaper that purports to be published at Grange Camp, Va. In accordance with the recommenda-

tion of the inspector, the privileges of the second-class rates of postage have been withdrawn from the publication.

As this appears to be a case where the post-office has been run in the interest of the publisher of the paper, I respectfully recommend that the office be discontinued.

Very respectfully,

A. D. HAZEN,
Third Assistant Postmaster-General.

Hon. J. S. CLARKSON,
First Assistant Postmaster-General.

POST-OFFICE DEPARTMENT, OFFICE OF CHIEF P. O. INSPECTOR,
Washington, D. C., June 14, 1890.

DEAR SIR: This case was made up with a view of ascertaining the fact whether or not The National Farm and Fireside, a weekly newspaper entered at the post-office at Grange Camp, Va., as second-class matter should be continued as matter entitled to such rates. In the investigation of this case a state of facts are found to exist making it necessary to treat of the management of the post-office at Grange Camp, Va., in connection with the publication of the newspaper as the two are so interwoven that it would seem hard to separate them.

The National Farm and Fireside is owned and published by Alexander J. Wedderburn, esq.; he rents box 33 in the Washington, D. C., post-office, and box 16 in the Alexandria, Va., post-office, and receives mail at both places; he lives at Alexandria, Va., during the winter, and at Grange Camp, Va., during the summer. The National Farm and Fireside is printed at Alexandria, Va., and mailed at Grange Camp, Va., to which office it is sent in boxes by freight.

Grange Camp, Fairfax County, Va., is a small station on the Washington and Ohio Railroad, though it can hardly be called a station as there is no station agent there, and the trains do not stop unless signaled. There is a post-office, and Ludwell H. Luckett is postmaster. He lives at Unison, Loudoun County, Va., 51 miles from Grange Camp. He was appointed April 22, 1887. He has never lived at Grange Camp, never performed any of the duties as postmaster, and receives none of its revenues. Mr. Alex. J. Wedderburn virtually owns, controls, and runs the post-office in his interest, as his individual property, having agreed with Mr. Luckett that he would pay the expenses of the office and the revenues were to be his. Mr. Wedderburn has been paying Miss Minnie Swayze, a daughter of Mr. W. S. Swayze, $10 per month to attend to the post-office. This he did up to the 1st of January, 1890; since then he has paid nothing, simply permitting Mr. Swayze to live in a house at Grange Camp free of rent. Both Miss Minnie and Mr. W. S. Swayze have been sworn in as assistant postmasters.

Mr. Wedderburn has stamps, etc., ordered when he desires, takes them away without paying for them, and in every way runs the office as his private property. He sends large quantities of papers, letters, and circulars from Alexandria to Grange Camp by freight, in boxes; there they are stamped and mailed.

To give you some idea of the business transacted at Grange Camp: From April 1 to and including June 5 (the date of my visit) the sales of stamps amounted to $234.26, and the cancellations to $244.53; and I will state that during this time not one dollar's worth of stamps have been sold other than those taken by Mr. Wedderburn, and there have been no cancellations of stamps other than his. Besides Mr. Wedderburn, I learn, there are only two regular patrons of the Grange Camp post-office; these are Mr. A. C. Williams and Mr. Frank Williams, two brothers. Dunn Loring post-office is only about three-quarters of a mile from Grange Camp, and Vienna only 1¼ miles, Grange Camp being between the two.

As to the mailing of the National Farm and Fireside: From April 1 to May 30, 1890 (nine issues), he mailed 2,994 pounds. I learned from Mr. Swayze, who helps his daughter to attend to the duties of the post-office, and who seems to be very familiar with Mr. Wedderburn's mode of business, that it takes about 60 pounds per week to supply the regular subscribers, or for the nine weeks, 540 pounds; the others, 2,454 pounds, were sent out as sample copies. Mr. Swayze says these papers average eight to the pound, so that 4,320 were sent to regular subscribers and 19,632 as sample copies.

On June 7 Mr. Wedderburn, at my request, called to see me. He stated that it was true that he run the office at Grange Camp; that he paid the expenses and took the revenue. He stated that the Farm and Fireside was run in the interest of agriculture. I called his attention to the fact that the two last issues, herewith inclosed, contained almost identically the same matter, and that they advocated the passage of some land bill by Congress, almost exclusively. He said, yes, when he put in what he considered good reading matter for the farmers, he kept it in his paper for some

time; and that he was advocating the passage of a bill in the interest of the Agricultural Department, and if it became a law he hoped to get a place, an appointment. I asked him about the circulation of the National Farm and Fireside, and he stated that his regular weekly edition was 5,000; that sometimes he issued as many as 15,000 copies; that he has about 2,000 paying subscribers, the rest of the issues he sent out as sample copies; that he usually sent them in Congressional districts at the request of members of Congress; sometimes they paid him for them, and sometimes he got nothing.

Under all the circumstances, I deem it my duty to recommend, first, that the post-office at Grange Camp, Va., be discontinued; and second, that the National Farm and Fireside be not allowed the privileges of second-class rates of postage.

Very respectfully,

T. M. ARRINGTON,
Post-Office Inspector.

J. D. KING, Esq.,
Inspector in Charge, Washington, D. C.

(No. 1012.)

POST-OFFICE DEPARTMENT,
OFFICE OF FIRST ASSISTANT P. M. GENERAL,
8th July, 1890.

Re-Est — in the State of Virginia, county of Fairfax, to be named Grange Camp.
For P. M., ———.
Applied for by 28 citizens.
Queries sent 8th July, 1890, to A. C. Williams, Secy., etc., care of the postmaster at Dunn Loring.
Queries returned ———, 18—, ——— and answered as follows:
It will be situated in the ——— quarter of section ———, township ———, range ———. ——— Route No. ———, from ——— to ———, and will increase the distance ———.
Between the offices of ———, ——— miles ——— and ———, ——— miles ———.
Nearest office not on route, ———.
Its distance is ——— miles in a ——— direction.
Population to be supplied, ———.
Number of inhabitants within village, ———.
Or not on any established route, but to receive supplies from ———, distant ——— miles, and supplied by ——— for ———.
(Indorsed:) (No. 1012.) 8th July, 1890. Grange Camp office, Fairfax County, Virginia State.
Papers to Dunn Loring.
Wrote Hon. Park Agnew July 31, 1890, for name of some one to serve as P. M during session of Grange Camp Association.

WASHINGTON, D. C., *July* 1, 1890.

DEAR SIR: I write to most respectfully urge the re-establishment of the post-office at Grange Camp for the following reasons:

First. The office accommodates between twenty-five and thirty-five patrons; not two, as stated.

Second. It is of immense convenience to the many visitors who meet from various States during the annual exhibition.

Third. The Grange Camp Association has a mail of between $30 and $40 a year, which is about as much as ordinary cancellations at fourth-class offices.

Fourth. One patron (Mr. Williams) mails between $20 and $30 a year at the office.

Fifth. All of the subscribers to the accompanying petition (twenty-eight in number) mail more or less matter at the office.

Sixth. The office is a mile and a quarter from the nearest post-office *by a road*—in a bee-line over marshes, branches, and through bushes or down the railroad track, it is about nine-tenths of a mile.

Seventh. During the summer, spring, and fall months I reside at the camp and my mail is important and large—and I should be accorded the same privileges as any other patron of the post-office, especially as my mail, which is not of a personal but general character, consists of more than that of any ordinary fourth-class office in the State.

Eighth. The Grange Camp Association is a chartered organization for the benefit

of promoting agriculture, and is in no sense speculative or profitable. To do away with the office will seriously inconvenience and injure the association and thereby damage the entire county.

Ninth. The summary discontinuance of the office together with the semi-official publication connected therewith, which certainly casts undue reflection upon me, seems to demand, if I am not guilty of the crimes charged, that the office should be re-established.

Hon. Park Agnew, of Alexandria, will recommend a suitable postmaster, I have no doubt, and I most sincerely hope you will kindly revoke the order for its disestablishment.

Yours respectfully,

ALEX. S. WEDDERBURN.

Hon. JOHN WANAMAKER,
Postmaster-General.

COMMITTEE ON COMMERCE, HOUSE OF REPRESENTATIVES,
Washington, D. C., June 23, 1890.

SIR: I beg to call your attention to the case of the post-office at "Grange," Fairfax County, Va., and urge that no change in the location of that office shall be made.

Yours very respectfully,

TH. H. BAYLY BROWNE.

Hon. FIRST ASSISTANT POSTMASTER-GENERAL,
Post-Office Department, City.

LEWENSVILLE, FAIRFAX COUNTY, VA., *June* 30, 1890.

RESPECTED SIR: Referring to the discontinuance of the post-office at Grange Camp, Va., allow me, as president of the Grange Camp Association, to say that the closing of said office will, in my belief, work a great injury to said association and through that to the people of the county.

The amount of regular business done at the office may be small, but when you consider that you have in addition to that, that of the people attending the annual fair and picnic and the mail of Grange Camp Association, all taken together make up a business as large as is done by very many small fourth-class post offices throughout the country.

It is hoped, therefore, that the matter of the re-establishment of said office may be looked upon with favor by you.

Very respectfully,

WM. B. DODGE,
President Grange Camp Association.

Hon. JOHN WANAMAKER,
Postmaster-General of the United States.

GRANGE CAMP, VA., *June* 23, 1890.

SIR: Understanding that the post-office at this place is to be discontinued upon the grounds that it is used only for the benefit of Mr. Wedderburn and two families, I desire to say that as the secretary of the Grange Camp Association, I receive considerable mail and mail a number of letters, circulars, and catalogues. The postage is considerable. During our annual exhibition, which continues a week every year, the office is of great convenience to the visitors, who come here from several States to exhibit their goods. To discontinue the office would be a serious inconvenience to the association.

Trusting that the matter may be re-opened and the office continued, I remain,

Yours, respectfully,

A. C. WILLIAMS,
Secretary Grange Camp Association.

FIRST ASSISTANT POSTMASTER-GENERAL,
Washington, D. C.

GRANGE CAMP, *June* 30, 1890.

FIRST ASSISTANT POSTMASTER-GENERAL,
Washington, D. C.:

We, the undersigned citizens of Grange Camp and vicinity, respectfully ask that the post-office at this place be re-established. It is a convenience to the neighborhood. Its discontinuance will be of great detriment to the Grange Camp Association.

A. C. Williams, Alex. J. Wedderburn, jr., Jerry Smith, F. Williams, Wm. Dorant, Oscar Morse, Henry Nickens, George Brent, Bell Brent, Frank Williams, jr., Charles Taylor, Charles Henry Taylor, Gus Wedderburn, Alice Wilson, Welton Williams, Mrs. F. Williams, Mrs. F. Conner, M. F. S. Williams, R. Le Grand Johnston, Mary V. Johnston, Mrs. Millie Diggs, I. S. Wedderburn, Alex. J. Wedderburn, Richard Pullum, Jerry Wilson, Mrs. Emma Hawkins, Miss M. Addison, M. B. Wedderburn.

RICHMOND AND DANVILLE RAILROAD COMPANY,
June 30, 1890.

DEAR SIR: As per your letter of June 23, in regard to closing the Grange Camp office, I have done as instructed. Office was closed June 25, 1890.

Respectfully,

F. L. BRENIZER,
Postmaster, Dunn Loring, Fairfax County, Va

J. S. CLARKSON,
First Assistant Postmaster-General, Washington, D. C.

ROOM OF COMMITTEE ON COINAGE, WEIGHTS, AND MEASURES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., July 5, 1890.

SIR: I have known Mr. A. J. Wedderburn, of Virginia, for past three years, and have found him an upright reliable gentleman. He is an enthusiast on the subject of agriculture, and has been doing earnest and effective work in the interest of the farmers of the country.

Very respectfully,

E. H. CONGER.

Hon. JOHN WANAMAKER,
Postmaster-General.

(Indorsed:) July 15, 1890.—Wrote Hon. E. H. Conger, House of Representatives, giving statement of facts in case of post-office, Grange Camp, Va. By direction of Postmaster-General.

COMMITTEE ON AGRICULTURE, HOUSE OF REPRESENTATIVES, U. S.,
Washington, D. C., July 7, 1890.

DEAR SIR: I do not believe the post-office at Grange Camp, Va., should be discontinued. Please give the matter careful attention.

E. H. FUNSTON.

I concur.

A. L. BLISS.

I concur in the request of Hon. E. H. Funston.

JNO. H. GEAR.

(Indorsed:) July 15, 1890.—Wrote Hon. E. H. Funston, House of Representatives, giving statement of facts in case of post-office, Grange Camp, Va. By direction of Postmaster-General.

HOUSE OF REPRESENTATIVES, U. S.,
Washington, D. C., July 7, 1890.

SIR: I have been at some pains to ascertain the status of the Grange Camp post-office, Va., and while entirely out of my personal interests, yet I am satisfied the office is needed there and hope the way may be clear to re-establish it.

Very respectfully,

EDWARD P. ALLEN.

Hon. POSTMASTER-GENERAL.

I concur in the foregoing recommendation.

M. BROSIUS,
JOHN H. WILSON,
ROBERT M. LA FOLLETTE.

(Indorsed:) July 15, 1890.—Wrote Hon. E. P. Allen, House of Representatives, giving statement of facts in case of post-office, Grange Camp, Va. By direction of Postmaster-General.

HOUSE OF REPRESENTATIVES,
Washington, July 1, 1890.

DEAR SIR: I respectfully request that a post-office be re-established at Camp Grange, Va. I care not who may be postmaster, but for benefit of my friends who want postal facilities at that point I desire very much that this office be re-established.

This request is personal.

Yours, truly,

M. B. WRIGHT, *M. C.*

Hon. JOHN WANAMAKER.

(Indorsed:) July 15, 1890. Wrote Hon. M. B. Wright, House of Representatives, giving statement of facts in case of Grange Camp, Va. By direction of Postmaster-General.

UNITED STATES POST-OFFICE,
Alexandria County, Va., July 3, 1890.

DEAR SIR: The Republican county chairman (Hon. R. R. Farr) of Fairfax County agrees with me that the post-office at Grange Camp should be continued, and that it serves about as many patrons as most offices of like character in this State.

Yours, truly, etc.,

PARK AGNEW.

Hon. JOHN WANAMAKER,
Postmaster-General, Washington, D. C.

(Indorsed:) July 15, 1890. Wrote postmaster at Alexandria, Va., giving statement of facts in case of Grange Camp, Va. By direction of Postmaster-General.

FAIRFAX COURT-HOUSE, VA., *July* 2, 1890.

DEAR SIR: I have heard with regret that the post-office at Grange Camp, Fairfax County, Va., has been discontinued.

I am a member of the association and feel a deep interest in the success of the Camp. It is a farmers enterprise, and we meet there once a year and remain ten days or two weeks for pleasure as well as profit, and you can readily see what a great convenience the office is to the general public as well as the neighborhood.

I respectfully ask that the action of the Department be reconsidered, and that the post-office at Grange Camp be re-established.

Very respectfully, yours,

R. R. FARR.

Hon. JOHN WANAMAKER,
Postmaster-General.

(Indorsed:) July 15, 1890. Wrote Mr. R. R. Farr, Fairfax Court-House, Va., giving statement of facts in case of Grange Camp, Va. By direction of Postmaster-General.

LEWINSVILLE, VA., *July* 7, 1890.

The POSTMASTER-GENERAL:

As a citizen of Fairfax County, a member of the Grange Camp Association, I heartily concur in the recommendations of Hons. R. R. Farr and Park Agnew that the office at Grange Camp be re-established.

I am cognizant of the fact that this office is of great value to the association and its visitors, and as such is valuable to all the farmers of this section.

ALBERT PEACOCK.

(Indorsed:) July 15, 1890.—Wrote Albert Peacock, Lewinsville, Va., giving statement of facts in case of Grange Camp, Va. By direction of Postmaster-General.

POST-OFFICE DEPARTMENT,
OFFICE OF THE THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, July 16, 1890

Respectfully referred to the First Assistant Postmaster-General's Office.

A. D. HAZEN,
Third Assistant Postmaster-General.

POST-OFFICE DEPARTMENT,
OFFICE OF THE THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., July 15, 1890.

SIR: I transmit herewith, for your information, copy of a letter this day sent from this Bureau, by direction of the Postmaster-General, to Hon. E. H. Conger, relative to the discontinuance of the post-office at Grange Camp, Va. A similar letter has been sent to each of the following-named gentlemen: Hon. E. H. Funston, Hon. E. P. Allen, Hon. M. B. Wright, Albert Peacock, Clark Agnew, R. R. Farr.

Yours, very respectfully,

A. D. HAZEN,
Third Assistant Postmaster-General.

Hon. J. S. CLARKSON,
First Assistant Postmaster-General.

POST-OFFICE DEPARTMENT,
OFFICE OF THE THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., July 16, 1890.

SIR: By direction of the Postmaster-General I have the honor to acknowledge receipt of your letter of the 7th instant, asking the re-establishment of the post-office at Grange Camp, Va., and, in reply, to give you the facts in connection with the recent discontinuance of that office, which are as follows:

The place known as Grange Camp is not a city, town, or village, nor a resort for pleasure, health, or any other purpose known to the Department, except that once a year an attempt is made to hold there an agricultural fair; it is merely a "flag station" on one of the Virginia railroads, distant but a mile in one direction from Dunn-Loring and a mile and a half in another from Vienna, both of which are post-office villages. No commercial, manufacturing, or other private business is transacted at Grange Camp, and so inconsiderable is the population in the vicinity of the station that upon a recent thorough investigation of the matter it was ascertained by an intelligent inspector of the Department that, besides the proprietor of a weekly paper nominally issued there (but which in reality is published at Alexandria, Va., where the proprietor himself mostly resides), there were only two families permanently accommodated by the post-office, and these to quite a limited extent—one of them, in fact, getting part of its mail through a rented box at the post-office at Vienna. A petition, it is true, has been recently submitted to the Department, signed by twenty-eight persons, but it appears that six of the signers of this petition are members of the two families above alluded to, five are of the Wedderburn family, and the remainder are said to be residing within the delivery of other post-offices.

The only person who was really benefited by the establishment and the continuance of the post-office at Grange Camp is Mr. A. J. Wedderburn, proprietor of the National Farm and Fireside, the paper above referred to, edited and printed at Alexandria, Va., but the issues of which for years, it seems, Mr. Wedderburn has been regularly sending by express to Grange Camp to be mailed from that post-office, the object of which will presently appear.

From the investigation made by the Department's inspector it was further ascertained that the post-office at Grange Camp was originally established through the exertions of Mr. Wedderburn, and that the person appointed to be postmaster, and who continued as such until the office was discontinued, is not a resident of the place, never rendered any returns, or performed any of the other duties of the office, never

even visited it, and, indeed, in nothing but the name was an officer of the Government.

The entire duties of the office were performed by one of Mr. Wedderburn's employés, who, with his daughter, was sworn in as assistant postmaster, and who, under an arrangement between them, allowed Wedderburn to get all his supplies of postage-stamps on credit to mail all the issues of his paper, without requiring cash payment of postage thereon—both of which acts were in violation of the plain letter of the law—and to receive all the emoluments of the office—one of the assistants being granted by Wedderburn a salary of $10 a month, payable upon the private settlement of the post-office business every quarter. In short, Mr. Weddenburn, although not an employé of the postal service, was the absolute director of the office at Grange Camp and of the assistant postmasters there, mailing his papers in unlimited quantities without the liability of any question being raised as to their legitimacy so long as his directorship continued, bringing or sending there other mail matter from Alexandria and Washington so as to swell the amount of stamp cancellations, exercising all the power of the postmaster, realizing all the benefits of the office, and being, as before intimated, almost its sole patron.

The following statement shows the receipts of the office, and the commissions allowed by the Department on the cancellations of stamps upon matter mailed at it from the time of its establishment, April 22, 1887, to the date of its discontinuance, June 25, 1890:

Date.	Receipts.	Commissions.
From April 22 to December 31, 1887	$308.17	$246.64
Year ending December 31, 1888	517.78	436.78
Year ending December 31, 1889	273.60	248.30
January 1 to June 25, 1890	396.26	283.30
Total	1,495.81	1,215.02

By this it will be seen that the total receipts of the office during the time it was in existence amounted to $1,495.81, of which $1,216.02, or 81 per cent., went to pay commissions to the postmaster. The receipts from other business than that of Mr. Wedderburn, according to the report of the post-office inspector, average a little more than 2 cents a day.

The post-offices at Washington and Alexandria, Va., from which the matter mailed at Grange Camp was diverted, are salaried offices, and the whole or nearly the whole amount of $1,215.02 paid for compensation to the Grange Camp office was therefore a dead loss to the Government.

Upon the facts developed by the inspection the post-office was discontinued by the First Assistant Postmaster-General.

Yours, very respectfully,

A. D. HAZEN.
Third Assistant Postmaster-General.

Hon. E. H. CONGER,
House of Representatives.

POST-OFFICE DEPARTMENT,
OFFICE OF THE THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., July 15, 1890.

SIR: I have the honor to send you herewith copy of a report, dated the 9th inst., made by Post-Office Inspector T. M. Arrington, giving reasons why the post-office at Grange Camp, Va., should not be re-established.

Yours, very respectfully,

MADISON DAVIS,
Acting Third Assistant Postmaster-General.

Hon. J. S. CLARKSON,
First Assistant Postmaster-General.

POST-OFFICE DEPARTMENT, OFFICE OF POST-OFFICE INSPECTOR,
Washington, D. C., July 9, 1890.

DEAR SIR: Upon a report made by me under date of June 14, 1890, the post-office at Grange Camp, Fairfax County, Va., was discontinued on June 20. I learn that an effort is being made to have this office re-established, and I deem it my duty to give to the Department more fully than I did in my first report the reasons why this office should have been discontinued, and why it should not be again established.

On April 17, 1887, a petition with forty names was filed with the Department by Alexander J. Wedderburn, esq., asking that the office be established, and that Ludwell H. Luckett be appointed postmaster. April 22, 1887, the office was established and with Mr. Luckett appointed postmaster. March 2, 1888, Post-Office Inspector William S. Ridgely visited Grange Camp (case No. 98847 C), and under that date submitted a report, upon which an order was issued April 16, 1888, discontinuing the office; this order, however, was rescinded April 24, eight days later.

Grange Camp is situated on the Washington and Ohio R. R., between the post-offices at Dunn-Loring and Vienna. The distance, as measured by the railroad from Dunn-Loring to Grange Camp, is 1 mile; from Vienna it is 1.6 miles. At Grange Camp there is held once a year an agricultural fair, from which fact it derives its name. These fair grounds contain 40 acres. The trains do not stop except upon signals, and there is no railroad agent. Near Grange Camp lives Mr. A. C. Williams and his brother, Mr. Frank Williams; they both live in the same yard. These two brothers and their families were and will be the only permanent patrons of the post-office. True, Mr. Swayze and his family are at present living on the grounds, and Mr. Wedderburn and his family live near by, but they are not permanent. Mr. Wedderburn lives in Alexandria, Va., in the winter, and keeps a box in the Alexandria post-office and one in the Washington post-office, and Mr. Swayze is only there temporarily. These four families, and no more, would be the patrons of the office. On July 2 at Grange Camp, I had an interview with Mr. A. C. Williams, who was one of the patrons of the Grange Camp office. I asked him how many patrons there would be provided the office was re-established; he could not say. I then asked him if he could tell me any others that would be besides the members of the four families I mentioned (the ones above), and he could not name one. He stated that he had been a patron of three offices, to wit: Dunn-Loring, Grange Camp, and Vienna; that he had received mail matter from all three; that he had a box in the Vienna post office that he had kept for the past fifteen years. I asked him why he kept this box if he considered himself a patron of the Grange Camp office; he said he did so for the reason that he did not know whether the office at Grange Camp would be permanent, and, besides, he was a correspondent for several newspapers, and Vienna was known as his post-office, and he did not care to change it. I told him his argument was about the strongest I had heard showing there was no necessity for the office. I then asked him, in the event the Department saw fit to re-establish the post-office, who was there that could be appointed postmaster. He replied that his name had been mentioned. I asked him if he would have the place; he said he would not, and could only answer by saying that Hon. Park Agnew would recommend some suitable person. Mr. Ludwell H. Luckett, when he was appointed postmaster, lived at Grange Camp, but left soon thereafter, and has not resided there since. I submitted to him the original petition upon which the office was established and he appointed postmaster, and he stated that he knew very few of them and did not know where they got their mail. In a statement filed by Mr. A. J. Wedderburn during this investigation he frankly states that "it was known by every one that the office was created, after careful investigation, for my benefit." I am unable to say, but it seems entirely true that the office was used for his benefit. As to the receipts of the office, I will say that for the year 1887 the sales were $308.17, the cancellations $303.64, and the commissions were $246.64; for the year 1888, sales $517.78, cancellations $608.53, and the commissions $436.78; for 1889, sales $273.60, cancellations $280.46, and commissions $248.30; for 1890, to June 25, sales $396.26, cancellations $442.20, and commissions $283.30. So that it will be seen from the establishing of the office, April 22, 1887, to the date of its discontinuance, June 25, 1890, the commissions have amounted to $1,215.02. All of this time Ludwell H. Luckett has been postmaster, and has never received one cent as such, all of the pay going to A. J. Wedderburn. The receipts of the office have been almost entirely from Mr. Wedderburn's mail, shipped there for mailing by him from Alexandria and some from Washington. In the report made by Inspector Ridgely, above referred to, he submitted a sworn statement, made by Thomas B. Crittenden, who was at that time in charge of the office and in the employ of Wedderburn, in which he stated that besides Wedderburn's mail the business of the office would not amount to more than two stamps per day. January 29, 1887, Mr. Wedderburn employed Miss Minnie Swayze to run the office for him, agreeing to pay her $10 per month, with the understanding that all she received at the office other than his mail was to be in part of her salary; so that she kept an accurate account of the receipts, and from January 29 to December 31, 1889, the receipts were

$11.97; from January 1 to June 25, 1890, they were $2.59. In my opinion the public interest does not demand an office at Grange Camp, and it should not be re-established.

Very respectfully,

T. M. ARRINGTON,
Post-Office Inspector.

J. D. KING,
Post-Office Inspector in Charge, Washington, D. C.

COMMITTEE ON AGRICULTURE AND FORESTRY,
UNITED STATES SENATE,
Washington, D. C., July 16, 1890.

SIR: I beg to acknowledge the receipt of your communication of the 15th inst. relative to the discontinuance of the post-office at Grange Camp, Va., and to which matter I called your official attention on the 7th inst., specifically stating that on the basis of certain other letters presented by Mr. Wedderburn I trusted that you could see your way clear to continue that office.

I have no desire to receive further information of the investigation which you state is still in progress. The reasons furnished for the discontinuance of the office seem to me ample for your decision in the matter.

Very respectfully,

A. S. PADDOCK,
United States Senate.

HON. JOHN WANAMAKER,
Postmaster-General, Washington, D. C.

C.—PAPERS IN OFFICE OF CHIEF POST-OFFICE INSPECTOR.

POST-OFFICE DEPARTMENT, OFFICE OF POST-OFFICE INSPECTOR,
Washington, D. C., July 12, 1890.

DEAR SIR: This case was made up for the purpose of investigating the status of the National Farm and Fireside, a paper claiming to have its publication office at Grange Camp, Fairfax County, Va., with a view of ascertaining the legitimate subscription list to said paper, and also to report upon the fact whether it should be mailed as second-class matter at the pound rates of postage. This investigation has developed a state of facts in connection with the Grange Camp post-office, the publication of the National Farm and Fireside, and Alex. J. Wedderburn that seems to be without a parallel in the history of the Department.

On the 9th inst. I reported upon the post-office at Grange Camp, and in this I shall as closely as possible confine myself to the National Farm and Fireside, and later I will submit a report upon Mr. Wedderburn.

The National Farm and Fireside, published by Alex. J. Wedderburn, is a weekly newspaper, that has been printed and published at Alexandria, Va., entered as second-class matter, and mailed at Grange Camp, Va., and bearing the name of Washington, D. C., on the front page, seemingly for the purpose of creating the impression that it was a Washington paper. As to the subscribers to the paper, Mr. W. S. Swayze, who has been familiar with the mailing of the paper, having been attending to the post-office at Grange Camp weighing and mailing the papers, informed me on June 5 that about 60 pounds of each issue were sent to subscribers, or those supposed to be, and a much larger number mailed every week as "sample copies;" for illustration, from April 1, 1890, to May 30, 1890, there were sent out nine issues, aggregating 2,994 pounds; for the nine issues it would take 540 pounds for the subscribers, and the balance, or 2,454 pounds, were sent out as "sample copies." I weighed some of these papers, and it takes about sixteen to make a pound, so that while 960 copies were sent to subscribers 4,362 copies were mailed as "sample copies" each week. Mr. Wedderburn stated to Major Rathbone in an interview on June 20, to the question, "How many subscribers have you?" that "There are some 2,000 on the books; I will say over 500." Question: "How many sample copies do you send out per month?" Answer: "When Congress is not in session we send very few; when it is in session we send as many as we can dispose of;" and stated that of one issue he had sent out as many as 25,000 copies. He further stated that "it (the paper) belongs to John J. Nicholson & Sons, of Baltimore; I run it for them;" and that he had never printed less than 2,000 copies. In a statement filed by Mr. Wedderburn in

this office on July 7, 1890, he says his regular subscribers are 304; to exchanges, advertisers, complimentary, and to officers of the State Granges, 297; and to Congressmen and Senators 404; making a total of 1,005. These 404 to members of Congress and Senators he states are all paid for, but when asked who paid for them he declined to say. So that from his own statement he sends out from 2,000 to 25,000 copies each issue, and his actual *bona fide* subscribers, who themselves take his paper and pay for it, amount to just 304; now adding to these the 404 that are sent to members of Congress and Senators, we have 708, all that he claims are paid for. On June 25 the post-office at Grange Camp was discontinued, but upon the order issued June 28, 1890, signed by Hon. A. D. Hazen, Third Assistant Postmaster-General, Mr. Wedderburn has been permitted to mail his paper at Alexandria, Va. July 5, 1890, he mailed 70 pounds, purporting to be to the regular subscribers, and on July 8, 1890, he mailed 253 pounds as "sample copies," all addressed to parties living in the State of Louisiana. The subscription price of this paper is $1 per year, and the number sent to subscribers is so small as compared to the number sent as "sample copies" that it would seem that the paper is being published at nominal rates, and is therefore not entitled to the privileges of second-class rates under the rulings that have heretofore been governing the Department. Paragraph 4 of section 328, Postal Laws and Regulations, requires a paper to have a legitimate list of subscribers, and that it must not be "designed primarily for advertising purposes, or for free circulation, or for circulation at nominal rates" (act of March 3, 1879, sec. 14, 20 Stats., 359). Following paragraph 4 of section 331, Postal Laws and Regulations, in defining the meaning of section 328, "The question whether a publication is primarily designed for advertising purposes is one of fact, to be determined in each case from the evidence" (16 Opins. Atty. Gen., 303), and in doubtful cases the Department will judge from the appearance and matter in the publication the price and amount derived from subscripion, "the number of subscribers in proportion to the issue," * * * "or if the circulation be principally gratuitous, and the list of subscribers so small as to appear only a nominal list, secured merely to bring the publication within the pound rates," * * * "it may reasonably be deemed to be designed primarily for advertising purposes" (Paragraph 4 of section 340, Postal Laws and Regulations.) "After a publication has been admitted to second-class rates the continuous mailing of sample copies in numbers exceeding the issue to regular subscribers * * * will be deemed evidence that the publication is primarily designed for advertising or free circulation." Mr. Wedderburn stated that the only interest John J. Nicholson & Sons had in his paper was that they were his financial backers. Still he has stated to me that he could not have published his paper had he not been allowed the privileges and revenues of the post-office at Grange Camp, Va. He also made a similar statement to you in the presence of Colonel Helm. This would show that while he claims Nicholson & Sons as his financial backers, the Post-Office Department, innocently, has been in reality furnishing him the means to run his paper. Surely it can not be the policy of the Department to establish post-offices for the sole benefit of one man, and thereby enable him to publish a newspaper, in effect offering a subsidy for that purpose. Should this be so, there is no telling how far it may be abused, and it would be setting a precedent that would in all probability be taken advantage of by other publishers who are unable financially to run their papers.

Very respectfully,

T. M. ARRINGTON,
Post-Office Inspector.

J. D. KING, Esq.,
Inspector in Charge, Washington, D. C.

POST-OFFICE DEPARTMENT, OFFICE OF POST-OFFICE INSPECTOR,
Washington, D. C., July 31, 1890.

DEAR SIR: Grange Camp post-office, Fairfax County, Va., was established April 22d, 1887, upon a petition signed by forty names which is herewith inclosed. This petition was filed with the Department April 7, 1887, by Alex. J. Wedderburn. Ludwell H. Luckett, a man in the employ of the said Wedderburn, was appointed postmaster. Since this office was established to the date of its discontinuance, June 25, 1890, it has been in charge of the following persons: Ludwell H. Luckett, John M. Fletcher, Thomas B. Crittenden, Graham Hill, W. S. Swayze, and Miss Minnie Swayze, all in the employ of the said Wedderburn.

Ludwell H. Luckett, the postmaster, remained at Grange Camp about four months in the early part of 1887. He then moved to Union, Loudoun Co., Va., where he has since resided, retaining all the time the position of postmaster at Grange Camp in name, permitting Mr. Wedderburn to suggest who he wanted to act as assistant postmaster and to run the office. Of the above-named parties who have at different times

had charge of the post-office, Ludwell H. Luckett, John M. Fletcher, Thomas B. Crittenden, and Graham Hill were regularly in the employ of the said Wedderburn, and attended to the post-office as a part of their regular duties, and received no extra compensation for attending to the duties of the post-office or any of the revenues of the said office.

January 29, 1889, W. S. Swayze and his daughter, Miss Minnie Swayze, assumed charge of the office, and Wedderburn agreed to pay Miss Minnie Swayze the sum of $10 per month to run the office. This sum he paid to October 29, 1889 (nine months); from this time to June 25, 1890, he paid nothing, except to allow Swayze and his family to live in a house on the Grange Camp fair grounds free of rent. From April 22, 1887, to June 25, 1890, Alex. J. Wedderburn has received the entire revenue of the office, amounting to the sum of $1,215.02. In the agreement between Mr. Wedderburn and Miss Swayze she was to keep an account of all matter mailed at the Grange Camp office other than that mailed by Mr. Wedderburn, and it was to be a part of her salary going towards making up the $10 per month that he was to pay her. In her affidavit she swears the amount she received from January 29, 1889, to December 31, 1889, was $11.97, and from January 1, 1890, to June 25, 1890, it was $2.59, or for the seventeen months she was in charge $14.56; about 86 cents per month. This would make the legitimate revenues of the office from the date of its establishment, April 22, 1887, to its discontinuance, June 25, 1890, over three years, about $32.30. I feel sure from the surroundings and the patrons (which will be shown later) that this is a liberal estimate. Mr. Wedderburn received $1,215.02; the legitimate receipts would have been $32.30; showing that he has received the sum of $1,182.42 illegitimately.

Grange Camp is situated on the Washington and Ohio Railroad, between Dunn Loring and Vienna. The distance from Grange Camp to Vienna post-office is 1.6 miles; from Dunn Loring post-office 1 mile, and from Maryfield post-office 2½ miles (see diagram Exhibit A). At Grange Camp there is held once a year an agricultural fair, from which it derives its name. These grounds contain 40 acres. Grange Camp can hardly be called a railroad station, for the reason that there is no agent and no trains stop unless they are signaled. There is no business of any kind carried on except for one week in the year when the fair is being held. In about one-fourth of a mile lives two brothers, A. C. Williams and Franklin Williams. They are farmers and live in the same yard. The two Williams brothers and their families were the only regular patrons of the Grange Camp post-office. This is not only shown by a personal observation (for I walked over the ground from Dunn Loring to Vienna), but is sworn to by both W. S. Swayze and Miss Minnie Swayze (Exhibits B and C). This does not include Swayze and his family, as they are not permanent, or Wedderburn and his family, as they only reside at Grange Camp during the summer, their residence being in Alexandria, Va. Mr. A. C. Williams, who is mentioned as having been one of the patrons of the Grange Camp post-office is, in fact, and has been all the time a regular patron of the Vienna office. He informed me that he had a box in that office and had kept it for the past fifteen years. He had not changed it to Grange Camp for two reasons; the first was that he did not know that the office at Grange Camp would be permanent, and the second was that both his wife and himself were correspondents for several newspapers, and Vienna was known as their office, and he did not care to change it. I told him his argument was very strong, showing there was not necessity for the office at Grange Camp (special report under date of July 9, 1890).

Of the forty names signed to the petition upon which the post-office was established only fourteen were ever patrons. These were members of the families of the two Williamses and Wedderburn and those employed by them (Exhibit D).

Ludwell H. Luckett, who was the only postmaster ever appointed at Grange Camp, swears that he never received one cent of the emoluments of the office, and that he took the appointment simply through the request of Mr. Wedderburn, who had been very kind to him (see Exhibit E). The post-office at Grange Camp has been controlled by and run almost exclusively in the interest of the said Alex. J. Wedderburn; in fact in a statement filed by him, which is herewith inclosed, he states that "it was known by every one that the office was created after careful investigation for my benefit." Nearly all the matter mailed at Grange Camp has been carried or shipped there by the said Wedderburn, stamps have been put upon his mail without any payment therefor. He has published the National Farm and Fireside, a weekly newspaper, at Alexandria, Va., and shipped it there by freight, from which office it was sent as second-class matter at the pound rates. He sent large quantities of letters and circulars there to be mailed. Upon all of these the postage would be put at Grange Camp, and he paid for none of the stamps, thereby causing (I think innocently) the officials who were acting for him and in charge of the office to violate the act of Congress of June 17, 1878 (sec. 174 P. L. and R.), and violating, himself, sec. 5451 of the Revised Statutes of the United States, in that he was paying a Government official (Miss Swayze) to commit a crime, or fraud, against the laws of the United States. Wedderburn would at the end of each quarter deposit a sum due the United States as shown by the quar-

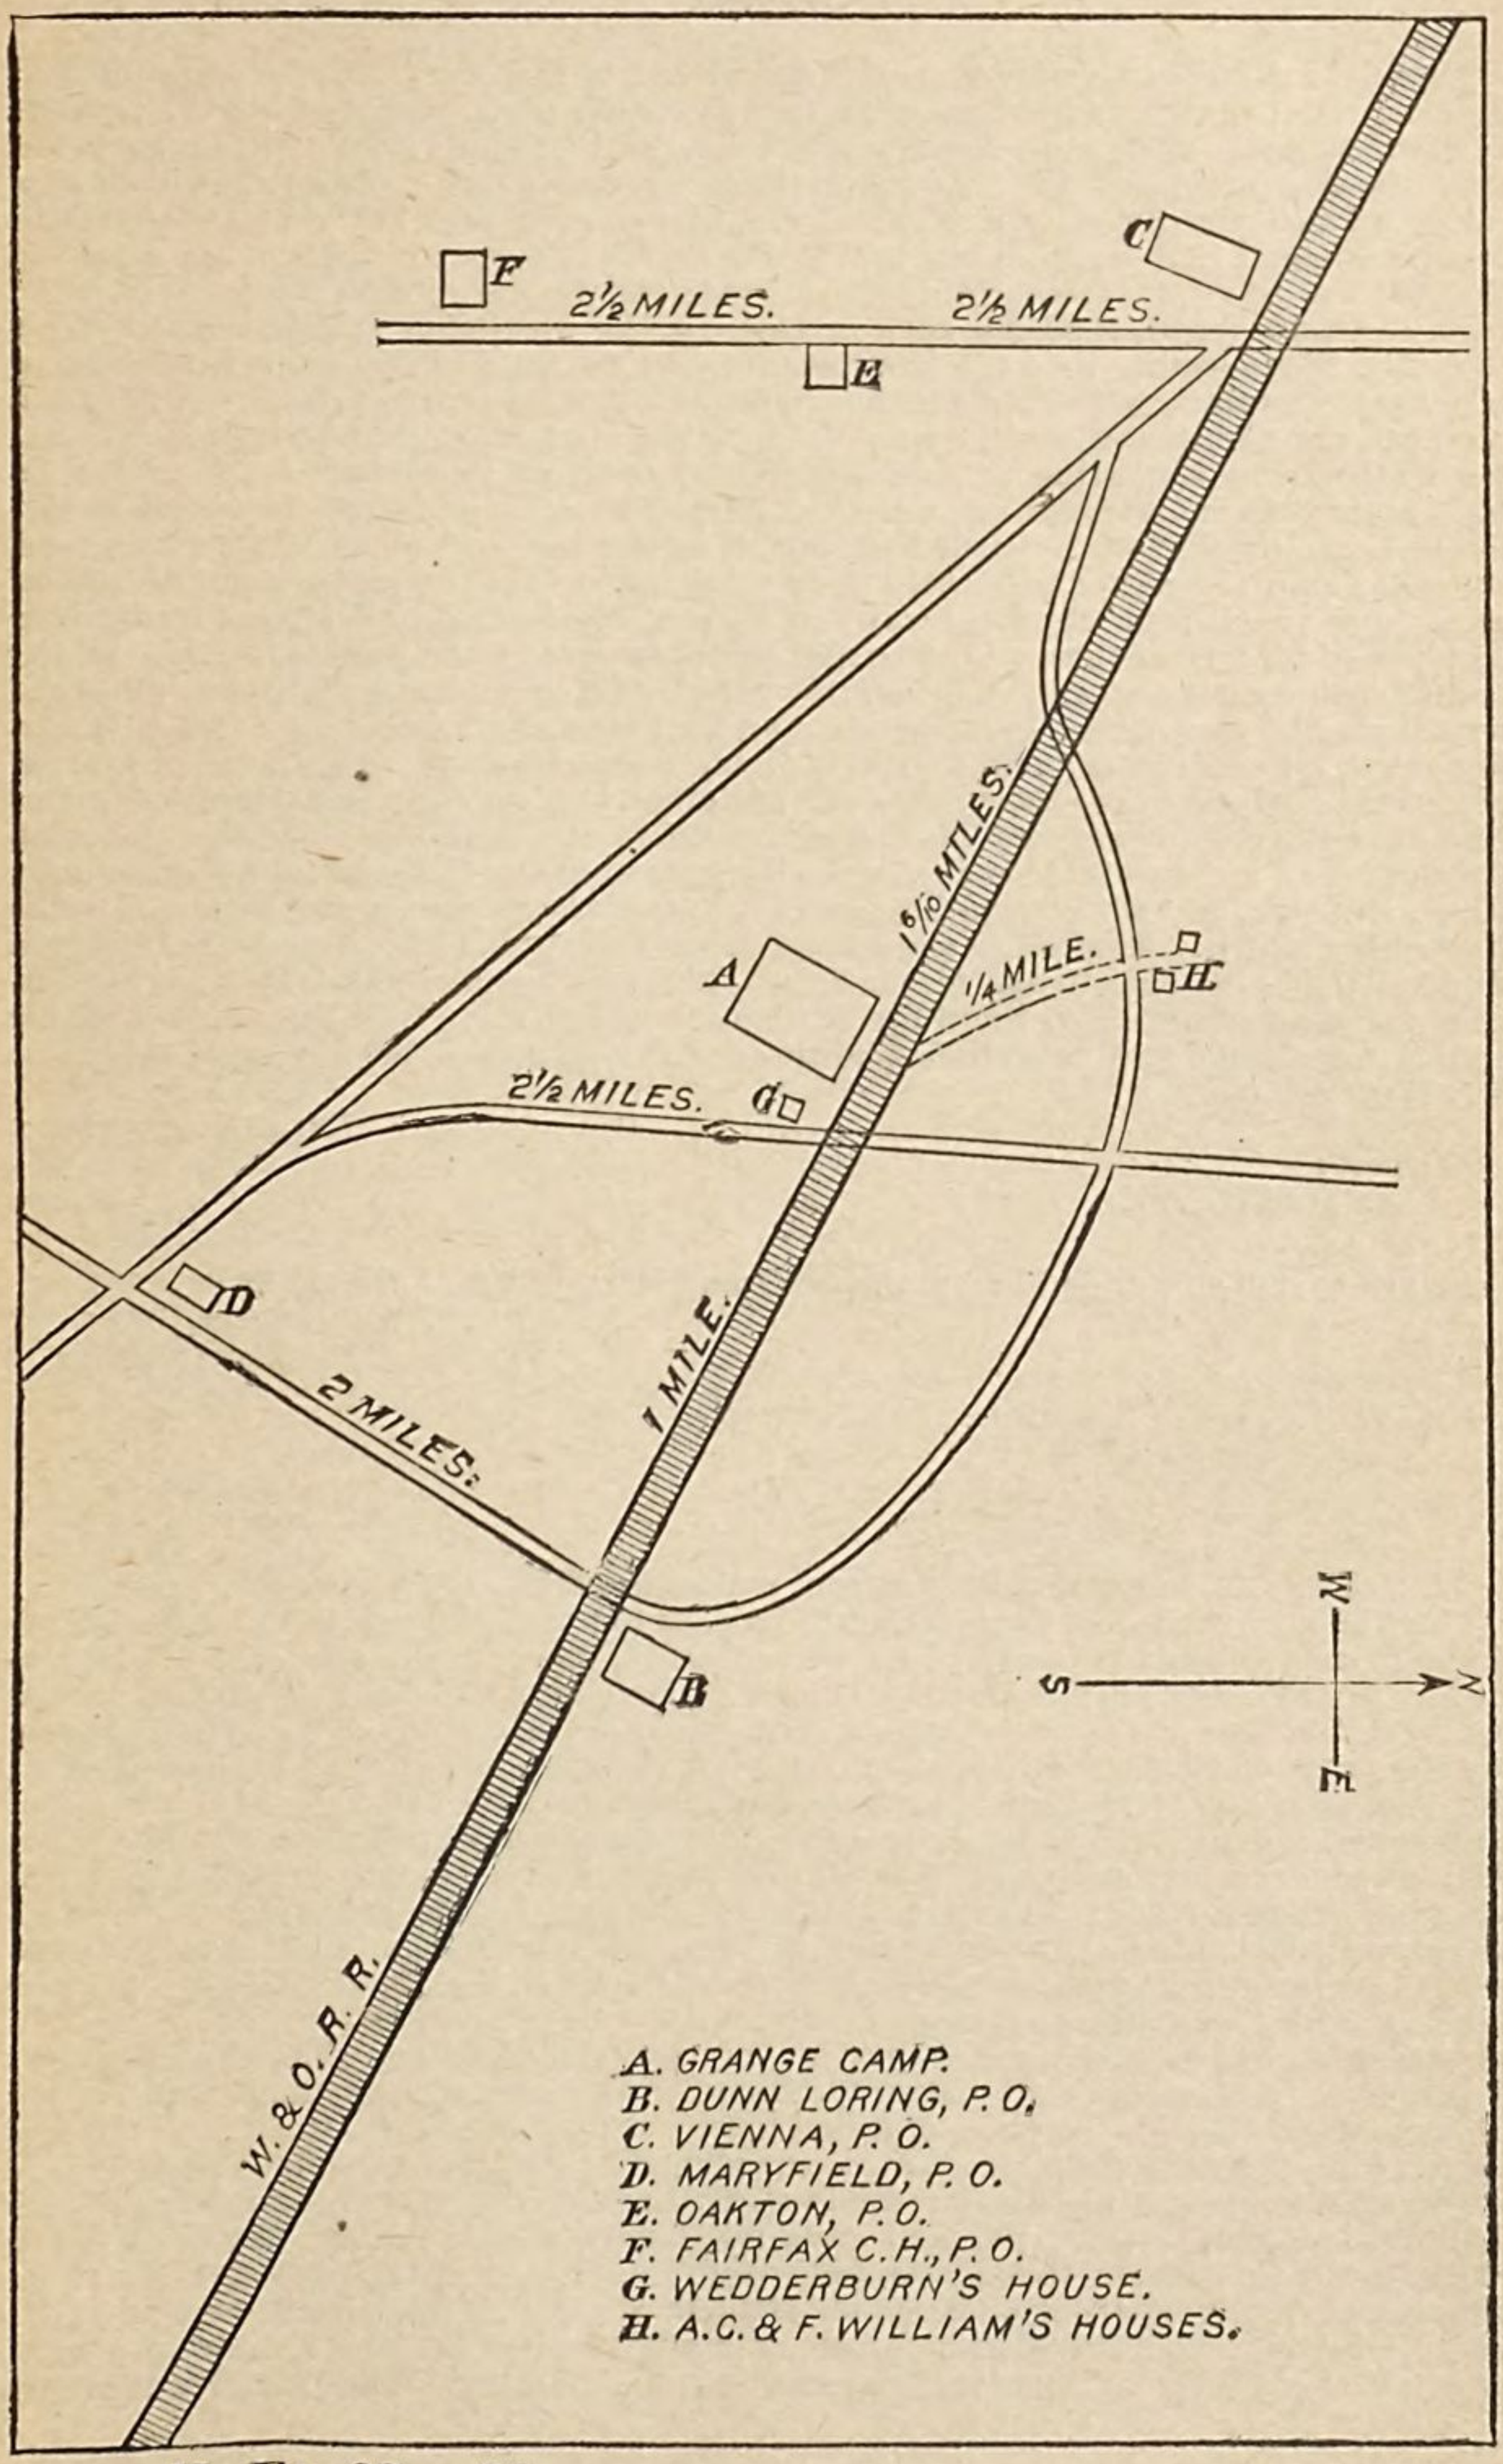
terly statement. This is all he ever paid. He has, in my opinion, also violated sec. 5475 of the Revised Statutes of the United States, in that he has used this post-office and the property of the post-office Department (stamps) for his convenience, and has appropriated the same to his own use to the detriment of the Government and of the public service.

Mr. Wedderburn has also solicited matter in the city of Washington to be mailed at Grange Camp, stating that he received 60 per cent. for so doing. See statement made by Mrs. Charlotte Smith (Exhibit F). This she stated to me, after reading it over to her several times, was absolutely correct, but refused to sign it and swear to it, saying she did not wish to get Mr. Wedderburn into any trouble. (Mrs. Charlotte Smith is the editor of a paper published in the city of Washington, known as the Working Woman.)

The National Farm and Fireside, the paper published by Mr. Wedderburn, to which reference has already been made, has been printed at Alexandria, Va., entered as second-class matter and mailed at Grange Camp, Va., and bearing the name Washington, D. C., on the front page, seemingly for the purpose of creating the impression that it was a Washington paper.

As to the subscribers to the National Farm and Fireside in a statement filed by Mr. Wedderburn (Exhibit G) he says his regular subscribers are 304. He sends to exchanges, advertisers, complimentary, and to the officers of state granges 297, and to Congressmen and Senators 404, making a total of 1,005. These 404 to the members and Senators he claims are all paid for but refused to say who paid for them. It will therefore be seen from his own statement that he has just 304 actual bona fide subscribers who take his paper and pay for it themselves. In an interview with Major Rathbone, Chief Inspector, on June 20, Mr. Wedderburn stated that he never printed less than 2,000 copies of his paper and sometimes as many as 25,000 copies. All of the copies of the National Farm and Fireside over and above those sent to subscribers, and the ones mentioned above, are sent out as sample copies, and this is done every week, the sample copies always exceeding the subscription list. Since the discontinuance of the Grange Camp post-office, the National Farm and Fireside has been mailed at Alexandria, Va., under an order dated June 28, 1890, signed by the Hon. A. D. Hazen, Third Assistant Postmaster-General. On July 5 he mailed 70 pounds purporting to be to subscribers, and on July 8 he mailed 253 pounds as sample copies, all addressed to parties in the State of Louisiana, so it will be seen that of this issue he mailed three and a half times as many as sample copies as he did to his subscribers. In sending out his paper as he has, it would seem to me that Mr. Wedderburn has clearly violated paragraph 4 of section 328, P. L. and R., the clause following paragraph 4 of section 331 P. L. and R., and paragraph 4 of section 340 P. L. and R. (Special report under date of July 12, 1890.)

My conclusions are that Grange Camp post-office should not be re-established; the National Farm and Fireside should not be permitted to be sent through the mails at second-class rates, and that Alex. J. Wedderburn should be prosecuted for the violation of sections 5451 and 5475 of the Revised Statutes of the United States.



I am, very respectfully,

T. M. ARRINGTON,
Post-Office Inspector.

J. D. KING, Esq.
Inspector in charge, Washington, D. C.

EXHIBITS IN CASE NO. 121527, C., GRANGE CAMP, VA.

A.

B.

Statement made by Miss Minnie Swayze at Grange Camp, Fairfax County, Va, July 17, 1890.

That she came to Grange Camp, Va., with her father, W. S. Swayze, in December, 1888; that her father came at the suggestion and request of Mr. A. J. Wedderburn to take charge of the Grange Camp Fair Grounds; that on January 29, 1889, she was employed by Mr. Wedderburn to take charge of the post-office at a salary of $10 per month, Mr. Wedderburn agreeing to pay her that sum; it was also understood that what money that was taken in the post-office was to be a part of the $10, and that Mr. Wedderburn was to pay the balance; that from January 29, 1889, to December 31, 1889, she took in cash in the post-office amounting to $11.97; that Mr. Wedderburn paid the balance, making the $10 per month to some time in October, 1889, since which time he has paid nothing. From January 18, 1890, to June 25, 1890, she took in cash in the post-office, $2.59; that Mr. Wedderburn would send his mail matter consisting of newspapers, letters, and circulars to the post-office by freight and individuals coming from Alexandria, Va., weekly, to be mailed at Grange Camp; that she regarded herself as in the employ of Mr. Wedderburn and did what he directed her to do with the mail matter; that the postage was all put on at Grange Camp from stamps furnished by the Department; that Mr. Wedderburn never paid for any of them; that he had entire control of the post-office, and at the end of each quarter, when the quarterly statement was rendered the Department, he would usually deposit the balance due, and that was all he ever paid. He never, in fact, paid for any of the stamps, either for his newspapers or for his letters or circulars; that soon after she took charge of the office she thought she ought not to let him have the stamps without his paying for them, and sent him word that he must pay for them, and he stated that it was all right; that the Department understood it; that an inspector had been to Grange Camp and they (meaning the Department) knew all about it. That since she took charge of the post-office, January 29, 1889, to June 25, 1890, the date it was discontinued, the only regular patrons of the Grange Camp post-office were Mr. Franklin Williams and Mr. A. C. Williams (two brothers living in the same yard) and their families, besides, of course, her father's family and Mr. Wedderburn.

MINNIE SWAYZE.

A. M. SWAYZE.

Sworn to and subscribed before me, at Grange Camp, Va., July 17, 1890.

T. M. ARRINGTON,
Post-Office Inspector.

C.

W. S. SWAYZE, being first duly sworn, makes the following statement, to wit:

That he now resides at Grange Camp, Fairfax County, Va.; that he moved there from Prince William County, Va., December 14, 1888, at the earnest solicitations of Mr. A. J. Wedderburn, to assume charge of the Grange Camp fair grounds; that when he first came to Grange Camp a young man in the employ of Mr. Wedderburn, by the name of Graham Hill was in charge of the post-office; that on January 29, 1889, his daughter, Miss Minnie Swayze, and himself assumed charge of the post-office and were in charge of the same until the office was discontinued June 25, 1890; that Mr. Wedderburn agreed to pay Miss Minnie Swayze $10 per month for her services in running the post-office; that the post-office was run under the direction of Mr. Wedderburn; that he had entire control of it; that he sent his mail matter to the post-office regularly to be mailed by freight from Alexandria, Va., sometimes by persons coming from Alexandria to Grange Camp; that this mail matter consisted of letters, circulars, and newspapers, sometimes in very large quantities; that the necessary postage was put on this mail matter at Grange Camp from stamps furnished by the Department; that his daughter objected to this unless the stamps were paid for, and Mr. Wedderburn stated to him that it was all right; that the Department understood all about it; that during this time Ludwell H. Luckett was postmaster; he resided at Unison, Loudoun County, Va., and gave no attention to the office, having nothing whatever to do with it; that his daughter and himself took charge of the office at the request of Mr. Wedderburn. That on October 29, 1889, a settlement was had with Mr. Wedderburn, and he paid $90 for nine months' services for Miss Minnie in attending to the post-office. Since that date he has paid nothing. That Mr. Wedderburn

never paid for any of the stamps, the postage on his mail; that at the end of each quarter he would deposit the amount due the United States, and that was all he ever paid; that upon one occasion Mr. Wedderburn remarked that we ought to have the Government owing us sometimes; that the post-office at Grange Camp was on the Washington and Ohio Railroad, about three-fourths of a mile from the post-office at Dunn Loring, and 1¼ miles from the post-office at Vienna, and about 2 miles from the post-office at Maryfield. That there is no station agent at Grange Camp and trains do not stop except upon being signaled; that the regular patrons of the Grange Camp post-office were A. C. Williams, Franklin Williams, A. J. Wedderburn, and himself and their families, and these would be all if the office was again established.

W. S. SWAYZE.

Names to the petition filed in the Department April 17, 1887, upon which the post-office at Grange Camp was established.

Names.	Present post-office.	Remarks.
Alexander J. Wedderburn	Washington and Alexandria	
Mrs. I. S. Wedderburn	do	Wife of A. J. Wedderburn.
Thomas B. Crittenden	West Point, Va	Was printer for A. J. Wedderburn.
John M. Fletcher	Baltimore, Md	Do.
L. H. Luckett	Unison, Va	Was at Grange Camp four months in the employ of Wedderburn.
Mrs. Dr. Wedderburn	Alexandria, Va	Mother of A. J. Wedderburn.
Gus Wedderburn	Washington and Alexandria	Son of A. J. Wedderburn, sixteen years old when he signed petition.
Franklin Williams	Vienna, Va	Lives near Grange Camp.
F. Williams, jr	do	Son of Franklin Williams.
Mrs. H. Williams	do	Wife of Franklin Williams.
A. C. Williams	do	Brother of Franklin Williams.
F. A. Williams	do	Mother of Franklin Williams.
Mrs. M. F. Williams	do	Wife of A. C. Williams.
William Durant	do	Has been all the time.
Charles A. Denison	do	Do.
Mrs. Charles A. Denison	do	Do.
Fannie Williams	Washington, D. C	Daughter of Franklin Williams.
T. A. King		Not known,
Mary Haney (col.)	Vienna, Va	Has been all the time.
Lizzie Bell (col.)	do	Do.
Harriet Bell (col.)	do	Do.
Reial Marler (col.)		Dead; post-office was Vienna.
Margaret Harrison	Vienna, Va	Has been all the time.
James Frey (col.)	do	Do.
Harriet Brown (col.)	do	Do.
Francis Williams (col.)	Dunn Loring, Va	Do.
Andrew Williams (col.)	do	Do.
Frank Williams (col.)	do	Do.
George Brandt (col.)	Pittsburgh, Pa	
John E. Carter (col.)	Vienna, Va	Has been all the time.
Oscar A. Hudson (col.)	Not known	
Henry Hudson (col.)		Dead, did live with A. C. Williams.
Susin Jackson (col.)	Vienna, Va	Has been all the time.
Katie West (col.)	do	Do.
Mrs. Hannah Hudson (col.)	Dunn Loring, Va	Do.
Miss Missoura Hudson (col.)	Somewhere in Massachusetts	
Henry Nickens (col.)	Lewinsville, Va	Has been all the time.
Maria Nickens (col.)	do	Do.
Austin Crump		Not known.
George Beverly (col.)	Somewhere in Pennsylvania	Was at Grange Camp a short time.

The only signers to this petition that received their mail at the Grange Camp post-office were those of the two Williams families and Mr. Wedderburn and those in his employ, in all, 14.

This information was obtained from F. L. Brenizer, postmaster at Dunn Loring, A. C. Staats, postmaster at Vienna, and Miss Minnie Swayze, assistant postmaster at Grange Camp.

Of the 40 petitioners, just one-half are colored people.

E.

In connection with the post-office at Grange Camp, Fairfax County, Va., Mr. Ludwell H. Luckett, the late postmaster, makes the following statement: That at the time of his appointment as postmaster he was living at Grange Camp. This was in the spring or early in the summer of 1887. That he continued to reside at Grange Camp for a few months thereafter. He then moved to Unison, Loudoun County, Va., where he has since resided. Unison is about 25 or 30 miles from Grange Camp. When he left Grange Camp in 1887 John M. Fletcher, an employé of Mr. A. J. Wedderburn, was in charge of the post-office. After Mr. Fletcher left Grange Camp Mr. Graham Hill had charge of the office. Hill was also in the employ of Mr. A. J. Wedderburn. After Hill, Mr. W. S. Swayze and his daughter, Miss Minnie Swayze, have had charge of the post-office. That he has never had any direct benefit from the post-office; has never received any of its revenue; that he took the appointment at the request of Mr. A. J. Wedderburn who had for several years been a friend of his, and he was glad to be of service to him; that it was understood between himself and Mr. Wedderburn that Mr. Wedderburn was to have charge of the post-office, pay the expenses, and have what the office paid; that Mr. Wedderburn always suggested who he wanted to be in charge of the office and he had appointed them. That he has given the office no personal supervision since he left Grange Camp in 1887. That he knew Mr. Wedderburn was printing his paper in Alexandria and mailing it at Grange Camp, but he thought it was all right; in fact had given it very little thought. That he does not know how many patrons the office has had. After examining the petition upon which he was appointed postmaster Mr. Luckett states that he does not know very many of them, and does not know where they get their mail. Not having attended to the post-office in person, he is unable to say just where they get their mail or how many of them that were patrons of the Grange Camp office. After Mr. Fletcher had charge of the office and before Mr. Hill took charge Mr. Thomas B. Crittenden had charge of the office for a short time; he was also in the employ of Mr. Wedderburn. That when he was appointed postmaster he was in the employ of Mr. Wedderburn.

Q. Now, Mr. Luckett, I desire to ask you plainly whether or not you and Mr. Wedderburn ever entered into any agreement by which you were to take the appointment as postmaster and he was to look after the mailing of his matter and that of others, with a view of increasing the revenue for his benefit?—A. No, I never entered into any such agreement.

Q. Why did you take the appointment as postmaster?—A. I took it simply through the request of Mr. Wedderburn, who had been very kind to me and I was glad to do any thing I could for him in return.

Q. Do you know how much money Mr. Wedderburn has made out of the post-office? A. I do not; have no idea.

Q. How long did you reside at Grange Camp?—A. About four months, I think, in 1887.

Q. Did you and Mr. Wedderburn ever make any agreement by which he was to pay the expenses of running the office and he to have the revenue?—A. No, we made no such an agreement; but I supposed if there was any revenue he was receiving it. I never gave the matter a thought.

Q. Did you know that the office was being used by Mr. Wedderburn solely in his own interest and that by bringing his mail from Alexandria to mail in the Grange Camp office he was defrauding the Government?—A. No; I did not have any knowledge of this, and if I had known of it I should have at once reported it. If I had known anything was wrong I should have at once let the Department know it.

Q. Did you know that Mr. Wedderburn was using the stamps from the post office and not paying for them?—A. I did not.

L. H. LUCKETT.

Sworn and subscribed to before me, at Grange Camp, Va., July 2, 1890.

T. M. ARRINGTON,
Post-Office Inspector.

F.

Mrs. CHARLOTTE SMITH states that some time in March, 1890, she appeared before the House Committee on Agriculture and submitted an argument in the interest of pure and unadulturated food, etc.; that soon thereafter Mr. A. J. Wedderburn came to her and requested that she have her address printed and distributed through the mails, saying at the time that he would pay all expenses; this she agreed to do and went to considerable expense in printing, etc.; that she bought about $10 of postage-

stamps and sent off one lot by mail; that when she presented the bill to Mr. Wedderburn he seemed to get mad and refused to pay the $10 that she had paid for postage, giving as his reason that he desired to mail the letters himself at a post-office he had out from Alexandria, Va.; that he could have gotten sixty per cent. of the postage by mailing them there; that he did not want her to mail any more, but to give them to him; that after this she did give him one lot to mail and he took them away with him—about two hundred letters.

July 16th I called upon Mrs. Charlotte Smith, and she made the statement herewith attached, to me. I called again on July 19th, and requested her to sign and swear to the same. I read it over very carefully to her and made one change that of buying the stamps at the Senate post-office, at her suggestion, and then read it over again to her, and she stated that it was correct in every particular, but refused to sign it, saying that she did not want to get Mr. Wedderburn in any trouble; that Colonel Dudley was her friend, and she would talk to him about it. She stated that Wedderburn called upon her yesterday, and paid her the balance he owed her. She was quite abusive in talking about the postal officials, from the Postmaster-General to the charwomen.

ALEX. J. WEDDERBURN,
Publisher National Farm and Fireside.

Statement made by Alex. J. Wedderburn, June 20, 1890, in Chief Inspector's Office.

Alex. J. Wedderburn, editor and publisher of the National Farm and Fireside, called at my office to-day and made the following statement:

Mr. WEDDERBURN. The trouble I had was this. There was no reason for investigation. I am perfectly willing to go into all that. I had at least 1,000 or 1,500 subscribers on my book, and quite a number of subscribers all over the United States. It puts me in an awful fix.

Mr. RATHBONE. There is one thing I do not understand, and I would like to have you explain it to me, and I am glad that you have called.

The Post-Office Department appointed a postmaster down there some two or three years ago, who resides 51 miles away from Grange Camp; he has no control over the office whatever; and you employ some lady down there—a Miss Swazie, I believe—to take charge of the office. You pay her $10 a month (or have been until January, since which time you have been giving her house-rent in lieu of her services). This postmaster has no more control over that office than a man in China; and you seem to be controlling it and running it, and, as I understand, you get the profits. Am I right?

Mr. WEDDERBURN. Yes, sir. Let me tell you the whole thing: I came here to this Department about three years ago; I went to see Mr. Haynie, who was chief clerk. I was introduced to him; I made a statement to him. I saw the First Assistant Postmaster-General. I had letters of introduction to him, and told him very plainly that I was going out there in the country and wanted to run this post-office, and that I wanted Mr. L——, who was superintendent of the grounds, and who was in my employ, to be appointed postmaster. He asked me to get recommendations, and I did so. He hesitated about making the appointment, and asked me to write a letter, and I sat down and wrote a letter and stated everything I stated to Mr. Haynie—everything. They then made the appointment, and he stayed there about five or six

months, and when he went away Mr. Thomas B. C——— was appointed postmaster. He ran the post-office as his assistant, and Mr. H——— as a clerk. I made arrangements with Mr. S——— to go and take charge of the grounds and run the hotel. I did not divide the profits. I guarantied that out of the post-office he should get $10 a month. I gave him up to the first of January——

Mr. RATHBONE. I understand, further, that there are but two patrons of that office outside of yourself—two brothers; and that, on one side a post-office is only three-quarters of a mile from your office, and on the other side, a mile and a quarter.

Mr. WEDDERBURN. That is a mistake.

Mr. RATHBONE. What is the nearest office?

Mr. WEDDERBURN. It is nine-tenths of a mile, Dunn Loring. It is about a mile and a quarter if you walk it, and by the railroad it is nine-tenths of a mile.

Mr. RATHBONE. What is the nearest office on the other side?

Mr. WEDDERBURN. Vienna; about two miles by going around the road.

Mr. RATHBONE. How many patrons are there of the Grange Camp post-office?

Mr. WEDDERBURN. I can not answer that, sir; I do not know, because I never had anything——. When I started that post-office I went right in the neighborhood, and you will find here an application for that post-office signed by over thirty (I started to say over forty, but I am positive it was over thirty people.)

Mr. RATHBONE. Patrons of that office?

Mr. WEDDERBURN. I do not know how many of them got their mail there. The application was to have the post-office established there.

There is another point in connection with this: We have our Grange Camp Association fair, which runs for a week; and it is a very great advantage to people who come from all over the country to get their mail. In addition to that, as I stated in my letter, I had all this Grange Camp literature to send out, and I sent it out accordingly.

Personally, I have not derived any benefit. This question arose under Mr. Haynie's supervision. They did exactly what you did; it is only a little different. You have taken up my paper and decided to abolish the office. I come here and I ask why? Would there be any objection to Mr. L——— getting the per cent.? They said, No, I don't see that there is.

Mr. RATHBONE. What is your arrangement with Mr. Luckett?

Mr. WEDDERBURN. I have not any objection to telling you, in the world. Mr. L——— and I have been the warmest personal friends. At the time he took charge of the post-office he was superintendent of the place and the grounds and was in charge of them. We did not propose to increase his salary. We expected to have a summer resort there if the association had not got into trouble and prevented us from doing it.

Mr. RATHBONE. What is your arrangement with Mr. Luckett?

Mr. WEDDERBURN. My arrangement was that I was to pay all the expenses and pay him his salary. I was to pay the salary of the assistant postmaster. If you take the thing right straight through, I have not made much.

Mr. RATHBONE. I do not understand this: Why should you control this post-office yourself, and you have a man appointed postmaster who lives 51 miles away.

Mr. WEDDERBURN. He was not 51 miles away when he was appointed.

Mr. RATHBONE. Why did you not take the post-office yourself? Why did you not apply for it?

Mr. WEDDERBURN. I am now perfectly willing to assume the postmastership unless Mr. W——— would take it. The reason we have not made any change, I will be perfectly frank in telling you. Simply because we would have to go to work and make a change in postmaster and change the bond, and that would take some trouble, and I have been so busy that I have not been able to attend to it.

Mr. RATHBONE. You make all the requisitions for stamps, as I understand?

Mr. WEDDERBURN. I have never done anything of that kind. Mr. Swazie, the assistant postmaster, makes all that.

Mr. RATHBONE. You are the principal patron of that office?

Mr. WEDDERBURN. Yes, sir.

Mr. RATHBONE. Don't you know, as a fact, that there are but two other people who get their mail at that office?

Mr. WEDDERBURN. Indeed I don't, sir. I think you are mistaken about that, sir; to the best of my knowledge and belief.

Mr. RATHBONE. How do you send out this publication, the National Farm and Fireside; do you send it at second-class rates?

Mr. WEDDERBURN. Yes, sir; certainly, sir.

Mr. RATHBONE. How many subscribers have you?

Mr. WEDDERBURN. There are some 2,000 on the books; I will say over 500.

Mr. RATHBONE. How many sample copies do you send out per month?

Mr. WEDDERBURN. When Congress is not in session we send very few; when it is in session we send as many as we can dispose of.

Mr. RATHBONE. How many do you think you have sent out in the past five or six months?

Mr. WEDDERBURN. I could give you that exactly, sir. One issue was 25,000, including our regular edition, as an extra edition.

Mr. RATHBONE. I understand that you publish this paper in Alexandria. You live in Alexandria?

Mr. WEDDERBURN. Yes, sir; I live in Alexandria about five months and in Grange Camp about seven months; and I have an office in Alexandria.

Mr. RATHBONE. Where do you print your paper; in Alexandria?

Mr. WEDDERBURN. I print my paper there.

Mr. RATHBONE. You have a lock-box in the post-office at Alexandria?

Mr. WEDDERBURN. I have a lock-box there.

Mr. RATHBONE. Also in Washington?

Mr. WEDDERBURN. Yes.

Mr. RATHBONE. Have you an office in Washington?

Mr. WEDDERBURN. I have no business office in Washington. The idea is to get an agricultural paper. We put the place on "Washington," and that was taken up by the Attorney-General here, and they decided that this is——

Mr. RATHBONE. Are all of the copies like this?

Mr. WEDDERBURN. They are all exactly alike, sir.

Mr. RATHBONE. The post-office has been abolished.

Mr. WEDDERBURN. I hoped that that could be changed, because we need a post-office there, and I do not think it would be a very hard matter to do that.

Mr. RATHBONE. My information, as based on an inquiry, is that there are only two patrons of the office outside of yourself. If that is true, there is no occasion for a post-office there.

Mr. WEDDERBURN. Suppose, for instance, I have got mail there; I am sending it off there——

Mr. RATHBONE. You publish a paper in Alexandria, now why not mail it there? Why do you send them by express down to Grange Camp to mail them?

Mr. WEDDERBURN. For the simple reason—— You want to know that—— The last eighteen months we have had a litigation in Grange Camp. To print my paper there in the winter-time requires a building that I have not got. It requires a building with plaster. You can not run a press in cold weather without coal, and that was the only reason the printing office was moved to Alexandria, and as soon as this litigation has——

Mr. RATHBONE. Did you ever print this paper in Grange Camp?

Mr. WEDDERBURN. For six months, from March until the following February.

Mr. RATHBONE. You have to pay the same amount for postage at Grange Camp that you would in Alexandria?

Mr. WEDDERBURN. Certainly.

Mr. RATHBONE. The additional expense is the transportation of the paper from Alexandria to Grange Camp?

Mr. WEDDERBURN. I am not bothered about that, sir. I am willing to mail this paper in Alexandria.

Mr. RATHBONE. It looks to me that the maintenance of a post-office at Grange Camp is almost exclusively for the convenience of one patron—just the one patron.

Mr. WEDDERBURN. It is very largely. It may be so, sir; but it seems to me it has been for the benefit of our whole order in the United States.

Mr. RATHBONE. Would it not be cheaper for you to mail your publication at Vienna, which is only a mile away? Could you not haul it from Grange Camp to Vienna cheaper than from Alexandria?

Mr. WEDDERBURN. No, sir; because we can haul it from Alexandria for 8 cents a hundred if we had to get it and from Vienna it would cost me more.

Mr. RATHBONE. An inspector of this Department examined these publications, and in his opinion they were unmailable at the rates you were sending them, and report was made to me; I in turn referred it to the Third Assistant Postmaster-General, and the Third Assistant holds that it is unmailable; the inspector recommended that this publication be excluded from the mails and that the post-office be abolished, and that recommendation was concurred in by the Third Assistant, who excluded this publication from the mails, and it was concurred in by the First Assistant, who abolished the office. That is the status of affairs.

Mr. WEDDERBURN. In regard to the office, I suppose that will have to be taken up with the First Assistant Postmaster-General; but in regard to the mailing of my paper, I do not think that has anything to do with the Post-Office. I submit a paper for consideration. There is a piece of work that has been published for seventeen years. The first day of May this year it has been published for seventeen years. I have subscribers for the whole of that time, and the Government steps in here and says——

Mr. RATHBONE. The Government has the right to determine what mail shall be conveyed in the mails and what shall not; or, in other words, the law provides that

certain publications shall not be carried in the mails except at certain rates. And the law has decided that the publication in this case is prohibited by the law at the rates you have been paying.

Mr. WEDDERBURN. Is a paper publishing a bill before Congress against the law?

Mr. RATHBONE. I do not know what the particular point about this paper is.

Mr. WEDDERBURN. This is a very serious thing. It is a question of thousands of dollars to me. I would not take $5,000 for my paper to day. I simply want to say that I will be very much obliged to you if you will let me send my paper. I can not stop matter of that character.

Mr. RATHBONE. The Third Assistant Postmaster-General had sample copies of your paper before him, and he decides that it should be excluded from the mails, and has done it. He is the man for you to labor with.

Mr. WEDDERBURN. I do not know what to do. I do not want to go up to the Capitol and get men to come here. I certainly will have to bring suit; I can not afford that. The Government has got no right——

Mr. RATHBONE. You are publishing a paper here that the Department has decided is unmailable at the rates you have been sending.

Mr. WEDDERBURN. Refer to the law; I mean the clause on which you made that decision. Here I am, a citizen of the United States, doing nothing illegitimate.

M. RATHBONE. If you are doing an illegitimate business, you must expect to be——

Mr. WEDDERBURN. My dear sir, I am not doing an illegitimate business.

Mr. RATHBONE. That is a question to be determined.

Mr. WEDDERBURN. I have read that section (328) over very carefully, and I can not see——. Our whole thing is information of a public character; certainly of the best character. We are publishing matter here that no other publication in the United States discusses, and if there is anything illegitimate in that I am absolutely unable to see what it is.

Mr. RATHBONE. This section provides that, "Nothing herein contained shall be so construed as to admit to the second-class rate regular publications designed primarily for advertising purposes, or for free circulation, or for circulation at nominal rates."

Mr. WEDDERBURN. That paper is a dollar a year; you can get papers all over the country for a dollar a year.

Mr. RATHBONE. As to the question of excluding from the mails, you will have to see the Third Assistant Postmaster-General about that, as he has full charge of that. These copies I should be very glad to keep and look over.

Mr. WEDDERBURN. I would be very glad to have you keep them here where I can have them.

(Mr. Wedderburn left here; returned at 3 o'clock p. m. the same day, and made the following additional statement.)

Mr. WEDDERBURN. I wanted to be allowed to send the paper out this week. I can not see the decision in this case would affect the paper at all; I can not believe that. I would like very much to be allowed to mail them.

Mr. RATHBONE. I can not understand why you do not mail that paper in Alexandria.

Mr. WEDDERBURN. I asked the gentleman, and he told me that it would not be allowed to be mailed at any point.

Mr. RATHBONE. The paper is unmailable as you have been mailing it.

Mr. WEDDERBURN. How can you hold that?

Mr. RATHBONE. It is an advertising paper. Tell me something about your connection with this paper.

Mr. WEDDERBURN. It belongs to John J. Nicholson & Sons, of Baltimore. I run it for them.

Mr. RATHBONE. There was something said about your advancing the passage of this lard bill with the view of getting an appointment in the Agricultural Department. What was there about that?

Mr. WEDDERBURN. That is funny. Has a man got the right to advance a measure that he believes right or wrong; has he got the right to advance a measure which is before Congress?

Mr. RATHBONE. There is no doubt about that.

Mr. WEDDERBURN. I have had an appointment under the present administration to write a book. The Committee on Agriculture unanimously adopted a report to increase the appropriation on account of the work that I did. I think Mr. Rusk will take my part in that.

Mr. RATHBONE. Are you not publishing this paper for the purpose of getting an appointment?

Mr. WEDDERBURN. No, sir.

Mr. RATHBONE. Do you not expect to get an appointment under the bill?

Mr. WEDDERBURN. No, sir; if the food bill ever passed, I hoped to get an appointment.

Mr. RATHBONE. That is the Paddock bill?

Mr. WEDDERBURN. Yes, sir; and you have not seen very much about that in my paper?

Mr. RATHBONE. On this point I am clear, that there should not be a post-office at Grange Camp, because I know from a personal investigation by one of my men that there are only two patrons of that office.

Mr. WEDDERBURN. I am going to find out about that, and will let you know.

Mr. RATHBONE. But I have already investigated it. There are only two patrons, named——.

Mr. WEDDERBURN. Those are two brothers named Williams.

I do not want to raise that question at all. I am looking out for my paper—my property—now; I am not asking any questions about the Grange Camp post-office.

Mr. RATHBONE. There is one thing I would like to inquire into a little more specific, and that is your arrangement with Mr. Luckett, the postmaster. You had some arrangement with him by which he was to be postmaster in name, and you postmaster in fact.

Mr. WEDDERBURN. Not at all; so far as the receipts of the office are concerned, yes. When Mr. Luckett was appointed, he was the clerk, just as there are at most of these small resorts. He received some——.

Mr. RATHBONE. How long was that?

Mr. WEDDERBURN. Three years ago.

Mr. RATHBONE. And he has not been there for nearly three years?

Mr. WEDDERBURN. He left in about four months after that.

Mr. RATHBONE. Say about two years and eight months he has not been there.

Mr. WEDDERBURN. No, sir; he has been there occasionally.

Mr. RATHBONE. What part of the work of the office do you perform, if any?

Mr. WEDDERBURN. I have never looked at a single book, except at the end of the quarter I have asked him to show me their reports. I have never looked at the books to compare. They told me when he first went there that I could not even go into the post-office—that was one of the rules, that nobody except the postmaster, his assistant and clerk, could go into the post-office.

Mr. RATHBONE. How do you get your stamps from that office?

Mr. WEDDERBURN. We send the papers there, and they stamp them and cancel them. Very often I have sent 200 or 300 or 500 papers into the office already stamped; often I send papers into the office and they stamp them.

Mr. RATHBONE. You pay for the stamps afterwards?

Mr. WEDDERBURN. Yes, sir.

Mr. RATHBONE. They render you bills for the stamps?

Mr. WEDDERBURN. Yes, sir.

Mr. RATHBONE. How often?

Mr. WEDDERBURN. About once in three months.

Mr. RATHBONE. So you pay for your stamps that you have used previously—about once in three months.

Mr. WEDDERBURN. Yes, sir. Unless, in another way—sometimes I stamp them, and get them to——

Mr. RATHBONE. But as a rule, you send your matter to the office, they stamp them, and, about three months later, you pay them for the stamps?

Mr. WEDDERBURN. Yes, sir.

Mr. RATHBONE. The reason why I ask you so many questions is that it seems to be a very peculiar transaction. There is not a parallel with this case in the history of the Department.

Mr. WEDDERBURN. The same thing came up here under the Department before. They raised the question as to whether you had a right to give me the office, and I said, if you get your money it don't make any difference who gets the office—just so the Government gets its due.

Mr. RATHBONE. You have all the benefits and emoluments of the office under your arrangement with Mr. Luckett?

Mr. WEDDERBURN. Yes, sir.

Mr. RATHBONE. Your arrangement with Mr. Luckett is——

Mr. WEDDERBURN. That I am to pay the expense——

Mr. RATHBONE. And your arrangement with Luckett is that the stamps are to be ordered from the Department in his name?

Mr. WEDDERBURN. For the post-office——

Mr. RATHBONE. You say he renders you a bill?

Mr. WEDDERBURN. Whenever he wants it he renders a bill. He usually renders it every three months, and I pay it.

Mr. RATHBONE. For instance, at the end of the quarter he sends you a bill for $500, and you send him a check for that amount?

Mr. WEDDERBURN. There is no intention to do anything wrong in the world, and I

do not think there has been; but I do not want the question of a post-office discussed at all.

Mr. RATHBONE. It seems very strange to me that you publish a paper in Alexandria and you box it up and ship it by freight at a cost, to Grange Camp, and there you mail it. Why don't you mail it from Alexandria? There must be some inducements for you to go to that additional expense——

Mr. WEDDERBURN. That I get the revenues of the office.

Mr. RATHBONE. Then the inducement for you to ship your paper to Grange Camp is that you derive the revenues of the office?

Mr. WEDDERBURN. Certainly, sir; certainly, sir. There is no other thing. I have certain claims upon the place (Grange Camp), and intend, ultimately, to buy it. If I do buy it, I intend to put up an office and print my paper right on the ground.

Mr. RATHBONE. Grange Camp is a railway station?

Mr. WEDDERBURN. Yes, sir.

Mr. RATHBONE. You have no station agent there?

Mr. WEDDERBURN. No, sir.

Mr. RATHBONE. Do the trains stop there?

Mr. WEDDERBURN. Yes, sir.

Mr. RATHBONE. You have to signal every train that stops?

Mr. WEDDERBURN. Yes, sir.

Mr. RATHBONE. How large a place is Grange Camp; how many acres?

Mr. WEDDERBURN. We have 40 acres in the Camp proper; then I have my little house besides. There are about 43 acres; then we have, beside that, a piece of property. We have got a nice place, and a place that will, ultimately, be considerable of a place.

Mr. RATHBONE. How far is Grange Camp from Alexandria?

Mr. WEDDERBURN. Thirteen miles. I can get an agent there if I want him, except for the fact that we haven't got a man that we can trust to do the work in proper shape. So I have not asked for one.

Mr. RATHBONE. There is nothing for an agent to do there?

Mr. WEDDERBURN. Oh, yes; during the fair.

The post-office being moved is going to hurt me.

So far as your saying there are only two people there, there are Chap Williams and his wife; Mr. Swazie, who gets a good deal of mail; my family gets a good deal of mail and sends off a good deal. We have got two or three servants, whose family lives in Baltimore, and they get a good deal of mail; then there is Mr. Johnson's family. Say there are five families.

Mr. RATHBONE. Do you suppose it would average a dozen letters a week?

Mr. WEDDERBURN Yes, sir; more than that.

Mr. RATHBONE. The Post-Office Department can hardly afford to establish and maintain an office to accommodate two or even one-half dozen families.

Mr. WEDDERBURN. It seems to me you put the post-office where the most mail is. I certainly have more mail.

Mr. RATHBONE. Yes, but you mail it all from Alexandria. You told me this morning you have a lock-box in Washington, where you get nearly all your mail.

Mr. WEDDERBURN. Oh, yes, sir.

Mr. RATHBONE. I notice in one of your papers you speak of the contest between the attorneys of the Big Four, a man named Kimball and yourself. Who is Kimball?

Mr. WEDDERBURN. He is the gentleman who represents the pure-lard people in this district.

Mr. RATHBONE. The matter of admitting your paper to the mails you will have to settle with the Third Assistant. In the opinion of our inspector it was not proper to be mailed.

Mr. WEDDERBURN. Let me tell you I do not want to get into a wrangle. All I ask, as a matter of equity is that I be allowed to send off this issue of the paper, which is all prepared to mail. I do not think there ought to be any injustice in stopping that. That is a downright cost to me—so many dollars and cents. But I propose, of course, to deal with the case before the Postmaster-General, and I have no idea that they are going to stop my paper. I can not do that. It hurts my property.

Mr. RATHBONE. Did I understand you to say this morning that your bona fide subscription list is about 500?

Mr. WEDDERBURN. I said that it exceeded 500.

Mr. RATHBONE. About how much is it, do you think; 600?

Mr. WEDDERBURN. We never print less than 2,000 copies. You ask me a question that I can not answer without my books. I presume it is 1,200 or 1,500. We say it is over 500. But the regular circulation of the paper I know is 1,860—that is the regular edition of the paper.

Mr. RATHBONE. You often print as high as 15,000?

Mr. WEDDERBURN. No, sir; I do not know anything of the kind. I have printed 5,000 several times.

Mr. RATHBONE. Why do you print them --in advocacy of this bill?
Mr. WEDDERBURN. Yes, sir. To circulate my——
Mr. RATHBONE. What particular interest has your backer, Nicholson?
Mr. WEDDERBURN. He just backs me financially. He has nothing to do with that. He is backing me as a financial enterprise. You do not seem to comprehend. The National Grange have indorsed certain things; those things I advocate in my paper. I do not advocate anything else that could get into my paper for any consideration.
Mr. RATHBONE. Is the National Grange financially back of this publication?
Mr. WEDDERBURN. No, sir.
Mr. RATHBONE. How do you expect to reap a benefit?
Mr. WEDDERBURN. I am getting a very nice sum from that. I get something from the paper. I hope to get an office under this. I got $1,000 from Uncle Sam for writing a book last year. I get something from my advertisements. I sell quite a number of these papers. Members of Congress buy these papers by the hundreds. The National Democrat, the Gazette, and all those papers, whenever they have an article of any note, they send 500 and 1,000 copies at a time. Sometimes I publish a little article myself. I do not charge anything for that. I think Rusk will say that that paper has done more for him than all the other agricultural papers put together; and I think he will support me. It has simply been reported upon without any investigation.
Mr. AGNEW. Does that make any difference to the Department?
Mr. RATHBONE. Yes; in this case, as I understand, Wedderburn publishes his paper in Alexandria; he ships it down to Grange Camp, and there he mails it in the post-office which he controls and gets all the revenues from. He gets 100 per cent. of the earnings of that office up to $200. He gets it all; $200 a year.
Mr. WEDDERBURN. Two hundred dollars a year.
Mr. RATHBONE. Therefore, he sends his paper through the mails for almost nothing.
Mr. WEDDERBURN. Excuse me, I don't. Understand me. About the paper being shipped to Alexandria: I told the gentleman, the Third Assistant Postmaster-General's chief clerk, I told him that so far as the paper was concerned, I was perfectly willing to mail it from Alexandria. But in regard to the mailing of the "Fireside," I don't care whether it is mailed here or from Alexandria, or from Grange Camp; that is immaterial. We won't discuss the question of the "Fireside." It is only a question of Grange Camp. There are certain reasons (irrespective of any profit that may come to me) that I am very anxious to keep the post-office there.
Mr. RATHBONE. That reason is personal to you?
Mr. WEDDERBURN. No, sir; not at all. The first and foremost reason is that we have this Grange Camp Association there every year. People have been coming there from Pennsylvania, New York, and Ohio, now, for three or four years. That is the first reason on which the post-office is established.
Mr. RATHBONE. That meeting only lasts about a week.
Mr. WEDDERBURN. Another reason that I want the ——. It helps to give me the revenue. We have been, as I told you the other day, in litigation. That will be settled in a month or six weeks.
Mr. RATHBONE. I can not see how any litigation with private parties will affect your paper.
Mr. WEDDERBURN. Well, you see we want to sell some lots there.
Mr. RATHBONE. The Post-Office Department can not lend itself to any plan of that kind, to sell lots.
Mr. WEDDERBURN. I am mentioning that as the reason why it has not been built up sooner. Every farmer in Fairfax County is interested in that as well as myself.
Mr. AGNEW. Mr. Wedderburn has his own registered mail amounting to over $25 a year.
Mr. WEDDERBURN. There are twenty-five people who get their mail there regularly, instead of two. I could not tell you the other day because I did not know. I could not answer that. I never interfered with the details of the office in any shape or form.
Mr. RATHBONE. Let me tell you why I asked you those questions; because the inspector's report indicated that there were but two families who get there mail there. It struck me that you would know how many patrons there were in that office. You control the office.
Mr. WEDDERBURN. Don't you recollect that I told you, when the office was established there; Mr. Fletcher, who was then acting as postmaster, said nobody shall have anything to do with these books, except three people, the postmaster, the assistant postmaster, and his clerk; I told you, sir, with all due respect, although I am your clerk, that you can not have anything to do with the post-office or books, or anything of that kind. As to the individual benefit derived from it, I have my own mail, my "Fireside" mail, and the mail of the Grange Association; although I get no benefit of the Grange Camp Association. All of that you will find——
Mr. RATHBONE. You are controlling the office——

Mr. WEDDERBURN. I am perfectly willing to give that up.

Mr. RATHBONE. You get all the revenues of the office. That office is run in the interest of one man?

Mr. WEDDERBURN. So far as the money is concerned.

Mr. RATHBONE. It is an office to accommodate one man.

Mr. WEDDERBURN. That has been done all over the country.

Mr. AGNEW. I have noticed, since I have had anything to do with these things that they are constantly establishing offices upon application of fifteen or twenty people. They don't appear to care much about distances. What I wanted to get at is, if there is any one there willing to take the position for what it may be worth in cancellation. Is there any objection on the part of the Post-Office Department to having an office there when it does not cost them anything?

Mr. WEDDERBURN. I am perfectly willing to——

Mr. AGNEW. Then don't you think they ought to abolish a good many offices?

Mr. RATHBONE. Undoubtedly.

Mr. WEDDERBURN. Vienna is a large office.

Mr. RATHBONE. Let me say this about the exclusion of your paper from the mails. That is a matter that the Third Assistant Postmaster-General controls exclusively. I have nothing to do with that. The inspector's report was referred to me, in which he concluded that this paper, giving his reasons, should be excluded from the mails. The Third Assistant Postmaster-General considered this question, and did exclude it three or four days ago. Yesterday he held that order in abeyance. You know that.

Mr. WEDDERBURN. When I was here, he said he would allow the last issue to go.

Mr. RATHBONE. Now, in the matter of the abolishment of the post-office, from my investigation of the matter, by conference with you, and from the inspector's report, I am clearly of the opinion that that office should be abolished.

Mr. AGNEW. Eliminating it from any connection with "The Farm and Fireside", is there any objection to a post-office at that place?

Mr. RATHBONE. I do not think there ought to be one there. There are three post-offices within two miles and a half.

Mr. AGNEW. I think if you would follow it up you would abolish a great many.

Mr. RATHBONE. I think we ought to abolish them in like cases.

Mr. WEDDERBURN. Is it fair that this post-office, sending as much mail as it does, should be abolished? That is the plan so far as the paper is; that is all right. When I go back to Alexandria I will send it from the post-office there. I will apply for entry in the post-office at Alexandria. I come to Washington in the morning; I stay here; I get back to my place in the evening, and I write my letters there at night.

Mr. RATHBONE. Exclude from this class the amount of mail that you send out; what would be the amount of mail that is shipped from that office?

Mr. WEDDERBURN. Outside of my own mail there would be over $100.

(Note: An actual count shows receipts of office, outside of Wedderburn's mail, for the year 1889 to be $11.59.)

Mr. RATHBONE. I doubt it.

Mr. WEDDERBURN. Mr. Williams had told me positively that he had personal mail amounting to over $25.

Mr. RATHBONE. What business is he in?

Mr. WEDDERBURN. His wife is a correspondent of a newspaper. They send off manuscript very largely. The Grange Camp Association mail a quantity of about between $60 and $75.

Mr. RATHBONE. From the information I have it is clear that that office should be abolished.

Mr. AGNEW. Don't you think that order might be held up?

Mr. RATHBONE. Well, I don't know.

Mr. AGNEW. I don't doubt there are——

Mr. RATHBONE. I tell you plainly, I am against the re-establishment of the post-office. What the Postmaster-Geueral will do, I do not know.

Mr. AGNEW. Mr. Wedderburn is entering that paper with heading that was drawn in the Department.

Mr. WEDDERBURN. The whole question was raised and decided in my favor.

Mr. RATHBONE. You say that Swaizie made a complaint here?

Mr. WEDDERBURN. No. As I told you the other day, I think those at the bottom of it are the Fairbanks and Armours. Those fellows are fighting me.

Mr. RATHBONE. You say that the lard fight is at the bottom of the whole thing?

Mr. WEDDERBURN. I know that.

Mr. RATHBONE. You are against Armour, evidently.

Mr. WEDDERBURN. I am against him, and I am worse against him now than I was before.

A. J. Wedderburn to the editor of the Star.

EDITOR STAR:

When I called yesterday and asked for your author as to the statement relating to Grange Camp post-office and the attempted suppression of the National Farm and Fireside you kindly requested a correct statement of the matter. I desired to make a plain and true statement, free from heat, which in this weather and under the circumstances I find hard to do.

To be charged with fraud in the matter of the Grange Camp post-office and the publication of the National Farm and Fireside by sensational writers, under information given out by the postal authorities, might be passed by with indifference and contempt were it not for the circumstances connected with the matter, which throw around it the astonishing facts that the postal authorities have been duped into lending themselves to one of the most glaring pieces of lobby work that was ever perpetrated in the United States, and thereby violated not only the Constitution, which guaranties a free press and free speech, but have attempted to rob me of my property without warrant of law and to cover up their blunder have gone so far as to try and rob me of my good name.

The facts in the case are as follows:

FIRST AS TO GRANGE CAMP POST-OFFICE.

Some three years ago I moved from Baltimore to Grange Camp, Va., on the Washington and Ohio Railroad, and requested that a post-office be opened at that place as my mail was large enough to justify the establishment. A protest was entered by the nearest post-office and an investigation ordered, but as thirty or more citizens requested the office, and it was recommended by the Congressman from my district and several others, the request was granted, and Mr. L. H. Luckett, whom your informant is pleased to style a farm hand, but who in reality is a highly educated and an honorable gentleman, and who at that time was superintendent of the camp grounds, was appointed postmaster. The fact of his being really in my employ was stated at the time, and it was known by every one that the office was created, after careful investigation, for my benefit, as many other offices are created for the benefit of others who have large mails. I may add that my mail consisted of my paper, my regular correspondence, my correspondence as the chief legislative officer of the State Grange of Virginia, and also as an officer of the Grange Camp Association; also the mail of the association and of its many visitors during exhibition week.

My mail was and is in a great measure not of a personal character, but for the benefit of the farmers of my own State, and also for those of the whole country.

Had not these facts been fully understood at first they were certainly so understood in a few months, because an inspector of the Post-Office Department came to the Camp and made a report, upon the basis of which the post-office was abolished. I went to Washington and asked the cause, and was told that the order was issued because I was receiving the benefits of the office and that I was its chief patron.

To which I simply replied by reminding the officer, Mr. Haney, chief clerk of the First Assistant Postmaster-General (and a Republican), of my application on file in the Department and also asked him what it mattered to the Government if they were paid all that was due them who got the profits of the office provided the postmaster was satisfied. The office was immediately re-established and has continued until the present order.

There has been nothing illegal connected with it from beginning to end, unless it be the removal of Mr. Luckett and that was known at the Department at the time of the first suspension.

As to the profits of the office they have not paid the expenses up to the present year as the rental and clerk hire has cost more than the returns.

Such is the basis of this charge of fraud by me on the Government and as stated above is made to cover up the attempted suppression of my paper in the interest of the gigantic lobby headed by W. W. Dudley, which is trying to defeat the Conger lard bill.

The following are the facts connected therewith:

The Fireside has been a thorn in the side of the Fairbank-Armour-Dudley lobby for three years. It has fought them with unremitting ardor, and at every turn exposed their tricks and routed them. Two committees of Congress, in the Fiftieth and Fifty-first Congress, have reported favorably the lard bill presented by Mr. Conger, thus sustaining and supporting my position.

The National Grange P. of H. have indorsed the measure three times.

Numerous State, county, and local granges have indorsed the bill. Thousands and tens of thousands of petitioners have sent in, through me, their petitions in its favor.

This lobby has boasted that it would spend $100,000 to defeat the Conger bill, and

has tried to incite sectional and race prejudices to the same end, all of which I have exposed, and by constant hard work have met these men and defeated them at every turn up to the present time. Personally I claim no merit for this, for

"Thrice armed is he who hath his quarrel just,"

and the position I sustained and advocated was simply, that every tub of lard in this great country should be properly branded, and that the Chicago millionaires be not allowed to defraud the public by selling under a false brand a mixture composed of God knows what.

But enough of this; now for facts.

May 28 a new bond was sent to Grange Camp to be signed by the postmaster, Mr. Luckett, to whom I wrote requesting him to come and attend to it.

June 5 I learned that the post-office inspector visited Grange Camp.

June 6 I received a letter from Post-Office Inspector F. M. Arrington requesting me to call on him, which I did on that day or the day after. Mr. Arrington asked me questions covering the above statements as to Grange Camp office, to all of which I replied truthfully and fully and referred him to the papers on file. In regard to my paper he simply asked if I did not print it in Alexandria and mail it at Grange Camp, which I told him I did. It never occurred to me that any attempt was to be made to exclude my paper from the mails, and I paid little attention to the investigation regarding the office. Mr. Arrington requested me to call on him again the following week before he made his report, for what purpose he did not say. I did not, however, do so until after my paper had been denied the mails, and then he was out.

June 14 a blank requesting the new bond was sent out but was not received for several days, owing to its having been directed to Pennsylvania instead of Virginia, thus showing up to that date no intention existed of stopping the office.

June 17 the following order was issued:

POST-OFFICE DEPARTMENT,
OFFICE OF THIRD ASSISTANT, POSTMASTER-GENERAL,
Washington, D. C., June 17, 1890.

"POSTMASTER,
"*Grange Camp, Va.*:

"The National Farm and Fireside published at your place has been decided by this office, after due consideration of * *the application and papers submitted by the publishers, to* be not entitled to admission into the mails at the second-class rate of postage, *under the provisions of par.* 4, *sec.* 328, *Postal Laws and Regulations.*

"You are directed to inform the publishers of the action of the Department and to require postage at the third-class rate on all copies of the publication presented for mailing at your office.

"Yours, very respectfully,

"A. D. HAZEN,
"*Third Assistant Postmaster-General.*"

I received these documents June 19, in the evening. June 20th, I called on General Hazen; I told him I desired to see about my paper. He referred me to his chief clerk, who informed me that there were matters connected with the publication that warranted the exclusion of the paper from the mails. I demanded to know what they were and under what law, and on what grounds the action had been taken. I at the same time submitted six different issues of my paper for inspection. He told me the reason was that the paper was published at a nominal rate. I told him this was absurd, as the subscription price ($1.00 a year) was the price of a large majority of all the papers published in the United States.

He then said that it had been so decided because of the large number of sample copies sent out. I asked what was the legitimate number. He replied, a reasonable number. I asked what a reasonable number was. He evaded the question. I then told him that he or no other officer would decide that question for the very good reason that the law was framed to enable publishers to increase their subscription list by sending out samples and for the further reason that politicians of all parties desired to mail matter at the second-class rate, as he must know was done by nearly every paper in the United States. He then said the matter could only be changed by the inspector, and sent me to Chief Post-Office Inspector Rathbone, with

---

*These italics are mine (those below are the Department's). I have made them to emphasize the fact that the publishers *had not submitted any paper or made any application* to the Third Assistant Postmaster-General, for the very good reason that the only application necessary had been made over three years previous and the paper had been admitted to the mails and was running regularly as it had been, since May 1, 1874, when the paper first started.

whom I had two very lengthy conversations,* in the course of which he asked me a series of remarkable questions as to the ownership of the paper, its circulation, etc. He asked what interest the owners had in the Conger lard bill, to which I replied none. He asked why the paper was full of that bill. I replied because I chose to fill it with it and was determined to continue the fight until I won. He asked what interest W. W. Kimball had in the paper and who he was. I told him Mr. Kimball had not the slightest interest in the paper; he had purchased papers when the articles suited him. He asked me what the National Grange paid me for my advocacy of the lard bill and a number of similar questions, all of which I submitted to, for the simple reason that I desired to get to the bottom of the mystery, and I was gratified by Mr. Rathbone's saying:

The reason the paper was suspended is because it is an advertising sheet. I replied that is an absurdity. There are but few advertisements in it; all legitimate and none of my own business; it is in no sense an advertising sheet. Mr. Rathbone replied, it is an advertising sheet, used to advertise a bill before Congress, this Conger lard bill.

To which I replied, in that sense it was an advertising sheet, that it advertised the bill and would continue to do so; it advertised the rascalities of Armour and Fairbank and intended to keep it up; that I knew them pretty well for ways that were dark, but I hardly presumed that they would have attempted to use the United States Post-Office Department to wreak their vengeance on me through the influence of their attorney, W. W. Dudley.

A third reason was given a personal friend of mine who called on General Hazen later in the day, and it was that the paper was printed in Alexandria and published from Grange Camp.

I went from the inspector to the chief clerk, and told him my paper was printed and ready to mail. I asked for an order to send out that issue so as to let the matter be re-opened. He told me to tell my man to send out the paper.

I looked him squarely in the face and asked him if he thought a sworn official should disobey the directions of the Department on a verbal message. Further, I said the assistant postmaster would not be guilty of any such dereliction of duty, and I would not be the one to advise him to do it.

He then went to General Hazen, and returning, said he had requested him to issue such an order, but he positively refused to allow the paper to go through the mails.

I asked if it could be mailed from Alexandria, and he replied that it could not, because it was entered at Grange Camp.

I left, doubtless in no pleasant mood, and did not hesitate to express myself pretty plainly at the outrage perpetrated upon me, as no property is more susceptible of an injury than a newspaper by even a week's suspension.

The attempt to interfere with the liberty of a paper that for seventeen years had been regularly published because it chose to discuss a matter of public interest in an outspoken and fearless manner to gratify the whim of W. W. Dudley's clients, by the issuance of his order by the Third Assistant Postmaster-General to exclude it from the mail as second-class matter, would appear so farcical as to be beyond belief, were the facts not so palpable that even the inspector confessed to me in the presence of the Hon. Parke Agnew, on June 25, that "he had not caught on to the fact that the matter was instigated by the Chicago lard men until that morning in an interview with Secretary Rusk."

At the instance of a friend General Hazen on the 20th rescinded his order so far as to allow the issue of the 21st to go through the mail, but no further.

Finding their position absolutely untenable and fearing something of a rumpus, they make a shift, by issuing on the 23d an order to discontinue Grange Camp post-office, so as to stop the Fireside in that way if in no other, and then give out for publication statements intended to befog the case and cast discredit upon me.

As to the circulation of my paper and the sample copies the facts are, and can be proven by the record, if the Post-Office Department keeps a record of canceled news-paper stamps, that the circulation of the Fireside is about the same it has been for several years; that I have every year issued one or two, twenty to twenty-five thousand extra editions of the paper for the purpose of trying to increase its circulation for a number of years past.

That the paper has a legitimate list of subscribers is easily proved.

I have tried to keep cool under these most aggravating circumstances, because I had no desire to create a scandal at the expense of the Government, even if not agreeing with it politically.

This statement has been forced from me by the recklessness of the author of the statement given out by the Post-Office Department and not from any personal desire to gain a little cheap notoriety.

---

* See my stenographic report of conversation with this gentleman. It upsets his statement.—RATHBONE.

POST-OFFICE DEPARTMENT,
OFFICE OF THE THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., June 20, 1890.

SIR: In compliance with your verbal request of yesterday I return herewith the report of Post-Office Inspector Arrington relative to the status of the National Farm and Fireside, published at Grange Camp, Va., and of the post-office at that place. I send you also copy of a report made on the 2d of March, 1888, by Post-Office Inspector W. S. Ridgely upon the affairs of the post-office at Grange Camp, which exhibits a state of things at that time somewhat similar to what is shown by the report of Inspector Arrington. It seems that shortly after the receipt by this office of Inspector Ridgely's report—namely, on March 20, 1888—a copy of it was transmitted to the First Assistant Postmaster-General, with a recommendation for the discontinuance of the office, and that an order to discontinue was made on the 16th of April, 1888, but rescinded ten days afterwards.

I inclose also copies of two applications made by Alex. J. Wedderburn, publisher of the National Farm and Fireside, for the entry of that paper at Grange Camp, Va., and for the entry at Alexandria, Va., of what is called the Virginia edition of the National Farm and Fireside; and, although this office is not aware of any fraud in connection with these applications, it may be that upon special investigation fraud will be discovered. I should be glad to have you specially investigate the status of the Virginia edition of the National Farm and Fireside, with the view of discovery whether it is advisable to exclude it from the mails as second-class matter.

There is still another paper, it seems—"The Progress"—published at Alexandria, Va., by Mr. Wedderburn, the status of which it might be well to inquire into.

I send also paper showing sales, cancellations, and commissions of the postmaster at Grange Camp from the second quarter of 1887 to the fourth quarter of 1889, inclusive, and suggest that inquiry be made to ascertain whether the postmaster, or his assistants or agents, have been guilty of making false returns in order to increase the compensation of the office.

In transmitting to you the above-mentioned papers, I beg leave to call your attention to the fact that the present assistants of the postmaster at Grange Camp—a Mr. Swayze and his daughter—have, according to Inspector Arrington's report, been habitually violating the act of Congress of June 17, 1878, in selling stamps to the publisher of the National Farm and Fireside, Alex. J. Wedderburn, without requiring payment therefor in cash, an offense which is punishable by fine or imprisonment, and which would seem to be in this case of sufficient gravity to warrant a criminal prosecution of the offenders.

After the investigation is completed I should be glad to have you communicate the result to this office.

Yours, very respectfully,

A. D. HAZEN,
Third Assistant Postmaster-General.

E. J. RATHBONE, Esq.,
Chief Post-Office Inspector, Washington, D. C.

[3214.]

Application for admission of publication at the second-class rates of postage.

[This application and the amended questions are required to be made out and answered by the publisher or publishers of every new publication presented for admission at the pound rate of postage.]

GRANGE CAMP, VA., *November* 5, 1887.

Application is hereby made to have the National Farm and Fireside, a semi-monthly published in this place, admitted to the mails at the second-class rate of postage, full particulars of it being given in the sworn answers to the subjoined interrogatories.

NAT. FARM AND FIRESIDE PUB. CO.,
Publisher.

Per ALEX. J. WEDDERBURN,
Edt.

1. Magazine or newspaper?—Answer. Newspaper.
2. How often published?—Answer. 1st and 15th of each month.
3. Where is the paper printed?—Answer. At Grange Camp, Va.
4. Who are the proprietors of the paper or magazine?—Answer. Nat. Farm and Fireside Pub. Co.
5. Are they in any way interested pecuniarily in any business or trade represented

by the publication, either in the reading matter or in the advertisements? If so, what is the interest?—Answer. No.

6. Who are the editors of the publication, and how is their compensation determined?—Answer. Alex. J. Wedderburn.

7. Have the editors any pecuniary interest in any business or trade represented by the publication, either in the reading matter or in the advertisements? If so, what is the interest?—Answer. Mr. Wedderburn advertises his business in the paper, and has done so since 1879; agent of Va. Grange, &c.

8. Is your publication regarded by the trade which it purports to represent as a general organ of the trade, or is it considered as representing the business interest of a special house in that trade, whose price currents or advertisements appear therein?—Answer. The paper is not a trade journal, but an agricultural one, circulated all over the U. S.

9. As a result of the publication of your paper or magazine, is the interest of any business house in the trade especially advanced by it, notwithstanding your design of making the publication a journal representing the trade?—Answer. No.

10. Can any house in good standing advertise in your publication at the regular published rates?—Answer. Yes; glad to get all legitimate ads.

11. Have any of the business houses which advertise in your publication any interest (either by past connection or special contract) therein respecting advertisements or subscriptions? And if so, what is that interest?—Answer. None whatever.

12. What is the greatest number of copies furnished to any person or firm who advertises in your publication?—Answer. Whatever they desire; rarely in large lots.

13. On what terms are these papers furnished?—Answer. Advertisers and agents, a few copies free; others from 1 to 2 cents, according to number.

14. What number of papers do you print of each issue?—Answer. From 3,000 to 4,000.

15. About what number of *bona fide* subscribers (that is, subscribers who pay their own money for the publication and receive it regularly) have you to the next issue of your paper?—Answer. About 1,800.

16. What is the subscription price of your publication per annum?—Answer. Fifty cents.

17. How many pounds weight will cover the papers furnished to regular subscribers?—Answer. We used fifty lbs. paper to ream.

18. What average number of specimen copies, with each issue, do you desire to send through the mails at pound rates?—Answer. As many as we can get new names.

19. How are the names of the persons to whom you wish to send sample copies obtained by you?—Answer. From masters and secretaries of Granges in all the States and by advertising free sample copies.

ALEX. J. WEDDERBURN,
Editor, N. F. and F.

Sworn to and subscribed before me this eighth day of November, 1887.
[SEAL] GEO. D. SCOTT,
Notary Public.

☞This paper, when properly filled out, is to be sent by the postmaster to the Third Assistant Postmaster-General, Washington, D. C., with any other proofs that may be offered, and with one copy of the publication for the admission of which the application is made. (See sections 333 and 334 of the Postal Laws and Regulations.)

EXTRACTS FROM THE POSTAL LAWS AND REGULATIONS OF 1887.

SEC. 328. STATUTORY CHARACTERISTICS.—That the conditions upon which a publication shall be admitted to the second class are as follows:

First. It must regularly be issued at stated intervals, as frequently as four times a year, and bear a date of issue, and be numbered consecutively.

Second. It must be issued from a known office of publication.

Third. It must be formed of printed paper sheets, without board, cloth, leather, or other substantial binding, such as distinguish printed books for preservation from periodical publications.

Fourth. It must be originated and published for the dissemination of information of a public character, or devoted to literature, the sciences, arts, or some special industry, and having a legitimate list of subscribers: *Provided, however*, That nothing herein contained shall be so construed as to admit to the second-class rate regular publications designed primarily for advertising purposes, or for free circulation or for circulation at nominal rates. (Act of March 3, 1879, § 14, 20 Stats., 359.)

SEC. 329. REGULARITY OF ISSUE.—The regular periods of issue must be shown by the publication itself and be within the statute. Annuals and semi-annuals are third-class matter. And it is only matter mailed at or about the time of its regular pub-

lication which is entitled to second-class rates. Old copies of newspapers or periodicals published at prior times must pay rate prescribed in section three hundred and fifty-one, except that back numbers may be sent to regular subscribers at the pound rate.

An admissible publication may change the periods of issue, as from monthly to weekly, weekly to daily, or *vice versa*, but on such change should receive a new certificate of entry accordingly. Educational publications and those of colleges and schools, otherwise within the rule, do not lose their right by suspension of issue during vacation.

SEC. 333. APPLICATION FOR ADMISSION TO THE POUND RATES.—When a new publication is offered for mailing at pound rates at any post-office, the postmaster will proceed as follows:

1. Require the publisher, or one of the publishers, to make and present to him, with two copies of the publication, sworn answers in writing to the following interrogatories: (See interrogatories above.)

2. If satisfied by the affidavit, the publication itself, and further proofs offered, that the publication is admissible, he will issue a temporary permit, on a form to be furnished by the Department, admitting the publication at the pound rates pending the determination of the Department as to its admissibility.

3. If upon such evidence the admissibility appear to be doubtful, he shall require a deposit at third-class rates on the issue offered for mailing, and issue a permit admitting the publication conditionally, pending determination, the excess of the deposit over the pound rate to be refunded if the Department shall decide that the publisher is entitled to the pound rates.

4. If satisfied of non-admissibility, he will refuse to admit except at third-class rates, advising the publisher to appeal to the Department.

5. In all cases he will forward to the Third Assistant Postmaster-General, in the same envelope, the application, affidavit, and other proofs presented by the publisher, with a copy of the publication, and a statement of any facts or reasons known to him for or against the admission sought, retaining one copy of the publication to be kept in his office for such comparison with future issues as may be necessary.

SEC. 334. ENTRY OF SECOND-CLASS PUBLICATIONS.—The Third Assistant Postmaster-General finally decides upon the admissibility of publications to the pound rate in all cases. He will without delay examine all applications, and upon being satisfied that a publication is entitled to admission at such rate will authorize the postmaster at the proper office to issue a certificate of entry therefor. The postmaster will thereupon issue such certificate on form furnished by the Department, and the publisher is then privileged to print upon each copy of the publication so entered the words "Entered at the post-office at ——— as second-class matter." The printing of such words or their equivalent, without due entry having first been made, is unlawful. (See section 346.)

Postmasters should notify publishers of the requirements of this chapter, and that it is the desire of the Department that due entry be made of all second-class publications, both old and new, and that frequent examination and rigid scrutiny will be had of all publications not so formally entered.

Whenever it is made to appear by satisfactory evidence that a publication has been admitted to the pound rates upon false evidence, or that after admission it has so changed its character as to be no longer entitled thereto, the entry thereof will be revoked, and the postmaster at the proper office notified of the revocation.

SEC. 344. EXAMINATION OF SECOND-CLASS PUBLICATIONS.—Postmasters should often examine publications offered for mailing to ascertain that they do not violate the rules prescribed by law for their admission at the pound rate, and specially note:

1. Whether the same are issued at stated intervals as frequently as four times a year, and bear a date of issue, and are numbered consecutively.

2. Whether they are issued from a known office of publication.

3. That they are formed of printed paper sheets, without board, cloth, leather, or other substantial binding.

4. Whether they are designed primarily for advertising purposes, or free circulation at nominal rates.

5. Whether they are mailed at the proper office, as prescribed in section three hundred and forty-eight.

6. Whether the name of the person, firm, or corporation publishing the same appears thereon.

7. Whether any other matter than legitimate supplements, as defined in section three hundred and thirty-seven, is inclosed therewith.

8. Whether any writing, print, mark, or sign, other than authorized by section three hundred and fifty-six, appears thereon or therein.

9. Whether any advertisements not permanently attached are inclosed therewith. (See section 343.)

10. When a postmaster has reason to believe that a publication has, after admission to the pound rate, so changed its character as not to be legally entitled thereto, he may require a sworn statement as to its list of subscribers to be furnished him, which, with any other facts or evidence within his knowledge, he will forward to the Third Assistant Postmaster-General.

SEC. 345. RECORD OF SECOND-CLASS MATTER.—Postmasters must keep a record of all publications of the second class mailed at their post-offices, and send a duplicate thereof to the Third Assistant Postmaster-General, and report to him on the first day of each month any change made therein.

SEC. 346. SUBMITTING FALSE EVIDENCE PUNISHABLE.—That any person who shall submit, or cause to be submitted, for transportation in the mails, any false evidence to the postmaster relative to the character of his publication, shall be deemed guilty of a misdemeanor, and, under conviction thereof in any court of competent jurisdiction, shall for every such offense be punished by a fine of not less than one hundred nor more than five hundred dollars. (Act of March 3, 1879, § 13, 20 Stats., 359.)

[3214.]

Application for admission of publication at the second-class rates of postage.

[This application and the appended questions are required to be made out and answered by the publisher or publishers of every new publication presented for admission at the pound rate of postage.]

ALEXANDRIA, VA., *January* 19, 1889.

Application is hereby made to have the weekly edition of National Farm and Fireside, a weekly paper published in this place, admitted to the mails at the second-class rate of postage, full particulars of it being given in the sworn answers to the subjoined interrogatories.

ALEX. J. WEDDERBURN & CO.,
Publisher.

1. Magazine or newspaper?—Answer. Newspaper.
2. How often published?—Answer. Every Saturday.
3. Where is the paper printed?—Answer. 309 King st., Alexandria, Va.
4. Who are the proprietors of the paper or magazine?—Answer. Alex. J. Wedderburn & Co.
5. Are they in any way interested pecuniarily in any business or trade represented by the publication, either in the reading matter or in the advertisements? If so, what is the interest?—Answer. No.
6. Who are the editors of the publication, and how is their compensation determined?—Answer. Alex. J. Wedderburn. By profit of the paper.
7. Have the editors any pecuniary interest in any business or trade represented by the publication, either in the reading matter or in the advertisements? If so, what is the interest?—Answer. No.
8. Is your publication regarded by the trade which it purports to represent as a general organ of the trade, or is it considered as representing the business interest of a special house in that trade, whose price-currents or advertisements appear therein?—Answer. It is organ of Virginia State Grange. Don't represent interest of any business house.
9. As a result of the publication of your paper or magazine, is the interest of any business house in the trade especially advanced by it, notwithstanding your design of making the publication a journal representing the trade?—Answer. No.
10. Can any house in good standing advertise in your publication at the regular published rates?—Answer. Yes.
11. Have any of the business houses which advertise in your publication any interest (either by past connection or special contract) therein representing advertisements or subscriptions? And if so, what is that interest?—Answer. No.
12. What is the greatest number of copies furnished to any person or firm who advertises in your publication?—Answer. All they will pay for.
13. On what terms are these papers furnished?—Answer. One (1) dollar per year per copy.
14. What number of papers do you print of each issue?—Answer. 500.
15. About what number of *bona fide* subscribers (that is, subscribers who pay their own money for the publication and receive it regularly) have you to the next issue of your paper?—Answer. Don't know; impossible to answer this question. We have *some* subscribers paid in advance and are receiving others. Few papers have a

subscription list before starting. We have several thousand for our semi-monthly edition.

16. What is the subscription price of your publication per annum?—Answer. One (1) dollar.

17. How many pounds weight will cover the papers furnished to regular subscribers?—Answer. 20.

18. What average number of specimen copies with each issue do you desire to send through the mails at pound rates?—Answer. Reasonable number.

19. How are the names of the persons to whom you wish to send sample copies obtained by you?—Answer. Masters and secretaries of subordinate granges, clubs, alliances, &c.

POST-OFFICE DEPARTMENT, OFFICE OF CHIEF POST-OFFICE INSPECTOR,
Washington, D. C., July 8, 1890.

SIR: In the case of Grange Camp, Va., which Inspector Arrington is investigating, I desire to call the inspector's attention to sections 5450 and 5451, Revised Statutes of the United States. You will please direct his attention particularly to the latter part of section 5451, and have him consider it in connection with the evidence secured by him in the above-named case.

Respectfully,

E. G. RATHBONE,
Chief Inspector.

J. D. KING, Esq.,
Inspector in charge, Washington.

POST-OFFICE DEPARTMENT, OFFICE OF POST-OFFICE INSPECTOR,
Washington, D. C., July 12, 1890.

DEAR SIR: In a letter under date of June 20, 1890, to Hon. E. G. Rathbone, chief inspector, in reference to the status of the National Farm and Fireside, a newspaper that had been entered as second-class matter at Grange Camp, Va., General Hazen, Third Assistant Postmaster-General, requested that a special investigation be made as to the Virginia edition of said paper entered for second-class rates at Alexandria, Va., January 17, 1889. I will state that this edition, it seems, was only published for a few months, and is not now being mailed.

Very respectfully,

T. M. ARRINGTON,
Post-Office Inspector.

J. D. KING, Esq.,
Inspector in charge, Washington, D. C.

POST-OFFICE DEPARTMENT, OFFICE OF CHIEF POST-OFFICE INSPECTOR,
Washington, D. C., July 14, 1890.

Respectfully referred to the Third Assistant Postmaster-General, in connection with other papers relating to same subject referred this date.

JAMES MAYNARD,
Acting Chief Inspector.

[3214.]

Application for admission of publication at the second-class rates of postage.

[This application and the appended questions are required to be made out and answered by the publisher or publishers of every new publication presented for admission at the pound rate of postage.]

ALEXANDRIA, VA., *July* 7, 1890.

Application is hereby made to have the National Farm and Fireside, a grange and agricultural paper, published in this place, admitted to the mails at the second-class rate of postage, full particulars of it being given in the sworn answers to the subjoined interrogatories.

ALEX. J. WEDDERBURN,
Publisher.

1. Magazine or newspaper?—Answer. Grange and agricultural.
2. How often published?—Answer. Weekly.
3. Where is the paper printed?—Answer. Alexandria, Va.
4. Who are the proprietors of the paper or magazine?—Answer J. J. Nicholson & Sons.
5. Are they in anyway interested pecuniarily in any business or trade represented by the publication, either in the reading matter or in the advertisements; if so, what is the interest?—Answer. None whatever.
6. Who are the editors of the publication, and how is their compensation determined?—Answer. Alex. J. Wedderburn; based on the profits.
7. Have the editors any pecuniary interest in any business or trade represented by the publication, either in the reading matter or in the advertisements; if so, what is the interest?—Answer. Not at the present time, and have not for some months.
8. Is your publication regarded by the trade which it purports to represent as a general organ of the trade, or is it considered as representing the business interest of a special house in that trade, whose price-currents or advertisements appear therein?—Answer. Represents no trade, consequently the question is not applicable.
9. As a result of the publication of your paper or magazine, is the interest of any business house in the trade especially advanced by it, notwithstanding your design of making the publication a journal representing the trade?—Answer. The paper is published in the interest of no business or business house.
10. Can any house in good standing advertise in your publication at the regular published rates?—Answer. Yes.
11. Have any of the business houses which advertise in your publication any interest (either by past connection or special contract) therein respecting advertisements or subscriptions; and if so, what is that interest?—Answer. None.
12. What is the greatest number of copies furnished to any person or firm who advertises in your publication?—Answer. Will sell any No. asked for.
13. On what terms are these papers furnished?—Answer. From one to three cents each, according to quantity.
14. What number of papers do you print of each issue?—Answer. For some time past 2,000 copies (regular).

15. About what number of *bona fide* subscribers (that is, subscribers who pay their own money for the publication and receive it regularly) have you to the next issue of your paper?—Answer. About 500 paid subscribers (a large No. of papers are paid for by persons other than those subscribing personally and are mailed regularly on such order).

16. What is the subscription price of your publication per annum?—Answer. $1.00.

17. How many pounds weight will cover the papers furnished to regular subscribers?—Answer. About 100 pounds.

18. What average number of specimen copies, with each issue, do you desire to send through the mails at pound rates?—Answer. *Average* not over 2,000. Occasionally we issue large editions and sometimes no extra copies. Judging by the past a fair average will not exceed 2,000.

19. How are the names of the persons to whom you wish to send sample copies obtained by you?—Answer. Sent in by grangers, sent in on petitions to Congress, sent through me, and names furnished by Senators and Congressmen.

ALEX. J. WEDDERBURN.

Sworn to and subscribed before me this seventh day of July, 1890.
[SEAL.] WM. A. MACNULTY,
Notary Public.

☞ This paper, when properly filled out, is to be sent by the postmaster to the Third Assistant Postmaster-General, Washington, D. C., with any other proofs that may be offered, and with one copy of the publication for the admission of which the application is made. (See sections 333 and 334 of the Postal Laws and Regulations.)

EXTRACTS FROM THE POSTAL LAWS AND REGULATIONS OF 1887.

SEC. 328. STATUTORY CHARACTERISTICS.—That the conditions upon which a publication shall be admitted to the second class are as follows:

First. It must regularly be issued at stated intervals, as frequently as four times a year, and bear a date of issue, and be numbered consecutively.

Second. It must be issued from a known office of publication.

Third. It must be formed of printed paper sheets, without board, cloth, leather, or other substantial binding, such as distinguish printed books for preservation from periodical publications.

Fourth. It must be originated and published for the dissemination of information of a public character, or devoted to literature, the sciences, arts, or some special industry, and having a legitimate list of subscribers: *Provided, however*, that nothing herein contained shall be so construed as to admit to the second-class rate regular publications designed primarily for advertising purposes, or for free circulation, or for circulation at nominal rates. (Act of March 3, 1879, § 14, 20 Stats., 359.)

SEC. 329. REGULARITY OF ISSUE.—The regular periods of issue must be shown by the publication itself and be within the statute. Annuals and semi-annuals are third-class matter. And it is only matter mailed at or about the time of its regular publication which is entitled to second-class rates. Old copies of newspapers or periodicals published at prior times must pay rate prescribed in section three hundred and fifty-one, except that back numbers may be sent to regular subscribers at the pound rate.

An admissible publication may change the periods of issue, as from monthly to weekly, weekly to daily, or *vice versa*, but on such change should receive a new certificate of entry accordingly. Educational publications and those of colleges and schools, otherwise within the rule, do not lose their right by suspension of issue during vacation.

SEC. 333. APPLICATION FOR ADMISSION TO THE POUND RATES.—When a new publication is offered for mailing at pound rates at any post-office, the postmaster will proceed as follows:

1. Require the publisher, or one of the publishers, to make and present to him, with two copies of the publication, sworn answers in writing to the following interrogatories: (See interrogatories above.)

2. If satisfied by the affidavit, the publication itself, and further proofs offered, that the publication is admissible, he will issue a temporary permit, on a form to be furnished by the Department, admitting the publication at the pound rates pending the determination of the Department as to its admissibility.

3. If upon such evidence the admissibility appear to be doubtful, he shall require a deposit at third-class rates on the issue offered for mailing, and issue a permit admitting the publication conditionally, pending determination, the excess of the deposit over the pound rate to be refunded if the Department shall decide that the publisher is entitled to the pound rates.

4. If satisfied of non-admissibility, he will refuse to admit except at third-class rates, advising the publisher to appeal to the Department.

5. In all cases he will forward to the Third Assistant Postmaster-General, in the same envelope, the application, affidavit, and other proofs presented by the publisher, with a copy of the publication, and a statement of any facts or reasons known to him for or against the admission sought, retaining one copy of publication to be kept in his office for such comparison with future issues as may be necessary.

SEC. 334. ENTRY OF SECOND-CLASS PUBLICATIONS.—The Third Assistant Postmaster-General finally decides upon the admissibility of publications to the pound rate in all cases. He will without delay examine all applications, and upon being satisfied that a publication is entitled to admission at such rate will authorize the postmaster at the proper office to issue a certificate of entry therefor. The postmaster will thereupon issue such certificate on form furnished by the Department; and the publisher is then privileged to print upon each copy of the publication so entered the words "Entered at the post-office at ——— as second-class matter." The printing of such words, or their equivalent, without due entry having first been made, is unlawful. (See section 346.)

Postmasters should notify publishers of the requirements of this chapter, and that it is the desire of the Department that due entry be made of all second-class publications, both old and new, and that frequent examination and rigid scrutiny will be had of all publications not so formally entered.

Whenever it is made to appear by satisfactory evidence that a publication has been admitted to the pound rates upon false evidence, or that after admission it has so changed its character as to be no longer entitled thereto, the entry thereof will be revoked, and the postmaster at the proper office notified of the revocation.

SEC. 344. EXAMINATION OF SECOND-CLASS PUBLICATIONS.—Postmasters should often examine publications offered for mailing to ascertain that they do not violate the rules prescribed by law for their admission at the pound rate, and specially note:

1. Whether the same are issued at stated intervals as frequently as four times a year, and bear a date of issue, and are numbered consecutively.

2. Whether they are issued from a known office of publication.

3. That they are formed of printed paper sheets, without board, cloth, leather, or other substantial binding.

4. Whether they are designed primarily for advertising purposes, or free circulation at nominal rates.

5. Whether they are mailed at the proper office, as prescribed in section three hundred and forty-eight.

6. Whether the name of the person, firm, or corporation publishing the same appears thereon.

7. Whether any other matter than legitimate supplements, as defined in section three hundred and thirty-seven, is inclosed therewith.

8. Whether any writing, print, mark, or sign, other than authorized by section three hundred and fifty-six, appears thereon or therein.

9. Whether any advertisements not permanently attached are inclosed therewith. (See section 343.)

10. When a postmaster has reason to believe that a publication has, after admission to the pound rate, so changed its character as not to be legally entitled thereto, he may require a sworn statement as to its list of subscribers to be furnished him, which, with any other facts or evidence within his knowledge, he will forward to the Third Assistant Postmaster-General.

SEC. 345. RECORD OF SECOND-CLASS MATTER.—Postmasters must keep a record of all publications of the second class mailed at their post-offices, and send a duplicate thereof to the Third Assistant Postmaster-General, and report to him on the first day of each month any change made therein.

SEC. 346. SUBMITTING FALSE EVIDENCE PUNISHABLE.—That any person who shall submit, or cause to be submitted, for transportation in the mails, any false evidence to the postmaster relative to the character of his publication, shall be deemed guilty of a misdemeanor, and, upon conviction thereof in any court of competent jurisdiction, shall, for every such offense, be punished by a fine of not less than one hundred nor more than five hundred dollars. (Act of March 3, 1879, § 13, 20 Stats., 359.)

POST-OFFICE DEPARTMENT, OFFICE OF CHIEF POST-OFFICE INSPECTOR,
Washington, D. C., June 21, 1890.

SIR: I hand you herewith papers in case No. 121527 C, which is a recent report of Inspector Arrington on the Grange Camp, Va., post-office.

I invite your attention to the statement of Alex. J. Wedderburn herewith, taken by me on the 20th instant, and call your attention particularly to that portion where he states that he sends his mail matter to the post-office at Grange Camp, and that the assistant postmaster affixes stamps, and forwards it, without prepayment for stamps;

and that occasionally, or about every three months, Mr. Wedderburn pays the postmaster for the stamps, which is in violation of section 348, Postal Laws and Regulations of 1887.

As Mr. Arrington has had charge of this case, and understands it pretty thoroughly, it is suggested that he continue to follow it up.

I desire to call you attention to the fact that, in the opinion of this office, a conspiracy was entered into between the postmaster (Luckett) and Wedderburn to defraud the Government. We have a statement which materially bears on that point, from Mr. Wedderburn. I doubt not that the inspector will secure evidence of conspiracy, which, taken in connection with Mr. Wedderburn's statement, will establish a case.

Of course, the inspector will understand that after the conspiracy has been established, that the acts of one are the acts of both.

Attention is also invited to a copy of a report from William S. Ridgely, post-office inspector, to W. P. Ryan, inspector in charge, of March 2, 1888, in case 98847 C. Attention is also invited to the communication of Third Assistant Postmaster-General, of June 20, 1890, which the inspector will please consider in his investigation.

Very respectfully,

E. G. RATHBONE,
Chief Inspector.

J. D. KING, Esq.,
Inspector in charge, Washington, D. C.

POST-OFFICE DEPARTMENT, OFFICE OF CHIEF POST-OFFICE INSPECTOR,
Washington, D.C., July 16, 1890.

SIR: Referring to the matter of the discontinuance of the post-office at Grange Camp, Va., the Postmaster-General desires an inspector to visit that locality again, at the earliest practicable date, for the purpose of ascertaining the relative positions of the different post-offices surrounding Grange Camp. It would be well for the inspector to make a diagram or map, showing the position of the Grange Camp office and other contiguous offices. It is also desired that the inspector get the list of petitioners who petitioned the Department for the establishment of the office, go over it very carefully, and ascertain all about them, particularly as to whether or not they are within the delivery of the Grange Camp office, and whether or not they are bona fide petitioners.

Very respectfully,

E. G. RATHBONE,
Chief Inspector.

J. D. KING, Esq.,
Inspector in charge Washington, D. C.

VIENNA, VA., *July* 15, 1890.

DEAR SIR: Being personally acquainted with this section of Fairfax County, its people, and surroundings, I take pleasure in stating that I believe it to be to the interests of the people of this section that the post-office at Grange Camp be re-established.

The Grange Camp Association is an organization devoted to the welfare of agriculture, and is intended to develop the agriculture of our county.

To discontinue the office at Grange Camp will certainly be an injury not only to the locality, but to the county and to this section of Virginia.

Yours, very respectfully,

A. FREEMAN.

Hon. JOHN WANAMAKER,
Postmaster-General, Washington, D. C.

COMMITTEE ON AGRICULTURE AND FORESTRY, UNITED STATES SENATE,
Washington, D. C., July 7, 1890.

MY DEAR SIR: On the basis of the statements presented in the letters of the Hon. R. R. Farr, United States marshal of the eastern district of Virginia, and the Hon. Park Agnew, of Alexandria, with reference to the recent discontinuance of the post-office at Grange Camp, I shall be much pleased if you can see your way clear to continue the reception and distribution of mails at that point. I understand that the office is

one of growing importance; that it is situated on the ground of the great agricultural fair of the Virginia State Grange, and that the post-office there has in no sense been run for the private advantage of any individual, but rather for the best interests of the various patrons.

Very respectfully yours,

A. S. PADDOCK.

Hon. JOHN WANAMAKER,
Postmaster-General, Washington, D. C.

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., July 15, 1890.

SIR: I beg to acknowledge receipt of your communication of 7th inst., concerning the matter of the discontinuance of the post-office at Grange Camp, Va., in which you state that you will be much pleased if I can see my way clear to continue the reception and distribution of mails at that point. In this connection I beg to state that the recent investigation of another matter at Grange Camp post-office developed the fact that the office was being used almost exclusively by a Mr. A. J. Wedderburn, who publishes a paper at Alexandria, Va., and sends it by freight to Grange Camp, where it is mailed. The inspector's report shows that there are but two families who get mail at Grange Camp aside from Mr. Wedderburn; that on one side, a distance of one and a quarter miles, is a post office, and on the other, at a distance of about one-third or three-quarters of a mile, is another post-office. It seems to be well established, in fact admitted by Mr. Wedderburn, that about three years ago he caused the appointment of a Mr. Luckett, as postmaster at Grange Camp. Mr. Luckett was an employé of Mr. Wedderburn, and four months after his appointment removed to some point 51 miles away, and has not since that time performed the duties of postmaster. Mr. Swazie was appointed deputy postmaster at the instance of Mr. Wedderburn, and is under his control and influence, so, in fact, Mr. Wedderburn controls the office. It has been developed that the assistant postmaster, Mr. Swazie, would receive Mr. Wedderburn's mail from time to time, stamp it, and every three months render a bill to Mr. Wedderburn for the postage, which Mr. Wedderburn would pay by check. This is a clear violation of the postal laws. The revenues of the office go to Mr. Wedderburn, and he orders supplies from the Department as they are needed, supervises the making of returns to the Department, etc.

The investigation is still in progress, the result of which I will be pleased to communicate to you, if you desire it.

As at present advised, I am not prepared to countermand the order discontinuing the post-office at Grange Camp, Va.

Very respectfully,

JNO. WANAMAKER,
Postmaster-General.

Hon. A. S. PADDOCK,
United States Senate, Washington, D. C.

D.—COPY OF A RESOLUTION OF THE HOUSE OF REPRESENTATIVES, AUGUST 16, 1890.

IN THE HOUSE OF REPRESENTATIVES,
Aagust 16, 1890.

Whereas it is charged in the columns of the New York Sun and other responsible journals that gross frauds have been practiced on the Post-office Department by one Alex. J. Wedderburn, in connection with the transmission through the mails of a large number of circulars in the form of a newspaper—entittled the "National Farm and Fireside"—at one-eighth of the rates established by law; and

Whereas, it is stated that said circulars—printed in Alexandria, Va.—were mailed at a post office near that city, at a place called Grange Camp, where a post-office was established at the request of the said Wedderburn, one of his employés being appointed postmaster; and

Whereas it is stated that an investigation of these facts was made by the proper officers of the Post-Office Department, with the result of discontinuing said post-office after the Government had been defrauded out of a large sum of money by the said Wedderburn in the manner stated; and

Whereas it is asserted that criminal proceedings were not instituted against the

said Wedderburn as required by law, the Department of Agriculture having interposed in behalf of said Wedderburn : Therefore,

Resolved, That the Postmaster-General be, and he is, requested to transmit to the House at the earliest practicable moment all the facts in possession of the Post-Office Department in the matter, including the reports of the special agents or inspectors of said Department therein, together with any correspondence had with the Department of Agriculture in respect to said matter.

Attest :

EDW. MCPHERSON,
Clerk.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 464.

FEES AND EXPENSES OF EXAMINING SURGEONS.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

An estimate submitted by the Secretary of the Interior of the "fees and expenses of examining surgeons" for the fiscal year 1890, $150,000.

SEPTEMBER 8, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
September 6, 1890.

SIR: I have the honor to transmit herewith, for the consideration of Congress, an estimate submitted by the Secretary of the Interior for "fees and expenses of examining surgeons" for the fiscal year 1890, $150,000.

Respectfully, yours,

W. WINDOM,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR,
Washington, September 5, 1890.

SIR: I have the honor to transmit herewith an estimate of a deficiency of $150,000 in the appropriation for "fees and expenses of examining surgeons" for the fiscal year ended June 30, 1890, submitted by the Commissioner of Pensions, and respectfully urge the favorable and early action of Congress thereon.

Very respectfully,

GEO. CHANDLER,
Acting Secretary.

The SECRETARY OF THE TREASURY.

DEPARTMENT OF THE INTERIOR,
BUREAU OF PENSIONS,
Washington, D. C., September 4, 1890.

SIR: I have the honor to invite your attention to the fact that the appropriation of $1,000,000 made by the act of Congress approved

March 1, 1889, for the payment of fees and expenses of examining surgeons for services rendered within the fiscal year 1890, is entirely exhausted, and that a large number of accounts, principally for the quarter ending June 30, 1890, have been rendered to this bureau, but can not be paid on account of the exhaustion of said appropriation. A careful investigation shows that the sum of $150,000 additional will be necessary for the payment of the accounts for services already rendered in said fiscal year and now outstanding. By the terms of the appropriation for the current fiscal year the amount given therein for fees and expenses of examining surgeons for pensions is limited to the payment for services rendered within the present fiscal year, so that I am not at liberty to pay the outstanding accounts chargeable to the appropriation for 1890 out of the current year's appropriation.

I have to request, therefore, that this matter be brought without delay, and through the proper channels, to the attention of the Committee on Appropriations of the House of Representatives, and that they be urged to provide at once for this deficiency.

Very respectfully,

GREEN B. RAUM,
Commissioner of Pensions.

HON. JOHN W. NOBLE,
Secretary of the Interior.

Estimates of appropriations required for the service of the fiscal year ending June 30, 1890, by the Bureau of Pensions, Department of Interior.

Detailed objects of expenditure, and explanations.	Estimated amount which will be required for each detailed object of expenditure.	Amount appropriated for the fiscal year for which the appropriation is required.
For fees and expenses of examining surgeons for services rendered within the fiscal year 1890.		
For fees and expenses of examining surgeons for services rendered within the fiscal year 1890: And each member of each examining board shall, as now authorized by law, receive the sum of $2 for the examination of each applicant, whenever five or a less number shall be examined on any one day, and $1 for the examination of each additional applicant: *Provided*, That if twenty or more applicants appear on one day, no fewer than twenty shall, if practicable, be examined on said day, and that if fewer examinations be then made, twenty or more having appeared, then there shall be paid for the first examination made on the next examination day the fee of $1 only, until twenty examinations shall have been made....	$150,000.00	$1,000,000.00

LA FAYETTE MONUMENT.

A COMMUNICATION FROM THE SECRETARY OF WAR AND CHAIRMAN OF THE COMMISSION ON THE ERECTION OF A MONUMENT TO GENERAL LA FAYETTE, REQUESTING THAT AN APPROPRIATION BE MADE TO ENABLE THE COMMISSION TO CARRY INTO EFFECT THE PROVISIONS OF THE CONCURRENT RESOLUTION OF CONGRESS, PASSED AUGUST 28, 1890, CHANGING THE SITE OF SAID MONUMENT.

SEPTEMBER 10, 1890.—Referred to the Committee on Appropriations.

WAR DEPARTMENT,
Washington, D. C., September 9, 1890.

SIR: In behalf of the commission for the erection of a monument to General La Fayette and his compatriots, created by act of March 3, 1885, I have the honor to state that, to comply with the provisions of the concurrent resolution of Congress, passed August 28, 1890, an appropriation of $5,000 will be required to put in a foundation for the monument at the new site; to move from La Fayette Square so much of the monument as is already set; to put the same in place in a new location; and to improve the grounds around the monument. Your commission urge that this appropriation may be made during the present session of Congress, for, should it not be done, they will be compelled to have the monument set temporarily, for the purpose of inspection, in its present site, in order to fulfill the obligation with the sculptors, as the final payment can not be made to them until the monument is put in place.

Your commission suggests the following language for the appropriation: "To enable the commission having charge of the construction of the monument to General La Fayette and his compatriots to move from La Fayette Square so much of the monument as is set in that square, and for preparing and setting the foundation, and for improving the grounds around the same, at a new site to be selected by the said commission, five thousand doliars, or so much thereof as may be necessary."

Very respectfully,

REDFIELD PROCTOR,
Secretary of War and Chairman of the Commission.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 466.

REPEAL OF A PROVISION OF THE SUNDRY CIVIL ACT.

LETTER

FROM

THE ACTING SECRETARY OF THE TREASURY,

SUBMITTING

Recommendations by the Second Comptroller and Second and Third Auditors that the provisions of the sundry civil act which require that all accounts resulting from the disbursements of the appropriations for the Signal Service or Corps shall be audited by the Third Auditor and Second Comptroller of the Treasury be repealed.

SEPTEMBER 16, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., September 16, 1890.

SIR: I have the honor to invite the attention of Congress to the provision in the sundry civil act approved August 30, 1890, respecting the settlement of the accounts of the Signal Service or Corps, as follows:

> That all accounts of whatever nature resulting from the disbursement of any of the appropriations made for the Signal Service or Corps shall be audited and adjusted by the Third Auditor and Second Comptroller of the Treasury;

and to transmit herewith for the consideration of Congress the recommendations made by the Second Comptroller on the 13th instant, and by the Second and Third Auditors on September 4 and 5 respectively, that said provision be repealed.

Respectfully yours,

GEO. S. BATCHELLER,
Acting Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

TREASURY DEPARTMENT,
SECOND COMPTROLLER'S OFFICE,
Washington, D. C., September 13, 1890.

SIR: I have the honor to invite your attention to the proviso in the sundry civil act, approved August 30, 1890, which so seriously affects the Treasury accounting system, impairing its efficiency and intro-

ducing confusion in the records, that I am constrained, in view of these facts and of the complications which must necessarily arise in three of the bureaus of the Treasury Department, namely, the Second Auditor's Office, the Third Auditor's Office, and the Second Comptroller's Office, to request that you urge upon Congress the necessity for repeal of the proviso in question.

The proviso referred to is the following:

> That all accounts of whatever nature resulting from the disbursement of any of the appropriations made for the Signal Service or Corps shall be audited and adjusted by the Third Auditor and Second Comptroller of the Treasury. (See page 32 of Public Act No. 245.)

In this connection I have also the honor to invite your attention to the inclosed letter of the Third Auditor, dated September 4, 1890, and to that of the Second Auditor, dated September 5, 1890, calling attention to the same proviso and to some of the serious complications which will ensue if it is not immediately repealed.

The proviso contained in the sundry civil act of the last fiscal year (1890) and continued in that for the present year (1891) providing for the payment of the enlisted men of the Signal Corps by one check, upon one properly certified voucher, instead of as theretofore by two or more checks and vouchers, was and is of undoubted advantage to the Signal Service as well as to the Signal Office, and of no disadvantage to the accounting officers of the Treasury. I am therefore of opinion that the proviso should remain as it now stands.

Bu the new proviso, above referred to, taking away from the Second Auditor the auditing and adjustment of the accounts of a single disbursing officer and conferring the duty upon the Third Auditor, who has never heretofore had jurisdiction of the appropriations involved, can be of no great advantage to the Signal Office, but is of positive disadvantage, present and prospective, to the Second Auditor, the Third Auditor, and the Second Comptroller.

I have the honor to be, very respectfully,

B. F. GILKESON,
Comptroller.

Hon. WILLIAM WINDOM,
Secretary of the Treasury.

TREASURY DEPARTMENT,
THIRD AUDITOR'S OFFICE,
Washington, D. C., September 4, 1890.

SIR: From a copy of the act (Public, 245) of the 30th ultimo, making appropriations for "sundry civil expenses of the Government for the fiscal year ending June 30, 1891," I find the appropriations for the Signal Service on pages 31 to 35 inclusive, and on examination of the same I find on page 32 a provision which makes it part of the duties of the Third Auditor to settle all the accounts for the disbursement of funds in support of said Corps or Service. I scarcely need remind you that prior to the fiscal year 1885 certain of the expenses of the Signal Service were paid from the appropriations for the support of the Army. In the act of July 7, 1884, however, the appropriations for the Signal Service were segregated from those for the support of the Army, and the nature of the expenditure indicated the auditing office which should adjudicate the respective classes of accounts.

Paragraph 2 of section 277, Revised Statutes, provides, it shall be the duty of the Second Auditor to adjust "all accounts relating to the pay and clothing of the Army, the subsistence of officers, bounties, and premiums, military and hospital stores," * * * and paragraph 3 of the same section provides, it shall be the duty of the Third Auditor "to receive and examine all accounts relative to the subsistence of the Army, the Quartermaster's Department, and generally all accounts of the War Department other than those provided for," * * * and that section only reaffirms the division of duties made by the act of March 3, 1817."

From the proviso, in page 31 of the act (public No. 245), it will be observed that certain of the classes of accounts now adjudicated by the Second Auditor are, so far as relates to the Signal Service, to be adjudicated hereafter by the Third Auditor, thus after about three-quarters of a century's business changing the duties of this office and those of the Second Auditor's office so that the archives of either office will not hereafter contain all the accounts of either of the classes referred to, which will tend to great inconvenience when investigations are necessary hereafter.

The Second Auditor's office is fully equipped with all the machinery of system necessary to adjust the accounts of the character referred to, of the Signal Service. On the other hand, it will require this office to duplicate the system of the Second Auditor, and the special training of an examiner in this office for that class of work; and all this to adjust the accounts of a single disbursing officer, whose accounts of that character are not very voluminous. Such being the case, it appears to me the change made by the act referred to is prejudicial to the public interests and not in harmony with good business practice.

The foregoing is submitted for your consideration. If you concur in the views outlined above, I suggest you bring the matter to the attention of the Hon. Secretary of the Treasury, with recommendation that he request Congress to repeal the proviso in question by joint resolution or otherwise, as may be best.

Respectfully yours,

W. H. HART,
Auditor.

Hon. B. F. GILKESON,
Second Comptroller.

TREASURY DEPARTMENT,
SECOND AUDITOR'S OFFICE,
Washington, D. C., September 5, 1890.

SIR: I have the honor to invite your attention to the following proviso in the sundry civil act, approved August 30, 1890 (public No. 245, page 32).

That all accounts, of whatever nature, resulting from the disbursement of any of the appropriations made for the Signal Service or Corps shall be audited and adjusted by the Third Auditor and Second Comptroller of the Treasury.

So far as the Signal Service is concerned, this proviso has the effect of constructively repealing existing laws, which require that all accounts relating to the pay and clothing of the Army and to military and hospital stores shall be received and examined by the Second Auditor, and that payments to officers shall be made by paymasters.

As a necessary result of this new legislation the accounts of the offi-

cers and men of the Signal Service will be under the jurisdiction of two accounting officers, neither of which will have a complete record of said accounts; the Second Auditor having those which accrued prior to August 30, 1890, and the Third Auditor those which accrued subsequent to that date. Such a division of accounts is not only undesirable, but objectionable for many reasons, which will no doubt at once suggest themselves.

Since July 1, 1890, all payments to officers and enlisted men of the Signal Service have been made on one voucher, in accordance with the requirements of the sundry civil act of March 2, 1889, and the accounts have been rendered to this office. So far as I am aware, this method of payment and rendition of accounts has worked satisfactorily, and there does not appear to be any reasons for changing it which are not outweighed by the serious objections that may be urged against the exceptive character of the new law.

Respectfully, yours,

J. N. PATTERSON,
Auditor.

The SECOND COMPTROLLER.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { Ex. DOC. No. 467.

ADDITIONAL EXPENSES OF THE UNITED STATES COURTS.

LETTER

FROM

THE ACTING SECRETARY OF THE TREASURY,

TRANSMITTING

Estimates of deficiencies for the expenses of the United States Courts.

SEPTEMBER 19, 1890.—Referred to the Committee on Appropriations.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., September 19, 1890.

SIR: In accordance with the request of the Acting Attorney-General of the 18th instant, estimates of deficiencies and claims on accounts examined in the office of the First Comptroller, and not included in former reports to Congress, under appropriations for expenses of the United States Courts, are herewith submitted, as follows:

Expenses of the United States courts.

For pay of special assistant attorneys, 1889	$712.10
For pay of special assistant attorneys, 1890	6,523.91
For special compensation of district attorneys, 1889	385.00
For special compensation of district attorneys, 1887. (To pay claim of O. A. Galvin, of Massachusetts)	150.00
Total	7,771.01

Respectfully, yours,

GEO. S. BATCHELLER,
Acting Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF JUSTICE,
Washington, D. C., September 18, 1890.

SIR: I this day approve an account in the sum of $150 from the appropriation special compensation United States Attorneys 1887; and another account for $350, special assistant attorneys appropriation 1890.

I respectfully request that these items be added to the statement

made heretofore by your office to the Appropriation Committee of the House of Representatives together with the other bills that are in your office not reported, because received since your last statement was made to the committee.

I wish that the Appropriation Committee may have in hand by to-morrow morning a statement of all matters of accounts approved by this Department for legal services of whatever character for the fiscal years 1888, 1889, and 1890, inclusive, of those mentioned in this communication.

Very respectfully,

WM. H. TAFT,
Acting Attorney General.

The FIRST COMPTROLLER OF THE TREASURY.

WILLIAM SLUSHER.

LETTER

FROM

THE SECRETARY OF THE INTERIOR,

TRANSMITTING

A copy of a communication from the Commissioner of Indian Affairs and also affidavits relative to the depredation claim of William Slusher.

SEPTEMBER 26, 1890.—Referred to the Select Committee on Indian Depredation Claims.

DEPARTMENT OF THE INTERIOR,
Washington, September 24, 1890.

SIR: I have the honor to transmit herewith a copy of a communication of the 18th instant from the Commissioner of Indian Affairs, inclosing affidavits of William Slusher and William Watson relative to the depredation claim of William Slusher, which was transmitted to Congress January 7, 1887.

In compliance with the request of the Commissioner, I have the honor to forward the said affidavits for filing with said claim.

Very respectfully,

JOHN W. NOBLE,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, D. C., September 18, 1890.

SIR: I have the honor to inclose herewith additional testimony in depredation claim No. 2863, of William Slusher, as follows: Supplementary affidavit of William Slusher and affidavit of William Watson, which testimony has been recently filed in this office by Glen W. Cooper, attorney for claimant. This claim was reported to Congress January, 1887 (H. R. Ex. Doc. 77, Forty-ninth Congress, second session), and I therefore respectfully recommend that the papers herewith be also transmitted to Congress for filing with the claim to which they relate. It is deemed proper to add that upon examination of the affi-

davits inclosed nothing appears therein which would warrant this office in changing the conclusions heretofore reached as to the merits of this claim.

Very respectfully,

R. V. BELT,
Acting Commissioner.

The SECRETARY OF THE INTERIOR.

[Affidavit in Indian Depredations Claims—In the claim of William Slusher for Indian depredations.]

STATE OF IOWA, *Fremont County ss:*

Personally came before me, a notary public in and for the aforesaid county, Eli W. Slusher, of Fremont Co., the State of Iowa, who, being first duly sworn, declares in relation to the aforesaid claim as follows, viz: That on or about the 27th day of October, 1864, property belonging to the above-named claimant as below mentioned was taken by Indians of the Sioux tribe at or near Plum Creek, in the State of Nebraska, under the following circumstances:

The said claimant at the time was a freighter of goods, and was traveling at the time from Idaho Territory to Hamburg, Fremont County, Iowa, and had with him a team of two mules and two mares and one horse. I know William Glover and Perry McLum, who were with claimant at the time the stock were taken. Claimant bought one mule from a man by name of Catron, in Salina County, Missouri, and the other mule claimant bought from a man on the plains whose name is to this affiant unknown. Claimant paid for the first-described mule the sum of $185 and for the other one the sum of $200 in gold. The mules were large and about seven years of age and about fifteen hands and one-half high. One of the mares claimant bought from a man in Andrew County, Mo., by the name of Calhoun. She was at the time she was taken about eight years old. The other mare was when taken four years old. The other horse was when taken four years old. The last two described horses were raised by claimant. There was also taken at the same time from claimant two sets of harness, cost $45 per set, and the same were purchased the summer they were taken, making a total cost of $90 for the two sets.

I am the son of claimant and am attorney in fact for him, he being too old to look after his business, and the only interest I have in the prosecution is as above stated.

ELI W. SLUSHER.

Sworn and subscribed to by Eli W. Slusher this 1st day of June, A. D. 1888, and I certify that I read the foregoing affidavit over to him before signing the same, and I am not interested in the prosecution of this claim, and all interlineations were made before signing.

[SEAL.]

SAMUEL HOLMES,
Notary Public.

[In the matter of the claim of William Slusher for depredations of Indians.]

STATE OF IOWA, *County of Fremont:*

Before me, a notary public in and for the aforesaid county and State, personally appeared William Watson, who deposes and says: That he is the same person who made an affidavit on the 19th day of September, 1865, in the matter of the claim of William Slusher for losses by depredation of Sioux Indians. He states further, that on the occasion of said depredations at or near Plum Creek, Nebraska, the Indians, believed to be Sioux, attacked the claimant and his party where they were camped, about 9 or 10 o'clock in the evening, and killed Mr. Beson and wounded three others of the party, and took three horses and two mules and two sets of harness from the claimant. The horses were large American horses, and the mules were of large size. The mules and horses, being used for freighting, were necessarily of a good size, and were selected, I believe, for their strength. It was a dark, rainy night when the Indians stole up to where the animals were picketed and cut the pickets and drove the animals away. I knew William Glover and Perry McGlum, who were with us at the time. I was with the claimant for about eight to ten weeks and became familiar with the animals which were taken.

WM. WATSON.

Sworn to and subscribed before me this 10th of July, 1888, and I further certify that the aforesaid affidavit was read to the affiant before he subscribed and made oath thereto. I am in no wise interested in the claim therein mentioned nor concerned in its prosecution.

J. P. BEACH,
Notary Public.

51ST CONGRESS, 1st Session. } HOUSE OF REPRESENTATIVES. { EX. DOC. No. 469.

THOMAS E. OWEN.

LETTER

FROM

THE SECRETARY OF THE INTERIOR,

TRANSMITTING

A copy of a communication from the Commissioner of Indian Affairs, and also affidavits relative to the depredation claim of Thomas E. Owen.

SEPTEMBER 26, 1890.—Referred to the Committee on Indian Depredation Claims.

DEPARTMENT OF THE INTERIOR,
Washington, September 24, 1890.

SIR: I have the honor to transmit herewith a copy of a communication of the 18th instant from the Commissioner of Indian Affairs, inclosing affidavits of Thomas E. Owen, Alexander Wamsley, and G. W. Thompson, relative to the depredation claim of Thomas E. Owen, which was submitted to Congress, January 7, 1887.

In compliance with the request of the Commissioner, I have the honor to forward the said affidavits for filing with said claim.

Very respectfully,

JOHN W. NOBLE,
Secretary.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, D. C., September 18, 1890.

SIR: I have the honor to inclose herewith additional testimony in depredation claim, No. 1338, of Thomas E. Owen, as follows: Supplementary affidavit of Thomas E. Owen, affidavit of Alexander Wamsley, and affidavit of G. W. Thompson, which testimony has been recently filed in this office by Glen W. Cooper, attorney for the claimant. This claim was reported to Congress, January, 1887, (H. R. Ex. Doc. 77, Forty-ninth Congress, second session, and I therefore respectfully recommend that the papers herewith be also transmitted to Congress for filing with the claim to which they relate. It is deemed proper to add

that upon examination of the affidavits inclosed, nothing appears therein which would warrant this Office in changing the conclusions heretofore reached as to the merits of this claim.

Very respectfully,

R. V. BELT,
Acting Commissioner.

The SECRETARY OF THE INTERIOR.

TERRITORY OF NEW MEXICO, *County of Colfax*, ss:

Before me, Homer E. Byler, a notary public in and for the county aforesaid, personally appeared Thomas E. Owen, who being duly sworn according to law, deposes and says that in the matter of his claim, No. 1338, filed in the Interior Department, for depredation of Arapahoe Indians in 1872, the stock taken was two horses, two mares, and one mule. One of the horses, for which $250 is charged in my claim, was at the time five years' old, color bay, height 16 hands, and was foaled and raised in Kentucky. I bought him and his mate in Lexington, Mo., for my carriage team. They were blood bays and fine drivers; and I bought them from a man who had just brought them from Kentucky, but I do not now remember his name.

The pair cost me then above $400, and this was about six months before this horse was taken by these Indians. This horse was worth at least $250. The other horse, for which $75 was charged, was a brown half-breed horse, a very good horse, which was worth all the money charged for him, and it cost me $60. The black mare, for which $100 is charged, cost me $80 in Kansas. The mare, for which $125 is charged, was raised in Kansas and cost me $100; but both animals were, at the time they were taken, in good condition and worth considerable more than what I had paid for them.

The mule taken was 14 hands high and was worth $100 or more. The prices put on these animals are not in the least too large, but are what I valued them at the time, and I would not have sold them for less if I could have avoided it. I owned no Mexico ponies and had none amongst my stock at the time it was taken.

THOMAS E. OWEN.

Sworn to and subscribed before me, this day, by the above-named affiant; and I further certify that I read said affidavit to said official, and acquainted him with its contents before he subscribed and made oath thereto, and I further certify that I am in nowise interested in said claim, nor am I concerned in its prosecution.

Witness my hand and official seal this 3d day of September A. D. 1888.

[SEAL.] HOMER E. BYLER,
Notary Public.

Commission expires November 21, 1888.

TERRITORY OF NEW MEXICO, *County of Colfax*, ss.

In the claim of Thomas E. Owen, for Indian depredations, personally came before me, a ——— in and for the aforesaid county and Territory, the affiant, Alexis Wamsley, of Clayton, in the county of Colfax, Territory of New Mexico, who being first duly sworn, declares in relation to the aforesaid claim, as follows, viz.:

That on or about the —— day of September, 1872, property belonging to the said claimant, as below mentioned, was taken by Indians of the Arapahoe tribe at or near Dry Cimarron, in Colfax county, in the Territory of New Mexico, as I was at the time it occurred informed by reliable parties who are not interested and whom as well as the claimant I believed stated the truth.

The following is a list of the property as aforesaid: 1 bay horse (American), 1 black mare (American), 1 black mare, 1 brown horse, 1 black mule, of the value as hereafter stated.

The bay horse was large, about 16 hands high, and I believe he was worth then and there about $250 at least; his age was about five years or so. The one mare was worth $125, and the other worth $100, about. The brown horse was worth at least $75, I think, and the mule at least $75. These horses and mares were American bred and not native or bronchos. This stock being in all of the value of $625.

The foregoing is a full statement of the amount of the property taken as stated.

That the several articles were of the value therein charged at the time and place the same were taken; that I acquired the information above stated as follows: By

seeing the said stock on the place of the claimant at different times in 1871 and 1872, and shortly before it was taken by said Indians, and that I have no interest in said claim and am not concerned in its prosecution.

ALEXIS WAMSLEY.

TERRITORY OF NEW MEXICO, *County of Colfax, ss.*

Sworn to and subscribed before me, this day, by the above-named affiant; and I further certify that I read said affidavit to said affiant and acquainted him with its contents before he subscribed and made oath thereto, and I further certify that I am in nowise interested in said claim, nor am I concerned in its prose ution.

Witness my hand and official seal this 3d day of September, 1888.

[SEAL.] HOMER E. BYLER,
Notary Public.

Commission expires November 21, 1891.

STATE OF COLORADO, *County of Las Animas.*

In the matter of claim of Thomas E. Owen, now of Capulen, New Mexico, and formerly of Colorado, for loss of horses and mule in 1872, by depredations of Arapahoe Indians, before me, a notary public, in and for the State and county aforesaid, personally appeared G. W. Thompson, of said county, who, being duly sworn according to law deposes and says that he is personally acquainted with the claimant, Thomas E. Owen, and has known him over sixteen years. That he knows that in 1872 the claimant owned a fine bay horse which deponent saw at different times on claimant's ranch in Colorado, and which, amongst other stock (as the deponent was informed and believes), the claimant had taken from him by the Arapahoe Indians in 1872. The said horse was a bay, and aged about seven to nine years in 1872, and in my judgment was worth $250. The horse was an American horse and a good driver. I am a judge of the value of horses, being a dealer in livestock, and am at present running a stock farm in Colorado at Trinidad.

G. W. THOMPSON.

Sworn and subscribed before me this 21st day of September, A. D. 1888.

[SEAL.] JOHN W. DOUTHIT,
Notary Public.

Commission expires September 11, A. D. 1890.

51ST CONGRESS, 1st Session. | HOUSE OF REPRESENTATIVES. | Ex. Doc. No. 470.

MESSAGE

FROM THE

PRESIDENT OF THE UNITED STATES,

TRANSMITTING

In answer to the resolution of the House of Representatives of August 20, 1890, concerning the enforcement of proscriptive edicts against the Jews in Russia, a report from the Secretary of State upon the subject.

OCTOBER 1, 1890.—Referred to the Committee on Foreign Affairs.

To the House of Representatives:

I transmit herewith, in answer to the resolution of the House of Representatives of August 20, 1890, concerning the enforcement of proscriptive edicts against the Jews in Russia, a report from the Secretary of State upon the subject.

BENJ. HARRISON.

EXECUTIVE MANSION, *October* 1, 1890.

The PRESIDENT:

The Secretary of State, to whom was referred a resolution adopted by the House of Representatives on August 20, 1890, requesting the President—

> To communicate to the House of Representatives, if not incompatible with the public interests, any information in his possession concerning the enforcement of proscriptive edicts against the Jews in Russia, recently ordered, as reported in the public press; and whether any American citizens have, because of their religion, been ordered to be expelled from Russia, or forbidden the exercise of the ordinary privileges enjoyed by the inhabitants,

has the honor to submit a report, accompanying a selection of the correspondence on file in the Department of State which is pertinent to the objects of the resolution, to the end that the same be communicated to the House of Representatives, if to do so be not deemed incompatible with the public interests.

The inquiries of the resolution embrace two distinct subjects. In the first place, request is made for information touching the report, to which considerable publicity has been given by the press of the United States and of Europe, that the Government of Russia has recently ordered the enforcement of proscriptive edicts against the Hebrews of that country, which, it is said, if applied, would result in the expulsion of a large number, estimated at a million or more of Russian Jews. The second request is for information of any acts of expulsion or religious oppression done in respect of American citizens in the Russian Empire.

In both aspects the present resolution appears to supplement and continue the inquiry propounded in the former resolution of the House of Representatives, adopted January 30, 1882, "relative to the expulsion of American Israelites from Russia and the persecution of the Jews in the Russian Empire." The message of the President sent to the House of Representatives on May 2, 1882, contained a full selection of the correspondence on the subjects named, found in the files of the Department of State, for some ten years previously. It was printed as House Executive Document No. 192, Forty-seventh Congress, first session; and a copy is hereto appended in order that the present report may cover the whole ground of inquiry as fully as possible. Since that time correspondence has been had with the Government of Russia in several cases of alleged interference by the Russian authorities with the rights of citizens of the United States professing or being supposed to profess the Jewish faith. It is, therefore, thought proper to submit a selection of such correspondence as showing that the Government of the United States has omitted no proper occasion of remonstrance against the application of a religious test to our citizens in Russia, or having interests in Russia, and against the enforcement of a disqualification founded on such test; which proceeding is without warrant of recognition in the treaty stipulations betweed the United States and Russia, and moreover, is repugnant to the fundamental doctrine of freedom of conscience and equality of religious belief on which organized society almost universally rests in our day.

There is room for gratification in the fact that instances of interference with the liberty and treaty rights of our citizens in Russia on the professed ground of their religion are infrequent. Holding, as the Government of Russia does, that a change of citizenship without imperial permission is an offense, for which punishment may be inflicted if the person return within Russian jurisdiction, it is worthy of note that very few naturalized citizens of Russian origin, revisiting Russia and paying orderly respect to the laws of the Empire, have been expelled or punished. In the exceptional instances, the action of the Russian authorities has generally developed an allegation that the person is a Jew. This statement is often put forward in connection with some other charge, either of political misconduct or evasion of military duty or infringement of the conditions of residence and trade-license with which the mercantile operations of Jews in Russia have been long surrounded. No instance is recalled of any native American Jew, not of Russian origin, visiting Russia without engaging in local trade having been molested. Hebraism appears, therefore, to be regarded in practice by the Russian authorities as an incident, important in itself in affecting the result, but still accessory to other conditions, political or commercial, which determine the treatment of the individnal.

One of the cases disclosed by the submitted correspondence, that of Mr. Adolph Kutner, although not involving actual expulsion, is interesting in that his petition, as a native of Russian Poland naturalized in the United States, to be permitted to revisit the country of his birth, having been presented through the good offices of the United States Legation at St. Petersburg, was met by an official request to be informed, among other facts, of the religion of the applicant. In reply, the representative of the United States was instructed that, in conveying the inquiry of the Imperial Foreign Office to Mr. Kutner, the Department of State found itself unable to interrogate him as to the religion professed by him, inasmuch as the Constitution of the United States prohibits the application of any religious test whatever in respect of our

citizens. In dealing with all this class of cases, the Department has scrupulously abstained from taking official cognizance of the religious faith of any citizen. It can not inquire into it as a fact, and it can neither affirm nor deny that an individual holds a particular creed. As was said by Mr. Evarts, when Secretary of State, in an instruction to Mr. John W. Foster, dated March 3, 1881:

> This Government does not know or inquire the religion of the American citizens it protects. It can not take cognizance of the methods by which the Russian authorities may arrive at the conclusion or conjecture that any given American citizen professes the Israelitish faith. The discussion of the recent cases has not as yet developed any judicial procedure whereby an American citizen, otherwise unoffending against the laws, is to be convicted of Judaism, if that be an offense under Russian law.

And in an instruction shortly afterwards addressed to Mr. Foster under date of July 29, 1881, the undersigned said of the relation of the State to its citizens, that the Government of the United States

> can make absolutely no discrimination between them, whatever be their origin or creed. So that they abide by the laws, at home or abroad, it must give them due protection and expect like protection for them. Any unfriendly or discriminatory act against them on the part of a foreign power with which we are at peace would call for our earnest remonstrance, whether a treaty existed or not.

A large part of the accompanying correspondence is taken up by the case of Hermann Kempinski, a naturalized citizen of Russian origin, who, on returning to his former home, was proceeded against for non-performance of military duty. The statement, which was not questioned by Kempinski or his friends, that he was a Jew, appears to have been merely incidental, for it is not known that Russian Jews are claimed to be subject to conditions of military service, or to penalties for non-fulfillment, different from those in respect to Russians professing any other creed. The discussion was followed entirely on the ground of Kempinski's American citizenship, until removed by the prisoner's petition and by his alleged renunciation of the status acquired by naturalization, to the domain of imperial clemency. It is understood that Kempinski's application has been successful, and that, upon his release, he has returned to the United States.

Another class of questions, affecting in some instances the interests of citizens of the United States, of Russian origin, residing in the United States, has been the occasion of correspondence during the past few years. The diplomatic and consular representatives of Russia in the United States have in various cases refused to authenticate legal documents executed in the United States and relating to the transfer or inheritance of real property in Russia, on the ground that, under existing Russian law, such transfer or inheritance was invalid because the parties were Jews. The question concerns that branch of private international law which relates to the municipal regulation of the rights of aliens or of non-residents to hold real property. While this department found occasion to emphasize its incompetency to ascertain or recognize the religious faith imputed to the parties, especially when, as happened in some instances, they were Russian subjects sojourning in this country, it was not in a position to bring about any modification of the Russian municipal requirements in regard to property exclusively within Russian jurisdiction. As this correspondence affects private interests, it is not deemed advisable to disclose the personal affairs of the parties by its publication. The fact is mentioned as tending to show that the domestic regulation of the property rights of Russian Jews has been more or less systematically enforced under existing edicts, and not in consequence of newly enacted proscriptive measures.

The subject has thus far been presented with regard to the rights and treatment of American citizens within Russian jurisdiction, thus meeting the second branch of the resolution now under consideration. The first part of the resolution remains to be examined on broader grounds, inasmuch as it relates to the course which, it is said, the Imperial Government of Russia is about to adopt or enforce in respect to a great number of native Russian subjects.

Whatever may be the abstract obligation of one nation to refrain from interference in the internal concerns of another, it is yet conceivable that the domestic policy of a State toward its own subjects may be such as to arouse legitimate concern, either because at variance with the large principles of humanity which control enlightened communities, or because the operation of such policy may tend to perturb the general interests of other States. A people, nurtured in respect for tolerance, recognizing the equal rights of all men to liberty and its attendant privileges, and venerating the axiom that the obedience of the individual to the law, and the protection of the natural rights of the individual by the law, are reciprocal obligations, could not fail to be alarmed at a report that a powerful Government was about to take measures resulting in the expulsion from its territory of vast numbers of its subjects because of the religion professed by them. Such a step, if in reality contemplated, would not only wound the universal and innate sentiment of humanity but would suggest the difficult problem of affording an immediate asylum to a million or more of exiles without seriously deranging the conditions of labor and of social organization in other communities.

When, therefore, the Department of State learned of the report that the Russian Government was about to take steps for the wholesale expulsion of Jews from Russia, an immediate inquiry as to the truth of the rumor was made by telegraph on 31st July last, of the diplomatic representative of the United States at St. Petersburg. The reply of the chargé d'affaires *ad interim*, Mr. George W. Wurts, received the next day, announced the rumor to be without foundation.

The reports of the contemplated expulsion continuing, and more definite representations being made that no new step was intended, but rather the rigid enforcement of existing edicts of 1882 hitherto leniently administered, whereby a large part of the Jewish population of the Russian Empire would be deprived of the means of livelihood and forced to emigrate, Mr. Wurts was, on the 7th of August, directed to telegraph the main features of those edicts, and to make a full report by mail of all that he could learn on the subject.

Mr. Wurts replied August 9 that he had the highest authority for maintaining that the Russian Government does not contemplate any change from the present lenient enforcement of the Jewish edicts of 1882. He added that the general legislation in regard to Hebrews in Russia, if applied, would be of an oppressive character.

Subsequently, under date of August 14, 1890, Mr. Wurts communicated, by telegraph and mail, the text of article 272 of the Ordinance No. 43, of 12th May, 1882, respecting the application of temporary regulations relating to Jews in the empire. The provisions of this article, comprising four sections, are as follows:

1. As a temporary measure, and pending the revision, in the order established, of the laws relating to the Jews, to prohibit the latter in the future from settling anew outside of towns and boroughs, with exception in this respect only of the present existing Jewish colonies engaged in agriculture.

2. To suspend temporarily the conclusion of deeds of sale and mortgage bonds in

the name of Jews, and similarly the attestation in the name of Jews of leases for real estate situated outside the limits of towns and boroughs, and of powers of attorney for the management and direction of such estate.

3. To prohibit Jews from trading on Sundays and the chief Christian holidays, with the provision that the closing on the days indicated of the trading establishments belonging to Jews should take place in the order established for such purpose in regard to closing establishments belonging to Christians.

4. The measures indicated in paragraphs 1, 2, and 3 are only to be applied in those provinces wherein the Jews permanently reside.

This provisional enactment was confirmed by imperial rescript on May 3, 1882.

The full text of the several edicts of 1882, to which the above provisional ukase is a supplement, is not in the possession of this Department, nor of the legation at St. Petersburg. The edicts are very voluminous and, within the compass of some thousands of articles, comprise a code regulating the civil, social, industrial, educational, and religious relations of Jews, among themselves and to the community in which they reside. No complete translation into English is known to exist. A publication in the New York Times of August 24, 1890, purports to give a translation of a number of the more important and interesting provisions of the so-called "May Edicts" of 1882, and a copy is hereto appended, without, however, vouching for its accuracy.

The promised full reports of Mr. Wurts have been received. They are to some extent confidential, repeating the opinions of persons in high standing in St. Petersburg, whose views as to the relation of the Russian Jews to the State, and whose expressed conviction that the Imperial Government contemplates no course of action which would drive a fourth part, or more, of the four millions of Jews now in the empire into exile, have been communicated to him under friendly reserve. The substance of his reports may be thus summarized:

The rumor that there is in contemplation by the Government any project of law looking to the general expulsion of Hebrews from the empire is not founded; the tendency in certain high official quarters being towards a less severe application of the laws now in force against that race. This tendency, while not springing from any increased sympathy with them, has its source in economic reasons due to the greatly needed commercial services of the Jews in various channels of trade, especially in the grain trade, much of which is in their hands.

There are said to be two opposite influences bearing upon the Jewish question, that of the administrative authorities now as heretofore sternly set against the toleration of the race, and that of the financial authorities, which is favorable to leniency in the treatment of this people because of their several useful employments.

The Government itself standing between these influences inclines not only to regard the rigorous application of exclusion laws to Israelites as impolitic, but even to conserve the people of this race as, in certain respects, an absolutely necessary element in the empire. The entire good faith of these intimations is not questioned by those of Mr. Wurts's colleagues at St. Petersburg, representing governments interested equally with our own in the question.

It may be proper to consider the effect of certain recent newspaper articles touching the subject of this report, notably a letter and an editorial article in the London Times of July 30, last, and an article in the Jewish Chronicle, of London, recapitulated in the Globe of that city, both of which created marked impressions in the Russian capital, not favorable to the Hebrew race. The publications in the London Times elicited from the Novoe Vremya, the leading Russian newspaper, certain

comments, the substance of which is herewith submitted. The article in the London Jewish Chronicle was regarded as an admission on the part of that representative journal of certain violations of the laws of the Empire for the governance of the Jews, to which might be traced the impelling cause of recent restrictive measures said to have been proposed by the Government of the Czar, or resuscitated from the great volume of comparatively dormant legislation in relation to that people. A copy of the Globe's article in point is also submitted herewith.

The gradual and undisturbed advance of the Jewish population into prohibited districts would seem to have attained a stage where sufficient reasons appeared to the Government for repelling it; and to the enforcement, or projected enforcement of administrative acts of repulsion may in turn be traced the alarm excited in regard to the rumored edicts of expulsion so emphatically denied in official quarters.

Recent discussion of the subject in diplomatic circles at St. Petersburg attracted general attention to the fact that the solicitude of each of several of the foreign states there represented in respect to the status of the Jewish race in Russia found simultaneous expression; and this was regarded as somewhat suggestive of concerted action between the more apprehensive portion of the race in the empire, and their fellow Hebrews in other countries. A prominent Jew in St. Petersburg, however, apparently well known to the diplomatic corps there, and in a position to speak with the weight of experienced judgment, expressed the opinion that there was no occasion for apprehending that the Government intended to issue new edicts, or to enforce rigorously those now in existence for the purpose of expulsion. The present laws are ample for that purpose; but the general sentiment is that the obvious importance of the Hebrews as factors in Russian commerce is sufficient warrant for discrediting rumors that the Government entertains the design of expelling them.

The whole tenor of the information so obtained and reported by Mr. Wurts, indicates a disposition on the part of the Russian Government generally to mitigate the rigid enforcement of existing laws applicable to the Jewish people, although the imperial ministers of state do not appear to be in a position actively to interfere in individual cases of strict application of those laws in the provinces. The attitude assumed by the ministers of state is negative—a policy of inaction and leniency—and perhaps, on that account, the more practical under the peculiar circumstances.

To sum up the situation, Mr. Wurts' language may be substantially quoted:

> In regard to the assurances given that there is no intention of the Imperial Government to change the present lenient application of the laws in vigor, none more worthy of respect than those mentioned could be obtained. At the same time these same high functionaries would not hold themselves responsible in an isolated case of severity of treatment of Jews which might take place under exceptional circumstances by some governor of a province who, armed with the decrees of 1882, would be justified in their application if he thought proper; but this would not prove that the general policy of mild enforcement of these laws had been changed. It means simply that no orders have been issued to change the manner of application of these edicts; and I can but join with the other diplomatic agents interrogated on the subject in believing that these statements should be accepted.

The resolution of the House of Representatives like the previous resolution of May 2, 1882, suggests an apprehension that the enforcement of general proscriptive measures against Jews in Russia may invade the rights of citizens of the United States resorting to Russia. So far as an examination of the edicts in question has been possible, they appear

to regulate the residence and occupation of Jews domiciled in Russia and forming part of the permanent population of the empire. The trades of Jews, like those of other Russians, are governed by a license system and classified into organized guilds. They are, however, confined within certain limits of residence. So, also, with regard to agricultural colonies, which, when established by Jews, can only lawfully exist in certain provinces and within defined municipal bounds. The regulation of the professions is common to all countries, but in Russia it is notably circumscribed as regards Jews, both in respect of the calling followed, and the locality where its practice is licit. In all these cases the individual is dealt with as a denizen of the Empire, and his pursuits as making part of the labor, trade or vocation of the whole body politic. There may, therefore, be room for reflection as to how far such regulation and control is likely to affect the interests of any American. It is probable that there are few instances where a citizen of the United States will be found to have so far taken up his abode in Russia, by engaging in a regulated trade or calling, subject to the general Jewish edicts, as to have become domiciled there.

Respectfully submitted,

JAMES G. BLAINE.

No. 1.

Message from the President of the United States, in response to a resolution of the House of Representatives, transmitting a communication from the Secretary of State respecting the condition of Israelites in Russia.

To the House of Representatives:

In answer to the resolution of the House of Representatives of the 30th January last, calling for correspondence respecting the condition of Israelites in Russia, I transmit herewith a report of the Secretary of State and its accompanying papers.

CHESTER A. ARTHUR.

EXECUTIVE MANSION,
Washington, May 2, 1882.

DEPARTMENT OF STATE,
Washington, May 2, 1882.

The Secretary of State to whom was referred the resolution of the House of Representatives of the 30th January last, requesting the President, if not incompatible with public interests, "to communicate to this House all correspondence between the State Department and the United States minister at St. Petersburg, relative to the expulsion of American Israelites from Russia and the persecution of the Jews in the Russian Empire," has the honor to lay before the President the papers named in the subjoined list.

Respectfully submitted.

FRED'K T. FRELINGHUYSEN.

No. 1.—*Mr. Schuyler to Mr. Fish.*

No. 21.] LEGATION OF THE UNITED STATES,
St. Petersburg, September 29, 1872. (Received October 15.)

SIR: I have the honor to inclose you a memorandum, marked A, on the legal position of the Hebrews in Russia.

I have, etc.,

EUGENE SCHUYLER,
Chargé d'Affaires ad int.

[Inclosure A in No. 21.]

MEMORANDUM ON THE LEGAL POSITION OF THE HEBREWS IN RUSSIA.

Up to the year 1835, the Hebrews in Russia and Poland were subjected to many and onerous disabilities, both civil and religious. From that time the Imperial Government has pursued the constant policy of alleviating their condition, but though much has been done, much still remains to be done before the Hebrews will be on an equality with the other subjects of the empire.

The disabilities and exceptional position of the Israelites in Russia are based, not on grounds of religious intolerance, but on the idea that the Hebrew race "has a natural tendency to *exploiter* the population in the midst of which it is settled," and that the Hebrews are, therefore, harmful to the state. The restrictions, therefore, which surround the Hebrews are rather of a civil than a religious nature, though these latter are not without their importance.

The present position of the Hebrews in Russia, so far as it is regulated or affected by the laws, is substantially this: The Hebrews are an alien race, living in Russia and owing allegiance to the Imperial Government, subject to all the burdens and endowed with few of the privileges of Russian subjects. On the assumed theory of their being hurtful to the population at large, they are under the special supervision of the Government, and are restricted in their place of abode, their occupations, acquisition of property, mode of life, dress, education, and manner of worship.

The special legislation with regard to the Hebrews may roughly be divided into two heads, as concerns their civil and their religious rights.

CIVIL RIGHTS.

Hebrews are allowed to live only in the kingdom of Poland and the governments of Wilna, Grodno, Kovno, Minsk, Tchernigof, Podolia, Volhynia, Paltava, Ekaterinoslav, Cherson, Bessarabia, Kief (except the city of Kief), Taurid (except Sevastopol), Vitebsk, and Mohilef (in the last two without the right of living in villages). In the governments of Courland, Livonia, Stavropol, and the Trans-Caucasus those Hebrews who lived there before the prohibitions of 1835, 1837, and 1841 are suffered to remain, but no others may settle there.

Hebrews are forbidden to reside in the whole of the rest of Russia, and especially in the northeastern and Caucassian ports of the Black Sea, with some few exceptions.* Siberia is absolutely and forever closed to them. Exceptions to these prohibitions with regard to residence are made in favor of education, riches, and the mechanical arts.

By the laws of 1866 and 1868, Hebrews who have received the degree of doctor of medicine or surgery, or any university degree, can live where they please, and occupy themselves with commerce, manufactures, or their professions. The same privilege has been this year extended to the graduates of the St. Petersburg Technological Institute. For the purpose of attendance at the universities and the higher educational establishments, Hebrews are allowed to leave their settled abodes and reside in the towns where these establishments exist, but children of Hebrew parents are allowed to receive a general or middle education only in those places where they are permitted a settled abode.

By becoming merchants of the first guild, *i. e.*, practically by paying a yearly tax of about a thousand rubles, Hebrews are allowed to live in any city of the empire, and take with them their families, domestics, and clerks.

A still greater exception is made by a law of 1868, which permits Hebrew artisans to join trades-unions and guilds outside of the districts fixed for their settled habita-

* There is one Hebrew, a citizen of the United States, living in the city of Kharkoff. An exception was made in his favor on the representation of the American legation that the quality of Hebrew should be considered merged into that of citizen of the United States.

tion, and Hebrew mechanicians, distillers, brewers, and, in general, all artisans to live in any part of the empire. Hebrews are also allowed to go freely into any part of the empire for the purpose of learning or perfecting themselves in a trade.

One other restriction remains to be noticed, based on the idea that the Hebrews are smugglers, which forbids them to live within fifty versts of the western frontier. An attempt to carry out this regulation some three years ago led to many complaints.

That these restrictions as to residence are not strictly enforced may be seen from the fact that there are Hebrews in every government of Russia except Orenburg and the land of the Don Cossacks. Even in Siberia there are 7,000 and in the Caucasus 16,000. (In St. Petersburg there are now about 7,000 Hebrews, who have a synagogue, and in Moscow a number almost as large.) Still, the result is to keep the main body of them in Poland and the western provinces, where they form a large proportion of the population. In Finland there are none at all. The whole number of Hebrews in the Russian Empire is 2,348,000, or 3.06 per cent. of the population. In Poland the Hebrews constitute 13 per cent. of the population, and in the government of Augustovo 16 per cent.; in the western province from 9 to 13 per cent.; in New Russia from 2 to 9 per cent.; and in Courland nearly 6 per cent.

The natural effect of this crowding together of the Hebrew population, combined with the restrictions on their acquisition of landed property, is to keep them in a comparatively low condition, and to afford them little chance for improvement. The supporters of Jewish emancipation say, with reason, that if the Hebrews are so dangerous to the welfare of the country and population, why protect certain governments from them at the expense of others? Why not diminish the evil by distributing them throughout the empire, particularly among the pure great Russian population, which is as richly endowed with the commercial spirit as are the Hebrews themselves? Why make exceptions in favor of the rich, who must on this reasoning be vastly more dangerous to the rest of the population than the poor? If the Hebrews are not dangerous then the present restriction should not be kept in force. On any theory they are wrong.

The restrictions on commerce, trade, and the acquisition of property, except so far as they result from the restrictions on residence, are gradually disappearing. Hebrew manufacturers are allowed to go to certain fairs to sell or buy goods. Merchants of the first guild are permitted to carry on an export and import trade on certain conditions, and to visit the capitals and other cities for the purchase of goods twice a year; but their stay must not be more than six months in all. Merchants of the second guild can go to other cities once a year, for not more than two months. Hebrews are also allowed to go to other places to receive inheritances, or carry on law-suits. But all such absences must be with the special permission of the police, and, in certain cases, of the government of the province, or of the Imperial Government.

In general Hebrews may acquire real estate wherever they are allowed to live, but they are not allowed to become owners of any estate where the relations between the late serfs and their masters are not entirely settled. This is to prevent their having any power over Christians. There are also some further restrictions. In the government of Vitebsk and Mohilef Hebrews can not purchase or hire real estate within three versts of any village, or any private or crown estate. In the government of Tchernigof and Poltava, since 1855, they can not obtain real estate for the purpose of settling on it, and, in general, in the western provinces persons of Hebrew origin can not become purchasers of the estates of the Polish nobles sold at forced sale by the Government.

Hebrews are forbidden to employ Christains as constant domestic servants, but may employ them on temporary occasions, as masons, carpenters, etc., or as workmen in factories, or as clerks in shops and counting-houses. Christian females who are employed to cook and wash for Christian employés, or as hands in factories, must live in separate houses from the Hebrews. This is in consequence of the supposed antipathy of the lower classes of the two races—an antipathy which will speedily disappear of itself as soon as the distinction kept up by the laws are broken down.

From 1835 on, the Russian Government was very anxious to induce the Hebrews to become agriculturists, and consequently granted many privileges to those who adopted this mode of life. These privileges consisted *inter alia* in free allotments of land for village and homestead; in aid in money for removing from one place to another, and for the first settlements; in the construction of houses for the colonists; in grain for seed, and means of temporary substance at first; in freedom from money taxes for ten years, and from recruitment for twenty-five years; and, finally, in honorary and money rewards for success in agriculture. "But all such favors and privileges," to quote the words of an official document emanating from the ministry of the interior, "did not bring about the desired results, and the establishment of Hebrew agriculturists presents only a long series of facts showing the systematic and constant misuse of these favors. In view of these facts and of the general disposition of the Hebrews for petty trade rather than settled labor, the government being confirmed in the impossibility of making profitable agriculturists of the Hebrews, repealed the law giving

money assistance to Hebrews becoming agriculturists then in force." These regulations were repealed, by an imperial order, in 1866. It is, perhaps, not entirely owing to the indisposition of the Hebrews to agriculture that these efforts of the Government were unsuccessful. It was as difficult to leave the agricultural class as it was easy to enter it. Therefore, none but the poorest Hebrews accepted the offers of colonization, and many of them died on the road to the distant colonies, and the rest reached them utterly ignorant of how to cultivate the land, and without instructors.

Besides, they were forbidden to employ Christains as laborers, and were not allowed to live near enough the villagers of other faiths to have any competition. The assistance offered by the government was insufficient to carry them over a single year of bad harvest, and these, together with an unaccustomed toil, were enough to ruin the colonies. Some few, however, succeeded in tiding over the first bad years, and those are said to be now in a flourishing state. With regard to the service of the state, no person who is a Hebrew by race or religion can become an officer of the army, the rights of Hebrews, in this respect, being far inferior to those of Mohammedans. Recruiting, on the contrary, has often been pressed with more severity against the Hebrews than against the rest of the population, and this was especially the case during the Crimean war. But as a law is now under consideration, making military service equable and compulsory on all classes of the population, it is probable that these distinctions will be done away with.

All Hebrews who have taken the degree of doctor at any Russian university are permitted to enter the government service. Otherwise it is impossible for them, without a special permission of the Emperor. Christians, on the other hand, may enter the Government service without any literary qualifications, and, with only a degree of candidate, corresponding to our bachelor of arts, they have the right to a Government place. In all the Government and rabbinical Hebrew schools, the teachers may be either Hebrews or Christians, but only the Christians have the right to pensions and rewards accruing from service. The inspectors and various other officers must be Christians. In all institutions of self-government where the members are elected, such as trade corporations, municipal bodies, city governments, etc., the non-Christians can only constitute one-third, and no Hebrew can be chosen as mayor of a city, or temporarily fulfill his duties. Thus, in a town such as Berditchef or Zhitomar, where nine-tenths of the inhabitants are Hebrews, the majority has no voice, and the town is practically governed by the very small minority of Christians.

The Hebrews in every town form a distinct community, governed by a body called the kagal, which is unofficially recognized by the Government, and made use of for the collection of taxes and recruits. In the province of Courland the kagal is officially recognized by a special law. Under the supervision of the kagal, there are rabbinical courts, whose decisions are governed by the Talmudic law, both parties being obliged to bind themselves not to refer the case to a civil tribunal. These courts, which are generally unrecognized by the Government, are, as well as the kagal, said to be sometimes made instruments of great tyranny and oppression toward the lower classes of Hebrews, the Hebrew community being so arranged that only the rich and aristocratic take part in its government.*

In these Hebrew communities there has existed for ages a special tax, called the *Korobotchuky tax*, which is now recognized and regulated by law. This tax is devoted to the wants of the Hebrew community, to the deficiencies in the payment of their taxes and performance of other duties, to the payment of the communal debts, the foundation and support of Hebrew schools, and to other benevolent purposes. The tax is raised by imposts on the butchering of meat in the Hebrew form, on the sale of meat so killed, on Sabbatical candles, and by penalties for the non-fulfillment of all the tax regulations, by an impost on the income of landed property belonging to Hebrews, on Hebrew manufactures, and on the estates of deceased Hebrews, and by the money paid for wearing the Hebrew costume. The kagal is also allowed to impose a tax on all liquors sold in taverns and dram-shops kept by Hebrews in country villages. This tax falling, of course, on the consumers, is really paid by the Christians, for the peasants are the only customers of these dram-shops. Whatever harm is therefore done to the Russian peasantry in this particular arises from the Russian law itself.

RELIGIOUS RIGHTS.

The ruling principle in the Russian legislation is that of complete tolerance to all religions, including, of course, the Jewish, Mohammedan, and heathen, the orthodox Eastern Church being the religion of the state. This tolerance does not, however, extend to proselytism, and any one converting a Russian subject from one religion to another, except the orthodox faith, even from one non-Christian religion to another, is liable to heavy punishment. The state church reserves to itself the monopoly of proselytism, but the laws strictly forbid any force, threats, or compulsion being used in such conversion. The state, however, takes an interest in conversions from Judaism,

---

* See Braphmann, *Book of Kegal and Hebrew* Fraternities, *passim*.

and gives every convert from 15 to 30 rubles in money and freedom from taxes for three or five years as an assistance to them in case their means of livelihood should be cut off by their former coreligionists. The law demands that every conversion shall be voluntary, and forbids the baptism of children under fourteen years of age without the written consent of their parents or guardians. On the conversion of the parents the children under seven years are also baptized; if only one of the parents is converted, the sons under seven follow the religion of the father, the daughters that of the mother. Children over seven can not be baptized without their own consent, even at the wish of their parents. While conversions from Judaism are thus approved of, backsliding into the old faith is punished with the severest penalties.

One very unjust regulation against the Hebrews, springing from their religion, is that "in districts where the Judaizing heresy (a heresy in the Eastern Church which follows chiefly the Old Testament, keeps Saturday, etc.) prevails, all the Hebrews, without exception, must be expelled, and not one allowed to remain under any pretext." This is punishing the innocent for the guilty.

Marriage with non-Christians is forbidden to Russian subjects of the orthodox or of the Roman Catholic faith. Protestants are only forbidden to marry heathen. Persons of the Lutheran religion (for the Lutheran Church is to a certain extent established in Russia) may marry Hebrews with the consent of the local consistory, but the marriage must be according to the Lutheran rite, and the Hebrew party must give a written promise to educate the children as Christians, and not to convert the spouse to Judaism. Catholics marrying Hebrews or Lutherans marrying them, without conforming to these regulations, are subjected to imprisonment for eighty days, but the marriages seem to be valid. In case of a mixed marriage, if the children are not brought up Christians, or if an attempt is made to convert the Christian spouse to Judaism, the marriage is dissolved, and the offending party punished.

In the case of conversion to Christianity of a Hebrew husband or wife, the marriage can be dissolved at the request of either party, and the converted person can marry a Christian. But the marriage may remain in force at the wish of the parties, provided the consort will endeavor to convert his spouse, and the Hebrew spouse will agree not to influence the children to remain Hebrews or abuse the other party on account of his or her conversion.

It is plain that any antipathy of the common people toward the Hebrew can not be eradicated so long as the government itself marks them out as a peculiar people, with whom marriage is illegal.

Another mark of religious intolerance is the law which forbids everywhere the use by Hebrews of a special dress or costume, even though it is required by their religious belief. This law, after various vain endeavors to enforce it, especially in Poland two or three years ago, is so modified that in the districts where Hebrews are allowed a settled residence they may wear their distinctive costumes on payment of a fixed tax, which goes to the Hebrew benevolent institutions. Children under ten years of age and old men over sixty are exempt from this tax. There is also a tax of five rubles for wearing the Jewish cap. Women are forbidden to shave their heads under a penalty of 5 rubles for each offense. When Hebrews pass the district of their settled residence they must wear the usual costume of the country and have about them no distinctive Hebrew marks.

These regulations bear only on Hebrews. Mohammedans and heathens are allowed to shave their heads, and to wear any costume they choose in any part of the empire. In the districts set apart for their settled residence the Hebrews enjoy the same freedom of worship as other religious communities in the empire, and the military force can even be called in to protect them. Hebrews under imprisonment are freed from labor on Saturday. Hebrew school children are not obliged to attend the instructions in the Christian religion. Hebrews may make oath according to their own religious form. Saturday is given to them as a day of grace in the payment of promissory notes, etc. By permission of the authorities a synagogue may be built for every eighty Hebrew houses, and a school of prayer for every thirty houses, but these buildings must not be nearer than 700 feet to any Christian church. The synagogues, like Christian churches, are exempt from taxes and the quartering of troops. The wine and liquor used in the Hebrew religious service pay no excise duty.

The religious officers, at the head of whom is the rabbi, are chosen by Hebrew community, under the regulations and with the confirmation of the government. The rabbi has no right to punish the Hebrews belonging to his congregation with pains, curses, or excommunication, nor to refuse to any of them the rites of thier faith. Any infraction of this regulation is severely punished by a fine and the removal of the rabbi from his office, but only on a complaint of the community. The sole complaint of the person who is punished is disregarded. The religious affairs of the Hebrews are under the general superintendence of a rabbinical commission of seven members, attached to the imperial ministry of the interior.

The official language of the rabbinical commission is Russian, but some other official documents may be in Hebrew. The registers of births, deaths, etc. must be kept in both Russian and Hebrew (either the old Hebrew or the jargon). Hebrew merchants

must keep their books either in Russian, Polish, or German; or, if in Hebrew, must have a translation on the next page. This is the only restriction on the use of the Hebrew language. Wills written in Hebrew are admitted to probate, and oaths are administered to Hebrews not speaking Russian in their local dialect. In order to spread the knowledge of the Russian language among the Hebrews, it is required to be taught in all the Hebrew schools, and is now allowed to be used in the religious service.

As regards education, besides the rabbinical and private schools, and the government schools "for the education of Hebrew youths," Hebrew children of both sexes are admitted to all schools and educational institutions in the place where their parents reside without any distinction from other children. Hebrew books must be submitted to the censorship, and a special tax is laid on them for the support of Hebrew schools.

Such is, in the main, the legal position of the Hebrews in Russia. Some minor regulations have not been noticed, and there are many varying local enactments in the different provinces and towns which could be taken into consideration only with great difficulty.

It is chiefly during the reign of the present Emperor that the laws directed against the Hebrews have been mitigated. Just after the emancipation of the serfs there was a general movement of the Russian liberals for the emancipation of the Jews. Now, since the spread of slavonaphile and ultra-Russian ideas, it is not unusual to find strong liberals and democrats who are animated with the feelings of the Middle Ages toward the Hebrews, and even some of the prominent journals, such as the Golos, are constantly attacking them. On the other hand, the most truly liberal politicians and their organs, such as the Messenger of Europe and the St. Petersburg Gazette (of the Academy), are in favor of removing from the Hebrews all restrictions whatever, and thus aiding them to coalesce with the rest of the population. A strong movement is also going on among the Hebrews themselves for their elevation and enlightenment. Schools are founded, journals are established devoted to their interests, and pamphlets and books are published, not only to call the attention of Russians to the injustice they are doing to the Hebrews, but for their own profit and instruction. There are efforts at reform, too, to free the lower classes from the not infrequent tyranny of the kagal and the rabbinical councils.

There is need of all this and much more; for, in spite of the recent reforms, the condition of the Hebrews in Russia, massed together in the western provinces, without room for productive occupation or healthy competition, is growing worse and worse. Indeed, a recent Hebrew writer, Mr. Orshansky (The Hebrews in Russia, by T. G. Orshansky, St. Petersburg, 1872, page 13), says that "the general economical progress of Russian life has proved injurious to the interests of the Hebrew population;' and goes on to show that the emancipation of the peasants, the organization of credit banks, the railways, the changes made in government contracts, brandy, farming, etc., the lowering of the tariff, and cessation of smuggling, the rural and municipal self-governments, have all been prejudicial to the Hebrews. Their former clients, the proprietors, are learning to do without them as factors and managers; the peasants get loans at the banks; the improvement in the communications have ruined the country taverns; there is less liquor drunk; there are fewer uses for middlemen, and it is harder to live off of the weaknesses and follies of other people.

That the Hebrews were in such a position as to be ruined by the increase of the general prosperity is not their fault, but that of the laws which placed them in this position and forced them to such means of livelihood. There is a historical reason for it. The old Polish laws forbade the peasants to engage in trade; the nobles thought it beneath their dignity. The Hebrews, who were cut off from agriculture and other pursuits and professions, naturally monopolized the trade of the country, and fell into this position of being the factors, the go-betweens, and the agents of both the upper and the lower classes, making, of course, their profit from each. With the changes in the laws which benefit both upper and lower classes, by making them more independent, the Hebrews are cut off from the means of livelihood which the oppression of centuries had condemned them to seek, and are reduced to their present deplorable condition. To quote again the words of Mr. Orshansky, page 42: "In the life of the Hebrews of Western Russia are noticed all the symptoms of the social malady known under the name of proletarianism—a lack of settled residences, constant change of domicile and vagrancy, lamentable sanitary conditions, and, as their consequence, a great mortality, a lowering of morality, a want of means, and an insignificant amount of profits and money saved."

This shows the absolute necessity of some change. The spirit of modern Russian legislation is to fuse together the different races that inhabit the empire and to make them all Russians. It is obvious that this object can not be attained, so far as the Hebrews are concerned, while laws exist which render them a separate and distinct body, and, by casting a slur on them, cause them only to shut themselves in still more, and to resist all attempts to draw them into normal relations with the rest of the body politic.

EUGENE SCHUYLER.

No. 2.—*Mr. Jewell to Mr. Fish.*

No. 8.] LEGATION OF THE UNITED STATES,
St. Petersburg, October 30, 1873. (Received November 18.)

SIR: I have the honor to inclose herewith a copy of a letter marked A, received from an American citizen, one Theodore Rosenstrauss; also, copy of a note marked B, by me addresssed this day to the Imperial Government. Had there been time before the expiration of his license to have communication with you and waited for instructions I should have done so. But as there was not, and as the disturbing of Mr. Rosenstrauss in his lawful business appears to me to be in flagrant violation of our treaty stipulations with Russia, I concluded to act at once. I trust my action will meet your approval.

In conversation with Mr. de Westmann yesterday, in regard to this case, he remarked that he was "tired of making these cases exceptional," by which I conclude that the law of the province in which Kharkoff is located is against Mr. Rosenstrauss in this matter. Should this be found so, and the Imperial Government declines to interfere in his behalf, and the authorities of Kharkoff decline to renew the license of Mr. Rosenstrauss, and thus compel him to leave or at least to wind up his business, I desire instructions as to my further action in this matter. I have tried to impress upon the Russian Government, both in my conversation and my note, that we demanded for American Hebrews the same treatment and protection which the native Hebrews receive. Mr. de Westmann called my attention to the replies of his Government to Mr. Clay in regard to this case. But there are many gaps in the files at this legation, and thus far I have searched in vain for the dispatches referred to.

Mr. Rosenstrauss is agent for American sewing-machines, and other goods, and is said to be a man of wealth and good character. I hear of no complaint against him other than that he is a Hebrew. It is also said that this matter is being pushed by his rival in business.

I have, etc.,

MARSHALL JEWELL.

[Inclosure 1 in No. 8.]

Mr. Rosenstrauss to Mr. Jewell.

KHARKOFF, *September* 20 (*October* 2), 1873.

Having learned from the newspapers of your arrival at St. Petersburg, I beg to lay before you my case, which, owing to the death of our former minister during last spring, remained in an anxious suspense until now, and I do hope that you will find it one of an unmerited persecution without myself having done anything in the eyes of the law and justice to provoke it.

My passport and the records of the American legation will show that I am an American citizen; and as such I have settled here in Kharkoff, in 1863, as mechanic and merchant of the second guild, opening a store of mechanical, optical, physical, and also different American goods, and having gained the confidence of the public here and the vicinity, my business is prospering as well as I can wish it.

After an ineffectual trial some years ago to disturb me in my quiet, peaceable way of attending to my own business, by *sole reason of being of Hebrew religion*, and in consequence of the timely interference of the American legation, I was let alone by order of the Russian high authorities to that effect until now.

During last December, however (1872), when I desired to pay my customary license, the license commissioners refused to issue it to me, saying that "*only Hebrews of Russian birth* could do business in the city of Kharkoff, but that foreigners of Hebrew religion are not enjoying *the same privilege.*"

I was obliged to pay for first guild license, that is to say about 600 roubles instead of the second guild, 150 roubles, which I used to pay for nine years past. Moreover, I had to sign a writing to the effect "that I should not ask for any further license in future (that is from January, 1874) unless I first obtain the permission of the imperial ministry of the finance and of the interior."

Having been protected formerly by the American legation and the Russian high authorities in peaceably carrying on my business here, the same as any other American citizen could do of whatever religion he might be, I am surprised *that the permission to renew my license should be denied me now again by the sole reason of my religion.* Being quite convinced that there is nothing that could be brought against me in social, moral, political, or commercial point of view, and therefore resting always in perfect security, I have extended my business, have entered into different contracts here and with foreign commercial houses, and here I have many outstanding

debts that can not be at present collected; at the same time a large and mostly American stock of goods on hand that could not be sold in one year. Moreover, I have induced my brother-in-law, Bernhardt Frankfurter (also of Hebrew religion), to come out with his family from America, and he made a sacrifice of almost all he had in America to come and join in my business at Kharkoff, for whom and his family I became thus responsible.

Under these serious circumstances threatening me with certain ruin in my business enterprise, I beg to lay my case before you, and asking your kind protection to bring my case to the enlightened notice and attention of the Russian Imperial Government in order that my rights of a peaceable American citizen should be protected by its subordinates, until I respect and most anxiously defer to the laws of the country in which I live, and *that my religion should not be made a crime*, obstructing all my otherwise prosperous business enterprise.

I trust you will find it convenient to interfere in my favor without much delay, as time is already drawing near when I ought to have my customary license renewed; and beg to remain, with great respect,

Your most obedient servant,

THEODORE ROSENSTRAUSS,
American citizen, of the firm "Theodore & Co.," Kharkoff.

[Inclosure 2 in No. 8.]

Mr. Jewell to Mr. de Westmann.

LEGATION OF THE UNITED STATES,
St. Petersburg, October 30, 1873.

The undersigned, envoy extraordinary and minister plenipotentiary of the United States of America, in presenting his compliments to his excellency the actual privy councillor de Westmann, directing the imperial ministry of foreign affairs *ad interim*, etc., etc., etc., has the honor to lay before his excellency the complaint, which when seen please return, of Theodore Rosenstrauss, a citizen of the United States, now living and doing business in the city of Kharkoff in southern Russia, a copy of which is herewith inclosed and made part of this communication.

From it and the records of this legation, it appears that for about ten years the said Rosenstrauss has been settled and doing business in Kharkoff in optical, mechanical, and other American goods; that in 1865 and 1869 he was disturbed in his peaceful enterprise by the local police threatening to close his establishment on account of his Hebrew religion.

In both cases, however, at the request of this legation, he received the timely assistance and protection of the imperial high authorities, as it became evident that his business rivals sought to drive him from the city. He has since pursued his business unmolested as tradesman and merchant of the second guild.

It further appears that when last December he made application to renew his license, he was told by the license commissioners of the place "that Russian Hebrews could do business in Kharkoff, but foreigners of Hebrew religion were not allowed the same privilege"; that he was obliged at that time to pay for a license of the first guild, about 600 roubles, instead of that of the second guild, or 150 roubles, as for the nine preceding years; that he was at the same time compelled to sign a writing laid before him to the effect that he would ask for no future license unless he obtained permission to continue his business from the imperial minister of finance and that of the interior; that without these permissions his establishment would be closed at the end of the year. The complainant having felt quite confident of protection by the Imperial Government against those persecutions, and having gained the confidence of the community by his upright mode of conducting business, has greatly extended the same, has made important business connections and obligations in Russia and abroad, has now quite a large stock of mostly American goods on hand, and has many debts due him.

It is evident from all this that the sudden closing of his establishment would be ruinous to his interests. Therefore the undersigned has the honor to invite the attention of His Imperial Majesty's Government to this case, and to submit, that as the United States of America tolerate all religious beliefs, making no distinctions whatsoever, they claim equal protection for all their citizens in their lawful enterprises without regard to their religious principles, provided always that they obey the laws of the country in which they reside; that furthermore the terms of the existing treaty of 1832, article 1, between the Imperial Government of Russia and the United States, expressly covenant and insure to the citizens of each "liberty to sojourn and to reside in all parts whatsoever of said territories in order to attend to their busi-

ness affairs; that they shall enjoy to that effect the same security and protection as the natives of the country wherein they reside, on condition of their submitting to the laws and ordinances there prevailing."

The undersigned has entire confidence that he need only to call the attention of the high-minded Government of His Imperial Majesty to this case to insure that permanent orders be issued with all convenient speed to the proper authorities that the said American citizen, Theodore Rosenstrauss, shall in no manner be interfered with simply on account of his religion.

The undersigned respectfully further asks that notice may be given him of any action in this matter on the part of the Government of His Imperial Majesty.

The undersigned avails himself of this opportunity to tender to his excellency the assurance of his high esteem and profound consideration.

MARSHALL JEWELL.

No. 3.—*Mr. Fish to Mr. Jewell.*

No. 8.] DEPARTMENT OF STATE,
Washington, November 20, 1873.

SIR: Your dispatch No. 8, of the 30th ultimo, relative to the case of Theodore Rosenstrauss, has been received. The course which you thought proper to take in regard to the matter is approved. The withholding from him the trade license to which you refer, on account, as is understood, of his being a Hebrew of foreign birth, seems to be in direct violation of the first article of the treaty with Russia of 1832. The purpose of that article was to place all citizens of the United States in that country on the same footing as native Russians. A definitive opinion upon the subject, however, can not be formed without an examination of the notes of the Russian foreign office to Mr. Cassius M. Clay, adverted to by Mr. Westmann. You say that no such notes are on file in the legation. There are none such here, so far as can be ascertained, and there is no reference to the case in Mr. Clay's dispatches. It is consequently suggested that you apply for a copy of those notes, of which, when received, you will forward transcripts to the Department.

I am, etc.,

HAMILTON FISH.

No. 4.—*Mr. Jewell to Mr. Fish.*

No. 20.] LEGATION OF THE UNITED STATES,
St. Petersburg, December 15, 1873. (Received Jan. 5, 1874.)

SIR: I have the honor to acknowledge the receipt of your dispatch No. 8, dated November 20, in regard to the case of Rosenstrauss.

Mr. Schuyler immediately found for me the previous correspondence about Rosenstrauss, which proved to be on file, consisting of three communications from Rosenstrauss to Mr. Clay, dated respectively December 2 (14), 1865, August 27, and September 29, 1867, three notes from Mr. Clay to the foreign office, dated February 3 (15), 1866, September 9, 1867, and October 9 (21), 1867, and two notes from Mr. Westmann to Mr. Clay, dated August 28 (September 9), 1867, and January 13 (25), 1868.

There is nothing further except the marriage certificate of Rosenstrauss in 1863, and the dispatch of Mr. Schuyler, No. 27, October 31, 1872, with the letters therein referred to. I inclose to you herewith copies of these papers, marked A, B, C, D, E, F, G, H.

With regard to the case itself, it appears that the Russian law forbids Hebrews to reside in Kharkoff, but, by a law of 1863,

"It is permitted to Hebrew merchants of the first guild of the Russian Empire and the Kingdom of Poland to inscribe themselves, on the general conditions and outside of the boundaries of their present residence, as merchants of the first guild in all cities in general of the Russian Empire as well as of the Transcaucasus and obtain the right of constant residence in them according to the rules laid down in the commercial code."

Being a merchant of the first guild, Rosenstrauss has clearly the right to reside in Kharkoff under the first article of the treaty of 1832.

There seem, however, to be two exceptions which may possibly be applied to the case of Rosenstrauss. The above permission to merchants of the first guild is only applicable when they have been inscribed five years, and is not applicable to those Jews who are under accusation or the surveillance of the police, or who have been condemned by a court or placed under suspicion.

We have at all events a right to claim for Rosenstrauss exactly the same privileges that other Jews of the first guild possess, whatever else we might claim.

The Russian foreign office, as will be seen from the papers, decidedly objects to considering an American Jew simply as an American citizen, throwing his quality of Hebrew out of the question, and refuses to grant greater privileges to a foreign than to a native Jew.

The government even goes further, and says that foreign Jews "known for their social position or their great trade may receive, on a special permission to be granted by the ministers of finance, the interior, and of foreign affairs, a license to trade and a certificate of the first guild."

But I am of opinion that, under our treaty, American Jews should certainly not be subject to any greater formality or difficulty in obtaining trade licenses and certificates than native Jews.

Unless instructions are given to the contrary, I shall insist, if possible, that Rosenstrauss shall have the same right of protection and residence as native Jews, neither more or less.

I have, etc.,

MARSHALL JEWELL.

[Inclosure A in No. 20.]

Mr. Rosenstrauss to Mr. Clay.

KHARKOFF, *December* 2 (14), 1865.

YOUR EXCELLENCY: Your dispatch I received last evening, for which, with your assurance of protection, I thank you.

Now, I beg leave to inform your excellency of my present situation. Two years ago I moved with my family from Voronesh here, opened stores in optical, physical, mechanical, and different American goods. Soon I obtained the greatest confidence here and throughout the vicinity; my business to this day has gone as well as I could wish it, from which circumstances I have received many enemies among the merchants, especially A. Edelberg, optician, mechanic, etc., who was formerly the only merchant in this branch till I came, and who is exerting his utmost to cause me to quit business here.

During the last five months I have been weekly disturbed by the police, who are throwing as much difficulty as possible in my way, to force me to quit Kharkoff. The principal cause is because I can not produce a certificate of christening. I went to the governor, Count Severs, for the first time, who told me in presence of the police master, that for American citizens no such papers are required, and that I should not be disturbed any more.

On the 29th last month, I was sent for by the police master, by whom I was told that without producing the certificate of christening, I have no right to carry on business here, and that he could close my stores; consequently I went for the second time to the governor, who told me that without a certificate of christening I can not carry on business here, and especially not as it is supposed that I am Israelite; for that reason I telegraphed to your excellency, and I think that I am now troubled by this people unjustly (perhaps because I do not bribe or make them presents as A. Edelberg does).

Should I be forced by the authorities here to close business, I would be considerable loser, as I have a large stock of valuable goods on hand and many more on the road from America. I also have many outstanding debts, which can not be collected at present, and if they close my magazines, perhaps never may be able to get them.

I live here in a very retired manner, having no acquaintances, or rather I keep no company, desiring only to do business in a peaceable, quiet way, without infringing any of the laws and without being infringed upon; but without your excellency's assurance of protection, I shall always be in fear and dread of this people, for which I humbly ask you, and if you will only write me a letter to that effect, I shall live more at ease and comfort.

I remain your excellency's humble and devoted servant,

THEODORE ROSENSTRAUSS.

[Inclosure B in No. 20.]

Mr. Rosenstrauss to Mr. Clay.

KHARKOFF, *August* 27, 1867.

Undoubted your excellency received my telegram which I sent yesterday. I am sorry to say that I am again troubled by the police in the same way as I was when I wrote to your excellency on the 3d December, 1865; they are continually asking me for my certificate of mastership and my papers which I received from the *Dooma*, which are my licenses to trade, but although they find them always in proper order yet they keep continually coming and annoying me for them, and generally when there are many customers in my magazine, as if they watched those particular times to try to annoy me more.

There is a person here of the name of A. Edelberg in the same business as myself; he has been here many years, and he finds, since I commenced to trade here, his has fallen off; and, as he has considerable influence with the governor and police, *being a rich man*, he is the cause of all my difficulties.

During my absence, when I was at Poltavia fair last month, there was a custom-house officer at this city to search for contraband goods. He was brought to my magazine by the police master, but he found no goods but what had paid the duty, and left again without any disagreeable remarks; but the police master took eighty-one stereoscopic pictures. The custom-house officer requested him not to take them, saying, "Leave them, as we have other business to attend to," but he replied, "No; I will take them on my own responsibility," without inquiring the price, not making any remarks that they were going to be confiscated; nor were they sealed by him, or anything done to them more than another purchaser would be; he took them direct to Edelberg's shop, where he went without the custom-house officer, but he goes there nearly every morning on leaving the governor's office, they are on such intimate terms.

The pictures arrived here from Paris during my absence, and were placed in my magazine for sale. They passed the custom-house at St. Petersburg, and the duty was paid on them, as I can prove by my commission agent in St. Petersburg. On my return from Poltavia I presented the police master with the account for the value of the pictures. He received me in the most impolite manner and refused to pay, saying "he confiscated them because they were indecent ones," but they were only such as are sold in every city and exposed to view in all shop windows where stereoscopic pictures are sold. I went to the vice-governor (the governor not being here), but all the redress I got was, he told me they should show me Russian ways, and that in all probability they should shut up the American magazine before long.

I fear that through the interest of A. Edelberg there will be some scandal raised about me, and in the end my magazine may be closed, for he is intimately acquainted with all the great officers here and does not care what he says about me, if he can only injure my character; but I am not the least afraid of my character or anything respecting myself being found wrong; indeed, I should like some one to be sent to make inquiries who would judge impartially, and if your excellency would send some one from St. Petersburg to do so, I will willingly pay all expenses if he finds me guilty of any indecency, injustice, or falsehood; indeed, of anything that is not right and just.

I never infringe the laws, and I always pay my dues and taxes at the proper time, and during my residence here I never had anything unpleasant occur between myself and a customer, or, in fact, with any one, except with this man; and he I never spoke to but once, and then he called me, also, your excellency, anything but gentlemen, using the most vulgar language, because he had heard that your excellency was kind enough to write, or cause a letter to be sent to the governor here, on my last application for your excellency's assistance.

Excuse me troubling your exellency now about the disagreeables which occur, but thinking I may have to trouble your excellency again, I thought it nothing but right to apprize your excellency of my annoyances, not that your excellency can do anything in it at the present time, but that in the future I fear I shall have to write more.

Remaining your excellency's obedient humble servant,

THEODORE ROSENSTRAUSS.

[Inclosure C in No. 20.]

Mr. Rosenstrauss to Mr. Clay.

KHARKOFF, *September* 29, 1867.

YOUR EXCELLENCY: I beg to return your excellency my sincere thanks for the rouble your excellency has been at on my account.

According to your excellency's request I have made a translation of the paper and

sent such within; your excellency will see the charges made against me, and I will contradict them as follows:

I have taken the advice of a lawyer here, who told me that if the authorities closed my magazine it would be contrary to the Russian laws, and he thinks they will never do that, and unless the police do yet more against me, at present he can render no assistance, but that I had a right to live here.

As regards the selling of indecent pictures, which is stated in the inclosed papers, all I can say is, that it is perfectly false, and as they now lay in the police office here, they can be seen. They are pictures on which I paid a duty, and that is a sufficient proof that they are not as stated, otherwise they would not have been permitted to pass the custom-house. At the time the police master took them, I was at the Poltavia fair, and on my return, when it was told to me that the police master took the pictures, I took him the account and asked payment, which he refused in a very impolite manner. I thanked him and came away; then went to the vice-governor (the governor not being in town). I told him I had come to ask him about some pictures which were taken from my magazine by the police master. His reply was, "I know all about them, and they are indecent pictures, consequently I can do nothing in the affair; but one thing I will tell you is, that we will teach you Russian ways." I thanked him for his politeness to me, with the remark that I doubted whether they were indecent pictures, for those are things I never sell, and left immediately. It is stated in the paper that I should complain to my embassador, words which were not likely I should utter to him, if even I thought so.

This is all the respect which was shown me, so your excellency may see it is very different to that mentioned to his highness in the paper.

Now as regards the bill of "mastership," I showed it to this same vice-governor, also to the late governor, Count Severs, last year, that he must have known when he sent this paper to the chancellor in chief that he was writing an untruth.

I inclose my bill of "mastership" that your excellency may see I did not put up my signs without it, as it is stated. If it is necessary for your excellency to show it to the minister of the interior, please hold it, but if not necessary, I beg your excellency to return it, as I may yet have occasion for it here, if they still keep persecuting me, as no doubt they will, for I think this paper, being full of untruth, is only a preliminary to further proceedings, which seems to me, they are plotting something against me. I am not the least afraid of them, if they only speak the truth, but by my bill of "mastership," your excellency may see, even the highest does not do that; still, with such a protector as your excellency, I ought not to fear anything, but it is very annoying to be troubled so, when I never do the least thing possible to annoy or injure any one, and never will I infringe the laws if I know it.

Hoping your excellency will excuse me taking up so much of your valuable time, I remain your excellency's devoted humble servant,

THEODORE ROSENSTRAUSS.

[Appendix to inclosure C.]

Translation of the writing sent by the governor of Kharkoff to the minister of the interior.

No. 7312.

In the year 1865 there came here to Kharkoff, a North American subject named Theodor Rosenstrauss, and took a license as second guild merchant, and opened a magazine under the firm Theodor & Co., and settled here with his family.

The Kharkoff city police, on looking at the paragraphs Nos. 130 and 131, the eleventh volume of the Commercial Laws, where it is said in the fourth continuation, that it is not permitted for Israelites to settle here, unless assigned districts, and more so to open commerce business. By the police there was an order sent through the governor's office for him to leave the city, as it is unlawful for Israelites to settle here.

During this time there was a writing sent from the department of the minister of the interior, dated 8th February, 1866, No. 828, in which the American embassador, General Clay, wished the chancellor, Prince Gortachoff, give protection to the respectable and peaceful American subject, Theodor Rosenstrauss, consequently the police received orders from the governor, Count Severs, to give information of this writing in detail, to the American subject, and to stay all further proceedings or persecutions in the affair.

From that time to June, 1867, many individuals who keep private pensions, also the director of the third Gimnaze, requested the police master to have a watchful eye on the pictures in the American magazine, owing to the sales of indecent secret pictures which are injurious to youth, as they are sold to everybody without exception, so that they can fall into the hands of young people, which is very dangerous to their morality.

At the time the revising officer, Kelcheffsky, who was sent here by the minister of finance, he came to search the American magazine with the police master, who took pictures which were actually bad, and gave them into the administration of the police. After all this, Mr. Rosenstrauss was impudent enough to send an account for the confiscated pictures to the police master, asking payment for them, receiving comprehensible denial of payment.

As regards the returning of confiscated pictures in paragraph 152, volume 14, on the law, says, that any thing similar to them are not permitted to be sold in this empire, and after I told him that the sales of such things are destructive to youth, and that in Russia it was not permitted for the sake of morality, I received an answer that Rosenstrauss neither knows the Russian language nor the Russian laws, but asks protection as an American subject; I explained to him again that the police master knew the Russian laws, and after all Mr. Rosenstrauss left me dissatisfied, making the remark that he would complain to the American embassador.

From all this your highness will see how much respect was shown to this foreigner who as Israelite second guild merchant, without any bill of mastership, without any knowledge of physic, who has no right to live here, in Kharkoff, and still more, to open a magazine under the name optical and physical magizine, but all this was permitted through interposition of the American mission. In consequence of all this, I consider it my duty to give your highness a knowledge of it and leave it to your highness's own disposition, and request your highness's interposition with the American ambassador that he should give to the said Rosenstrauss the necessary warning.

Should, after all that is mentioned above, there be anything occur through him contrary to law, he, as foreigner, having been already given as much protection as possible, he will then have his magazine closed and he sent from Kharkoff.

[Inclosure D in No. 20.]

Mr. Clay to Prince Gortchakow.

LEGATION OF THE UNITED STATES,
St. Petersburg, February 3 (15), 1866.

The American minister has the honor to ask his excellency, Prince Gortchakow, vice chancellor and minister of foreign affairs to His Imperial Majesty, that he would be pleased to issue orders to the governor and police authorities of the province or city of Kharkoff, Russia, not to disturb nor allow to be disturbed Theodore Rosenstrauss, or his family or business, in consequence of his *religion*.

He informs this legation, by letter dated Kharkoff, December 2 (14) ultimo, that he is continually persecuted by the police and threatened by the governor that his store (magazine) will be closed, because he is not a Christian.

As the United States tolerate all religions, they claim equal protection for all their citizens; and as the American minister knows Mr. Rosenstrauss to be a worthy and peaceable citizen, he is sure his excellency, Prince Gortchakow, will not be slow to give him all due protection so long as he obeys the laws of Russia.

The American minister has the honor to subscribe himself his excellency, Prince Gortchakow's, most obedient and humble servant,

C. M. CLAY.

[Inclosure E in No. 20.]

Mr. Clay to Prince Gortchakow.

LEGATION OF THE UNITED STATES,
St. Petersburg, September 9, N. S. 1867.

The undersigned regrets again to be compelled to call the attention of the Russian Government to the complaint of Theodore Rosenstrauss, an American citizen now living and doing business in the town of Kharkoff, Russia, who telegraphs him that he is persecuted by the police because of his religion.

The American minister is sure that he need only call the attention of his excellency, Prince Gortchakow, chancellor of the Empire, etc., to this breach of American rights, to have his fellow-citizen protected in his religious principles so long as he does not interfere with the faith of others, and to have awarded him just redress against his persecutors.

So soon as the minister of the United States gets more specific details through the post he will lay them before the foreign department of Russia.

The minister of the United States has the honor to renew to Prince Gortchakow assurances of his most distinguished consideration.

C. M. CLAY.

[Inclosure F in No. 20.]

Mr. Clay to Mr. Westmann.

LEGATION OF THE UNITED STATES OF AMERICA,
St. Petersburg, October 9 (21), 1867.

The undersigned has the honor to acknowledge the receipt of his excellency M. de Westmann's note, No. 5800, of the 28th August (9th September ultimo), together with the paper of his excellency, the governor of Kharkoff, No. 7312.

The governor of Kharkoff, it seems, makes three complaints against Theodore Rosenstrauss.

1. That he is a Jew.
2. That he sells indecent prints.
3. That he keeps magazine without a permit or "mastership."

The American minister sent the governor's complaint to Mr. Rosenstrauss, and is now in possession of all the facts. In answer to these charges the undersigned remarks:

1. That he admits that Mr. Rosenstrauss is a Jew, but as all religions are alike tolerated in the United States, they claim equal protection for all their citizens without regard to religions or principles.

2. Rosenstrauss denies that the prints taken by the police are indecent. He says they are such as are seen in all the print shops in all the large cities of Russia. And besides, as he paid duties on all these prints, it is too late for the Russian authorities now to confiscate them without full payment of their value.

3. To prove to the foreign office how much the governor is imposed upon, the undersigned incloses the "mastership" of Mr. Rosenstrauss, which, when seen, he begs the adjunct minister of foreign affairs to return to this legation, date 1865.

Thus, from the governor's own showing, the authorities of Kharkoff are clearly in the wrong. The complaint of the governor that Mr. Rosenstrauss sells optical and "physical" apparatus without being a doctor, shows how prejudice here usurps the place of fact and justice. To show the foreign department the studied injustice shown this citizen of the United States, the undersigned incloses the private letter from Mr. Rosenstrauss, addressed to this legation, marked "No. A," which he makes a part of this note.

The American minister, in view of these facts, protests against the confiscation of the prints. He protests against the search of the house of an American citizen without some evidence of fraud. And he protests against the insult of calling frequently upon his countryman to show his "bill of mastership" when the authorities do know, or ought to know, from the files of their respective offices, what licenses have been legally granted. And. lastly, the American minister protests against any curtailment of the rights of Theodore Rosenstrauss because he happens to be a Jew or "Israelite."

The minister of the United States begs to assure his excellency, M. de Westmann, adjunct of the minister of foreign affairs, etc., of his distinguished consideration.

C. M. CLAY.

No. 5.—*Mr. Fish to Mr. Jewell.*

No. 19.] DEPARTMENT OF STATE,
Washington, January 12, 1874.

SIR: Your dispatch No. 20, of the 15th ultimo, relative to the case of Rosenstrauss, has been received. The determination which it announces to claim in behalf of that person all the privileges in the Russian dominions which are allowed to native Hebrews, is approved.

I am, etc.,

HAMILTON FISH.

No. 6.—*Mr. Jewell to Mr. Fish.*

No. 32.] LEGATION OF THE UNITED STATES,
St. Petersburg, January 27, 1874. (Received February 20.)

SIR: Referring to my dispatches Nos. 8 and 20, in the case of Theodore Rosenstrauss, I have the honor to inclose to you herewith the copy of a note which I have just received from the foreign office. By this document it appears that Mr. Rosenstrauss will be allowed to remain in Kharkoff and carry on his business if he provides himself with a certificate of the first guild. As such a certificate is also required from native Hebrews, it seems that Rosenstrauss has nothing more to complain of, and that the Government is not disposed to make any difference against him.

I have, etc.,

MARSHALL JEWELL.

[Inclosure in No. 32.—Translation.]

Mr. Westmann to Mr. Jewell.

No. 331.] IMPERIAL MINISTRY OF FOREIGN AFFAIRS,
DEPARTMENT OF FOREIGN RELATIONS,
St. Petersburg, January 27, 1874.

Mr. MINISTER: The ministry of foreign affairs did not fail to communicate to the proper authorities the petition and telegram of Theodore Rosenstrauss, a citizen of the United States of America, which were sent as inclosures to the notes of the legation of October 30, 1873, and January 6, 1874, and in which the aforesaid person, who is of Hebrew origin, complains that the authorities of Kharkoff have required him to procure a certificate of the first guild, whereas he formerly did business with a certificate of the second guild.

The ministry of the interior has consulted the ministry of finance on this subject, and has to-day reported that Rosenstrauss, as an Israelite and the subject of a foreign power, will be required to conform to the provisions of paragraph 5 of the appendix to article 128 of the Commercial Code (Vol. XI of the Code of Laws, edition of 1863), and that he consequently can not be authorized to transact business at Kharkoff save on the express condition that he shall procure a certificate of the *first guild.*

I think it proper for me to add that if Mr. Rosenstrauss has hitherto carried on business with a certificate of the second guild, this was owing solely to the indulgence of the authorities of Kharkoff, which indulgence can no longer be granted, inasmuch as the new municipal regulations invest the municipal government of the city, which is entirely independent, with the right of issuing these certificates, but require that it be done in strict conformity with law.

In bringing the foregoing to your knowledge, Mr. Minister, I have the honor to return to you the petition and the telegram in question, and I beg you to accept the assurance of my most distinguished consideration.

WESTMANN.

No. 7.—*Mr. Fish to Mr. Jewell.*

No. 30.] DEPARTMENT OF STATE,
Washington, February 23, 1874.

SIR: Your dispatch No. 32, of the 27th ultimo, inclosing a copy of a note from the minister of foreign affairs relative to Theodore Rosenstrauss, has been received. It appears from his note that permission has been granted to Mr. Rosenstrauss to remain in Kharkoff and carry on his business if he provides himself with a certificate of the first guild.

This is apparently a satisfactory solution of his case.

I am, etc.,

HAMILTON FISH.

No. 8.—*Mr. Jewell to Mr. Fish.*

No. 68.] LEGATION OF THE UNITED STATES,
St. Petersburg, May 5, 1874. (Received May 22.)

SIR: I desire to bring to your notice a case which has recently occurred here, which may interest you as concerning the rights of persons of the Jewish religion.

On the 13th of March a young man named Simon J. Gordan, with an American passport granted by the Department of State, came to me and said that he was desirous of marrying a Madame Topaz, and wished an American passport for her. He was informed that this was impossible until he had really married her, as not until then did she become an American citizen. He explained that she had formerly been married to a Mr. Topaz, a Russian subject, and had been divorced from him, that her papers were with the police, and that there was an intention to order her to leave the country within twenty-four hours.

From the story I received, I imagined it to be a misunderstanding on the part of the police, and accordingly wrote a note to General Trepoff, the prefect of the city and head of the police, of which I inclose you a copy, marked A, and in which I requested that the lady might have time enough given to her in which to marry Mr. Gordan, when she would receive an American passport and her position would be legal, at the same time asking for information whether the divorce was legal.

In reply I received a note, a copy of which I inclose you marked B, in which I was informed that the reasons for sending her out of the country were that she belonged to the Jewish religion, and that she was not of the category of Hebrews who were allowed to reside in St. Petersburg.

General Trepoff mentioned in his note that Madame Topaz had verbally manifested the intention of becoming a Christian, and if she did so, the dispositions of the law would not be applicable to her.

It was admitted by the letter of General Trepoff that Madame Topaz was legally divorced, and a subsequent statement was made to that effect.

I then sent Mr. Schuyler to the police, and he was referred to the secretary, Mr. Resoali. Mr. Schuyler inquired of the secretary whether the regulations would still be enforced against the lady if she married and became an American citizen. He was informed that this would make no difference, and was told, at the same time, that with a matter like this sufficient time would be granted, and that there was no need for the lady to be at all annoyed or troubled; and subsequently he received a letter from the secretary, a copy of which I inclose you, marked C, containing the regulations on the subject of the sojourn of Israelites in St. Petersburg, together with a translation of the act of divorce, a copy of which I inclose to you, marked D.

Madame Topaz was therefore politely informed that as marriage would make no difference in her case, if she desired to change her religion, the sooner she did so the better. Madame Topaz said that she had no objection to become a Christian, but it was certainly very disagreeable to be forced to do so, and sent to me, by Mr. Gordan, a letter in which she formally stated her intention of becoming a Christian, and stating that she had taken the preliminary steps to do so by consulting the Lutheran pastor, Mr. Lalande.

I therefore addressed a note to General Trepoff, informing him of this fact, a copy of which I inclose to you, marked E, and the next day, the 26th March, I received from General Trepoff a reply, a copy of which I inclose to you marked F, in which he stated that he would give Madame Topaz three days in which to change her religion.

Madame Topaz complained that three days was a very short time in which to change her religion. Mr. Gordan, by my advice, presented himself at the police with a certificate from the pastor, Mr. Lalande, that religious instruction had already commenced, and with a request for anditional time.

In consequence of this, Mr. Schuyler received a note, a copy of which I inclose, marked G.

To this note no written reply was made, but Mr. Gordan, accompanied by the Lutheran pastor, called upon General Trepoff, and the pastor explained the difficulties in the way and demanded a term of two months, stating that there were various official papers to be obtained from the consistorium and ministery. General Trepoff said he would procure these papers within twenty-four hours, and finally an agreement was made that the lady should be allowed one month to change her religion, and that if she had not done so, at the end of that time she would be compelled to leave St. Petersburg. Notice of this was sent to the legation in a letter, a copy of which I send to you, marked H, the receipt of which was acknowledged.

Up to this point I had been acting only officiously and not officially in the matter, as the person in question was not yet an American citizen. General Trepoff seemed fully to understand why I engaged in the matter and interposed no objection.

Subsequently to the last letter to the police, it being found that the divorce was legal, Mr. Gordan requested that the marriage ceremony should take place at the legation, and accordingly on the 1st of April they were married in my presence by

the Rev. B. J. Hall, the pastor of the British and American Congregational Church. I inclose you a copy of the certificate of marriage, marked I.

After the marriage Mrs. Gordan received an American passport from this legation.

On the 1st of May Mr. Gordan came to me with a complaint that having sent his wife's passport to the passport bureau for foreigners in order to take out the Russian residence ticket, as required by law, he was told that it was impossible unless the former passport of Mrs. Gordan, at that time Topaz, was shown. This passport, however, was in the possession of General Trepoff.

As most of the business had been carried on between Mr. Schuyler and Mr. Resoali, at my request Mr. Schuyler wrote a purely unofficial note asking Mr. Resoali to be kind enough to sent the old passport to the bureau. This note was taken by Mr. Gordan himself in order that he might explain more at length.

Mr. Gordan immediately returned, saying that the secretary refused to move in the matter, and bringing a note, of which I inclose you a copy marked K, and in which he states that official communications only can be received, and that these must be addressed to General Trepoff. Accordingly I sent Mr. Schuyler to General Trepoff, who, on hearing what the matter was immediately said that he would give orders that the passport be sent as requested.

I understand that Mrs. Gordan has not yet completed her conversion, but this has been because General Trepoff has not furnished the official documents from the consistorium and the ministry in the time agreed upon. The pastor has stated that as soon as these documents are furnished, Mrs. Gordan will be baptized, and therefore there has been no complaint on the part of the police.

In this case Mrs. Gordan, having the engagement to become a Christian before she had married an American, there was no question for this legation to consider, but I should like to know positively the exact views of the Government as to how far American citizens of the Hebrew religion can be protected in the exercise of the rights which are granted to them by the first article of the treaty of 1832. In that article nothing was said with regard to the religion of Americans, and it is somewhat difficult to see how far the Russian Government is justified in inquiring into the religion of American citizens.

What the Russian Government will claim is that we can not ask more for American Hebrews than is given to Russians. Ought we to acknowledge this to the full extent?

I have, etc.,

MARSHALL JEWELL.

No. 9.—*Mr. Fish to Mr. Jewell.*

No. 57.] DEPARTMENT OF STATE,
Washington, June 9, 1874.

SIR: I have your dispatch No. 68, respecting the case of Mrs. Gordan, formerly Topaz, a Russian woman of the Hebrew faith, who has lately married an American citizen. It is understood that by the laws of Russia she could not, while a subject of Russia, remain in the empire without renouncing her faith and accepting Christianity. You wish to know whether by her marriage to an American such a person under the statutes of the United States and the first article of the treaty of 1832 with Russia acquires the right to be exempt from the operation of the municipal laws of Russia.

The statute of the United States regulating the status of alien women married to American citizens was approved on the 10th of February, 1855 (10 Stat. at L., 604). By this statute it is enacted "that any woman who might lawfully be naturalized under the existing laws, married or who shall be married to a citizen of the United States, shall be deemed and be taken to be a citizen."

The Attorney-General of the United States in construing this statute has held—

"That irrespective of the time or place of marriage or the residence of the parties any free white woman, not an alien enemy, married to a citizen of this country, is to be taken and deemed a citizen of the United States."

There can therefore be no doubt that such a person would, upon her marriage to an American citizen, acquire the right to be regarded by the authorities of the United States as an American citizen in every country except that to which she owed allegiance at the time of her marriage.

It is understood at the Department that the laws of Russia regard a Russian subject marrying a foreign husband as a foreigner. In such case no conflict of law could arise, because the Russian Government would concede the full American citizenship of the married woman. But should it be otherwise, her relations to that government would be affected by another opinion of the Attorney-General (given by Attorney-General Hoar), that while the United States may by law fix or declare the conditions constituting citizens of the country within its own territorial jurisdiction, and may

confer the rights of American citizens everywhere upon persons who are not rightfully subject to the authority of any foreign country or government, it ought not, by undertaking to confer the rights of citizenship upon the subject of a foreign nation, who had not come within our territory, to interfere with the just rights of such nation to the government and control of its own subjects.

It is perhaps of little practical importance whether Russia does or does not recognize the rights conferred upon such a person by the statute of 1855, since an undoubted American citizen would be bound when in Russia to obey the municipal laws of the empire.

The treaty of 1832, to which you refer, is a commercial treaty. The right of residence in Russia granted to American citizens is granted "in order to attend to their affairs;" but it is also given "on condition of their submitting to the laws and ordinances there prevailing."

How can it be contended that a law or ordinance respecting religious faith is not a law or ordinance within the contemplation of the treaty? It may be a proper subject for regret that the Russian Government should feel itself constrained to adhere to a policy which the statesmen of the United States regard as a relic of illiberality. But in the presence of history it can not be contended that the right to enact and enforce laws respecting the religious faith and observances of persons who receive the protection of a state has been insisted upon and exercised by almost every nation of modern Christendom. We need not travel beyond the time of recognized writers on international law to find the Edict of Nantes and its revocation; the statutes against non-confirmists; the laws under which the Quakers were persecuted in New England; the laws for the administration of the inquisition; the statutes which sent prisoners to the dungeons of Naples; the laws for the prevention of the circulation of the Bible in the Papal States.

We may deplore the ignorance of the true principles of government which leads to the enactment of such laws; we may venture to express hope (when occasion calls) that they will not be enforced against peaceful Americans; but in the present case no facts are found which would justify us in assuming that the treaty of 1832 would be infringed by an attempt to enforce against Mrs. Gordan the local municipal law of Russia respecting persons of the Hebrew faith residing within the limits of the empire.

Beyond this specific expression of opinion, it does not appear to be necessary or proper to go on the facts reported by you.

Yours, etc.,

HAMILTON FISH.

No. 10.—*Mr. Schuyler to Mr. Fish.*

No. 92.] LEGATION OF THE UNITED STATES,
St. Petersburg, March 15, 1875. (Received April 7.)

SIR: Referring to the memorandum on the legal position of the Hebrews in Russia, inclosed in my dispatch, No. 21, of September 29, 1872, I have the honor to inform you that a commission is now sitting at the ministry of the interior for the consideration of some scheme for improving the condition of the Hebrews.

Prominent among the questions submitted is that of granting permission to the Hebrews to reside freely in all parts of the empire. I inclose to you, marked 1, an abstract of a report made to the commission on this question, by the member specially charged with its study—Mr. Grigorieff, a well-known orientalist, a professor in the university, and at present director of the press. This report is exceedingly interesting as showing the views of enlightened and conscientious government officials on this subject.

It is to be hoped that the commission will devise some method for relieving the ignorance and distress which certainly exist among the Hebrews of the western provinces.

I have, etc.,

EUGENE SCHUYLER.

[Inclosure in No. 92.—Translation.]

Abstract of a report of Mr. V. Grigorieff, member of a commission for the improvement of the life of the Hebrews, on the question of their place of residence.

The question of permitting the Hebrews to reside in all parts of the empire should be considered rather with a view to what would be the effects upon the interests of the immense majority of the Russian and other populations of the empire, than with regard to the interests of the Hebrews themselves. If, therefore, the distribution of

the Hebrews throughout the empire threatens no evil consequences to the rest of the population in economical, moral, or political respects, and can, at the same time, better the condition of the Hebrews, there will be of course, no reason for longer restricting them to the provinces where they at present reside. If it seems, however, that the contrary will be the case, the present restrictions on the Hebrews must be kept up, at least for the present. For that reason it is necessary to decide this question before any others.

The demand for an extension of the rights of residence does not come so much from the Hebrews themselves as from the local representatives of the government in the provinces where the Hebrew population is massed together, and their representations are less inspired by the thought of improving the condition of the Hebrews than by the desire to alleviate the sad condition of the native population. According to them the large number of Hebrews in proportion to the Christians has this result: that the Hebrews, not finding sufficient means for supporting themselves by honest labor, are compelled, so to speak, to earn their bread by exploiting the Christian population, or by having recourse to all kinds of underhanded practices. The inference which they draw is tnat if the Hebrew population in western Russia is thinned out it will be easier, both for the natives and the Hebrews, to support themselves by honest work. This conclusion, however, is illogical and impracticable. A great population is only burdensome to a country when the productive forces of that country are insufficent to nourish it; but it is impossible to say, with regard to the western provinces, that their soil, although bad in parts, is unable to feed the present population, or even one very much larger. According to the last census, the number of inhabitants to a square verst in these nine provinces was from 11 to 47, being on an average 24 7-9; but to make no comparison with much more thickly-settled foreign countries, the population in the provinces of Podolia and Kief, 47 and 40 to a square verst, is no greater than that in Kursk and Tula, while the rest are inferior in population to very many provinces of the empire, which are by no means so good in soil. It will be seen, therefore, that the western provinces can not complain of density of population. The number of inhabitants in these provinces, according to the last census, was 10,620,624, and the number of Hebrews 1,139,633. The Hebrew population was, therefore, in proportion to the Christian population, as 1 to $8\frac{1}{3}$, though on account of the means which the Hebrews employed to avoid registration we may consider them even as 1 to 6. We find the same average relations between the Mohammedan and the Christian population in the provinces of Simbirsk, Samara, and Kazen, to say nothing of Orenburg, where Mohammedans and Christians are in equal numbers, yet no one has complained of the great numbers of Mohammedans in these three provinces, no one considers it an evil, no one accuses the Mussulman of exploiting the Christian population, and it has never entered the head of anybody for the good of the latter to insist that the Mohammedan population should be lessened by distributing it among other provinces. It is evident therefore, that the evils arising from the numbers of the Hebrew population in the western provinces do not come from their great ratio to the Christian population, but from something else. On investigation it is impossible not to see that the cause why they and not other races are hurtful springs from the fact that the Hebrews do not wish to exist by the same means as the rest of the population.

Russia, including also the western provinces, is an agricultural country, and the great majority of its inhabitants must get their living by cultivating the ground. We should consequently expect that the most of the Hebrews who live in Russia would occupy themselves with agriculture. Were this the case the Hebrews would be no burden on the rest of the population, however numerous they might be. In spite of this the Hebrews, not only in the western provinces, but wherever they are, never become agriculturists. It is well known that the many and various attempts of the government to make them farmers have always failed, not because the measures themselves were badly taken, but because the Hebrews absolutely refused to carry them out. The Hebrew says that he is weak in body and unfit to be an agriculturist, but can be profitable to the country in other ways, as, for instance, as an artisan. It is, however, false that the Hebrew is any weaker than a peasant of White Russia, worn out by years of cold and oppression; but when such a peasant can not feed himself and his family at home, he goes for hundreds and thousands of versts for agricultural labor and works satisfactorily. Did it ever come into the head of any Hebrew to support himself in this way? Did any Hebrew community ever ask to be allowed to emigrate into Great Russia for this reason? As to being an artisan, that is only an excuse for avoiding heavy labor. Are there any Hebrew artisans who are stone-cutters, or carpenters, or smiths, or, in general, laborers working under the open sky, with considerable loss of muscular strength? Even as artisans the Hebrews prefer to be tailors, hatters, shoemakers, turners, watch-makers, and jewelers. In these branches of trade there are certainly very many skillful and industrious workmen among the Hebrews, but it would be strange if a whole million of inhabitants should desire exclusively to work at these trades, and then complain, as the Hebrews do, that there are not buyers enough for their productions, and that therefore they

are hungry and cold. Are such complaints well founded or worthy of attention? The Hebrews have great musical capacities, and many of them are living by being wandering musicians, but it would be absurd if the majority of Hebrews should ask to earn their living only by this means, and yet their desire to limit themselves to certain trades is very similar to a demand of this kind. There are numerous poor populations throughout western Europe, but where they wish to exist by honest labor they invent new trades and industries, which, although not very great, still bring them in bread, such as the manufacture of tin-ware in the Carpathians, wood-carving in the Tyrol, and the manufacture of wooden clocks in Switzerland; but the poor Hebrews have invented nothing of this kind.

The Hebrews might with profit to themselves and to the western provinces occupy themselves with manufactures. The concentration of capital in the hands of some of them gives them every possibility of carrying on the working up of local raw materials. Western Europe is supplied with hemp which comes from the western provinces or through them. Why could they not introduce rope-works? The same question might be asked with regard to linen manufacture, which supports tens of thousands of looms abroad. The country is rich in forests, yet no one has ever opened a cabinet manufactory, such as exists in Riga, or a manufactory of cheap furniture, which is so dear in Russia, and would have such an excellent sale. Instead of manufactures of this kind the Hebrews have occupied themselves in White Russia only with the distillation of spirits, and that not so much for the business itself as for the possibility of obtaining illegal gains through it.

The only industry by which the Hebrews wish to live, and by which the greater part of them do live, and for which they are abundantly qualified, is that of being factors and middlemen. As such they have acquired an amount of influence which renders both buying and selling impossible without their aid. It appears in this way that the Hebrews wish to exist, and do exist, in great part only by absorbing the fruits of others' labor and by producing almost nothing themselves, in consequence of which they are a burden to the provinces where they settle greater in proportion to their numbers. The economical injury which they cause to the local population is incalculable. The existence of middlemen is frequently an evil, but how much more so when these middlemen constitute a caste having nothing in common with the rest of the population either by origin, religion or language, a caste which desires to know nothing in the world except their fellow-believers and their benefit, considering Christians as their born enemies, a caste petrified in their isolation, often following fanatical leaders, and regarding the laws of the country in which they live as only externally bindng on them, avoiding compliance with them by all possible means, and always in every matter acting together.

The economical evil, however, which the Hebrews work to the natives is only one of the ways in which they injure them. They not only ruin but they corrupt the native population. In order to exist in these conditions, outside of which the Hebrews do not wish to exist, they must necessarily have recourse to unlawful and criminal acts, more especially because, first, they do not consider the laws of the state binding on their consciences; and, secondly, because their close union and the way in which all stand up for one gives them the possibility of escaping punishment. Then the Hebrew population living on the frontier almost always occupies itself with smuggling, thus diminishing the government revenues. Hebrews here are often also sellers of stolen goods. Into criminal acts of this kind they also entice the native population, which would not be so easily led astray were it not so thoroughly dependent upon them. They see also the ease with which the Hebrews escape punishment.

With such an influence of the Hebrews in the western provinces it is not surprising that the authorities and the local population groan under the burden and recommend to the government any measure which may relieve them. But as we have seen that the evils do not come from the absolute numbers of the Hebrews, but from their disinclination to work, the problem is, not how to diminish the Hebrew population, but how to change their condition of life so as to turn them from parasites into producers. If the Hebrews do not wish this, and desire to remain as they are, their distribution throughout Russia would only introduce into it the same evils which now weigh upon the western provinces. An example of this may be seen in the south of Russia. No further back than the end of the last century the region of New Russia was a waste where wild horses still pastured. It has quickly become settled and prosperous owing to the labor which has been given to working its virgin soil. A share in this rich soil was also allotted by the government to the Hebrews, but even there they found it impossible to work it. From the farm-houses which had been constructed for them they carried off the doors, the window-frames, everything that was movable, even to the agricultural tools with which they were provided, and ran away. The commercial city of Odessa attracted to it the Hebrew population, and they there began to get a living by day-work in the grain warehouses and by their usual trades. With these means of subsistence they would not only have been harmless but even profitable, notwithstanding their great numbers (in 1858 in the 104,500 population of Odessa there were 14,100, that is nearly one-seventh), but little by little they began

to get into their hands great amounts of capital, began to become middlemen, and are at present the real commercial masters of the region, having full possession of all the grain trade so that neither producers nor purchasers can carry on their business without them, and are forced to buy and sell at the prices they fix. The country suffers from this. The riot some three years ago against the Hebrews in Odessa was not so much the effect of religious fanaticism as it was a protest against their rule.

Hebrew distillers and Hebrew artisans are allowed in all parts of the empire, but nowhere have they by any means distinguished themselves in their trades. Distilling serves only as a pretext for cheating the excise; and, under the guise of artisans, vagabonds of all kinds come, who by their presence immediately increase the percentage of crime in the districts where they settle. Wherever there are two or three Hebrew families there immediately begins a trade in all sorts of old rubbish, which quickly passes into a traffic of stolen goods, coin immediately disappears, and not uncommonly counterfeit money begins to circulate. The Hebrews, for themselves or through their wives, obtain confidence by proposing their services to unwary people, giving small sums on loan, taking all kinds of things in pledge, and in a short time both masters and servants get entangled in their nets to such a degree that they can not extricate themselves. If such is the evil brought by the Hebrews into Great Russia, where they are found in relatively insignificant numbers, what will it be if we open the doors wider to them.

The supporters of the idea of promoting the Hebrews' entrance into Great Russia say that there they will not be dangerous, because the Great Russian peasant has a much stronger and more independent character than the White Russian. This, however, makes little difference. Even the Greeks, who were noted for their commercial talent, have been pushed out of business at Odessa by the Hebrews. The only place where the settlement of the Hebrews would not be dangerous is among the Russian sectarians, who have a similar organization to the Hebrews; but the sectarians constitute such an insignificant percentage of the population that they could not be taken into account in considering the question. It must not be left out of view that the better part of the Hebrew population is already allowed admission to the rest of the empire. However burdensome the Hebrews may be to the western provinces, it is much better that one part rather than the whole of the body-public should suffer, especially as the strength of the Hebrews is great and increases daily and hourly. In the society known as *L'Alliance Israélite*, the Hebrew race has its own government, which exercises pressure on any government that is not strong enough to stand against it. Many ask why it is harmless for the rest of the population that Hebrews have civil and political rights in England, France, and Germany. This harmlessness is easily explained; on one hand, by the great civilization and intellectual development of those countries, by which the Christian population better understands its interests and can better protect them, and on the other hand, by the relative smallness of the Hebrew element. In Great Britain there are not more than 40,000, and in France 100,000. But even in those parts of Western Europe where the Hebrew inhabitants constitute a considerable percentage of the population, they are a burden to the country, call out general complaint, and threaten a state of things similar to that which exists in our western provinces. In Vienna, for example, the Hebrews have got into their hands all the banking-houses, all the newspaper press, and the best part of the real estate of the city.

In view of all that has been stated, the unconditional permission to the Hebrews to immigrate into Great Russia would be an experiment dangerous in the highest degree, and not offering the slightest profit, or bettering the present condition of things. In a word, while the Hebrews remain what they are, it is impossible for the Government to act toward them as toward the other nationalities of the Empire, or give them the same rights that others enjoy. That can only be allowed when all possible measures have been tried for first making them productive and profitable citizens in the places of their present residence, and when these measures have met with full success. There is no reason to despair of finding and applying such measures. The Hebrews were not always such as we see them now in the western provinces, and are not such everywhere now. The great cause of their present position is chiefly owing to their selfish, ignorant, and fanatical leaders. Freed from their oppression, the mass may become re-educated and renewed. To show how this end may be accomplished is the problem of our commission.

No. 11.—*Mr. Evarts to Mr. Hoffman.*

No. 52.] DEPARTMENT OF STATE,
Washington, May 6, 1879.

SIR: I inclose herewith a copy of a letter from the Hon. George H. Pendleton, Senator from Ohio, and a copy of the memorial of Leo Wise, regarding certain naturalized citizens of the Jewish persuasion in Russia, to which it refers, and a copy of

the letter of H. Rosenstrauss, alluded to in the memorial; and have to inquire if the alleged preference of British Jews in Russia, which is set forth in the letter of Mr. Rosenstrauss, is a fact, and if so, under what circumstances and by what legal instrument were exceptional privileges in the regard stated conferred by Russia on Jews from Great Britain.

I have, etc.,

WM. M. EVARTS.

[Inclosure 1 in No. 52.]

Mr. Pendleton to Mr. Evarts.

UNITED STATES SENATE CHAMBER,
Washington, April 23, 1879. (Received April 23.)

SIR: Referring to our conversation last Saturday, I have the honor to send you the memorial of Leo Wise, on the subject of the condition of naturalized citizens of the Jewish race in the Empire of Russia, and to request that the reply be sent under cover to me.

Very respectfully,

GEO. H. PENDLETON.

[Appendix No. 1 to inclosure.]

Mr. Rosenstrauss to the Editor of the Israelite, Cincinnati, Ohio.

CHARKOW, RUSSIA, *March* 11 (23), 1879.

SIR: You will no doubt be surprised to be intruded upon by individuals living across the ocean, and especially in a country where in fact no Jew ought to live, but lot destining us to be strewn all over the earth, it seems that Russia in that regard makes no exception.

Knowing your paper well and always being an admirer of your untiring efforts in teaching humanity to mankind in general I thought of laying a very simple case before you in the hope that in time it may reach its right destination. I am a citizen of the United States of America, have been living there for over twenty-eight years; the last of ten years I was engaged in the mercantile business in the city of Rochester, N. Y., where my name is known to almost every business man.

About three years ago a brother of mine living in the Empire of Russia wrote for me to come there, and business at that time being rather dull in the United States, I left with my family to seek my luck here. Everything so far went well, with only that exception, that I missed my free country, America, where Jews and Gentiles are treated alike.

With great difficulty and by paying double taxes I was allowed to carry on my business here in Charkow as an optician, and at the same time I represent the Singer Sewing Machine Manufacturing Company. Now the building wherein my business is located is about to be sold, and in order to prevent my moving, which is quite a tedious task here, I concluded to buy the property, but heard since, which to my surprise I was not aware of, that Jews were not allowed to hold real estate in this part of Russia, except Jewish British subjects. I, thinking that such was a mere impossibility, wrote to our consulate at St. Petersburg, inquiring if such was the case and if such had also effect on American Jewish subjects. A few days ago I received an answer from our honorable consul-general, Mr. Edwards, temporarily acting for Mr. Stoughton, that the treaty between Russia and America had no proviso made for American Jews and thought that I must be treated alike with the native Jews.

Now, I am certainly the last man who would———any preference over my fellow religionists, but the answer from our worthy consul is anything but satisfactory to me, especially when I know that America in their Constitution makes no difference in creeds.

Now, when a treaty with any country is made I have no doubt but America has no bad intention at heart, and when it says in the treaty that their citizens fare alike with those of the country the treaty is made with, it is my sincere belief that America means all citizens of whatever religion they are; such has, as I understand, not been stated in our treaty between us and Russia, and Russia, looking at a Jew as a secondary being, will certainly, if such a proviso is not made, put him under the same category as the native Jew.

Now, in the name of humanity, I beg of you to see if a decent, intelligent man could not be placed on the same footing as a common Russian laborer, especially such as we have here in Russia, not like in America, where a laborer sometimes is as well educated as the best of business men. Here laborers and farmers are, with only very few exceptions, most all without education, and still their rights are equal to any other subject of Russia, but we Jews, for the very simple reason because it pleased our Lord to make us such, no matter how intelligent we are or how honest and upright our actions may be, are without rights whatever.

In the sincere hope that you may give this letter your worthy attention, I wish you, dear sir, that your services in bringing it before the right authorities may be crowned with only what humanity demands.

Yours, etc.,

H. ROSENSTRAUSS.

[Appendix No. 2 to inclosure.]

Mr. Wise to Mr. Evarts.

CINCINNATI, OHIO, *April* 21, 1879.

SIR: According to your instructions I place before you the communication of H. Rosenstraus, of Charkow, Russia. Rosenstraus claims to be an American citizen unjustly deprived of the rights guarantied to all American citizens by Russia by the various treaties with the United States.

The status of Rosenstraus may be summarized as follows, viz:

1. Rosenstraus, the complainant, is a naturalized citizen of the United States, having been duly qualified, taken the necessary oath, and received his naturalization papers and having resided and carried on business in Rochester, N. Y., for a period of twenty-eight years.

2. About three years ago he, with his family, removed to Russia, to do business there, without however doing any act at the time or since by which he may be adjudged to have declared his intention of ceasing to be a citizen of the United States or of becoming a subject of the Russian Empire.

3. In addition to his trade, that of an optician, he is the agent for the Singer Sewing Machine Company, and is therefore entitled to the protection guarantied by Article I of the "treaty of navigation and commerce" passed December 6 (18), 1832.

His complaint may be analyzed as follows, viz:

1. On account of his Israelitish faith an unreasonable and exceptional tax was extorted from him for the privilege of carrying on his business, and other serious obstacles were placed in his way for the same cause.

2. He was debarred from the right of holding real estate necessary to the successful carrying out of his business.

3. That in reply to a complaint directed to the United States consulate at St. Petersburg, he received a reply to the effect that no Jews excepting such who are subjects of Great Britain can hold real estate in Russia, and further, that in the treaties between the Governments of the United States and Russia no provision had been made for the protection of American Jews, and they consequently stood in the same position and liable to the same disabilities as Russian subjects of the same faith.

I would therefore respectfully request that the proper officers of our Government be instructed to institute inquiries as to the facts upon which this complaint is based, and if upon examination it be found that they are truly stated; and that the complainant has been deprived of just rights or is injured in his property or both, that proper steps be taken to secure his future protection, and that he may be properly indemnified for damages caused by such illegal deprivation or injury.

Furthermore, in view of the fact that similar complaints are received from time to time from various countries which have entered into treaties of peace and amity and navigation and commerce with the United States, I would, for the guidance of Israelites who may wish to travel or carry on business abroad, request replies to the following interrogations, viz:

1. What are the general rights of citizens of the United States in Russia?

2. Are American Israelites by reason of their faith debarred from the enjoyment of the privileges guarantied by treaty to all American citizens? If so, why?

3. In making treaties with the government of a country where native Israelites are subject to disabilities and are not admitted to the full rights of citizenship, is it necessary that in order to secure to American Israelites the enjoyment of the privileges granted by those treaties to citizens of the United States generally, a clause be inserted in the treaties wherein the right of Israelites to be enumerated among those to be benefited by the treaties is specifically set forth?

I trust that the importance of these inquiries to a large number of our citizens will commend them to your favorable notice, and that action in the case of Rosenstrauss be speedily taken.

I remain, etc.,

LEO WISE.

No. 12.—*Mr. Hoffman to Mr. Evarts.*

No. 109.] LEGATION OF THE UNITED STATES,
St. Petersburg, May 29, 1879. (Received June 14.)

SIR: I have the honor to acknowledge the receipt of your dispatch No. 52, calling my attention to the case of Mr. H. Rosenstrauss, a naturalized citizen of the United States, of the Jewish persuasion, and inquiring whether any preference is extended to British Jews over those of other nationalities in the matter of holding real estate in Russia; and, if so, under what circumstances, and by what legal instrument such exceptional privileges are conferred.

And, first, I am requested by Mr. Edwards to state that he did not inform Mr. Rosenstrauss that British Jews are allowed to hold real estate in Russia, as alleged by Mr. Wise in his letter to the Department. As consul, Mr. Edwards declined to give any opinion upon the subject, but while temporarily representing the minister of the United States he thought it right to answer Mr. Rosenstrauss to the effect that, in his opinion, "the treaty in force between the United States and Russia, conceded to him no rights in addition to those enjoyed by Russian subjects of like faith." I have the honor to inclose a copy of Mr. Edwards's letter.

In July last, at the request of Mr. Rosenstrauss's brother and partner, Mr. Stoughton inquired of Mr. de Giers if alien Jews are allowed to hold real estate in Russia. Mr. de Giers was unable to answer, but promised to inquire in the proper quarter and inform Mr. Stoughton. No reply has yet been received. Since my return I have reminded Mr. de Giers of Mr. Stoughton's inquiry, but I should not be surprised if I received no answer. The foreign office in several countries of Western Europe refuses to answer questions of law. It points you to the published statutes of the country, and if these are of difficult interpretation to the foreigner he must have recourse to his own counsel. Most of the embassies and legations here have counsel attached to them. As this legation does not enjoy this advantage, I am compelled to give you the result of my own examination of such books as are accessible to me, and of my inquiries in well-informed quarters.

The laws of Russia bristle with so may exceptions that the exceptions frequently appear to be the rule.

The strong personal element which pervades the administration of the government frequently enables many individuals of a class to do what is forbidden to the class. Then the ancient laws of the states which have from time to time been annexed to the Russian crown, and the dangers apprehended from local political disturbances, or, on the other hand, the loyal and "well intentioned" character of the community, and even the social status of the individual, have a most marked effect in modifying the application of the law.

In the old Polish provinces Roman Catholics, native as well as foreign, are not allowed to hold land. In the Grand Duchy of Finland no alien is allowed to purchase real estate, not even a Russian, unless of noble birth, and in the Baltic provinces all persons, foreign or native, who are not of the noble or "citizen" class are subject to many annoying restrictions in the purchase and tenure of land. While in Russian Poland, the code enacts that a foreigner shall enjoy in Poland only those civil rights which are accorded to a Pole in the foreigner's country.

This system of exceptions is applied to the Jews. Under article 1516, vol. ix of the code, foreign Jews are not allowed to settle in Russia or become Russian citizens. But as under several treaties, and especially under that with Great Britain, their right so to settle is clear, they are in point of fact permitted to reside here. They do so, however, under restrictions, one of which is that they must receive the permission of the three ministers—of finance, of the interior, and of foreign affairs—and another that they must belong to the first commercial guild, and, of course, pay accordingly. (Article 1523, vol. ix of code.)

So as regards real estate, native Jews are not permitted by law to hold land in Russia, yet it is notorious that many do hold it. When they reside far from the Polish frontier, when they live in a peaceful and loyal part of the empire, when their social position and wealth are a guaranty that they will earnestly support the government, the authorities close their eyes and do not see the most transparent subterfuges.

Foreign Jews stand upon a better and more legalized footing. Under article 1523 it is permitted to "alien Jews distinguished by their position in society, or their extensive business transactions, to establish banking houses and manufactories, and to *hold real property;*" and in this respect all alien Jews, American and British, stand upon precisely the same footing.

This position of British Jews has, as far as I can learn, given rise to no reclamation on the part of Great Britain. They are allowed under the treaty to settle in Russia, and they are granted privileges not accorded by law to native Jews. * * *

In Mr. Rosenstraus's case the reasons why the authorities in Kharkoff do not find in him the qualities necessary to bring him within article 1523 of the code are easily guessed.

Since 1865 his brother and partner has been in a chronic state of difficulty with these authorities. In that year he wrote to Mr. Clay that he would not be permitted to continue his business unless he produced his certificate of christening. Mr. Clay intervened, and in due time was answered by the foreign office that, as an American, Mr. Rosenstrauss had enjoyed "exceptional tolerance," but that he had abused the protection extended to him by the legation. Again, in 1873, Mr. Rosenstrauss complained; the principal cause of complaint on this occasion being that he was compelled to belong to the first guild, and pay 600 roubles, instead of to the second guild, and pay 150 roubles. Mr. Jewell intervened, expressly disclaiming, however, a demand for any privileges not extended to native Jews, and in due time was answered that the laws as regards the different guilds had been amended (paragraph 5 of the annex of article 128 of the Code of Commerce), and that Mr. Rosenstrauss was clearly included in the first guild. Mr. Westmann added that this was a matter within the exclusive competency of the municipal authorities, and that the central government never interfered with them.

I have the honor to call your attention to the fact that Mr. Rosenstrauss is a naturalized citizen of the United States; that he has now been absent from the country for over three years; that he manifests no intention of returning, but on the contrary speaks as if he was permanently settled at Kharkoff, and is desirous of buying real estate there; that apparently he pays no taxes, performs no militia or jury duty; in short, makes no return whatever for the protection he claims from the United States.

I have, etc.,

WICKHAM HOFFMAN.

[Inclosure 1 in No. 109.]

Mr. Edwards to Mr. Rosenstrauss.

UNITED STATES CONSULATE-GENERAL,
St. Petersburg, Russia, March 8, 1879.

SIR: With reference to your communication of a recent date relative to your right to purchase and hold real estate in the city of Kharkoff, I have the honor to inform you that the treaty in force between Russia and the United States concedes to you no rights in addition to those enjoyed by Russian subjects of like faith.

It is difficult to perceive upon what ground an American citizen can claim in Russian territory rights not conceded to Russian subjects.

Your position would, therefore, seem to be, so far as I am at present advised, the same as Russian subjects of like faith in Kharkoff. If, therefore, the laws now in force in Kharkoff prohibit those of Jewish faith from purchasing property in Kharkoff, then you are prohibited.

You should therefore seek the advice of local lawyers and be governed in your action by the laws now in force in the province where the property is situated.

W. H. EDWARDS.

No. 13.—*Mr. Hoffman to Mr. Evarts.*

No. 113.] LEGATION OF THE UNITED STATES,
St. Petersburg, June 13, 1879. (Received June 30.)

SIR: Referring to my No. 109, in answer to your No. 52, you will recollect that I had the honor to say to you that Mr. Stoughton had inquired if alien Jews were allowed to hold real estate in Russia, and that I had renewed the inquiry; I am now in receipt of a reply from Mr. de Giers, a translation of which I beg to inclose. You will observe that his reply confirms what I had the honor to write you in my No. 109, viz, that all foreign Jews can purchase real estate in Russia under certain restrictions, and if they fulfill certain conditions of social position and wealth.

Mr. de Giers adds, however, that in the governments of Kieff and Wilna, foreign Jews are not allowed to hold real estate.

I have, etc.,

WICKHAM HOFFMAN.

[Inclosure No. 1 with No. 113.—Translation.]

IMPERIAL MINISTRY OF FOREIGN AFFAIRS,
DEPARTMENT OF INTERIOR RELATIONS,
St. Petersburg, May 31 (*June* 12), 1879.

SIR: In reply to the note of the legation of the United States, dated 12th (24) April last, regarding the right of Israelites to purchase real estate at Kharkoff, I have the honor to inform you that foreign Israelites who have fulfilled the formalities required by paragraph 5 of the first note of article 128 of volume XI (of which I take the liberty to inclose a translation), have the right to purchase real estate in all the cities of Russia except those "governments" which at the time of the promulgation of the ukase of the "Senate Directory" of August 5, 1864, were comprised in the administrative circle of the governors-general of Kieff and Wilna.

Receive, sir, etc.,

GIERS.

[Translation.]

Extract from the fifth paragraph of the first note of article 128 *of volume* 11 *of the Regulations on Passports, in continuation of those of* 1863.

Those Israelites, foreign subjects, who came to Russia, and who are distinguished by their social position and their important commercial operations, have the right, on receiving a special permission in each case, from the ministries of the finances, of the interior, and of foreign affairs, to carry on their business and to establish banking-houses, if provided with certain certificates of commerce of the first guild.

The same Israelites have also the right to establish manufactories, and to acquire and hold real estate without tenants ("*non peuplés*") on complying strictly with the rules set forth in the civil code.

No. 14.—*Mr. Evarts to Mr. Foster.*

No. 2.] DEPARTMENT OF STATE,
Washington, April 14, 1880.

SIR: I have received a letter from Messrs. S. Wolf and A. S. Solomons, of this city, representing the "Union of American-Hebrew Congregations," in which they refer to newspaper statements indicating that the Jews in Russia have recently been subjected by the Government there to extraordinary hardships, and expressing a desire that the minister of the United States to St. Petersburg may be instructed "to make such representations to the Czar's Government, in the interest of religious freedom and suffering humanity, as will best accord with the most emphasized liberal sentiments of the American people." The writers of the letter observe at the same time that they are well "aware of the impropriety of one nation interfering with the internal affairs of another in matters of a purely local character."

You are sufficiently well informed of the liberal sentiments of this Government to perceive that whenever any pertinent occasion may arise, its attitude must always be in complete harmony with the principle of extending all rights and privileges, without distinction on account of creed, and can not fail, therefore, to conduct any affair of business or negotiation with the government to which you are accredited, which may involve any expression of the views of this Government on the subject, in a manner which will subserve the interests of religious freedom. It would, of course, be inadmissible for the Government of the United States to approach the Government of Russia in criticism of its laws and regulations, except so far as such laws and regulations may injuriously affect citizens of this country, in violation of natural rights, treaty obligations, or the provisions of international law, but it is desired that the attitude of the minister, as regards questions of diplomatic controversy, which involve an expression of view on this subject, may be wholly consistent with the theory on which this Government was founded.

I am, sir, etc.,

WM. M. EVARTS

No. 15.—*Mr. Hoffman to Mr. Evarts.*

No. 205.] LEGATION OF THE UNITED STATES,
St. Petersburg, May 7, 1880. (Received May 24.)

SIR: I have the honor to report to you the case of Henry Pinkos, an Israelite and citizen of the United States.

About a fortnight ago this man was brought to me by Mr. Edwards, who informed me that Pinkos had been ordered to leave St. Petersburg. The latter told me that all foreign Jews had been ordered to leave this city at once.

I wrote immediately to Mr. de Giers, and Mr. Edwards saw General Zouroff, the prefect of the city, and obtained from him a delay of three days.

As I did not hear from Mr. de Giers, I went to see him and suggested that this man might at least have a delay of some weeks in order that he might dispose of his property or embark with it for England on the opening of navigation. When the three days had expired I applied to General Zouroff for a further extension, and obtained a week. As no vessel had in the mean time arrived, I applied at its expiration for still further delay and obtained three days more, with an intimation that General Zouroff regretted that it would be impossible for him to accord any further delay.

The extended time expires to-day. English steamers have in the mean time arrived, and Pinkos will be able to embark at once with his family and property.

I have heard nothing whatever from Mr. de Giers, from which I infer that he is unable to interfere with General Melikoff's order. Upon calling at the foreign office yesterday I was unable to see him on account of the Easter holidays.

I understand that, since it has appeared, many Jews have been engaged in the plots against the Emperor, and that foreign Jews have been ordered to leave not only St. Petersburg, but Moscow, and some other large towns, where they have hitherto been permitted to reside.

I have, etc.,

WICKHAM HOFFMAN.

No. 16.—*Mr. Hoffman to Mr. Evarts.*

No. 208.] LEGATION OF THE UNITED STATES,
St. Petersburg, May 17, 1880. (Received June 5.)

SIR: Referring to my dispatch No. 205, in relation to the case of Henry Pinkos, an American citizen and an Israelite, I have the honor to inform you that I am at length in receipt of a note from Mr. de Giers in answer to mine of the 20th of April.

The Russian Government grants to Pinkos a delay of three months in order to wind up his business.

On sending to notify him I found that he was still at St. Petersburg, the police superintendent of his district having permitted him to remain from day to day since the expiration of the time allowed him by General Zouroff, to await the answer of the Russian Government.

I have, etc.,

WICKHAM HOFFMAN.

No. 17.—*Mr. Foster to Mr. Evarts.*

No. 9.] LEGATION OF THE UNITED STATES,
St. Petersburg, June 17, 1880. (Received July 3.)

SIR: Your dispatch No. 2, of the 14th of April last, relating to the reported treatment of the Jews in Russia, was duly received.

I beg to state that the views expressed therein have been steadily kept in mind and are heartily reciprocated by me; but up to the present date no fitting opportunity has offered to enable me to submit to the Russian Government the representations indicated by the gentlemen referred to in your dispatch. You are doubtless aware that the present state of public feeling in this country is such that the Imperial Government would not receive in a kindly spirit any suggestions which might have the semblance of criticism upon the repressive measures it has thought necessary to adopt in view of the repeated attempts upon the life of the Emperor. I must, therefore, await a more favorable occasion to make the representations alluded to; an imprudent or hasty presentation of them would be likely to aggravate rather than improve the condition of the people for whose benefit my intervention has been asked.

Mr. Hoffman has reported to you the action of the Russian Government in ordering non-resident foreign Jews to leave St. Petersburg and other cities.

As this power has been heretofore exercised by this Government and acquiesced in by my predecessors, I have not thought proper to revise the question in the absence of instructions from the Department.

I am, etc.,

JOHN W. FOSTER.

No. 18.—*Mr. Evarts to Mr. Foster.*

No. 14.] DEPARTMENT OF STATE,
Washington, June 28, 1880.

SIR: I have to acknowledge the receipt of Mr. Hoffman's No. 205 and 208, in relation to the expulsion of foreign Jews from certain large towns and cities of Russia, and the expulsion of Mr. Henry Pinkos, a Jew and an American citizen, from St. Petersburg in particular. It appears from the latter dispatch that Pinkos has been allowed to remain three months. Mr. Hoffman does not specifically state that Mr. Pinkos or the other Jews referred to have been ordered to leave Russia, as well as St. Petersburg, but that is the implication of the dispatches.

In reply I have to observe that in the presence of this fact, that an American citizen has been ordered to leave Russia on no other ground than that he is the professor of a particular creed, or the holder of certain religious views, it becomes the duty of the Government of the United States, which impartially seeks to protect all its citizens, of whatever origin or faith, solemnly, but with all respect to the Government of His Majesty, to protest. As this order of expulsion applies to all foreign Jews, in certain towns or localities at least of Russia, it is of course apparent that the same is not directed especially against the Government of which Mr. Pinkos is a citizen, and, indeed, the long-standing amity which has united the interests of Russia with those of this Government would of itself forbid a remote supposition that such might be the case. Notwithstanding this aspect of the matter, the United States could not fail to look upon the expulsion of one of its citizens from Russia on the simple ground of his religious ideas or convictions except as a grievance akin to that which Russia would doubtless find in the expulsion of one of her own citizens from the United States on the ground of his attachment to the faith of his fathers.

It is intimated in Mr. Hoffman's No. 205 that the reason of this order may be found in the supposed implication of Jews in the plots formed against the life of the Emperor, and in so far as this may be true the Government of Russia has the entire sympathy of the Government of the United States in all just preventive efforts; and if there exists good evidence that Mr. Pinkos has been connected with any of these attempts the Government of the United States can not object to his expulsion on that ground. But such a charge does not appear to have been brought against Mr. Pinkos; and it is confidently submitted to His Majesty's Government whether, in the event Mr. Pinkos should finally be expelled from Russia, or be otherwise interrupted in his peaceful occupations, on the sole ground that his religious views are of one kind rather than another, he would not be justly entitled to make a reclamation for the damage and loss to which he might thereby be subjected.

You will present these views at the foreign office in the courteous spirit in which they are made.

I am, sir, etc.,

WM. M. EVARTS.

No. 19.—*Mr. Hoffman to Mr. Evarts.*

No. 18.] LEGATION OF THE UNITED STATES,
St. Petersburg, July 15, 1880. (Received July 31.)

SIR: I have the honor to acknowledge the receipt of your dispatch No. 14, addressed to Mr. Foster, in which you instructed him to make certain representations to the Imperial Government in relation to the expulsion of American Jews from Russia, and especially in reference to the case of Mr. Henry Pinkos.

* * * * * * *

In his No. 9 Mr. Foster wrote to the Department that while its views upon the subject of the treatment of foreign Jews in Russia were steadily kept in mind and heartily reciprocated by him, he did not consider the moment opportune for making representations to the Imperial Government upon the subject, and that such represen-

tations might aggravate rather than improve their condition. This dispatch had not reached you at the date of your No. 14.

In view of this dispatch it appears to be my duty to await Mr. Foster's return or your further instructions. Should you see fit to telegraph me to make the representations indicated, there will be a delay of two weeks only in their presentation.

In relation to this particular case of Pinkos, I have unofficial reasons for believing that at the expiration of the three months granted him, if he wishes to remain, he will not be disturbed. He tells me, however, that he has had enough of Russia and wishes to return to the United States.

I may be permitted to add that I did not intend to imply in my No. 205 that Mr. Pinkos had been ordered to leave Russia. I stated that "he had been ordered to leave St. Petersburg." I carefully examined and had a translation made of the police indorsement upon his passport, and called his attention to the fact that he was to leave St. Petersburg only. He answered, however, and justly, that with a business established here, to be ordered to leave St. Petersburg was equivalent, in his case, to being ordered to leave Russia.

I do not understand that foreign Jews have been ordered to leave Russia. As I had the honor to state in my No. 205, "foreign Jews have been ordered to leave not only St. Petersburg, but Moscow and some other large towns, where they have hitherto been permitted to reside."

These cities, it will be recollected, are under martial law, as I had the honor to report in my No. 94, of April 23, 1879; and the harsh measures of the expulsion of foreign Jews from them must be looked upon, I fear, as within the legal power and authority of the military governor.

With these explanations before you, should you still think that representations should be promptly made to the Imperial Government in regard to the case of Mr. Pinkos, it will give me pleasure to make them in the admirable language of your dispatch.

I am, etc.,

WICKHAM HOFFMAN.

No. 20.—*Mr. Hoffman to Mr. Evarts.*

[Extract.]

No. 20.] LEGATION OF THE UNITED STATES,
St. Petersburg, July 21, 1880. (Received August 9.)

SIR: Referring to my correspondence with the Department upon the case of Henry Pinkos, an American Jew, ordered out of St. Petersburg, and especially to my No. 208 upon this subject, I have the honor to inform you that, the three months' delay granted Pinkos having expired, he sold his little property at a sacrifice and prepared to leave Russia.

Having paid his passage and sent his baggage on board a vessel at Cronstadt, he was preparing to embark with his family when he was asked by the police for his passport. He showed them the indorsement ordering him to leave St. Petersburg, which he supposed to be sufficient. They told him that it was not, and sent him and his family back to St. Petersburg to procure the necessary permission. The ship sailed without him, carrying off his baggage. The captain refused to return the passage-money, as he had asked him if his passport was in order, and he found himself with his family penniless in St. Petersburg, and was indebted to private charity for the means to leave the country. This he was to have done yesterday.

I was upon the point of addressing to Mr. de Giers a note, remonstrating against the harsh treatment of Pinkos, but have concluded to await your reply to my No. 18 in reference to this case and to the general subject of the expulsion of foreign Jews from St. Petersburg and other large cities. While I feel much indignation at the manner in which this respectable and orderly citizen of the United States has been treated, I am compelled to recollect that he came voluntarily to reside nine months ago in a city then under martial law; and I am further compelled to admit that an order to leave St. Petersburg does not necessarily carry with it permission to leave Russia.

Mr. Pinkos's family complained bitterly of the unnecessary harshness with which he had been treated by the police at Cronstadt, * * *

I am, etc.,

WICKHAM HOFFMAN.

No. 21.—*Mr. Evarts to Mr. Hoffman.*

No. 22.] DEPARTMENT OF STATE,
Washington, August 10, 1880.

SIR: I have to acknowledge the receipt of your dispatches of the 15th and 21st ultimos, in the case of Henry Pinkos, a citizen of the United States, of the Jewish faith, who has been ordered to quit St. Petersburg.

In view of the cruel situation in which Mr. Pinkos was placed by the action of the police at Cronstadt I telegraphed you to-day as follows:

"Dispatch 20 received. Make every proper representation to the Government in Pinkos's case that will relieve his situation."

I am sure that His Majesty's Government will require no further reasons for the extension to Mr. Pinkos of such facilities for his departure from Russia, and for making good to him, as far as may be possible, the loss of property incident to the action taken by the authorities in his case, than a plain statement of the facts.

I am, etc.,

WM. M. EVARTS.

No. 22.—*Mr. Hoffman to Mr. Evarts.*

No. 23.] LEGATION OF THE UNITED STATES.
St. Petersburg, August 11, 1880. (Received August 30.)

SIR: I have the honor to acknowledge the receipt of your cipher telegram of yesterday, which I deciphered as follows:

"Dispatch 20 received. Make every proper representation to the Government in Pinkos's case that may relieve his situation."

Mr. Pinkos left Russia with his family on the 20th July. I did not see him personally, but I inferred from what his wife said that there had been no further police interference with him, but that he had made up his mind that Russia was no place for one of his creed, and that he proposed to establish himself in Liverpool, or return to the United States.

As the object of your telegraphic dispatch appears to have been to do everything in your power to relieve Pinkos's situation, and he has left the country, there appears to be no necessity for my communicating with the Russian Government. I shall call Mr. Foster's attention, however, to your telegram immediately upon his return. This may be expected on or shortly before September 1.

I am, etc.,

WICKHAM HOFFMAN.

No. 23.—*Mr. Evarts to Mr. Foster.*

No. 27.] DEPARTMENT OF STATE,
Washington, September 4, 1880.

SIR: I have to acknowledge the receipt of Mr. Hoffman's No. 23 of the 11th ultimo in the Pinkos case.

Notwithstanding the tenor of your No. 9 and of your note to the Department of July 24 last, as to the inexpediency of presently appealing to the Government of the Czar, in the sense of the instruction of June 28 last, touching the expulsion of citizens of the United States from Russia (or certain cities thereof) by reason of their religious convictions, the statements of Mr. Hoffman's No. 23, of August 11, last, are such that the Government of the United States would seem indifferent to the cause of its citizens in Russia did it neglect to make immediate remonstrance as set forth in said instruction of June 28. Mr. Hoffman's inference from the facts connected with Mr. Pinkos's departure from Russia is that Mr. Pinkos had made up his mind that Russia "was no place for one of his creed."

If the meaning of this is that a citizen of the United States has been broken up in his business at St. Petersburg, simply for the reason that he is a Jew rather than a believer in any other creed, then it is certainly time for this Government to express itself as set forth in the instruction above mentioned. It should be made clear to the Government of Russia that in the view of this Government the religion professed by one of its citizens has no relation whatever to that citizen's right to the protection of the United States, and that in the eye of this Government an injury officially dealt to Mr. Pinkos in St. Petersburg on the sole ground that he is a Jew presents the same aspect that an injury officially done to a citizen of Russia in New York for the

reason that he attends any particular church there would to the view of His Majesty's Government.

It is evident that the losses incurred by the abandonment of his business in St. Petersburg will afford Mr. Pinkos ground for reclamation, if no other cause can be shown for the official breaking up of his said business than the religious views he entertained.

The direct application to have Mr. Pinkos indemnified, however, may be deferred until he shall make it appear what those losses were.

I am, &c.,

WM. M. EVARTS.

No. 24.—*Mr. Foster to Mr. Evarts.*

No. 37.] LEGATION OF THE UNITED STATES,
St. Petersburg, September 16, 1880. (Received October 6.)

SIR: Your several dispatches relating to the expulsion from St. Petersburg of Henry Pinkos, a citizen of the United States of Jewish faith, had been already acknowledged by Mr. Hoffman before my arrival. Mr. Hoffman thought proper to defer action upon your No. 14, of June 28 last, until further instructed after receipt of his dispatch No. 12, of the 20th of July, or till my return.

Having examined your instructions, and being informed of the facts of the case, I felt no hesitation in communicating to Baron Jomini, the acting minister of foreign affairs, the protest of our Government against the expulsion of American citizens from Russia, for no other reason than their adherence to the Jewish religion. It will be seen that in my note upon the subject, of which I inclose a copy herewith, I have adopted the language of your dispatch, and have only enlarged upon that dispatch in referring to the experience had in the United States in admitting the Jews to the full and unrestricted rights of citizens, which I deemed warranted by the tenor of your dispatch No. 2, of April 14 last.

The regulation for the expulsion of foreign Jews from St. Petersburg and other cities has been several times enforced against American citizens, in late years, and acquiesced in by my predecessors; but, should such action be attempted in the future, I will not fail to reiterate the protest already made, and seek to prevent the execution of the order.

I am, etc.,

JOHN W. FOSTER.

[Inclosure in No. 37.]

Mr. Foster to Baron Jomini.

LEGATION OF THE UNITED STATES,
St. Petersburg, September 2–14, 1880.

EXCELLENCY: The expulsion from this city of Henry Pinkos, a citizen of the United States, with the aggravating circumstances attending it, having been brought to the attention of my Government, I have been instructed by the Secretary of State to make known to your excellency the views of my Government thereon, and to protest against the treatment which said citizen has received.

Although the case has been heretofore brought to the attention of your excellency's department, it may be well to recall the facts attending it. In the month of April last, before I assumed the charge of this legation, Henry Pinkos applied to the consul-general of the United States in this capital for relief from an order which he said he had received from the police authorities to leave St. Petersburg, the only reason for his expulsion, as he understood it, being that he was a Jew. He was provided with a passport fully authenticating his American citizenship. The consul-general, upon inquiry, was informed that he was an industrious and quiet tradesman, and with a wife and one child had been residing in the city for some months. In the frequent interviews of the consul-general with the police authorities no charges or intimations were ever made that Pinkos was other than a peaceable and law-abiding resident.

The only relief which the consul-general and the chargé d'affaires of this legation could obtain from the police authorities was a suspension for a few days of the order of expulsion, until Mr. Hoffman was able to communicate with the foreign office and obtained through Mr. de Giers permission for Pinkos to remain for three months, to enable him to close up his business. At the expiration of this period Pinkos, having sold his little property at a sacrifice, proceeded to obey the order, placed his baggage on board a vessel at Cronstadt, and when preparing to embark with his family he was

asked by the police for his passport; whereupon he presented his American passport with which he had entered the country, with the police indorsement upon it ordering him to leave St. Petersburg, which he supposed was sufficient. The police informed him that this was not sufficient, and compelled him and his family to return to St. Petersburg. The captain of the vessel refused to refund him the passage-money paid, and sailed without him, carrying off his luggage. Having obtained from the authorities the permission required by the police, finding himself penniless, he was indebted to private charity for the means to leave the country, which he has done in compliance with the original order referred to above.

While the order was in its form merely an expulsion from St. Petersburg, Mr. Pinkos understood it to be virtually an order to leave the empire, in view of the fact that similar measures had been taken in Moscow and other cities, and of the announcement in the public press that foreign Jews were to be excluded from the country.

The Secretary of State instructs me to state to your excellency that in the presence of the fact that an American citizen has been ordered to leave Russia on no other ground than that he is the professor of a particular creed or the holder of certain religious views, it becomes the duty of the Government of the United States, which impartially seeks to protect all its citizens, of whatever origin or faith, solemnly, but with all respect to the Government of His Imperial Majesty, to protest. As this order of expulsion is understood to apply to all foreign Jews, in certain cities or localities at least, of Russia, it is of course apparent that the same is not directed specially against the Government of which Mr. Pinkos is a citizen, and, indeed, the long-standing amity which has united the interests of Russia with those of the Government of the United States would of itself forbid a remote supposition that such might be the case. Notwithstanding this aspect of the matter, the United States could not fail to look upon the expulsion of one of its citizens from Russia, on the simple ground of his religious ideas or convictions, except as a grievance, akin to that which Russia would doubtless find in the expulsion of one of her own subjects from the United States, on the ground of his attachment to the faith of his fathers.

It having been intimated to the Secretary of State by this legation that the reason of this order may be found in the supposed implication of Jews in the plots formed against the life of His Imperial Majesty the Emperor, the Secretary directs me to say that in so far as this may be true the Government of Russia has the entire sympathy of the Government of the United States in all just preventive efforts, and if there existed any good evidence that Mr. Pinkos has been connected with any of these attempts, the Government of the United States could not object to his expulsion on that ground. But neither the police authorities, in the several communications which the members of the consulate-general and this legation have had with them, in their efforts to obtain relief for Mr. Pinkos, nor your excellency's department, in the notes addressed to this legation on the subject, have ever intimated the existence of such a charge. Nor does the character of the citizens of the United States of Jewish faith afford ground for the supposition that they would be likely to engage in conspiracies or plots against the established government of the country. From the foundation of the United States as a nation, they have been entitled to the full and unrestricted privileges of citizens, and have shown themselves to be peaceable and law-observing in their conduct, quiet and industrious in their habits, and are esteemed a valuable portion of the community, so that in so far as the regulation for the expulsion of foreign Jews from Russia affects American citizens, whatever may be the conduct of their co-religionists of this or other countries, it is an unjust reflection upon American Jews as a class and a discrimination which can not be acquiesced in by my Government.

As, then, it does not appear that any criminal or improper conduct has been established against Mr. Pinkos, the Secretary confidently submits to his Imperial Majesty's Government whether, in view of the fact that Mr. Pinkos has been interrupted in his peaceful occupations and expelled from Russia on the sole ground that his religious views are of one kind rather than another, he is not justly entitled to make reclamation for the damage and loss to which he has been subjected?

In thus presenting, for consideration and appropriate action, the views of my Government upon this important subject, I improve, etc.,

JOHN W. FOSTER.

No. 25.—*Mr. Foster to Mr. Evarts.*

No. 41.] LEGATION OF THE UNITED STATES,
St. Petersburg, September 28, 1880. (Received October 16.)

SIR: I am in receipt of your No. 27, of the 4th instant, relating to the expulsion from St. Petersburg of the Jewish American citizen, Henry Pinkos.

You will have noticed by the receipt of my No. 37, of the 16th instant, that I have already executed the instructions contained in your No. 14, of June 28 last, in a manner which I trust will be satisfactory to you.

As therein stated, it will be remembered that I was absent from this capital on leave when your No. 14 was received at the legation. My No. 9 was written before the receipt of your No. 14, and related mainly to the inexpediency, or rather inopportunity, of making representations in favor of Russian Jews, and my note of July 24 referred to by you manifests a hearty concurrence in the views and instructions of your No. 14.

Mr. Pinkos has returned to the United States without leaving his address, and I have no means of obtaining accurate information as to the amount of his losses, but should the phase of the question make a bill of particulars essential, sufficient data are at hand to cover that point.

I am, etc.,

JOHN W. FOSTER.

No. 26.—*Mr. Foster to Mr. Evarts.*

No. 48.] LEGATION OF THE UNITED STATES,
St. Petersburg, October 20, 1880. (Received November 11.)

SIR: It becomes my unpleasant duty to report another case of the enforcement against an American citizen of the order prohibiting foreign Jews to reside in St. Petersburg. The first knowledge which I had of the fact was obtained through a letter from Mr. White, our minister in Berlin, a copy of which and of my reply thereto I herewith inclose.

From Mr. White's letter it will be seen that Mr. Marx Wilczynski, a citizen of the United States, having a passport issued in due form by the legation at Berlin, came to Russia on business as the agent of an American mercantile firm. On the 25th (13th) of last month he was ordered to leave St. Petersburg, the reason alleged for said order being that he was a Jew; and the following indorsement was placed upon his passport by the police authorities:

[Translation.]

The bearer of this passport, a North American citizen, a merchant and a Jew, Marx Wilczynski, is forbidden to reside in St. Petersburg.

September 13, 1880.

Chief of section:

P. SAPCIENTRE.

[SEAL OF ST. PETERSBURG PREFECTURE.]

Mr. Wilczynski states that he had not time when this order was received to apply to this legation for advice and assistance; but having reached Berlin, he now applies to me, through the legation in that city, to have the order of expulsion rescinded, and asks me to inform him what rights, if any, American citizens of the Israelitish faith have in Russia.

Acting upon the tenor of your instructions in the recent case of Mr. Pinkos, I have addressed Baron Jomini, acting minister of foreign affairs, a note, of which I inclose a copy, protesting against the action of the police, as a new infringement upon the rights of American citizens and of international comity, and as an interference with the reciprocal liberty of commerce guarantied by treaty. After embodying the views expressed in your No. 27, of the 4th ultimo, as cumulative of my note in the Pinkos case, a copy of which I transmitted with my No. 37, of the 16th ultimo, I asked the minister that Mr. Wilczynski might be permitted freely to return to Russia to prosecute his business engagements, and that the police authorities of St. Petersburg be instructed not to molest him in his lawful pursuits.

I have received no answer as yet to my note to the minister in the case of Mr. Pinkos.

I am, etc.,

JOHN W. FOSTER.

[Inclosure 1 in No. 48.]

Mr. White to Mr. Foster.

LEGATION OF THE UNITED STATES OF AMERICA,
Berlin, October 15, 1880.

MY DEAR COLLEAGUE: I take the liberty of sending you the inclosed passport of Mr. Wilczynski for the following reason:

Mr. Wilczynski is the agent of an American mercantile firm, and has much business in Russia. On his last visit to that country, he took out the inclosed passport at this

legation and had no trouble until he reached St. Petersburg, where he was ordered to leave the place on account of his being a Jew by birth. An indorsement to this effect was made by the authorities on the back of his passport, which practically neutralizes the value of that paper in Russia in protecting him as an American citizen.

Mr. Wilczynski states that he had not time when this occurred to apply for advice and assistance to the American legation, but has now addressed a letter to you and has requested me to forward his passport in order that, if you think proper, you may appeal to the proper authorities to have the order of expulsion rescinded, or, at any rate, inform him what rights, if any, American citizens of the Israelitish faith have in Russia.

He has taken out another passport at this legation in case he should have to return suddenly to Russia, and therefore I would request that his old passport would be returned to this legation when you shall have finished with it.

I would also consider it a great favor if you would inform me, in view of other cases of the same nature, what reply I can safely make.

I remain, etc.,

AND. D. WHITE.

[Inclosure 2 in No. 48.]

Mr. Foster to Mr. White.

LEGATION OF THE UNITED STATES,
St. Petersburg, October 18, 1880.

MY DEAR COLLEAGUE: I am in receipt of your letter of the 15th instant, with which you inclose the passport of the American citizen Marx Wilczynski, with the indorsement of the police of St. Petersburg, forbidding him to reside here, and you inquire whether such order can be rescinded and what rights American citizens of the Israelitish faith have in Russia.

The laws of Russia impose certain disabilities upon all Jews, among which is the prohibition against residence in St. Petersburg and certain other localities. In the past few years this prohibition has been repeatedly enforced against American citizens of the Jewish faith, and acquiesced in by my predecessors. I was thoroughly convinced of the injustice of the prohibition, but did not feel warranted in reversing the precedent set by my predecessors, without first referring the question to the Department. Secretary Evarts has instructed me in a recent case to protest against the expulsion of Jewish-American citizens, and I have accordingly done so. I will repeat the protest whenever occasion requires, and endeavor to obtain relief for citizens of the United States; but whether the Russian Government will be influenced by my protest and endeavors, remains to be seen.

In Mr. Wilczynski's case I will send the minister of foreign affairs a note protesting against the action of the police authorities, and will ask that instructions be given to said authorities not to disturb him in his lawful pursuits in case he should return to this city.

It will not be safe, however, for Mr. Wilczynski to come to Russia until I shall have obtained an assurance from the minister that he can do so without interference on the part of the authorities. It may be some time before I can receive an answer from the minister, as the Emperor is now in the Crimea, and General Melikoff, to whose department the subject pertains, is also temporarily absent from this city. In case Mr. W.'s business affairs should make it urgent that he have an early reply, you will please to inform me, and I will then consider the propriety of calling in person at the foreign office, and pressing an early solution of the matter.

The prohibition against Jewish residence in St. Petersburg was not strictly enforced until the late Nihilistic movement caused an order to be issued expelling all foreign Jews. I am satisfied that sooner or later the Russian Government must modify or repeal its illiberal laws respecting the Jews, and I will lose no proper opportunity to do what I can to hasten that event; but it is very doubtful whether it will consider the present an opportune time.

I am, etc.,

JOHN W. FOSTER.

[Inclosure 3 in No. 48.]

Mr. Foster to Baron Jormini.

LEGATION OF THE UNITED STATES,
St. Petersburg, October 7 (19), 1880.

EXCELLENCY: I beg leave to bring to your excellency's attention the following facts, as they have been reported to me by the legation of the United States at Berlin.

Mr. Marx Wilczynski, a citizen of the United States, is the agent of an American mercantile firm, and as such has much business in Russia. On his last visit to this country he was granted a passport by the American legation at Berlin, with which he entered Russian territory, observing the proper requirements in regard to passports, and encountered no difficulty until he reached St. Petersburg, where he was not permitted by the police authorities to remain, for the reason that he was a Jew; and an indorsement to that effect was placed upon his passport. He states that when this order was served upon him he did not have time to apply to this legation for advice or assistance, and he has taken the first opportunity after his expulsion to resort to the nearest diplomatic representative for interposition in his behalf. The interests of the American mercantile firm which he represents require him to return to this country and this city. I inclose herewith the passport with which Mr. Wilczynski came to Russia, in order that your excellency may see the prohibitory order placed upon it by the police of this city. After due examination, I have to request that the passport may be returned to me.

It became my duty, in the note which I had the honor to address to your excellency on the 2d (14) ultimo, in a case similar to the present one, to make known the views of my Government in regard to the expulsion of one of its citizens simply for the reason that he was a Jew rather than a believer in any other creed; and I must again respectfully but solemnly protest against this new infringement upon the rights of American citizens, and of the comity which should exist between friendly nations.

Your excellency will not fail to notice that the action of the police authorities in the present case, as well as that of Mr. Pinkos, bears the grave aspect of an interference with the reciprocal liberty of commerce which is guarantied by solemn treaty stipulations, and the development of which is so ardently desired by both countries.

On account of this new instance, it is regarded as important that it should be made clear to your excellency's Government that, in the view of the Government of the United States, the religion professed by one of its citizens has no relation whatever to that citizen's right to the protection of the United States; and that in the eye of my Government an injury officially dealt to Mr. Wilczynski or Mr. Pinkos, in St. Petersburg, on the sole ground that they are Jews, presents the same aspect that an injury officially done to a subject of Russia in New York, for the reason that he attends any particular church there, would to the view of His Imperial Majesty's Government.

I have, therefore, respectfully to request that Mr. Wilczynski may be freely permitted to return to Russia to prosecute his business engagements, and that the police authorities of St. Petersburg be instructed not to molest him in his lawful pursuits. In view of the exigencies which may require his early return, I venture to express the hope that it may be found convenient to favor me with an early reply to this request.

It is very gratifying to me to have this opportunity to reassure your excellency of my highest esteem and profound consideration.

JOHN W. FOSTER.

No. 27.—*Mr. Hay to Mr. Foster.*

No. 35.] DEPARTMENT OF STATE,
Washington, October 22, 1880.

SIR: I have to acknowledge the receipt of your Nos. 37 and 41, of the respective dates of 16th and 28th ultimo, reporting your action upon the recent instructions of the Department in the special case of Henry Pinkos, and upon the general subject of the expulsion of American citizens from Russian cities on no other ground than profession of the Hebrew faith.

Your course appears to have been discreet, and it is hoped that you will press your representations to the successful establishment of the principle of religious toleration for our citizens peacebly residing or traveling abroad, which we, as a nation, have such a deep interest in maintaining.

I am, etc.,

JOHN HAY,
Acting Secretary.

No. 28.—*Mr. Foster to Mr. Evarts.*

No. 73.] LEGATION OF THE UNITED STATES,
St. Petersburg, December 30, 1880. (Received Jan. 17, 1881.)

SIR: In my No. 48, of October 20 last, I reported to you the case of the American citizen of Jewish faith Marx Wilczynski, who had been expelled from St. Petersburg because of his religion. In my No. 37, of September 16, I reported the execution of your instructions in the case of Henry Pinkos.

My notes on these two cases remained without any reply during the absence in Livadia of the Emperor and Mr. de Giers, the present head of the foreign office. Soon after their return, to wit, on the 10th instant, I called upon Mr. de Giers, and directed his attention to my notes in the two cases of Messrs. Pinkos and Wilczynski, as presenting a question of much interest and importance to my Government, and regarding which it was highly desirable to reach a satisfactory settlement at as early a day as could be found convenient.

Mr. de Giers said that owing to the press of business upon his return to the capital he had not yet been able to examine the question with care. I thereupon suggested that if he could name a day when it would be agreeable for me to call again at the foreign office he might have an opportunity in the mean time to read my notes, which contained a statement of your views; and he was kind enough to fix upon the 16th instant for the conference.

On the evening of the 13th instant, however, I received from him notes of reply in both cases, translations of which I inclose herewith. It will be seen that the answer to my protest, in the case of Pinkos, is in substance that all the acts of the Russian authorities complained of were in strict accordance with the existing laws. In Wilczynski's case the minister states that, in view of the intervention of the legation, he will be permitted to return to St. Petersburg and remain for six months. It is to be noted that this is the extreme length of time granted to any foreign resident upon his national passport.

Notwithstanding the definite character of these replies, I deemed it important to hold the conference with the minister agreed upon in my last visit, and I accordingly called at the foreign office at the hour designated, on the 16th instant, and was received by Mr. de Giers. I thanked him for the prompt answer which he had given to my notes in regard to Pinkos and Wilczynski, but said that I had thought it desirable to have a personal interview (especially as the conclusions reached by his Government in neither case were entirely satisfactory), as in this way we might the better reach some understanding and avoid future trouble. His answer in the case of Pinkos was that all the acts complained of were in strict accordance with the laws. In my effort to investigate the question I had found great difficulty in learning what the laws were in relation to the Jews. I could find no digest of them, but had been given a large volume, in the Russian language, of nearly twelve hundred pages, which I was informed related exclusively to the laws and regulations governing the Jews in Russia. It appeared almost impossible for me to learn what the laws now existing were, and he could readily understand the difficulty a foreign Jewish merchant or visitor would have in understanding them. I recognized the considerate attention which the Russian Government had shown to all the requests of the legation regarding American Jews; but my Government objected to the discrimination on account of religion or race, which made the intervention of the legation necessary. It claimed for its citizens of the Jewish faith the same rights and protection extended to other American citizens, and insisted that there should be no distinction in applying the treaty guaranty of reciprocal liberty of commercial intercourse. If the Russian Government was not prepared to concede this, then, until the views of the two Governments could be harmonized, as new cases were constantly arising, it was desirable to know what the Russian laws and regulations in regard to foreign Jews were, and whether some general rule or course of action could be indicated, so that American Jews would know what treatment they might expect.

The minister, Mr. de Giers, answered that the Russian Government had found the Jewish question a very vexatious and disagreeable one, both as to the internal relations and the treatment of foreign Jews. He then proceeded at some length to a historical sketch of the question in its legal, political, and social aspects, which, although quite interesting, I am constrained to omit on account of the space which this dispatch will necessarily occupy even without it.

The experience which Russia had had with its Jewish subjects (who are almost exclusively Polish) had shown them to be a bad class of society, largely engaged in smuggling and illegal commercial transactions. Of late years they had been active participants in revolutionary conspiracies and plots against the life of the Emperor, and had shown a restless and disloyal inclination.

The minister said that there was every disposition to enforce the laws as leniently as possible against American Jews, especially as they were few and usually of the

better class; but owing to the large number of German and Austrian Jews on the border it was difficult to relax or repeal the laws.

Since the case of Pinkos had occurred the Government had been studying the question so as to adopt some general regulation which would more nearly meet the views of the United States, and that within the past few days it had been made the subject of a general ministerial conference.

The minister of the interior, General Melikoff, to whose department the subject pertains, would endeavor to make a satisfactory settlement. He then explained to me that the treatment of Pinkos arose out of the peculiar circumstances of the time. The investigations following the explosion in the winter palace and attempt upon the Emperor's life, showed that more than half of those implicated were Jews. This occasioned a strong demand for the vigorous enforcement of the old laws, which had for some time been very loosely carried out. Pinkos became involved in the police surveillance, without any intention on the part of the authorities to be wanting in consideration to American residents.

I asked Mr. de Giers if the same liberal permission would be extended to other American Jews coming to Russia as had been indicated in his note regarding Mr. Wilczynski. If so, and I could advise my Government to that effect, it would avoid many annoyances and relieve the foreign office and the legation from much trouble.

He replied that so far as he was concerned a like consideration would be shown in all meritorious cases, and at the expiration of six months even longer time might be given if desired. But until some general decision was made it would be difficult to give an assurance which would cover all cases. Responding to my inquiry, he said the subject belonged specially to General Melikoff's department, and there would be no impropriety in my conferring with him regarding it.

I alluded to the large number of Jews resident in St. Petersburg, estimated by persons who had given attention to the matter at 30,000, while the number registered by the authorities under the laws I had understood was less than 2,000. While I was gratified at this liberal action, I asked that no greater rigor should be shown towards American citizens of the Jewish faith than to Russian Jews.

The minister answered that he was not accurately informed as to the statistics, but he had not thought the number of Jews was so large. This class of residents was constantly coming and going, and the number varied greatly from year to year. But there could not exist any discrimination to the disadvantage of American citizens.

In the course of the conversation I stated that while the object of the interview was to obtain proper recognition of the rights of American Jews, my Government took a deep interest in the amelioration of the condition of the Jewish race in other nations, and I was satisfied that it would be highly gratified at the statement of the minister that a commission was now considering the question of the modification in a liberal sense of the Russian laws regarding the Jews. The experience of the United States had amply shown the wisdom of removing all discriminations against them in the laws, and of placing this race upon an equal footing with all other citizens.

Mr. de Giers said he sympathized fully in theory with the view taken by my Government, as most in consonance with the spirit of the age, But in Russia the subject could not be treated as an abstract question. A long series of legislative acts and regulations, the strong prejudices of the masses of the Russian people, the bad character of great numbers of the Jewish race, and various other political and social circumstances are to be taken into consideration.

At the close of the interview, at my request, Mr. de Giers said he would have prepared for me a memorandum containing an abstract of the leading provisions of the laws and regulations affecting the Jews.

On the day following, the 17th instant, in a note addressed to Mr. de Giers, I acknowledged the receipt of his two notes of the 13th instant, in the cases of Pinkos and Wilczynski, and stated that in view of the conference of the day previous I would limit myself to forwarding copies of the correspondence and a report of the conference to you, and await your further instructions.

Being desirous of impressing the views of our Government on this question upon General Loris Melikoff, the minister of the interior, to whose department has been intrusted the execution of most of the late reforms in administration and legislation, I called upon him on the 21st instant, and had an interview of some length, in the course of which I presented to him substantially the same views as developed in my conference with the minister of foreign affairs, both in relation to the position of our Government in claiming equal protection and privileges for its citizens in Russia, and protesting against the discrimination made against American Jews, as also expressing the sympathy of the United States with all the movements for the amelioration of the condition of the Jews in other countries.

General Melikoff received me very cordially, and replied that he was very glad to talk with me on the subject, and was disposed to do everything in his power to meet my views. So far as special exemptions were concerned they would be readily made whenever requested by me, but that it was impossible at present to change the laws.

If the American Jews were the only persons of this class they had to deal with, there would be no difficulty in conforming the laws as to foreign Jews to the views of the Government of the United States, as there was no fear that my country would send them nihilists, conspirators, or smugglers. But there was no end of trouble from the Jews of Germany and Austria and along the western frontier, which compelled the most rigorous measures. I could form no idea of the embarrassments which surrounded the Government in dealing with this question. The investigations showed that they were the most troublesome element and were found in all the conspiracies, and both the safety of the Government and a due regard for public opinion made it impossible to change the laws. However much the minister sympathized with my desire to see some liberal modification of the laws, it must be borne in mind that there was a wide difference in the situation of the United States and Russia on this question. In the United States they were comparatively few in number, generally of the better class, and no fear was felt as to their machinations either from within or without; whereas Russia required not only to look closely after the six millions within its borders, but especially to protect itself from the worst class of Jews of Germany and Austria, who gave an immense deal of trouble. It was on account of the latter especially that it was necessary to maintain the regulation prohibiting foreign Jews to come to St. Petersburg.

So far as concerned Jews who were bona fide American citizens (not disguised German Jews), he would assure me of the most liberal treatment, as he knew it was the desire of the Emperor to show all possible consideration to American citizens. If such came to St. Petersburg and encountered any trouble, if I would merely send him an unofficial note, he would give them all the time I might ask for them to remain here to attend to their business. He expected to go to see the Emperor that day and would inform him that he had given me assurance that the American Jews should have this privilege, and he was sure his sovereign would approve his action; but this would be a special exception, as the existing laws must stand for the present for the protection of the Government.

I thanked the minister for the consideration which he proposed to show to this class of my countrymen and to the legation, and assured him that I highly appreciated the friendly spirit manifested towards the United States. I was, however, sorry to learn that the laws could not be entirely repealed, as such a course would be much more in accordance with the views entertained by my Government, and it would be highly gratifying to it to see all the prohibitions against Jews, natives as well as foreigners, abolished.

I have further to report that, acting upon the spirit of the instructions contained in your No. 2, of April 14 last, and with the object of impressing more fully upon the ministry the views of our Government on the general subject of reform in Jewish legislation, I have also had a conversation with the minister of worship, who listened with much interest to my presentation of the subject. He said that a commission was now engaged in studying the question of a reform in these laws. He frankly recognized that the laws were not fully in accordance with the spirit of the age, and stated that it was the earnest desire of the Russian Government to conform its code on this subject more nearly to the civilization of this century, but it found itself surrounded by many difficulties to which other nations were not subjected, and that great prudence had to be exercised in the remedial measures taken.

I have waited some days to communicate to you the correspondence referred to and the result of my efforts to reach a satisfactory solution of the question, in the hope that Mr. de Giers would be able to send me the promised memorandum regarding the Jewish laws, as a knowledge of them is material to a full understanding of the questions at issue. I thought proper to again visit the foreign office on yesterday and in recalling the subject to Mr. de Giers' attention. I referred to my interview with the minister of the interior, General Melikoff, as very pleasant and cordial, but said that that interview developed more fully that the Russian Government was disposed to grant what we desired only as a favor when my Government asked it as a right. We objected to any discrimination being made against American citizens on account of religion, as our Government was bound to extend equal protection to all citizens without distinction; and, while I highly appreciated the consideration which it was proposed to show to American citizens of the Jewish faith, I feared my Government would not be satisfied with the attitude which was assumed on the question as a matter of right.

The minister explained that all that could be done under existing circumstances was to except American Jews in the manner proposed from the rigorous operations of the laws. It was to be borne in mind that the United States is probably the most advanced nation of the world in the application of liberal laws and principles, but that the same degree of liberality could not be applied to countries differently situated; and that even in the United States had it not been found somewhat difficult to make a universal application? He did not refer to the former treatment of the negroes, but to the existing state of affairs. Were there not laws and regulations which

denied certain rights and privileges to designated clases of persons, and were we not seeking to exclude or regulate Chinese immigrants, and deny to them the rights extended to other inhabitants? Besides, the Jews in the United States were of the better class of their race, and there was not the same reason for their exclusion as in Russia. Most of the Jews of this country are Polish, who are recognized as among the worst class, and are bad, very bad, members of society as a rule. They are constantly giving the Government trouble, prominent in conspiracies, disorders, smuggling, and deceit. For instance, in the trouble a few days ago in the university at Moscow, more than half, yes three-fourths, of those concerned in the trouble were Jewish students. (The minister alluded to the disorder which occurred at Moscow ten days ago when the students of the university organized a "college rebellion," owing to some dissatisfaction with certain professors, and by order of the governor-general about four hundred of them sent to prison for a short time.)

The Government, after generations of exclusion, had opened the universities and schools to the Jews, and, said the minister, this is the way they repay its liberality. And so it is almost always when disorders occur. There was every disposition to meet the wishes of the Government of the United States, but it should consider the situation of the country, and remember the difficulty Russia finds in abrogating its laws on this question.

I replied that I recognized the difficulty the Russian Government had in treating the subject so long as the laws existed, but would not the abrogation of the laws proscribing the Jews as such be the easiest way of solving the difficulty? By placing them on the same footing as other inhabitants, they would not then be a proscribed race, and they would be punishable as others for bad conduct. Such a course would be highly gratifying to the United States, and I hoped his Government would at no distant day see its way clear to take such a step. I was aware of no law of the United States which limited the rights of its inhabitants on account of race or religion. So far as Chinese immigrants were concerned it was true that trouble had arisen in certain localities, but this was not occasioned by any laws curtailing their rights, neither had the Government at any time denied or evaded its treaty obligations, but had met the difficulty by direct negotiations with the Chinese Government, and with satisfactory results for both nations.

The minister said he regretted not having sent me the memorandum on the Jewish laws, but it had been found a more serious task than had been anticipated, and that longer time had been asked to complete it, but that he hoped to be able to send it to me very soon.

Such are the results of my efforts to execute your instructions and to secure to American citizens of the Jewish faith the same rights as are accorded to other citizens of the United States. I am sorry not to accompany this dispatch with a full statement of the Russian laws bearing on the question, but as soon as it is received from the foreign office I will forward it. You will find some reference to these laws in Mr. Hoffman's No. 109, of May 29, 1879, which will be of interest and pertinent to the pending cases. My investigation has shown that the proscriptions of which we complain are based upon laws which were in force at the time of the execution of our treaty of commerce in 1832, and that as a matter of fact no greater privileges are granted to Russian than to American Jews similarly situated. Both are in a great measure under the ban of the laws. To the laws prohibiting Jews from residing in St. Petersburg there are various exceptions, but the Government reserves to itself the right of applying or withholding the exceptional privileges as it may think fit.

I have not been able to learn that any greater rigor in this respect has been shown to American Jews than to any other of their co-religionists. As a general rule favorable consideration has been given to the representatives of this legation in their behalf. And while the Government declines to change the laws, I have been given to understand, as you will see from the report of my conferences with the ministers of foreign affairs and of the interior, that American Jews, in whose behalf I may intervene, will be permitted to visit and remain in St. Petersburg a reasonable time to pursue their business avocations. I have already referred to the fact that under Russian law no foreigner can reside in this country longer than six months upon his national passport, as after that date he must obtain the consent of the Russian Government, which claims and exercises the right of refusing its consent at its will. Under the arrangement proposed as to American Jews, the only distinction in fact between them and other American residents is that a special application in their case would have to be made through the legation, the object being, I infer, to have its indorsement of the legitimacy of their business as well as of their citizenship—a kind of guarantee of their good conduct, a matter which it might be at times difficult to give.

It will thus be seen that while the Russian Government declines to accept the views set forth by you and denies that the treaty of 1832 concedes to American citizens of the Jewish faith any other or greater privileges than those enjoyed by Russian

subjects of the same race, it has manfested a friendly disposition toward American citizens in the application of the laws, and virtually offers to suspend their operation towards all Jewish citizens of the United States who can establish the fact that they come to Russia on legitimate business.

I am, etc.,

JOHN W. FOSTER.

[Inclosure 1 in No. 73.]

Mr. de Giers to Mr. Foster.

IMPERIAL MINISTRY OF FOREIGN AFFAIRS,
DEPARTMENT OF INTERIOR RELATIONS,
St. Petersburg, December 1 (13), 1880.

SIR: The imperial ministry has not failed to take into serious consideration the contents of the note which you addressed to it on the 2d (14th) September on the subject of the expulsion from the Russian territory of Mr. Henry Pinkos, a citizen of the United States.

The ministry hopes that an accord in the appreciation of the affair in question will not fail to be established if the Government of the United States shall be satisfied that all the measures of which Mr. Pinkos complains are in perfect conformity with the Russian laws.

In fact, it is in virtue of the regulations which authorize the residence of foreign Israelites in Russia only upon certain conditions that Mr. Pinkos found himself included in a general measure which was applied to him without the police having to inquire into his conduct.

It is also in virtue of the regulations, of which he has no right to plead ignorance, and the application of which can equally give him no right to indemnity, that Mr. Pinkos, having resided six months in Russia, could not leave Cronstadt without being furnished with a passport from the proper authorities. You will please observe in fact, sir, that the above-named person was not reconducted to the frontier, or embarked with the aid of the imperial authorities—in a word, that he did not undergo the process of expulsion, to which he was liable.

The legation of the United States having intervened in his favor by its note of April 8 (20) last, the Imperial Government hastened to comply with the request made in the said communication, and to ameliorate the condition of Mr. Pinkos in the very manner the legation had indicated. A delay of three months was consequently accorded to Pinkos to liquidate his affairs, and he was permitted at the expiration of this term to leave Russia on the same conditions as every foreigner who wishes to repass the frontier, nothing dispensing Pinkos from the obligations which the regulations prescribe on these occasions. On the contrary, the peculiar circumstances of his position and the term which had been granted him by special favor to regulate all the conditions of his departure, should have induced him to inform himself of the legal formalities required by the circumstances.

Thus the proceedings which our authorities took towards Mr. Pinkos present themselves both in their principle and their execution, not as exceptional measures, but as the legal consequence of general laws, the effects of which the individual abovenamed has had to undergo.

It is evident, too, as the note of the 2 (14) September acknowledges, that the measures taken on this occasion were not marked by any spirit contrary to the consideration which the Imperial Government has always professed for the quality of an American citizen.

As regards the exceptional dispositions of which foreign Israelites have been the object in Russia, and which have been provoked by their presumed participation in revolutionary proceedings, it is certain that the measures of the administration towards the Israelites in question have never had an exceptional character. If the proscription which concern them are rigorously executed, this rigor has nothing special in it, but results simply from the increased vigilance occasioned by present circumstances, which has led the imperial authorities to discover irregularities in the legal position of many foreigners residing in Russia. It became the duty of the imperial administration to see to the strict observance of the existing laws, availing itself for this purpose of the legal means in their hands.

It is in this way that Mr. Pinkos has felt the effect of the precautions taken in consequence of the proceedings of the social revolutionists, although the conduct of this foreigner happily sheltered him from the direct action of the measures, adopted to secure the public order.

The imperial ministry has endeavored to show that Mr. Pinkos has not been the object of any proceeding which goes beyond the regular application of existing laws. Convinced that in strict justice no irregularity can be imputed to our authorities, the ministry would consider itself so much the more fortunate if it can succeed in inducing the Government of the United States to share this conviction, inasmuch as the affair in question affects those relations which the Imperial Government desires to maintain, on all occasions, in their unvarying cordiality.

Receive, sir, etc.

GIERS.

[Inclosure 2 in No. 73.]

Mr. de Giers to Mr. Foster.

IMPERIAL MINISTRY OF FOREIGN AFFAIRS,
DEPARTMENT OF INTERIOR RELATIONS,
St. Petersburg, December 1 (13), 1880.

SIR: In a note of October 7 (19), last, you addressed yourself to the imperial ministry of foreign affairs, with a view to obtain for Mr. Wilczynski, a citizen of the United States of America, permission to return to Russia, where the interests of a commercial enterprise, of which he is agent, called him.

The imperial ministry hastened to communicate to the ministry of the interior the afore-mentioned request.

A recent communication of the minister of the interior enables me to inform yon that, in view of the intervention of the legation of the United States, Mr. Wilczynski is authorized to return to St. Petersburg, and to remain here six months. The competent authorities have been informed of this ministerial decision.

Returning to you herewith the passport of the said Wilczynski, which accompanied the above-mentioned note of the legation of the United States, I profit by this occasion, etc.,

GIERS.

[Inclosure 3 in No. 73.]

Mr. Foster to Mr. de Giers.

LEGATION OF THE UNITED STATES,
St. Petersburg, December 5 (17), 1880

EXCELLENCY: I have the honor to acknowledge the receipt of your two notes of the 1 (13) instant, the one relating to the case of Henry Pinkos and the other to that of Marx Wilczynski, both American citizens of the Jewish faith.

In view of the conference which I had with your excellency on those and kindred matters on yesterday, I do not deem it necessary at present to make further reply to said notes than to say that I will forward copies thereof, as well as a report of said conference to the Secretary of State at Washington, and await his instructions.

With the renewed, etc.,

JOHN W. FOSTER.

No. 29.—*Mr. Foster to Mr. Evarts.*

No. 74.] LEGATION OF THE UNITED STATES,
St. Petersburg, December 31, 1880. (Received January 17, 1881.)

SIR: At a late hour on yesterday afternoon I received your cablegram, dated on the 29th instant, as follows:

"Urge treaty obligations, Wilczynski case. Further information awaited."

It will be seen by my dispatch No. 73, of yesterday which was just completed when your cablegram arrived, that I have been giving attention to the case, and have obtained for him permission to return to St. Petersburg, and remain for the limit of time granted to all foreigners upon their national passports, but that the Russian Government declines to modify the existing laws prohibiting foreign Jews to reside in this city.

I inclose copies of correspondence had with the legation at Berlin, which contains some additional facts relating to Mr. Wilczynski.

It appeared from the letter of Minister White, of October 15, inclosed with my No. 48 of October 20, that Mr. Wilczynski, when ordered to leave St. Petersburg, made no application to this legation for advice or assistance. He informed Minister White that he had addressed me a letter in regard to his case, but no such letter has been received. He has not again appeared at the legation in Berlin to learn the result of his application for permission to return to St. Petersburg, and Mr. Everett writes that he is probably now in Russia. If so, he has never made his presence known to this legation, and it is to be presumed that he has not been molested.

I am, etc.,

JOHN W. FOSTER.

[Inclosure 1 in No. 74.]

Mr. Foster to Mr. White.

ST. PETERSBURG, *December* 14, 1880.

MY DEAR COLLEAGUE: On the 18th of October last I acknowledged receipt of your letter regarding Mr. Wilczynski's expulsion from St. Petersburg, and wrote you a second letter on the subject in October.

I now have the answer of the minister of foreign affairs to my application for Mr. Wilczynski's free return to St. Petersburg. He states that Mr. W. will be permitted to return to this city and remain for six months, and that the authorities have been so notified. This is the extreme limit of time allowed by the laws of Russia to all foreigners, without distinction, entering with a passport of their nationality, at the expiration of which time they are required to obtain a Russian passport, or police permission of residence, if they wish to remain.

I return the passport which you sent me.

Very truly, etc.,

JOHN W. FOSTER.

[Inclosure 2 in No. 74.]

Mr. Everett to Mr. Foster.

LEGATION OF THE UNITED STATES,
Berlin, December 18, 1880.

SIR: In Mr. White's absence I have the honor to acknowledge your letter of the 14th instant, returning Mr. Wilczynski's old passport and stating that he would be allowed to stay six months if he returned there. At the time his old passport was sent to you Mr. Wilczynski took out a new one, and said that he should not have any difficulty in returning to St. Petersburg, and staying as long as he wished for business purposes, as he was personally known to high officials in some of the departments, with which he had transacted business for some years. But his grievance was that he was expelled, as he understood, for being a Jew, and he wished to ascertain whether there was such a law against Jews, and whether the American legation could not protect our citizens against it.

I have been informed by one of the Russian secretaries of legation here that there is no law in St. Petersburg expelling Jews merely because they are Jews; but that probably this gentlemen had failed to comply with some regulation in his business transactions, or had perhaps associated with some of the suspected characters in the city, or was one of the Polish refugees, who it appears are an obnoxious class there.

Mr. Wilczynski has not called at this legation again, and it is probable that he is now in Russia, as he expressed his intention of returning there very shortly.

With many thanks for the trouble you have taken in the matter,

I am, etc.,

H. SIDNEY EVERETT.

No. 30.—*Mr. Foster to Mr. Evarts.*

No. 75.] LEGATION OF THE UNITED STATES,
St. Petersburg, December 31, 1880. (Received January 17, 1881.)

SIR: In my No. 73 of yesterday I have given the result of my efforts to obtain a modification of the laws of Russia in regard to foreign Jews, so as to exempt American Jews from the prohibition against residence in St. Petersburg and other cities of the Empire. As a supplement to that dispatch, it may be of interest to have some information as to the condition and treatment of the Russian subjects of the Jewish faith.

From early times there have existed laws prohibiting the entrance or residence of Jews in Russia, and while there were occasional exceptions to the laws the prohibition was generally enforced with rigor up to the incorporation of Poland with the Empire. From that date it was sought to confine the Jews to the Polish provinces. But the Jews in these provinces furnished their full contingent, and, it is alleged by them, more than their ratio, to the Russian army; and as it often happened that at the expiration of their term of service they were in distant or different parts of the Empire from their homes, upon their discharge they were permitted to live in the provinces where discharged, because they were old soldiers, and in spite of the laws prohibiting the residence there of Jews. The presence of the greater part of this race in other districts of Russia than Poland is accounted for in this way, they being either discharged soldiers or their children.

But in addition to these a considerable number of Jews are found in the large cities and commercial towns, many of whom are authorized to become permanent residents under exceptions which have been made to the prohibitory laws. For instance, Jews possessing a certain mercantile standing are admitted as members of the first or commercial guild, and, with the authorization of the law, engage in banking and mercantile pursuits. And these members of the guild are permitted to employ a certain number of Jewish clerks, servants, artisans, or other employés. So, also, exceptions are made in favor of members of the learned professions and of graduates of the universities or other educational or scientific institutions. The latitude of construction placed upon these exceptions depends very much upon the will of the local authorities, as also the strictness with which the prohibitory laws are enforced; so that in all the cities of Russia the number of Jewish residents will be found more or less in excess of the police registry and greater than the strict interpretation of the laws authorizes. For instance, persons who have given the subject close attention, as I stated to the minister of foreign affairs, estimate the number of Jewish residents in St. Petersburg at 30,000, while it is stated the number registered by the police authorities is only 1,500. From the same source I learn that, while the Government does not recognize their legal existence, nine synagogues in this city are known to the authorities, and that there are other private places of worship; and that, while only one Hebrew school is registered by the police, there are between three and four thousand children in unauthorized Jewish schools of this capital. As another indication of the extent of Israelitish influence, it is worthy of note that one or more Jewish editors or writers are said to be employed on the leading newspapers of St. Petersburg and Moscow almost without exception. It is claimed that Jews of wealth, of established professions or occupations, or of good social standing or influence, have little difficulty in securing express or tacit exemption from the laws.

These facts indicate that the laws proscribing the Jewish race are not enforced with great strictness; and intelligent Jewish residents of this city, native Russian subjects, who are laboring for the amelioration of the condition of their brethren, recognize the great advance which has been made during the present reign in the liberal construction which is placed upon the laws, in the exceptions which have been made tending to relax their rigor, and in the increased privileges which have been granted, such as admission to the universities, the practice of professions and avocations, and holding of government offices, denied to them a generation ago. At the same time the proscription laws remain, and the Government reserves to itself the right to enforce them with strictness or relax them at its will.

It is to be noted that intelligent Russian Jews repel the charge that their race in this country have manifested a spirit of lawlessness or hostility to the established Government, and they deny that a greater proportion of Jews than of other classes have been complicated in the conspiracies or attempts upon the life of the Emperor, and in confirmation of their denial they point to the fact that of the sixteen persons who were arraigned last month in the state trials of the nihilists only one was a Jew.

I am, etc.,

JOHN W. FOSTER.

No. 31.—*Mr. Evarts to Mr. Foster.*

No. 55.] DEPARTMENT OF STATE,
Washington, March 3, 1881.

SIR: Your several dispatches numbered 73, 74, and 75, of the 30th and 31st of December, ultimo, in relation to the treatment of American Jews in Russia, have been received, and I have pleasure in commending your zealous presentations of the cases of Pinkos and Wilczynski, and of the general questions involved. The assurances you have received as to the liberal treatment hereafter to be accorded, as an act of comity and courtesy by the military authorities, to American citizens visiting Russia, are fully appreciated.

I have observed, however, that in some of your conversations and writings with the foreign office, you give prominence to the natural American sympathy with oppressed Jews elsewhere as a motive for our solicitude as to the treatment of Jews in Russia.

Such solicitude might very properly exist; but in your presentation of the facts you should be careful to impress that we ask treaty treatment for our aggrieved citizens, not because they are Jews, but because they are Americans. Russia's treatment of her own Jews, or of other foreign Jews resorting thither, may, in determinate cases, attract the sympathy of the American people, but the aim of the Government of the United States is the specific one of protecting its own citizens. If the hardships to which Russian and foreign Jews are subjected involves our citizens, we think we have just ground for remonstrance and expectancy of better treatment.

This Government does not know, or inquire, the religion of the American citizens it protects. It can not take cognizance of the methods by which the Russian authorities may arrive at the conclusion or conjecture that any given American citizen professes the Israelitish faith. The discussion of the recent cases has not as yet developed any judicial procedure whereby an American citizen, otherwise unoffending against the laws, is to be convicted of Judaism, if that be an offense under Russian law; and we are indisposed to regard it as a maintainable point that a religious belief is, or can be, a military offense, to be dealt with under the arbitrary methods incident to the existence of a "state of siege."

This Government is not unmindful of the difficulties under which, as is alleged, that of Russia labors in dealing with those of her subjects whom she may deem disaffected; but the reasons adduced and methods adopted against them should have no application to American citizens sojourning peaceably, for business or pleasure, in Russia, for they are not to be charged with abstract political disaffection to a government to which they owe no allegiance; and, if charged with the commission of unlawful acts, they should have guilt explicitly imputed and proven. In the latter case, the religion of the accused can not be admitted as proof or presumption, either of guilt or innocence.

It is not the desire of this Government to embarrass that of Russia by insistance upon these points with any degree of harshness, when the disposition reported in your dispatches is so conciliatory, and when the treatment offered may operate effectively to remove or prevent future causes of complaint based on the ill treatment of American citizens alleged to be Jews. It is most desirable, however, that you should not pretermit your efforts to bring the matter to such a stage as will insure for peaceable and law-abiding Americans in Russia like treaty rights and personal freedom of creed as Russians enjoy in the United States.

I am, etc.,

WM. M. EVARTS.

No. 32.—*Mr. Foster to Mr. Blaine.*

No. 100.] LEGATION OF THE UNITED STATES,
St. Petersburg, March 25, 1881. (Received April 11.)

SIR: In acknowledging the receipt of Department No. 55, of the 3d instant, I desire to express my thanks for the kindly commendation of my presentation of the cases of Pinkos and Wilczynski, and of the general question of the treatment of Jews in Russia.

I make careful note of the desire manifested by the late honorable Secretary of State to appeal strongly to the treaty guaranty of personal freedom to American citizens sojourning peaceably, for business or pleasure, in Russia, without regard to their religious belief. I have constantly made this appeal in my conversations with and communications to the Russian authorities. But it will be noted in my No. 73, of December 30, that I called attention to the fact that the Russian Government denies that the treaty of 1832 secures to American citizens of the Jewish faith sojourning in

Russia any other or greater privileges than those enjoyed in this empire by Russian subjects of the same faith. From the concluding sentence of Department No. 55, it would seem that the late Secretary's construction of the treaty was that American citizens in Russia were entitled to the same rights and personal freedom as are extended to Russian subjects sojourning in the United States. This interpretation has never as yet been presented to the Russian Government, nor has the treaty been so considered by my predecessors. If that view is to be insisted upon, I will thank you for specific instructions regarding this point. As stated in my No. 73, the laws imposing disabilities upon Jews, both foreign and native, antedate the treaty of 1832, and the minister of foreign affairs claims that said treaty does not exempt American Jews coming here from their operation.

I have strongly insisted that the passport of his Government should protect every peaceable American citizen coming to Russia, and that it is not proper to institute an inquiry as to the religious belief of such citizen. The Department is correct in the supposition indicated, that no American citizen has been convicted of Judaism by "judicial procedure." But it is to be borne in mind that in Russia it is not necessary that a judicial procedure should take place, or even the "military state of seige" exist, before a person undergoes the sentence of the law. The laws and regulations in question are usually intrusted to the police authorities, and it is sufficient for them to be satisfied in their own minds that the individual comes within the prohibitions to have them enforced.

I shall not fail to continue to press the subject upon the Russian Government at every proper opportunity.

I am, etc.,

JOHN W. FOSTER.

No. 33.—*Mr. Foster to Mr. Blaine.*

No. 121.] LEGATION OF THE UNITED STATES,

St. Petersburg, May 24 1881. (Received June 13.)

SIR: A disgraceful series of disorders have occurred during the past month in the southwestern provinces of Russia, directed against the Jewish residents, resulting in the loss of a number of lives and the destruction of an enormous amount of property. The scenes of these riots have been at and in the vicinity of Elizabethgrad and Kief, with less serious demonstrations at Odessa and other places. The participants have been almost exclusively of the lowest and most ignorant classes in the towns and cities, joined by the peasants, and the demonstrations in the two localities first named appear to have been so powerful that for days the authorities were paralyzed, and the rioters were able to give full sway to their work of bigotry and destruction. In Kief, a city of over one hundred thousand inhabitants, with a large Jewish population, the work was so thorough, it is stated, that not a single Jewish house escaped, the inmates being driven out, beaten, and stoned, and some of them killed, and the contents plundered or thrown into the streets. The damage there is estimated at several millions of roubles, and business has been seriousiy affected thereby; many commercial houses have suspended payments, other bankruptcies are feared, and the prices of provisions and articles of prime necessity have temporarily risen greatly in price. Massacre and destruction of property have become so threatening in other localities, where no actual outbreaks have taken place, that the Jews in large numbers have fled from their homes and taken refuge across the frontier in Austria or in Moscow, where the military force is sufficient to guaranty safety. In some instances the railroad officials have refused to run the trains by which the Jews were seeking to escape, for fear of attack from the infuriated mobs debauched with liquor and plunder.

Indiscriminate pillage became so much feared that Christians chalked their houses with crosses or exhibited holy images with lighted lamps before them to save themselves from the fury of the rabble. The acts which have been committed are more worthy of the Dark Ages than of the present century.

The authorities were slow to realize the extent of the danger, but when once awakened to its wide-spread and deeply-seated character they have manifested a commendable zeal in suppressing the riots and in arresting and punishing the offenders. National troops have been freely used, sending them to the most threatened districts, and in some places, as at Odessa, they have promptly intervened with force to put down the riots.

Various causes have been assigned for these outbreaks additional to the prevailing bigotry and religious hatred of the lower classes towards the Jews. The country has not been prosperous for some time past; taxes have been heavy and exacted with severity; the depreciated paper currency has increased the cost of all commodities;

the winter has been one of privation and suffering, and with many families indebtedness has been the rule annually. The Jews, being the money-changers, traders, and speculators, have profited by this state of affairs, and the poorer classes have felt that undue advantage has been taken of their misfortunes. Following the long fast so faithfully observed in the Russian national church, which was broken by Holy Week and its usual excesses in drinking, it has been easy to work upon the passions and prejudices of the hungry and ignorant. It is asserted also that the Nihilist societies have profited by the situation to incite and encourage the peasants and lower classes of the towns and cities in order to increase the embarrassments of the Government, but the charge is probably conjectural and not based on very tangible facts. Certain it is, however, that the disorders have developed a state of discontent and lawlessness in the country that is by no means agreeable to the Government. It is believed that the Emperor has no sympathy with the spirit manifested against the Jews, and, in addition to the active use of the Imperial army to put down the riots, he has given orders to have an investigation made of the causes which have occasioned the disturbances. I have in previous dispatches referred to the proscriptive laws and disabilities imposed upon the Jews in Russia. If these events lead to a serious consideration of the wisdom of abolishing all the Jewish disabilities and of placing Russian legislation on this subject alongside of that of the other enlightened nations, the loss of life and property will not have been in vain.

It may not be without interest to mention that these disturbances and the Russian laws affecting foreign Jews have twice during the past week been the subject of discussion in the British Parliament. As reference was made in that discussion to the action of our Government and this legation regarding the Russian laws prohibiting foreign Jews to reside in St. Petersburg, I send you herewith that portion of the Parliamentary report. It will be noticed that two questions were presented in the House of Commons: first, as to the propriety of the British Government making representations to that of Russia with regard to the atrocities committed upon the Jewish population in Southern Russia; and, second, as to the action of the British Government on account of the expulsion from St. Petersburg of a highly respected London merchant, having a British passport, on the ground that he was a Jew. To the first question the under secretary of foreign affairs indicated that his Government was reluctant to make any representations in regard to the persecutions, and to the second that a protest had been made against the expulsion of the British subject, but without avail.

This discussion in Parliament has occasioned an editorial in the St. Petersburg Journal, the semi-official organ of the Russian foreign office, of which I send you a translation. This article asserts that the disturbances being of a purely domestic character, the British Cabinet would have no more right to address the Russian Government representations thereon than the latter would have to address Lord Granville on account of the agrarian crimes in Ireland. In reference to the expulsion, it maintains that if made according to Russian law a protest was not proper; and, on the other hand, if the expulsion was in violation of that law a protest was unnecessary, because the above would have been corrected.

In this connection I have to report that no new case has arisen of the enforcement against American citizens of the law in question.

I am, etc.,

JOHN W. FOSTER.

[Inclosure No. 121.—Translation of editorial from the St. Petersburg Journal, May 21, 1881.]

The debates in the English chambers are always of great importance, even when they refer to subjects where the competency of these assemblies to treat them is absolutely null. In such cases they show certain currents of opinion, often artificial, often wide of the mark, but of which it is always well to take notice. Last Monday, as the telegraph informs us, Mr. Dilke, replying to Mr. Worms, declared that England had made no representations on the subject of the excesses against the Israelites and against the students [?] in the south of Russia, because the Government of St. Petersburg had itself taken measures to repress these disturbances.

This is right, although the subsecretary of state might have added that there was absolutely no reason, no pretext even, for the English Government to address observations to a foreign Government on disturbances which were purely domestic. How did it happen, then, that when interpellated a second time, Mr. Dilke made a reply less correct, saying that the Government had as yet taken no definite resolution. We have no difficulty in believing that no definite resolution has been taken, for the question is in no respect of a character to be examined by the English Cabinet, and the kind of assimilation with Persia in which the speaker permitted himself to indulge lacks both justice and good taste. What Mr. Dilke should have replied is, that the

British Cabinet has no right, on account of the troubles at Kief, etc., to address representations to the Russian Government which the latter would not have a right to address to Lord Granville on account of the agrarian crimes in Ireland.

As regards the case of Mr. Lewisohn, we do not know the particulars. But as Mr. Dilke read the laws governing the residence of Jews, it is to be supposed that, in the opinion of the speaker, this expulsion has taken place in violation of the laws in question, for otherwise we can not understand how the British Government has thought itself authorized to protest against the application of laws in force in Russia to strangers coming here to reside. Now, if the said Mr. Lewisohn has really been expelled in violation of the Russian laws, he may be sure that the protest of Mr. Dilke will not be unproductive. It was even useless; a simple denunciation of an abuse of local authority which may have been committed would have been sufficient. We repeat, we are not acquainted with the details.

No. 34.—*Mr. Foster to Mr. Blaine.*

No. 135.] LEGATION OF THE UNITED STATES,
St. Petersburg, July 14, 1881. (Received July 30.)

SIR: After considerable delay I am at last enabled to send you herewith an abstract or sketch of the laws of Russia relative to foreign Jews. As I have heretofore noted, the laws on this subject are contained in a voluminous mass of legislation, regulations, decisions of ministries, etc., many of which conflict with each other, and it has been found very difficult to know with accuracy what is the existing law applicable to a particular case. The accompanying abstract is believed to be as full as I can make it without the employment of an unexperienced native attorney and having in view some special case or question.

As introductory to a notice of the inclosed abstract, it is proper to state that from early times Jews were prohibited from coming to or settling in Russia; but by means of the conquest of Poland, the Crimea, and certain other districts a large number of Jews became incorporated as subjects of the Empire, and it was thus made necessary to so modify the ancient general prohibition as to allow Israelites who had become Russian subjects by annexation of territory to reside in the western and southwestern provinces named in the inclosed abstract; and up to the present no other part of the Empire has been open to Jewish Russian subjects for unrestricted habitation; so that as a rule even Russian Jews are confined to the provinces cited; and the ancient law prohibiting the entrance into Russia of foreign Israelites is still in force, with the very limited exceptions cited in the accompanying sketch. These exceptions may be briefly stated as follows:

I. Certain foreign Jews may come into the governments or provinces of west and southwest Russia named, to wit:

First, rabbies invited by the Russian Government to exercise their profession:

Second, manufacturers with a capital of 15,000 roubles, by special arrangement; and

Third, artisans brought by said manufacturers, upon certain specified conditions.

II. All other parts of Russia are closed to foreign Israelites, with the limited exception of, first, the agents of large commercial houses abroad, who are permitted to visit, for a limited period, the great commercial and manufacturing centers of Russia, upon their petition to that effect presented to the department of the interior being granted; and, second, well-known bankers, and chiefs of large commercial houses or enterprises, coming to Russia to purchase and export native products, may be admitted as merchants of the first guild, as the result of a special joint understanding with the ministers of the interior, of finance, and of foreign affairs; but even after being admitted as members of the merchants' guild they have only specified and restricted privileges.

It will thus be seen that Jewish citizens of the United States are virtually excluded from Russia, as few if any of them would be willing to comply with the requirements necessary for their admission under Russian laws.. This code of Jewish regulations, of which some idea may be formed from the inclosed sketch, will appear somewhat curious and antiquated in our country of unrestricted commercial intercourse, and especially the limitations, not only of a business but even of a domestic character, which are thrown around the Jewish bankers and merchants (to use the language of the law) "known for their high social position and large operations and commercial enterprises."

I also transmit herewith a memorandum, showing the provisions bearing upon the question, of the treaties of commerce existing between Russia and Great Britain, Austria, and France. The other European nations have treaties similar to that of Great Britain, with the exception of Germany, which, singularly enough, has no

treaty of commerce with Russia. A comparison with the treaty of commerce which the United States has with Russia will show that the only material variance is in the last paragraph of article 1 of the British treaty (and a similar provision is found in the treaties of most of the European nations with Russia), wherein it is more explicitly provided than in the treaty with the United States that the privileges therein granted "in no wise affect the laws, decrees, and special regulations regarding commerce, industry, and police in vigor in each of the two countries." The Austrian treaty is still more precise, in adding to the foregoing reservation a recognition "that the restrictions established in the states of one of the high contracting parties shall be equally applicable to the subjects of the other *belonging to the same confession.*" It may therefore be concluded that our treaty is fully as favorable to our citizens as that of any other nation with Russia.

As the case of the British subject Lewisohn, now pending and the occasion of some inquiry in Parliament, has been heretofore referred to, I inclose a statement of facts relating thereto which is doubtless substantially correct. It may be noted that while Lewisohn was refused permission to revisit St. Petersburg, the American citizen, Mr. Wilczynski, who was expelled about the same time, was, upon application of this legation, given permission to return.

I am, etc.,

JOHN W. FOSTER.

[Inclosure 1 in No. 155.]

SKETCH OF THE LAWS OF RUSSIA RELATIVE TO FOREIGN ISRAELITES.

Isrealites in general are in Russia subject to a special legislation.

There is found in the Code of Laws a series of provisions, in their proper place, spread over many different chapters and divers published regulations on commerce, industry, and the trades, devoting to them special clauses.

Foreign Israelites do not escape this legislation, which defines the laws applied to them relative to their admission into the territory of the Empire and to their sojourn in Russia.

The localities the limits of which are accorded to Israelites, subjects of the Empire, in order to sojourn in a permanent manner, are as follows:

The governments (or provinces) of Bessarabia, Vilna, Vitebsk, Volhynia, Grodno, Ekaterinoslaf, Taurida, Kershow, Tchernigov, Kowno, Minsk, Mohilef, Poltava, Podolia, and Kief, with the exception of the city of Kief; but upon the observance of the following rules:

1. In the governments of Vitebsk and Mohilef the Israelites have the right to reside in the inhabited localities, in virtue of proper tickets of sojourn which are given to them for this purpose, without, nevertheless, having the right to definitely establish themselves there in the quality of fixed inhabitants. With respect to the city of Nicolaief, they have a right to choose a domicile there and to acquire real estate, in conformity to the special provisions of the regulations on commerce.

2. Regarding the western governments adjoining the frontier and Bessarabia, the Israelites are not authorized to establish themselves there within a distance of 50 versts from the frontier of the state. Along the western frontier of the state, the Israelites guilty of contraband are, in addition to the other penalties, condemned to vacate the above-cited limits. (See articles 16 and 23 of the regulations on passports, sequel to the Code of Laws, ed. of 1876.)

A general statute law that foreign Israelites are not authorized to immigrate to Russia nor to receive Russian naturalization. (See article 992 of the regulations on social conditions, Code of Laws, vol. ix, ed. of 1876.)

Nevertheless, articles 530 of the regulations on passports (Code of Laws, ed. of 1857), in admitting certain exceptions to the preceding law, particularizes who are those among foreign Israelites who are authorized to establish themselves within the limits of the localities where the right of domicile is accorded to all Jews in general:

1. Those whom the Imperial Government invites to come to Russia to exercise the functions of rabbins.

2. Those who come to Russia with the object of creating manufactories and workshops (with the exception of distillers), and who can show a capital for this purpose of at least 15,000 rubles. The individuals, at their entry into Russia, must engage in writing to create said establishments within a period of three years. In case where they shall be found not to have complied with the terms of their engagement they shall be expelled from the Empire. On the contrary in case they shall have fulfilled it, they shall have the right to become Russian subjects and shall select a legal status.

3. Artisans called to Russia by the Israelite manufacturers to engage in manufact-

uring labor in their factories. These artisans shall not be permitted to enter Russia except upon presentation (*a*) of a passport in order, (*b*) of a certificate from the imperial legation or consulate of Russia certifying to their condition, the character of their former occupations, the trade which they follow, and showing that they have really been called to Russia, by whom, and with what object. After a sojourn of five years in the factories, and upon presentation of a certificate from their employers and the local authorities attesting their skill and their irreproachable conduct, they shall be permitted to establish themselves permanently in the localities of domicile acquired for Israelites, and to become Russian subjects.

Foreign Israelites arriving in the localities where the fixed sojourn is authorized for all Israelites in general shall be put in possession of passports, in which it shall be stated that they are only of value within the limits of the localities above mentioned. (See article 8 and annexes to article 486, remark 2, of the regulations on passports, sequel to Code of Laws, ed. of 1876.)

The local authorities are required to watch rigorously that foreign Israelites do not reside under the name of Christians in the localities where their sojourn is prohibited. The individuals discovered to be in this situation will be immediately expelled from Russia. (See article 531 of the regulations on passports, etc.)

Foreign Israelites, and especially those who are agents of large commercial houses abroad, are permitted to visit the great commercial and manufacturing centers of Russia, and to reside there a period of time, the fixing of which is submitted to the judgment of the proper authority.

It pertains to the department of the interior to definitely decide on the petitions presented for this object by the said Israelites. Nevertheless, the imperial legations and consulates may, without previous authorization of the department of the interior, deliver to bankers and chiefs of important commercial houses abroad passports to enter Russia, and visé these passports, reserving notification to the department of the interior of the delivery or visé of passport to each one of the said individuals. (See article 2 of the annexes to articles 486 of the regulations on passports, etc.)

Israelites, foreign subjects, known for their social position and large operations or commercial enterprises, are permitted, as the result of a special understanding in each case between the ministers of finance, of the interior, and of foreign affairs, to establish a business within the limits of the Empire and to open banking offices, by providing themselves, nevertheless, with certificates of merchants of the first guild. They are likewise authorized to establish manufactories, acquire and lease real estate freely, upon the basis of the provisions decreed by the regulations on social conditions.

Foreign Israelites whose high social position and commercial operations are of public notoriety, and who come to Russia with the object of purchasing products of the Empire and exporting them abroad, can also, as the result of a special understanding in each case between the ministers of finance, of the interior, and of foreign affairs, obtain certificates of merchants of the first guild. (See part 5 of the remark to the third annex to article 128 of the regulations on commerce, ed. of 1876), with a complement; decision of the committee of ministers, December 26, 1877.)

Israelites who may acquire by inheritance real estate situate beyond the localities where their sojourn is authorized are required to sell it within a period of six months. This law also applies to foreign Israelites who may acquire real estate in Russia by right of inheritance. (See article 960 of the regulations on social conditions, Code of Laws, ed. of 1876.)

The following provisions having been decreed for the Israelite subjects of the Empire shall be applicable to foreign Israelite subjects in so far only as the latter are found to have satisfied the requirements of the above-cited laws:

Merchants of the first guild inscribed upon the general basis in the first guild of the cities may go there with the members of their families whose names are found upon the guild certificates.

Israelite merchants who, in virtue of the proceeding provisions, remove to the cities of the Empire situated beyond the limits of the localities of their authorized domicile, are permitted to bring with them clerks and servants, likewise Israelites, in a limited number, and by observing the following rules:

1. Israelite merchants who remove to one of the two capitals, St. Petersburg or Moscow, are required to state, in a special petition presented by them to the governors-general or the prefect of the place, the number of clerks or servants which they judge indispensable to bring with them to said capitals, and upon what considerations this number is based. The granting of these petitions is left to the judgment of the governors-generals and prefects above cited.

2. Israelite merchants who are inscribed in the guilds of other cities are authorized to bring with them, at the most, one clerk or one office boy and four servants, of the two sexes, of their race, per family of Israelite merchant. (See annex 3 to article 128 of the regulations on commerce, sequel to the Code of Laws, ed. of 1876.)

Israelite merchants of the first guild, besides the general rights of commerce which belong to them within the limits of the localities of their authorized sojourn, enjoy the following special rights:

1. They have the right to bring, in bulk, from the capitals and ports, in order to effect sales within the limits of the authorized district, all kinds of merchandise through the medium of commercial offices and local merchants or by correspondence.

2. They are permitted to visit twice a year the capitals, and other cities, for the purpose of making sales there of merchandise, on condition that the period of their sojourn does not exceed six months per year. In case there shall be an impediment or impossibility, on account of sickness or other cause, to their going in person for the above-mentioned object to the interior of the Empire, they will be authorized to send in their stead clerks provided with the proper authorization, always computing the period cited. An Israelite clerk who has already visited the provinces twice in one year by virtue of an authorization of a merchant can not go there a third time in the course of the same year. It shall be the same if, having gone to said provinces once for one merchant, he held the authorization of another merchant. He shall in this case not be authorized to make more than a single journey in the course of this same year.

3. Israelite merchants of the first guild are authorized to undertake enterprises in the governments of the interior, but on condition that they do not employ in any case Israelites as agents or superintendents.

4. Israelite merchants of the first guild are permitted to carry on in the capitals and the ports wholesale trade in the products of authorized governments by means of Christian clerks or of merchants of the place, or by direct correspondence with the manufacturers; but they are forbidden to make sale in person of said products in the capitals or ports of the Empire or to open shops, under penalty of immediate expulsion and the confiscation of the merchandise.

5. They shall not be authorized, neither personally nor even by means of Christian agents, to sell merchandise which they may have imported from abroad outside of the limits of the governments of their authorized fixed sojourn. (See article 130 of the regulations on commerce, sequel to the Code of Laws, ed. of 1876.)

[Inclosure 2 in No. 135.]

MEMORANDUM OF TREATIES OF COMMERCE WITH RUSSIA.

Treaty between Great Britain and Russia, 1858.

[Extracts.]

ARTICLE I. There shall be between all the dominions and possessions of the two high contracting parties reciprocal freedom of commerce and navigation. The subjects of each of the two contracting parties, respectively, shall have liberty freely and securely to come, with their ships and cargoes, to all places, ports, and rivers in the dominions and possessions of the other, enjoy the same rights, privileges, liberties, favors, immunities, and exemptions in matter of commerce and navigation which are or may be enjoyed by native subjects generally.

It is understood, however, that the preceding stipulations in nowise affect the laws, decrees, and special regulations regarding commerce, industry, and police in vigor in each of the two countries, and generally applicable to all foreigners.

ART. XI. The subjects of each of the two high contracting parties, by observing the laws of the country, shall have:

1. Full liberty, with their families, to enter, travel, or sojourn in all parts of the states and possessions of the other contracting party;

2. They shall have the power in the towns and ports to rent and own the houses, warehouses, shops, and lands which they shall need;

3. They shall carry on their business either in person or by means of agents of their own choice; finally,

4. They shall not be subject for their persons and property, nor for their passports, permits of sojourn, or establishments, nor on account of their business or industry, to taxes, whether general or local, nor to imposts or obligations of whatsoever nature, other or more onerous than those which are or may be fixed for natives.

The treaty of commerce between France and Russia, 1874, is almost identical in language with the foregoing articles of the English treaty.

The treaty of commerce between Austria-Hungary and Russia, 1860, contains similar provisions, using in most instances the same language.

Article XIII of the Austrian treaty contains the exact text of Article XI, above quoted, of the British treaty, and there is added the following paragraph:

"It is understood that the restrictions established in the states of one of the high contracting parties shall be equally applicable to the subjects of the other belonging to the same confession."

No treaty of commerce exists between the German Empire and Russia.

[Inclosure 3 in No. 135.—From the London Times, May 23, 1881.]

THE CASE OF MR. LEWISOHN.

Mr. Leon Lewisohn, a native of Hamburg, but a naturalized Englishman, carries on business as a merchant in London. In August, 1880, having occasion to visit Russia for the purposes of his trade, he provided himself with a passport signed by Lord Granville and fortified with the visa of the Russian consul in London. He proceeded to the fair at Nijni-Novgorod, and after a stay of three weeks went on to St. Petersburg, where he took up his residence at one of the principal hotels. On sending his passport to the proper department (*bureau des étrangers*) for examination, he was required to appear personally there, for the reason, as he states, that his name appeared to indicate a Hebrew origin. He duly attended, and was taken before the chief of the department, who merely asked him, "Are you a Jew?" On receiving a reply in the affirmative, the Russian functionary informed Mr. Lewisohn that he could not be permitted to remain in St. Petersburg, but must leave for the frontier within twenty-four hours. An order was indorsed on his passport to the effect that "The bearer of this passport, the British subject Leon Lewisohn, a Jew, is forbidden to stay in St. Petersburg," and instructions in conformity with the order were given to the police. Mr. Lewisohn applied for assistance to the English embassy, but appears to have seen no one in authority. He did not obtain the help he sought, and he left the Russian capital next day (September 23). Mr. Lewisohn states that he suffered pecuniary loss from the expulsion.

On returning to London, Mr. Lewisohn made a statement of his case to the foreign office. Lord Granville immediately communicated with our ambassador at St. Petersburg, and Sir Julian Pauncefote was instructed to inform Mr. Lewisohn that the notice which he had received to quit Russia appeared to have been in accordance with Russian law. Mr. Lewisohn having further told Lord Granville that his business requirements would in a short time render it again desirable for him to visit Russia, and having asked whether protection would be afforded him for that purpose by Her Majesty's Government, Lord Granville requested Lord Dufferin, by telegraph, to ascertain whether there would be any objection to Mr. Lewisohn's returning to Russia. A delay of three weeks supervened, and Lord Granville telegraphed again, and learned in reply that Lord Dufferin had not yet received answer from the Russian Government to several inquiries he had made on the subject. Ultimately, after a correspondence extending over four or five months, Mr. Lewisohn received (on April 2. 1881) a letter from the foreign office which informed him of the definite refusal of the Russian Government to permit him to return to St. Petersburg.

No. 35.—*Mr. Foster to Mr. Blaine.*

[Extract.]

No. 136.] LEGATION OF THE UNITED STATES,
St. Petersburg, July 14, 1881. (Received July 30.)

SIR: I have the honor to acknowledge the receipt of your confidential No. 80, and have read with much interest your admirable note to Mr. Bartholomei which you sent as an inclosure.

* * * * * * *

You express a desire that I should transmit without delay the text of the law governing the residence or sojourn of Jews in Russia, to which Sir Charles Dilke alluded in Parliament. I regret to say that I am unable at present to do so, but I hope the abstract sent with my No. 135 will be sufficient for your purpose.

As heretofore stated, the laws are numerous and conflicting, and I do not know the precise one referred to by him; besides, they are in the Russian language only, and uncodified, and it would require the assistance of a learned native lawyer, with fuller information as to Sir Charles's remarks, to do more than send what is contained in my No. 135. I will write to Mr. Lowell, who may be able to get more light upon the subject. I will not, of course, ask him to do anything if he sees the slightest embarrassment, but as the action of our Government and of this legation have been freely referred to in Parliament, he may be able, without appearing to be intrusive, to get further information, which I will ask him to communicate to you direct.

I hope the memorandum on the British, Austrian, and other treaties with Russia, which I also transmit, will be of some service to you. The examination which I have made satisfies me that the text of our treaty of 1832 is more favorable to us than that of any other of the nations mentioned. It is possible that the last three lines of Ar-

ticle I may yield the point under discussion, but they certainly do not do so as fully and explicitly as either the British, French, or Austrian (especially the latter), or the treaties of the other European governments. I think you have been misinformed if you have the impression (as I infer you have from your note to Mr. Bartholomei) that either other nations have more favorable treaty stipulations on this subject with Russia than the United States, or that the Jews of other nationalities receive better treatment than those who are American citizens. On the contrary, so far as my observation goes, more consideration has been shown to American Jews than is usual with those of other nationalities. I think that upon further examination of the subject you will be confirmed in the views suggested by the resolution of Congress, and approved by the President and yourself, that the defect may be in the treaty, and that we will have to look for a remedy in that direction.

* * * * * * *

The present time is not a favorable season, however, for any action, as both the embassies and court are in vacation; and, besides, you may prefer to further consider the subject before any other steps are taken.

There is a kindred matter which I design to make the topic of a dispatch, to wit, the rights of naturalized American citizens of Russian nativity who may revisit this country. The question has presented itself recently in two or three phases, and in the absence of a treaty of naturalization it is not easy to make a satisfactory settlement.

I am, etc.,

JOHN W. FOSTER.

No. 36.—*Mr. Blaine to Mr. Foster.*

[Extract.]

No. 87.] DEPARTMENT OF STATE,
Washington, July 29, 1881.

SIR: * * * From a careful examination of the cases of grievance heretofore reported by your legation, it appears that the action of the Russian authorities toward American citizens, alleged to be Israelites, and visiting Russia, has been of two kinds.

First. Absolute prohibition of residence in St. Petersburg and in other cities of the Empire, on the ground that the Russian law permits no native Jews to reside there, and that the treaty between Russia and the United States gives to our citizens in Russian jurisdiction no other rights or privileges than those accorded to native Russians. The case of Henry Pinkos may be taken as a type of this class.

Second. Permission of residence and commerce, conditionally on belonging to the first guild of Russian merchants and taking out a license. The case of Rosenstrauss is in point.

The apparent contradiction between these two classes of actions becomes more and more evident as the question is traced backward. The Department has rarely had presented to it any subject of inquiry in which a connected understanding of the facts has proved more difficult. For every allegation, on the one hand, that native laws in force at the time the treaty of 1832 was signed, prohibited or limited the sojourn of foreign Jews in the cities of Russia, I find, on the other hand, specific invitation to alien Hebrews of good repute to domicile themselves in Russia, to pursue their business calling under appropriate license, to establish factories there, and to purchase or lease real estate. Moreover, going back beyond 1832, the date of our treaty, I observe that the imperial ukases concerning the admission of foreigners into Russia are silent on all questions of faith; proper passports, duly visaed being the essential requisite. And, further back still, in the time of the Empress Catherine, I discover explicit tolerance of all foreign religions laid down as a fundamental policy of the Empire.

Before examining the issues directly before us, it may not be out of place to give a brief review of these historical data.

The ukase of the Empress Catherine, of 22d February, 1784, although concerning only the establishment of commercial relations with the new possessions of Russia on the Black Sea, contains the following notable declaration:

"That Sebastopol, Kharson, and Theodocia be opened to all the nations friendly to our Empire for the advantage of their commerce with our faithful subjects, * * * that the said nations may come to these cities in all safety and freedom. * * * Each individual of such nation, whoever he may be, as long as he shall remain in the said cities by reason of his business, or of his own pleasure, shall enjoy the free exercise of his religion according to the praiseworthy precepts handed down to us by the

sovereigns our predecessors, and which we have again received and confirmed, 'that all the various nationalities established in Russia shall praise God, the All Powerful, each one after the worship and religion of his ancestors,' * * * and we promise, upon our imperial word, to accord to all foreigners in these three cities the same advantages which they already enjoy in our capital and seaport, St. Petersburg, etc."

The full text of this ukase, which breathes a spirit of large and enlightened tolerance in advance of the policy of those days, is well worthy of perusal, and may be consulted in volume 4 of Martens "Recueil des Traités," 1st edition, Gotttingen, 1795, pages 455–457.

The imperial ordinance of the Czar Alexander 1, of 13th August, 1807, decrees a rigid system of passports for foreigners entering Russia, and is applicable to "all foreigners, of whatsoever nationality," but intimates no restriction on travel or sojourn in Russia by reason of race or faith. This ordinance was modified and amplified by the ukase of 25th February, 1817, but still without any manner of religious proscription or restriction.

From this time down to 1860 I can find no trace of the enforcement, especially against American citizens, of the restrictions against Jewish travel and residence which are stated to have existed when our treaty with Russia was signed. It is a significant circumstance that the acknowledged authorities on private international law, writing during this period upon the legislation of all Europe as affecting the persons and rights of aliens, make no reference to such disabilities. Even the painstaking Falix is silent on this point, although devoting much space to the treatment and rights of aliens in Russia. I do not desire to be here understood as arguing that the asserted disabilities did not exist at that time. The domestic history of the Russian Empire shows plainly the restrictions placed upon native Hebrews, and especially those of Polish origin, the efforts to confine them to certain parts of the Empire, and the penalties sought to be imposed to deter them from mingling with the Christian subjects of the Czar. But the same history shows the gradual relaxation of those measures, until, in the capital itself, the native Israelite population is said to number some thirty thousand souls, with their synagogues and sectarian schools; while a special ukase of the late Czar distinctly recognizes to foreign Hebrews every privilege of residence and trade, in a certain guild, which native Christian subjects possess.

This ukase of the Emperor Alexander II, of 7th of June, 1860, after premising that the need of commercial development and the principles of international reciprocity make it proper to concede "to foreigners dwelling in Russia the same rights as those which our subjects enjoy already in the principal countries of Europe," proceeds to permit all aliens to enter any of the trading guilds on the same footing as natives, and to thereupon enjoy all the commercial privileges which these guilds confer upon native Russian traders, with the following qualification:

"FIRST REMARK.—Foreign Hebrew subjects, known by reason of their social position and the wide extent of their commercial operations, who come from foreign lands, may, after the established formalities, that is to say, upon a special authorization, issued in each case by the ministers of finances, of the interior, and of foreign affairs, trade in the Empire and establish banking houses therein, upon procuring the license of a merchant of the first guild. It is likewise permitted to these same Israelites to establish factories, to acquire and to lease real estate conformably to the prescriptions of the present ukase."

This provision, it will be observed, extends to the whole territory of the Empire. If, as I understand the response of the Russian ministry in the case of Henry Pinkos, native Israelites are forbidden by law from residing or trading in the capital, then this ukase places all foreign Jews (whether belonging to treaty powers or not) on a more favored footing. But if native Hebrews, as a fact, are permitted to reside in St. Petersburg and engage in trade in other guilds than the so-called "first guild," there may then well be question whether such restriction to a particular guild in the case of an American Israelite is consonant with the express provisions of the treaty of 1832, Article I. This point was, in fact, raised in the case of Theodore Rosenstrauss at Kharkoff, which is narrated at length, with all the correspondence therein exchanged, in Mr. Jewell's dispatch No. 20, of December 15, 1873; but it does not seem to have been then exhaustively considered whether the complainant received, under the treaty, the like treatment with the native Hebrews of Kharkoff, or whether he was constrained to obey the ukase of 1860, which, as I have above remarked, is framed for general application to all aliens and irrespective of treaty rights. It is, however, not my present purpose to reargue this old case, but simply to call attention to the fact that Russian law may, and possibly does, modify and restrict treaty rights. The Rosenstrauss case was special in its nature, and concerned commercial privileges, under a promulgated license law of the Empire. It may be necessary, at some future time, to discuss the questions it involves, but just now I am concerned with a different class of cases, namely, those of American citizens visiting Russia for private business or for pleasure and travel, and duly provided with the passports of this Government authenticating their national character and their consequent right to all the specific guaranties of our treaty.

This brings me again to the cases of Pinkos and Wilczynski. It is unnecessary here to recapitulate the facts therein, as they are amply presented by the files of your legation, and by the correspondence had with the Russian foreign office. It is sufficient to characterize them as instances of the notified expulsion from St. Petersburg, by the police or military authorities, of American citizens, not because of any alleged failure to comply with the ukase of 1860, or with the Russian commercial code, but simply on the allegation, unsupported by proof, that they professed the Israelitish faith, and that the law forbade the sojourn of native Israelites in the imperial capital. On this brief formulation of the case, this Government believes that, under its treaty with Russia, and in view of its treatment of Russian subjects resorting under like circumstances to the United States, it has just ground for complaint, and expectancy of better treatment from the Government of Russia.

The provision of our treaty of 1832 with Russia, governing the commercial privileges of the citizens and subjects of the two countries, is as follows:

"ARTICLE I. There shall be between the territories of the high contracting parties a *reciprocal liberty* of commerce and navigation.

"The inhabitants of their respective states shall *mutually* have liberty to enter the ports, places, and rivers of each party *wherever foreign commerce is permitted.* They shall be at liberty to sojourn and reside *in all parts whatsoever* of said territories, in order to attend to their affairs; and they shall enjoy, to that effect, the same security and protection as natives of the country wherein they reside, on condition of their submitting to the laws and ordinances there prevailing, and particularly to the regulations in force concerning commerce."

Article X confers specific personal rights reciprocally. In respect of this article an infringement alike of the letter and the spirit of the treaty is not only possible, but probable, under the rigid interpretation of the Jewish laws upon which Russia seems disposed to insist. Its stipulations concern the right to dispose of personal property in Russia owned by or falling to American citizens, who may receive and dispose of inheritances and have recourse to the courts in settlement of questions arising thereunder. It certainly could not be seriously claimed or justly admitted that an American Hebrew, coming within the provisions of this article, is to be treated as a candidate for commercial privileges, and required to take out a license as a trader of the first guild, subject to the approval of his application by the ministries of finance, interior, and foreign affairs. A personal right, not a mercantile privilege, is conferred. To bar an American citizen whose rights might be so concerned from personal appearance in protection of those rights would be a distinct departure from the engagement of the treaty; while to suppose that his case might come under the discretional authority of the police or the military power, which might refuse his personal sojourn in any part of the Empire, or allow it under conditions depending on their good will, is to suppose a submission of the guaranties of the treaty to a tribunal never contemplated by its framers.

Upon a case arising, this Government would hold that the treaty conferred specific rights on all American citizens in the matter of the disposition of their personal property, irrespective of any conditions save those which the article itself expressly creates; that their actual presence when necessary to protect or assert their interests is absolutely guarantied whenever and for whatever time it may be needful; and that this international engagement supersedes any municipal rule or regulation which might interfere with the free action of such individuals.

It would be, in the judgment of this Government, absolutely inadmissible that a domestic law restraining native Hebrews from residence in certain parts of the Empire might operate to hinder an American citizen, whether alleged or known to profess the Hebrew faith, from disposing of his property or taking possession thereof for himself (subject only to the laws of alien inheritance) or being heard in person by the courts which, under Russian law, may be called upon to decide matters to which he is necessarily a party. The case would clearly be one in which the obligation of a treaty is supreme, and where the local law must yield. These questions of the conflict of local law and international treaty stipulations are among the most common which have engaged the attention of publicists, and it is their concurrent judgment that where a treaty creates a privilege for aliens in express terms, it can not be limited by the operation of domestic law without a serious breach of good faith which governs the intercourse of nations. So long as such a conventional engagement in favor of the citizens of another state exists, the law governing natives in like cases is manifestly inapplicable.

I need hardly enlarge on the point that the Government of the United States concludes its treaties with foreign states for the equal protection of all classes of American citizens. It can make absolutely no discrimination between them, whatever be their origin or creed. So that they abide by the laws, at home or abroad, it must give them due protection and expect like protection for them. Any unfriendly or discriminatory act against them on the part of a foreign power with which we are at peace would call for our earnest remonstrance, whether a treaty existed or not. The

friendliness of our relations with foreign nations is emphasized by the treaties we have concluded with them. We have been moved to enter into such international compacts by considerations of mutual benefit and reciprocity, by the same considerations, in short, which have animated the Russian Government from the time of the noble and tolerant declarations of the Empress Catherine in 1784 to those of the ukase of 1860. We have looked to the spirit rather than to the letter of those engagements, and believed that they should be interpreted in the broadest way; and it is, therefore, a source of unfeigned regret to us when a Government, to which we are allied by so many historical ties as to that of Russia, shows a disposition in its dealings with us to take advantage of technicalities, to appeal to the rigid letter and not the reciprocal motive of its international engagements in justification of the expulsion from its territories of peaceable American citizens resorting thither under the good faith of treaties and accused of no wrong-doing or of no violation of the commercial code of the land, but of simple adherence to the faith of their fathers.

That the two American citizens whose unfortunate cases have brought about this discussion were not definitely expelled from St. Petersburg, but were allotted, by the military authorities, a brief time to arrange their private affairs, said to coincide with the usual time during which any foreigner may remain in the empire under his original passport, does not alter the matter as it appears to our eyes. The motive alleged remains the same, and the principle involved is one recognized neither by our fundamental laws nor by any of the conventions we have concluded with foreign states.

It must not be forgotten that this issue, of the banishment of our citizens from a friendly territory by reason of their alleged religion, is a new one in our international relations. From the time when the treaty of 1832 was signed down to within a very recent period, there had been nothing in our relations with Russia to lead to the supposition that our flag did not carry with it equal protection to every American within the dominions of the empire. Even in questions of citizenship affecting the interests of naturalized citizens of Russian origin, the good disposition of the imperial government has been on several occasions shown in the most exemplary manner; and I am sure the actual counselors of His Majesty can not but contemplate with satisfaction the near approach made in 1874 to the arrangement of negotiations for a treaty of naturalization between the two countries. On that occasion, as will be seen by consulting Mr. Jewell's No. 62, of April 22, 1874, the only remaining obstacle lay in the statutes of the empire touching the conferment and loss of citizenship, of which the examining commission and the consultative council of state recommended the modification in a sense compatible with the modern usage of nations.

I can readily conceive that statutes bristling with difficulties remain unrepealed in the volumes of the law of Russia as well as of other nations. Even we ourselves have our obsolete "Blue Laws"; and their literal enforcement, if such a thing were possible, might to-day subject a Russian of free-thinking proclivities, in Maryland or Delaware, to the penalty of having his tongue bored through with a red-hot iron for blasphemy. Happily the spirit of progress is of higher authority than the letter of outworn laws; and statutory enactments are not so inelastic but that they relax and change with the general advancement of peoples in the path of tolerance.

The simple fact that thousands of Israelites to-day pursue their callings unmolested in St. Petersburg, under the shadow of ancient proscriptive laws, is in itself an eloquent testimony to the principle of progress. And so, too, in Spain, where the persecution and expulsion of the Jews is one of the most notable and deplorable facts in history, and where the edicts of the earlier sovereigns remain unrepealed, we see to-day an offer of protection and assured right of domicile made to the Israelites of every race.

I leave out of consideration in the present instruction the question whether the citizens or subjects of other nations are more or less favored than our own in this regard. I have not, however, failed to notice the statement made to you by Mr. de Giers, in one of your reported conversations with him, that German and Austrian Jews are subjected to the proscriptions in question, and the implication therefrom that if the governments of Germany and Austria do not complain, there is no reason why we should.

It is not for me to examine or conjecture the reciprocal motives of policy or of international convention which may govern in these instances. Neither have I failed to remark the seeming uncertainty with which the British Government has approached the case of the English Israelite, Mr. Lewisohn, who was recently required to quit St. Petersburg, notwithstanding that the personal guaranties of the Anglo-Russian treaty of January 12, 1859, in its eleventh, twelfth, and thirteenth articles, are more particular than in our own treaty, and were, presumably, like our own stipulations, framed with the intent of securing impartial rights and protection in Russia. I am perfectly willing to rest my argument on the moral weight of our treaty of 1832, although of course not averse to availing myself of any support which may come from any other quarter to fortify what we conceive to have been our clear

purpose in executing that instrument. And under no circumstances would I in the name of this government be willing to accept a less measure of impartial privilege for a citizen of the United States visiting or sojourning in Russian territory than is assured to aliens in the like case by any stipulation with or usage toward any other nation on the part of Russia.

I had the honor in my letter of the 20th ultimo to Mr. Bartholomei to acquaint him with the general views of the President in relation to this matter.

I can not better bring this instruction to a close than by repeating and amplifying those views which the President so firmly holds, and which he so anxiously desires to have recognized and responded to by the Russian Government.

He conceives that the intention of the United States in negotiating and concluding the treaty of December 18, 1832, and the distinct and enlightened reciprocal engagements then entered into with the Government of Russia, give us a moral ground to expect careful attention to our opinions as to its rational interpretation in the broadest and most impartial sense; that he would deeply regret, in view of the gratifying friendliness of the relations of the two countries which he is so desirous to maintain, to find that this large national sentiment fails to control the present issue, or that a narrow and rigid limitation of the construction possible to the treaty stipulations between the two countries is likely to be adhered to; that if, after a frank comparison of the views of the two governments, in the most amicable spirit and with the most earnest desire to reach a mutually agreeable conclusion the treaty stipulations between the United States and Russia are found insufficient to determine questions of nationality and tolerance of individual faith, or to secure to American citizens in Russia the treatment which Russians receive in the United States, it is simply due to the good relations of the two countries that these stipulations should be made sufficient in these regards; and that we can look for no clearer evidence of the good-will which Russia professes toward us than a frank declaration of her readiness to come to a distinct agreement with us on these points, in an earnest and generous spirit.

I have observed that in your conferences on this subject heretofore with the minister for foreign affairs, as reported in your dispatches, you have on some occasions given discreet expression to the feelings of sympathy and gratification with which this Government and people regard any steps taken in foreign countries in the direction of a liberal tolerance analogous to that which forms the fundamental principle of our national existence. Such expressions were natural on your part, and reflected a sentiment which we all feel. But in making the President's views known to the minister I desire that you will carefully subordinate such sentiments to the simple consideration of what is conscientiously believed to be due to our citizens in foreign parts. You will distinctly impress upon him that, regardful of the sovereignty of Russia, we do not submit any suggestions touching the laws and customs of the empire except where those laws and customs conflict with and destroy the rights of American citizens as secured by treaty obligations.

You can further advise him that we can make no new treaty with Russia, nor accept any construction of our existing treaty, which shall discriminate against any class of American citizens on account of their religious faith.

I can not but feel assured that this earnest presentation of the views of this Government will accord with the sense of justice and equity of that of Russia, and that the questions at issue will soon find their natural solution in harmony with the noble spirit of tolerance which pervaded the ukase of the Empress Catherine a century ago, and with the statesman-like declaration of the principle of reciprocity found in the later decree of the Czar Alexander II in 1860.

You may read this dispatch to the minister for foreign affairs, and should he desire a copy, you will give it to him.

I am, etc.,

JAMES G. BLAINE.

No. 37.—*Mr. Hoffman to Mr. Blaine.*

No. 150.] LEGATION OF THE UNITED STATES,
St. Petersburg, August 29, 1881. (Received September 24.)

SIR: I have the honor to inform you that, having prepared a copy of your dispatch No. 87 upon the subject of United States Jews in Russia, I to-day called upon Mr. de Giers.

I told him the object of my visit, and offered to read your dispatch. He requested me not to do so, as he was very much occupied, and several persons waiting to see him, but asked me to leave him a copy, which he promised to have carefully considered.

I said to him that your dispatch related to citizens of the United States alone; that you did not touch upon the question of Russian Jews; and that as regards citizens of

the United States you placed yourself principally and strongly upon the treaty of 1832. That under the treaty every citizen of the United States, without distinction of creed, had the right to go where he pleased, and stay as long as he pleased, in the empire. He replied that he regarded the words "on condition of their submitting to the laws and ordinances there prevailing" as qualifying this right, and subjecting American Israelites to the laws which govern Russian Israelites. I assured him that it appeared to me that those words referred rather to laws on morals (*mœurs*) and police "ordinances," in the ordinary acceptation of that term. I added, that in the case of Russian Jews very many exceptions were made to their laws (referring to the large number of Russian Jews permitted to reside in St. Petersburg contrary to law). He admitted that there were many such exceptions; and added that exceptions were made and would be made freely in case of foreign Jews also. I had only to apply in any particular case, and he had no doubt an exception would be made; your dispatch should be carefully considered, and in a week or two he would answer it verbally or in writing, as I preferred. He added that the answer would probably be the same as that given to the English.

The answer given to the English, I understand to be, that the treaty does not give an English Israelite the right to go anywhere, or stay any length of time in Russia, but that he is bound by the regulations which govern native Jews; but that in the case of Mr. Lewisohn an exception is made on request of the British embassy, and he can return here if he desires to do so. I do not speak with certainty, but I learn in well informed quarters that this is the decision.

I am, etc.,

WICKHAM HOFFMAN.

No. 38.—*Mr. Hoffman to Mr. Blaine.*

No. 162.] LEGATION OF THE UNITED STATES,
St. Petersburg, October 8, 1881. (Received October 26.)

SIR: Referring to your dispatch No. 87, and to my No. 150 in reply, I have the honor to inform you that I called yesterday upon Mr. de Giers in reference to the question of United States Jews in Russia. Mr. de Giers stated that he had read your dispatch with interest; that the question had two sides—its legal and its moral side; that in reference to the former, he still maintained the view he had already intimated to me, viz, that in the treaty of 1832 the words "on condition of their submitting to the laws and ordinances there prevailing" were controlling, and subjected American Jews to the treatment of native Jews. He added that he had given an analogous answer to the representations of other powers.

As regards the moral side of the question, he, personally, would be glad to see important modifications made in the laws regulating the condition of the Jews in Russia; but that they had brought much of the harshness of these laws upon themselves. A commission had, however, been appointed to examine and report upon the whole Jewish question, under the presidency of the minister of the interior; that the commission would meet this autumn, and that he had already transmitted your dispatch to that officer, to be submitted for the consideration of the commission.

I am, etc.,

WICKHAM HOFFMAN.

No. 39.—*Mr. Hoffman to Mr. Frelinghuysen.*

No. 183.] LEGATION OF THE UNITED STATES,
St. Petersburg, January 9, 1882. (Received February 2.)

SIR: Referring to the correspondence between the Department and this legation upon the subject of American Jews in Russia, I have the honor to report the following curious case:

About three weeks ago I was called upon by a man of the name of James G. Moses, who produced his United States passport, and stated that he was a Jew; that he was employed in the Ceniselli circus in this city as stable director, and that he had been ordered out of the city as a Jew. He added that he was not "one of those Talmud Jews"; that he belonged to the American Reformed Church, known in Russia as the Karaim Jews.

As I have found by experience that the most effective way to proceed in these cases is to appeal direct to the chief of police, and through him, if necessary, to the minister of the interior, and not to address the minister of foreign affairs, except as a last

resource, I asked the consul-general, who is in relations with the municipal authorities, to apply to General Kosloff, prefect of police, on Mr. Moses's behalf.

As soon as General Kosloff understood that Moses was a Karaim Jew, he told the consul-general to send the man to him the next morning accompanied by his employer.

The next morning they went accordingly, and the result of the interview was that Mr. Moses was informed that General Kosloff would recommend that permission be given him to remain, and in the meantime to give himself no uneasiness. I understand that he has since received the necessary permission.

It appears that the Karaim or Reformed Jews are of a superior class, and have never given the Russian Government any trouble or been found enrolled among the nihilists.

Mr. Moses is a resident of New York, born in Germany, but taken to the United States when a young child.

I am, sir, etc.,

WICKHAM HOFFMAN.

No. 40.—*Mr. Frelinghuysen to Mr. Hoffman.*

No. 123.] DEPARTMENT OF STATE,
Washington, April 15, 1882.

SIR: The prejudice of race and creed having in our day given way to the claims of our common humanity, the people of the United States have heard with great regret the stories of the sufferings of the Jews in Russia. It may be that the accounts in the newspapers are exaggerated, and the same may be true of some private reports. Making, however, due allowance for misrepresentations, it can scarcely be doubted that much has been done which a humane and just person must condemn.

The President of course feels that the Government of the Emperor should not be held morally responsible for acts which it considers wrong, but which it may be powerless to prevent.

If that be true of this case, it would be worse than useless for me to direct you, as the representative of the United States, to give official expression to the feeling which this treatment of the Jews calls forth in this country. Should, however, the attitude of the Russian Government be different, and should you be of the opinion that a more vigorous effort might be put forth for the prevention of this great wrong, you will, if a favorable opportunity offers, state, with all proper deference, that the feeling of friendship which the United States entertain for Russia prompts this Government to express the hope that the imperial Government will find means to cause the persecution of these unfortunate fellow-beings to cease.

This instruction devolves a delicate duty upon you, and a wide discretion is given you in its execution. However much this Republic may disapprove of affairs in other nationalities, it does not conceive that it is its right or province officiously and offensively to intermeddle. If, however, it should come to your knowledge that any citizens of the United States are made victims of the persecution, you will feel it your duty to omit no effort to protect them, and to report such cases to this Department.

I am, etc.,

FRED'K T. FRELINGHUYSEN.

No. 2.

Mr. Hoffman to Mr. Frelinghuysen.

No. 221.] LEGATION OF THE UNITED STATES,
St. Petersburg, April 29, 1882. (Received May 15.)

SIR: The anti-Jew riots have commenced again in the south of Russia. They have been marked, as heretofore, by great and wanton destruction of property, but by little personal violence.

The scene of the worst disturbances has been the town of Balta, a town of about 25,000 inhabitants, nearly three-quarters of whom are Israelites. It lies about 125 miles northwest of Odessa.

The riot is reported to have been from some trifling cause, such as the

refusal of a Russian peasant to pay for the liquor he had drunk in a wine-shop kept by a Jew.

The police, which was very weak, appears to have interfered simply to prevent the Jews from defending themselves.

At first the rioters did not number more than two hundred, many of them boys. But soon the peasants began to come in from the country, joined the rioters, and gave a more serious turn to the affair. The riot lasted two days before troops arrived from Odessa to quell it. During this time, of the thousand houses occupied by Jews, all, except perhaps fifty, were gutted and sacked. As faras ascertained, one Israelite only lost his life. But the amount of suffering undergone by over 15,000 people, men, women, and children, destitute of food and lodging, is painful to contemplate.

I am satisfied that the Russian Government is truly anxious to put a stop to these riots. * * * It is reported that in the country far from garrison towns the German inhabitants are very uneasy, and the saying is not uncommon, "After the Jews, the Germans."

But the position of the Russian Government in this matter is an exceedingly difficult one. In a conversation with General Ignatieff a few days since, he told me that the government had received the reports of the numerous local boards appointed by it last year to suggest measures for the amelioration of the condition of the Jews; that they had not only by a majority, but unanimously, recommended their expulsion from the Empire. "We have then," he said, "on the one hand 5,000,000 Jews, Russian subjects, clamoring to be freed from all special restraints, and we have on the other 85,000,000 Russian subjects clamoring to have the 5,000,000 expelled from the Empire. What is to be done in such a case?"

I am, sir, etc.,

WICHAM HOFFMAN.

No. 3.

Mr. Frelinghuysen to Mr. Hunt.

No. 5.] DEPARTMENT OF STATE,
Washington, June 26, 1882.

SIR: I inclose herewith a copy of a letter from Herman Rosenstraus, dated the 10th [22d] of April, 1882, in relation to the conflict that he and his brother have been involved in with the Russian authorities by reason of his Hebrew faith.

From the record of passport No. 49450, issued by this Department to Herman Rosenstraus, accompanied by his wife and five minor children, it appears that he was admitted to the citizenship of the United States by the court of the county of Monroe, in the State of New York, on the 18th day of September, 1860.

You will do what you can to obtain relief for Mr. Rosenstraus in the grievances he sets forth in his letter.

It may be advisable in this matter for him to endeavor to show, if possible, his *animus revertendi* in order to offset the fact of his six years' redomicile in Russia.

I am, etc.,

FRED. T. FRELINGHUYSEN.

[Inclosure.]

Mr. Rosentraus to the President.

APRIL 22, 1882.

SIR: A fellow-citizen being destined by Providence to seek his fortune across the ocean in the Empire of Russia comes to you, honorable sir, for advice and assistance.

About six years ago I left America, State of New York, city of Rochester, where I was engaged in business for a number of years, in order to take charge of a business carried on by my brother Theodor, also an American citizen, in the city of Charkoff, in the Empire of Russia. He, my brother, was at that time and is now carrying on the optical business; besides that he is representing the Singer Sewing Machine Company, New York.

So far everything went well. Now, I must state that it is customary here to change passports every year, and I did so in the course of five years without any obstacles.

On the 22d of December, 1881, my passport again expired, and according to custom I went to the governor to have the same renewed. He did so, but told me that I must call for it at the police station. Calling there you may imagine my surprise when the police master informed me that I had to leave the city on account of my being a foreign Jew. I told him that I was a citizen of America, and America has only citizens, not knowing any distinction in creeds.

I was answered, that the law has no distinction for America, and if I could not procure the right to stay here from the minister of interior afiairs through our worthy legation at St. Petersburg, I would have to leave the city.

I wrote forthwith to our worthy legation and received a letter, the copy of which I hereby annex:

"LEGATION OF THE UNITED STATES,
"*St. Petersburg, January* 5 [17], 1882.

"SIR: I received your letter of the 30th December last yesterday. To-day I have written to General Ignatieff on your behalf. I hope to get permission for you to remain, but, as you are aware, the feeling in Russia just now is very bitter against persons of your creed.

"General Ignatieff will probably refer the matter to the governor of Charkoff for a report of recommendation. If through him you can secure a favorable recommendation from the governor you will probably be allowed to stay.

"Your obedient servant,

"WICKHAM HOFFMAN,
"*Charge d'affaires.*

"Mr. H. ROSENSTRAUS, *Charkoff.*"

The remark made in the letter of our worthy legation that the feeling in Russia against people of our creed is very bitter pained me very much. It is my opinion that that has nothing to do with my rights. I claim the rights of an American citizen; what religion I adhere to should make no difference to our worthy legation, for they must be aware that America knows only citizens.

If a Jew has no right in Russia, I think it is the duty of our ambassadors to notify our Government not to issue any passport to this country. Had I known such at the time I took my passport in Washington that a Jew has no right here, I certainly would never have ventured to come here with five minor children to be put in such a terrible situation as I am in just now.

The minister, although finding all my papers in order, did not grant me the right to remain here and gave me just ten days to leave.

Ten days' time is granted to an upright and law-abiding citizen to pack up and leave; why, it seems almost a crime to confess to be of Mosaic religion.

How can a man be expected to leave on such short notice with a family now of six minor children? Is he to throw away his business and be a ruined man? And this only for the mere reason because it pleased the Lord to have him born a Jew.

I shall try again this week to see the governor here, in order to grant me at least time enough to remain until I can hear from our worthy Government.

May be you, honorable sir, have power to instruct the now newly appointed ambassador, Mr. William Hunt, to see that our rights here in Russia are protected. If our treaty does not sufficiently protect us, could there not an amendment be made to the effect that Gentiles and Jews should be treated alike?

Hoping and praying, honorable sir, that you may give this appeal your kind attention or bring the same before the proper authorities to act on this matter, I allow myself yet to ask you at least to grant me a few lines, in order to know if something can be done for me.

I am, honorable sir, with much respect,
Your obedient servant,

HERMAN ROSENSTRAUS,
Charkoff, Russia.

No. 4.

Mr. Hoffman to Mr. Frelinghuysen.

No. 241.] LEGATION OF THE UNITED STATES,
St. Petersburg, July 1, 1882. (Received July 17.)

SIR: Referring to your No. 123, of 15th April last, and to my No. 226, in reply, I have the honor to forward to you herewith a copy of a circular of Count Tolstoy, minister of the interior, addressed to the governors of the different provinces of the Empire, upon the subject of the persecution of the Jews, together with a translation of the same.

You will see that the opinion which I ventured to express in my No. 226, and previously in my No. 221, that the Russian Government was sincerely desirous of putting a stop to all violence towards the Jews, is borne out by this circular.

I am, sir, etc.,

WICKHAM HOFFMAN.

[Inclosure in No. 241.—Translation from the Journal de St. Petersbourg, June 12-24, 1882.]

Circular of the minister of the interior to the Government, June 9-21, 1882, *relative to measures to be taken to prevent disorders which might break out against the Israelites.*

The regulations of the committee of ministers approved by His Majesty the Emperor the 3d May last set forth:

That it must be brought to the public knowledge that the Government has resolved to pursue with inflexibility all violence exercised against the person and the property of the Israelites, who are under the protection of the laws, common in this respect to all the population, by the same right as to those of the other subjects of His Majesty the Emperor. That the competent provincial authorities must be informed that the charge belongs to their responsibility of the measures now to be taken with a view to avoid occasions of similar disorders and to put a stop to them as soon as they may break out; and for all negligence in this respect on the part of the administrative authorities and of the police, when they might have, but have not, taken the trouble to prevent acts of violence, those who have been guilty will be relieved of their functions.

The publication of this expression of the imperial will has unfortunately been provoked on several occasions by disorders which have been renewed in different localities of the Empire, accompanied by violence against the Israelite population.

Such disorders, which, as a result, cause individuals to lose, without distinction of race and religion, the certainty of the security of their persons and of their property, prove the insufficiency of the guaranty of the regular and peaceable course of public life, and deprive the Government of the possibility of devoting itself solely to a capital question, and just now of special importance, viz, to harmonize the activity of all governmental and social institutions and direct it towards the determined and clearly defined object of the re-establishment of tranquillity and order, which are the only sure guaranties of the ulterior development of public security and tranquillity. With this aim, the regulations of the committee of ministers not only invite the competent authorities to take peremptory measures to prevent the manifestation of all acts of violence, but points out in addition the necessity of relieving from their functions persons who may be guilty of any negligence in this respect.

In calling the most serious attention of the governors of the provinces to the punctual and inflexible execution of the imperial will expressed by the committee of ministers, I think proper on my side to explain, in development of the fundamental idea, that violence and arbitrariness can not be justified by any inciting causes; that for this reason the adoption of effective measures to be taken to prevent and arrest disorders rests upon the personal responsibility of the governors; and that every manifestation of local disorder will, as its inevitable consequence, render also legally responsible all the functionaries whose duty was the immediate charge of preventing disorders.

Not judging it possible to give here any more direct instructions relative to the means of attaining the above-mentioned end, considering that, on one side, these means are indicated by the law itself, and that on the other the choice to make among

them when it is a question of applying them, depends upon accidental circumstances, temporary and local, I have the conviction that the governors of the provinces will carry out all the requirements clearly established by the imperial will, and will fully justify my hopes on this subject by pursuing on their side, without the least hesitation, all negligence of the authorities.—[Official Messenger.]

No. 5.

Mr. Hoffman to Mr. Frelinghuysen.

No. 244.

LEGATION OF THE UNITED STATES,
St. Petersburg, July 15, 1882.

SIR: I have the honor to acknowledge the receipt of your No. 5 addressed to Mr. Hunt.

With this dispatch you inclose a petition of Mr. Herman Rosenstraus to the President, and you instruct Mr. Hunt to do what he can for the relief of Mr. Rosenstraus in the grievances set forth in his letter.

I have the honor to say that I should have reported this case to the Department had Mr. Rosenstraus suffered any wrong; but you will observe that at this date, more than six months from the time he received notice to leave Charkoff, he is still in that city, and, although I have received no assurance to this effect, I am confident that under the present policy of the Russian Government he will not be disturbed.

I am, etc.,

WICKHAM HOFFMAN.

[Inclosure 1 in No. 244.]

Mr. Rosenstraus to Mr. Hoffman.

WASHINGTON, *December* 30, 1881. [January 11, 1882.]

To the Legation of the United States of America at St. Petersburg:

HONORABLE SIR: Nearly six years ago I arrived here in Charkoff from America, State of New York, city of Rochester, to take charge of a business which my brother, Theodor Rosenstraus, has carried on here as first guild merchant for the last ten or twelve years. I at that time received full power of attorney from my brother to act for him in every capacity, and such power of attorney was every year renewed by a notary public. So far every thing went well.

The 22d of this month my passport had to be renewed and I went to the governor's office to do so. The governor had the same renewed, but told me I must call for the passport at the police office. I called there to receive the same, but was not a little surprised when the police master informed me that I as an American Jew had no right to live here, except I had the permission granted to me by the minister of interior affairs. I told him that this is new to me. I had lived unmolested for the last six years, and showed him my power of attorney, as also first guilder's clerk's certificate. He said that this is all correct, but he must abide by the law, and all he could grant me to remain here was six weeks time. If I could in that time procure the right to stay here all right; if not I had to leave.

I therefore, being a citizen of the United States of America, seek your kind protection. The way I am situated here, it is for me at present impossible to leave. I have a family of six minor children, two of my boys attend the gymnasium and one girl is attending the German school here, the others are quite small yet. Besides that, I am in business bound up that way that it would be ruination to me were I compelled to leave.

My brother Theodor being in feeble health lives abroad, so it leaves me here sole manager of the business.

While writing this it almost breaks my heart, at the idea that a free American citizen who means to be upright and honest should be dealt with in such a way and only for the mere reason because it pleased the Lord to have him born a Jew.

Trusting, hoping, I relying entirely upon your kindness to help me in this unpleasant affair as speedily as possible.

I have, etc.,

H. ROSENSTRAUS.

[Inclosure 2 in No. 244.]

Mr. Hoffman to Mr. de Giers.

JANUARY 5 [17], 1882.

EXCELLENCY: I have the honor to call your excellency's attention to the case of Mr. H. Rosenstraus, an American Jew residing at Charkoff.

Mr. Rosenstraus came to Russia six years ago to take charge of a business already established by his brother. If I am correctly informed, Mr. Rosenstraus is an optician. He has continued to reside quietly at Charkoff for the whole of this period. He belongs to the first guild, and pays his taxes accordingly. He has a family of six children, boys attending the gymnasium, and a girl at the German school.

On the 22d December last, on the renewal of his passport by the governor, he was referred to the police office, and there told that as an American Jew he had no right to reside at Charkoff without the permission of his excellency the minister of the interior. He was given six weeks to obtain this permission.

I have the honor to apply to your excellency on behalf of Mr. Rosenstraus. So far as I can learn he is a peaceable American citizen, pursuing quietly an important business, profitable to himself and useful to his neighbors, and complying faithfully with the laws governing the residence of foreign Jews in Russia. It is needless to point out to your excellency that to compel him to leave Charkoff, would break up his business and probably ruin him.

I am, etc.,

WICKHAM HOFFMAN.

[Inclosure 3 in No. 244.]

Mr. Hoffman to Count Ignatieff,

JULY 5 [17], 1882.

(Same letter as to Mr. de Giers, *mutatis mutandis.*)

[Inclosure 4 in No. 244.—Telegram.]

Mr. Rosenstrans to Mr. Hoffman.

APRIL 1 [13.]

Received notice to-day to leave city within ten days. I am the sole conductor of business; the cause my brother leaves on acconnt of ill health abroad. What am I to do?

[Inclosure 5 in No. 244.—Telegram.]

Mr. Hoffman to Mr. Rosentraus.

APRIL 1 [13.]

Will see Ignatieff. Will do what I can for you. Can promise nothing.

[Inclosure 6 in No. 244.]

Mr. Hoffman to Mr. Rosenstraus.

APRIL 2 [14], 1882.

SIR: I have seen General Ignatieff, and he promises to look into your case immediately, and do what he can; but he can give no definitive answer until he receives the governor-general's report.

As matters now stand, I can do nothing more for you, unless to get you a few months' delay. In case the order is persisted in I will endeavor to do this, if you let me know in time.

WICKHAM HOFFMAN.

[Inclosure 7 in No. 244.]

Mr. Rosenstraus to Mr. Hoffman.

APRIL 9 [21], 1882.

DEAR SIR: Your favor of the 2 [14] instant came duly to hand, and contents noted. I really don't know how to thank you for your kind attention towards me, and I am in hopes that you will yet succeed in getting the right for me to remain. If it depends upon the general governor's report I am perfectly confident that nothing in that respect will be lacking, for I can proudly say, although it is only myself who says so, that as far as character and reputation is concerned, the family Rosenstraus is irreproachable.

HERMAN ROSENSTRAUS.

[Inclosure No. 8 in 244.]

Mr. Rosenstraus to Mr. Hoffman.

APRIL 27 [MAY 9,] 1882.

(Reminding me that his time would expire in a few days and asking me to get him more time, and making inquiries about his right under the treaty of 1832.)

[Inclosure 9 in No. 244.]

Mr. Hoffman to Mr. Rosenstraus.

MAY 2 [14], 1882.

SIR: I have your letter of April 27. It appears to me that the best course at present in your case is to do nothing. This is my view of the subject. If you think differently let me know, and I will make a formal application that you may have a delay of six months.

As regards the question you ask me, the United States Government has always contended that under the treaty of 1832, United States citizens in Russia have all the privileges of Russian subjects without any distinction of creed. The Russian Government, on the other hand, contends that United States citizens have only the privileges of Russian subjects of the same faith; and I must add that Great Britain concedes the Russian view. As the law stood a year ago, I should have had no hesitation in saying that as Russian Jews of the first guild, with their necessary clerks and servants of their faith, could reside wherever they wished in Russia, so could American Jews under the same circumstances. If this privilege has been withdrawn from the Russian Jew, of course it has been withdrawn, in the Russian point of view, from the American. But I am not aware that it has been withdrawn.

I repeat that my advice to you is to do and to say nothing. At the same time, I will make the application for delay, if you desire it. If the order is persisted in, I shall report the case to my Government, and ask for instructions.

WICKHAM HOFFMAN.

[Inclosure 10.]

Mr. Rosenstraus to Mr. Hoffman.

MAY 5 [17], 1882.

HONORABLE SIR: In answer to your worthy letter of May 2 [14] I would say that I am very willing to let the case rest, but I am only sure that as soon as my time expires, which is the 10th of this month, I will be notified by the authorities here to leave the city except the Minister of Interior Affairs gave notice to let the matter rest.

As I am entirely confiding in you, I certainly not do anything against your kind advice.

Come what may, I will with the help of God bear the consequences.

ROSENSTRAUS.

P. S. I must yet state that the Russian Jews paying first guild here are not molested, neither their hired help. Would you advise me in case I have to leave to close the business?

(The 10th of May came and went and Mr. Rosenstraus was not notified to leave the city, and so matters continued until the fall of General Ignatieff. Shortly after that event, I received the following letter.)

[Inclosure 11.]

Mr. Rosenstraus to Mr. Hoffman.

JUNE 17 [29], 1882.

SIR: I almost came to the conclusion that I am the so-called haunted Jew. I perceive that other foreign Jews are left entirely alone; they seem to be after me as they would after a condemned criminal.

I took your advice of your letter of May 2 [14], wherein you stated not to do or say anything about the matter in order not to draw attention of the Government to my case; but a few weeks ago an official called Pristav came to me, and told me that my time was up, and I must leave the city. I told him that I had this whole business in my charge, and it would be impossible for me to leave. He told me to give him such in writing, which I did, and to-day I received an answer, the copy of which I hereby enclose, granting me two weeks more time.

Received July 2d.

July 3d I answered Mr. Rosenstraus that I would see Count Tolstoy, the newly-appointed Minister of the Interior, on his behalf.

On the 5th I called upon him, but not finding him in, I wrote him on the same day as follows:

[Inclosure 12 in No. 244.]

Mr. Hoffman to Count Tolstoy.

JULY 5, 1882.

EXCELLENCY: There is at present at Charkoff an American Jew named Herman Rosenstraus, who has been there for some years; his brother is a well known optician of that place, and a member of the first guild. Herman Rosentraus, chief clerk and business manager, and in his absence holds his power of attorney. He is married, sends his children to school, and is, as far as I am aware, a good and useful citizen. Last winter he received notice that he must leave Charkoff. I wrote to Mr. de Giers on his behalf, and I also wrote unofficially to your excellency's predecessor, Count Ignatieff. The result was, that while no personal permission was given that this man should remain, he has been permitted to until this date. He now receives the inclosed notice that he must remove at once.

I propose to write again to Mr. de Giers, calling his attention to this case, and I trust that your excellency will find it in your power to permit this man to remain permanently. In any case, I hope that your excellency will grant him this permission, for two or three months at least, until the Imperial Government shall have had time to act definitively upon my note.

WICKHAM HOFFMAN.

[Inclosure 13 in No. 244.]

Mr. Hoffman to Mr. de Giers.

Pressé. JULY 5, 1882.

EXCELLENCY: Referring to my note of January 5 [17] last in the case of Herman Rosenstraus, an American Jew residing at Charkoff, who had been ordered to leave that city, I have the honor to inform your excellency that this man has been permitted to remain hitherto without disturbance, until I had begun to hope that he would not be further interfered with.

But he has now received a notice to the effect that he must leave Charkoff in ten days—about five days from the present date.

Your excellency will recollect that in the conversations which Mr. Foster and I have had the honor to hold with your excellency upon the subject of American Jews in Russia, while we have always contended that under the treaty of 1832 American citizens of any religious denomination had the same rights and privileges as regards residence in Russia as Russian subjects of any denomination, and that their faith, or want of faith, was not a proper subject for police inquiry, your excellency has always maintained, on the other hand, that the words of the treaty "on condition of submitting to the laws and ordinances there prevailing," were controlling words, and subjected American Jews to the special laws which govern Russian Jews. Accepting your excellency's view for the moment, for the sake of argument, I have the honor to call your excellency's attention to the fact that this man's brother and employer is a member of the first guild at Charkoff, and that Herman Rosenstraus is his "commis et serviteur," and as such shares his privileges as a member of the first guild. And I beg therefore to add, that if Russian Jews of the first guild are permitted to reside with their clerks and servants, and do business at Charkoff—and I am assured that they are so permitted—then this man, under the provisions of the treaty, as interpreted by your excellency, has a right to do the same.

And in this connection I beg to call your excellency's attention to the whole tone of the Russian legislation upon this subject, as set forth in the memorandum of laws your excellency had the kindness to communicate to Mr. Foster with your note of 27th May [2d June], 1881. Everywhere the foreign Jew of the first guild is looked upon and treated like a native Jew of the same guild, the object being, evidently, to encourage, rather than to discourage, the residence of this class of Israelites in Russia.

I must beg to press upon your excellency the clear application of the treaty of 1832, as interpreted by your excellency, to the case of this American Israelite, and at the same time to express my hope that under it he will be permitted to reside peacefully at Charkoff as long as he sees fit to do so.

WICKHAM HOFFMAN.

No. 6.

Mr. Hoffman to Mr. Frelinghuysen.

No. 246.] LEGATION OF THE UNITED STATES,
St. Petersburg, July 19, 1882.

SIR: Referring to my No. 244, I have the honor to inform you that I have received a note from Count Tolstoy, minister of the interior, to the effect that he has ordered the authorities at Charkoff to give Mr. Rosenstraus until October 15 to leave that city.

I do not regard this as final, but simply as a compliance with my request that he would allow Rosenstraus to remain until the foreign office could reply to my note of July 5 on his behalf.

In this connection I have the honor to enclose a translation of a circular of Count Tolstoy, minister of the interior, dated June 21 [July 3], which appears to me to apply to the case of Rosenstraus, and I have called his attention to it.

WICKHAM HOFFMAN.

[Inclosure in No. 246.—Translation.]

ST. PETERSBURG.

II.—On the 3d of April. 1880, the ministry of the interior requested the governors to abstain from the expulsion of the Israelites established in their provinces without having a right of residence beyond the limits of the zone assigned for the residence of the Israelites in Russia. This measure was brought about by the fact that an insufficient surveillance by the administrative authorities in regard to the Israelites arriving in the provinces of the center, had permitted many of the latter not only to establish themselves in localities where they had no right to reside, but even to build up industrial enterprises, the suppression of which would have been the ruin of a great number of the inhabitants of the country, Israelite and non-Israelite. In presence of such a situation the ministry of the interior could not omit to take measures tending to protect the interests of private individuals in no manner guilty of illegal tolerance towards the Israelites. The measures in question indicated very clearly to the local authorities the necessity for arrangements capable of preventing in the future irregularities of this kind. The information received by the ministry, however, shows that the local authorities of several provinces do not comply with the request that has been made to them, and proceed to the expulsion of the Israelites domiciled in their provinces anterior to the circular of April 3, 1880, while in other provinces they base themselves upon the same circular to authorize the new domiciliation of Israelites who have not the right of residence.

I find it consequently necessary to call the attention of the governors to the fact that they ought not of their own authority to expel Israelites established in their provinces anterior to the circular of April 3, 1880, and residing there in virtue of regular permissions of residence. It is the duty of the governors, on the other hand, to take all possible measures to prevent new authorizations being given to Israelites who have not the right of residence in the whole extent of the Empire. (Journal de St. Petersburg, July 5 [17], 1882.)

No. 7.

Mr. Frelinghuysen to Mr. Hunt.

No. 7.] DEPARTMENT OF STATE,
Washington, July 22, 1882.

SIR: Charles Goldstein, a citizen of the United States, and a resident of Glens Falls, State of New York, was arrested at Virchony Odinsk, in Russian Siberia, in March last, and is understood to be still detained there. There is no charge against him of having violated or intended to violate the laws of Russia. He sailed from New York in the steamer *Gellert*, of the Hamburg and American line, on the 29th of December last, having an American passport, issued from this Department on the 28th of November, 1881 (No. 3778). His certificate of naturalization was issued from the county court of Warren County, State of New York, on the 23d of October, 1876. Mr. Goldstein and his family are well known and highly vouched for in this (Warren), the county of his residence. I transmit a copy of a letter from Mr. Goldstein to his wife, dated at Virchowy Odinsk, the 12th of April last, which will put you in possession of the facts in more detailed form of his arrest and detention. It appears that the only grounds alleged in justification of these proceedings are that he failed to have his passport exchanged for a Russian permit in the first province of the Empire at which he touched, a municipal requirement of which, if it exists at all, he was entirely ignorant, and could not, as an American citizen, be expected to be familiar with, and concerning which the Russian consul in New York, who *visaed* his passport, failed to inform him. The arrest and detention of Mr. Goldstein under these circumstances is considered by this Government as in derogation of the principles of public law, which accords to the

passport of one nation to its citizen full faith, respect, and credit so long as the bearer of such document bears himself in obedience and respect to the laws of any other nation in whose territory he may be, either as a traveler, sojourner, or temporary resident. I do not permit myself to believe that the Imperial Government of Russia would for a moment lend its countenance or support to such an infraction of this salutary and universally recognized principle as the case of Mr. Goldstein furnishes an example of. The complete freedom in this regard enjoyed in this country by subjects of His Majesty the Czar, and the long and unbroken friendship that has so happily subsisted and still subsists between the Governments of the United States and Russia, forbids such a belief.

The President desires that you will lose no time in bringing this matter to the attention of the Russian Government, expressing, at the same time, his earnest solicitude for the immediate release of Mr. Goldstein with full and free permission to pursue his journey, complete his lawful business in Russia, and return to his country and his family without further molestation.

You will report the result of your proceedings to the Department.

I am, etc.,

FRED. T. FRELINGHUYSEN.

[Inclosure.]

GLENS FALLS, N. Y., *July* 19, 1882.

DEAR SIR: Inclosed I send you a translation of a letter written in the Hebrew language, received here on the 13th instant by Mrs. Charles Goldstein, which explains itself.

The writer, Charles Goldstein, is a resident of this village and a citizen of the United States. I send duplicate copy of his certificate of naturalization.

Since the receipt of the above letter I have called upon the Russian consul at New York City, and I find that on the 14th day of December last, said Goldstein presented a passport to him, and the same was countersigned by him on that day; that said passport was issued on the 28th day of November, 1881, and was numbered 3778.

I also called at the office of the Hamburg-American Steam-ship Company and was there informed that said Goldstein took passage on the steam-ship *Gellert* of said line, which sailed from New York City December 15, 1881, and arrived at Hamburg December 29, 1881.

Will you please present the matter to the proper officials at Washington and urge that immediate steps to secure said Goldstein's release from imprisonment be taken.

I am unacquainted with the practice in such cases, but for the purpose of expediting the matter (as he has now been confined since about the 15th of March last), if it can be done without too much expense to his wife, who is very poor, I should like to have the demand upon the Russian Government, and other necessary steps to be taken, made by cable.

If necessary to make proof of his residence or citizenship in this country, or if any other evidence is required, I will endeavor to furnish same immediately upon being notified.

Hoping that you will do all in your power to aid in restoring to this poor wife her unfortunate husband, and trusting that at some time in the near future, I may, in a measure at least, be able to reciprocate the favor,

I am, respectfully, etc.,

E. L. STEARNS.

Hon. ORANGE FERRIS,
Treasury Department, Washington, D. C.

P. S.—I have written you at the instance of County Judge Cheritree, whom I expected would write you a letter to accompany this, as he stated to me that he would do so, but I have called at his office and found that he was out of town.

Yours, etc.,

E. L. STEARNS.

[Inclosure.]

VERCHONY ODINSK, *April* 12.

To my dear wife, and to my sister and her children:

The first I write you that I am, thank God, well, hoping to hear the same from you and to see you shortly; and second, I write you that I arrived here safely and I have seen all of them. We were happy to see each other, but with David I did not see because he went away 600 versts (75 miles). So I was two days in Peterofska Zabot, and I rode to Verchowy Odinsk, to send him a telegraph, because in Peterofska Zabot there is no telegraph. That is 180 versts and when I came into the office I sent the telegraph and they recognized me as a stranger. They asked me for a passport. I showed it to them and they told me that the passport was not good as I had to change it in the first Russian province at the time I arrived and I did not. I did not know, as the Russian consul did not inform me of it when he put his signature on. So they took me to the police station and they took my passport and sent it to the governor.

In three days a telegraph came that they should search me and take away all papers and books whatever they find, and they shall put guard around the place where I stop, and the excitement in town was great, that an American was arrested. So the justice came in five days later and asked me the following questions:

Q. Where was you born?—A. In Russia.
Q. In what city?—A. I don't remember; as I went away when I was six years old.
Q. What do they call you?—A. Calal Ben Yankla.
Q. Brothers have you?—A. I have; but I don't remember how many.
Q. Your parents living?—A. I don't know.
Q. How long you in America?—A. Sixteen years.
Q. A wife have you?—A. I have, in Glens Falls.
Q. When did you marry?—A. In 1873; in New York.
Q. What is the object of your coming to Siberia?—A. To look for a business.
Q. And why to Peterofska Zabot?—A. I had a letter to Cheims from his brother in America.
Q. What is his name there?—A. Marks Levy.
Q. Where does he live?—A. In New York; but I can't tell the street.

Then he told me that because my passport was not exchanged for a Russian one he can not release me until they could send to America and find out if the passport is right, and they sent me to Osbrog, and I at once sent an appeal to the American consul in St. Petersburg, but from there it takes three months there and back, therefore I don't know what will be from it.

Therefore, my dear wife, you shall go to Judge Davis and you shall take out a copy of my citizen papers from Warren County and get signatures from people that knows me for fifteen or sixteen years and you shall send it to St. Petersburg to the consul, and you shall go into Hughes & Northrups office in Sandy Hill, and you shall ask them for advice what to do. You shall tell them that I am arrested because I did not change passports, and I did not know it and the Russian consul in New York did not tell me of it. Because if I shall look for justice here it may take years. They also said to take all letters in and out from America.

Also try to send me a hundred rouble; perhaps I will need it here. No more news. I wish you health. From me who hopes to hear good news from you,

C. GOLDSTEIN.

I send my best regards to you all. It comes with hot sobs and tears.

No. 8.

Mr. Hunt to Mr. Frelinghuysen.

No. 5.] LEGATION OF THE UNITED STATES,
St. Petersburg, August 12, 1882.

SIR: I have the honor to acknowledge the receipt of your dispatch No. 7 in the case of Charles Goldstein, and to make the following report:

On the 9th July last the vice-consul received a letter from Goldstein written in Russian, stating that he was imprisoned at Verkné Ondinsk, and claiming protection as an American citizen. On the 10th July Mr.

Hutton transmitted this letter, with a translation, to this legation, and on the 11th Mr. Hoffman wrote to Mr. de Giers on behalf of Goldstein.

Two or three weeks having passed without a reply, Mr. Hoffman wrote a private note to Count Tolstoy, minister of the interior, urging his immediate attention to this case.

And at the same time the consul-general telegraphed to the governor of the province, requesting to be informed why Goldstein was imprisoned.

The governor promptly replied that a full report in his case had been forwarded to the foreign office in May last.

In the meantime Mr. Hoffman's private note to Count Tolstoy appears to have borne fruit, for on the 7th August the consul-general received a telegram from Goldstein that he would be released as soon as his money arrived.

This money has now arrived at St. Petersburg, both the draft forwarded by you and acknowledged by me in my No. 4, and also $150 in United States bank notes forwarded by Goldstein, with the request that they be turned into Russian money. Mr. Stanton will remit to him all this money by telegraph to-day or Monday.

Yesterday the long-deferred report in his case was received from the foreign office at this legation. I have the honor to inclose you a translation of the part relating to the grounds of his arrest. Mr. Hoffman has replied to Mr. de Giers, with my assent, that he entertains no doubt whatever of the identity of Goldstein in view of the instructions of the Department and of the money remitted on his account, and requests that his passport may be returned to him.

Goldstein's statement that he would be set at liberty is confirmed by Mr. de Giers, who states that orders to this effect have been given by the governor-general of eastern Siberia.

I am, etc.,

WILLIAM H. HUNT.

[Inclosure with No. 5.—Translation.]

IMPERIAL MINISTRY FOREIGN AFFAIRS,
DEPARTMENT OF INTERIOR RELATIONS,
St. Petersburg, August 11 [*July* 30], 1882.

SIR: I have received from the governor-general of eastern Siberia a telegram informing me that Goldstein was arrested at Verkné-Ondinsk on account of the suspicious relations which he kept up with the exiles condemned to hard labor, and of the reasonable suspicion that this individual is a Jew of the government of Plock, who clandestinely left Russia in order to escape military service, etc. * * * *

However some of the exiles detained at the prison of Verkné-Ondinsk believed that they recognized in him one Guilts Minsky, a Russian subject, and brother of David Minsky, domiciled at the factory of Petrovsk, and Khaim Guilts Minsky, an exile condemned to hard labor, and they make depositions to this effect before a local magistrate.

In view of these depositions and of the reticence of Charles Goldstein at the interrogatory he underwent, as well as of his doubtful antecedents, the governor of Transbaikal has addressed himself to the Imperial Ministry to obtain through the legation of the United States information which will enable him to be certain of the identity of the individual in question.

GIERS.

No. 9.

Mr. Hunt to Mr. Frelinghuysen.

No. 10.] LEGATION OF THE UNITED STATES,
St. Petersburg, September 15, 1882.

SIR: Herewith I inclose a copy of a letter addressed by me to Mr. de Giers, minister of foreign affairs, in the case of Herman Rosenstraus, an American citizen, who has been ordered to leave Russia because he is a Jew. The case is fully set out in the letter to that minister. It is in my judgment one of great hardship. Under the instructions contained in your letter to Mr. Hoffman, dated April 15, 1882, and numbered 123, I now report it to the Department for such action as it may be considered proper to take.

I have, etc.,

WILLIAM H. HUNT.

[Inclosure.]

Mr. Hunt to Mr. de Giers.

LEGATION OF UNITED STATES,
St. Petersburg, September 14 [2], 1882.

SIR: I have the honor to invite your early attention to the case of Herman Rosenstraus, at present sojourning at Charkoff. This man is an American citizen, who has been notified to leave Russia by the police authorities of Charkoff. His last notification was received by him a few days ago. The time for his departure is announced to be by the 1st of August next.

On or about June 23 [July 5] last application was made by Mr. Hoffman, secretary of legation, for permission for him to remain unmolested at least until the Imperial Government should have time to act definitely upon the case. His application was addressed to Count Tolstoy, minister of the interior, and orders were issued by that minister extending the time allowed Rosenstraus to the 15th of October. From this statement it would appear that the recent notice to leave by the 1st instead of the 15th of October had been issued improvidently or through error.

The Imperial Government not having acted definitely in the matter I deem it proper now to lay before your excellency a brief recapitulation of the facts in the case. In doing so I hope that the conclusions you may reach will be in accordance with the growing tendency of the Imperial Government to treat with a larger measure of tolerance than was formerly shown those persons who profess the same religious faith which Rosenstraus holds.

Herman Rosenstraus is a Jew. He was born in Würtemberg. At the age of twelve years he went to the United States, where he grew up and lived for twenty-seven years. He was naturalized in 1860, according to the laws of the United States. He married an American woman. His children were born in the United States. His wife's family still live there. His household furniture and effects remain there, and he is the owner of real estate there.

In 1876 he left his home in the United States to join his brother, a merchant trading in Charkoff, and was induced to embark temporarily with him in business. He brought with him his wife and children under a passport from the Department of State at Washington. He has ever since lived in Charkoff and acted as the clerk or agent of his brother, his "commis et serviteur." He has devoted himself solely to business pursuits, conducting himself with circumspection, and in no wise, either by word or act or sentiment affiliating with or sympathizing with persons of doubtful loyalty or suspicious conduct.

It is his purpose, and he has always so declared it to be, to return to his home in America as soon as he can do so without violating engagements long since contracted and without incurring ruinous losses.

His brother holds the license of a merchant of the first guild, and is in the peaceable exercise of his calling. Herman Rosenstraus deemed himself shielded from molestation under his passport in all countries where relations of amity with the United States existed, and he was justified in believing this with regard to Russia,

whose friendship for my fellow-countrymen had ever been conspicuous, and whose expressions of sympathy, in their time of grief and trouble, have ever been appreciated as the manifestations of an unusually good disposition towards us by the Imperial Government.

Herman Rosenstraus, acting as his brother's clerk and business manager, was permitted to remain undisturbed until January last. He was then summarily ordered to leave Russia. His case was then submitted to your excellency and he has awaited a final decision upon it until now. Under the recent order for his expulsion it seems to invite prompt action.

The mere statement of the facts that are here recited justifies the expectation that he will be permitted to remain. The protection claimed for him is not based on the fact that he is a Jew. It rests upon the broader fact that he is an American citizen, entitled in that character alone to the privileges and immunities of his citizenship, and to invoke at the hands of Russia the same measure of justice which would be freely accorded to a Russian in the United States sojourning there under like circumstances.

This right my Government has always insisted upon, under the general principle which governs the intercourse between friendly powers, and which is especially guarantied by the provisions of the treaty of 1832 between Russia and the United States.

But if the privileges of a temporary residence in Russia are denied to citizens of the United States, and their commercial privileges are abridged and circumscribed by the application of religious tests, which are unknown in the United States and unmentioned in the treaty, it becomes clear that the "reciprocal liberty of commerce" which is expressly agreed in the treaty can not exist.

But the present case does not stand only on the provisions of the treaty. Rosenstraus's right to remain in Russia falls clearly within the interpretation given by your excellency of the law of the Empire, which permits merchants of the first guild to have with them their clerks and employés—"commis et serviteurs. Under this interpretation, which, I understand, has been acted upon in the case of other Jews, it must be held that Herman Rosenstraus is included.

But his right to remain in Russia goes still further. I have been furnished with a copy of a circular from the minister of the interior in the Russian language, bearing date June 21 [July 3]. Unhappily for me I am unacquainted with that language and am wholly dependent on the translations of inexact scholars for the text of this circular. The spirit of this circular seems to be a desire to prevent the expulsion of meritorious and inoffensive Jews. A clause in it calls the attention of the governors of the respective departments to their duty not to banish from their departments those Jews who had settled there before this circular was issued by the minister of the interior on the 3d of April, 1880, and who were living in such departments under lawful permits.

If this clause be correctly translated, as I have every reason to think it is, the right of Rosenstraus to remain in his place of abode is secured to him under it.

I am particularly instructed by the Government of the United States to omit no proper effort for the protection of any citizen who occupies his position.

It is a duty rendered agreeable in this instance by the conviction which I entertain that he is a respectable and harmless man, intent only on his own affairs, whose expulsion from Russia would subject him to irreparable injury.

If he is permitted to remain, such permission would be deemed an evidence of that policy of religious toleration on the part of Russia towards the Jews which has been received with universal approbation among the enlightened nations of the world, and nowhere with more earnest applause than by my Government.

In the hope of an early and favorable response to this appeal,

I have, etc.,

WILLIAM H. HUNT.

No. 10.

Mr. William H. Hunt to the Secretary of State.

No. 18.] LEGATION OF THE UNITED STATES.
St. Petersburg, November 1, 1882.

SIR: On the 19th of October I received from Mr. Vlangaly, the assistant minister of foreign affairs of His Imperial Majesty's Government, an answer to my note in behalf of Herman Rosenstraus. I had prepared

an answer to Mr. Vlangaly's communication, but had not sent it, when I received the dispatch of the Acting Secretary of State, No. 14, upon the same subject. I have now to acknowledge the receipt of that dispatch.

Inasmuch as Rosenstraus had intimated to me the possibility of his being able, through some amicable arrangement between himself and the authorities of Charcoff, to protract his stay in that place without further molestation, I determined to defer sending my communication to the minister of foreign affairs until I should hear from Rosenstraus, to whom I had at once written.

I have not yet had from him the expected reply, but await it, before troubling the Department with the correspondence in the case to which I have alluded.

I have, etc.,

WILLIAM H. HUNT.

No. 11.

Mr. Hunt to the Secretary of State.

No. 21.] LEGATION OF THE UNITED STATES,
St. Petersburg, November 20, 1882.

SIR: I have to acknowledge the receipt in due course of mail of the dispatch of Mr. Davis, No. 14, relative to the case of Herman Rosenstraus.

I received some days ago from the minister of foreign affairs an answer to my communication in the case. I forwarded to the Department a copy of my communication at the same time that I sent it to the minister.

The Imperial Government refuses to interfere in Rosenstraus' behalf as requested by me, and has contented itself with declaring that in the opinion of the minister of foreign affairs and that of the minister of the interior the provisions of law invoked by me for the protection of Rosenstraus as the clerk and attorney in fact of his invalid brother, who is now absent from Russia, were inapplicable to the case; that these provisions had reference only to native Jews, who might serve in such capacities, but did not apply to foreign Jews.

I prepared at some length a remonstrance against this narrow interpretation of the only law of Russia known to have reference to the subject-matter. I deemed such interpretation unwarranted by any terms employed in that law, and a manifest violation of the reciprocal protection to persons and property and of the equality of rights of citizens expressly guarantied by the treaty of 1832 between the two countries.

Shortly after, in an interview with Mr. Vlangaly, I found him disposed to extend permission for Rosenstraus to remain until June next, and obtained his promise to endeavor to secure this extension of time. I had received an intimation from Rosenstraus himself that upon paying for a license as a merchant of the first guild he felt assured that he might become secured against molestation.

I have concluded that it is inexpedient under these circumstances to send my communication to the minister of foreign affairs. I shall accordingly leave the note of Mr. Vlangaly unanswered, unless a change of circumstances warrants me in sending a reply to it, or the Department should think proper to instruct me otherwise.

I have, etc.,

WILLIAM H. HUNT.

No. 12.

Mr. Hunt to Mr. Frelinghuysen.

No. 32.] LEGATION OF THE UNITED STATES,
St. Petersburg, February 3, 1883.

SIR: I have to acknowledge the receipt in due time of your dispatch No. 21 on the subject of Rosenstraus's case. I deemed it expedient to defer replying to Mr. Vlangaly's letter in the case until now. I have now, however, received my first reply, which I informed you about. I have availed myself of the suggestion you threw out by making it part of my communication of this date.

I have, etc.,

WILLIAM H. HUNT.

[Inclosure.]

Mr. Hunt to Mr. de Giers.

LEGATION OF THE UNITED STATES,
St. Petersburg, January 21 [*February* 3], 1883.

SIR: I beg to acknowledge the receipt of Mr. Vangaly's note of the 7 [19] of October, 1882, reporting the conclusion arrived at by your excellency in the case of Herman Rosenstraus, of Charkoff, concerning which I had the honor to address a communication to your excellency last September, and of which I spoke to you subsequently. From Mr. Vlangaly's note I regret to learn that there is no relief deemed applicable to the case of this unfortunate man. Under the article of the law of Russia permitting merchants of the first guild, who are Israelites, to employ their coreligionists as clerks or servants (*commis et serviteurs*), it is held that this article is applicable only to Russian subjects and merchants of the first guild.

In this conclusion of your excellency, in which Mr. Vlangaly informs me his excellency the minister of finances unites, I am unable to concur, I am instructed by the Government of the United States to make known to you its dissent from your opinion. I have delayed doing so because the application of Rosenstraus to be admitted as a merchant of the first guild had been presented through me to the Russian Government and has not been acted upon. But apprehensive that by continued silence I might be deemed to acquiesce in the conclusion stated in the letter of Mr. Vlangaly, I felt constrained to repel any such inference and to emphasize formally the dissent of my Government from your excellency's opinion.

I have failed to find in the letter of the law or in its context that this right to be employed as clerks or servants is exclusively restricted to persons who are Russian subjects and merchants of the first guild. But even if it were thus restricted, I respectfully claim that such a restriction is open to the charge of being in derogation of the rights secured by Article I of the treaty between Russia and the United States in 1832, and that the "reciprocal liberty" provided in that article, and the enjoyment there stipulated, by citizens of both countries, "of the sources, security, and protection as natives of the country wherein they reside," cannot be preserved if that liberty and that security and protection be limited and neutralized by subsequent legislation or interpretation. When treaties create privileges by express terms, such privileges then created can not afterwards be abridged by the act of one of the contracting parties without the consent of the other.

Heretofore Russia has contended that an American Jew in the Empire could not enjoy commercial or personal privileges denied to native Jews; but now, according to this opinion in Rosenstraus's case, an American Jew is debarred from enjoying certain privileges conceded to native Jews, because he is a foreign Jew. That these positions are incongruous is manifest.

Rosenstraus, by the terms of the article of the treaty, put on the same footing as a Russian subject of Jewish faith, and being in the employ of his invalid brother, a Russian Jew of the first guild, would seem to be clearly entitled to the protection and security he asked. Any other interpretation of the treaty merely subjects American Jews to all the disadvantages of native Jews and excludes them from the few advantages which Russia allows to Russian Jews. There is no reciprocity that can result to American Jews under this interpretation.

In conclusion, your excellency will permit me to express the hope that in future the Imperial Government may recognize the justness of the view of this subject which the Government of the United States entertains, and that all American citizens visiting Russia will, without regard to their religious convictions, receive alike that friendly security and protection which the treaty was designed to provide.

I am, etc.,

WM. H. HUNT.

No. 13.

Mr. Frelinghuysen to Mr. Taft.

No. 7.] DEPARTMENT OF STATE,
Washington, December 18, 1884.

SIR: The Hon. S. S. Cox, M. C., has addressed the Department on the subject of a report that the Russian minister of the interior has ordered the expulsion from Odessa and other cities of all Hebrews holding foreign passports unless also holding "permits of residence."

So far as any of these persons are citizens of the United States, I have to ask that you will communicate to the foreign office the desire of the President that law-abiding American Hebrews, on due exhibition of such passports, may receive the adequate permits of residence referred to. Should it prove that no such order has been made, you will telegraph, and in case the order has been issued you will report as promptly as convenient the approximate number of American citizens in the various cities where it is operative affected by it, that I may apprise Mr. Cox of the facts.

I am, etc.,

FRED'K T. FRELINGHUYSEN.

No. 14.

Mr. Taft to Mr. Frelinghuysen.

No. 26.] LEGATION OF THE UNITED STATES,
St. Petersburg, January 17, 1885. (Received February 6.)

SIR: On receipt of your dispatch No. 7, dated December 18, 1884, relating to the reported order of the minister of the interior of this government, requiring foreign Hebrews to have a "permit of residence" as well as a passport, in order to reside in Odessa and certain other cities in Russia, I immediately addressed a letter to the foreign office, containing specific inquiries on all the points covered by the dispatch, and communicated the desire of the President that "permits of residence" be granted to law-abiding American Hebrews. I have also personally called on the secretary of foreign affairs and on the secretary of the interior, and have likewise made inquiry of ambassadors of countries which have Jewish citizens residing in Russia. There is undoubtedly such an order as you describe in force, but it is not limited to Jews. No foreigner is allowed to reside in Russia without a "permit of residence," as well as a passport. The difficulty is that the government, in granting permits and licenses, discriminates against foreign Jews, according to certain laws in force in Odessa and other cities, and declines generally to

grant permits of residence to them unless they are merchants of the first guild, paying annually 800 rubles each for a license. This is undoubtedly a different rule from that adopted by the government for other foreigners, or for native Jewish citizens, and I have so presented the case to the secretary of foreign affairs. But it is claimed by this government that while according to Article I of the treaty of 1832 American citizens "enjoy the same security and protection as do the inhabitants of the country in which they reside, it is upon the condition that they submit to the laws and ordinances established there, and particularly to the rules of commerce in force," and "that as a matter of fact Israelites are subjected to a particular régime in Russia, regulated by laws and ordinances, and rules for commerce, industry, and the police," and "further, that this régime, referring to all foreign Israelites without national distinction, cannot be considered in the case of one individual Hebrew to whom it applies as any violation of the treaty of December 18, 1832."

It is pretty clear that this government adheres strongly to the opinion that it is essential to the interest of the Empire to restrict by law the residence of foreign Jews in the cities of the Empire.

I find that Germany has many more cases of the kind than we have, and England also has Hebrew citizens residing in Russia, though not so many as Germany. Both Germany and England have conventions with Russia similar to that existing between the United States and Russia. Indeed, I think the articles are identical. I understand that the German Government does not dispute the right of the Russian to adopt these laws in the regulation of its interna l affairs, notwithstanding the convention.

Although the principle has been questioned by the English Government, the regulations of the Russian Government on the subject have been submitted to without any disturbance of friendly relations.

As to the number of American Hebrews residing in the cities of Russia, accurate information is difficult to obtain, if it be at all practicable. I have requested the foreign office to give me such information on the subject as may be practicable, and I shall make such other inquiries as I can; but from the best information I have been able to obtain, my belief is that American Hebrews in Russia are very few. There is an evident belief on the part of the Russian Government that most of the Jews who have gone to America, obtained letters of naturalization, and returned to Russia for business, are speculating on their naturalization papers to evade their military duty to the Russian Government.

I write this statement without waiting for a specific written answer to my before-mentioned communication to the foreign office on the subject of your dispatch No. 7, as it may be some time before the answer will be received, and I believe that I am able to give a correct idea of the position of this government on the subject from the verbal communications I have exchanged with the secretary of foreign affairs and from other sources.

I have, etc.,

ALPHONZO TAFT.

No. 15.

Mr. Taft to Mr. Bayard.

No. 30.] LEGATION OF THE UNITED STATES,
St. Petersburg, March 18, 1885. (Received April 6.)

SIR: Referring to instruction No. 7 from the Department of State to this legation and to my answer in part thereto, numbered 26, I have now the honor to send the answer of this Government to my application, made in pursuance of said first-named dispatch, with a translation thereof.

I am, etc.,

ALPHONZO TAFT.

[Inclosure in No. 30.]

Mr. Vlangaly to Mr. Taft.

IMPERIAL MINISTRY OF FOREIGN AFFAIRS,
DEPARTMENT OF INTERNAL RELATIONS,
St. Petersburg, March 5 (17), 1884.

MR. MINISTER: Your note of December 22, 1884 (January 3, 1885), with which you favored the imperial ministry, had for object to obtain information on the point whether the Imperial Government had issued an order by which all foreign Israelites were expelled from the city of Odessa and other localities in the Empire. You at the same time expressed in the name of your Government the desire that permits of residence might be given to all Jewish citizens of the United States of America.

I have to-day the honor to inform you on a communication from the ministry of the interior that no such action has been taken by the Imperial Government.

In regard to furnishing the Jewish citizens of America with Russian permits of residence, the minister of the interior observes that he can not comply with this request, as according to the regulations established on this subject every foreigner having his national passport in due order is obliged, on his own application, to be furnished by the competent Russian authority with a permit of residence.

The law at the same time grants to foreigners the right to bring complaint for any irregularity that may take place in this respect.

I have also to add that the Imperial Government is unable to supply the legation of the United States with statistics concerning the number of the Jewish American citizens residing in Russia.

Receive, etc.,

A. VLANGALY.

No. 16.

Mr. Lothrop to Mr. Bayard.

No. 77.] LEGATION OF THE UNITED STATES,
St. Petersburg, September 7, 1886. (Received September 20.)

SIR: As the question has recently come up again, I think it my duty to advise the State Department of the present status of the right of citizens of the United States being of the Hebrew faith to enter into or dwell in Russia.

The laws of Russia forbid this. It is true there are some exceptions in favor of members of great banking or commercial houses, but this is of no practical value to Americans.

This matter has heretofore been the subject of careful and extended correspondence between the State Department and this legation, espe-

cially in 1880 and 1881. A digest of the Russian law may be found in Mr. Foster's dispatch of July 14, 1881.

Every effort seems to have been made to induce the Imperial authorities to modify its laws in favor of our citizens, but wholly without success. There is now no probability of any such modification. Indeed, there seems now to be a revival of strictness in enforcing the restrictions. Strict orders have been issued to Russian officials abroad not to *visa* the passports of any persons recognized as foreign Jews. The object is to turn all such persons back at the frontier, and thus prevent their entering the Empire. If, however, any get through, their passports are subjected to renewed scrutiny in all large cities, and if they are recognized they are forthwith ordered to leave. The papers announce that only a few days ago two English Jews, one of them a member of Parliament, were peremptorily expelled at Moscow.

On August 29 a most respectable Hebrew merchant of New York, a native-born citizen of the United States, who was traveling in Russia as a tourist with his family, was waited on at his hotel in this city by the police, his passport returned to him, and he was ordered to leave the city that night. He came to me immediately, and I at once not only went to the foreign office, but filed a protest in writing against this order, and asked its revocation. At the same time I advised him to remain pending my application. My explanation of this gentleman's character and the purpose of his visit was very readily accepted and the order of expulsion revoked.

* * * The Imperial Government defends its position on the ground that every country must have full liberty to determine who shall have the right to enter and dwell in its territory. * * * It is not pretended that American citizens of the Hebrew faith have ever at any time proved dangerous to the peace or safety of the Empire. But it is urged that discrimination between nationalities is inadmissible, and that the harshness of the general rule is mitigated by special permission given in all proper cases upon special application.

I believe that the Russian officials are disposed to be obliging in this respect, but it can never be acceptable that any body of American citizens should be subject to any such necessity. It seems to be an imputation on that which is justly held most sacred.

Still, as there is not the slightest inclination to abrogate, or even modify the law, it may be desirable that the facts should be more fully known in America.

Much annoyance and mortification would be saved if our Hebrew fellow-citizens desiring to come to Russia should apply for special leave. Letters of introduction to the legation would be most useful in promoting such application. Permission could doubtless be obtained in all ordinary cases.

This question has arisen in several other cases; but in no other case of an American citizen has an actual order of expulsion been made.

I submit the matter to you for such consideration and direction as you shall think best.

I am, very truly, etc.,

GEORGE V. N. LOTHROP.

No. 17.

Mr. Bayard to Mr. Lothrop.

No. 59.] DEPARTMENT OF STATE,
Washington, September 23, 1886.

SIR: In your No. 77 you inform the Department of the present status of the Russian law respecting the right of an alien of the Hebrew faith to enter or reside within His Imperial Majesty's territory.

You state that, save in exceptional cases, it is altogether denied, and that though efforts have been made on various occasions by the legation to induce the Russian Government to modify the law, there now exists no probability of such modification, although special exception has been made at your request.

The treatment of alien Jews prescribed by the Russian law is such as we, whose system of Government rests on toleration and freedom of conscience, can not comprehend without difficulty or view without regret. Aimed, as it would appear, principally at Russian-Polish Jews by origin, and rigidly applied as to them even when they are lawful citizens of another state, the fact that the enforcement of the law in the case of worthy foreign Jews of other origin appears to be within the discretion of the police authorities, and that the representations of the legation are generally heeded when an American Jew is in question, fortunately makes occasion for protest rare.

The instance cited by you is in point where a native-born Hebrew merchant of New York was promptly relieved from the harsh order of expulsion.

Any case arising should be carefully examined on its merits, and where the person interested is not by origin a Russian Jew, returning to his native country under circumstances suggesting danger to the state and implying the exercise of the ultimate right of self-preservation, the earnest efforts of the legation will doubtless be exerted to secure relief in whatever way the Russian administrative system may indicate as practical. * * *

The Government of the Czar is fully aware that we do not admit the principle of discriminating against any American citizens because of their religious tenets.

I am, etc.,

T. F. BAYARD.

No. 18.

Mr. Bayard to Baron Rosen.

DEPARTMENT OF STATE,
Washington, October 4, 1887.

The Secretary of State presents his compliments to the chargé d'affaires *ad interim* of Russia, and has the honor to request him to cause the inclosed documents to be authenticated under the seal of the Russian legation and then returned to the Department of State.

No. 19.

Baron Rosen to Mr. Bayard.

IMPERIAL RUSSIAN LEGATION,
Washington, September 23 [*October* 5], 1887.
(Received October 5.)

The chargé d'affaires of Russia presents his compliments to the Secretary of State, and has the honor to say, in reply to his communication of the 4th of October, that the documents forwarded for authentication relating to property in Russian Poland, and issuing from persons who appear to be Hebrews, could only be legalized by this legation if accompanied by passports for foreign travel or other documentary evidence showing that the said persons had left Russia with the permission of the Imperial Government, as all legations and consulates are under instructions not to authenticate any documents whatsoever relating to the transfer of property in Russian Poland issuing from Hebrews who have left Russia without permission. In the absence of the evidence above referred to the chargé d'affaires of Russia regrets not to be able to comply with the request of the Secretary of State in regard to the authentication of said documents, which are returned herewith.

No. 20.

Mr. Lothrop to Mr. Bayard.

[Extract.]

No. 150.] LEGATION OF THE UNITED STATES,
St. Petersburg, November 29, 1887. (Received December 19.)

SIR: As I have in a previous dispatch had the honor to make known to you, the laws of Russia prohibit foreign-born Jews, with some unimportant exceptions, from coming into Russia, or becoming domiciled therein.

During this year the law has been very vigorously enforced against all new-comers, and it now seems to be a fixed policy to drive out all who have hitherto become domiciled in the Empire. The newspapers mention the expulsion of large bodies in southern Russia, where they principally live. I have been appealed to by several naturalized American citizens, who have been notified that they must leave the Empire by the end of the year.

I have replied to all such applications that while I should always be glad to render them any proper assistance, this was a matter wholly within the domain of Russian law, so long as foreign Jews of all nationalities were treated alike, and no discrimination made against American citizens.

The ministers of finance, of the interior, and of foreign affairs have power on petition to grant permission to remain here in special cases.

Mr. D. Waldenberg, a naturalized American citizen, but a Jew of foreign birth, long settled at Plock and doing business there, was some months ago notified that he must leave the country by the end of the year. He was so well esteemed by his neighbors that they generally petitioned for the grant of a special permission in his favor. I thought

the case was one in which I could properly join in the application, and did so. No reply has been made.

I have a warm sympathy for these people whose homes and business are thus relentlessly broken up; but my concern would be even deeper if they were only temporarily living here, engaged in promoting business and commerce with their adopted country. But I regret to say that in nearly every case, and perhaps in every case, brought to my attention, they seem to be permanently settled in Russia and engaged in its domestic business.

As many of these persons, if expelled, will be likely to find their way back to America, where their hardships may attract attention, it has seemed to me proper to set out the precise facts of the case, and to show that the unfortunate condition of this class of our fellow-citizens has not been regarded here with indifference.

I am, etc.,

GEO. V. N. LOTHROP.

No. 21.

Mr. Lothrop to Mr. Bayard.

No. 152.] ST. PETERSBURG, *December* 23, 1887.
(Received January 13, 1888.)

SIR: In my dispatch No. 150, of November 29th last, relative to the expulsion of foreign-born Jews from the empire, I mentioned the case of Mr. D. Woldenburg, an American citizen domiciled at Plock, and engaged in business there, as one in which it had seemed proper to use what influence it could in his behalf with the Imperial Government. I confess I had not much hope of a favorable result, but by a letter from Mr. Woldenburg received a few days since, a copy of which is inclosed, I learned that his petition had been granted and he was allowed to continue his residence and business. This information had been confirmed by a letter from the foreign office.

Mr. Woldenburg ascribes the granting of his petition to the favorable offices of this legation, but, while I am glad to believe that they were useful to him, I have no doubt that the great esteem in which he was held in Plock, and which brought to him the general support of his townsmen and neighbors, was the real ground of his success.

I am, etc.,

GEO. V. N. LOTHROP.

[Inclosure in No. 152.]

Mr. Woldenburg to Mr. Lothrop.

EXCELLENCY: I have the honor to respectfully apprise your excellency that I have these days been officially informed that my petition for permission of carrying on my commercial operations at Plock has finally been granted.

I hasten to communicate this favorable news to your excellency in order to show my greatest satisfaction that your excellency's highly influential offices have met with the most favorable success.

I fully believe that I am entirely indebted to your excellency for this unexpected result, as without your assistance I could have never obtained from the Russian Government the permission asked for by me, the more so as many like applications of numerous local foreigners were either refused or unanswered.

In view of these facts I feel greatly obliged to your excellency, both for your official assistance and your extreme condescendence to my frequent requests, and consequently I resolved to come to your city at my earliest convenience in order to personally express my cordial and humble thanks.

I am, etc.

D. WOLDENBURG.

No. 22.

Mr. Bayard to Mr. Lothrop.

No. 108.]

DEPARTMENT OF STATE,
Washington, January 14, 1888.

SIR: I have to acknowledge the receipt of your No. 152 of the 23d ultimo, by which it appears that, as a result of your action, Mr. D. Woldenburg, an American citizen of the Hebrew extraction, domiciled at Plock, has been suffered to continue his business at that place undisturbed.

This report has been read with the greater satisfaction by reason of the evidence it affords that meritorious Hebrews in Russia are not treated according to the strict letter of the rigorous law.

I am, etc.,

T. F. BAYARD.

No. 23.

Mr. Bayard to Baron Rosen.

DEPARTMENT OF STATE,
Washington, December 27, 1888.

SIR: At the request of the Hon. W. W. Morrow, a member of Congress from the State of California, I take the liberty to inclose to you a letter from the Hon. H. S. Foote, of San Francisco, to Mr. Morrow, dated the 11th instant, asking whether the Russian legation can give a safe conduct to a Polish Jew named Kutner to enable him to return to his native place. I should be glad to be favored with a reply to Mr. Foote's inquiries, as also the return of his letter for transmission to him through Mr. Morrow.

Accept, etc.,

T. F. BAYARD.

[Inclosure.]

Mr. Morrow to Mr. Bayard.

HOUSE OF REPRESENTATIVES, UNITED STATES,
Washington, D. C., December 19, 1888.

SIR: I inclose herewith a communication from the Hon. H. S. Foote, of San Francisco, Cal. I beg leave to inquire whether anything can be done in the direction suggested by the letter. It has occurred to me that perhaps you might give me a letter to the Russian Minister, and through him I might obtain such a passport as is desired in this case.

Very truly yours,

W. W. MORROW.

P. S.—Please return letter.

M.

[Inclosure in Mr. Morrow's letter.]

SAN FRANCISCO,
December 11, 1888.

DEAR SIR: There is a friend of mine by the name of Kutner who is a Polish Jew, a man of large wealth here, who has much business in Fresno County, and is a Republican and an admirer of yours.

He left Poland, that part which is a province of the Russian Empire, about thirty-five years ago, when he was not more than sixteen years of age, and for many years has been a citizen of the United States. He now desires, with his family, to revisit that country, and particularly the city of Warsaw. He wishes, if possible, to get from the Russian Government through its minister at Washington, a safe conduct to visit his native land unmolested, from any obligation to serve in the military service, and which will pardon him for any supposed violation of his duty from a Russian standpoint. Can you see the proper officer at Washington, and ascertain if he can obtain such a paper? By so doing you will confer a favor upon me and a worthy constituent of your own. Mr. K. is of the firm of Kutner & Goldstein, and has his office with Porter, Slesswiger & Co., on Front street. Your kind attention to this matter will greatly oblige us.

I am your friend and obedient servant,

H. S. FOOTE.

Hon. W. W. MORROW, *M. C.*

No. 24.

Baron Rosen to Mr. Bayard.

IMPERIAL RUSSIAN LEGATION,
Washington December 16 [28], 1888.

SIR: I have the honor to acknowledge the receipt of your note of yesterday's date, accompanied by a letter from the Hon. H. S. Foote, of San Francisco, to the Hon. W. W. Morrow, a member of Congress from California, asking whether this legation can give a safe conduct to a Mr. Kutner, a Hebrew and a native of Russian Poland, to enable him to return to his native place.

In reply to Mr. Foote's inquiries I have to say that this legation has no power to grant any such safe conduct or permission.

I would add that it is open to Mr. Kutner to petition the minister of the interior for the permission he seeks.

I am, etc.,

ROSEN.

P. S.—Mr. Foote's letter is returned herewith.

u. i. l.,

ROSEN.

No. 25.

Mr. Bayard to Mr. Tree.

No. 5.] DEPARTMENT OF STATE,
Washington, January 2, 1889.

SIR: On the 3d of December, 1888, Mr. Henry L. Muldrow, the Assistant Secretary of the Interior, wrote to the Department transmitting a letter from the Hon. Henry S. Foote, one of the commissioners of the supreme court of California, inquiring what steps might be necessary to obtain from the Russian Government permission for a native of Russian Poland, who left that country thirty-five years ago and now resides in California, to revisit his native land without molestation.

On the assumption that the person in question had become a citizen of the United States, Mr. Muldrow was informed on the 7th of the same

month, that the good offices of the minister of the United States at St. Petersburg might, under the circumstances narrated, be availed of to present to the Russian Government unofficially a statement of the facts with a favorable recommendation; but that, in order to effect this, it would be necessary for the applicant to furnish to this Department a formal statement of his case, duly verified by affidavit, with proof of his American citizenship.

In accordance with this suggestion, Mr. Muldrow has now sent to the Department, under date of the 27th ultimo, a petition from Mr. Adolph Kutner, the person in question, together with a duplicate of his certificate of naturalization, and a further letter from Mr. Foote in regard to the subject.

On the 27th of December, the Department having also received from Mr. Morrow, a Member of Congress from California, a communication on the subject, addressed inquiries to the Russian legation in this city, asking whether they could furnish a safe conduct for Mr. Kutner to enable him to return to his native place. In reply the Department received from Baron Rosen, the Russian chargé d'affaires at this capital, a note stating that his legation had no power to issue such safe conduct; but adding that it was open to Mr. Kutner to petition the minister of the interior for the permission he sought.

The whole correspondence is now transmitted to you with instructions to bring the matter unofficially to the attention of the Russian authorities, urging the exceptional circumstances of the case, the departure of the applicant from Russia at an early age, his long residence in the United States, the good character which he appears to bear in the State of his residence, and the temporary nature of his intended visit to Poland.

I am, etc.,

T. F. BAYARD.

[Inclosure 1 in No. 5.]

Mr. Muldrow to Mr. Bayard.

DEPARTMENT OF THE INTERIOR,
Washington, December 3, 1888.

SIR: I have the honor to inclose herewith a personal letter from a friend in California. I will be obliged if you will give me such information upon the subject thereof as will enable me to reply to him satisfactorily.

Very truly yours,

H. L. MULDROW.

[Inclosure in Mr. Muldrow's letter.]

SAN FRANCISCO, *November* 26, 1888.

DEAR SIR: There is an esteemed friend of mine here at Fresno, in California, who is a banker and a man of wealth. He has been especially kind to Mississippi boys who have come out here, and I have gotten him to give them employment. He is from Russian Poland; left there when he was sixteen years of age, thirty-five years ago.

He is afraid that he may be subjected to military service should he return, and for that reason wishes to get an amnesty or pardon from the Russian Government for avoidance of military duty, and permission to revisit his native land, free from molestation, and allowed to return.

Can you tell me of any method by which such a thing can be accomplished? The man is willing to pay whatever may become necessary in a square way to get the necessary papers. I write you as a friend, not as an official.

I am yours ever,

H. S. FOOTE.

HON. HENRY L. MULDROW, etc.

[Inclosure 2 in No. 5.]

Mr. Rives to Mr. Muldrow.

DEPARTMENT OF STATE,
Washington, December 7, 1888.

SIR: I have to acknowledge the receipt of your letter of the 3d instant, in which you enclose a letter from the Hon. Henry S. Foote, one of the commissioners of the supreme court of California, who inquires as to what steps may be necessary to obtain from the Russian Government permission for a native of Russian Poland, who left that country thirty-five years ago and now resides in California, where he is engaged in business, to revisit his native land without molestation.

It is presumed that the person in question has become a citizen of the United States. If this be so, the good offices of our minister at St. Petersburg might, under the circumstances narrated to you, be availed of in presenting to the Russian Government, unofficially, a statement of the facts, with a favorable recommendation. In order that this might be done, it would be necessary for the applicant to furnish to this Department, a formal statement of his case duly verified by affidavit with proof of his American citizenship.

* * * * * * *

I have the honor to be, sir, etc.,

G. L. RIVES.

[Inclosure 3 in No. 5.]

Mr. Muldrow to Mr. Bayard.

WASHINGTON, *December 27*, 1888.

SIR: Referring to my communication of December 3, 1888, enclosing letter from Hon. Henry S. Foote, of San Francisco, California, asking your intercession in behalf of Mr. A. Kutner, a native of Russian Polland, but a naturalized citizen of the United States, who left Europe at the age of sixteen, and has resided in this country for the last thirty-five years, and who desires to visit his family in the home of his childhood, I would respectfully submit the inclosed certificate of naturalization of the applicant and the accompanying petition asking your unofficial intercession in his behalf.

Very respectfully yours,

H. L. MULDROW.

[Inclosure in Mr. Muldrow's letter]

SAN FRANCISCO, *December 18*, 1888.

DEAR SIR: I am under deep obligation to you for your prompt application to the State Department, in pursuance of an inquiry I lately addressed you relative to the revisiting of Mr. A. Kutner of his native province of Russian Poland. I inclose to you a petition sworn to by Mr. Kutner, and addressed to the honorable Secretary of State, with his certificate of naturalization as a citizen of the United States, and of the State of California. I would further state that Mr. Kutner is a law-abiding citizen, of Hebrew birth in the Guberina of Warsbaoska in Russian Poland. That he came to this country when sixteen years of age, and has by industry and honesty attained wealth and a high character for probity and honor. His only reason for revisiting his native land is to see his relations there, and to conduct himself in all respects as an American citizen should under such circumstances, if the Russian Government shall be graciously pleased to accord him permission (without any molestation for any supposed violation of his duty as a subject in leaving that Empire at the early age of sixteen years, and residing in the United States of America for the past thirty-five years) to revisit the land of his birth.

I desire through you and for Mr. Kutner, to solicit the good offices of our Government in behalf of this estimable man, to be exercised towards the ruling powers of the Russian Government in his behalf in an unofficial manner, to the end that his request and entreaty may be allowed.

I am, etc.,

HENRY S. FOOTE.

Hon. H. L. MULDROW, etc.

N. B.—I earnestly request that this matter may be pressed to an early conclusion, as Mr. Kutner will sail from New York for Europe in March, and, unless this amnesty is accorded him, will not be able to visit his relations at all, as without permission he could not do.

H. S. F.

[Inclosure 1 in Mr. Foote's letter.]

UNITED STATES OF AMERICA, STATE OF CALIFORNIA,
City and county of San Francisco, ss:

Be it remembered that on the sixth day of September, in the year of our Lord one thousand eight hundred and fifty-nine, Adolph Kutner, formerly of Wierbchow, Russia, appeared in the fourth judicial district court of the State of California, held in the city and county of San Francisco (a court of record having common law jurisdiction, a clerk, and a seal), and applied to the said court to be admitted to become a citizen of the United States of America, pursuant to the provisions of the several acts of Congress of the United States of America for that purpose made and provided. And the said applicant having produced to the said court such evidence, having made such declaration and renunciation, and having taken such oaths as are by the said acts required:

Therenpon it was ordered by the court that the said applicant be admitted, and he was accordingly admitted to be a citizen of the United States of America.

In testimony whereof the seal of the superior court is hereunto affixed [said court being the successor of said district court] this eighteenth day of December, one thousand eight hundred and eighty-eight, and in the one hundred and thirteenth year of the independence of the United States.

Per Curiam.

[SEAL.]

WM. J. RUDDICK, *Clerk.*
By J. B. MARTIN, *Deputy Clerk.*

[Inclosure 2 in Mr. Foote's letter.]

Hon. THOMAS F. BAYARD,
Secretary of State of the Government of the United States of America.

Your petitioner, Adolph Kutner, born a citizen of Russian Poland, in the Guberina Warbaoska, would respectfully represent, that some time about the year A. D. 1853, when he was of the age of sixteen years, he emigrated to the United States of America, and on the 9th day of September, A. D. 1859, he was duly naturalized and thenceforward became a lawful citizen of the United States aforesaid, and of the State of California.

He is now engaged in merchandising in said last mentioned State, and is desirous of being permitted to return to that part of Russian Poland in which is situated the city of Warsaw, in order that he and his wife and children who may accompany him may be permitted to revisit their relatives and friends.

His desire is simply to make this visit of a few weeks, or such other short time as may be accorded to him by the Government of His Majesty the Emperor of Russia.

He wishes to travel unmolested through the dominions of His Majesty as aforesaid, both going and returning, and to sojourn for a short time in Russian Poland unmolested and free from any duty of a military or other character which might be esteemed on the part of the Russian Government to be due from him as a person born within the dominion of the Russian Empire.

His only wish being to conduct himself in all respects as a peaceful and law abiding American citizen, loving the land of his birth, and his relations there, and wishing to enjoy their society for a brief season at a time when old age is creeping fast upon him.

If it please the Honorable Secretary, as the representative of the State Department of the Government of the United States, under the direction and permission of his Excellency the President of the United States, and under the permissive laws of the Congress, to request from the government of his Majesty the Emperor of Russia, that he will extend a gracious permission to your petitioner to revisit as heretofore set forth, unmolested, the land of his birth, and to return free from arrest or interference as a law abiding citizen of the United States, your petitioner will rest under a great load of gratitude and respect.

And your petitioner will ever pray, etc.

ADOLPH KUTNER,

Subscribed and sworn to before me, at San Francisco, California, December 18, 1888.

[SEAL.]

GEORGE T. KNOX,
Notary Public.

No. 26.

Mr. Tree to Mr. Bayard.

No. 13.] LEGATION OF THE UNITED STATES,
St. Petersburg, February 1, 1889. (Received, February 18.)

SIR: I have the honor to acknowledge the receipt of your instruction No. 5, of the 2d ultimo, with reference to the visit which Mr. Adolph Kutner, a former Russian subject, desires to make his native country with his family, if unmolested by the Russian authorities.

I have sounded Mr. de Vlangaly, the adjunct of the ministry of foreign affairs, and he advised that a note be addressed to the minister, giving the points of the case, who would refer it to the minister of the interior, under whose jurisdiction such matters come, with a recommendation for the indulgence of the Imperial Government.

Mr. de Vlangaly also expressed the opinion that unless something comes out in the investigation into the antecedents of Kutner, the desired permission to make a visit to Poland may be granted.

I have, therefore, addressed an informal note to Mr. de Giers concisely stating the facts and expressing the hope that Mr. Kutner's wish may be gratified. I inclose a copy of the note herewith. I do not well see that anything more can be done in the matter at present.

I have, etc.,

LAMBERT TREE.

[Inclosure.]

Mr. Tree to Mr. de Giers.

LEGATION OF THE UNITED STATES,
St. Petersburg, February 1 [*January* 20], 1889.

YOUR EXCELLENCY: I venture informally to bespeak the good offices of Your Excellency on behalf of Mr. Adolph Kutner, who was born in the Guberina Warbaoska Russian Poland, left there about the year 1853 when sixteen years old, has been since residing in California, of which State, under our law, he became a naturalized citizen on the 9th of September, 1859, and who now desires to return for a few weeks to that part of Russian Poland in which the city of Warsaw is situated with his wife and children to visit his relatives and friends who may still survive.

Mr. Kutner is now a banker at San Francisco. He has acquired wealth and the esteem of the community in which he resides. The highest testimonials as to his character and standing have been forwarded to me with his request for permission to come to and return from Poland unmolested after such sojourn as it may please the Imperial Government to grant to him.

I should be very much pleased if Mr. Kutner's wish could be gratified.

I profit by the occasion to renew, etc.,

LAMBERT TREE.

No. 27.

M. Powdermaker to Mr. Blaine.

PHILADELPHIA, *March* 11, 1889.

DEAR SIR: I beg to inclose you a clipping from a Philadelphia paper, relating to Herman Kempinski (a school friend of mine) doomed to exile in Siberia. He being an American citizen, I presume you are aware of the facts in the case, and have no doubt you will do what is proper to uphold the honor of American citizenship and defend his

rights abroad, particularly as he holds the passports of his adopted country, issued to himself and family by ex-Secretary of State Mr. Bayard, and trust you will make a formal demand of the Russian minister at Washington for his release.

The idea of subjecting an American citizen to such a fearful fate as banishment to exile in Siberia is an outrage on the national honor which should demand immediate action.

He is entitled to the protection guarantied him in his passport, and I pray you to use your utmost influence in this matter, and your humble servant will be forever thankful to you, sir.

Yours, very respectfully,

M. POWDERMAKER.

S.

P. S.—The town where Kempinski is incarcerated at present is Konin, Guberina Wabaoska, Russian Poland.

[Inclosure.]

DOOMED TO EXILE IN SIBERIA.—INTERNATIONAL COMPLICATIONS MAY RESULT OVER A BRIDGEPORT RESIDENT.

BRIDGEPORT, CONN., *February* 26.

From a letter received Saturday night by Samuel Loewith, an agent for German steam-ship lines here, it appears that Herman Kempinski, formerly a resident of this city, has been imprisoned in Russia, is condemned to exile in Siberia, and is awaiting banishment to that dreary country.

From the purport of the letter, which was penned by the wife of the unfortunate man, the charges against Kempinski are evasion of the military service required of every Russian subject. Kempinski was born in Russsia but left that country at the age of seventeen, knowing that he was a military subject, and that his departure entailed penalties.

He came to New York City, and found his way West, finally settling among friends from Russia who had preceded him in Peoria, Ill. In 1873 he came to this city and engaged as a grocer's agent, buying in New York for regular dealers here. He was naturalized and became a citizen of the United States in 1875; voted in 1876 for President, again in 1880 and 1884, and exercised all the rights as a suffragist. He was well known here and in the vicinity as an enterprising, honest man.

In April, 1888, Kempinski closed his business, and accompanied by his wife and two children, started to visit his parents in the town of Konin, Russia, arriving safely. It is said that, being an American citizen, he felt no fear that his alleged crime of evading military duty in his youth would now be remembered against him, but he was mistaken. On the day before last Christmas, at his father's house, while preparations for the great festival were in progress, officials descended upon him, arrested and placed him in prison. The first news of this affair reaching here had coupled with it the assertion that the prisoner had uttered treasonable remarks against the Russian Government, but proved to be groundless, the only charge upon which the arrest was made and the awful fate pronounced being that already stated. The date fixed for the banishment is May 1, 1889. Mrs. Kempinski writes that she has exhausted all the means in her possession to effect the release of her husband, and that unless she is aided by friends, the edict of the Russian court will be executed on the date named. From this it would appear that the only recourse now left is with the Government of the United States.

Secretary Bayard issued passports to Kempinski and his family when they sailed from New York, but in the short time now remaining to him in office, it is doubtful if anything can be done until after March 4, and his successor is appointed.

Messrs. Loewith and Bernard Klein, warm friends of the condemned man, will visit Washington during inauguration week and remain until some course of action is deided on, as it is now conceded that only through the Secretary of the United States an any show of relief for the man be assured.

No. 28.

Mr. Klein to Mr. Blai

To the honorable Department of State, Washington, D. C.:

The petition of Herman Kempinski, of the city of Bridgeport, county of Fairfield, and State of Connecticut, by his attorney, Jacob B. Klein, of said Bridgeport, respectfully represents: That he was born in Konin, in the Empire of Russia, in the year 1854. That in July of year 1872 he left Russia and came to the United States, arriving at New York City July 24, 1872, and immediately came to Bridgeport, Conn., and remained there for about eleven months. At the end of said time he went to Peoria, in the State of Illinois, where he was married on or about August of the summer of 1873. He remained there until the spring of 1874, when he removed to Bridgeport, Conn., with his wife, and resided there since that date until on or about May 12, 1888. From the time of his arrival in Bridgeport, Conn., to the date of his departure for Russia he had in every way conducted himself as a worthy and exemplary citizen. He was in the mercantile business, and by close attention thereto had saved quite a sum of money. He has two children, Sadie, aged about twelve years, and Belle, aged eight years, both of which were born in this city. On the 7th of November, 1875, he was initiated into Stuben Lodge No. 83, Independent Order of Odd Fellows, and on April 28, 1875, he became a member of Abraham Lodge No. 89, Independent Order B'nai B'rith, of which two great benevolent orders he is still a member in good standing.

On February 28, 1883, he appeared before the court of common pleas for Fairfield County, in session at Bridgeport, in said State of Connecticut, the same being a court of record, and on oath did declare that it was bona fide his intention to become a citizen of the United States and to renounce all allegiance and fidelity [to] every foreign prince, potentate, state, and sovereignty, whatever, and particularly to the sovereign of Russia (declaration annexed). On the 27th day of January, 1888, he again appeared before said court, on oath did absolutely and entirely renounce and adjure all allegiance and fidelity to every foreign prince, potentate, state, and sovereignty whatever, and he also declared on oath that he would support the Constitution of the United States of America (exhibit annexed), and thereupon by act of said court was made a naturalized citizen of the United States. He was made an elector of the town of Bridgeport, March 24, 1888, and voted at the annual municipal election held the 2d day of April, 1888, casting his ballot in Ward One. (See exhibit annexed.) That for some months prior to the 1st of January, 1888, his parents, who are residing in Konin, Russia, had written to him asking and requesting that he and his family, consisting of a wife and two minor children, visit them before they (his parents, and who were quite aged) died. With this idea in view only, to wit: to visit his parents, he procured tickets for himself, wife, and two children, on or about May 12, 1888, for the steamer *Hammonia*, of the Hamburg-American Packet Line Company, and sailed from New York May 31, 1888. Prior to this, however, in April, 1888, he made application to the honorable Department of State for a passport giving such facts as were requisite and the same was issued and granted to him, being duly signed by the Hon. Thomas F. Bayard, then Secretary of State. After the usual length of time required for his journey he arrived at Konin, Russia, his native city. His intention was to return to this country in the course of a few months, but at the urgent solicita-

tion of his parents decided to remain until May, 1889. At no time during his absence has he intended to remain abroad, but has at all times intended to return to this country and remain a citizen thereof.

In fact he often stated to the undersigned, during the course of a number of conversations had with him, the said undersigned, that he (Kempinski) intended returning before the Presidential election of 1888, and just prior to his leaving for Russia instituted a suit in assumpsit against one Peter Brown in this city, which said suit is now pending before the court of common pleas for Fairfield County, and appears upon the docket of said court. (See exhibit annexed hereto.)

He also left with the undersigned, just prior to his departure, a number of accounts to be collected, and told the undersigned to keep the avails therefrom until his said return, and not to send it to him at Russia, for he intended and expected to return before November 1, 1888. On the 24th of December, 1888, he was arrested by the Russian authorities at Konin and taken to Kalisch and imprisoned, where he is at present held, for the reason, as the undersigned is informed (see letter addressed S. Loewith, herewith annexed), for not reporting for military duty after his arrival into the United States. He is to remain at Kalisch until May 1, 1889, and without even the semblance of a trial, is to be exiled to Siberia May 1, 1889, unless this Government interferes. His wife has expended almost all of her means to procure his release, but so far without success.

The undersigned would most earnestly and respectfully ask this honorable Department to use its utmost endeavors so as to procure the immediate release of the said Kempinski, so as to allow him to return to the country of his adoption.

JACOB B. KLEIN.

Witnesses:
WILLIAM CROUCH.
THEODORE HUGO.

STATE OF CONNECTICUT, *County of Fairfield, ss:*

BRIDGEPORT, *March* 12, *A. D.* 1889.

On this day personally appeared Jacob B. Klein, who, after having read the above, made solemn oath that the statements of facts therein contained are true, to the best of his information, knowledge and belief.

Before me:

[SEAL.] SIGMUND LOEWITH,
Notary Public for the State of Connecticut,
residing in the town of Bridgeport.

[Inclosure 1.]

STATE OF CONNECTICUT, *County of Fairfield, ss:*

BRIDGEPORT, *March* 12, 1889.

On this 12th day of March, A. D. 1889, personally appeared before me, a notary public in and for the aforesaid county and State, duly authorized to administer oaths, Sigmund Loewith, aged thirty-four years, a resident of Bridgeport, in the county and State aforesaid, whose post-office address is 33 Bank street, in said Bridgeport, and who, being duly sworn, deposes and says:

That he is well and personally acquainted with Herman Kempinski, who is now imprisoned in Kalisch, Russia, and has been for the past sixteen years; that he well remembers when said Kempinski first arrived in Bridgeport from Europe, and that said Kempinski left the city, and after a few months of absence he again returned here and brought a wife with him, and remained here until about May 15, 1888, when he made preparations for a visit to Europe. During all the sixteen years' acquaintance with said Kempinski affiant saw him nearly every day, and always found him to be a worthy and honorable law-abiding citizen.

Deponent further says that some time during the month of March, 1888, said Kempinski called on affiant, who is agent for European steam-ship companies in this city, for information in regard to purchasing passage on the Hamburg line steamers for Europe. Deponent asked Kempinski, "Do you really mean to go to Europe?" Kempinski answered, "Yes. Just look at and read this letter; you will see what my parents say, and if you were in my place would you not go to Europe also and satisfy the wish of your parents?" Deponent answered, "I do not care to read the letter; I am satisfied with what you say is true, and I would always satisfy and fulfill the wish of my parents." Deponent then asked Kempinski how long he intended to remain in Europe, whereupon he answered: "I think you will see me again before the Presidential election of 1888, in time to vote. Should I not come then, I will surely be with you at Bridgeport very soon thereafter."

Deponent further says that on the 12th day of May, 1888, said Kempinski called at his office and purchased passage for himself, his wife, and his two children for Hamburg, to sail on board the steam-ship *Hammonia* on the 31st day of May, 1888. At the same time made arrangements as to how he should telegraph to deponent in case he wished to have return passage tickets sent to him to Russia.

Deponent said: "You telegraph me thus: 'Loewith, Bridgeport, Conn., America. Send tickets.'" At the same time Kempinski said: "You watch for a telegram about October next."

Deponent further says that on the 31st day of May, 1888, he was aboard the steamship *Hammonia*, of the Hamburg line, at her dock in Hoboken, N. J., and saw Kempinski and his family until the steamer left the dock, and the last words Kempinski said to him were: "In six months, or sooner, you can meet me here again. Farewell." Since Kempinski is in Europe, deponent received several letters from him, which are hereto annexed, and in every one he asked deponent to send to him (Kempinski) the cabin plans and price-lists of the Hamburg and Bremen steamers for return passages, so that he could secure room in a good location on the steamer.

Deponent further says that Kempinski told him that during his absence he would leave his business, which he had left unfinished, in the hands of his attorney, J. B. Klein, to attend to.

On this 12th day of March, 1889, before me, the subscriber, a notary public in and for the State of Connecticut, residing in said Bridgeport, personally came William Crouch, of said Bridgeport, who, being of lawful age, after being cautioned and sworn, did depose and say: That he has been acquainted and personally known Herman Kempinski, of Bridgeport, Conn., now imprisoned at Kalisch, Russia, for the past twelve years.

That in March, 1888, he was acting as one of the registrars of Ward One in the city of Bridgeport.

That while engaged in said registration during said month of March, 1888, he called at the house of Herman Kempinski, at which time the said Kempinski in substance told him that he was going with his family to visit his parents in Russia, but that he would return to take part in the Presidential election of that year without fail.

STATE OF CONNECTICUT, *County of New Haven, ss:*

On this 12th day of March, A. D. 1889, personally appeared before me, a notary public in and for the State of Connecticut, duly authorized to administer oaths, Annie, wife of Henry Rogowski, aged thirty-three years, a resident of New Haven, in the county of New Haven and the State of Connecticut, whose post-office address is No. 36 Whitney avenue, New Haven, Conn., and who being duly sworn declares as follows:

That she is well and personally acquainted with Herman Kempinski, who is now imprisoned at Kalish, Russia, a citizen of Bridgeport, Conn., for the past seventeen years; has first met him at Konin, Russia, while on the way to America on or about the 2d of July, 1872, whence they sailed for the United States on the steam-ship *Holsatia*, of the Hamburg line, and arrived at New York on the 24th day of July, 1872, and the next day they went to Bridgeport, Conn., where said Kempinski remained about eleven months; during all that time, while in said Bridgeport, Kempinski was employed at the Howe Sewing Machine Manufacturing Company's and boarded with affiant's brother, Mr. Max Kantrowitz, who now resides in New York City. Said Kempinski left Bridgeport about June, 1873, and went to Peoria, Ill., where he married his wife, and in the spring of 1874 said Kempinski with his wife returned to Bridgeport, Conn., again. Affiant met said Kempinski quite often then, and knows that he resided in Bridgeport until May, 1888. She further declares that said Kempinski was about seventeen years old when she first met him at said Konin, Russia; she derived her knowledge as to his age by his telling her at the time they traveled to this country.

Deponent further declares that some time during the winter of 1888 said Kempinski visited her at her residence at New Haven, and told her that he received a letter from his parents wherein they urged him to come to visit them, before they die, and that he would go as soon as he could sell out his business, and that he would sell all his household goods if he could get fair compensation, and if not, he would store it until he would return again to Bridgeport, in about six months or sooner, should he not like it in Europe while on this visit.

Deponent further declares that some time during the month of April, 1888, said Kempinski called at her residence again, for the purpose of bidding her farewell, and at the same time again said that "within six months you will see me here again." He also said that he was offered good prices for his household goods, and that he has sold them nearly all, and that his business and his stock of goods had also been nearly disposed of.

BRIDGEPORT, *March* 12, *A. D.* 1889.

On this 12th day of March, 1889, before, me the subscriber, a notary public for the State of Connecticut residing in said Bridgeport, personally came Peter Dusch, of said Bridgeport, of lawful age. who being duly cautioned and sworn did depose and say: That he is the Secretary of Steuben Lodge, No. 83, of Bridgeport, Conn., Independent Order of Odd Fellows, and that he has known Herman Kempinski, of Bridgeport, now imprisoned at Kalish, Russia, for the past fourteen years. That the said Kempinski was proposed for membership in Steuben Lodge in September, 1875, and received the third degree November 7, 1875, thereby becoming a regular member of said lodge, and is in good standing as such to-day, as appears by the records and minutes of said lodge.

PETER DUSCH.

In the presence of—
J. B. KLEIN.
FRANK C. BENNET.

Sworn to and subscribed before me this 12th day of March, A. D. 1889.

[SEAL.]

JACOB B. KLEIN,
Notary Public for the State of Connecticut, residing in the town of Bridgeport.

[Inclosure 10.]

UNITED STATES OF AMERICA.
State of Connecticut, County of Fairfield, ss:

At a court of common pleas, holden in and for the county of Fairfield, in said State of Connecticut:

Be it remembered, that on the 27th day of January, A. D. 1888, Herman Kempinski, of Bridgeport, in said county, appeared before said court, the same being a court of record, with common law jurisdiction, a clerk, and a seal, and made application to said court to become a citizen of the United States. And upon examination first had, it being made to appear, and this court having found to their satisfaction, that the said applicant is a free male person of lawful age, an alien and subject of the sovereign of Russia; that he was born within the dominions of said sovereign; that he has resided in the United States constantly for more than five years last past, and in said State of Connecticut for more than one year last past, and that he has during all said time behaved himself as a good citizen, has a good, moral character, and is attached to the principles of the Constitution of the United States, and well disposed to the good order and happiness of the same. It also appearing to this court that said applicant, did pursuant to the laws of the United States, more than two years before this application, appear before this court, the same being a court of record with common law jurisdiction, a clerk and seal, and on oath did declare that it was his bona fide intention to become a citizen of the United States, and to renounce all allegiance and fidelity to every foreign prince, potentate, state, and sovereignty whatever, and particularly to the sovereign above named, as by the record of said court appears.

And the said applicant, now here in this court, declares on oath that he doth absolutely and entirely renounce and abjure all allegiance and fidelity to every foreign prince, potentate, state, and sovereignty whatever, and particularly to the sovereign above named, of whom he is now a subject; and he also declares on oath that he will support the Constitution of the United States of America.

Wherefore the said applicant is hereby by this court admitted and declared to be a citizen of the United States of America.

WM. R. SHELTON,
Clerk.

I, the undersigned, clerk of the court of common pleas in and for said county, hereby certify that the foregoing is a true copy of record.

In witness whereof I hereunto set my hand and the seal of said court, the 28th day of February, 1889.

[SEAL.]

WM. R. SHELTON,
Clerk.

[Inclosure 11.]

TOWN CLERK'S OFFICE, *Bridgeport, March* 12, 1889.

I hereby certify that Herman Kempinski was admitted an elector of the State of Connecticut on the 24th day of March, 1888, as appears on the records of the town of Bridgeport.

In testimony whereof I have hereunto set my hand and affixed my official seal, this 12th day of March, 1889.

Attest:

[SEAL.]

GEORGE WATSON,
Town Clerk of the Town of Bridgeport.

[Inclosure 12.]

STATE OF CONNECTICUT, *County of Fairfield, County Clerk's Office:*

I, Samuel B. Sumner, clerk of said Fairfield County, and of the superior court in and for said county, the same being a court of record, hereby certify:

That Jacob B. Klein and Sigmund Loewith, esqs., were on the 1st day of February, 1889, duly qualified as notary publics within and for said county, having full power and authority by the laws of this State to take the acknowledgement of deeds and other instruments, and to certify the same; also to administer oaths, to take affidavits and depositions out of court, and to give certificates thereof; that full faith and credit may and ought to be given to their official acts and attestations; that I am acquainted with their handwriting, and verily believe that the signatures hereto annexed, purporting to be theirs, are their genuine official signatures, and that their terms of office will expire on the 1st day of February, 1891.

In testimony whereof, I have hereunto set my hand and affixed the seal of said court at Bridgeport, in said county and State, on the 13th day of March, 1889.

[SEAL.] SAM. B. SUMNER,
Clerk.

[Inclosure 13.]

Hon. JAMES G. BLAINE, *Secretary of State:*

We, the undersigned citizens of the town of Bridgeport, County of Fairfield, and State of Connecticut, respectfully represent that we have known Herman Kempinski as a resident of said town of Bridgeport since 1873, and can certify that during all of said period he has sustained a good moral character, and has in every respect deported himself as a good citizen and loyal subject of United States Government. We are informed and believe that the statements made by him in his petition to the Department of State in relation to his seizure and imprisonment in a foreign land are strictly true, and that his application for relief is worthy of your immediate attention. We therefore respectfully and earnestly petition that your honorable Department will take the matter under careful consideration, and adopt such measures as may secure the release of Mr. Kempinski from further confinement and vindicate our national honor.

Dated Bridgeport, Conn., March 12, 1889.

Patrick Coughlin, mayor; Christopher A. Mooney, city clerk; Bernard Keating, city auditor; D. C. Peck, first selectman; George Watson, town clerk of Bridgeport, Conn.; Morris B. KONIN, *December* 16, 1888.

Messrs. E. T. LINEHAM:

GENTLEMEN: Your letter at hand. In reply would simply state that I was very happy to hear the encouraging news, first, Eugine being married, to this I send him my best wishes and congratulate him; second, that you are doing a good business; third, that you, friend Jimmie, was lucky enough not to bet on the election. Above all, where are the Democrats? However, they had a sweet but a short life of it. Well, Jimmie, it was God's will, so we can not help it, and we got to be contented. Was very sorry to hear of Mr. Connan's misfortune. If he was as careful as you are, friend Jimmie, he would kept his wealth and knew with whom he dealt. O! Jimmie, how I would like to be there now, even if I only had Vanderbilt's fortune, only to be there, this life here is no life at all. Jimmie, keep only a good order for me, you know business is business; I will come back as poor as a church mouse. The Russian bear ruined me since my being here. I received two B'port Farmers, and I am only too anxious to read those newspapers which you mentioned for which I thank you already. If, with the help of God, I will get to the old B'port safe again I will have lots of news to tell you, for which paper would not be enough, what I went through since I got to this dam country, but after all I have to stand it until next May, please God, then I will bid them good-bye, and will remain an American citizen. Hurrah for the Stars and Stripes! It is the glorious country. Would like to send you some news form here, but there is no newspapers in circulation. With this, friend Jimmie, I will close for this time, with best regards to you, also Eugine and lady, and all my friends. If you have any occasion to see Mrs. George Curtis extend my best regards. I have no more news for this time, but by next time I hope I will have more to write you.

I hope you all had a very pleasant Thanksgiving, and enjoyed yourselves with the turkey dinner. I and my family wish you all a merry, merry Christmas, and also a happy New Year, and have good luck for the new year. I and my family are all well, and hope you are all the same. Please let us know all the news from there that you can, and how the weather is there; the weather here is very unpleasant, but no snow yet. I hope we will have a pleasant winter for my sake, so it will go by quick. Again we all send our best regards to you and all, also all my friends. I have no more to say at present time, only my children is very lonesome; they say this is a healthy country, indeed, and have nothing to do but laugh over everything they see here. Please be so kind and send me a book of court-plaster. I will pay you when I get back. You do not get anything like it here. By right you might as well say you do not get anything here. Please do not forget the big order I send you. Again I say, hurrah for the Stars and Stripes! Good bye for this time.

I remain, your sincere friend,

HERMAN KEMPINSKI,
In Konin, Per Posen, Rush Polen.

Please extend my best regards to Peter E. Smith, and also Frank Smith, and for them to give my regards to Wolfronn Bros., Lieberum Bros., and Mr. L. Held, and also Mr. Long and family.

[Inclosure C.]

KONIN, *October* 18, 1888.

Mr. E. and J. LINEHAN:

GENTLEMEN: I suppose you will be quite surprised, after me being away four months, and only now have spared time to write you these few lines and let you know about our European trip, which was not a very successful one. To tell you all about it would take up too much of your time, which I am in hopes you have none to spare, busy selling groceries. In this part of the world there are different people from the American people. There is no honesty and no friendship here; in one word, they are a set of robbers, so you may know how well I like it here. I am only wishing for the time to come that the Lord may bring us safe across back to the old home, Bridgeport; then it will be enough European trips for us. News I have none to tell, only times here are miserable. Living is cheap, but nothing to get it with. We go

around in different parts of the country, but there is misery wherever we go. People here are very unfriendly and also very unkind; they would not do a favor for any one if they was to die. I wish I was settled in my own home already. It will be a good deal of work before I will see all that again done; it will take some time till that will be done. The weather here is very unpleasant, cool, chilly, rainy, and stormy; it rains the whole week. It is very cold for this month. I have no more news at present, and I hope by next year this time I will see you all ready, sure. I am sure of it. I do not intend to stay here by any means. I wish I never came here. Let us know how everything is getting along there, and how everything is, and also how the weather is there. Let us know all the news there you only can think of. We are glad when we get a letter to read, to have something to do—nothing to read or anything else. I have no more news at present. I would like to know how everything is. I would like to shake hands with you already on our arrival there. I wish it was to-day already, I would not care a bit; better to-day than to-morrow. We are all well and hope you are all the same. Next summer we will be a great deal happier than we are now, because we will be in our own home. I have no more to say. We all send our best regards to all, also to all that may ask for us. This is all for now, so good-bye. Hurrah for America! Three cheers for the Red, White, and Blue! There is no better place in the whole world. Three cheers, again, for the Red, White, and Blue! Hurrah for America! Please answer as soon as possible.

I remain, your true friend,

HERMAN KEMPINSKI.

Address: In Konin, per Posen, Rush Polen.

DEAR FRIENDS: I wish I could send you a steamer of potatoes and cabbage. In our money it is about ten cents a bushel. Please extend my best regards to Mr. Haugh and family; also John J. Rybur and family, Blakemen Bros., Shepherd, John P. Logan, John Rencle, P. Kelly, C. Dwyer, Mrs. McGovern and family, if not too much trouble, P. Lyons Ayers.

KALISCH, *February* 7, 1889.

Messrs. E. J. LINEHAN:

DEAR FRIENDS: Your letter reached me in great misfortune, which I am very sorry to say. I was here six months and the soldiers did not do me anything. I thought I was free, but all at once they took me and locked me up on the 24th of Dec. and I am sitting yet. My family does all they can for me and we have hopes, but God knows if I will ever get free. I am half dead already. I can not stand it much longer. I expected to get ready, now, to come back with my family, if I did not have such a misfortune, but I hope everything will turn out all right, so I will be able to see you again with my family, happy once more. If there is anything to do for me, please let me know immediately. Please excuse me for not answering your letter so long, but as misfortune happened I could not help myself. I have no more news at present, only I remain, with best regards, to you; also family. My family sends their best regards to all, and hope you are all well. Please answer me immediately.

I remain, your true friend,

HERMAN KEMPINSKI.

Address: Please answer this letter to M. J. Reichmann, in Kalisch, in care of H. Kempinski.

KALISCH, *February* 7, 1889.

Mr. LOEWITH:

Your letter has reached me in great misfortune, which I am very sorry to say. My husband was here six months and they did not do him anything. We thought he was free from the soldiers, but all at once they took him and arrested him on the 24th of December and he is sitting yet. We try all we can and have hopes, but we do not know how it will turn out yet—God knows. He is to sit until the 1st of May and then to send him off to Siberia to live there. When he gets there he is free, but till he gets there takes a long time; he would not live to get there. God forbid it should come so far. Dear friend Mr. Loewith, please be so kind and do me this favor and find out if there is not something there to do for my husband. Write to Washington and find out all you can and try to save him from such a great misfortune, and also his family two little children. What will I do with myself? My children is almost crazy; you would not know them if you seen them, they look so bad. Our pleasure trip is now to go to the prison with the eating every day, and when we get there he does not touch it; he is half dead; you would not know him; he is very dangerous sick. Please be so kind and find out all the particulars and write me an answer at once.

I will wait for your answer so I will know what to do here. Find out as quick as possible and answer immediately what I shall do—the quicker the better; so much less he will need to sit. If it goes quick, please find out exactly everything right. I will depend on you. My husband sends his best regards to you, also your wife and children, also all his friends. I and my children send our best regards to you and family, also all our friends. I hope you are all well, which we are the opposite, all sick.

I remain, your true friend,

ERNSTINE KEMPINSKI.

No. 29.

Mr. Wurts to Mr. Blaine.

No. 18.] LEGATION OF THE UNITED STATES,
St. Petersburg, March 15, 1889. (Received April 2.)

SIR: I regret to have to report to you the arrest, three months ago, of an alleged American citizen, of the name of Herman Kempinski, in Poland, where he is still held in confinement.

The facts of the case, so far as known to me, will be found in the statement, a copy of which is herewith inclosed (No. 1.), of Mrs. Kempinski, a native American, wife of the prisoner, who called at this legation two days ago, asking help to obtain the release of her husband. Mrs. Kempinski, who was much agitated, added verbally to this account of the trouble of her husband, that he would not have returned to his native place had he not taken the precaution to inquire, through a member of his family at Kalisch, if he was free to do so, and received the assurance that there was no charge against him. Unfortunately, she has no document to prove that this assurance was given; and she is unable to say who was the official who gave it. According to her written statement her husband has not been informed of the accusation against him; but she said to me that it was supposed to be on account of his having left Poland without permission of the authorities and with the apparent object of evading military service. I told her that doubtless such was the charge, and if so, that her husband would have to stand his trial for infraction of the law of his native land; but that I hoped to be able to obtain his release, as the Russian Government was generally inclined to be lenient in the treatment of these offenses; that she need have no fears of her husband being sent to Siberia, which was a punishment never yet inflicted upon parties situated as was her husband, many similar cases having called for the intervention of this legation, and thus far never in vain; that she must have patience in waiting for the release of her husband, as the investigation had to pass through several departments of Government, which would necessarily cause delay. I pacified her as best I could and urged her return to her husband's family at Kalisch, where I would communicate to her any intelligence I might receive relating to the matter.

I then prepared a note to the imperial foreign office, a copy of which (Inclosure 2) is herewith transmitted, and taking it myself had then an interview with General de Vlangaly, adjunct of that ministry, on its subject. General de Vlangaly could give me no assurance as to the result of the investigation, but promised to have it made as soon as possible He thought that if it could be shown that Kempinski was, when he left the country, so frail and undersized as to be unfit for military service, as Mrs. Kempinski represented to me, Kempinski might possibly escape the charge of evasion of his military duties. I have written to Mrs. Kempinski to this effect.

This case is in its main points similar to a number of others that have at different times been before this legation, and I trust that the end of it will be no less satisfactory. The Russian Government has always declined to accept our holding that the naturalization as an American citizen of one of its subjects by birth absolves the individual from his duties to his native land; and on the individual venturing within its jurisdiction it is inclined to make its laws respected by arresting and bringing to trial the offender. The punishment inflicted has, however, been comparatively light, for by the letter of the law not only loss of

civil rights, confiscation of property, imprisonment and fines, but exile to Siberia might be the penalty attached to the offense of leaving the empire without previous permission of the Government, especially when the apparent object of leaving was to evade conscription in the army. In most of the cases before this legation the persons who have fallen into this difficulty on their return to Russia were, when they left, just under the age when their military service was about due, and this is not unnaturally regarded as an unfavorable circumstance.

It is unfortunate that so much time has been lost in bringing Kempinski's case before this legation, but I trust that the Imperial Government may exercise clemency in consideration of the sufferings of Kempinski and of his family during the past three months of his imprisonment.

I shall write to our consul at Warsaw to be more careful in future to report all such cases promptly to this office for such action as may be called for.

I have, etc.,

GEORGE W. WURTS.

[Inclosure No. 1.]

ST. PETERSBURG, *March* 12, 1889.

Hon. GEORGE W. WURTS,
Chargé d'Affaires of the United States at St. Petersburg :

EXCELLENCY: At your suggestion I have the honor of bringing to your notice the details concerning my husband and his arrest in Konin, Kingdom of Poland.

My husband, Herman Kempinski, left home when at the age of seventeen; his parents were very poor and he was obliged to make his way in life.

He went over to the United States in 1872, and from that time up to his return here to Russia he resided at Bridgeport, Conn.

He was engaged by the Singer Sewing Machine Factory to make shuttles, until an accident which caused him to be confined in a hospital for almost a year, decided him to abandon the work. He then started peddling, and has continued that business for the last ten years. He became naturalized about ten years ago. He married me, an American citizen of the United States, on August 17, 1873, and has had seven children by me; two of them are living. By his hard work he had succeeded in putting by some money, and came over to Russia with a view of seeing his aged parents once more. We arrived at Konin on the 23d of June, 1888, and exactly six months after, on the 24th of December, he was arrested, handcuffed, and marched off to prison at Kalisch. No reason was given, and all efforts to get him liberated have been in vain. I did not know whom to apply to. My husband's relations petitioned the Government; my brother-in-law, at great expense, went to Warsaw to consult with M. Rawicz, United States consul, but all to no avail.

I have my two children with me, do not know the language, have hardly sufficient money left to keep me living for three weeks, after which I must fall on the hands of charity, for my husband's parents are poor, and it was he who sustained them.

These are all the facts I know of, and I implore your aid.

I crave your excellency's pardon for all the trouble I am giving you, but it would be such a delight for me to see my husband once more free and safe out of this country. Allow me to reiterate the gratefulness I would have if you would attain this end.

I have the honor, etc.

MRS. A. KEMPINSKI.

[Inclosure No. 2.]

LEGATION OF THE UNITED STATES,
St. Petersburg, March 13, 1889.

YOUR EXCELLENCY: I beg to ask your intervention on behalf of an American citizen, Herman Kempinski, at present confined in prison at Kalisch, Russian Poland. The circumstances of the case, so far as known to me, are as follows:

Kempinski left his home at Konin near Kalisch, at the age of seventeen for America, to there earn a living; his parents being poor and unable to provide for him.

He reached the United States in 1872, and remained there until last summer, when he returned to his native place to visit his aged parents. Before returning to this country he caused inquiries to be made by a member of his family at Kalisch, whether he was free to come back, and the answer was favorable. This has been stated to me by Mrs. Kempinski, a native American citizen, who has brought the painful position of her husband to the notice of this legation; and Mrs. Kempinski adds that her husband would not have returned to his native town had he not been assured by the authorities that there was no charge against him. Kempinski arrived in Russian Poland on the 23d of last June, accompanied by his wife and two young children, and stayed with his parents at Konin from that date until December 24, 1888, when he was arrested, handcuffed, and marched off to prison at Kalisch, some 6 or 8 versts distant.

No reason has been given for the arrest, and all efforts of the family to get him liberated have been in vain. Mrs. Kempinski's relatives have, under advice, addressed a petition to His Imperial Majesty, through what channels I am not informed, but even in case of a favorable result, the delay in the release of Kempinski would entail great misery upon his family. Mrs. Kempinski represents her husband to be in such a state of health that a continued confinement in prison would soon have fatal consequences. His parents are poor, partially depending in fact upon the money heretofore remitted to them by their son for support. They therefore can not aid him. His resources are nearly exhausted, and his wife and children are threatened with ruin caused by the interruption of his business affairs.

I most respectfully ask your excellency to have the kindness to cause this matter to be investigated. The case is one of peculiar hardship on account of the state of health of the prisoner and the sufferings of his wife and children, deprived of their means of living. In view, also, of what Kempinski has already suffered in health and material interests, I venture to hope, even should he be found guilty of the charge against him, of which I have no knowledge, that the Imperial Government may see fit to exercise clemency and order his release.

Begging that your excellency may be pleased to give to this matter your early consideration, I avail myself, etc.

GEORGE W. WURTS.

His Excellency GENERAL DE VLANGALY,
Adjunct of the Imperial Ministry of Foreign Affairs, etc.

No. 30.

[Telegram.]

Mr. Blaine to Mr. Wurts.

DEPARTMENT OF STATE,
Washington, March 16, 1889.

Herman Kempinski, born at Konin, 1854, came to United States 1872, is duly naturalized and has continuously resided here for sixteen years, returned to Konin to visit parents last May, and in December was arrested and taken to Kalisch. It is reported he will on 1st of May be exiled to Siberia on charge of not reporting for military duty. Ask for immediate investigation, protest against the exile of a citizen of the United States, and request permission to return to the United States.

BLAINE.

No. 31.

Mr. Wurts to Mr. Blaine.

UNITED STATES LEGATION, RUSSIA,
St. Petersburg, March 17, 1889. (Received March 17.)

On 13th instant Kempinski's wife called here, giving first notice husband's arrest. I at once addressed note and interviewed foreign office, asking investigation.

(In cipher:) States that although he could not obtain release, he fears no difficulty in dealing with the case, and that there is no danger of Siberia.

WURTS.

No. 32.

Mr. Wurts to Mr. Blaine.

No. 19.] LEGATION OF THE UNITED STATES,
St. Petersburg, March 18, 1889. (Received April 2.)

SIR: I beg to acknowledge the receipt yesterday morning at 11.30 o'clock, of your telegram of the 16th instant as follows:

Herman Kempinski, born at Konin, 1854, came to United States 1872, is duly naturalized, and has continuously resided here for sixteen years; returned to Konin to visit parents last May, and in December was arrested and taken to Kalisch. It is reported he will, on the 1st May, be exiled to Siberia on charge of not reporting for military duty. Ask for immediate investigation, protest against exile of citizen of the United States, and request permission to return to the United States.

BLAINE.

My dispatch No. 18 of the 15th instant will have informed you, as well as my telegram of the 17th, that your directions to request an investigation into the case of Kempinski were anticipated on the first intelligence of his imprisonment. I have nothing yet to add to the information then given of this case, but in connection therewith it has seemed proper to me to write to the consul at Warsaw to obtain of the local authorities, if possible, at least Kempinski's temporary release on bail, in order that he may be spared the sufferings of confinement in prison; it also seemed proper to me to request the consul to promptly report in future to this office all such cases that might come to his knowledge. I inclose herewith a copy of my letter to the consul. I have moreover written to Mrs. Kempinski in regard to her statement that as her husband never could have performed military duty owing to his smallness of size and delicate constitution, he could not in leaving Russia have had the intention of evading service in the army. If Mrs. Kempinski can have this view of the case accepted by the authorities, her husband may be acquitted of the gravest charge against him. There will then remain the accusation of leaving the country without passport, but as this is a much lighter offense, the Government may discharge him with a mild punishment, such as a fine, or even take his imprisonment these last three months as sufficient amends.

I have, etc.,

GEORGE W. WURTS.

[Inclosure.]

Mr. Wurtz to Mr. Rawicz.

LEGATION OF THE UNITED STATES,
St Petersburg, March 16, 1889.

SIR: A Mrs. Kempinski has brought to the notice of this legation the arrest and imprisonment of her husband, Herman Kempinski, which took place last December at Kalisch, Poland.

In Mrs. Kempinski's statement of the case she writes that her brother-in-law went to Warsaw to obtain your aid and protection, but to no avail.

Kempinski has now been in prison since the 24th of last December and it was only three days ago that this legation had any intelligence of the matter. By your declining to look into the affair and reporting it to this office, weeks of valuable time have been lost before any steps could be taken towards effecting Kempinski's release. I regret exceedingly that you did not see fit to report the case when first informed of it, and must beg you in future to advise the legation promptly of all such cases as may arise for such action as may seem proper.

Do you think that you could do anything now for at least the temporary release of Kempinski on bail? The man is represented to be in delicate health and suffering greatly from this long confinement. The case is under investigation, but there may be a long delay in its solution. If you could obtain from the local authorities his release on bail it would be of great service.

I am, sir, etc.,

GEORGE W. WURTS,
Chargé d'Affaires.

No. 33.

Mr. Blaine to Mr. Wurts.

No. 32.] DEPARTMENT OF STATE,
Washington, April 20, 1889.

SIR: Referring to Mr. Tree's No. 13 of February 1 last, and to the terms of the informal note inclosed therewith addressed to Mr. de Giers, on behalf of Mr. Adolph Kutner, a naturalized citizen of the United States, born in Russia, I now transmit a further statement.

It seems plain from Mr. Foote's letter, a copy of which I inclose, that Mr. Kutner is a deserving person, and that the only motive of his application for the privilege of visiting Poland without molestation is a desire to see once more his aged parents. Confidently commending the case as one meriting the considerate action of his Imperial Majesty's Government.

I am, etc.,

JAMES G. BLAINE.

[Inclosure.]

Mr. Foote to Mr. Blaine.

SAN FRANCISCO, *April* 5, 1889.

DEAR SIR: Some months since I wrote to the State Department in relation to the use of its good offices with the Russian Government with a view to allow Mr. A. Kutner, a prominent and wealthy merchant of this State, to revisit unmolested his native city of Warsaw, Poland, that he might again see his aged parents.

Mr. K. had left Poland at the early age of sixteen and had not returned for over thirty years, having meanwhile become a naturalized citizen of the United States.

Upon the suggestion of the then Secretary a petition was prepared and forwarded, setting forth the necessary facts and having attached a copy of Mr. K.'s naturalization papers.

This petition was doubtless sent to the American minister at St. Petersburg, and with the request from the State Department that he use his best efforts to secure the privilege asked for.

No reply has yet been received, and poor Kutner stands outside the boundaries of Russian Poland, in Germany, accompanied by his wife and children, "his hostages to fortune," gazing, like Moses, from "Pisgah" on the promised land, and yet afraid to enter, lest, perchance, he might become suddenly drafted as an emigrant to Siberia.

I fear that our adopted citizen will have to wait a while longer unless you, the ancient friend of my honored father, Hon. H. S. Foote, formerly of Mississippi, will interfere and strike a good blow in his behalf. The gentleman is of unexceptionable

character, utterly harmless, and only desires to see his father and mother ere they pass from earth.

Will you, my dear sir, give the matter your personal attention, if you can spare the time, and oblige,

Yours, most truly,

HENRY S. FOOTE.

N. B.—The permission, if granted, can be sent to me here to be forwarded, it being a matter entirely *ex gratia* upon my part.

No. 34.

Mr. Blaine to Mr. Foote.

DEPARTMENT OF STATE,
Washington, April 20, 1889.

SIR: Your letter of the 5th instant in reference to the permission desired by Mr. Adolph Kutner, a naturalized citizen of the United States, to visit Poland, his birthplace, without molestation, is received.

The Department has sent a copy of your letter to our legation at St. Petersburg, referring to former correspondence and earnestly commending the request of Mr. Kutner to its careful attention.

It appears from Dispatch No. 13 of Mr. Tree, late minister to Russia, that the minister of foreign affairs was informally addressed on the subject, early in February last, and with some hope that the request of Mr. Kutner would be granted.

I am, sir, &c.,

JAMES G. BLAINE.

No. 35.

Mr. Klein to Mr. Blaine.

BRIDGEPORT, CONN., *April* 23, 1889.

DEAR SIR: You will perhaps recollect that I called upon you with Senator Platt and also with Hon. Simon Wolf, in relation to the matter of Herman Kempinski imprisoned at Russia.

The sentence of his exile to Siberia was to go into effect May 1 next. Will you kindly let me know the present status of the case? Our citizens here are greatly interested in the matter, and scarcely a day passes but that I am asked when Mr. K. is to be allowed to return.

Awaiting your reply,

I have, etc.,

J. B. KLEIN.

No. 36.

Mr. Wharton to Mr. Klein.

DEPARTMENT OF STATE,
Washington, April 27, 1889.

SIR: I have to acknowledge the receipt of your letter of 23d instant, and to say in reply that the Department has no later information relative to the case of the American citizen, Herman Kempinski, arrested

in Russia in December last, than was given to the press on the 4th instant. This was to the effect that the peculiar circumstances of the case favored a presumption that the matter would presently be brought to a favorable conclusion. Our chargé *ad interim* at St. Petersburg evidently considers the apprehension that Kempinski may be sent to Siberia without foundation.

I am, sir, etc.,

WILLIAM F. WHARTON,
Assistant Secretary.

No. 37.

Mr. Wurts to Mr. Blaine.

ST. PETERSBURG, *May* 12, 1889.
(Received May 12.)

Reply Kempinski's case refuses release he contumacious condemned exile 1885 for leaving Russia authorized and returning to transportation Siberia result Kempinski's petition Emperor unknown Kempinski affirms never assumed foreign nationality.

(In cipher): States that Kempinski's repudiation of American citizenship complicates the affair, and asks for instructions.

No. 38.

Mr. Wurts to Mr. Blaine.

No. 34.] LEGATION OF THE UNITED STATES,
St. Petersburg, May 12, 1889. (Received May 28.)

SIR: I had the honor to send to you this morning the following telegram conveying the substance of a note just received from the Imperial Foreign Office in relation to the case of Herman Kempinski:*

A copy and translation of this note are herewith inclosed.

The repudiation by Kempinski of his American citizenship causes me embarrassment, and I therefore asked in my telegram for instructions for such action as, in this new phase of the case, you may deem expedient to direct, if you consider it worth while to intervene further on behalf of one who seems ready to throw off our nationality as a useless garment on the first occasion when he calculates that to do so may advance his interests. Kempinski himself seems worthy of little sympathy, but for the sake of his wife and children, who are natives of our country, the inducement is great to support the petition for his pardon. The Imperial grace is his only resource for escape from deportation to Siberia. It is not improbable that it may be granted, even without our official support for, from what I learn of the execution of such sentences it rarely happens that they are fully carried out; but I shall, while awaiting instructions from you, unofficially recommend his petition to favorable consideration on account of his family. At the same time I fear that Kempinski has, in lending himself to dishonest counsels and by his disloyalty, injured his prospects for pardon. There is good

* Telegram printed immediately above.

reason to believe that he would have been allowed to leave in peace had he held manfully to the nationality of his adopted country; the result of the investigation might all the same have gone against him.

I have, etc.,

GEORGE W. WURTS.

[Inclosure—Translation.]

No. 4,556.] IMPERIAL MINISTRY OF FOREIGN AFFAIRS,
DEPARTMENT OF HOME RELATIONS,
St. Petersburg, April 29 [*May* 11], 1889.

M. CHARGÉ D'AFFAIRES:

By its note of the 1st [13th] March last, the legation of the United States of America addressed the imperial ministry with the object of obtaining the release of one Herman Kempinski, described as a citizen of the United States, who had been arrested and put in prison at Kalisch.

I regret to have to inform you that the ministry of the interior has not judged it possible to comply with this request of the legation of the United States, in view of the fact that on the 18th of March, 1885, Kempinski was condemned by the court of criminal justice of Warsaw for having left Russia without having to that end had previous authorization from the competent authorities, to the loss of all civil rights and to exile, and in case of return to Russia to deportation to Siberia, and that he returned to Russia after this sentence was pronounced against him by the said court of justice.

In the month of last January the said Kempenski appealed for pardon to His Majesty the Emperor, and the result is still unknown.

I should add that Kempinski affirms that during his sojourn abroad he assumed no foreign nationality.

Accept, M. Chargé d'Affaires, etc.,

A. VLANGALY.

Mr. WURTS, &c.

No. 39.

Mr. Wharton to Mr. Klein.

DEPARTMENT OF STATE,
Washington, May 15, 1889.

SIR: In further answer to your letter of the 23d ultimo, I have to say that the Department has received a telegraphic dispatch from the United States legation at St. Petersburg, stating that the Russian Government has refused to release Kempinski.

The result of his petition to the Emperor is unknown.

The legation states that Kempinski has denied that he ever assumed foreign nationality, and adds that his sworn repudiation of American citizenship has rendered action in his behalf difficult.

Under these circumstances the Department, before sending further instructions, is compelled to await the receipt of the written report of the legation.

I am, sir, your obedient servant,

WILLIAM F. WHARTON,
Assistant Secretary.

No. 40.

Mr. Klein to Mr. Wharton.

BRIDGEPORT, CONN., *May* 28, 1889.

DEAR SIR: Your communication *in re* matter of Herman Kempinski came duly. I can not comprehend for what reason Kempinski denied his American citizenship, except, perhaps, that certain persons led him to believe that through that the Russian Government would be apt to deal more leniently with him. But even assuming he did deny it, does it alter the fact that he is an American citizen? This morning my father received a letter from her, which is herewith inclosed. The underscoring in same is mine. From said letter it would appear that the legation is of opinion that not enough was done by this Government. I, however, know this to be untrue, for when I was in Washington Mr. Secretary Blaine informed me what had been done, and to me it seemed sufficient. Will you, however, please make one more effort on behalf of this unfortunate man and his still more unfortunate family? It seems to me a most unwarranted power on the part of the Russian Government to detain K. any longer. Trusting you will do all that is possible, and thanking you very kindly for your prompt reply to my communication,

I have, etc.,

J. B. KLEIN.

KALISCH, *May* 17, 1889.

Highly respected Mr. B. KLEIN:

I must beg you to excuse me for not awaiting a reply from you. I send you a second letter, because it is impossible for me to do otherwise.

I have to inform you that I received a letter on the 16th of May from the American minister at St. Petersburg, telling me to write for help direct to America. The minister has previously told me that not enough has been done to secure the release of my dear husband, and I am consequently compelled to beg you to excuse me for giving you so much trouble. I can, however, think of no other way, and must therefore again ask you to take pity on me and my children, and to go to Washington and do everything in your power, for the minister has told me that everything possible should be done before the papers are laid before the Emperor. Success will then crown our efforts. I think that we may feel confident that the minister will do his duty in the matter. It will be a great blessing from our Heavenly Father if I can be relieved from this trouble and grief, for hot tears flow, like streams of water, from our eyes; and no wonder. I hope that you will remember my request, and that you will help me as far as you may be able. I beg you not to delay, but to do everything possible at once. I beg you once more, with all my heart, to bear this matter in mind, and trust that you will pardon the liberty that I have taken, since I knew of no other course to take. Further than this I have nothing to communicate.

I remain in the hope of soon hearing something favorable.

Very truly your friend,

E. KEMPINSKI.
H. KEMPINSKI.

Kindest regards to all friends. My children all desire to be affectionately remembered.

B. KEMPINSKI.
C. S. KEMPINSKI.

Give our best love to your dear brother and his wife, and also to their dear daughter.

THE KEMPINSKI FAMILY.

No. 41.

[Telegram.]

Mr. Klein to Mr. Blaine.

BRIDGEPORT, CONN., *June* 26, 1889.

Have just received information from Russia that Kempinski has been released. Is it true?

J. B. KLEIN.

No. 42.

Mr. Wharton to Mr. Klein.

DEPARTMENT OF STATE,
Washington, June 27, 1889.

SIR: I have received your telegram, dated yesterday, in which you state that you have just received information from Russia that Kempinski has been released, and ask whether your information is correct.

In reply, I have to say that the Department has not been advised of such action on the part of the Russian Government.

I am sir, etc.,

WILLIAM F. WHARTON,
Assistant Secretary.

No. 43.

Mr. Adee to Mr. Wurts.

No. 50.] DEPARTMENT OF STATE,
Washington, September 19, 1889.

SIR: Referring to Instruction No. 32, of the 20th April last, in the case of Adolph Kutner, a naturalized citizen of the United States, who asks the privilege of visiting Russia on a filial errand, without molestation, I now inclose a copy of a further letter from Mr. Foote, of San Francisco, by which it appears that the desired action of his Majesty's government is still awaited. Nothing has been heard from the legation on the subject since the date of the instruction named. I trust that the Department may soon be apprised of the favorable conclusions of the Russian Government if the case has the merit which the letters of Mr. Foote represent it to have.

Awaiting your early reply,

I am, etc.,

ALVEY A. ADEE,
Acting Secretary.

[Inclosure.]

Mr. Foote to Mr. Blaine.

SAN FRANCISCO, *September* 5, 1889.

DEAR SIR: Mr. Kutner, an American citizen of Polish birth, born in Russian-Poland, about whose case I wrote you some time since, and in whose behalf you have been endeavoring to obtain a favorable response from the Russian Government, is

still after weary months of waiting anxious to know if he must return to California without being permitted to see his aged parents and his native city.

If within the bounds of possibility I trust that some definite settlement of the matter may be arrived at so that he will know of a certainty what to do in the premises. The time set for his return here has almost been attained, and if permission is not soon granted it will prove of no avail. Of course, honored sir, I appreciate the delicacy and difficulty of the task imposed upon the Department and the multiplication of important matters which lie heavy on your hands, yet I still hope that something may be done to facilitate this deserving man's wishes.

I am, sir, etc.,

HENRY S. FOOTE.

No. 44.

Mr. Adee to Mr. Foote.

DEPARTMENT OF STATE,
Washington, September 19, 1889.

SIR: I have to acknowledge the receipt of your letter of the 5th instant in the case of Mr. Adolph Kutner, and to say that a further instruction in the matter of procuring for that gentleman the privilege of visiting Russia, without molestation, has been sent to St. Petersburg.

The Department is daily expecting to hear from our legation there on the subject.

I am, sir, etc.,

ALVEY A. ADEE,
Acting Secretary.

No. 45.

Mr. Adee to Mr. Wurts.

No. 51.] DEPARTMENT OF STATE,
Washington, September 20, 1889.

SIR: Adverting to previous correspondence in the case of Herman Kempinski, I herewith inclose a copy of a letter from Messrs. S. Wolf and J. B. Klein, dated the 16th instant, accompanied by the original affidavits which it transmitted and which represent that "Kempinski had been, during his residence in the United States, an honest, peaceful, and law-abiding citizen, and one who was in no wise connected or associated with any socialistic or anarchistic society."

Messrs. Wolf and Klein ask that these papers may be transmitted to the Russian foreign office, and you are instructed to comply with their wishes, explaining when doing so the circumstances under which they are forwarded.

I am, etc.,

ALVEY A. ADEE,

[Inclosure.]

Messrs. Wolf and Klein to Mr. Blaine.

SIR: Early in March, 1889, the undersigned had the honor to personally present to you the petition of Herman Kempinski, a citizen of the United States and a resident of Bridgeport, Conn., asking the intervention of our Government on and in his behalf,

as at that time he was a prisoner in Russia, as will more fully appear from the documents on file. You at once very kindly ordered a cablegram to be sent to St. Petersburg and promised to do whatever was in your power for the protection of Mr. Kempinski. Considerable correspondence pro and con was had, when finally, on the 15th day of May, 1889, a letter addressed to Jacob B. Klein at Bridgeport, Conn., signed by the Hon. William F. Wharton, Assistant Secretary,* a copy of which is here attached. Under the circumstances, alleged in the said letter of your Department, we foresaw the difficulties surrounding the case, and that you could not act with that decision and energy had Kempinski not surrendered, as is alleged, the protection he was entitled to, to wit, citizenship. We have no desire to enter into any controversy as to the accuracy of this allegation, leaving that to the future; but the one clause contained in your letter gave us the first intimation that Kempinski had petitioned to the Emperor. Acting under this information, a correspondence was had, (secured with great difficulty), the result of which is that we are in possession of two letters, one each of Mr. and Mrs. Kempinski, wherein they confirm that a petition had been sent to the Emperor, but that no action as yet has been taken thereon, as they have been informed for the lack of evidence that Kempinski had been during his residence in the United States an honest, peaceful, and law-abiding citizen, and one who was in no wise connected or associated with any socialistic or anarchistic society. In accordance with this information we have secured from the judge of the city court, the mayor of the city, and the chief of police of Bridgeport, Conn., also from leading merchants in the city of New York with whom Kempinski dealt, affidavits duly sworn to and certified to by the Russian consul resident in New York, which we now have the honor to file, respectfully asking you to forward the same, or copies thereof, to our chargé d'affaires and acting minister at St. Petersburg, and that he be instructed to transmit the same to the minister of foreign affairs of Russia, accompanied by such a letter as in your judgment is proper, using the good offices of our Government in aid of the release of this unfortunate man whose crime, as we now know, matured after he had left Russia, as he should have reported for duty as a soldier three years after his departure from Russia and while he was residing in this country, and returned for no other purpose than to visit his aged parents—an act which all men can appreciate—and with no desire to remain a citizen of the land of his birth.

We confidently hope that to the many kind acts hitherto performed by our Government in similar cases this will not prove an exception.

We are, etc.,

S. WOLF,
J. B. KLEIN.

WASHINGTON, D. C., *September* 16, 1889.

On this 7th day of September, A. D. 1889, personally appeared William E. Marsh, of the city of Bridgeport, county of Fairfield, and the State of Connecticut, who, being of lawful age, doth depose and say: That he is at present, and has been for the past twenty-five years, chief of the police department of the city of Bridgeport; that he is acquainted with Herman Kempinski, son of Jacob Lieb Kempinski, and has known him ever since his arrival in said city. That said Kempinski during all the years while he lived in Bridgeport bore the best reputation for honesty and integrity, and that his character was of the very highest; that the said Kempinski while residing in Bridgeport committed no crime against the laws of this State or of the United States, nor has this State or country any claim upon him for any crime or misdemeanor.

Deponent further states that said Kempinski was not in any way connected or associated with any socialistic or anarchistic movement or society.

In witness whereof I have hereunto set my hand and seal on the day and year first above written.

(Endorsed in Russian and signed Hemepcesoe.)

On this 10th day of September, A. D. 1889, personally appeared George A. Moss, of the city of New York, county of New York, and the State of New York, who, being of lawful age, doth depose and say: That he is doing business at No. 167 Reade St., in said city of New York, and that he is well and personally acquainted with Herman Chaskel Kempinski (son of Jacob Leib Kempinski), of Bridgeport, county of Fairfield, and the State of Connecticut, and that said Kempinski has been doing business with affiant for the past 12 years. During said time and up to the time he wound up his business career, Kempinski's dealings were strictly honorable in every shape and manner.

GEO. A. MOSS.

UNITED STATES OF AMERICA,
State of New York, County of New York, ss:

NEW YORK CITY, *Sept. 10th, A. D.*, 1889.

Sworn to and subscribed before me on the day and year first above written.
[SEAL.]

JAMES WILLS,
Notary Public, N. Y. Co.

(Form 2.)

STATE OF NEW YORK, *City and County of New York, ss:*

I, Edward F. Reilly, clerk of the city and county of New York, and also clerk of the supreme court for the said city and county, the same being a court of record, do hereby certify, that James Wills, before whom the annexed deposition was taken,

was, at the time of taking the same, a notary public of New York, dwelling in said city and county, duly appointed and sworn and authorized to administer oaths to be used in any court in said State, and for general purposes; that I am well acquainted with the handwriting of said notary, and that his signature thereto is genuine, as I verily believe.

In testimony whereof, I have hereunto set my hand and affixed the seal of the said court and county, the 10th day of Sept., 1889.

EDWARD F. REILLY, *Clerk.*

(Endorsed in Russian and signed Немерсесое.)

No. 46.

Mr. Adee to Messrs. Wolf and Klein.

DEPARTMENT OF STATE,
Washington, September 20, 1889.

GENTLEMEN: I have received your letter of the 16th instant, relative to the case of Herman Kempinski, and have forwarded the original affidavits, which you sent to Mr. George W. Wurts, the chargé d'affaires *ad interim,* of this Government at St. Petersburg, with an instruction directing him to lay them before the minister for foreign affairs of Russia, with a proper explanation.

I am, gentlemen, etc.,

ALVEY A. ADEE,
Acting Secretary.

No. 47.

Mr. Wurts to Mr. Adee.

No. 57.] LEGATION OF THE UNITED STATES,
St. Petersburg, October 7, 1889. (Received October 21.)

SIR: I have the honor to acknowledge the receipt of your instruction No. 51 of the 20th ultimo, relating to the case of Herman Kempinski, and to inform you that in obedience to your order, I have transmitted the affidavits of the respectable character of Kempinski found in your instruction to the Russian foreign office, with a note, a copy of which is herewith inclosed.

I remain, sir, etc.,

GEORGE W. WURTS,

[Inclosure.]

Mr. Wurts to General de Vlangaly.

LEGATION OF THE UNITED STATES,
ST. PETERSBURG, *September* 25 [*October* 7], 1889.

YOUR EXCELLENCY: Referring to previous correspondence in the case of Herman Kempinski who, as I learn by the note of your excellency dated April 29 [May 11] last, appealed for the clemency of His Imperial Majesty, after sentence against him for having left his native country without authorization, I have the honor to transmit herewith to your excellency, by order of the Department of State of the United States, certain papers bearing upon the present situation in this affair.

It is reported that action has not yet been taken in the petition of Kempinski for lack of evidence that during his absence abroad he had been an honest, peaceful, and law-abiding citizen, and one who was in no wise connected or associated with any socialistic or anarchistic society. The documents now inclosed herewith furnish the evidence wanting of the morality of Kempinski whilst in America; they have been obtained from the judge of the city court, the mayor of the city, and the chief of police of Bridgeport, Conn., U. S., the place of residence of Kempinski in America; as also from leading merchants in the city of New York, with whom Kempinski had business dealings; these affidavits are duly attested by the Russian consul at New York.

I beg your excellency to have the kindness to cause these documents to be brought to the attention of the authorities having charge of this matter, and I take occasion to again solicit the good offices of your excellency on behalf of the petitioner for the pardon of His Imperial Majesty.

I avail, etc.,

GEORGE W. WURTS.

No. 48.

Mr. Wurts to Mr. Adee.

No. 58.] LEGATION OF THE UNITED STATES,
St. Petersburg, October 8, 1889. (Received October 28.)

SIR: Your instruction No. 50, of the 19th ultimo, relating to the petition of Mr. Adolph Kutner for permission to visit Russia was duly received by me, and I immediately wrote to the imperial foreign office a note, a copy of which will be found herewith inclosed. The day following I had an interview with General Vlangaly on this subject, and, referring to the various notes and frequent verbal mention made by me of the case urging its solution, I begged him to obtain the reply from the minister of the interior so anxiously awaited by Mr. Kutner. I also expressed surprise that this case had not yet, apparently, received attention at that ministry, for other cases somewhat similar had been promptly disposed of. General Vlangaly promised a speedy reply, and I trust that in case it be favorable it may be received in time to be of use to Mr. Kutner.

I have, etc.,

GEORGE W. WURTS.

[Inclosure.]

Mr. Wurts to General de Vlangaly.

LEGATION OF THE UNITED STATES,
St. Petersburg, September 25 [*October* 7], 1889.

YOUR EXCELLENCY: I am directed by the Department of State of the United States to recall your attention to the case of Mr. Adolph Kutner, a citizen of the United States, who asks the privilege of coming to Russia with the object of visiting his aged parents, the subject of the notes of this legation of January 20 [February 1], and of April 25 [May 7], last, as also of several conversations I have had the honor to have with your excellency. No reply to these notes has yet been received from your excellency, as to the conclusion that may have been reached in this matter by the Imperial Government. Mr. Kutner is still waiting in anxiety all these months since application was made on his behalf for permission to visit Russia, and there is now but a short period before him when it will become necessary for him to return to California, and if permission is not soon given it will prove of no avail. I therefore earnestly and most respectfully request your excellency to hasten the desired decision, which I trust will be favorable.

I beg your excellency to accept, etc.,

GEORGE W. WURTS.

No. 49.

Mr. Wurts to Mr. Blaine.

No. 68.] LEGATION OF THE UNITED STATES,
St. Petersburg, November 7, 1889. (Received November 23.)

SIR: Referring to my dispatch No. 58, of October 8 last, relating to the request of Mr. Adolph Kutner for permission to visit Russia, I have the honor to inform you of the receipt to-day of a note from the imperial foreign office in relation thereto. A copy and translation of this note will be found herewith inclosed, by which it will be seen that the matter is under examination by the proper authorities, and that the decision when reached will be communicated to me.

I remain, sir, etc.,

GEORGE W. WURTS.

[Inclosure.]

General de Vlangaly to Mr. Wurts.

No. 8924.] IMPERIAL MINISTRY OF FOREIGN AFFAIRS,
DEPARTMENT OF THE HOME RELATIONS,
St. Petersburg, October 25 [*November* 6], 1889.

M. CHARGÉ D'AFFAIRES:

By its notes bearing date of January 20 [February 1], of April 25 [May 7], and of September 25 [October 7], of this year, the legation of the United States addressed itself to the imperial ministry with the object of obtaining for one Kutner authorization to pass a certain time in Russia for family affairs.

To-day I have the honor to inform you that the competent authorities are examining this affair and that I have not failed to request the minister of the interior to hasten action thereon.

In waiting to transmit to you in due time the reply that will be communicated to me on this subject, I avail myself of the occasion to renew, etc.,

A. VLANGALY.

No. 50.

Mr. Adee to Mr. Foote.

DEPARTMENT OF STATE,
Washington, November 27, 1889.

SIR: In further reply to your letter of September 5 last concerning the request of Mr. Kutner to be permitted to enter Russia, I have to say that our legation at St. Petersburg informs the Department that Mr. Kutner's request is still held for consideration by the Russian Government.

I am, sir, etc.,

ALVEY A. ADEE,
Second Assistant Secretary.

No. 51.

Mr. Wurts to Mr. Blaine.

No. 70.] LEGATION OF THE UNITED STATES,
St. Petersburg, December 7, 1889. (Received December 23.)

SIR: Referring to previous correspondence relating to the petition of Mr. Adolph Kutner for permission to visit Russia, I have the honor

to transmit to you, herewith inclosed, a copy and translation of a note just received from the Russian foreign office, by which it will be seen that before arriving at a decision on the subject the Imperial Government desires to be furnished with information on certain points, enumerated in the note, in the early history of Mr. Kutner.

I remain, sir, etc.,

GEORGE W. WURTS.

[Inclosure.]

General de Vlangaly to Mr. Wurts.

No. 9584.] IMPERIAL MINISTRY OF FOREIGN AFFAIRS,
DEPARTMENT OF THE HOME RELATIONS,
St. Petersburg, November 24 [*December* 6], 1889.

M. CHARGÉ D'AFFAIRES:

Referring to the ministerial note of October 25, [November 6] last, under No. 8924, I have the honor to inform you that the assertion of Mr. Adolph Kutner, that he was born in the Government of Warsaw, has not been confirmed, and that no one has been found there who ever knew him.

Before deciding the question as to whether Mr. Kutner may return to Russia, the Imperial Government should be informed on the following points: The place of birth of said person, his age, the religion professed by him, the date when he left Russia, what passport he carried in leaving for abroad, and if he was duly authorized to abandon Russian nationality to become a citizen of the United States.

Accept, M. Chargé d'Affaires, etc.,

A. VLANGALY.

No. 52.

Mr. Blaine to Mr. Wurts.

No. 73.] DEPARTMENT OF STATE,
Washington, January 10, 1890.

SIR: I have received your No. 70 of the 7th ultimo, inclosing copy of a note from the Russian foreign office in regard to the request of Mr. Adolph Kutner to be permitted to visit Russia. This note requests that Mr. Kutner shall answer certain interrogotaries concerning his life and past history, among them one as to the religion professed by him.

In conveying the inquiry of the imperial foreign office to Mr. Kutner this Department found itself unable to interrogate him as to the religion professed by him, inasmuch as the Constitution of the United States prohibits the application of any religious test whatever in respect of citizens of the United States.

I am, etc.,

JAMES G. BLAINE.

No. 53.

Mr. Solomons to Mr. Blaine.

NEW YORK, *July* 30, 1890.

DEAR SIR: A press dispatch, dated yesterday, in London, states that "a wholesale expulsion of Jews from Russia is impending," and that "an influential deputation left London for Paris to-day to urge the French Government to interpose in the behalf of the Jews in Russia."

This may or may not be true, but there are certain indications which make it possible, and I trust that you will feel authorized to ascertain the facts from the Russian legation in Washington, or, failing in that, to wire to our legation in St. Petersburg for the facts, and if the statement be found true, that with your usual kind-heartedness and directness of purpose, will enter an earnest protest on the part of our Government and a common humanity against such an inhuman ukase.

Your prompt attention will confer a great obligation upon

Yours, truly,

A. S. SOLOMONS,
General Agent.

No. 54.

Mr. Solomons to Mr. Adee.

NEW YORK, *July* 31, 1890.

MY DEAR SIR: I telegraphed you this morning the following:—

NEW YORK, *July* 31, 1890.

Hon. A. A. ADEE,
Assistant Secretary of State, Department of State, Washington, D. C.:

Kindly telegraph me if Department will take action on my letter of yesterday, or will you telegraph points to Secretary for his information.

A. S. SOLOMONS,
45 *Broadway.*

Which had reference to a letter I wrote to the Secretary of State on the 30th instant, a copy of which is herewith inclosed.*

Yours truly,

A. S. SOLOMONS.

* Inclosure printed above.

No. 57.

Mr. Adee to Mr. Solomons.

DEPARTMENT OF STATE,
Washington, August 4, 1890.

DEAR SIR: On receipt of your letter of the 30th ultimo, in relation to the rumored wholesale expulsion of Jews from Russia, a telegram of inquiry was sent to the United States legation at St. Petersburg, and Mr. Wurts's reply states that the rumor is unfounded.

I am, etc.,

ALVEY A. ADEE,
Second Assistant Secretary.

No. 58.

Mr. Wharton to Mr. Wurts.

No. 37.] DEPARTMENT OF STATE,
Washington, August 5, 1890.

SIR: I inclose for your information and files, in connection with the Department's No. 36, of the 2d instant,* giving the text of recent telegraphic correspondence regarding the rumored expulsion of Jews from Russia, a copy of a letter from Mr. A. S. Solomons, of New York, dated the 30th ultimo, upon the subject.

Mr. Solomons has been apprised of your statement that the rumor had no foundation in fact.

I am, sir, etc.,

WILLIAM F. WHARTON,
Acting Secretary.

No. 59.

[Telegram.]

Mr. Wharton to Mr. Wurts.

DEPARTMENT OF STATE,
Washington, August 7, 1890.

Refers to the current report that the Government of Russia intends to enforce the edicts of 1882 against all Jews in the Empire. Asks what is the purpose of those edicts. Directs Mr. Wurts to make report by mail of all that he can learn on the subject, and to telegraph a brief summary of the nature and scope of the edicts.

---

* Inclosure printed above.

No. 60.

Mr. Wharton to Mr. Wurts.

No. 38.] DEPARTMENT OF STATE,
Washington, August 8, 1890.

SIR: I append on the overleaf a copy of my telegram* to you of the 7th instant, in regard to the rumored enforcement of the Russian edicts of 1882 against all Israelites in that country.

The Department desires the fullest possible data in regard to this important matter, which should include, if possible, a copy of the edicts themselves.

I am, sir, etc.,

WILLIAM F. WHARTON,
Acting Secretary.

No. 61.

[Telegram.]

Mr. Wurts to Mr. Wharton.

LEGATION OF THE UNITED STATES,
St. Petersburg, August 9, 1890.

States that he has the highest authority for maintaining that the Russian Government does not contemplate any change from the present lenient enforcement of the edicts of 1882. It is not practicable to make telegraphic summary of the general legislation in relation to Hebrews in Russia, which, if applied, would be of an oppressive character, but will mail copies as soon as they can be obtained.

No. 62.

[Telegram.]

Mr. Wurts to Mr. Wharton.

LEGATION OF THE UNITED STATES,
St. Petersburg, August 14, 1890.

Gives substance of the edict of May 12, 1882. For full text of the edict see No. 63, following.

No. 63.

Mr. Wurts to Mr. Wharton.

No. 32.] LEGATION OF THE UNITED STATES,
St. Petersburg, August 14, 1890. (Received August 28.)

SIR: In obedience to your telegraphic instruction, received August 8, I have just cabled you a dispatch of considerable length, though briefer than which could not be made without impairing its significa-

* Inclosure printed above. To Mr. Wurts, August 7, 1890.

tion, a copy of which I transmit herewith marked inclosure 1,* giving the scope of the ukase of May 12, 1882, relating to the laws governing the Jews in Russia. I send at the same time, marked inclosure 2, a copy of the ukase itself as furnished me by Mr. Robert King, a highly respected lawyer of this city, of English origin, consulted by me in this matter, not only to obtain a copy and translation of this decree asked for by your telegram referred to, but for general information on the present situation of the Jews.

I have nothing to add to the information given in my last dispatches on this subject. So far as this capital is concerned there is no agitation whatever about the rumors of new laws or severe application of old laws against the Jews, and, so far as the near future can be answered for, I have met with no one giving faith to the rumor, coming from abroad, of terrors awaiting the Jews in Russia.

I have, etc.,

GEORGE W. WURTS.

[Inclosure No. 2.]

No. 1386.] August 1, [13] 1890.

[Translation from the Russian.]

COLLECTION OF ORDINANCES AND ENACTMENTS OF THE GOVERNMENT.

12 May, No. 43, (1882.)

272. Respecting the bringing into effect of temporary regulations relating to the Jews.

The committee of ministers after hearing the report of the minister of the interior with regard to the bringing into effect of the temporary regulations relating to the Jews, resolved:

(1) As a temporary measure and pending the revision, in the order established, of the laws relating to the Jews, to prohibit the latter in the future from settling anew outside of towns and boroughs, with an exception in this respect only of at present existing Jewish colonies engaged in agriculture;

(2) To suspend temporarily the conclusion of deeds of sale and mortgage bonds in the name of Jews, and similarly the attestation, in the name of Jews, of leases for real estate situated outside the delimitation of towns and boroughs, and of powers of attorney for the management and direction of such estate;

(3) To prohibit Jews from trading on Sundays and the chief Christian holidays with the provision that the closing on the days indicated of the trading establishments belonging to Jews should take place in the order established for such purpose in regard to trading establishments belonging to Christians;

(4) The measures indicated in pages 1–3, are only to be applied in those provinces wherein the Jews permanently reside.

On the 3d of May, 1882, His Majesty the Emperor was pleased to imperially confirm this resolution of the committee of ministers.

(True translation.)

Quad attestor.

[SEAL.] CHOUMANINE,

Sworn Translator to the St. Petersburg District Court.

---

* Printed above.

No. 64.

Mr. Wharton to Mr. Wurts.

No. 43.] DEPARTMENT OF STATE,
Washington, August 25, 1890.

SIR: Your dispatch No. 26 of the 1st instant in relation to the rumor of a contemplated wholesale expulsion of Jews from Russia, has been received, and the purport communicated (but without disclosing the source of your information) to Mr. A. S. Solomons, the American representative of the Baron de Hirsch fund, who has made inquiries of this Department in behalf of his co-religionists.

The telegraphic instructions sent to you will have shown the great interest and anxiety which is here felt in regard to this report, not only by Russian Jews naturalized in this country and having relatives in Russia, but by the great body of Israelites who, through their industry, good order, and devotion to our institutions, make up a large and honored class of our citizens. Your reports have so far afforded a reassuring confirmation of the belief here entertained that the rumor was indeed groundless, and that the enlightened Government of His Majesty the Czar could not possibly contemplate a measure so calculated to wound the universal sense of humanity and justice, and so conspicuously at variance with the progressive spirit of the century in which we live. Your further promised reports on the subjects are awaited.

I am, sir, etc.,

WILLIAM F. WHARTON,
Acting Secretary.

No. 65.

[From the London Globe, August 1, 1890.]

THE CONVENTION OF THE JEWS IN RUSSIA.

To-day the Jewish Chronicle publishes a special supplement containing information as to the position of the Jews in Russia, and in commenting on the situation our contemporary urges that it should be dealt with calmly. Mere declamation will do little. The voice of reason may penetrate in time to the recesses of the Emperor's Cabinet. An explanation of the present reaction against the Jews in Russia has not yet been given, but we fancy (continues the Jewish Chronicle) that the true theory on the subject will be found to be as follows: For a long time it was the desire of the Czar to Russianize their Jewish inhabitants, an excellent and laudable wish, but the Old World Rabbinism somewhat resisted. Thawed by modern ideas, especially by the gradually penetrating influence of the school of Mendelsohn and by the journeys of Sir Moses Montefiore, the Jews at length began to move and the Russian Government accelerated the motion by a partial receptivity. The old restrictions were not repealed, they were neglected and laxly administered. All Russia was not in name thrown open to reside in, but Jewish colonies formed themselves in cities hitherto tabooed, and were not expelled. As the railways opened up the country, the settlement of Jews was encouraged along their route by the special permission that three Jewish families might establish themselves at every station.

Jews must go to the universities and learn Russian. Liberty, however, was not conceded completely. The Jewish youth, educated at the price of immense sacrifices, was often debarred from the situations in which his prized acquisitions would be valuable, was often forced back into poverty and despondency. Then came the Nihilist agitation, and some few among those discouraged and starving Jewish students, fired with the enthusiasm of humanity, joined their college comrades in the dream of a near future of liberty to be gained by political revolution. As to Nihilism, everything that is done in Russia is done in a panic of fear, and nothing is so cruel as fear. That even a few of the half-educated, half-emancipated Jews should become Nihilists, proved at once to the panic-stricken men at the head of the Government machine that education and an approach to emancipation turned all Jews into traitors. They had never rebelled before they were Russified; if Russification threw them into the hands of the Nihilists, the attempt to make Russians of them was a disastrous one, and the steps of the Government in that direction must be retraced. It did not occur to the startled bureaucracy that the evils begotten of imperfect emancipation are best cured by a frank and full concession of all the coveted privileges.

No. 66.

[From the Novoe Vremya.]

The Novoe Vremya of August 3, commenting on the article in the Times of the 30th of July, remarks that it is unworthy of so important an organ to print such nonsense, as no one in Russia had heard of a project to drive 4,000,000 Jews out of the country. To begin with, there are nearer 8,000,000 than 4,000,000 Jews in Russia.

"If, however" [the writer goes on to say], "it were possible to get rid of the Jews by wholesale banishment, it would be advantageous to raise a loan even for giving assistance and premiums to those who left the Empire. Unfortunately the Jewish question could not be radically decided by means of banishment."

A further article, on August 5, says that the Times had chosen a time of peace to publish its article about the Jews in Russia, even threatening Russia with a rupture of diplomatic relations with all "civilized countries." The writer then quotes with evident satisfaction the statement made in the House of Commons, that no new measures against the Jews in Russia had been taken of late. After a sarcastic allusion to the Parnell case, and the forged-letter incident, the article says that the Times has now given an asylum in its columns to suspicious Jews who had used the journal in a shameful fashion. Many absurdities were published about Russia in foreign journals, but such an impudent lie had not appeared for a long time.

The Novoe Vremya of August 6, in a third article, says that the Times has now come out in its true colors, and quotes a sentence from that journal to the effect that England must protect herself against an invasion of the Jews from Russia, thousands of whom would quit that country and appear in western Europe. "This shows," the writer says sarcastically, "that in England the defense of the Jews has taken a very strange form, that of recommending the authorities to take measures to prevent an invasion of Jews who might injure the labor interest of that country. On our side," he says, "we acknowledge this last point of view of the Times to be well founded, and we can only won-

der that a journal which is afraid of an invasion of a few hundred, or a few thousand Jews should not understand that Russia is not particularly pleased to have not merely four, but eight millions of Jews permanently resident in the Empire."

No. 67.

[From The American Hebrew, August 15, 1890.]

The London Times prints the following abstract of the repressive edicts directed against the Jews:

"1. Jews throughout Russia (and including Russian Poland) must henceforth reside in towns only, and not in the country. No Jew will any longer be permitted to own land or even to farm land. All Jewish land-owners, farmers, and agricultural laborers will thus be expelled from their village homes, and, unless they have saved the means of subsistence, will be reduced to beggary. To intensify the severity of this edict, and widen its scope, the Government officials have included many hundreds of small towns in the category of country villages and expelled the Jews from those towns. In this manner the number of sufferers from the edict is greatly augmented. Tens of thousands of souls will be thus rendered homeless. These laws, known as the "May laws," were promulgated in 1882, but were never put into force until the present year.

"2. Jews have hitherto been allowed by law to reside in only sixteen of the counties (*gubernia*) of Russia. But the law has not been enforced against such as Riga, Liban, Rostolf, etc.; for, by a ministerial circular of 1880, Jews long established in such towns were permitted to remain there unmolested. The law is now to be strictly enforced, and, by a recent ministerial order, all Jews, numbering many thousands of families, settled outside the sixteen counties are to be expelled.

"3. Jewish artisans who in like manner had, under the law of 1865, been permitted to settle temporarily in places outside the sixteen counties are now to be expelled from these places. Tens of thousands of artisans with their families will, it is said, be affected by this edict, and rendered homeless.

"4. Jews are no longer to be allowed to be in any way connected with mines or mining industry, nor even to hold shares in any mine.

"5. The Jews will henceforth be practically debarred from partaking of any educational advantages, whether in schools, gymnasia, or universities. Hitherto they have been allowed admission subject to the limitation that their number should not exceed 5 per cent. of the total number of students. Secret instructions have already been sent requiring the reduction of this small percentage to still lower limits, and from many of the higher educational institutions all Jewish students have been expelled.

"6. The legal profession, in which heretofore a large number of Jews in Russia have achieved great success, will in future be closed to Jewish students. A law has already been put in force requiring the special sanction of the minister of the interior before a Jew qualified by examination may practice. Since the promulgation of the law not a single sanction has been given, and it is understood that none will be given.

"7. Jews are henceforth prohibited from following the profession of engineer or army doctor, or from filling any Government post however subordinate."

No. 68.

[From The New York Times, Sunday, August 24, 1890.]

UNDER THE CZAR'S EMPIRE—LAWS RELATING TO THE GOVERNMENT OF JEWS IN RUSSIA—EXTRACTS FROM THE CODE—ATTITUDE OF THE ORTHODOX GREEK CHURCH TOWARD OTHER CREEDS.

There has come into the possession of the New York Times a volume with this title:

Законы о Евреяхъ.
Сборникъ извлеченій
Изъ Свода Законовъ Россійской Имперіи
Дѣйствующихъ о Евреяхъ Постановленій.
Составилъ А. Н. Гусевъ.
Харьковъ.
Изданіе Книжнаго Магазина В. и А. Бирюковыхъ,
1889.

The translation of this title-page from Russian to English is as follows:

Laws in Relation to the Jews.
Extracts from the
Code of the Russian Empire
Dealing with Jews
Collected by A. N. Gussief.
Charkoff:
Published by W. & A. Birukoff.
1889.

The place of publication, Charkoff or Kharkov, is the capital city of the district of Kharkova, and one of the great fairs of Russia is held there. Its distance west from Moscow is some 420 miles.

The volume is made up of 290 pages of closely-printed matter, and it contains what is believed to be the entire legislative acts of the Russian Empire relative to the Jews. In the volume references are often made to edicts as being the same as those controlling sects other than those of the Orthodox Greek Church, but the regulations regarding Jews, having to do with their social, economic, and political status, make up the bulk of the volume.

It would be impossible to give but a tithe of this book. The matter, however, now printed for the first time in the United States, has not been subjected to any process of selection. The translation is perfectly colorless, and an endeavor has been made to follow in English the exact meaning of the Russian text. As to the authenticity of the volume, no possible doubts can be raised. It is printed for the use of Jews in Russia, and must have the authority of the Government. Whether intended for study outside of Russia is not known.

Considering the many rumors rife in Europe and in the United States regarding the conditions to be imposed on the Jews in conformity with the edicts of 1882, the translations given below will be found at least opportune. The possibility of the forced migration of some millions of Russian Jews to other countries may give rise to many grave questions. In giving the bald facts, without comment, following out the somewhat awkward phraseology of these edicts, what the will of the Russian Government is, not alone to Jews, but to all others not of the Greek Church, may be understood,

TRANELAHON.

In order to preserve the privileges of the orthodox church and the freedom of other religions tolerated by the State, the administration of the county police is to see that without the decision of the highest administration no new churches are to be built, nor can prayer-houses nor any other buildings be erected devoted to service of a heterodox community.

As members of the municipal council, every person having a right to vote on elections may be elected, including also such persons who have received such a right on authorization. (Sections 20 and 21.) But the number of non-Christian members must not surpass one-third of the whole number of members.

Jews can not be elected at the head of the municipality, nor can they act in their place.

Jews are subject to the fulfillment of all military duties, in accordance with the statutes of the code.

Jews who possess the diploma for the profession of a physician may enter upon government offices in the medical divisions of the western provinces, and in all provinces of Neorussia and Bessarabia, in which provinces only Jews are allowed to live permanently. Jews having a diploma from the university as doctors of medicine or surgery are admissible to Government offices in all provinces, without limitation to that part assigned to the Jews as their permanent dwelling place.

In order to prevent the Jews from avoiding military duty, in the passports given out to those who are subject to the call, their special marks must be stated, as birth-signs, exterior marks, etc.

The county, district, and town committees having in charge military duties are required to subject those Jews to whom delays have been granted on account of weakness or immaturity to sudden examinations, indifferent to the rules governing the actions of the above committees.

For the capture of a Jew who has tried to avoid the fulfillment of his military duty a reward will be given. The amount has been fixed by the minister of the interior, and will be taken from a special credit assigned for this purpose.

As a temporary measure, and until the general examination of the laws referring to Jews is concluded, Jews are not to be allowed to settle outside of cities and towns. An exception is only to be made in reference to Jewish colonies of farmers existing before 1882. This measure is only to be made use of in the districts of the permanent settlement of the Jews.

By a circular of the finance minister of May 25, 1870, it is explained that in giving out the certificates and licenses to Jews for permission to trade or to carry on professions outside of the settlement region, permits are to be required from them as to their right to live and pursue trade or a profession in that locality. Without showing such permits no business can be carried on.

"ART. 363. Jews are allowed to sell intoxicants only in those localties which are assigned as their permanent settlement places, but even there only in houses which they possess as their own. Jewish waiters are to be employed only by their co-religionists.

"ART. 701. No Jew is to be appointed even in the lowest ranks of the frontier guard.

"ART. 1,231. In case of the printing of books written in the Hebrew language which have been secretly forwarded, on discovering these the custom-house officers are bound to send them directly, on their

own account, to the Wilna or Warsaw censure committee, respectively, and to report to the department of custom levies how many books of this kind have been sent.

"Hebrew books coming from foreign countries, as soon as they enter the custom-house, are to be separated from others, and, after having been sealed with lead, are to be forwarded to the Wilna or Kieff censura committee.

"ART. 12. Jews are not allowed to pursue mining industries on crown land, nor to hold shares in any mines, provided the latter are situated in those localities in which the Jews are not allowed to settle permanently.

"ART. 13. Persons excluded from the right of pursuing mining industries are not allowed to be attorneys of other persons in mining affairs. The same regulations apply to the pursuance of gold mining.

"ART. 33. Persons not having a right to engage themselves in good mining, as well as persons who have lost this right, are bound to sell or hand over mines left to them or belonging to them, and equally all shares in such, in course of two years; the former from the day they have acquired the mines or shares, and the latter from the day they have lost their right to them.

"ART. 22. Jews are not permitted to farm crown estates let on lease them in such localities in which Jews are not allowed to settle permanently.

"ART. 35. The temporary owner of a crown estate in the western and Baltic counties may let on lease to all other persons excepting Jews. Persons of Polish descent or Jews are not admitted to public auctions for the purpose of buying (crown) estates.

"ART. 957. Jews are nowhere entitled to use special clothes. Jewesses are not allowed to shave their heads."

In the 9 western counties, Jews without any exception are prohibited from acquiring land from estate owners or peasants.

In view of a temporary measure, and till the general revision of the regulations relative to Jews, the latter are prohibited to settle anew outside of cities and towns, admitting, in reference to this, only such an exception as regards the Hebrew farming colonies existing before 1882. (Regulation of 1886.)

According to a special interpretation given by the government December 29, 1887, Jews are absolutely prohibited from emigrating from those country places where they have lived.

Mortgages held in the names of Jews are to be temporarily suspended; nor shall there be given out certificates for lease in the name of Jews. This is the law in regard to real estate outside of the settlement region, nor can authorizations be had for administrating and managing such estates.

Real estate which is not occupied by Jews outside of those localities where they are allowed to possess land must be sold within six months. This regulation applies also to Jews of foreign countries who inherit estates in Russia.

For the management of post stations outside of cities and towns, if such are disposed of at auction and secured by Jews, the Jews are bound to select Christian attorneys.

ART. 964. Jews who have embraced Christianity are allowed to select for themselves their tax rate and to enter into either town or village community. Embracing Christianity, Jews are released from their former communities and obligations.

On the proposition of the minister of popular enlightenment the

Emperor ordered on June 7, 1885, that there must be a limit to the admittance of Jews to the Charkoff Technological Institute. On March 7, 1886, the law was passed prohibiting the admittance of Jews to the Charkoff Veterinary Institute.

December 5, 1886, the cabinet of ministers through the minister of popular enlightenment have introduced indispensable measures limiting the number of students in higher educational institutions of Jewish youth, of whom a very considerable number are now to be found in various universities. Thus it was deemed necessary to limit the number of Jewish students within the settlement region to 10 per cent., outside of that region to 5 per cent., and in both capital cities to 3 per cent. of the total number of students of each university. In December 5, 1886, and June 26, 1887, the cabinet urged the ministers of popular enlightenment to introduce a measure for limiting the number of Jewish children in the intermediary (secondary) schools. On July 6, 1887, the minister ordered that from the beginning of the school year 1887–'88 Jewish children should be admitted to the intermediary schools of the circle to which they belong in localities within the settlement region to an amount of 10 per cent., in localities outside of that region to 5 per cent., and in the capital cities to 3 per cent. of the total number of schoolboys applying for admittance at the beginning of each school year, including also such schoolboys as come over from one school to another or from a progymnasium to a gymnasium. In addition to this, according to the circular of June 18, 1887, the officers of the schools are allowed to admit only those Jewish children whose parents have given a satisfactory guaranty for regular domestic supervision and for supplying their children with all necessities.

The board of schools in the ministry of education, judging the question whether Jewish school-boys should be exempted from written examination in intermediary schools on Saturdays, have declared that the exemption of Jewish school-boys from work on Saturdays would be a hindrance to the regular course of the school plan; that on entering public educational institutions the Jews are obliged to subject themselves to all demands, and that their entrance to such institutions serves as evidence that they and their parents are no longer bound to that exclusiveness which demands the severest observance of Saturday. Since the gymnasia and other intermediary and higher educational institutions are in a Christian country, they can not but be other than Christian educational institutions, and they are, therefore, by no means bound to accommodate themselves to Jewish or Mohammedan festivals and religious habits. If, on account of local circumstances, Jewish children should be exempted from school work on Saturdays, the school officers must unrelentingly demand from pupils an acquaintance with the lessons imparted on those days. From the beginning of the school year 1875–'76 stipends are not to be henceforth awarded to Jews and Jewesses in the public educational institutions from the funds assigned for the enlightenment of the Jews.

"ART. 987. A Jew can not be elected as mayor of a town, or as a councilor in the town, police or oral judge. (Oral courts are such in which all transactions are oral.) In the same way Jews are not admitted to any other town office. Such are exclusively reserved for Christians. Obligations of judges can not be intrusted to Jews with convenience and decency.

"ART. 992. Foreigners who are Jews are not allowed to settle in Russia, nor to become Russian subjects.

"ART. 1,001. For Jews who are foreign citizens the following regu-

lations have been made: Jews who are foreign citizens and known for their social position and having extensive business transactions, coming from foreign countries to Russia, are allowed to enter on the ground of a special decision from the ministers of finance, interior, and foreign affairs (such a decision to be applied for every term of their visit), and to transact business in the empire and establish banking offices, after having received trade certificates of the first guild. They are allowed to build factories, to acquire and rent immovable uninhabited estates, with the observance of the regulations laid down in the laws on estates. In the same way Jews who come into the realm of the empire temporarily for the purpose of purchasing and exporting Russian products, may be given trade certificates of the first guild with the mutual consent of the ministers of finance, interior, and foreign affairs. Foreign Jews, especially agents of important foreign commercial firms, are allowed to visit certain manufacturing and business seats in Russia in accordance with the regulations laid down in the Code on Passports."

Foreign Jews who do not have such a permit as demanded by section 5, rem. 3 to article 128, Code of Commerce, and present a certificate of having embraced Christianity, must show proofs of their having really joined the Christian faith. They must have been baptized in accordance with the ceremonies of one of the foreign denominations of the Christian faith tolerated in the empire. Foreign Jews who, according to the above regulations, have been allowed to transact business in Russia, do not enjoy the right to employ outside of the limits of the Jewish settlements Jewish clerks.

"ART. 3. Jewish manufacturers may forward for sale products and manufactures of their own factories to the Jews of Nishni Novgorod, Irbit, Koren, Charkoff, and Sinn, but foreign manufactures which are so stamped by custom-houses can not be forwarded by Jews to the above fairs, though these manufactures may have received some change in the factories; for instance, the giving to them another color or the like. Jewish manufacturers who wish to enjoy the right of forwarding their manufactures to fairs in interior counties must, at any rate, furnish them with their own trade stamp.

"ART. 6. Jews are prohibited from forwarding goods in their capacity as agents or employés from frontier custom-houses to localities where permanent settlement is prohibited to them.

"ART. 81. Should one of a married couple originally belonging to the Jewish faith be converted to orthodoxy while the other remains in the former faith, but wishing to live together, they are to be left in marriage without compelling them to be divorced, but they are bound to follow these rules. The married person who is converted must take care to bring the other party over by means of persuasion to the orthodox church. If husband or wife, in case one of them is converted, should refuse to live with the other, the marriage is dissolved, and the converted man or woman is allowed to marry an orthodox person. But in case the marriage is not dissolved, neither husband nor wife are allowed to live outside of the Jewish settlement.

"ART. 87. The marriage of Russian subjects of evangelical confession with Mahommedans and Jews takes place in accordance with the regulations laid down in the code on the Evangelico-Lutheran Church in Russia.

"ART. 330. Jews are admitted to the witness-stand on Christian affairs in all the counties of White Russia and the western counties alike with all Russian subjects, but on affairs of Jews who have embraced Christianity their former co-religionists, *i. e.*, Jews, are admitted to the wit-

ness-stand in the Jewish settlement only when there is no sufficient number of Christian witnesses.

"ART. 210. Marriages of persons of the Evangelico-Lutheran denomination * * * with Jews are allowed on the following conditions: 1. That the persons confessing the Christian faith may first apply for and receive a permit from the local consistorium. 2. That the marriage ceremony should be performed only by an Evangelico-Lutheran minister and according to the ritual of that Church, and by no means according to that of * * * the Jews. 3. That the other side must bind itself by a written act to baptize and bring up children who might eventually spring up from this marriage in the Evangelico-Lutheran faith, or, if both sides agree to, in the orthodox faith, and to be ready in the opposite case to be submitted to the severest punishment; and they should promise also not to try to convert husband, or wife, or children to its own faith, nor to hinder them in the free pursuance of their religion. In addition to this, the non Christian party must, by marrying a Christian, renounce polygamy.

"ART. 701. The baptism of a Jew must take place only in city churches, on a Sunday or holiday, in the presence of those assembled for communal service, and with all possible solemnity. The baptized persons, provided they have reached the necessary age (art. 166), fifteen years, must partake of the Holy Communion.

"ART. 1062. In every town or settlement where the number of Jewish houses does not surpass thirty, only one prayer-house is allowed; where the number of houses does not surpass eighty they are allowed to have, besides, a prayer *schule*, also a synagogue; but where the number of houses is beyond eighty, one *schule* is allowed for every thirty, and a new synagogue for every eighty houses."

Jewish merchants who for business purposes live in St. Petersburg and Moscow must, by special petition sent in to the mayors of St. Petersburg and the general governor of Moscow, state the number of Jewish clerks and domestics absolutely necessary in moving to the named capitals. The granting of such petitions and the determination of this number is according to the will of the mayor or general governor respectively. Jewish merchants registered in other cities than those named may take of their co-religionists not more than one clerk or office man and four domestics of both sexes for each family.

Although Jewish merchants of the first guild, etc., may have had their children with them in the privileged counties for ten years, as soon as the latter begin to transact business for themselves they are not entitled to similar rights.

The Kieff police in May, 1888, established the regulation that Jews who have been three times convicted of having lodged Jews who have no right to reside in the city of Kieff, are to be deprived themselves of this right and at once banished from the city.

"VII. Till the general revision of the temporary laws on Jews the following regulations are to be observed: In the territory of the Don, Jews are prohibited from owning farms or real estate and can not settle permanently on legal passports. This regulation in regard to settlement does not apply to Jews in possession of the academic degree of a doctor of medicine and surgery or a doctor of medicine, and equally of that of a doctor, master, or candidate in other faculties of a Russian university, as well as those appointed to service by the administration.

"ART. 19. Jewish cutters and tailors are allowed to settle in the neighborhood of regiments and military academies in the inner countries only for the term of their agreement with the military govern-

ment, but not more than one such Jew for each regiment and military academy, and in addition to it under the supervision of the local police. These Jews must fulfill the regulations laid down in the laws relating to their manner of living in localities outside of the Jewish settlement. It is severely prohibited for them to engage in almost any other profession or money transactions.

"ART. 20. In the counties of Vitebsk and Mogileff the Jews are permitted to construct roads in villages, with the condition that they have no right to permanent residence after the expiration of the time of the work.

"ART. 30. Jews are not allowed to live in or enter Siberia within the limitations found in the code on banishment.

"ART. 31. Since women, according to the common law, follow the rank of their husbands, Jewish women married to Christians may live in the same places as their husbands; but in such cases, when a Jew embraces Christianity and his wife remains in her own faith, and their marriage has not been dissolved according to the civil laws, neither the one nor the other is permitted to live permanently in those countries where Jews are not allowed to settle.

"ART. 32. The mayor of Sebastopol and the military governor of Nicolaieff have a right to allow in the cities intrusted to their care the widows and mothers of the lower ranks (military Jews) who are employed in the naval department, and who reside, on account of their service, permanently in the named cities, but not unless an accurate conviction is gained of the virtuous character of such widows and their impossibility to gain a livelihood without the aid of their children.

"ART. 46. In performing the holy baptism on a Jew the ecclesiastical consistorium is bound to inform the local county administration of that place from whence the necessary certificate has been given to him for the purpose of embracing the orthodox faith, in order that he may be henceforth named in the rank in which he is a convert from the Jewish faith to the orthodox denomination, and under that name which he received on baptism. This is to be stated also in the acts given to converts for the purpose of free residence in their places of living and traveling to any place for the purpose of commerce, industry, or some other cause; if he is in a military or any other position, the same is to be stated in the testimonials given to him on being dismissed from the army.

"ART. 62. Endeavors to induce persons to become heretics, as well as every exterior appearance of heresy on the part of its followers and every action which is liable to give offense, are strictly prohibited. In 1825, in reference to Jewish heresy, it was explained that by 'exterior exposing to view' was meant any gatherings from various houses into one for the purpose of prayers, circumcision, wedding, burial, and other ceremonies having no similarity with those of Christians. By offenses is meant every action antagonistic to Christianity, and especially mockeries at the regulations of the Church and its followers. At the same time it was explained that the Subbosniks and Judaizers really are Jews, since they observe the Mosaic law, that this sect has arisen among the Christians from native Jews who lived among Christians, and that its essence consists in the observance of the Jewish holidays and ceremonies.

"ART. 73. The principal and dominating faith in the empire is the Christian orthodox Catholic of Oriental derivation. But all not belonging to the members of the dominating church who are subjects of Russia, native or accepted as subjects, as well as foreigners being in

Russia or temporarily residing in Russia, enjoy all the rights to follow their faith and do services according to its ceremonies; this right of freedom of religious exercises does not apply only to Christians of any other denomination, but also to Jews.

"ART. 85. The above regulations of toleration, which the Government observes, bind every ecclesiastical power and every private person of any other Christian denomination, or of any other non Christian faith, not to mingle itself with affairs of belief in persuading the conscience of followers of any other faith.

"ART. 93. A follower of any other belief who has converted a Russian subject to his own faith, in whatsoever a manner or under whatsoever a pretext, is subject with the convert to trial by virtue of the code on punishments.

"ART. 94. Jews may, if they wish, accept the Christian faith of any tolerated denomination, according to the regulations especially laid down by the clerics for this purpose, with the permission of the minister of the interior, and without such if the person to be converted is in a dangerous sickness.

"Minor Jewish children may be joined to one of the tolerated Christian denominations without requiring a special permission of their parents (1832).

"ART. 107. Persons of non-Christian faith are prohibited from painting images, making crosses, or similar subjects of honor among Christians, as well as to traffic with all named subjects (f. i.) with wax candles.

"CODE OF CENSURE AND PRINTING.

"ART. 158. Jews may receive permission to open, without any hinderance, but in accordance with the order established by this code, printing houses for the purpose of printing exclusively Hebrew books, in all localities within the Jewish settlement where the minister of the interior will find it possible and convenient to employ special Hebrew censors.

"CODE ON THE BANISHED.

"ART. 40. Jewish women are allowed by the common law to follow their banished husbands to Siberia, provided they themselves wish to do so. They may receive also a permission to take with them their minor children of male sex up to five and female sex up to ten; unmarried daughters also beyond that age, provided they themselves express such a desire. To allow such Jewish children to go to the communities can not be prevented, but husbands can not follow banished Jewesses and minor children. Only children at the breast are allowed to be taken, but not without the permission of their fathers.

"ART. 263. Jews banished to Siberia are not allowed to settle within a distance of 100 versts of the Chinese frontier.

"ART. 184. For inducing, by persuasion or any other means, any person to leave the Christian, the orthodox faith, or any other denomination, and go over to the * * * Jewish faith, * * * the guilty persons will be sentenced to be deprived of every right of rank and to banishment for a period of from eight to ten years. When in addition it has been proved that the person has used force, then the person is sentenced to be deprived of all rights of rank and to banishment with penal servitude for a period of from twelve to fifteen years.

"ART. 1886. If * * * Jews married to persons of Evangelico-Lutheran or Reformed denomination have, against their written prom-

ises, brought up their children not in the Christian faith, or have induced by threatenings or persuasion the other party or the children to go over to their faith, or have hindered them from freely practicing the ceremonies of their religion, the marriage is dissolved and they are punished by the deprivation of all rights of rank and by banishment.

"ART. 530. A Jew who has hidden a Jewish deserter, though for a very short time, or who has given him any aid in escaping, is punished by imprisonment in the houses of correction for a period from one to one and a half years. In addition, the Jewish community in which a deserter has been hidden must pay a fine of not more than 300 roubles for each person, provided it has not informed the administration of the fact.

"ART. 1171. Jews transacting business outside of the Jewish settlement, except such as is allowed to them in special regulations relating to such an occasion, are subjected to confiscation of their goods and immediate dismissal from their settlement.

"The excep ed persons from corporal punishment among Jews are: (34) All clerical persons of non-Christian denominations and their children; (36) Jewish colonists who have distinguished themselves in husbandry and received gold or silver medals; (3-) all aged persons of not less than seventy years.

"ART. 4194. Christians are prohibited from serving as domestics in Jewish families."

JEWISH PASSPORTS.

Outside of the Jewish settlement Jews are allowed to reside temporarily, for the purpose of accepting an inheritance; for the purpose of searching for legal rights of property in judicial and administrative localities; for business and for the sake of auctions on deliveries of goods to take place within the Jewish settlement. For all such cases the police administration may allow a Jew to reside not more than six weeks—to remain longer depends upon the county administration, provided sufficient reasons for prolongation of stay are given; but the county administration can not prolong the stay for more than two months without permission of the higher administration.

Jewish female teachers are not allowed to live outside of the Jewish settlement. Jews, natives of the empire and the counties of the realm of Poland living under the name of Christians in places where Jews are not allowed to reside, are to be immediately sent back to the counties where alone they have a right of residence.

NOTE.

The following dispatch from the United States Minister at St. Petersburg was received at the Department of State after the foregoing correspondence had been sent to the printer, and it is included here as pertinent to the resolution:

Mr. Smith to Mr. Blaine.

No. 44.] LEGATION OF THE UNITED STATES,
St. Petersburg, September 25, 1890. (Received October 14.)

SIR: You have been advised by previous dispatches from this legation that the published rumors of new proscriptive measures or the re-

vival and oppressive application of old and obsolete edicts against the Hebrew residents and subjects of the Russian Empire are declared by the Russian Government to be entirely groundless. Notwithstanding the authoritative denial of these reports they still crop up from time to time and are persistently repeated with a degree of circumstance well calculated to create the impression that they have some foundation of fact. This continued imputation of purpose and acts, to which, if really entertained or executed, we could not be indifferent, renders it proper that I should apprise you of some further evidence on the subject.

The statement recently appeared in the columns of the London Times that despite the disavowal of the Russian Government some five or six hundred Hebrew families residing at Odessa had been summarily notified that they must immediately abandon their homes, and in fact that they had already been expelled from the country. It has come to my knowledge that, in view of this publication, the British embassy at this capital called on the British consul at Odessa to investigate the story and report upon its truth. His report has now been made, and I am able to communicate its substance. He directed his inquiries not only among the government officials, but among the Hebrews themselves, and the latter were as emphatic as the former in declaring that no order of the character described had been issued and no movement of the kind attempted. He found no confirmation of the story in any quarter. A number of Hebrew families had emigrated or were preparing to do so, but this action was entirely voluntary on their part and was not taken under compulsion. This emigration was explained by the rabbis and the highest authorities among the Hebrews as due to the fact that there were many youths in these families, and that as the number admitted to the universities in Russia is limited they removed to other countries to secure the opportunity of higher education; and thus it was made clear that there was no foundation for the particular charge which had been preferred against the Government.

These reports of new proscriptive designs against the Hebrews on the part of the Russian Government have naturally created more concern in other countries than here because, so far as can be ascertained, they had their sole origin and obtained their only credence remote from the scene. Had there been any good reason for supposing that measures so repugnant to every sentiment of justice and humanity were actually undertaken or seriously contemplated, it would have been a duty to report them for such consideration as they would have required. But it is a source of special gratification to be able to present not only the denials of the Government, but confirmatory testimony that these injurious allegations are baseless.

I have, etc.,

CHAS. EMORY SMITH.
